leans, Louisiana, at which time the Honorable W. D. Bullard will be requested to preside, unless there be some agreement to the contrary, at which time the testimony in rebuttal, of Louisiana, will be resumed; and if in the meantime, in the opinion, or by agreement of counsel, anything should prevent the meeting on that day, another day will be fixed, by agreement; both counsel waive the ten days' notice required by agreement; at which time the counsel for the State of Mississippi will be permitted to introduce in evidence any and all documentary evidence which may be at that time in their possession which they desire to introduce; thereupon, the hearing was adjourned.

Resumption of Proceedings.

NEW ORLEANS, LA., September 5, 1904.

Pursuant to adjournment, the commission met at the office of the clerk of the United States district court in New Orleans, Louisiana, this Monday, September 5th, 1904, at eleven o'clock, a. m., for the purpose of taking further testimony and filing further evidence on the part of the State of Louisiana in rebuttal. The Honorable Frank H. Mortimer, commissioner for the State of Louisiana, being absent, by agreement of counsel the testimony shall be taken and the evidence noted, by the Honorable W. D. Bullard, com-
989 missioner for the State of Mississippi, and the proceedings continued temporarily before him.

Present: W. D. Bullard Esq. commissioner.
John Dymond Jr., Esq., F. C. Zacharie Esq., associate counsel for Louisiana.
Monroe McClurg, associate counsel for Mississippi.

JOHN M. PARKER, witness, sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. DYMOND:

Q. Mr. Parker, you live in this city?
A. Yes sir.
Q. How old a man are you?
A. 41.
Q. What is your occupation?
A. Cotton factor.
Q. Have you ever been president of the New Orleans Cotton Exchange?
A. Yes sir.
Q. Have you ever occupied any other prominent positions in this community?
A. Yes sir.
Q. Will you please mention them?
A. President of the board of trade.

Q. Are you familiar at all with what is commonly known as the Mississippi coast, or across the lake?

A. I think so.

Q. The southern portion of the State of Mississippi?

A. Yes sir.

Q. What part of your life have you spent there?

A. Most of it, during the summer for probably 30 years.

Q. Have you owned property over there?

A. Yes sir.

Q. Is your family accustomed to staying over there during the summer?

A. Yes sir.

Q. Are they over there now?

A. Yes sir.

Q. Are you at all familiar in any way with that territory south of Bay St. Louis, commonly called the Louisiana marshes?

A. I am.

Q. Have you ever visited that territory?

A. Many times.

Q. That territory is in dispute in this case between the State of Louisiana and the State of Mississippi; can you tell us, so far as its name is concerned, to what State it has generally been recognized as belonging?

A. Louisiana.

Q. What is that territory generally called?

A. Louisiana marsh.

Q. Have you had occasion to circulate amongst the people over there who would have occasion to visit that locality?

A. Quite a number of them.

990 Q. Have you ever heard them call the territory any other name than the Louisiana marsh?

A. No sir.

Q. Does that territory include the extent of coast from Isle à Pitre on the east to Malheureux point on the west, as shown by map No. 59? Here is Isle à Pitre to the east, and here is Malheureux point to the west, and here is Bay St. Louis immediately to the north?

A. Yes sir, I regard that entirely as the Louisiana marsh.

Q. Have you ever heard anybody contend that that belonged to the State of Mississippi?

A. No sir.

Q. Were you brought in contact with Mississippians who frequented that locality and lived along the Gulf coast, which was called by us "Over the Lake"?

A. Yes sir.

Q. As belonging to what State did they generally recognize that territory?

A. For the last four or five years we have had a schooner in commission, which has regularly had a Mississippian aboard as captain,

and they always referred to it as the Louisiana marsh; they are professional oystermen during the winter.

Q. Do you know where the deep channel line is in Mississippi sound, extending from East Pearl river to the pass between Cat island and Isle à Pitre?

A. Yes sir, it is Cat Island pass, and is marked by black buoys lying there north of Merrill's shell bank. We regard that as the dividing line.

Q. What dividing line?

A. As the line between Louisiana and Mississippi; that is the line I have always known.

Q. Is that so generally regarded?

A. I think so.

Cross-examination by Mr. McCLURG:

Q. I would like for you to be a little more definite, if you can, Mr. Parker, than in saying that has been generally regarded as the dividing line between the two States, in this, generally regarded by whom?

A. Well, I should say generally regarded by oystermen, and the men who cruise out there constantly, fish there. They would refer to going over to the Louisiana shore when we got beyond that channel; that is the term that we regarded it on the coast where we were fishing constantly.

Q. I believe you stated that is of recent years?

A. Yes sir; I do not go back a very great distance; probably 20 years in fishing. Of course I have no positive knowledge in regard to the boundary line, it was only what I heard, that this is the Louisiana marsh, and that it is the channel that is generally regarded as the line.

Q. I wish you would please tell us, if you can, exactly, and if you cannot exactly, approximately, as best you may, the distance from the junction of the eastern mouth of Pearl river with Lake Borgne, around the coast to the Sabine river.

A. To the Sabine river?

Q. Yes.

A. I do not know, I have no idea.

Q. Can you tell us about what the distance is from the
991 mouth of Pearl river to Malheureux point?

A. No sir; most of my distances go straight across the lake.

Q. Yes, I understand that it is important for me to get the others if I can. Can you say whether the deep water sailing line, or the deep water channel, which it is some times termed, is nearer the marshes than it is — the Mississippi shore?

A. It varies there; I should not think that going through Cat Island pass, it is probably more than three quarters of a mile at the outside between the southern end of Goose point and the north end of Isle àPitre, and this channel passes right in between Cat Island pass.

Q. Did you ever notice how near that channel passes St. Joe?
A. St. Joe is wiped off the map.
Q. Where it used to be there was a light-house on St. Joe?
A. Yes sir.
Q. The light-house is north of the channel, the St. Joe light-house.
A. Yes sir.
Q. Do you know an island that is called Half Moon, now, I believe; before that, I believe it was called Grand island?
A. You mean Half Moon island?
Q. Yes?
A. Yes, I know Half Moon island.
Q. Which side of that channel is it on?
A. I would have to look at that map; it is on the south side, of course, of that island.

By Mr. DYMOND:

Q. This is the shore line. Here is your St. Joe beacon. Here is your channel here?
A. Yes sir.

Cross-examination.

By Mr. CLURG:

Q. Did you ever hear what you call the Louisiana marsh called Grand marsh by anybody?
A. No sir, I have not. They wash away there and change so much by every storm, it is hard to refer right away to a point.
Q. You have never heard any discussion prior to the institution of this suit, or within a year before the bringing of this suit, on the 27th day of October, 1902, as to where the line was between these two States in the waters down there?
A. Yes sir, I think I have.
Q. A discussion of the kind?
A. Yes sir.
Q. By whom?
A. By a number of these men handling oysters; I know quite a number of them, and I think the question first arose in regard to dredging; they used some dredges for a while in shallow water, and that was knocked out by Mississippi, and they claimed they could dredge in Louisiana waters, and they came over in Louisiana waters and dredged there.
Q. Do you know whether the Mississippians undertook to prevent dredging south of that channel?
A. Not to my knowledge; this is only hearsay, as I say, from these oystermen, whom I know, quite a number of them.
992 Q. You would not undertake to deny that the Mississippi Oyster Commission have patrolled Creole gap, Grand pass, Sundown island, in that county?
A. No sir, I have no idea about that. I have seen the boats out

here, and been sailing there with them, up with them, but did not know what they were doing.

Q. These buoys indicate——

A. Indicate the channel, and it is southeast of Pass Marianne light.

Q. Buoyed by the Federal Government?

A. I think so.

Q. For navigation, and commercial purposes, rather than any effort to indicate the line?

A. I suppose for navigation; I do not know.

Redirect examination by Mr. DYMOND:

Q. Will you please look at this map, No. 59, and as — was stated by General McClurg that Half Moon island was sometimes called Grand island, you will please look on the map and state whether you can find Grand island on that map?

A. There is Grand island, here.

Q. You have found it?

A. Yes sir.

Q. On which side, north or south of the deep water channel is that island?

A. Grand island?

Q. Yes.

A. As to the deep water channel?

Q. Yes.

A. It is north of it.

Q. Do you see the deep water channel on the map?

A. Yes sir, right here.

Q. Well, which direction do you consider to be north?

A. Why, from this side, right direct; the channel is north of Grand island.

Q. And the island is south of it?

A. You asked me which side of that channel it was; the channel is north of the island, and the island is south of the channel. You asked me a while ago——

Q. You were asked a while ago and you denied having any knowledge of any patrol or control of the waters of Grand pass or Isle à Pitre by Mississippians; do you know whether the Mississippians did have a patrol boat in the control or patrol of their oyster industry?

A. I do not.

Recross-examination.

By Mr. MCCLURG:

Q. Do you know whether they had an oyster inspector or not?

A. I do not know. I only heard those points were all in dispute between the two States.

993 ALEXANDER BREWSTER, witness, sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. ZACHARIE:

Q. How old are you?
A. I am 72.
Q. Where do you reside?
A. I reside at 1415 Esplanade street, New Orleans.
Q. Are you familiar with the territory lying between Isle à Pitre and Malheureux point?
A. I cannot say that I am familiar with the interior; I have not been there more than three or four times in my life. I have been in Chandeleur sound and Cat Island pass. I am familiar with them.
Q. You say you have never been in the interior——
A. What I mean to say is I never went in through the marshes in those bayous and bays, but I have always confined myself to the Chandeleur sound and Cat Island pass.
Q. Are you familiar with the coast line between Isle à Pitre and Malheureux point?
A. Yes sir.
Q. How long have you been familiar with that?
A. About 1855 or 1853.
Q. Since 1853?
A. Yes sir.
Q. You have been commodore of the Southern Yacht Club for some time?
A. Past commodore.
Q. You have yachted and sailed in those waters?
A. Yes sir.
Q. Do you know what that territory lying between Isle à Pitre and Malheureux point is commonly called by Louisianians and Mississippians, so far as you know?
A. The Louisiana marsh.
Q. Have you ever heard it called by any other name?
A. Not until the—after the oysters got scarce in Mississippi.
Q. When did they first commence to call it——
A. I heard them say that the Mississippi government had some claim on it about ten or twelve years ago.
Q. Are you familiar with the deep water channel running from the mouth of East Pearl river and down between Cat island and Isle à Pitre?
A. I went through that channel pretty often.
Q. Have you ever heard the boundary line between Louisiana and Mississippi discussed in relation to the bearing of that channel?
A. Not after you left East Pearl river; everybody that I ever heard it discussed by said that all belonged to Louisiana.
Q. All what? All south of that channel?

A. Yes sir.

Q. You have had conversations with Louisianians and Mississippians on the subject?

A. Many times, speaking of the deep water channel.

Q. You mean the channel that goes out from East Pearl river and runs down to the southeast between Cat island and Isle à Pitre?

A. Yes sir.

Cross-examination.

By Mr. McCLURG:

Q. When did you first hear that discussed, Captain?

A. About 8 or 10 years ago, I think.

Q. Do you remember any of the participants in the discussion; the names of any of the gentlemen you heard discuss it?

A. No sir, I do not; they were all oystermen, though.

Q. Do you remember what provoked the discussion?

A. By some people in Louisiana stating that they came over to take the oysters, the Louisiana oysters; that is all.

Q. How long has that been since you were in that country?

A. Since I was in it?

Q. Yes.

A. I guess over ten or 12 years ago.

Q. You heard no controversy as to the State boundary?

A. No sir.

Q. You spoke of when the oysters began to get scarce in Mississippi?

A. Yes sir.

Q. Is that about 10 or 12 years ago?

A. That is the time I heard this discussion. I do not know whether the oysters got scarce or not; I am not interested in oysters.

Q. Do you know what portion of Mississippi they began to get scarce?

A. I know there was none on the Pass Christian reef. I understood that East Pascagoula had none; I understood that they got them all from Grand pass.

Q. Not having been there for 10 or 12 years, you would not be able to contradict the statement that they are more plentiful there now than they were then?

A. Possibly they are, only through transplanting, because the schooners, the last time I was down there, there were schooners getting plants south of Point Chico.

Q. What schooners, Mississippi schooners?

A. Yes sir.

Q. They fished in the neighborhood of Point Chico on up to Isle Pitre, did they not, then?

A. Yes sir, even south of Point Chico, Mitchell's point, and along that way.

Q. Especially about Grand pass and Sundown island?
A. I do not think there were many at Grand pass; I do not thin
they left many there.
Q. Do you know where Karako bay is?
A. I cannot say.
Q. You are not familiar with the inland of the marshes?
A. I have only been in there three or four times; then it was o
business during the war.
Q. To what points did you go then?
A. I went through Nine Mile bayou.
Q. Did you go through Nine Mile bayou?
995 A. Yes sir.
Q. To what place?
A. Through Nine Mile bayou to old man Teel's place on Lak
Borgne.
Q. You went from the northern mouth of Nine Mile bayou?
A. Well, I went from Biloxi; I started from Biloxi.
Q. Your next trip in there?
A. The next trip, I went to some other portions inside; that is,
went in Three Mile bayou, and I came out at Point Chico, and the
went inside Point Mitchell—they used to call it that, I think, the
came into the River Aux Chien, back of Pointe à la Hache.
Q. What did you use for transportation through there?
A. A sailboat.
Q. What draft was it?
A. About two and a half feet.

Redirect examination.

By Mr. DYMOND:

Q. You spoke of Point Chico. Do you know how far south Poin
Chico is from the main land or shore of Mississippi in mile
roughly?
A. Well, roughly it is considered nine miles to Cat island, is i
not? from the main land?
Q. Yes.
A. Then 15 miles is what I always considered Point Chico.
Q. Then was, or was not Point Chico more than 18 miles fro
the Mississippi coast?
A. I wouldn't like to walk it for 18 miles on a warm day.
Q. You think it is more than 18 miles?
A. Yes sir.
Q. Then it was not in the territory in dispute in this case if th
contention is confined to 18 miles from the Mississippi coast?
A. No sir.
Q. And you say Mississippians fished there some years ago?
A. Yes sir.
Q. When you speak of getting plants south of Point Chico, d

you or not refer to a better grade of oyster which cannot be gotten from Mississippi sound?

A. Well, I suppose they picked out the best they could get.

Q. Was I correct in understanding you to use the words plants?

A. Yes sir.

Q. Is that a better grade of oyster?

A. I know very little about the oyster business.

Q. How did you happen to use the word plants?

A. Because they told me they were for plants, they told me they plant oysters. They went there and got them in the summer time and they were to plant oysters for the winter, that was the time they were getting them in the summer time, I met some of them then.

Q. Where were they to be planted?

A. I think the men said it was to plant them outside Deer island.

Q. In Mississippi?

A. Yes sir, south of Biloxi.

996 Recross-examination.

By Mr. McClurg:

Q. How far is Point Chico east of the high tide mark on the Louisiana main land?

A. Well, now, when you come to talk about high tides, you have got me.

Q. Do you know where the high tide mark is on the Louisiana main land?

A. I don't know that anybody else knows, there is only a raise and fall of about 18 inches.

Q. Most of that marsh territory down there is inundated by the high tide?

A. Yes sir and by the eastern gales of wind.

Q. What I wanted to ask you was this, if you knew where the high tide mark was on the Louisiana main land, about?

A. You will have to start—you see that is a very long marsh and I told you I was not familiar with the marsh in particular. Now I am less familiar with the main shore because I don't know where it commences?

Q. You have never been along the main shore line?

A. I suppose that is a continuous marsh, some places it is cut up into bayous, bays and lagoons.

Q. I want to find the point where the bayous and bays and lakes and lagoons of the marsh stop and the solid unbroken land of Louisiana begins?

A. I can't inform you.

EMILE J. O'BRIEN, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. ZACHARIE:

Q. What is your name?
A. Emile J. O'Brien.
Q. Where do you reside?
A. I live in New Orleans.
Q. How long have you been residing here.
A. 61 years and 11 months.
Q. That is your present age?
A. Yes sir.
Q. What is your occupation or business?
A. Just now, nothing.
Q. What were you formerly engaged in?
A. In the cotton press business.
Q. You have been an officer of some yacht association?
A. Yes sir, I was commodore of the Southern Yacht Club for eight years.

Q. What is the Southern Yacht Club?
997 A. The Southern Yacht Club, it is an association for yacht racing and cruising etc.
Q. Composed of what members, from where?
A. All over the city and elsewhere. We have members from all round Memphis and everywhere else, we have 800 members.
Q. Have you any members from Mississippi?
A. Yes sir.
Q. How many do you think?
A. I don't know; I couldn't tell you that, but I know we have some. Dr. Robinson at the pass is one, because I had him elected a year ago and Mr. Parker is a member.
Q. Is that the principal yacht club in the South?
A. Yes sir.
Q. Are you familiar with the territory running from Isle à Pitre to Malheureux point?
A. Yes sir, all that territory, I have cruised around there I don't know how many times, ever since I was a little boy.
Q. About what age did you commence?
A. About 10 or 12 years I used to go cruising around.
Q. And you have continued how long?
A. Well, up until the last two years. I have not been out much in the last two years. I have been going to all these regattas instead of cruising.
Q. What is the name by which that territory has been known by Mississippians and Louisianians?
A. You know, of course, I am almost as much a Mississippian as I am a Louisianian, because we have lived at Bay St. Louis in the

house my brother lives in now, it is the old homestead my father built 60 years ago and we still reside there, but I can't remember very well that far back, but I guess I can remember about 45 or 50 years back.

Q. What has this territory which I have just spoken of and which you have just testified about been known as amongst Mississippians and Louisianians?

A. It has been known by everybody as either the Louisiana shore or the Louisiana marsh.

Q. Did you ever hear it called by any other name?

A. No sir.

Q. You say, did I understand you correctly, you say you pass every summer at Bay St. Louis?

A. I missed nine summers there, five years nearly when I was at college and from college I went to the war, so I was absent about nine years.

Q. With that exception you have been a summer resident there?

A. Yes sir; every summer.

Q. Did you ever hear this territory called by any other name by anybody?

A. No sir.

Q. Have you had frequent intercourse with Mississippians, oystermen, fishermen etc.?

A. Yes sir; I know a great many of them there.

Q. Have you heard them call this territory by any other name than the Louisiana marshes?

A. No sir; until recently.

Q. What do you mean by recently?

A. Within the last five or six years, until this commission that Mississippi got up, the oyster commission.

Q. Do you know the deep water channel that runs out of the mouth of East Pearl river down first eastwardly and then southeastwardly between Cat island and Isle à Pitre?

998 A. Yes sir, I have been through there hundreds of times. There are two channels, what we call the deep water channel and a shallower channel. If you follow the Louisiana shore out the Isle à Pitre channel about four miles and go right along the whole coast you will see it is buoyed out; the deep water channel comes up more to the eastward and then goes out Cat Island pass.

Q. Have you ever heard that channel spoken of as being the boundary between the State of Louisiana and the State of Mississippi?

A. We have discussed it; we did not know anything about it, but we always considered, after leaving East Pearl river and following along St. Joe channel, the islands to our port or left, Grassy island; and Half Moon island, and the territory south, we always considered in Louisiana. I don't think there was any question about that, I never heard that questioned and we have discussed it hundreds of times.

Q. With whom have you discussed it, with Louisianians, sippians or who?

A. Louisianians, and Mississippians both. Every time we cruising we had a different crowd on the boat; unfortunately all of them are dead. I feel a little lonesome now——

Q. Could you mention who were the Mississippians with you have discussed this boundary line?

A. Well, really I couldn't tell whether they were Mississip or not. I have discussed it with so many of them that I could remember exactly who they all were; they were mostly Lou ians of course.

Q. And you say you never heard any question raised about boundary line until the last four or five years?

A. No sir.

Cross-examination.

By Mr. McCLURG:

Q. If I understand you correctly, in sailing along there you would just say this is Louisiana on this side and that is Mississippi that side?

A. Yes sir, that is the dividing channel. Leaving East Pe river there is a channel that goes right out; in fact, it is buoyed by the Government, the deep water channel and the shallow ch nel as I told you that goes right along by Grand pass and goes Isle à Pitre until you strike Cat Island pass.

Q. Those cursory discussions about this side being Louisiana a that [illegible] being Mississippi and this being the deep water channe that [illegible] reference at all to what the Constitution or acts of Co gress or the acts of these two States designated as the boundary b twee[illegible] the two States did it?

A. No sir; it was just general, we knew that East Pearl river wa the dividing line between Louisiana and Mississippi and naturall concluded that the deep water channel would make the balance o the line.

Q. That was just a natural conclusion and not a legal deduction?

A. Yes sir, we were not studying up the subject at all.

1909 Q. And you knew, I suppose, that if the law fixed it somewhere else, this general idea was not worth much?

A. Well, we were not naturally law breakers so of course we would have respected the law.

Q. How many islands are between Malheureux point and the northeastern end of Isle à Pitre?

A. You mean those shell banks?

Q. I mean where the land protrudes above the water?

A. I don't know.

Q. There are a great many?

A. Yes sir. There are a line of islands—I would not call them islands though, they are shell banks.

Q. Well, there are a string of those shell banks or whatever you might call them, that do protrude above the water?
A. Yes sir, they are all along that coast, north of Isle à Pitre, except where those channels are, it is all shell banks.
Q. Grassy island is north of Isle à Pitre?
A. Well, not exactly north, it is kind of north.
Q. You have referred to those islands——
A. I mean those shell banks; there are no islands there because they are just little shell banks.
Q. Between Isle à Pitre and Malheureux point?
A. In there are all shell banks, there are really no islands, they are all shell banks, outside of them is where you get the oysters, on the edges of them.
Q. You know where Nine Mile bayou is?
A. Yes sir.
Q. Have you ever gone down through that from the——
A. No sir; I have fished at the mouth.
Q. Never have been through it?
A. No sir.
Q. You have never been through Three Mile bayou?
A. No sir; I have fished along the mouth.
Q. Ever been through Johnson's bayou?
A. I have been down there fishing.
Q. You have not been through it?
A. No sir, only a half a mile.
Q. Ever been through Turkey bayou?
A. I don't know all the names of those bayous.
Q. You know where Grand pass is?
A. Yes sir.
Q. Ever been through that?
A. Only once.
Q. When?
A. 10 or 12 years ago.
Q. How did you go through it?
A. I went right through.
Q. In what?
A. In our boat, in a sloop.
Q. How much water did she draw?
A. Two feet and a half.
Q. Did you ever go through Creole gap?
A. I believe I have, I don't remember.
Q. You know where it is?
A. Yes sir.
Q. Do you know where Sundown island is?
A. No sir.
Q. You spoke a while ago about having conversations with fishermen from these two States. Is it not true that up to within the last few years, when Louisiana and Mississippi created their oyster commissions and began to give this territory some special attention

1000 that before that time Louisianians, Mississippians and Alabamians and everybody else fished anywhere they wanted to through all that country?

A. Yes, sir; however, there was never any discussions until they organized all those canneries in Biloxi and when the oysters got scarce in there, then they came up along the keys up there where Isle à Pitre is, over along there, then they commenced to dispute and there was some talk whether that was Louisiana or Mississippi.

Q. When was that?

A. That was before the commissions were even organized.

Q. How long?

A. When the oyster canneries were organized. When were they organized.

Q. I think about 1882 probably?

A. It was about 1882. They dredged all the oysters out and it was only when they got those dredge boats and cleaned out everything on the other side then they commenced to dredge in there.

Q. You are speaking from information?

A. From what I saw.

Q. Do you mean to say that you saw they had fished all the oysters out of there?

A. Nearly all, they got so scarce they were not worth fishing for any more over there.

Q. Don't you know, as a matter of fact, that they have increased in there ever since they have been fishing and dredging?

A. I don't know that.

Q. That year after year there are more oysters, the oysters have been increasing instead of decreasing?

A. I don't know that to be a fact.

Q. And there are more oysters there now than before the canneries were put there?

A. I don't know. I have not had any experience in it.

Q. The reason I ask you that question is I wanted to be sure whether you were speaking from your own personal knowledge as to the destruction of the oysters. I am sure you were not because I believe it is a mistake?

A. There is no doubt they have worked the banks pretty hard but they have formed other banks. The oystermen from Bay St. Louis come in there and sell oysters to the cannery; there is no doubt where they have killed oysters as they came along they have created new banks and those banks have been found out and been cleaned out and commenced over again. There was never any oysters at St. Joe island until a few years ago; those oyster banks have formed there, there were large banks along there but those were all cleaned out because it was so handy, but they don't go there any more, I suppose they are all gone. That I know from seeing it.

Q. They were all drowned out by a crevasse in the Mississippi River levees a few years ago?

A. That affected them some, but I don't think that was what broke those banks up.

Q. Are you prepared to say that those fishermen, Mississippians, or Louisianians or Alabamians or whoever they might have been went farther out because the oysters were scarce, rather than because their trade was increasing and they undertook to cover a broader territory?

A. I heard the Biloxi fishermen at the canneries say that was the reason they went out there, because there were more oysters out there and easier caught and tonged, that was before they got
1001 their dredges; I have heard them say so right in Biloxi.

Q. What cannery did you hear say so?

A. I don't know which one; I know there are several of them there now.

Q. There are not many there?

A. Gordon, Dunbars and all of them told me. I know nearly all of them.

Q. Do you undertake to say they went out there because of the scarcity of the oysters in the alleged territory rather than because of the increase of trade and the building up of new canneries, putting in more boats and employing more people.

A. No doubt of the scarcity of the oysters there; they certainly wouldn't make a haul of 20 miles when they could make a haul of five miles; that is business.

Q. If they had a bigger trade that demanded more oysters——

A. If they could get all they wanted at five miles they certainly wouldn't go 20 miles to get them.

Q. They might get all they wanted for a small trade but wanted more for a bigger trade.

Q. They could get them just as well for a larger trade if the oysters were there at five miles.

Q. The best oysters for the raw trade are in the marshes?

A. Yes sir.

Q. How long has Louisiana been taking oysters down there?

A. Always as far as I can remember.

Q. On both sides of the channel north and south?

A. Yes sir.

Q. And on out east of Cat island?

A. Up to several years ago there were no restrictions on anybody, as I told you, there was no dispute, they went where they pleased, they came from Alabama, Mississippi, or anywhere.

Q. So the Louisianians had some hand in depleting the supply?

A. I don't know about that.

Q. If they got any at all they did; up in that country where you say the Mississippians went south and east?

A. No doubt about that.

Q. The Louisianians went south and east?

A. No sir; I don't think they went any further than they could

get the shortest haul, as I tell you they went to the nearest pla they could find them and that was along the Louisiana shore.

Q. Do you know where the high tide mark strikes the main lan of Louisiana south of Malheureux point?

A. No sir, I couldn't tell you that.

Q. Most of these islands that we have been speaking of are inun dated by the high tide?

A. More or less.

Q. What I want you to give me if you can, is a mark where th high tide stops on the Louisiana soil?

A. I don't think I could do that. The tide is not much any how; it rises only about a foot and a half or two feet at the most.

Q. There is a tide?

A. Yes sir.

Q. And there is a place where it stops and goes back?

A. Yes sir.

Q. Very well, that is the mark I want you to tell me if you can?

A. You know right along Isle à Pitre and right straight along Grassy island and Half Moon island you will find banks
1002 along there with weeds on them and the sea in ordinary tide never goes over them, they are made of black clay mud. But of course, in extraordinary weather the sea goes over the whole place.

Q. Does Malheureux point go under at mean tide?

A. I couldn't tell you; I never noticed it particularly. But as usual, not in places but all over it you can see where it is marked.

Q. Is it not true, according to your best knowledge of that country that that high tide does not flow far westward of Nine Mile bayou?

A. I have never been back in there.

THOMAS T. BARR, witness, sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. ZACHARIE:

Q. How old are you?

A. I am 30 years old.

Q. Where do you reside?

A. I reside in New Orleans.

Q. What business are you engaged in?

A. Manufacturers' agent.

Q. How long have you resided in New Orleans?

A. Well, approximately, I think about five years, prior to which time I was a voter in Mississippi.

Q. At what place?

A. In Waveland.

Q. How long did you live in Waveland?

A. I guess about 12 or 15 years—that was about six months during the summer; the balance of the time I would spend in New Orleans.

Q. Mr. Barr, where is Waveland?

A. Immediately adjoining Bay St. Louis.

Q. That is, in the State of Mississippi?

A. Yes sir.

Q. What county is that in?

A. It is in Hancock county.

Q. Do you know that territory running from Isle à Pitre to Malheureux point?

A. Well, I have been to Isle à Pitre but I have never been to Malheureux point.

Q. Do you know what that territory has been commonly called by the people living along the Mississippi shore?

A. Well, it has been called the Louisiana marsh.

Q. Did you ever hear it called during your twelve years' residence in Mississippi—I think you said you lived there twelve years?

A. Yes sir.

Q. Called by any other name?

A. No sir.

Q. You have mixed with fishermen and all classes of population in Mississippi.

A. Yes sir.

Q. Do you know where the deep water channel is, leading out of the East Pearl river?

A. No sir, I never have made any particular observation of that.

Q. Have you ever heard the matter of the boundary line
1003 between Louisiana and Mississippi discussed?

A. No, I have not, except as a general understanding that Pearl river was the boundary between Louisiana and Mississippi.

Q. Did you ever hear the deep water channel out of Pearl river running down between Cat Island and Isle à Pitre——

A. Yes sir, I always understood, just in a general way, that was the boundary.

Q. You say you have so understood it; have you ever heard people speak of it in that way?

A. Yes sir, as a general thing along that course it was a sort of understood thing that that was the boundary.

Cross-examination by Mr. McCLURG:

Q. That sort of understood thing you speak of along the coast over there had no reference as to where the law fixed the line?

A. No sir, it was a matter of common consent, as I understood the thing.

Q. As you understood it?

A. Yes sir, it was a generally accepted thing.

Q. Well, a good many people of Harrison, Jackson, and Hancock counties; sheriffs, mayors, and other officers and men who have lived there, say it has been generally accepted as being Mississippi down there, eighteen miles from shore, because the law fixes it that way?

A. I do not know.

Q. You do not mean to say that it is a universal thing over there——

A. Going a little more into particularizing, last July a year ago, I made a little cruise along the Mississippi coast; took in Grand island, Round island and Grant pass. We were on a little schooner known as the "Ramsey Brothers," and while on the boat the men handling the boat, three boys from Biloxi, one of them named Albert George, one named Gaines—I cannot remember his first name—and the other named Albert; I think that was about the latter part of July——

Q. 1903?

A. Yes, sir, and we talked about that; and whenever we talked about the marsh and the fishing they would always state that was a Louisiana marsh, that shore immediately south of Cat island.

Q. And that is the source of your information on that subject?

A. No, as a general thing whenever we got any mosquitoes the Louisiana marshes would get the credit for it. Now these men that I refer to were oyster fishermen; one of them owned the boat; this fellow named Albert,—I have forgotten his last name—and the other two, fished all during the winter, and were making preparations to fish during the coming summer.

Q. Do you know whether the oyster commission of the two States had drawn an amicable line, a neutral line, before that time which they proposed to stand as the dividing line until this suit had been settled?

A. I believe I had heard something of that sort, but just where I do not remember.

Q. This conversation you had with those boys had it any reference to that line they had agreed to?

A. No sir, just the term applied in discussing some particular spot.

Q. You never heard anything said about six leagues or three leagues from either shore? No leagues were discussed?

A. No sir; those men that were on that boat would hardly understand the definition of leagues; they would not use that in their language.

1004 Q. So leagues were not discussed there—were not discussed at all?

A. No sir; that was beyond their comprehension; it was not in their vocabulary.

ERNEST J. BELLOCQ, witness, recalled on behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. DYMOND:

Q. Will you please look at this map entitled "Hardee's geographical, historical and statistical official map of Mississippi, embracing portions of Tennessee, Alabama, Louisiana and Arkansas from recent surveys and investigations and officially compiled under authority from the State legislature by T. S. Hardee, State engineer; approved under an act of the legislature, signed Benjamin G. Humphreys, governor, A. D. 1868" and state whether you were given that map by the counsel for the State of Louisiana with the request that you photograph it. The map is stamped "Library of Congress, maps and charts."

A. Yes sir.

Q. Are you able, Mr. Bellocq, to cause the whole of said map to be photographed?

A. No sir, I could not have the whole of it photographed—only a portion of it.

Q. For what reason were you prevented from photographing the whole of it? Was it lack of facilities?

A. Yes sir, lack of facilities.

Q. Will you please look at this photograph, which for purposes of identification will be called map No. 64, and state whether you caused it to be made of that portion of this map of Hardee's designated to you by counsel for the State of Louisiana, as being the area in dispute in this case?

A. Yes sir.

Q. Is it a true and correct photograph eliminating the differences in color of the Hardee map, as to the section photographed?

A. Yes, sir, it is the same thing, except the colors do not show.

Q. Now, Mr. Bellocq, why was it that you could not make a photograph of the whole map?

A. Well, I am not the one that makes photographs; I am the one that does the printing. They have to have the negative first and I do the printing. Now the one that takes the negative told me he did not have the distance in order to photograph the map. They have to get a certain distance to get it all in.

Q. What was there peculiar about that map that made that difficult. Was it too large or too small?

A. No, you could not get far enough away to get it all in.

Q. Did the size of the map have anything to do with that?

A. Yes sir.

Q. What feature of the size of the map?

A. It was too high in order to get the whole thing in.

1005 Cross-examination by Mr. McCLURG:

Q. You know nothing at all about the history of the legisl under which this map was made?

A. No sir, I do not know anything about the histories o maps.

Q. You know nothing about this map except what appears face?

A. That is all. A negative was made; I took the print off the negative.

Adjournment of Proceedings.

At this stage of the proceedings, the hearing was adjourne the commissioner, to be resumed at 11 o'clock September 6, 19 the same place.

Resumption of Proceedings.

NEW ORLEANS, LA., September 6, 19

Pursuant to adjournment the hearing was this day resum 11 o'clock at the same place.

Present: Hon. W. D. Bullard, commissioner.
Hon. Walter Guion, attorney general, State of L ana.
Messrs. John Dymond, Jr., and F. C. Zacharie, ass counsel for the State of Louisiana.
Hon. Monroe McClurg, associate counsel for the St Mississippi.

Col. CHAS. EDWARD HOOKER, witness, sworn and examin behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. ZACHARIE:

Q. Where do you reside?

A. Jackson, Miss.

Q. What is your age?

A. Well, I am getting so old that I have absolutely forgotte old I am, but I think I can acknowledge up to 70, 72, or 73.

Q. Have you held any official position in the State of Missis

A. Yes, I was elected attorney general when Governor Hump was elected governor of Mississippi. I held one term and h one term——

Q. Can you mention the date you were elected? Was it 1 1866?

A. I think it was 1865.

Q. Then?

A. Governor Humphreys was re-elected governor, and I v elected attorney general at the expiration of our first terms.

Q. When was that, what year about, your second election?

A. That was two years after our first election; the elections then were bi-annually.

Q. What other offices have you held, if any?

A. Well, I have been Representative of the congressional district in which I lived, being first elected in November, 1875, and
1006 constantly re-elected with the exception of four years when Major Barksdale was Representative, and with the exception of six years when I was out of Congress, and up to the 57th Congress, which was the last Congress I served in.

Q. Cannot you give the date so as to show the number of years——

A. In all I was about twenty years in Congress; just twenty years in Congress.

Q. Have you held any other official position?

A. In my army days, a long time ago, I was district attorney of my district in Mississippi, stretching from the Tennessee line down to Vicksburg, and going out to include Hinds county and the capital.

Q. Did you know Col. T. S. Hardee?

A. Very well.

Q. When did you first know him?

A. I knew Col. Hardee before the war, some years. I do not remember how many, probably eight or ten. I knew him during the war, and I knew him since the war.

Q. What position did he occupy, and in what army?

A. He was, when I knew him, in the army; he was the aid of his uncle, Col. Jeff Hardee.

Q. Was he an aid or an engineer officer?

A. I think he was an engineer officer.

Q. Did you know him after the war?

A. Yes sir.

Q. Where did he reside when you knew him after the war?

A. New Orleans.

Q. Where did he reside before the war when you knew him?

A. I t ink he resided part of the time in Mississippi before the war; after his marriage he resided in this city for some time. I was at his house on several occasions while he lived here.

Q. You mean, that is, since the civil war?

A. Yes sir.

Q. Do you know his character and reputation as an engineer?

A. Yes sir.

Q. How was it?

A. Well, I wish to say that I knew him before the war; I knew him during the war, and no man in Mississippi or Louisiana bore a higher character, socially and professionally, than Col. Sid. Hardee.

Q. Do you think from what you know of his character that he would be a man capable of entering into a corrupt job to procure money from the treasury of the State of Mississippi?

A. I should say emphatically not.

Q. Do you know what his general reputation in that regard would be?

A. One who is honorable and generally well esteemed so in
sissippi and Louisiana.

Mr. McCLURG: Mississippi is not assailing the character or
tation of Col. Hardee, and insists that this testimony is in
petent.

Q. Did you know Governor Alcorn, of Mississippi?
A. Very well, both before he was elected governor, before
after the war.

1007 Q. Was Governor Alcorn's reputation or character as
governor of Mississippi that he would approve or take
in a corrupt raid on the treasury of Mississippi?
A. I should say not.

OBJECTION.—By Mr. McCLURG: The same objection is now m
because the record will not disclose a single attack upon the
sonal character of Governor Alcorn.

Q. Do you now have any recollection of the preparation of
map of Mississippi gotten up by Col. Hardee in 1866, 1867,
1868?

A. I have not.

Q. Did you, at any time, have any connection with any litigati
in regard to that map?

A. I was employed by Governor Hardee to institute a suit again
the auditor of public accounts for Col. Hardee somewhere as eng
neer for a certain given time, probably a month, and that suit w
revived in the name of the auditor of public accounts' successor th
now lives in Jackson, both Republican auditors during the Repub
lican regime in Mississippi. I brought the suit for him to compe
the auditor to issue him a warrant for his salary.

By Mr. McCLURG: Was that the mandamus case, Colonel?
A. Yes sir.

By Mr. ZACHARIE: What was the result of that suit?
A. I would not be able to tell you from memory. I think may
be I was called away from Mississippi before it was finally de-
cided.

By Mr. McCLURG: That is the case that is reported in Missis-
sippi's official reports?
A. Yes sir, I think it was finally dismissed. I do not remember.

By Mr. ZACHARIE: That suit has no direct connection with the
map?

A. Not at all; it was simply this salary as engineer.

Q. Did you ever hear any complaint or objection made to the
map prepared by Col. Hardee of the State of Mississippi in regard
to incorrectness, fault or error, prior to the institution of this suit?
A. I never did.

Q. How was that map generally regarded in the State of Missis-
sippi?

A. I do not know; I cannot say how that map was generally re-

garded; but I can only say that the high character of Col. Hardee as an engineer was such that any map he would make would receive the approval of the people of Mississippi generally.

Q. Was Governor Humphreys a man of such a character that he would approve any map of the kind without a critical examination of it?

A. No sir, he was not.

1008 Cross-examination by Mr. McCLURG:

Q. I understand, Colonel, that the purport of this testimony which you have given expresses your opinion as to Col. Hardee and his map?

A. It refers to the opinion which I think was entertained generally in Mississippi by the people of Mississippi as to the Colonel in his professional capacity, and as to his work in that profession.

Q. It is your individual opinion as to what the general opinion of the people of Mississippi was?

A. Yes sir.

Q. You do not undertake to say that you have ever examined either one of Col. Hardee's maps?

A. I have not.

Q. He made one in 1868, or it was published in 1868, and there is one made in 1871?

A. Yes sir.

Q. You have not examined any one of them?

A. Only casually; I never had occasion to examine them.

Q. Now those maps pretended to be not only a map of the State of Mississippi, but including parts of Louisiana and of Tennessee, I believe, and Alabama, is it your opinion, since we are in the line of opinions, that Col. Hardee made these surveys, or did he take it up from other maps and historical data?

A. I think not; I think he made it himself.

Q. You think he made the actual surveys himself?

A. Yes sir.

Q. Do you undertake to say Colonel, that it is your opinion that Colonel Hardee took his compass and made these surveys?

A. He might have had others associated with him to assist him, for all I know.

Q. Can you tell us whether or not Col. Hardee undertook to locate the boundary between Louisiana and Mississippi on his map?

A. I understood from a casual survey of the map that he did undertake to do it.

Q. Where did he fix it?

A. I do not know; I cannot tell you.

Q. Have you examined the act of Congress admitting Louisiana into the Union, and the act of Congress admitting Mississippi into the Union?

A. Many years ago, but not recently.

Q. I asked you that question to get your opinion upon the p
sition whether a geographer could map either State out of its
tory, or whether a cartographer could paint either State out
territory, or whether the storms could wash either State out
territory, or whether the musk-rats could eat either State out
territory, or whether the winds could blow either State out
territory, or whether the mosquitoes could drive either State
its territory; or whether any State could be deprived of any p
its territory, except by the acts of the legislators of those States,
the consent of Congress. Is not that the only way a State coul
deprived of its territory?

A. I do not think that either the State of Mississippi or the
of Louisiana could legislate any of its territory assigned to it by
acts of admission in 1817 admitting Mississippi, and 181
1099 mitting Louisiana,—I do not think that either State coul
deprived of its boundary according to the acts of Cong
and according to the surveys made under those acts.

Q. Then *is* it does not matter how high the personal chara
and integrity, and how great his official capacity was, Col. Har
could not map Mississippi out of her territory, given her by
Federal Congress?

A. No sir; I do not think that he would ever have attempted
do it.

Q. He was not a lawyer?

A. No sir, he was a surveyor. He was originally connected w
the surveying of this road to Jackson.

Q. I have no doubt he was an accurate surveyor and a corr
man, generally?

A. He made a preliminary survey of that route when a committ
came from Jackson to New Orleans to suggest to the bankers a
business men of Louisiana to build a road from New Orleans
Jackson. The business men here said, particularly Mr. Cason, wh
lived above here, "What are you going to do with the trembli
prairie? You may drive a pile down eighty feet and you will b
no nearer the bottom than when you started;" and the enginee
came along there, cribbed the timber like you were building a hous
and built the road all right; and now that is the best part of th
road, and Col. Hardee was one of the engineers of that road. I d
not think that he would ever have attempted to change the boundary
of either State.

Q. You have been in public life for forty years or more, and i
national politics nearly that long, especially since the war?

A. Yes sir.

Q. And Mississippi is very proud of you, too?

A. Thank you for saying so.

Q. And none more so than I am.

A. Thank you.

Q. Now listen; speaking from your general knowledge of national
politics, and I know you must be familiar with the history of this

country, and especially the South, and more of Mississippi, and incidentally of Louisiana—Mississippi, in her answer and cross bill, submits to the Supreme Court of the United States this proposition, that in framing these States out of the original territory, you understand that the purpose of Congress was to give each State a sea frontage, and substantially, when she had created Louisiana from the mouth of the Pearl river around the mouth of the Mississippi to the Sabine, about 500 miles, with a 3-league reach to her front, giving her all the islands within that limit, which I understand to mean by saying "including islands" not words of limitation, but to be sure she would get the land as well as the water; the water in that connection being general league measures, and lands in townships and ranges, that Congress must have had an eye to the balance of the Mississippi territory to the eastward, and never intended to have given to Louisiana this 500 mile reach around her front, and then let her run around to the east, and to deprive the Mississippi territory, then clamoring for admission into the Union, of her water frontage. What do you think of that proposition?

A. I do not think that the Government of the United States gave Louisiana more sea front by the three leagues than she would probably be entitled to as a State admitted into the Union, and I understand that the league front on the Mississippi shore, is larger than that. Am I right about that?

Q. Six leagues.

A. I think the idea was to give Mississippi six leagues in front of her territory, and Louisiana three leagues in front of hers, and the State boundary between them would not be governed by the fact that there were less leagues granted to Louisiana than to Mississippi. In other words they would take the territory of Mississippi, and the territory of Louisiana on the main land and run it out into the sea, and whatever fell to Louisiana the three leagues would be hers and whatever fell to Mississippi, the six leagues would be hers.

Q. As I stated to you, Louisiana has a sea frontage of about 500 miles from the mouth of Pearl river, around the passes at the mouths of the Mississippi, to the Sabine river. She claims about 1200 miles of land frontage, including the bays and the like of that. Mississippi has about seventy miles of frontage. Now then, do not lose my connection. In addition to this 500 miles, approximately, that Louisiana has, her contention now is that when you go out of the mouth of Pearl river you follow a deep water channel—it is marked on the Government map as a sailing channel, buoyed by the Federal Government—for vessels of heavy draft. Louisiana claims that this line is the line. If we were to follow that line out of the mouth of Pearl river it swings around near the Mississippi front for nearly forty miles. In some places it is within a mile of our shore, and of that seventy or seventy-five miles of frontage that we have, this deep water channel cuts off again to Louisiana about ⅔ of it or more. Now then, coming back to my original question, and to get at the correct construction of the act of Congress in admitting Louisiana,

isn't it reasonable to suppose that she had an eye on the Mississi territory in 1812, soon to become a State, and that it was the purpo and intent of Congress to save that sea front to the Mississippi ter tory and to the State when it should arrive at statehood? What you think of that proposition?

A. I think the idea of Congress was to take the line between th two States and run it into the ocean in a straight line. That is m idea about it.

Q. Mississippi's contention is that in forming Louisiana in 181 with this long sea frontage that Congress looked eastward to th front, and meant to give her that territory of three leagues reservin the frontage of the Mississippi territory for future action; and tha so far as her eastern boundary was concerned, that Louisiana wa limited to the common law rule of the high tide mark on her eas and that Mississippi in going out of the mouth of Pearl river due south wormed along the high tide mark on the main land of Lou isiana to the limit of her eighteen miles, or six leagues' point, and then swung to the Alabama line eastward, taking eighteen miles, or six leagues, from every point of her shore from Pearl river and the Alabama boundary. What do you think of that proposi-tion?

Mr. DYMOND: On the part of Louisiana, counsel for Louisiana objects to all of this matter brought out by the recent questions from the counsel of Mississippi as irrelevant, as calling for simple legal opinions on subjects which must be decided by the Supreme Court of the United States, and not by any witness on the stand as to the construction of the two acts admitting Mississippi, and admitting Louisiana into the Union.

1011 A. Well, I still recur to my former answer, that in extending the line, the ascertained line on the land between the two States, I should say that it was the purpose and the object of Congress in admitting Louisiana in 1812, to give her three leagues of frontage, and when Mississippi was admitted in 1817 to extend that six leagues on the same line into the sea. That is my idea about it.

Q. In order that you may more readily grasp the contentions of the two States, Col. Hooker, I show you map No. 7, introduced as evidence in this case by the State of Louisiana. This is a composite map, made by the Coast and Geodetic Survey of the United States Government. I point you first to the mouth of Pearl river, and I mean by the sweep from that point around to the mouth of the Sabine river to follow southward the high tide mark on the main land of Louisiana around the passes at the mouth of the Mississippi, west to the Sabine river dividing Louisiana from Texas, our contention being that in that great sweep Louisiana gets more in water in her three leagues' limit, or nine mile stretch, than most any other State in the Union with a six or nine league limit in water reach. I show you now, beginning at the mouth of Pearl river again, eastward, a stretch of about 75 miles to the Pascagoula river,

the boundary between Alabama and Mississippi, being ten miles east of the Pascagoula river, and the reason as shown by act of Congress admitting Mississippi, when the act directed the surveyors when they got to the northwest of Old Washington county, and Alcorn county, to go due south to the gulf of Mexico, provided that if it became necessary to deflect eastward so as to prevent encroachment upon Wayne and Jackson counties, to do so; and when they came down the due south line would have reached the gulf of Mexico a great deal west of the Pascagoula river; but the act authorized the surveyors to preserve to Mississippi Wayne and Jackson counties. They deflected eastward and it put the line about ten miles east of the Pascagoula river; so that with this general description we have here three lines proposed by Louisiana, marked in blue, marked in nautical, or geographical, or statute miles. As you will notice from this map, Colonel, measuring from the high tide mark upon the mainland of Louisiana, the first proposition which suggests by this map is that nine miles from this high tide mark on her main land she would reach out almost to Grant pass, hit the Mississippi shore some distance east of Pearl river, and east of Point Clear; then if she should move up to Grant pass and take her three league limit she would go around and strike Point Clear you see, here, but move out to the end of Isle à Pitre and take her three league limit it would bring her up near the point of Ship island and right near the artificial channel that the Gulf and Ship Island railroad has cut from Gulfport across to Ship island, you understand? Now then, what would be the effect upon the commerce and navigation, and the general interests of Mississippi if Louisiana should establish her sovereignty and jurisdiction within either of those limits that are so far east of the mouth of Pearl river?

A. I should suppose it would be taking so much territory which belongs to Mississippi, and of course, as far as there is any commerce that commerce would be affected by it in that way.

Q. Have you any knowledge as to the commerce up the Pearl river into Mississippi, and on the Gulf and Ship Island railroad?

1012 A. Nothing except very generally. I know it is enormous on the railroad, and it was very enormous on the river before the railroad was built. I do not know much about the maps and the sea frontage, etc. Those three counties over here, Harrison, Hancock and Jackson counties, were at one time in my congressional district, and I was a good deal on the coast, and what I know was general knowledge as to the condition of affairs; not any specific knowledge as to the lines, either between Louisiana or Mississippi.

Q. I believe that you were attorney general at the time Governor Humphreys was ejected from the governor's office?

A. Yes sir, and I was ejected, too.

Q. Then you were marched out with him?

A. Yes sir.

Q. I would be glad if you would tell the commissioner something

CARD 11

about the political conditions in Mississippi from that time up to 1875.

A. They were in a very desperate condition. The carpetbaggers and the negroes had control of everything. I never went inside of the senate or house while the negroes and carpetbaggers had control of them. We were elected in 1875 by a special law of Congress, and a special law of the legislature fixing the election in Mississippi in November, 1875, for congressional districts, which usually occurred on even years; but John R. Lynch was then in the Congress of the United States and he had a special act passed making the election in 1875 in Mississippi for Congressman and in 1875 for governor, and Humphreys and I were candidates. I was first elected in 1875 and I remained in Congress about 18 years, and I was out six years, and then I was in the 57th Congress, which would make it twenty years in all that I was in Congress.

Q. What sort of a legislature did Mississippi have during the time that Ames and Alcorn were governors?

A. Extremely ignorant.

Q. Dominated in a large majority by negroes?

A. Yes sir, negroes and Republican allies—carpetbag allies.

Mr. ZACHARIE: Of course I renew here on the part of Louisiana the same objection in regard to opinion evidence by the witness on law points.

Redirect examination by Mr. ZACHARIE:

Q. Colonel, you consider the Mississippi sound as an arm of the gulf of Mexico, do you not?

A. I think so, yes sir.

Q. It is a part of the gulf of Mexico, is it not?

A. Yes sir.

Q. Now part of this sound runs up near this disputed territory. Under the act admitting Louisiana into the Union it is specified that her boundaries shall include all islands within three leagues of her coast. That was in 1812. Now the act admitting Mississippi into the Union in 1817, specifies that it should include all islands within six leagues of the shore. The act admitting Louisiana uses the term three leagues from the coast. Now when we get into this disputed area that part of the Mississippi sound is only about ten miles
1013 across, that is, leaving the east of Pearl river and going over to the land which lies south of it, and there is a space of water there which is about nine or ten miles wide. Now, construing these two acts, would not the boundary of Louisiana extend three leagues north from her coast?

A. I could not say about that.

Q. You could not?

A. No sir.

Q. You recognize the fact that a prior grant would, of course, outrank a junior grant?

A. Yes sir, of course.

Q. Now you recognize, of course, if this territory, these islands and territory, were granted to Louisiana in 1812, and there was a conflict afterwards as to the boundary of Mississippi, the prior grant to Louisiana would rule?

A. I should think the prior grant would rule.

Q. You recognize that under the Constitution of the United States that no territory could be taken from any one State without the consent——

A. Yes sir.

Q. You have been interrogated in regard to the interference there would be with the commerce of the Mississippi coast in case the contention of Louisiana was sustained. Is it not a fact that in so far as navigable waters are concerned, whether included entirely within a State, or between two States, applying as well to rivers, ocean, arms of the sea, etc., that the navigation of those waters is under the control of Congress?

A. I so understand.

Q. Therefore, that being the case, how could the maintenance of the contention of Louisiana, if it be maintained, interfere in any way with the commerce of the ports on the Mississippi shore?

A. I should say that it would not interfere with the commerce on the rivers, where the rivers were the line; or on the sea, where the main channel was the line; it would not interfere at all, because it is open to both parties.

Q. Well, would it interfere with the navigation of any navigable waters leading to these Mississippi ports?

A. I take it, it would not.

Q. The only interference would be in preventing Mississippians from taking oysters from the Louisiana territory, if Louisiana's contentions were maintained?

A. Well, I do not know about that; that is a question I never made any study of.

Q. Then the conclusion is that if the contention of Louisiana was maintained, the United States having control over the navigation of all navigable waters, that Louisiana could not in any wise interfere with commerce directed to ports in Mississippi, whether export or import?

A. I should say not.

Recross-examination by Mr. McCLURG:

Q. With reference to the interference with navigation and sovereignty of Mississippi, about which Col. Zacharie asked you, in case the sovereignty and jurisdiction of Louisiana should be extended out to the artificial line between Gulfport and Ship island, and
1014 strike the Mississippi shore east of Bay St. Louis, or if the secondary line, which is three leagues southwestward towards Louisiana, or the other line, shown on map No. 7, offered by

the State of Louisiana, and to which I called your attention a few moments ago, do not you think that if the sovereignty and jurisdiction of Louisiana were extended that far along the Mississippi front, that besides the mere navigation of interstate commerce that it would conflict very seriously with the commercial interests of Mississippi with reference to the enactment of laws such as Louisiana now has requiring all oysters taken within her jurisdiction to be brought in their raw state to Louisiana, and prohibiting the raw oysters from being taken out of the water into any other State in their raw condition. Would not such a condition of affairs seriously interfere with the commercial interests of Mississippi?

A. I should think so, yes sir.

JAMES J. CONWAY, sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. ZACHARIE:

Q. How old are you?
A. Well, I am 76, and if I live until October, next, I will be 77.
Q. Where do you reside?
A. In the city of New Orleans.
Q. How long have you resided in New Orleans?
A. 12 years.
Q. Where did you reside before you came to New Orleans?
A. Chatawa, Miss.
Q. How long did you reside in Mississippi?
A. Well, since the end of the war, steadily.
Q. Since the end of the civil war?
A. Yes sir; that was since 1865. I was in Mississippi, however, from 1853 to 1858. I built that old Jackson railroad, the New Orleans, Jackson and Great Northern railroad.
Q. Then after the war, from what date to what date?
A. From 1865, let me see, 12 years; that would be 1892.
Q. What is your profession?
A. Civil engineer.
Q. During what time have you practiced your profession?
A. Up until about 1892; I was connected with the Illinois Central railroad.
Q. When did you commence to practice your profession?
A. In 1853.
Q. Did you know Col. T. S. Hardee, now deceased?
A. Intimately.
Q. When did you first know him?
A. In 1853. We were young engineers together on the road.
Q. On which road?
A. On the New Orleans, Jackson and Great Northern.
Q. Did your intimacy and acquaintance with him continue up to his death?

A. Not so intimately as before that, because I was in camp with him, and I was associated in constructing that road with him, and afterwards I knew him in 1866, in Chatawa, when he was making a map of the State of Mississippi; he moved into Louisiana after that.

1015 Q. Do you know what pains and what steps he took towards making this map of Mississippi?

A. I know that he was very particular to get the best information he could of the boundaries of counties, public roads and towns, and every thing like that, but I was not with him at the time he was making the map. I would see him occasionally; but I know he was very particular about making that map.

Q. Did you ever know of the fact that he was receiving reports and maps from county officers in Mississippi?

A. I know he corresponded with them, and received letters from them about describing or answering the questions he would propound to them.

Q. What was his reputation in his profession?

A. First class; he was a very bright man.

Q. You knew nothing of his army history?

A. No sir; I knew he was with his uncle, General Hardee. I learned that afterwards.

Q. Do you know what his personal character was?

OBJECTION.—Mr. McCLURG: That is objected to because his personal character has not been assailed by Mississippi.

A. First class.

Q. Do you know whether he was a man who, from his general character, and from your knowledge of him, would enter into any corrupt bargain with the legislatures of Mississippi for the purpose of getting himself selected to produce this map?

A. It is not possible that he would do it; he was too honest and too honorable a man.

OBJECTION.—Mr. McCLURG: Objected to.

Q. You say you knew him before the war?

A. Yes sir.

Q. Since 1853?

A. Yes sir.

Q. Did you know him when he was residing in Mississippi before the war?

A. We were together from that time when on service in the construction of the road from New Orleans to Jackson, Miss. I had charge of the division south of Jackson, from Jackson and Crystal Springs; the track was laid in 1858, and he was between Osyka and Crystal Springs, with the other engineers, and it was a long distance, and we got the tracks together in April, 1858, at Crystal Springs.

Q. Do you know where he was when the civil war broke out?

A. I think, and I am satisfied, he was up planting on Deer creek.
Q. Do you know who was in partnership with him?
A. I understood General Wirt Adams.
Q. During your residence in the State of Mississippi did you ever hear any objection or complaint being made about his map or any of the details contained on his map?
A. No sir.
Q. Have you seen his map referred to often or at different houses?
1016 A. Well, I had it in my house when I lived at Chatawa.
Q. Have you seen it in any public places?
A. Yes sir.
Q. Did you ever hear any question made as to the correctness of any of its details?
A. No sir.
Q. Do you know what public positions Colonel Hardee occupied?
A. Well, I don't know, since he left the war you know——
Q. Do you remember if he occupied any positions in Louisiana as State engineer or city engineer in the city of New Orleans?
A. Yes sir. He was city engineer and I think, I don't remember, I think he was State engineer, I know he was city engineer.

By Mr. McCLURG:

Q. When?
A. Well, I don't think I could tell you the dates, the year.
Q. Before or after the war?
A. After the war, long after the war.

By Mr. ZACHARIE:

Q. Do you know what his politics were during the time you have known him?
A. His was mine, we were Democrats together always.

Cross-examination.

By Mr. McCLURG:

Q. Mr. Conway, I understood you to say that Colonel Hardee was a very particular man in the line of his profession?
A. I think he was a very competent man, yes sir.
Q. And from your general knowledge of him you testify you think he must have been particular in making this map; you did not see him make it?
A. That was the impression made on me, I have occasionally gone there and seen him draw off a township and put it down, but I did not see the whole map being finished, I was not with him at the time, I was employed then with the I. C. railroad and not where he was living.
Q. Where did you live at the time he made this map in 1868 and 1871?

A. I was living in Magnolia, Mississippi, I think, after 1867.

Q. Where did he live in 1868 and 1871?

A. I know he was down at Chatawa in 1866 and 1867 and probably 1868. He built a very fine house and lived there when he was making that map.

Q. Where did he live when he was in partnership with General Wirt Adams?

A. He was living up in Deer Creek. That was before the war.

Q. You say you know he corresponded with county officers?

A. Yes sir.

1017 Q. You think that he took as a basis for his map from the correspondence of that kind?

A. That I can't say that he took that altogether.

Q. Can you say of your personal knowledge whether Colonel Hardee ever ran a line himself in making that map?

A. That I can't say.

Q. Is it not your deliberate opinion that he made that map from that he gathered up by correspondence and historical matter and other maps and things of that kind, rather than having made the surveys himself?

A. I can't say that it was all from information he got from county officers, because he may have done so without my knowing that he made the surveys.

Q. When we reduce the proposition to the last extremity and ask you for your personal knowledge as to how he made this map, what have you to say. Eliminating your knowledge of the man, and the extraneous matter, altogether, give us your personal knowledge of how he made this map. What are you willing to swear to of your own knowledge?

A. I could not swear that he did not run some lines, I could not do that because——

Q. You only have general information of the man and his methods?

A. Yes sir.

Q. You don't know whether the map is a correct one or not?

A. Well, I have no reason to doubt but it is correct.

Q. I didn't ask you that. Have you ever examined it technically?

A. No sir; portions of it I did, as I did a good deal of surveying in Pike county myself, that was where we lived then, and very often I had to refer to his map about the townships and sections.

Q. Did that map have any section corners or starting points or bearings on it that aided you in any way, did it have anything but the general topography——

A. The general topography; I could find the corners myself; I had no trouble in finding the corners.

Q. The map aided you in a general rather than in a special way?

A. I had no trouble in finding the corners and the lines were per-

fectly plain, at that time, it was pine woods, all blazed lines, es
lished corners.

Q. You have lived in New Orleans during the last 12 years?
A. Yes sir.

Judge FRANK A. MONROE, witness sworn and examined on bel
of the State of Louisiana, testified as follows:

Direct examination.

By Mr. DYMOND:

Q. Judge Monroe, are you Justice Monroe of the supreme cou
of the State of Louisiana?
A. Yes sir.
Q. How old are you, Judge?
A. I am 60 years old. Just past 60.
Q. Were you previous to that, the judge of the civil district cour
of the parish of Orleans?
A. Yes sir.
1018 Q. Have you ever held any other official positions outside
of judgeship of these two courts?
A. Well, I was judge of the third district court before the civil
district court was organized.
Q. When was that?
A. That was between 1876 and 1880. I was elected judge of the
third district court first in 1872.
Q. Did your family at any time live on what is known as across
the lake on the Mississippi coast?
A. Well, my own immediate family, no, that is to say my wife
and children, except to spend the summer there; but other mem-
bers of my family, before I was married, my aunts and grandfather
and grandmother lived at Pass Christian and died there.
Q. Did you ever have occasion to frequent the neighborhood of
Pass Christian?
A. Yes sir; when the war closed, in the fall of 1865, I went to
Pass Christian for the first time, and circumstances, bad physical
condition, want of money, kept me there for about a year and I
have been more or less connected with Pass Christian from that time
to this, have gone there very frequently, sometimes spent the sum-
mer, after I was married. But my aunts have lived there perma-
nently and my grandfather and grandmother lived there until they
died, so I have kept up my connection pretty close with Pass Chris-
tian.
Q. Were you ever familiar with the country in that locality and
more particularly in the marshes south of Bay St. Louis?
A. Well, I cannot say that I had any great familiarity. I have
cruised around there in small boats. I have been to those islands,
Cat island and Ship island, I have been over to this Isle à Pitre and

have cruised around there more or less, not a great deal but several times.

Q. Will you please look at this map No. 59, and state whether you recognize the territory south of Bay St. Louis as being the territory concerning which you have just testified?

A. I cannot say that I have ever been farther west, down here, now what is that island?

Q. Grand island?

A. I cannot say I have ever been farther west than Isle à Pitre. My cruising has generally been down through Cat Island channel, down here to the Chandeleur islands, and then sometimes around up on the other side of Cat island and Ship island and over in the direction of Mobile. I have never been down here in this marsh, no.

Q. To what State, so far as you were able to ascertain from being thrown in contact with the people in that locality, is this marsh recognized as belonging?

A. I have always heard it referred to as the Louisiana marshes.

Q. Did you ever hear it claimed by any one to be part of the State of Mississippi?

A. Never.

Q. To what State was Isle à Pitre recognized as belonging?

A. I always understood it belonged to the State of Louisiana. The island itself belonged to my former law partner, he bought it while we were practising law together.

Q. What was his name?

A. Henry J. Leovy.

Q. Do you recall whom he bought it from or how he acquired it?

A. No sir. He had rather a speculative turn of mind; he bought lands here and there. I know that he bought this island
1019 and held it for a number of years and while he owned it I went there on an occasion.

Q. Did anyone ever dispute his ownership, on the part of Mississippi, so far as you know?

A. No sir. I think he sold it to probably Mr. Gilmore or somebody else.

Q. Did Mr. Leovy live in Pass Christian or have a home there?

A. He had a residence there, his domicile was in New Orleans but he had a residence in Pass Christian up to a very few years ago, from 1865, in fact from before the war, he owned a house there when the war closed and he bought another one.

Q. Did you ever while you were in that locality within the last 20 years, have any discussion with any one as to the boundary between Louisiana and Mississippi?

A. No sir, I never heard the question discussed at all.

Q. Did you know Col. T. S. Hardee, civil engineer and surveyor?

A. Quite well, yes sir.

Q. Did you know him to have made an official map of the State of Mississippi?

A. I was aware of that fact, I saw the map.

Q. What was Col. Hardee's general reputation as a civil en and surveyor?

A. He stood very high in this community, he was city en at one time I think, probably might have been from 1876 to or somewhere along there, I don't remember the exact years, a was quite a near neighbor of mine, lived across the street from and I knew him quite well, knew his family.

Cross-examination.

By Mr. McCLURG:

Q. Prior to the institution of this suit, had you ever heard discussion as to the location of the boundary between these two s in the waters down there?

A. I don't think I ever heard any discussion. I think tha cently before the institution of this suit I saw the matter referr in the papers in connection with the possibility of a suit or arbitration of it or something of that kind, that was about the intimation I had there was any difference between the two Stat to their boundary.

Q. I understand you to say that it was your understanding, I not sure but what you stated it was the general understanding a as your information extended that this marsh territory down t belonged to the State of Louisiana. I want to ask you if that of your testimony was based on a kind of general understand rather than any discussion of the boundary from a legal poin view?

A. It was based upon what I believed to be the general understa ing. I have always heard this district that is represented here sort of an archipelago on map No. 59, referred to as the Louisi marshes and at Pass Christian not infrequently they are afflic with musquitoes and when the wind would come from the southw the musquitoes would come in great quantities and they were alwa spoken of as coming from the Louisiana marshes down there, a those marshes that lay to the southwest of this Isle à Pitre.

1020 Q. You know that you have in your State what are call the Florida parishes?

A. Yes sir.

Q. And because they bear that appellation the people do not r gard them as in any way belonging to the State of Florida?

A. I am aware of that fact. The term goes back to the history those parishes, the history of their acquisition.

Q. You are not prepared to say that the Louisiana marsh ma not be historically connected the same way with Louisiana befo the organization of the State?

A. Of course I do not know why they were called the Louisian marshes except that I suppose that other people, like myself, sup posed they were a part of the State of Louisiana. I may add tha

that impression has been more or less strengthened in my mind by reason of the fact that so far as I know all the maps that I have seen, represent these marshes as being part of what may be called the peninsula of Louisiana.

Q. I think you will agree with me on the proposition that if the territory in fact belongs to Mississippi by a proper construction of the acts of Congress admitting these two States into the Union that Mississippi cannot be deprived of it by the general understanding as to their being Louisiana marshes and therefore a part of Louisiana, or mapped out of it?

A. Of course I would not have any hesitation in expressing my own opinion on that subject; but I imagine that is a question that the Supreme Court will have to determine after they have heard all the evidence and examined all the authorities.

Q. But strong testimony like yours will go a long ways in aiding the court in the construction of those statutes?

A. I do not think any map maker or anybody else can individually deprive a State of its territory that belongs to it by law.

Redirect examination.

By Mr. ZACHARIE:

Q. As counsel for Mississippi has asked a legal opinion from you I will ask of you another legal opinion. While cartography or map making will not always determine territorial rights in disputed boundaries, is it not a principle of law as announced by the Supreme Court of the United States that maps will be taken into consideration as evidence of the long acquisition and acknowledgment of certain boundaries which will not be disturbed after long usage of that kind?

A. I should imagine so, where there is any disputed question the courts usually endeavor to get information where they can and ancient maps and ancient titles are usually offered and are taken into consideration.

1021 EDWARD WENTZELL, witness sworn and examined on behalf of the State of Louisiana, testified as follows:—

Direct examination.

By Mr. DYMOND:

Q. Where do you live?
A. I live in Biloxi in the State of Mississippi.
Q. How long have you lived there?
A. Going on 24 years.
Q. How old are you?
A. 24; I have lived there all my life.
Q. So you were born and raised there?
A. Yes sir.

Q. Your family lived there before you?
A. Yes sir.
Q. Are you the Mr. Wentzell that was a partner of Mr. Ahern a grocery and bar-room business at Three Mile bayou?
A. Yes sir.
Q. Who attended to the obtaining of the license——
A. Mr. Ahern attended to that.
Q. From the United States?
A. Mr. Ahern attended to all that.
Q. Will you please look at this envelope which is marked Document 96, from the Treasury Department, dated October 30, 1901 addressed to Ahern and Wentzel, Biloxi, Miss., and state whether you recognize that as the envelope containing the license which was originally sent to Biloxi?
A. I could not say for sure, but I think it is exactly like the one we received.
Q. Will you now look at these several documents, marked numbers 90, 91, 92, 93, 94, and 95, and state whether you recognize them to be bill-heads of your firm as conducting business in Three Mile bayou?
A. Yes sir, they are exactly like it.
Q. Are they some of your bill-heads?
A. Yes sir, they look exactly like the ones we had
Q. Who caused those bill-heads to be printed?
A. I had them printed.
Q. You will notice that those bill-heads read Three Mile, Louisiana. How was it you happened to put the word "Louisiana" after the words "Three Mile"?
A. I supposed that Three Mile was in Louisiana.
Q. This Three Mile bayou, where you were located, was that the Three Mile that you referred to on your bill-heads as being the locality where you were doing business?
A. Yes sir.
Q. Will you look at this map, No. 59, map of Louisiana, and upon being shown Isle à Pitre to the east and Mallory point to the west and Bay St. Louis immediately north, is this the Three Mile bayou right along the shore between Isle à Pitre and Malheureux point, at which you conducted your establishment?
A. Yes sir.
Q. Is that the Three Mile bayou to which you had reference when you printed your bill-head as Three Mile, Louisiana?
A. Yes sir, the same place; our place was located right there, right inside of the mouth.
1022 Q. And you thought then you were in Louisiana when you had those bill-heads printed?
A. Yes sir, I did.

Cross-examination by Mr. McCLURG:

Q. Do you know whether the State of Louisiana required a State revenue license to conduct a retail liquor business?

A. I never had anything to do with the license, I just gave my partner the privilege of signing my name to the internal revenue application we made.

Q. I know about the United States revenue, but I ask you about the State revenue?

A. No sir.

Q. You did not know of it?

A. No sir.

Q. You knew that Mississippi did require——

A. No sir, I did not.

Q. And for a retail liquor business a revenue license?

A. No sir.

Q. You did not have either a State revenue license from either Mississippi or Louisiana?

A. No sir.

Q. Was there a post office at Three Mile?

A. No sir.

Q. Did you and Mr. Ahern run a bum boat in connection with this fancy grocery, wine and liquor business?

A. No sir; he had another partner, a man by the name of Sillinger; that was the year before.

Q. He was the man that ran the bum boat?

A. Yes sir.

Q. Mr. Ahern testified in this case that that was a temporary shop down there you built up.

A. Yes sir, that is to say it was—I have not been out there since.

Q. You just dealt with the fishermen in that vicinity?

A. Yes sir.

Q. You did not know what State you were in and did not care?

A. No, I thought we were in Louisiana, but I did not know exactly.

Q. You never heard any discussion about boundary?

A. No sir.

Q. Mr. Ahern stated he thought you put Louisiana on the billheads because the man from whom you bought the store had them on his. Do you remember about that.

A. No sir.

Q. When was it you quit business down there?

A. 1902 I think it was.

Q. About the first of October, 1902?

A. No sir, it was April.

Q. 1902?

A. I think it was in 1902.

Q. Would you say whether it could not have been in 1903?

A. No sir, it was in 1902.

Q. The reason I ask you this question is because Ahern testified, I think, that after the commissions made this dividing line and shut the Mississippians out it was not very profitable to all of you,
1023 and you went and quit the business. Did he stay there any while after you did?

A. No sir, we both left together.

Q. So notwithstanding you had your bill-head marked Three Mile, Louisiana, you did not know where the line was, did not much care, and heard no discussion of that subject?

A. No sir.

Q. You were down there for revenue only?

A. Yes sir.

Q. Standing squarely on the Democratic platform?

A. That is it.

Captain STEVE MELOCHE, witness, sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination by Mr. DYMOND:

Q. Where do you live?

A. I am living in Biloxi.

Q. You say you live in Biloxi, Mississippi?

A. Yes sir.

Q. How long have you lived there?

A. About two years.

Q. Where did you live prior to that?

A. Right here in the city of New Orleans.

Q. How old a man are you?

A. I am 57.

Q. Were you born in New Orleans?

A. No sir, I was born in Bay St. Louis.

Q. Well, how long did you live in Bay St. Louis after you were born, before you moved?

A. I suppose I lived there until I got about 14 years old.

Q. Then where did you move to?

A. I moved to New Orleans.

Q. Then did you live in New Orleans continuously from the time you were 14 years old until when?

A. Until here about two years ago.

Q. And then you went to Biloxi?

A. Yes sir.

Q. What has been your business for the last 25 or 30 years?

A. Running schooners, steamboats.

Q. Whereabouts, through what section of the country?

A. From here to Mobile and all around the lake shores, you know, around Mississippi sound, Lake Maurepas, all through that area as far as Pensacola.

Q. Are you familiar with the area all along the southern coast in ississippi sound?

A. Yes sir.

Q. How long have you been familiar with that section of the ountry?

A. You can say ever since I was born, since I was big enough to now anything I was around that country; been following it up l my life.

Q. Have you, as a matter of fact, been following it up, the water ade, so to speak, in that general locality since you were a small oy?

A. Yes sir, ever since I started to running on schooners I have been running out that way.

924 Q. Will you look at this map, No. 59, offered by the State of Louisiana, and state whether the water area therein shown om the east mouth of Pearl river through Mississippi sound to Cat land, and south and east is part of the area concerning which you ave had your experience?

A. I have had my experience all over through here.

Q. You are well acquainted with the territory shown on this map, o. 59, of Louisiana?

A. Yes sir, I know all about it; I have been carrying shells and erything out here.

Q. Have you ever been down there, through the Louisiana arshes?

A. I have been all through it.

Q. Frequently?

A. Yes sir, I own a piece of land right here.

Q. When you say "here," what part of the map is that?

A. This is Bayou Boudreaux.

Q. Is that near Oyster bayou?

A. No sir, I do not know where Oyster bayou is.

Q. You will notice towards the centre of this map Oyster bayou, ere is Three Mile bayou just a little to the westward?

A. Here is my place here.

Q. When you say here, do you mean just east of Three Mile ayou?

A. Yes sir, the first bayou to the east of Three Mile bayou.

Q. What name is on *the* that map, can you see?

A. It is called Bayou Boudreaux, but some of them call it Bayou hnson.

Q. This is called Bayou Johnson on the map, is that the bayou ou refer to?

A. Yes sir, because I know how it was made.

925 Q. Were you thrown into contact with Mississippians and other people, working, travelling, and fishing through that eneral locality, as shown by map 59, during the past 25 or 30 ears?

A. Of course.

Q. You will please notice the territory beginning on the east at Isle à Pitre and extending west to Malheureux point, to what State has that territory been recognized as belonging in the opinion of people with whom you have been thrown in contact, within the last 25 or 30 years?

A. Louisiana.

Q. Did you ever hear any one say that that belonged to Mississippi?

A. No sir, I never did.

Q. What was it called? What was the name given to that particular territory?

A. The Louisiana marshes; it has always been called that since I could recollect; the Louisiana marshes.

Q. Did you ever hear any discussion as to what was the boundary between the States of Louisiana and Mississippi in the waters of Mississippi sound?

A. Yes sir; I heard them talking about that many times.

Q. What is the boundary?

A. The channel.

Q. What channel?

A. Cat Island channel, we call it Cat Island channel.

Q. Is that the channel that runs through Mississippi sound north of Half Moon island, and thence up Pearl river?

A. Yes sir.

Q. Was, or was not that channel recognized as the boundary between the two States by people with whom you were thrown in contact whenever the question came up for discussion?

A. Yes sir.

OBJECTION.—Mr. MCCLURG: That question is objected to as extremely leading and extremely suggestive of the answer.

Q. Where were you living at the time you bought that land?

A. Right here in the city.

Q. Who attended to that for you?

A. An old surveyor by the name of Duke.

Q. Where did he live, do you know?

A. No sir; I don't know exactly; he lived here in the city, but what place I do not know.

Q. Was application made to Mississippi to buy that land?

A. No sir.

Q. Who did you buy it from?

A. The State.

Q. What State?

A. Louisiana.

1026 Q. Was any application made to the land office of Mississippi to see whether they made any claim to land in that locality or held any land for sale?

A. Well, Casimir Harvey wanted to enter this place called Creole gap——

Q. Is that on Isle à Pitre?

A. It is right close to Isle à Pitre, same side as Isle à Pitre, it is between Isle à Pitre and Grand pass, and they wrote to Jackson and they didn't have any records of it there and they came back to the custom house and found out where it was and they got this same old man Duke to write to Baton Rouge and get a patent.

Q. When you speak of Jackson, do you mean Jackson, Mississippi?

A. Yes sir.

Q. Is that the State capital of Mississippi?

A. Yes sir.

Q. And Baton Rouge is the State capitol of Louisiana?

A. Yes sir.

Cross-examination

By Mr. McCLURG:

Q. Who wrote that letter to Mississippi?

A. Casimir Harvey.

Q. You didn't write it yourself?

A. No sir.

Q. He told you he wrote it?

A. Yes sir.

1027 Q. You know nothing about it except what he told you?

A. No sir.

Q. You never saw the letter?

A. No sir.

Q. You never saw the answer to that letter?

A. No sir.

OBJECTION.—Mr. McCLURG: The testimony of this witness with reference to this correspondence, is objected to because it is secondary and hearsay merely.

Redirect examination.

By Mr. DYMOND:

Q. Is Casimir Harvey living?

A. Yes sir.

Q. Where is he located?

A. At Back bay, Biloxi.

Q. Is this surveyor Duke living or dead?

A. He is dead.

Q. Is there any one else connected with this particular transaction concerning which you have testified, other than yourself and Mr. Casimir Harvey that are still living?

A. Joe Gilmore. He owned some land down there too.

Q. Did Mr. Joe Gilmore have any connection with this application which you speak of?

A. He did with old man Duke; you know they were all mix up in it when they made the application.

Q. Old man Duke made the survey?

A. Yes sir.

Q. Are you at all familiar with the interior of the Louisia marsh?

A. The interior?

Q. Yes? What I mean is south of the shore line extending fr Malheureux point to Isle à Pitre, all down in this section?

A. All down through here clean to the mouth of the river and the other side of the river.

Q. When you speak of the river, you mean the Mississippi riv

A. Yes sir.

Q. Now, Captain what is the general tendency in this section the Louisiana marsh just south of the shore line from Isle à Pitre Malheureux point in regard to any influence from the deposits the Mississippi river; what is the general tendency, is it to increa or disintegrate and break up?

A. It breaks up and washes away.

Q. Have you noticed any difference between the first time y saw it understandingly and the last time you saw that country u derstandingly, has there been any difference in its general appe ance on the interior?

A. Yes sir. These keys out here have washed away, this co key is submerged altogether; you can sail all over it on a schoon we used to load shells off of it.

Q. Are there any other instances where there has been noticeal change so far as you are able to state within your memor

1028 A. There was a little island right in Grand pass th washed away, that was a little bit of an island there, it ca up in a point, that is gone now, there is only one island there wh there used to be two.

Q. How about down in the interior?

A. Some places you will find four feet of water and next time y go down there and you won't find but two.

Q. Well, look at that map of this country south of this shore li between Malheureux point and Isle à Pitre and picturing the thi to yourself as it is to day and as it was when you first saw it 20 30 years ago, is there any greater proportion of water there n than there was 20 or 30 years ago, as compared to the land?

A. No, I don't think there is.

Q. You think it is about the same thing?

A. Yes sir.

Q. The level of the prairie is about what, tide level or what?

A. Yes sir, high tide just comes up even.

Q. It has just staid about that level for the past 20 or 30 year

A. Yes sir.

Q. That is all covered with vegetation?

A. Covered with marsh grass.

Recross-examination.

By Mr. McCLURG:

Q. The proportion of land and water has about maintained itself since you have known it, in that marsh country?

A. Yes sir,

Q. You stated that you had regarded this marsh territory as belonging to Louisiana for how long?

A. Well, I will say for 35 years.

Q. I believe you also stated that it was generally so regarded by those with whom you talked, did you?

A. Yes sir.

Q. Well, if it was generally so regarded, why was it that you applied to Mississippi for the purchase of that island?

A. I didn't apply there.

Q. Well, then, some of those with whom you talked to applied there, didn't they?

A. Yes sir.

Q. Then they had some doubt about it?

A. They must have had or else they wouldn't have done it.

Q. Then you were not exactly correct when you said they all agreed that it belonged to Louisiana, were you?

A. No sir; that's right.

Q. It is a matter of fact there has been some doubt about which State that marsh belonged to, among some of the people?

A. With Harvey it must have been or else he wouldn't have wrote that.

Q. Is it not true, until within the last few years when Louisiana and Mississippi organized their oyster commissions that all of this disputed territory in the marshes and in Mississippi sound was fished upon promiscuously by people from Mississippi, Louisiana and Alabama?

A. Why of course they all fished there together.

1029 Q. Mississippians and Louisianians would fish side by side?

A. Everybody fished there together.

Q. And wherever they wanted to?

A. Yes sir.

Q. Any questions asked about the State boundary?

A. I never heard any.

Q. They didn't care?

A. No sir.

Q. They were after the luscious bi-valves?

A. Yes sir.

Q. You never heard of anything like a threatened armed conflict between the sheriff and officers of St. Bernard and the sheriff and officers of Harrison county Mississippi over that territory?

A. No sir.

Q. It has all been quiet along the Potomac?

A. Yes sir.

Q. Did you ever hear anybody from Mississippi or anywhere else, refer to that marsh land or any part of it as the Grand marsh?

A. No sir.

Q. You live in Biloxi?

A. Yes sir, for two years, that is all.

Q. How long ago?

A. Two years last July, since I moved over to Biloxi.

Q. You are living there now?

A. Yes sir.

Q. Are you in the oyster business now?

A. No sir.

Q. What business are you in?

A. I have schooners running here in the basin with sand and shells.

Q. You have schooners running here?

A. Running to New Orleans with sand and shells.

Q. Where do you get your sand and shells?

A. I get my shells at what is called Doer point, that is a place that belongs to me.

Q. How much land do you own there by Bayou Johnson?

A. I think about 200 acres.

Q. You bought it from the Lake Borgne Basin Levee board?

A. No sir, I entered it in the State.

Q. When?

A. About 12 years ago.

Q. You bought it from the State of Louisiana?

A. Yes sir.

Q. How much of it is land and how much water?

A. Well, I don't exactly know, but I think about half of it. It takes the bayou right straight down on each side of the bayou.

Q. For what purpose did you buy that land?

A. I bought it for the shells, there was a shell bank there at one time and I bought it for that.

Q. You never have lived there?

A. No sir.

Q. There is no industrial life of any kind there, farms or gardens or habitations, except fishermen camps?

A. That is all.

Q. And never has been?

A. Never has been.

Q. Did you get a patent or deed or anything of that kind to that land?

A. Yes sir.

Q. Where is it?

1030 A. At my brother's house here in town. I got two patents, I have got two places down here, one at Doer point and one on this bayou.

Q. When did you get the other one?

A. At the same time.
Q. Do you remember what you paid for that?
A. 12—12 cents per acre.
Q. Your title was not warranted?
A. It was a regular patent and signed by the governor.
Q. That is true, but what I wanted to know is, whether they undertook to give you a warranty deed to it or merely a release from a claim by the State to it?
A. No sir.
Q. Do you remember whether you applied for it as a part of swamp or overflowed lands?
A. Overflow lands.
Q. Does your patent recite, if you remember, when that land was approved to the State of Louisiana?
A. I don't know whether it does or not.
Q. You don't remember that?
A. No sir.

Redirect examination.

By Mr. DYMOND:

Q. Were you summoned as a witness for the State of Mississippi in this case, in Biloxi?
A. No sir.
Q. Do you know Mr. Heidenheim of Biloxi Mississippi?
A. Yes sir.
Q. Did he have charge of getting up the evidence for the State of Mississippi, or rather, not for the State of Mississippi but for the people in that city interested in pressing the claims of Mississippi?
A. I don't know whether he did or not.
Q. Were you interviewed by anybody in regard to testifying in this case?
A. No sir.
Q. What was the date, Captain, that this man Casimir Harvey applied to the State land office of Mississippi or of Louisiana for the land you have referred to, about how long ago?
A. I guess it is about 12 years ago, somewheres along there.
Q. Did he get a patent?
A. Yes sir, he has got a patent.
Q. From the State of Louisiana?
A. Yes sir.

1031 Judge LAWRENCE O'DONNELL, witness sworn and examined on behalf of the State of Louisiana, testified as follows:—

Direct examination.

By Mr. ZACHARIE:

Q. Where do you reside?
A. I reside in the city of New Orleans.
Q. How long have you been residing here?
A. In the city of New Orleans for 40 years.
Q. How old are you?
A. I am 62.
Q. What is your occupation?
A. I am an attorney at law.
Q. Have you ever held any official position in the State of Louisiana?
A. Yes sir, I was parish judge for the parish of Plaquemines and I was district attorney here for about 12 years, I also served as State senator.
Q. Are you familiar with that territory lying to the south of the Mississippi shore running from Isle à Pitre to Malheureux point?
A. I am not familiar with it, I know of its location.
Q. Have you ever coasted along there in yachts?
A. Yes sir.
Q. Do you know what the name of that territory goes by amongst Mississippians, Louisianians and the people generally?
A. I have generally heard it alluded to as the Louisiana marsh.
Q. Have you ever heard it alluded to by any other name?
A. No sir, I did not until the claim was set up in this controversy growing out of the oyster industry of which this is a part.
Q. You never heard it called Grand marsh or any other name prior to that time?
A. No sir.
Q. You have been a yachtsman?
A. Yes sir, for many years.
Q. Are you a member of any yacht club, if so what?
A. I am a member of the Southern Yacht Club and at the present time fleet captain, and have served in pretty near every capacity in that club from commodore down and my present position there is fleet captain.
Q. Do you know or have you ever heard from general information where the boundary between Louisiana and Mississippi was considered prior to the institution of this suit?
A. Yes sir, from the mouth of the Pearl river, the East Pearl river, the channel that runs through and leaves St. Joe to the right, called Pass Marianne, and down along there between Isle à Pitre and Cat island.
Q. Does that channel run north of Grand island, Grassy island, Round island and the other of the Malheureux islands there?

A. Yes sir, it does, but there are so many grassy islands, it seems that every little island in the lake——

Q. I am speaking of an island known, up there, Grassy island and Grand island sometimes known as Half Moon island, that channel runs along that——

A. Yes sir.

Q. Can you state from your knowledge whether that deep water channel was generally considered, prior to the institution of
1032 this suit, by both Mississippians and Louisianians as being the boundary between the two States?

A. I never heard it disputed, Colonel, by anybody.

Q. You mean by that, it was generally admitted?

A. It was generally admitted. I never heard the question brought into controversy until the oyster industry attained such prominence as it has and each State is trying to define its right and control of it.

Q. How often in your life have you visited that territory?

A. I couldn't tell, it has been so often I couldn't say.

Q. About how many times?

A. Do you mean visited the territory?

Q. Passing along there?

A. How often?

Q. Yes, as near as you can remember?

A. Certainly a couple of hundred times.

Q. Have you, or have you not, had intercourse with the fishermen there both from Louisiana and Mississippi?

A. Yes sir, I know a great many of them.

Q. Have you ever talked with them about the points which you have testified about?

A. No, I have not.

Cross-examination.

By Mr. McCLURG:

Q. Not having talked with them about it, Judge, your statement with reference to its being universally or generally admitted that the boundary lay in Cat island channel is based upon the statement of Louisiana people?

A. Well, Louisiana, and Mississippi people conceded it, I never had a general conversation, there was never any necessity for it, it was a thing generally understood.

Q. You said you never heard it disputed?

A. Yes sir.

Q. But yet you say that it is generally admitted to be——

A. To be generally understood, everybody always alluded to it as the Louisiana marsh.

Q. You do not undertake to testify, Judge, as I understand it, that the people along the Mississippi coast, and Mississippians generally, admit or understand, that this is the boundary between the States?

A. Not as to boundary but they always alluded to that lan
Q. I am talking about the channel, the boundary line?
A. About the channel, no, only alluded to that land as the L
ana marsh.
Q. You do not undertake to testify that it is regarded by
the people of Mississippi?
A. No sir.
Q. But it has been admitted, as you understand it, by the p
of Mississippi?
A. Yes sir.
Q. But never has been questioned as far as you know?
A. It never has been questioned. As I stated in part of m
amination—I want to get clear on this thing—as I stat
1033 Col. Zacharie, I never heard it disputed at all until this
troversy arose, until the oyster industry assumed [the
portions it has within recent time.
Q. So if there had been no controversy, how could there
been an admission, how can you admit a thing that has never
brought in controversy?
A. I will tell you how. In sailing and cruising from plac
place along the coast I was brought in contact with other yachts
and whenever they talked about taking an excursion or going
cruise, they always alluded to that part of the place as the Lo
ana marsh.
Q. Without any reference at all to the legal status?
A. Without any at all.
Q. Have you ever had occasion to examine the acts of Cong
admitting these two States into the Union?
A. I did but it is so long ago, really——
Q. You never made any critical examination——
A. No sir.
Q. You never attempted to run out the lines under the constr
tion of those two acts?
A. I had a case some years ago in which I defended some m
that were arrested;—they were in court down at Plaquemines
fishing, and I cleared my men on the ground that they were fishing
the waters of Mississippi, and then I made that the subject of the co
troversy that they were beyond the other side of this pass betwe
Isle à Pitre and Cat island, I believe they were fishing on the re
inside of Cat island.
Q. There have been several similar cases in Mississippi?
A. Yes sir.
Q. And your defense was they were within the 18 mile limit
the Mississippi shore?
A. Yes sir, they were fishing inside of Cat island.

Redirect examination.

By Mr. ZACHARIE:

Q. To the eastward you mean of Cat island?
A. Between Pass Christian shoaal and Cat island.

By Mr. McCLURE:

Q. When was that?
A. That has been a long time ago.
Q. What law were they violating?
A. They claimed—I don't remember now, it is so long ago I really can't think of the controversy, but I know some men were arrested—they formed some association, some protective oystermen association or something, do you remember about it, Colonel?
Mr. ZACHARIE: No, I have a poor recollection.
Q. You don't remember the year?
A. No sir.
Q. You don't remember the offense with which they were charged?
A. They were charged by those men with fishing. I don't believe there was any offense under the law, that is how I got them off and I showed they were not fishing in the State of Louisiana that
1034 they were on the Mississippi side.
Q. What were they charged with?
A. They were charged by the protective association with fishing in the waters of Louisiana.
Q. Without a license?
A. No sir, there was no license law then that I know of.
Q. I am anxious to find out the law they violated.
A. I don't think it was any law that was violated, it was over a regulation of those fishermen. Now, I tell you what I think, there were some months in which fishing was prohibited.
Q. By State law or by an agreement among the fishermen?
A. I am inclined to believe it was by agreement among the fishermen. It is so long ago and I never thought of the matter since.
Q. How long has it been since you lived in Plaquemines parish?
A. It has been quite a number of years.
Q. About how many to your best knowledge?
A. 15 years.
Q. Plaquemines parish is south of the parish of St. Bernard?
A. Yes sir.
Q. It is not in this disputed territory at all?
A. No sir.
Q. You understand that?
A. Yes sir. I have a summer residence at Waveland, Mississippi.
Q. In visiting your summer residence and in coasting, and your visits generally out in that territory, until these laws were inaugurated, of recent date, that territory was regarded as common ground

for Louisiana and Mississippi and Alabama and all comers generally, was it not?

A. I can't say that, but I can say this, that before this, the fishermen from all along there didn't question who owned that, they just went and fished wherever they could find their product and brought some of it to the old basin for consumption in New Orleans and then afterwards when the factories grew up they fished and brought oysters to the factories on the Mississippi coast.

Q. You never heard anything of an armed conflict threatened between the officers of the two States, over that boundary, I mean prior to the bringing of this suit?

A. I did hear at one time, I can't state from my own knowledge, but I did at one time hear that a man named Captain Young held some sort of a commission or authority and warned fishermen off from——

Q. Of what State was Captain Young?

A. I was told at the time that he represented the State of Mississippi.

Q. Captain Young in the State of Mississippi?

A. Yes sir. He used to own the yacht Nepenthe, he was a yachtsman. He had some sort of a public office, but I am only stating this as hearsay.

Q. About when was that?

A. I suppose that was eight or nine years ago; I don't state that as a fact.

By Mr. ZACHARIE:

Q. In this case in which you defended those Mississippi fishermen——

A. No, it was Louisiana fishermen, Austrians.

Q. Louisiana fishermen, your—as I understand it your defense was first, there was no law against people fishing there; it was simply an agreement between the fishermen?

1035 A. Yes sir.

Q. And secondly, that the point at which the fishing was charged was that it was southeast of Cat island and that it was not within the waters of Louisiana?

A. Yes sir.

Q. The question of 18 miles or six leagues from the Mississippi shore only figured in the case in order to show that Cat island and the waters southeast of it were not within the boundaries of the State of Louisiana?

A. Yes sir.

Adjournment of Proceedings.

At this stage of the proceedings, the hearing was adjourned by the commissioner to be resumed at 2.30 p. m.

Resumption of Proceedings.

2.30 P. M.

Pursuant to adjournment the hearing was resumed at this hour at the same place.

OSWALD OGDEN, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. ZACHARIE:

Q. Where do you reside?

A. At present I am living at Waveland, summering there.

Q. How long have you been going to Waveland during the summer?

A. I have been going there almost my entire life, about 33 years.

Q. What is your occupation?

A. At present I am superintendent of the garbage in the department of public works.

Q. Do you know the territory lying between Isle à Pitre and Malheureux point and the territory south of the shore of Mississippi?

A. I do, in a way, I have been along there quite a number of times when I was a youngster, but I have not been there for a good many years.

Q. Well, during your summer residence, at Waveland you say?

A. Yes sir.

Q. What has this territory been known as, what name has it gone by amongst the people along that Mississippi coast?

A. I have always known it and always heard it spoken of as the Louisiana marshes and as part of the Louisiana holdings, as belonging to Louisiana.

Q. Did you ever hear it called by any other name?

A. No sir.

1036 Q. Do you know anything about what is reputed to be the boundary between Louisiana and Mississippi in those waters?

A. I don't know that I do. I always heard the deep water out there was as a general thing supposed to be the dividing line.

Q. What do you mean by the deep water; do you mean the deep water channel?

A. Yes sir.

Q. Do you mean the channel that comes out of East Pearl river and then goes down between Cat island and Isle à Pitre?

A. Yes sir.

Mr. MCCLURG: I believe I would like to have the counsel let the witness state what he thinks.

A. That is what I meant to say.

Cross-examination.

By Mr. McCLURG:

Q. How old are you?

A. I am thirty three.

Q. You speak of it being always considered, the line, as the deep water channel. What do you mean by saying that that has always been considered the boundary between these two States?

A. I don't know whether I said that or not. I said that I was always under that impression.

Q. How long have you been under that impression?

A. Ever since I was able to reason.

Q. Where did you get that impression?

A. I don't know that I can answer that. I don't know that anybody has ever told me particularly,——

Q. In other words, as a matter of fact, by pinning you down to what you are willing to swear on your oath, you can't say where the boundary between the two States is?

A. No sir.

Q. You said you always heard that the Louisiana marshes were in Louisiana. Where did you get that impression or that information?

A. Well, by just referring to the marshes down there by various people living along that coast.

Q. Along the Mississippi coast or the Louisiana coast?

A. Along there by Waveland.

Q. You know most of those people, officers, and those who have had to deal with political matters, have testified they considered as belonging to Mississippi 18 miles out from the Mississippi shore?

A. I don't know anything about what, what they have testified, I have not followed this case, I have not read any particulars of it.

Q. I do not mean to be captious with you at all, but you are making your statement pretty broad and I want to get it down as near the facts as I can; that is the reason I call your attention to the fact that my people stated they claimed——

A. I don't know anything about that.

Q. As far as your information goes you have passed the
1037 opinion that the Louisiana marshes belonged to Louisiana and the deep water channel is the boundary line?

A. Yes, sir, that is my impression.

Q. Now, then, you know, I must find out the best I can upon what that opinion is based?

A. To come close down to it, the only person that I can recall having spoken to on the subject is my father; he has lived over there for 50 years and he is entirely familiar with that section and I always heard him speak of it as that.

Q. As the Louisiana marshes?

A. Yes sir.

Q. There was no question ever brought up so far as your father

nforming you, as to any controversy or dispute as to the boundary ne?

A. No sir.

Q. You know there are some parishes in Louisiana called the 'lorida parishes?

A. Yes sir.

Q. They do not belong to Florida because they are called Florida arishes?

A. No sir.

Q. And you don't imagine for the same reason that the Louisiana arshes belong to Louisiana?

A. They might not, I can't swear they do.

Q. So far as the legal features of this case are concerned, and hat I mean by that is, the acts of Congress admitting the two tates, you never have examined them?

A. No sir, I know nothing about it.

Dr. JOSEPH T. SCOTT, witness sworn and examined on behalf of ie State of Louisiana, testified as follows:

Direct examination.

By Mr. ZACHARIE:

Q. What is your age?

A. I am 35.

Q. Where do you reside?

A. I live in New Orleans.

Q. What is your occupation?

A. I am a physician.

Q. Do you hold, or have you held any official position?

A. Yes sir, I am an officer in the Marine Hospital Service.

Q. Of the United States?

A. Yes sir, acting assistant surgeon.

Q. Have you been in the habit of visiting during the summer ason at any time, if so, when, the Mississippi sea coast?

A. Well, about, off and on, for the past 25 or 30 years, ever since was a child.

Q. Do you know that territory which lies between Isle à Pitre and alheureux point south of the Mississippi coast?

A. Well, I know it from having hunted and fished down there some years ago, I don't know anything definitely about the
038 topography of the country, I just know about where it is, I know how to get there.

Q. Do you know what that territory is generally called by the eople along the Mississippi coast?

A. Yes sir, it is called the Louisiana marsh.

Q. Have you ever heard it called by any other name?

A. No sir.

Q. Do you know whether it has been considered, or not, as a part of Louisiana?

A. I have always been under the impression it belonged to Louisiana.

Q. Do you know what has been the general impression up to the institution of this suit amongst the people along that coast?

A. The general impression was it was the Louisiana marsh, Louisiana territory.

Q. Do you know anything about the boundary line between Louisiana and Mississippi?

A. Except that Pearl river is the boundary between the two.

Q. I mean after leaving Pearl river, do you know anything about any particular channel?

A. No sir, I couldn't say positively. I was under the impression that all west of Pearl river was Louisiana.

Cross-examination.

By Mr. McClurg:

Q. You do not think it is possible for Mississippi to be delim*i*nated out of her territory just because the people may call it something else do you?

A. No sir.

Q. Now, then, these impressions you speak of, they are formed upon a sort of general talk and without any sort of reference to any definite legal line?

A. I couldn't say, I don't know, I couldn't answer.

Q. I mean, you said you had an impression?

A. I always heard it called that.

Q. What do you mean by always?

A. Any time the subject was brought up in talking about going hunting or fishing.

Q. Generally by Louisiana people?

A. No sir, they were Cadians over there. I always heard it called the Louisiana marsh.

Q. I mean of——

A. Mississippi.

Q. You mean that you have always heard the Mississippians call it the Louisiana marsh?

A. The people over there, Mississippians and anybody.

Q. You never struck up with any one that called it Grand marsh?

A. No sir.

Q. What has been your association with the Mississippi people over there?

A. I have associated with all of them over there——

Q. Mississippians or Louisianians——

A. All along that coast.

Q. Who are interested in this suit.

A. With the people who are natives over there.

1039 Q. You mean along the coast?

A. I mean along Waveland, Bay St. Louis and Nicholson avenue. I guess I could name all I know over there, Mississippi summer residents and people that live off the visitors.

Redirect examination.

By Mr. ZACHARIE:

Q. You own property over there?

A. No sir.

Q. Not now?

A. No sir, never have owned property. My father always leased a place.

Recross-examination.

By Mr. MCCLURG:

Q. You have no idea where the legal boundary is between these two States in those waters?

A. No sir, I couldn't swear to any legal boundary.

By Mr. DYMOND:

Q. Did you ever hear any Mississippian at any time in your experience make any claim that that territory south of Bay St. Louis known as the Louisiana marshes, belonged to Mississippi, prior to this suit?

A. I couldn't cite any particular case, I couldn't name any one man who had so declared.

Q. Did you ever hear anybody without naming any one. Did you ever near any one claim that this territory belonged to the State of Mississippi?

A. No, sir, I never did.

By Mr. MCCLURG:

Q. You never heard anybody specifically name it belonging to the State of Louisiana?

A. No, sir, I did not. I thought it was generally understood that it was Louisiana territory.

Q. You just thought that?

A. I always heard that. They always claimed that if there were any flies in the shape of musquitoes they came from the Louisiana marshes, they laid it all on Louisiana.

Q. You do not propose for the musquitoes to settle the boundary between two sovereign States?

A. I don't think he is going to do it either.

Q. He may communicate yellow fever and other diseases, but I don't think he will settle the State line?

A. No, sir, he will not.

1040 LOUIS H. FAIRCHILD, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. DYMOND:

Q. Where do you live?

A. My home at present I consider in New Orleans. I have been sort of shifting. I have lived in Bay St. Louis, Mississippi, I have resided and voted there since 1871 up until the last election for Congressmen, I think at the time Bowers was first elected I think about a year or more ago. Since then I concluded to make my domicile here in Louisiana, but I have been a citizen of Mississippi for about 30 years.

Q. How old are you?

A. I am fifty-five.

Q. During these 30 odd years, at what point in Mississippi did you live?

A. Bay St. Louis and Waveland which is a part of Bay St. Louis.

Q. During your residency there, were you thrown in contact much by acquaintance or otherwise with the natives of that locality?

A. Yes sir.

Q. Are you fond of fishing and hunting, etc.?

A. Yes sir.

Q. Ever make excursions and have you made excursions on fishing and hunting trips?

A. Numerous times, yes sir.

Q. Ever had occasion to go into the marshes south of the Mississippi shore, south of Bay St. Louis?

A. Yes sir.

Q. From the acquaintance you had with the people with whom you went over there, what was the name that that territory generally received?

A. Louisiana marshes, that is, if I understand right the territory you refer to.

Q. The territory south of Waveland?

A. Yes sir, south of Waveland.

Q. Creole gap and all those places?

A. Yes sir.

Q. Between Malheureux point and Isle à Pitre. Here is Isle à Pitre to the right and Malheureux point to the left with Bay St. Louis immediately north? (referring to map No. 59.)

A. Yes sir.

Q. To what State was the ownership of this territory attributed, the territory concerning which you have just been testifying?

A. To Louisiana. I never heard it spoken of as anything but Louisiana.

Q. Did you ever hear, in your experience of 30 years as a voter

in Mississippi any claim made that this territory belonged to Mississippi?

A. No sir, I never heard it discussed. I never heard any claim made either.

By Mr. ZACHARIE:

Q. Did you ever hear it called by the name of the Grand marsh?

A. No sir, I have always known it as the Louisiana marshes,
1041 that is all.

Q. Is that the name——

A. I know as a Mississippian we always cussed Louisiana for the musquitoes we got from that marsh.

By Mr. MCCLURG:

Q. Didn't you cuss the marsh also?

A. We always cussed it in the name of Louisiana, we always said when the wind was from the southwest we will have musquitoes.

By Mr. DYMOND:

Q. Do you know what was regarded as the boundary between the two States in that general locality?

A. No sir; I never heard the boundary discussed between the mouth of Pearl river.

Q. You understood Pearl river to be the boundary at that point?

A. Yes sir.

Cross-examination.

By Mr. MCCLURG:

Q. So far as the water boundary was concerned, after leaving Pearl *Pearl* river, you never heard that discussed?

A. No sir.

Q. And you have no idea where it is?

A. No sir.

Q. All you know is, when the southwest winds brought musquitoes you cussed the Louisiana marshes?

A. That's right. That is all I know. As I stated I have always heard this territory spoken of and referred to as the Louisiana marsh and never as the Mississippi marsh.

Q. But you never heard any controversy as to which State it really belonged to?

A. No sir.

Q. And because you have heard it called the Louisiana marsh you expected that marsh land as belonging to the State of Louisiana?

A. Yes sir.

Q. And that is the sum total of what you do know about it?

A. That is all.

Q. You never heard anything of any threatened armed conflict between Louisiana and Mississippi over the boundary out there?
A. No sir.

EDGAR H. FARRAR, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. DYMOND:

Q. You live in the city of New Orleans?
1042 A. Yes sir.
Q. You are a member of the firm of Farrar, Jonas & Kruttschnitt, the senior partner, I believe?
A. Yes sir.
Q. The firm of Farrar, Jonas & Kruttschnitt is one of the principal law firms of the city of New Orleans?
A. It is so regarded.
Q. How old a man are you?
A. I was 55 years on the 20th day of last January.
Q. Have you, in your life, ever had occasion to live or spend any time on the south coast of Mississippi which is commonly called by us "across the lake"?
A. From 1879 to 1901 I spent the majority of my summers, nearly every summer, either at Pass Christian or at Mississippi City, generally at Pass Christian. During that period my family remained over there for two whole winters.
Q. On these visits and trips you made, did you ever have occasion to make any fishing excursions, or anything of that sort, to the country and islands south of the Mississippi coast?
A. Very many.
Q. Did you ever visit the locality around Isle à Pitre which is shown on this map No. 59, of Louisiana, as being a little southeast of Hendersons point?
A. I have been on fishing trips to all of the keys which lie south of this channel, this channel south of Cat island, and these marshes, and I have fished all along this marsh and on two occasions I went with a party from New Orleans, fishing, into what some one of them called Grand bayou here——
Q. Grand pass?
A. Through Grand pass out to the Chandeleur islands and back.
Q. Were you thrown in contact, on any of those trips, with any fishermen or natives of the Mississippi coast?
A. Yes sir; schooner captains and sailors. I have been on a great many fishing trips out there. We would arrange with a schooner captain to meet us at either Pass Christian or Bay St. Louis or at Mississippi City or at Biloxi and we would take the train from here and go over there and take the schooner and go out and fish for two or three days, a week sometimes and sometimes ten days. Then, in

addition to that, when I would spend the summer over the lake, why, there were a lot of people there who had schooners and fishing boats and I would hire a boat and go out on these fishing trips. And then on other occasions I have gone with men like John Parker and Sam Heaslip and Mr. Bob Ogden and other gentlemen who owned their own fishing boats and were accustomed to go to these places fishing.

Q. These captains and crews of the boats you have referred to, were they generally native Mississippians or people living over there?

A. Always. They were people who owned schooners and vessels that were used in this trade around there, either for fishing or other purposes.

Q. Were they familiar with the locality to be visited by you?

A. They appeared to be. We would tell them to take us to such a key or Isle au Pied and they always seemed to know where to go.

Q. Now, Mr. Farrar, amongst those people by what name was this territory known, that is, the territory beginning at Isle à Pitre and extending westward and southward?

A. Well, all of the keys and these marshes which lie south of this channel through here, were known as the Louisiana marshes, Louisiana coast.

1043 Q. Were they so known by the people living along the coast of Mississippi, so far as you were able to ascertain from your intercourse with them?

A. Yes sir. That was the common name of all of this territory over here. Louisiana marshes was its popular name, that everybody spoke of it by.

Q. Did you ever hear anyone ever claim that that was a part of the State of Mississippi because it was within 18 miles of the Mississippi shore and was islands?

A. Never. I never heard there was any such claim until the State of Louisiana began to enforce her oyster law two or three years ago and the packers and canning people began to grumble and set up the claim that that was in Mississippi.

Q. Did you ever hear discussed as to what was the boundary in the waters of Mississippi sound, between the two States, prior to the institution of this suit?

A. It was always understood that the boundary between the State of Mississippi and the State of Louisiana, was the line of the main channel south of Cat island and in front of Pass Marianne light; for instance, Merrill's shoal bank, as it was called, was supposed to be a Louisiana key, and these keys out here, Dog key, and Pelican key, which lie south of that channel towards Isle au Pied, were called the Louisiana keys.

Cross-examination.

By Mr. McCLURG:

Q. If I do not misunderstand you, Mr. Farrar, when you say, it has always been understood that these islands and keys which you have just mentioned have been considered as Louisiana territory or belonging to the possessions of this State, that that understanding has grown out of a kind of a general understanding without any sort of reference to the legal features of the case?

A. I am simply telling you what the popular notion was, and time the popular view of the matter was. Of course I had never looked into the question and I do not suppose that anybody else had looked into the question critically, but that was the general and public impression and view, that this territory over here was Louisiana territory.

Q. The general public view and impression of the people of Louisiana or Mississippi?

A. Of the people all along that coast who live there permanently, Mississippians or Louisianians?

A. Mississippians, and among Louisianians and everybody; there was never any dissent, as I understood it, from that opinion.

Q. I want to say to you that we have taken the testimony of a great many people in Jackson, Harrison and Hancock counties, and it has been universally testified to by judges and district attorneys, mayors and marshals and constables, steamboat captains, owners, pilots, and humble citizens, who have no political distinction at all, that they have regarded and the State of Mississippi has exercised sovereignty and jurisdiction 18 miles from shore south of it. I mention that to show to you there must be some mistake in everybody being of that opinion?

1044 Mr. DYMOND: To which statement of counsel for the State of Mississippi, counsel for Louisiana enter an objection, because the record will show that the counsel is mistaken in his interpretation of the evidence of the witnesses for the State of Mississippi, and that those who have testified in regard to Harrison and Jackson counties referred to the islands within 18 miles distant from the shore of Mississippi where there is no controversy.

A. It was always conceded, as I understood the matter, that is, the public understanding, that all of the islands such as Cat island, Ship island, Round island, Grand island, and all those islands adjacent to the Mississippi shore, were parts of Mississippi; but that the marshes and the keys which lie south of Cat island, form part of the Louisiana territory, and if those people ever had any such notion they kept it to themselves so far as I was concerned, because within my knowledge, no such opinion ever prevailed among the people that I came in contact with along that coast at any time in 30 years.

Q. Well——

A. I have been going out there since 1873. My first fishing visit to that locality was made in the summer of 1873.

Q. Well, is it not true that you came in contact mostly with people who were there during the summer time for recreation and pleasure and not with the sturdy solid working people along the coast and those who were interested in the permanency——

A. I came in contact with all sorts of people; with fishermen and schooner men and the permanent residents there, and of course a great many people from the city of New Orleans.

Q. And did those people with whom you came in contact with agree with you that that sailing line buoyed by the Federal Government for vessels of heavy draft, the Cat Island channel, around to the mouth of Pearl river was the boundary between these two States. You do not undertake to say that, do you?

A. I mean to say that the public impression which I gathered from contact with the people over there, and from going out there fishing, and from talking about going fishing, and from negotiating with fishermen and schooner people, was, that that territory over there was Louisiana territory.

Q. You mean the territory south of——

A. The territory south of that channel including these keys, including the keys and what is called Isle au Pied, I call it that, some people call it Isle à Pitre and some people call it Isle au Pied. It was supposed—or, as I always understood, that the island had originally the form of a human foot and it was called Isle au Pied which was corrupted into Isle à Pitre.

Q. Some of the old fishermen have testified it got its name from Isle au Pied, Isle of Tracks, they said they were coon tracks.

A. *Pied* in French, means foot in English. Whether it got it from *pied* or the foot of a coon or whether it got it from the shape of the island, I don't know, but I always understood that it was called Isle au Pied or Foot island and that it had that name because it had the shape originally of a human foot or a foot.

Q. The bill of complaint in this suit copies from the act of Congress admitting the State of Louisiana into the Union in
1045 1812. Omitting other parts describing the boundaries of the State of Louisiana, the act, as I read it, from the original bill, in connection with the boundary under discussion, now reads this way "thence down the said river to the River Iberville, and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by said gulf to the place of beginning, including all islands within three leagues of the coast." I read that to you, Mr. Farrar, because I know you are a good lawyer and I think you want the right thing done in this case no matter how it falls. I call your attention to the fact that Lake Borgne is not mentioned in that description, "from Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by said Gulf to the place of beginning, including all islands within three leagues of the coast." I would like you to state to the commis-

sioner, even though you be an adverse witness, and a stout one, wh
the words "including all islands within three leagues of the coast
not used within the contemplation of the act to show that not
the three leagues which usually means water measure, as I u
stand it, in connection with that, but any islands which are us
described by land descriptions, townships, ranges, sections; it
not meant to give Louisiana jurisdiction and sovereignty
leagues from her main shore in water territory, subject of cour
the common right of navigation, and that saying including
islands, to be absolutely certain that she not only got the wate
tom and sovereignty of the water surface subject to the com
right of navigation, but also she got the islands within that re

A. If I should be called upon, as a lawyer, to interpret tha
of Congress, I should have to go back and find out what the bo
aries of the Louisiana territory as acquired from the French
ernment were, and to determine whether or not it was the o
and purpose of Congress to include in the territory of Louisian
same territory as that acquired under the treaty from France
appears to me that after you have determined which of this
tory and the islands came to Louisiana from France, and what
boundaries of that territory were as acquired from France,
then, it was the intention of Congress to include that same terr
in the territory of Louisiana and I would reject any interpret
of the act of Congress which would draw a line leaving out o
State of Louisiana any portion of the territory acquired from Fr
which had originally formed a part of this grant from France
appears to me that that would be the light that would guide m
cision in interpreting that act of Congress. Now, I do not k
what those exact boundaries were; I do not know whether
islands, or whether this territory here was included in the g
from France to the United States. If it was, I should say th
reasonable interpretation of that act is that it was the intentio
Congress to transfer all of that property to Louisiana. If that pro
was not within the territory acquired from France, why, that w
have to be settled by comparison with other acts of Congress,
ting the two together, to see what the intention of Congress was
this territory was included in the Louisiana territory then, as I
it was evident that Congress intended to include it in the Sta
Louisiana. If it was not included in the Louisiana terri
1046 but belonged to the United States by some title acqu
prior thereto, why, I should say it would be very dou
whether it was the intention of Congress to put this territory
Louisiana.

Q. Now, look at the map No. 7, of Louisiana, now before you
want to call your attention to some perfectly patent matters an
ask you please to favor us with your views upon that subject bec
we are trying to get, as I understand it, the construction of the
acts admitting Louisiana and Mississippi into the Union. I say
acts, but really there were three, Louisiana having two. You

notice here the mouth of Pearl river on this map No. 7 introduced by Louisiana in evidence in this case; that, following her contention, from the mouth of Pearl river there, around to the mouth of the Sabine river dividing Louisiana from Texas, that there is something like 500 miles sea frontage of the Louisiana coast, and from the mouth of Pearl river to ten miles east of the Pascagoula river, or 70 or 75 miles is the sea frontage of the Mississippi coast. It is alleged in Mississippi's answer and cross-bill to the complaint of Louisiana, that the Congress, in forming these two States out of the territory which it had previously acquired, intended to give each State a sea frontage, and if we are correct in that construction, our contention is that in giving Louisiana her sea frontage here, Mississippi still being a Territory, that it was not the purpose or intention of Congress to so form the State of Louisiana as to cut off from the State of Mississippi, evidently then soon to become a State, as to shut her off of almost half when measuring from the northeast point of Isle à Pitre with her three league limit which passes northeast of the boundary, to a point directly between Gulfport and Ship island, and leaves Mississippi no sea frontage at all from Ship island to the mouth of Pearl river only from the western end of Ship island to the western part of Petit Bois island immediately south of the Alabama line. I have tried to state it to you as succinctly and plainly as I can, and ask you to say what you may desire to, upon that proposition. I mean to say by the proposition, in general, the idea of Congress in giving to each State or Territory a sea frontage to the south, and that according to Louisiana's contention she not only gets a southern frontage but an eastern frontage and a northern frontage.

A. It is impossible for me to say whether Congress, in the absence of positive evidence on the subject, had any theoretical view about the division of the sea front of these States. I very much doubt whether the Congress, individually or collectively, even the drafters of this act, had, at that time, any definite geographical knowledge of this locality, and that the act was drawn with their usual carelessness which characterizes the drafting of all important legislation in American legislative bodies, and that these acts were not referred to the topographical authorities of the United States for examination, and that they went, as most of our legislation, by happy go lucky guess work. That is the history, in my judgment, of the conflict between these two States. Because of the ignorance of the men who drew those acts.

Q. That is precisely what I expected your answer would be, for the reason that the Congress never undertook to define the line from the mouth of Pearl river, and if there is any line for either
1047 State out of the mouth of Pearl river it must be supplemented by judicial construction, and according to one of the theories of counsel for Mississippi, for there is nothing mentioned in the act of Congress except to the gulf of Mexico——

A. The general rule under those circumstances would be, that the

line should follow the main line of the main channel, the central thread of the main channel from that point to the gulf of Mexico.

Q. No. That is the general rule so far as the channels are concerned; I mean river channels or streams usually carrying what is commonly termed channels, between two States. But in the high seas that have ebbs and flows of the tide, they have many channels.

Q. You cannot call any of this territory between the islands and the coast, the high sea, for the reason that it is an extremely shallow, flat, country which is navigable only along certain lines. It is nothing but sand flats covered with shallow water, with a channel running through them here and there. It could not be called the high seas at all, from my point of view.

Q. That is true; we all know that now; but Mississippi sound and Lake Borgne and Pascagoula bay and things like that? They have been named almost 50 years after the act of Congress. The question is whether or not Congress considered the first touch of these great waters to the south as the waters of the gulf of Mexico. Mississippi sound, as we have found in the examination of these maps and historical matters, so far as my present recollection serves me, was not known on any map until about 1866; Lake Borgne is mentioned in the act admitting Mississippi to which I will now call your attention by reading from the original bill of complaint in this case which says—referring to the line now under discussion—"thence due south to the gulf of Mexico; (meaning the line between Mississippi and Alabama) thence westwardly, including all islands within six leagues of the shore to the most southern junction of Pearl river with Lake Borgne; thence up said river to the 31st degree of north latitude." There is some ground for the belief that prior to 1817 that even Lake Borgne itself was considered by Congress, and in its reckless spirit at that time, and you remember they were war times, and that all of these waters along the south shore of the Mississippi Territory and the first touch of them, were considered the gulf of Mexico, and I think you will remember, in reading the history of this country prior to that time they have been called the south sea and the sea and the high sea and things like that. Now, then, the proposition is whether Congress had in mind Lake Borgne and the Mississippi sound as separate and distinct bodies of water from the gulf of Mexico?

A. I do not believe that Congress had any opinion on the subject because I do not believe they had any accurate knowledge on which to go. That is my personal opinion, from my experience with legislators.

Q. Then, in saying, in the act of Congress describing the boundaries of both States, to the gulf of Mexico, they probably meant to the first touch of those great waters Lake Borgne and the Mississippi sound they being then considered as a part of the Gulf?

A. I think Lake Borgne was named long prior to that time, I think you will find in the contemporaneous histories of the battle
1048 of New Orleans that Lake Borgne is spoken of, that the English went into Lake Borgne. I am not certain but I think in

a book written by an English officer, which I have, who was present on that campaign describing it in detail I think possibly that he mentions Lake Borgne as a place that the English went into in 1814.

Q. I do not mean to cut your answer short. I am quite sure that Lake Borgne had a name before that; but I have referred to the view that Congress took of it.

Q. If it had the name historically, prior to that time, it is possible that Congress was acquainted with that historical name. It appears to me that you must determine what Congress meant by organizing the Territory of Louisiana and the State of Louisiana, and fixing its limits, because after those limits were fixed, Congress could not by any subsequent act organizing the Mississippi Territory, take off any part of the Louisiana Territory or the State of Louisiana, not without the consent of the legislature of the State of Louisiana. Now, you must first determine what the original Territory of Louisiana was in accordance with——

Q. You mean in the contemplation——

A. Of the act of Congress which organized Louisiana, and then you must take the act of Congress organizing the State of Mississippi and wherever the act of Congress organizing the State of Mississippi comes into conflict with the act of Congress organizing the State of Louisiana, you must give precedence to the act of Congress creating the State of Louisiana because it was a prior act and Congress could not change it after it had organized the State and fixed the boundaries.

Q. I am quite sure, Judge Farrar, that you have knowledge of the common law theory, as to the high tide mark being the usual boundary of a State in measuring her common law three mile limit, you know, and I want to ask you if you have any personal knowledge as to where the high tide mark on the main land of Louisiana, is, immediately due south of the mouth of Pearl river through that marsh country?

A. The whole of southern Louisiana, the whole of the environments of the city of New Orleans are at or about mean tide level except certain ridges of land which run through them. All this portion between the Matarie ridge and Broad street is below mean tide level. All of that portion beyond the Metarie ridge and from there to the lake is below mean tide level, and at ordinary high tide on the Louisiana coast, a large portion of her main land goes under water. So, if you were to apply the common law rule to the Territory of Louisiana it would practically take millions of acres of land and put them into the high sea, which are subject to private ownership to day, which are cultivated and protected by levees and drains and are sugar plantations and rice plantations.

Q. I want to ask you——

A. That rule cannot be applied to a flat country like Louisiana which has to be protected from overflow, any more than it would

apply to the flat country of Holland which has to be protected from overflow.

Q. That is true enough, but, nevertheless, going down Nine Mile bayou southward into the Gulf proper, there is some point between that bayou and Lake Borgne and the Mississippi river where
1049 the flow of the tide is arrested and it ebbs. I want to ask you if you have any personal knowledge about that point where the flow of the tide around that bayou and towards the Mississippi river, marks its high tide?

A. I doubt whether there is any such point anywhere in that locality, for the reason that that locality is perfectly flat. There may be here and there individual ridges along the banks of small streams and bayous that were formerly connected with the Mississippi river which are above ordinary high tide; but all of that territory, as a rule, goes under water at high tide, and would go under every high tide except these small ridges, unless protected by levees or embankments of some sort.

Q. Do you know of any levee or embankment down the western bank of Nine Mile bayou that reaches around towards Bayou Terre Bœuf?

A. No sir. I doubt whether there are any levees there except possibly some small private levees that may have been put around properly that has been re-claimed.

Q. I do not understand you to mean by that, do I, that every high tide that comes in there, flows across this marsh into Lake Borgne by Proctorville?

A. No sir; because the high tide rises in Lake Borgne just as it rises on the outside. The tide comes up slowly and it rises on one side as well as on the other side, it rises on both sides.

Q. Now, Judge Farrar, I want to call your attention to another contention that Mississippi has in this matter. On this map, No. 7, introduced by Louisiana in this case, you will notice three distinct markings in blue lines. They are double markings, one being nautical miles and the other statute miles. The first one to the southwest undertakes, as we understand it, to mark the three leagues from the main land of Louisiana at the northeast and crosses west of Grand pass, as you see from the map?

A. Yes sir.

Q. The second double markings, measures from Grand pass and is supposed to be three leagues from that point. The third one, as we understand it, is three leagues from the northeast point of Isle à Pitre and reaches out to the artificial channel between Gulfport and Ship island. And you will notice that this last marking, that I have mentioned, near the Ship Island channel, strikes the Mississippi shore a little west of Gulfport; the second or middle marking would strike the main shore of Mississippi at Point Clear; while the first one or the one that is supposed to be measured from the main land of Louisiana, strikes the coast east of Point Clear. In other words, either one of those measurements would practically cut off the sov-

eignty and jurisdiction of Mississippi, in Mississippi sound and ake Borgne west of Gulfport. Do you think that if Louisiana ould claim jurisdiction and sovereignty to either of these three istant points, that it would interfere with the navigation and com- erce, the jurisdiction and sovereignty, and general prosperity of e State of Mississippi, taking it for granted that Louisiana would ass laws with reference to paying license for the taking of fish, ysters and shrimp by the boats out of Pearl river way to the west of ese lines, and other matters which you are more competent to con- der than I can suggest. Look at those lines, please sir, and tell me what effect upon the commerce, navigation and the prosperity 050 of the State of Mississippi it would have if Louisiana should have jurisdiction up to Gulfport?

A. So far as the commerce is concerned I do not see how an naginary line of jurisdiction over waters of that sort, could have ny effect,——

Q. May not the State establish a quarantine law separate from nother State, and oyster laws; don't you think that would seriously ffect it?

A.—for the simple reason that the admiralty courts of the United tates take jurisdiction over all torts that happen upon navigable aters of the United States, and all vessels of every kind that are ngaged in commerce are licensed and naturally under the laws of ne United States and not under the laws of either State. And be- ause under the Constitution of the United States there is absolutely ree trade between the ports and commerce of one State and the orts and commerce of another State. So far as the advantage hich results to the sovereign, from the conceded principle in this ountry that the sovereign owns the soil under navigable waters ithin the three mile jurisdiction and has the right to legislate bout fishing in her own waters, whether of oysters or of other kinds f fish, why, if the State of Louisiana should undertake to legislate, aving this jurisdiction over all the waters in her jurisdiction it ould necessarily exclude the citizens of the State of Mississippi nd the State of Mississippi, from those rights of fishing either of ysters or fish of other kind which the State of Louisiana might hoose to exclude them from. That would be the effect of giving urisdiction to the State of Louisiana over that territory. It would ive the State control of the right to fish and of the right to deal ith the soil lying under the water. So far as the quarantine is oncerned, I do not understand that the laws of the State can pre- ent a vessel from sailing along the high seas; they simply can revent them from having contact with another vessel from shore r with the shore; but I have never yet understood, and I know of o quarantine law, and I doubt whether a State could pass a quar- ntine law, which would prohibit a vessel from sailing through her aters, going either between ports in her own State or going be- ween ports in her State and ports in another State.

Q. What about landing within the ports of Mississippi——

A. If this territory would include any part of the main land of Mississippi I should say that that would be an interpretation of the act that was never in contemplation of the Congress, that any grant of this jurisdiction within the three mile limit should touch or take in any part of the main land of that State.

Q. But tell us about this view of it Judge. If a cargo of lumber or other commerce, should undertake to go up Pearl river, according to the claim of Louisiana, supposing that her local jurisdiction extended out to Gulfport, she could force that cargo of lumbor to go somewhere else, even though under the local laws of the State it would not be permitted by some quarantine regulations to go?

A. No sir; I do not think so. The Mississippi river is the boundary line between the State of Louisiana and the State of Mississippi, and I have never understood that either the State of Louisiana or the State of Mississippi ever undertook to regulate the navigation of vessels up and down the Mississippi river on account of quarantine.

Q. I mean Pearl river?

1051 A. Pearl river being the boundary line would be governed by the same rule. The State of Louisiana has no control whatever, expressed or implied, direct or indirect*ly*, over commerce that floats on her waters even those within her State and especially upon a river which is a boundary line between two States. She cannot pass any law which regulates commerce, directly or indirectly. She cannot license vessels. She cannot enroll them. She cannot prohibit licensed and enrolled vessels of the United States from entering her ports except in accordance with her quarantine laws.

Q. Do you understand that rule to apply to interstate commerce lumber that might come along the Mississippi coast desiring to go up to the mills on Pearl river?

A. My view of the quarantine powers, under the Constitution of the United States, is, that those quarantine powers are entirely under the control of the State. The Federal Government has nothing to do with them. That each State has the right to protect her own citizens by proper inspection laws and quarantine laws, from importation of diseases; but under the pretense of protecting her own citizens she has no right in the guise of a quarantine law to pass a regulation which would be a regulation of commerce.

Q. However that may be, if the State has sovereignty and jurisdiction, under the common law, three miles from her shore, and if it be true that the act of Congress admitting the State into the Federal Union should extend her common law sovereignty and jurisdiction from three miles to 18 miles, that State could inaugurate laws that would seriously interfere with an adjacent State who had different laws from her own?

A. If the Congress of the United States could extend the territory of Mississippi 18 miles from her shore, the State of Mississippi would have the constitutional authority to legislate for everything within that territory that a State has the power to legislate with reference

to it, under the Constitution of the United States, and if those laws were within the Constitution and objectionable to the citizens of another State, why, the citizens of the other State would have to stand the objectionable law.

Redirect examination.

By Mr. DYMOND:

Q. Let us suppose there was a point on the southern coast of Mississippi where there were no islands, and the opening was more than six miles broad between the ends of the islands if there were islands east and west of them, I do not understand you to say, do I, that Mississippi would have jurisdiction 18 miles out into the sea where there were no islands, under the act of Congress creating Mississippi?

A. The general law of nations, as I understand it, is, that the high sea belongs to the earth, to the world, and that the jurisdiction of every country extends three marine miles from shore. I doubt whether Congress would have the power to extend the jurisdiction of the State of Mississippi beyond the three marine miles. I do not believe that any other nation in the world would recognize such authority, because if they could extend it 18 miles they could extend it 40 miles, and one nation could extend its own limits
1052 as far as it pleased. So, that, I should say that the State of Mississippi has no jurisdiction, under the law of nations, beyond three miles from the main shore.

By Mr. MCCLURG:

Q. Just to interject. But, there is one State to the east of us somewhere that has 20 leagues.

A. I do not believe that any nation in the world outside of the United States would recognize any such grant of authority.

Q. Do you think that that would be binding, Mr. Farrar, between the States of the Union, independently of any controversy with any foreign country, if the United States through its law making power should grant that; would it not be binding as between the States of the United States, whether it would be, or not, as to foreign countries?

A. I do not think that if Congress of the United States had any such power that it would be binding as between the States.

By Mr. DYMOND:

Q. Do you know the rule of international law, where a boundary between two States is a river and that river empties into an estuary, bay, or strait, or sound, what the rule of international law is, in the sound, bay or strait, as to the boundary?

A. That it follows the main thread of the main channel if there is one through the estuary or through the sound. That is the rule, as I understand it, of international law.

Q. Was it on that theory, that Pearl river was the boundary between Louisiana and Mississippi, that you reached the conclusion, for yourself, that through Mississippi sound this estuary of the sea, the deep water channel should be the proper boundary?

A. I have never considered the question to any extent, or made up my mind what, under the law, the true boundary between Mississippi and Louisiana was. I never was called on to study it, therefore I have not expressed any opinion that I know of as to what that line definitely is, under the law. I stated to the ex-attorney general of Mississippi that it appears to me that the first thing to determine was what Congress meant by the original organization of the Louisiana Territory, what did the United States get from France under its treaty with France, what was the boundary line between the then territory of the United States and the required territory of the United States, and determine from that what the territory of Louisiana was according to that description, because it appears to me that it was the evident intention of the act of Congress to take that territory which it had acquired from France and to organize it into a government and it was possible and probable not the intention of Congress to give to this territory of Louisiana any other or different boundaries from what it had when it got it from France, and that after you had determined what the territory of Louisiana was as obtained from France, then look at the act of Congress organizing the Territory of Mississippi and if there is any conflict between the two, why, the Louisiana boundary must govern being the oldest in time and because it was beyond the power of Congress after it had organized the State of Louisiana to take any territory away from it without its consent.

1053 Q. Are you familiar with the topography, so as to testify, of what we call the Rigolets joining Lake Pontchartrain and Lake Borgne and Mississippi sound?

A. I have been through that very often and I know it is a very wide and a very deep channel through which a very strong current runs first one way and then the other according as the tide changes.

Q. Has it the general features of a river reaching into the sea?

A. I should not call it a river at all. It is more of an estuary connecting these two expanses of water known as Lake Pontchartrain on one side and Mississippi sound on the other.

Q. From your knowledge of the general topography of the country if you were told that dating back since 1683, in the treaties which have been made between the various continental governments concerning this territory, that the boundary line was described as thence through the centers of Lakes Maurepas and Pontchartrain to the sea or to the gulf of Mexico, from your knowledge of the country, how would that boundary reach the sea or gulf of Mexico as interpreted by international law?

A. It could only be reached by treating the Rigolets or by treating another similar channel and smaller in nature known as the

Chef Menteur which runs from this lower point here to Lake Borgne as an estuary and as part of Lake Pontchartrain.

Q. How then would it reach the sea or the gulf of Mexico?

A. Only by treating all of the water from there to the gulf of Mexico as an estuary.

Q. Would you follow the deep water channel in reaching the sea through that estuary?

A. Assuming that it was an estuary, yes.

By Mr. ZACHARIE:

Q. Counsel for Mississippi read to you an extract from the act admitting Louisiana, that is, the original act of April 6th 1812, and he read particularly to you this clause, "Thence down the said river to the River Iberville, and from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by said Gulf to the place of beginning, including all islands within three leagues of the coast." Now, on the 14th of April 1812, eight days thereafter, Congress passed an act which was accepted by the State of Louisiana, and added to their constitution, some additional territory which reads as follows: "Beginning at the junction of the River Iberville with the Mississippi river; thence along the middle of the Iberville and of the River Amite and Lakes Maurepas and Pontchartrain to the eastern mouth of Pearl river; thence up the eastern branch of the Pearl river to the 31st degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become and form a part of the State of Louisiana." You therefore see that the eastern mouth of Pearl river is mentioned as the southeastern boundary line of Louisiana. Now, construing these two acts together, is it not true then, that the boundary should extend to the eastward from the mouth of Pearl river to the gulf of Mexico or to any arm of the gulf of Mexico. Counsel for Mississippi did not read the second act, the act of April 14th.

1054 A. Necessarily the two acts must be construed together according to a well known principle of law, and necessarily they must be read, if possible, so as not to produce conflict, if they can be so read, and necessarily as the second act purported to add to the territory of Louisiana it must be read in the light of an addition to that territory. The second act of Congress does not appear to make any additions or to make any changes relative to the boundary of the State of Louisiana from the mouth of the Pearl river eastward, different from that made in the original act, so that you must go to the original act to determine what Congress meant by the boundary of the State of Louisiana from that point, or from Lake Borgne around to the eastward.

By Mr. MCCLURG:

Q. Let me ask you now, right in that immediate connection. According to the original act, where did the line strike Lake Borgne out of Lake Pontchartrain?

A. I should say that depends; if you consider the wide deep channel called the Rigolets, as part of Lake Pontchartrain, why, then, Lake Pontchartrain and Lake Borgne touch each other.

Q. What about Chef Menteur?

A. Chef Menteur is a small stream, an insignificant stream of the same character as Lake Borgne, but way down here at the lower end of the lake.

Q. It is so shown on that map and I understood you to say that you had some personal observation——

A. I have been through Chef Menteur and I have been through the Rigolets.

Q. Well, which is the wider of the two, Judge?

A. Oh, the Rigolets is very much wider than Chef Menteur and deeper.

Q. Did you notice a fort on Chef Menteur?

A. Yes, sir. After the battle of New Orleans the United States Government finding the manner in which the English had approached New Orleans through the rear they fortified the Rigolets, put a fort there, and they fortified the Chef Menteur, so as to close the entrances into Lake Pontchartrain and they fortified these various bayous leading from Lake Borgne up towards the city of New Orleans. You will find at the mouth of the Bayou Dupre through which the Lake Borgne canal now runs, a fort; you will find another fort on Bayou Bienvenu and another fort down near the shell beach at a small bayou that comes in there. All of those inlets to the city of New Orleans were fortified by the United States after the war of 1812. They have now all been abandoned by the Government.

By Mr. ZACHARIE:

Q. Will you consider again and see if you have not made a mistake and whether that addition does not shift the eastern boundary of Louisiana to the mouth of East Pearl river?

A. I have stated that it does shift it to the mouth of East Pearl river, but I have stated that inasmuch as the mouth of Pearl river and the mouth of the Rigolets are not very far apart and that they both run into Lake Borgne, that this act of Congress does not
1055 undertake to change or to modify the boundary of the State of Louisiana east of that point or of a line joining those two points.

Q. I will read to you the description of the boundaries of the State of Mississippi as laid down in the act admitting the State to the Union "Beginning at the River Mississippi at a point where the southern boundary line with the State of Tennessee strikes the same thence along the said boundary line to the Tennessee river; thence up the same to the mouth of Bear creek; thence by a direct line to the northwest corner of the county of Washington (Alabama); thence due south to the gulf of Mexico." Now is the clause to which I want to attract your particular attention, "thence westwardly, including

all islands within six leagues of the shore to the most southern junction of Pearl river with Lake Borgne." Do you interpret that boundary as including all waters within 18 miles of the southern coast of Mississippi, or, is not her southern boundary limited to the three mile limit except where there are islands and the boundary gives her the islands. Does that mean to say that, starting from a point near Pascagoula and going westward, it takes in all the waters within 18 miles, or does it only include the islands within 18 miles?

A. You want my opinion as a lawyer?

Q. Yes?

A. I should say that this was a grant of jurisdiction over the islands within six leagues of the shore, and that it was not a grant of absolute jurisdiction to the State of Mississippi over the waters and the soil under the waters within six leagues of the shore because there is absolutely nothing said in the act with reference to the three mile limit or to any other limit or with reference to the jurisdiction of the State over the waters or with reference to the jurisdiction of the State over the soil under the waters. That was apparently left to the general rule of international law, that the jurisdiction of the State extended for three marine miles. The grant is made, however, to the islands that are within six leagues because those islands were part of the territory of the United States and it was not evidently the policy of Congress to have islands belonging to the United States lying off the shores of a State that were not within the control or jurisdiction of some State.

OBJECTION.—Mr. MCCLURG: The question and answer is objected to as plainly calling for a mere opinion.

By Mr. MCCLURG:

Q. There can be no doubt in your mind, Judge, of the power of Congress to change the common law rule, within her jurisdiction, by special act, can there?

A. Congress has the power to legislate within the grants made to the Congress by the Constitution and for the purpose of carrying those grants into effect. She has no other powers than those. The Government of the United States is a government of delegated powers. If a subject is within the powers of the United States
1056 it can make any rule with reference thereto, it chooses, whether that rule is in conformity with or in contravention of the common law rule or not. It can change the common law as it pleases in so far as granted powers are concerned.

Q. That is the extent of my inquiry. I understand from what you said a few moments ago that you doubted very much whether the Congress of the United States had jurisdiction to legislate beyond the three mile limit?

A. My opinion as a lawyer, is, that the Congress is absolutely without power to legislate any matter beyond the conceded limits of the United States according to the law of nations, except to de-

fine offenses upon the high seas committed upon vessels of the United States. In other words, Congress cannot assume to herself powers that no other nation possesses, and it is conceded by the law of nations that no nation has a right to legislate except within her own territorial limits and that her own territorial limits extend to within three marine miles of the shore, and the islands, of course, that are adjacent thereto and over which the country has jurisdiction.

Q. May not Congress make a grant within those three miles of the shore in the language that it has made in admitting the State of Mississippi into the Union granting her six leagues from shore. That means six leagues from the shore intending to give the State sovereignty and jurisdiction subject to the common right of nations over the face of the waters and the soil under the waters, and when it says to include all islands, not to limit the grant that it has made but to make certain facts of the grant of jurisdiction to the water and the territory under the water and whatever islands may protrude above the water. Would that not be a reasonable construction of these acts?

A. I should say no. I would not interpret an act of Congress as extending the jurisdiction and power of a State beyond the limits conceded by the law of nations, to be the limits of any nation's territory unless the act of Congress said so in terms so specific and so clear that no other interpretation could be put upon it, and if the act of Congress did undertake to extend its own territory, or the territory of any State which it might create out of its own territory beyond the conceded limits established by the law of nations, I should say that that act, in so far as such extension was concerned was absolutely null and void and was not binding either upon any foreign State or binding upon any other State in the Union.

Q. Not going beyond the three mile limit; taking for an illustration the act admitting Louisiana into the Union and giving her three leagues from her coast to include all islands within that reach, do not the words to include all islands mean the accumulation rather than the limitation of the jurisdiction of the State over the islands?

A. I do not understand your question.

Q. Where an act of Congress creating a State says that the line is to run from one sea point to another, and to include all islands within three leagues of the shore, are the words "to include all islands" words of limitation or does it not mean to make the act certain that she shall not only have jurisdiction over the water that distance but also over the islands.

A. I cannot so interpret the act. You might have an act of that sort apply to a coast line 500 miles long; there might within that distance be one or two or three islands situated a short distance
1057 from the coast. To interpret such an act in that way would be to mean that Congress undertook to violate the law of nations and stretch a State out through hundreds of miles of country into the ocean, very much further than the law of nations conceded her jurisdiction to extend. As I understand it, the three marine

miles applies not only to an island but it applies to the main land; in other words, the territory of the State extends, under the international law, not only three miles from the main land but it extends three miles from an island because an island is just as much a part of the territory as the main land and that limit extends all around every island. If the limits lap each other, why, then all included waters are within the jurisdiction of the State. If the three mile limit around the islands do not lap, then there is a wide space of territory between which is high sea and not under the jurisdiction of the State.

Q. Then, it is your opinion that where Congres, as it has done in the formation of these States, the Atlantic and Pacific and Gulf States, has undertaken to grant jurisdiction, subject always of course to international right, farther out than three marine miles, she has exceeded her constitutional powers?

A. Yes sir. If the Government of the United States has undertaken, with reference to any State, to extend the jurisdiction and power of that State for more than three marine miles beyond the shore line, either of the main land or of some island, then Congress has exceeded her powers and no sovereign in the world is bound by such excess of powers with reference to the territory in question.

Q. You know that Congress has done that in the formation of nearly all her sea bound States?

A. She may have done it, but in my judgment she had no power to do it.

OFFER.—Mr. DYMOND: Counsel for the State of Louisiana offer, introduce and file in evidence, a certified copy of act No. 26, being senate concurrent resolution adopted by the General Assembly of the State of Louisiana, approved by the governor of the State of Louisiana June 17th 1904, ratifying, approving and confirming the action of W. W. Heard governor of Louisiana in instituting this suit, which said exhibit is to be known as Document No. 99, a certified copy thereof being delivered to counsel for the State of Mississippi.

Adjournment of Proceedings.

At this stage of the proceedings the hearing was adjourned by the commissioner until Thursday September 15th 1904.

Resumption of Proceedings.

1058 NEW ORLEANS, THURSDAY, Sept. 15, 1904.

Pursuant to adjournment the hearing was this day resumed at the same time and place.

Present: Hon. W. W. Bullard, commissioner.
Hon. Walter Guion, att'y general of the State of Louisiana.
Mess. John Dymond, Jr., and F. C. Zacharie, associate counsel for the State of Louisiana.
Hon. Monroe McClurg, associate counsel for the State of Mississippi.

CASIMIR HARVEY, witness sworn and examined on behalf of the State of Louisiana, testified as follows:—

Direct examination.

By Judge GUION:

Q. What is your name?
A. Casimir Harvey.
Q. What is your age?
A. I am 59 years old to day.
Q. Where do you live?
A. At Back Bay, Biloxi, Mississippi.
Q. How long have you been living there?
A. I was born there, that is 59 years ago.
Q. And you have always lived there ever since you were born?
A. Yes sir, except a little while I lived at another place.
Q. Did you ever, at any time, write to the land office in Mississippi, a letter with a view of acquiring from the State of Mississippi land down in what is called the Louisiana marsh?
A. Yes, sir.
Q. About what time was that, how many years ago?
A. Let me see, it was about 1887.
Q. Did you forward the letter?
A. No, sir.
Q. Did you mail it, was it mailed?
A. It must have been mailed because it came back to me, you know. Mr. Seal wrote it for me and he sent it to the land office at Jackson and the clerk or whoever he was he wrote back on it there was no such thing on record there and when Mr. Seal got the letter he sent it to me and I opened the letter and I read it my self and threw it to one side.
Q. What do you mean by, there was no such thing on record?
A. There was no such piece of land as Creole gap there.
Q. Where was this land that you wanted to purchase?

A. What I wanted to get?
Q. Yes?
A. It was around Creole gap.
Q. Land in the neighborhood of Creole gap?
A. Yes, well, the whole of Creole gap I wanted to buy, about half a mile or a mile square there.
Q. Do you mean by that the water or what?
A. I wanted to buy the water and the land, it is all included.
Q. And you got the letter sent back to you?
A. Yes, sir.
Q. That Mr. Seal had written for you?
1059 A. Yes sir, because he knowed the gentleman there.
Q. Now, Mr. Harvey, I understand that the letter that was written by Mr. Seal for you, came back to him?
A. Yes sir.
Q. And he, Mr. Seal, sent it to you?
A. Yes sir.
Q. And was there any letter from the land office in Mississippi with it?
A. No sir. The same letter that went, that was wrote to him.
Q. What came back on the letter?
A. To let me know there was no such thing on record, of the land, of that Creole gap?
Q. Where was that from?
A. That was from the land office.
Q. In Mississippi?
A. Yes sir, Jackson.
Q. Then do I understand that on the letter or the blank part of the letter that Mr. Seal wrote, there was endorsed the statement there was no such land to be got from the State of Mississippi?
A. Yes sir.

Mr. McCLUNG: I think it would be better to let him account for the letter.

Q. Where is that letter?
A. That is what I would like to know myself, where it is.
Q. Did you ever give it up to anybody?
A. No sir; I threw it away; when I went to look for it, it was not in the big box where I threw my letters in, I looked for it the other day and I could not find it.
Q. When did you look for it?
A. Yesterday. I threw about 100 letters or more out of that box, I went through it piece by piece and I could not find it. I had one that the roaches got in and ate every bit of it nearly, all of the letters the roaches had been eating.
Q. You found that the letters you had in that box — eaten by roaches?
A. There was one eaten up, plum- gone, they had been living on the letters in there.

Q. Was this letter in that box?

A. Yes sir, and a good many were all torn up and wet in the there was a leak in the roof of that old store, everything was w and soaked and stained.

Q. Then after you searched through all your papers, you failed find that letter?

A. Yes sir, I tried to find it.

Q. And you were satisfied that you never gave it up to anybod

A. Yes sir. Nobody had any business with it. It was no go to me or anybody else when I found out I couldn't do anythi there.

Q. Will you look at this map that is marked Exhibit A whi was introduced in evidence by the State of Mississippi during t examination of Mr. W. K. M. Dukate and while being cross exa ined, and state whether or not you can point out to us the pla where you wanted to enter this land. This is Creole gap here?

A. This is the place I wanted to get, right there, Creole g

1060 Q. Did you want to get any land in that neighborhood?

A. I wanted to get the land and water so I could use t grounds for oysters as well as get the land.

Q. What land did you want to get?

A. That piece there.

Q. This piece here?

A. Yes sir.

Q. You mean between Grand pass and Creole gap?

A. I mean at the edge where Mr. Leovy was, he came close Creole gap, and I wanted from his line to the west, I wanted hal mile or a mile there and I couldn't get it.

Q. Of land?

A. Yes sir, and we did get it afterwards anyhow.

Q. In examining Creole gap on this map before you, do you fi that the Creole gap you referred to is the same Creole gap that vides Isle à Pitre?

A. Yes sir.

Q. Then the piece of property you wanted to get was between t land that Mr. Leovy owned to the west of Creole gap and all east his property as far as Creole gap?

A. Yes sir, that is what I wanted, from his property going to t westward.

Q. When you couldn't get that property from the State of Mis sippi, what did you do?

A. I came to New Orleans, when I found out that Mr. Leovy own this here.

Q. Owned what?

A. The point here.

Q. Point of what?

A. Of Isle à Pitre. I came here to see him for him to tell me h he got it and he told me he got it through the land office at Bat Rouge in Louisiana; then I went and saw Mr. Gilmore and we s

them blanks or application and filled them out and he got that piece there first, that was the first piece we got.

Q. Where was the first piece you got, near Creole gap?

A. We got Creole gap, we got what he owns now, Creole gap on the map.

Q. Mr. J. C. Gilmore?

A. Yes sir.

Q. Do you own any part of this Isle à Pitre?

A. No sir, he bought that, that was for us.

Q. Who do you mean by us?

A. Me and Mulholland and J. C. Gilmore, he was the head man about it, he did the buying and we furnished the money with him and so he bought that there and bought a whole lot more for himself.

Q. Where else did he buy?

A. All along in there, I don't know, he bought this place near this big bay here.

Q. Do you mean near Jack Williams bay?

A. Yes sir, and we made a swap for that piece here for our interest in there.

Q. Interest in what?

A. In this.

Q. For the interest in this piece down near Jack Williams bay?

A. Yes sir.

Q. Where do you own now, you and Mr. Mulholland?

A. This here.

1061 Q. When you speak of this here pointing at the map as you do what place do you mean. You have to tell us what it is because the Supreme Court does not see you pointing here with your finger.

(Witness being asked to point on the map before him the place which he now owns with Mr. Mulholland states that the property that he now owns is shown on a sketch which shows that the property is in township 11, south range 20, east, being the southeast quarter of section 29, the west half of the southwest quarter of section 28, the east half of section 32 and the west half of the northwest quarter of section 33 and the north half of the northeast quarter of section 5 township 12, south range 20 east.)

Q. You say that the property that you then got from Mr. Gilmore is shown on this map before you as being near Jack Williams bay?

A. Yes sir, the Southeast bay they call it, that is, of course I can't say nothing more than what it looks like on that map, it looks like it by the map here.

Q. Did you apply to the State of Mississippi to get this property?

A. No sir.

Q. The property that you applied for to the State of Mississippi was near Creole gap?

A. Yes sir.

Q. Is that correct?

A. Yes sir. If I am not mistaken that is what I applied for. I know I applied for that there, I don't know if I mentioned Creole gap, or not, because it is so long ago I couldn't exactly say that I mentioned Creole gap but I wanted to see if I could enter the piece of land——

Q. Did you describe it at all in your application or in the letter that was written for your account?

A. I don't know if I stated Creole gap or not, at least, I told the man to write up there to see if I could enter a piece of land over there.

Q. Over there?

A. Over at Isle à Pitre, you know, and they wrote back to him there was no such record there, but I believe, I am not sure, I said I wanted to enter Creole gap, I believe I told Mr. Seal to tell him so, to write that to him.

Q. Did you read the letter that came back from the land office that had been written by Mr. Seal?

A. Yes sir.

Q. When it came back did you read it?

A. Yes sir and it said——

Q. No, I am speaking of the letter that was written for you by Mr. Seal, did you read that?

A. No, the letter came back to Mr. Seal and he sent it to me.

Q. When you got it did you read it?

A. Yes sir.

Q. Did you see what Mr. Seal had written?

A. It said there was——

Q. No, what Mr. Seal wrote.

1062 A. I don't remember what he put in it.

Q. Do you remember whether he wrote to the land office in Mississippi?

A. He said he did.

Q. Well, the letter that you had, that he sent you, was that the letter from Mr. Seal?

A. The same letter that he sent was sent back to him.

Q. I understand you. You have gotten confused. Mr. Seal, as I understand, wrote a letter for you?

A. Yes sir.

Q. Is that correct?

A. Yes sir.

Q. To whom was that letter written?

A. To the clerk there at the office at Jackson.

Q. What office?

A. To the clerk's office, I suppose, there.

Q. Do you remember whom it was written to?

A. No sir, I don't know the man's name; he said it was a friend of his.

. At the land office?
. Yes sir, at the land office.
. Well, now, that letter that Mr. Seal wrote, it came afterwards your possession?
. It came to him first and he sent it to me.
. It came back to you from him?
. From Mr. Seal.
. When Mr. Seal sent it to you what was on it besides——
. I don't remember exactly. That is all I noticed, it said there nothing on record there.
. Who had written that upon it?
. I don't know; it must have been the land office I suppose, I t know.
. You don't know whose writing it was?
. No sir.
. Do you know the name that was written on it, the signature?
. No sir; I couldn't tell you that. That is too long ago for me to remember.
Q. Do you remember how he described himself, the man who wrote this on the letter to Mr. Seal, what he claimed to

. I don't know what he was there, I couldn't tell you.
Whom did you understand the letter was from?
. From the land office up there.
You understood that at the time?
. I told Mr. Seal to write up there and he said he had a friend would find out so when the letter came that is all I saw about here was nothing there on record.
Did you read that letter that Mr. Seal wrote to see what he d in his letter. When your letter came back did you read it?
I believe I did.
Well, what did Mr. Seal ask for in his letter?
I believe he asked if there was any land there of that descrip- for sale over there and he said no there was nothing there to t the land office.
You understood, did you, at the time, who it was from?
I understood there was no such land there to sell, to be got, on d.
Did you understand who was writing that letter?
No, I couldn't tell who was writing that letter, I couldn't tell nan's name.
All that you understand is, it was from the land office in Mis- ppi?
Yes sir.
And that letter you have not been able to find?
No sir, and I could not say exactly all what was on there either use it is impossible to say that in that long time, for a person to emember.

Q. How did you happen to look for this letter; were you asked to do it. Here lately have you been asked to look for this letter?

A. Yes sir; this gentleman asked me if I had the letter.

Q. Which gentleman, Mr. Zacharie?

A. Yes sir.

Q. Did he see you in Biloxi?

A. Yes sir; he asked me if I had the letter and I told him I thought it was mighty strange how he knew I had got a letter, it didn't matter much but he asked me if I had got a letter from the land office up there and I told him yes, I had gotten one but I didn't have it now.

Q. How long ago was it he asked you?

A. Three or four days ago.

Q. Were you asked by him to look for this letter?

A. Yes sir.

Q. You did so because he asked you?

A. No, but I thought I would look for it myself.

Q. Were you notified you were expected to be a witness here?

A. Yes sir, he told me.

Q. Colonel Zacharie you mean by he?

A. Yes sir, that gentleman over there.

Q. You were told you were expected to be a witness in this case, is that right?

A. He didn't say I was going to be a witness in this case; he didn't tell me I was going to be a witness.

1064 Q. Did he tell you what he wanted to prove by that letter?

A. I don't hardly know what he told me.

Q. What reason did you have for looking for the letter. Why did you look for it?

A. To see if I could find it.

Q. What did you want to find it for; what did you want to do with it after you found it?

A. I remember now, he told me if I could find that letter may be it would save my property that I got in the marsh, this here, the piece of land I own out there.

Q. Did you make a diligent search for the letter?

A. I did look for it.

Q. Did you look for it carefully?

A. Yes sir; I examined all the papers where I thought the letter was. I examined everything around there, but it is too long ago to be hunting a letter that way, you know.

Q. And when you looked for it you had been told by Colonel Zacharie that you were expected to be a witness in this case?

A. I don't know if he told me or if you wrote to me or not.

By Mr. ZACHARIE:

Q. I told you so and wrote to you also.

A. I don't know whether you told me; I know you wrote to me I would be summoned.

Q. Mr. Harvey, do you remember if you asked me the question how the decision of this suit would affect your title to the land in the Louisiana marshes?

A. Yes sir, I believe I asked you that in case Mississippi takes that boundary, you know.

Q. Didn't I answer you that of course if this land was granted—was decided in this suit as belonging to Mississippi that your Louisiana patent would not do you any good?

A. Yes sir.

Q. Isn't that the substance of our conversation?

A. Yes sir.

Q. Didn't you bring that out yourself by asking me what effect it would have on your title?

A. Yes sir; if a man would lose his property that he bought from Louisiana; that is what I meant; they said the line was going to run through, right straight across.

Q. Did I or did I not make any voluntary statement to you to induce you to testify; didn't this come from you asking me the question as to what effect the decision of this suit would have on your Louisiana patent?

A. You told me it would be good if Mississippi didn't win it.

Q. That was at your request, a reply to your question was it not?

A. Yes sir.

By Judge GUION:

Q. Why was it that when you wanted to get this piece of property in Isle à Pitre that you called Creole gap, that you got Mr. Seal to write to the State of Mississippi, to the land office there?

A. I asked him if he knew anybody up there, I believe, if I am not mistaken, and he told me yes he knew somebody up there and I told him to write to see if there was any land to buy about
1065 there at Isle à Pitre or Creole gap I forget exactly, if I could buy any land over there, and that is the way it came, he wrote back there was no such record of that land over there.

Q. I understand, but that is not my question. Why did you make application to the State of Mississippi for this land instead of Louisiana?

A. I didn't know any better, I didn't know who was claiming it, I don't know who is claiming it now even.

Q. Had you ever heard of this territory down there called the Louisiana marsh?

A. Yes sir, I always did hear it called the Louisiana marsh.

Q. You always heard it called by the name of the Louisiana marsh?

A. Yes sir, I always heard it called the Louisiana marsh and nothing else.

Q. Did you hear it called by the name of the Grand marsh?

A. I suppose I heard that name too many a time but I don't remember of hearing people calling it the Grand marsh.

Q. You had always heard it called the Louisiana marsh?
A. Yes sir, but I heard some people call it Grand marsh.
Q. Where was this Louisiana marsh, where did it begin as you understood it?
A. I always thought south of Cat island was all Louisiana marsh.
Q. That is the way you understood it?
A. It seems to me.
Q. And to the west of Cat island, how did you understand that?
A. I understood that was towards Mississippi, I always heard so.
Q. To the west, not to the east?
A. I always heard that the channel divided the lines.
Q. You always heard that what channel divided the lines?
A. Cat Island channel.
Q. You always heard that channel——
A. Divided the lines.
Q. What channel do you speak of?
A. Cat Island channel.
Q. Where is that, between Cat island and what?
A. Between Cat island and Isle à Pitre.
Q. You always heard that spoken of as the line between what?
A. Between Louisiana and Mississippi.
Q. Going to what place?
A. Going out and coming in.
Q. Going as far west as what?
A. As Pearl river.
Q. Having understood that the channel between Cat island and Isle à Pitre was the dividing line between Louisiana and Mississippi, why did you apply to Mississippi for this piece of property?
A. Because I didn't know any better at the time.

By Mr. ZACHARIE:

Q. Will you examine this map of Mississippi, Exhibit A. What is this territory called, from Isle à Pitre running to the westward as far as Malheureux point? All this territory shown there running to the west. What has that been called. Here is the Mississippi shore up here. Now, this is south down here, what is that called?
A. I can't tell you except the Louisiana marsh.
1066 Q. That is exactly what I want to get at.
A. Louisiana marsh, but when I applied for this I didn't know any better.

By Judge GUION:

Q. Did I understand you to say just now that you had heard people say it was in Mississippi, Isle à Pitre?
A. Some of them, they say until now it belongs to Mississippi.
Q. You didn't know who it belonged to?
A. No sir, I didn't know anything about it. I know that Mr. Gilmore got it at the land office at Baton Rouge. I know he got that there, that didn't seem like it was in Mississippi.

Q. Why did you apply to Mr. Leovy when you came over to New Orleans what was your object in seeing him?
A. To find out how it could be got.
Q. To find out how you could get the land?
A. Yes sir. That was the only one I ever did find out from, because I didn't know how to go to work it out, and he showed me and told me all about it and I went to see Mr. Gilmore.
Q. Mr. Joseph Gilmore?
A. Yes sir, that was the only way because I didn't know.

Cross-examination.

By Mr. McCLURG:

Q. Was anybody interested with you, Mr. Harvey, in desiring to purchase Creole gap?
A. All three of us, me and my son in law and Mr. Gilmore.
Q. Mr. Joe Gilmore?
A. Yes sir.
Q. And did you all talk about applying to Mississippi for it before you did do it?
A. No sir; nobody knew anything about it but me; I was the one that happened to be at the courthouse one day and I asked Mr. Seal to write for me, that was the only way.
Q. That was Mr. Florian Seal?
A. Yes sir.
Q. What office did he hold then?
A. Sheriff, like he is holding sheriff's office now. I don't suppose that he knows about it any more.
Q. When was that?
A. That was in 1887. He don't know anything about it any more.
Q. How much did you pay the State of Louisiana for that land?
A. I paid a bit an acre. I didn't buy it from the State of Louisiana.
Q. Whom did you buy it from?
A. I got it from Mr. Gilmore.
Q. Creole gap?
A. He bought that, but we were together in that and then he bought some more land up in there and he bought this, bought what we were looking at, and we made a swap of our share and what stock we had in Creole gap we gave to him for this part.
Q. What did Creole gap cost him, a bit an an acre?
A. Yes sir, all of it, a bit an acre.
Q. How much of the Creole gap was water and how much land?
A. I believe there was 80 acres.
1067 Q. How much of it was land and how much water?
A. We bought all the overflowed land.
Q. Didn't you get as much water as land?
A. Overflowed land, overflowed marsh.

Q. Did you get the pass, the water through the gap?
A. Well, there was nothing much of a pass through there.
Q. Does it go through the land you bought?
A. Yes sir, the water goes through.
Q. Through the land you bought?
A. Yes sir.
Q. You bought on both sides?
A. Yes sir.
Q. You wanted it for oyster purposes?
A. Yes sir.
Q. You never cultivated any of that land, did you?
A. We put—how many barrels we put in there?
Q. I mean this, you never planted any crops of any kind?
A. We planted oysters in there.
Q. I am talking about on the land; did you ever plant any cane cotton, corn, vegetables?
A. No sir; I never planted much of that.
Q. On this land did you plant anything there but oysters?
A. No sir; that is all we are working for now, oysters.
Q. You say Mr. Seal told you he had a friend up at Jackson h would write to?
A. At that time, yes sir, he had a friend that he wrote that to.
Q. And he wrote to his friend?
A. Yes sir.
Q. Did he tell his friend to inquire at the land office?
A. I believe that is what he wrote if I am not mistaken.
Q. He wrote to his friend then at Jackson to go and inquire at th land office?
A. I don't know, but I know it was at the land office anyhow, bu I don't know who he was, I don't know anything about that.
Q. Here is what I want to know, did he write to the land offic direct or did he write to his friend up there to go to the land office
A. May be it was to his friend, I don't know, that is it, I don't kno anything about that you see, he said he had a friend up there, I don' know whether he meant in the office or not, you see, I couldn't tell
Q. You had an idea, you and your son in law, at that time, tha that land was in Mississippi, did you not?
A. No, not after I found out it was not. How can a man tell o what line I have got a piece of land now, just the same thing, a ma can't tell nothing, on which line, you see what Mississippi is claim ing now. Well if she claims that Louisiana don't own Isle à Pitre you see you can't tell on which line it is now.
Q. You thought it was in Mississippi?
A. I thought it was in Mississippi when I got him to write; bu when I found it was not in Mississippi then I came to New Orlean and saw Mr. Leovy, you see, and I saw his papers, he showed me al his papers and he wanted to sell it and I told him no, I wanted t buy a piece next to you and I saw on his map that he did not com quite to Creole gap and we bought from Creole gap——

Q. From Creole gap west?

1068 A. From the east side of Creole gap over west, 80 acres.

Q. You say you have heard that marsh territory down there called Grand marsh?

A. I heard it called Grand marsh and I heard it called Louisiana marsh.

Q. You heard it called the marsh too, have you not?

A. I always thought that the Grand marsh was on the west side of the Mississippi river.

Q. You stated a while ago that you always considered that the Cat Island channel was the line between the two States?

A. That is what they said.

Q. You did not think that when you applied to Mississippi for that land?

A. No, you see I had not studied about that; furthermore they say that the Louisiana line now runs and takes that Nigger point, takes a part of that, that is what I hear, I don't know anything about it.

Q. Are you interested in any land about Nigger point?

A. No sir.

Q. Your land is over there by Jack Williams bay?

A. Yes sir, Southeast bay I believe they call it.

Q. South of Grand pass?

A. Yes sir, about five miles.

Q. How far is it from Creole gap to Bay St. Louis?

A. You have got me now. Creole gap to Bay St. Louis, it ought to be fully 20 miles, in that neighborhood.

Q. Did you ever hear, Mr. Harvey, that Mississippi claimed 18 miles from her shore?

A. That is what I hear now.

Q. Did you ever hear it before this suit started?

A. No sir.

Q. You never heard that?

A. No sir; I never heard it.

Q. Did you ever hear anything of any armed conflict between the officers of Saint Bernard parish and the officers of Harrison county over the State line?

A. No sir, not that I know of.

Q. What is your occupation?

A. I am a ship builder by trade.

Q. Have you ever fished oysters any?

A. I fished oysters a little, I fish very little oysters.

Q. When were you last at Isle à Pitre, Creole gap, Grand pass and Jack Williams bay?

A. The last time I was about Creole gap I went through there, that is about ten years ago, after I took my schooner off the island, she was ashore and I went there for her and I went through Creole gap.

Q. Did you ever go through Grand pass?

A. Yes sir.
Q. How long ago?
A. A good many years ago, about 15 years ago.
Q. Were you ever at Nine Mile bayou?
A. No sir.
Q. Were you ever at Three Mile bayou?
A. No sir, I never was there at all and I have been running here for 40 years, to New Orleans, and I never went to those places after you come out of the Rigolets to the southward, I never went in there.
Q. When was it you say you saw Colonel Zacharie; when did you see this gentleman here?
1069 A. Three or four days ago, it was last Saturday.
Q. You inquired about the condition of your title then?
A. I wanted to, talk to him but he was in such a hurry he would not stay there to talk.
Q. He talked enough to you to let you know if Mississippi won your title was not good?
A. I thought may be Louisiana must stand good for what she sold, you know. You asked me what I bought this place for. Well, I bought there for the same purpose they are claiming those 18 miles for don't you see. I bought that for oysters, that is just what they are claiming too, those 18 miles too for oysters.
Q. The oysters are at the bottom of the business?
A. Yes sir, that is just what is the matter.
Q. That is all that territory in there is fit for?
A. That is all, nothing else; you can't raise cabbages very well, you can't raise anything except oysters, that is what it is for, they are going in pretty heavy for it too.
Q. Well, are you familiar enough with it to say whether the oysters in that territory are better than they are in other portions of the sound?
A. They are better. I have seen mighty fine oysters come out of there, of course that is all the best grounds.
Q. You mean in the marsh?
A. Yes sir, all the best ground.
Q. Best oyster grounds you mean?
A. Yes sir; you see they know exactly where to make those lines run.
Q. What is your son-in-law's name?
A. Mullholland.

Redirect examination.

By Judge GUION:

Q. You said a while ago, if I mistake not, that you had always heard that the line between Louisiana and Mississippi was the deep water channel between Cat island and Isle à Pitre; is that true?
A. Yes sir.

Q. Whom did you hear that from?

A. By people just like me that didn't know anything more about the law, about the lines, than what I did, they just thought so.

Q. Did you hear that lately?

A. I heard that a long time ago.

Q. Did you hear it when you were a child?

A. Yes sir, I heard the navigators say so.

Q. Those navigators young or old men?

A. Some were young and some were old.

By Mr. DYMOND:

Q. You sa[illegible] a moment ago that when you applied for the land around Creole gap, that you did so because you did not know any better and at that time thought that the land was in Mississippi. Why was it, you thought it was in Mississippi?

A. Well, I thought that was in Mississippi like I told you once before.

1070 Q. Do you know of any reason for thinking so?

A. No, I only though- that Isle à Pitre was in Mississippi, I didn't know, I didn't have any idea that it was owned by anybody at all, I didn't know it.

Q. Had you heard, before that, that the channel was the dividing line?

A. I heard all my life that was the division line, that channel, but I didn't know that that division line threw this Isle à Pitre in Louisiana, you know, I didn't know that.

Q. Did you think about that when you wrote to Jackson about getting the land?

A. No sir; I did not.

Q. Did you think about it afterwards when you found out you could not get the land?

A. Yes sir, when I found out I couldn't get it.

Recross-examination.

By Mr. MCCLURG:

Q. You knew Creole gap was south of Cat Island channel?

A. Yes sir.

Q. You knew that at the time you applied to Mississippi to buy it?

A. Yes sir.

Q. And you knew that at that time that it was in the State of Mississippi?

A. Well at first I thought may be it was in there and applied there first before applying over on this side.

Q. Notwithstanding those facts you say that you always heard that was the dividing line, the channel?

A. Yes sir, but I didn't know that threw in that ground or marsh either one side or the other to any man or State. I thought that

Government busines there you know, I thought that was Gover ment survey, the main channel, I didn't know this Isle à Pitre l longed to Mississippi or Louisiana, I didn't know it then at t time.

Q. You mean the Government line?

A. Yes sir.

Q. The deep water channel sailing line?

A. Yes sir.

Q. You mean by the Government line that it was for ships an vessels of heavy draft?

A. Yes sir, the main channel, that was the division line, yo know, that is the line what I mean.

Q. You know how long it has been buoyed, that that line h been buoyed?

A. No sir, I couldn't tell you.

Redirect examination by Mr. DYMOND:

Q. Will you please look at this survey which, for purposes identification will be marked Document No. 100, and state wheth it is a sketch of the survey of your lands concerning which yo have been testifying and which are located near Jack Willia bay?

1071 A. Yes sir, you can have this.

Q. You don't understand my question. Read the questi back to the witness.

(Question read)

A. It seems like it. It is off the map from the customhouse he

Q. Have you been on your land?

A. Not very much.

Q. Does this look like it from what you saw?

A. I never have been in there, never have been inside there.

Q. Was this given to you as a plan or sketch of your land?

A. Yes sir.

Q. You always recognized it as such?

A. I never saw the land down there.

By Judge GUION:

Q. Compare this sketch with the map Exhibit A of Mississip that is before your eyes and see if it corresponds with the map E hibit A down here in the territory that you claim as your property

A. There are no lines on here like on here.

Q. No lines on what?

A. No section lines or nothing.

Q. On map Exhibit A?

A. Yes sir.

By Mr. DYMOND:

Q. You notice this long peninsular. Do you find the same on this map Exhibit A?
A. It looks like it, don't it.
Q. We are asking you, you are not asking us. Do you notice this body of water that runs like a snake down into that land?
A. Yes sir.
Q. Have you such a body of water on your map?
A. Yes sir, that is right there. You see it is not all here, you can't see, there is more land there.

By Judge GUION:

Q. Who gave you this paper?
A. I think Mr. Gilmore or Mr. Duke.
Q. Did Mr. Duke go down there and make a survey for you?
A. I don't know if he did, I think he did.

JOSEPH C. GILMORE, witness, recalled on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. DYMOND:

Q. Did you transfer to Mr. Casimir Harvey certain lands located in the neighborhood of Jack Williams bay which you had acquired from the State of Louisiana?
A. Yes sir.

1072 By Judge GUION:

Q. Was it to Mr. Casimir Harvey alone?
A. No sir, it was to him and his son-in-law.
Q. Jeff Mulholland?
A. Yes sir.
Q. Will you please look at these patents which are the originals of which copies are in evidence, marked Documents Nos. 82 and 83, and state whether you recognize them as the patents that were issued to you.
A. Yes sir.
Q. Will you now look at this sketch of survey marked Document No. 100 and state who Mr. W. D. Duke was.
A. He was a surveyor, he had been a surveyor for the parish of Saint Bernard.
Q. Did you cause those lands which were transferred by you to Mr. Casimir Harvey and Mr. Jeff Mulholland, to be surveyed by Mr. Duke?
A. Mr. Duke was out there and went over the land here on this coast and verified the surveys on maps which I have previously offered here, of Mr. Richardson.

Q. What has become of Mr. W. D. Duke?
A. He is dead. He has been dead a good many years.
Q. What was Mr. Duke's profession?
A. He was a surveyor, a civil engineer.
Q. And he was a surveyor for the parish of Saint Bernard?
A. Yes sir.
Q. Was he a United States surveyor?
A. He had been a surveyor for the parish of St. Bernard.
Q. Was he also a deputy United States surveyor?
A. I think so; he so represented himself.

OFFER.—Mr. DYMOND: In connection with the testimony of witness and that of Mr. Casimir Harvey, counsel for the State Louisiana now offer, introduce and file in evidence, said Docum No. 100 a copy thereof to be furnished to counsel for the State Mississippi.

Q. You purchased, as shown by the records, a great deal of pr erty from the State of Louisiana which is located in this area in pute at present between the States of Louisiana and Mississi As you acquired title or patent from the State of Louisiana, did y or not, cause your patents to be recorded in the conveyance of of the parish of Saint Bernard of the State of Louisiana?
A. We did, yes sir.
Q. Did you record all of them?
A. I think every one of the patents on this area here.

ADMISSION.—It is admitted by counsel for the State of Mississi that the endorsement upon patent No. 751 being the original which Document No. 83 is a copy and which original belongs and is in the possession of Mr. Casimir Harvey and Jeff D. Mull land, is in the handwriting of Charles M. Gardanne the d
1073 uty clerk and *ex-officio* recorder in this State of the parish Saint Bernard; and that said certificate is in the followi words "State of Louisiana, parish of St. Bernard, clerk's offi October 18th 1888. I do hereby certify that the within patent w this day duly recorded in my office in Book of Conveyances No. folio 196. Signed Charles M. Gardanne, deputy clerk and *ex-offi* recorder."

It is also admitted by counsel for the State of Mississippi that t certificate signed J. R. Ducros, deputy clerk and *ex-officio* rec ord upon original patent No. 750 of which a copy has al- ady be offered in evidence by the State of Louisiana and marked Doc ment No. 82 is in the handwriting of J. R. Ducros, deputy clerk a *ex-officio* recorder of the parish of St. Bernard and is in the followi language to-wit: State of Louisiana, parish of St. Bernard, cler office, October 15th 1888. I do hereby certify that the with patent No. 750 was this day recorded in my office in Book of Co veyances No. 17, folio 194. Signed J. R. Ducros deputy clerk a *ex-officio* recorder.

Q. Now, Mr. Gilmore, you transferred these two patents Nos. 750 and 751 to whom?

A. To Jeff D. Mulholland and Casimir Harvey. This is my handwriting on the back.

Q. Look at this one too, No. 751?

A. To Jeff D. Mulholland and Casimir Harvey.

Q. Then I understand, do I, that you transferred all of your right title and interest in the property described in these two patents Nos. 750 and 751 to Jeff D. Mulholland and Casimir Harvey?

A. Yes sir; the title was in my name and I turned it over to them.

Cross-examination.

By Mr. McCLURG:

Q. That is the property near Jack Williams bay?

A. Yes sir.

ADMISSION.—It is admitted by counsel for the State of Mississippi that patent No. 750 of which a copy has been already offered in evidence by the State of Louisiana, bears the following endorsement which is in the handwriting of J. C. Gilmore in whose favor the patent was issued, to-wit: "New Orleans, November 10th 1890. I hereby assign and set over to Jeff D. Mulholland and Casimir Harvey all my right, title and interest in and to the within patent and the property therein described and conveyed without warranty or recourse against me. Signed J. C. Gilmore, dated November 10th 1890."

It is also admitted by counsel for the State of Mississippi
1074 that patent No. 751, copy of which has been already offered in evidence by the State of Louisiana bears the following endorsement which is in the handwriting of J. C. Gilmore in whose favor the patent was issued, to-wit: "New Orleans November 10th 1890. I hereby assign and set over to Jeff D. Mulholland and Casimir Harvey all my right, title and interest in and to the within patent and the property therein described and conveyed without warranty or recourse against me. Signed J. C. Gilmore, November 10th 1890."

Mr. DYMOND: Counsel for the State of Louisiana, having procured official copies of the report of John Wheeler surveyor to A. G. McNutt governor of the State of Mississippi, December 13th 1839, being a survey of the coast of the State of Mississippi, with accompanying map, the whole thing being Senate Official Document of the First Session of the 26th Congress, page 163, printed by the United States Government, is, by consent of counsel for Mississippi substituted in lieu of Document No. 73 already offered.

OFFER.—Mr. DYMOND: Counsel for the State of Louisiana now offer, produce and file in evidence a certified copy of warrant No. 5696, swamp and overflowed lands, in favor of Ann B. Gordon, dated

April 28th 1859, and a certified copy of land warrant No. 7785 in favor of Henry Florence, dated November 22nd 1859, to be respectively known as Documents 101 and 102, copies thereof being tendered to counsel for the State of Mississippi.

Adjournment of Proceedings.

At this stage of the proceedings the hearing was adjourned by the commissioner, to be resumed September 16th 1904, at the same time and place.

Resumption of Proceedings.

NEW ORLEANS, September 16th, 1904.

Pursuant to adjournment the hearing was this day resumed at the same time and place.

Present: Hon. W. D. Bullard, commissioner.
Hon. Walter Guion att'y general of the State of Louisiana.
Mess. John Dymond Jr. and F. C. Zacharie associate counsel for the State of Louisiana.
Hon. Monroe McClurg, associate counsel for the State of Mississippi.

1075 Miss MARIE SEEBOLD, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. DYMOND:

Q. Miss Seebold, will you please look at this Hardee's official map of the State of Mississippi, approved under act of the legislature by Benjamin G. Humphreys governor, and state whether you were requested to color certain photographs which had been made from that part of this official Hardee's map which represented the area in dispute in this suit?

A. I was.

Q. Will you please look at this colored photograph which, for purposes of identification, is called map No. 65, and state whether that is the photograph that you have colored?

A. It is.

Q. Will you please compare the coloring on the original map with the coloring of the photograph and state by whom that coloring was made?

A. It was made by me.

Q. How does the coloring of the photograph compare with the coloring of the original?

A. It is exactly like it.

Q. Was that work done carefully by you?

A. Yes sir.

Q. And the colors reproduced represent the original colors on the original official map now before you?
A. Yes sir.

OFFER.—Mr. DYMOND: In connection with the testimony of the witness, counsel for the State of Louisiana now offer, produce and file in evidence, the photograph of the disputed area as extracted from the official map of Hardee of the State of Mississippi approved by Benjamin G. Humphreys governor of Mississippi, dated A. D. 1868, said map to be known as No. 65 a copy of which is tendered to counsel for the State of Mississippi.

No cross-examination.

LOUIS CUCULLU, witness sworn and examined on behalf of the State of Louisiana, testified as follows:

Direct examination.

By Mr. ZACHARIE:

Q. How old are you?
A. I am 65.
Q. Where do you reside?
1076 A. I am residing now in New Orleans.
Q. How long have you resided in New Orleans?
A. All my life.
Q. What official positions have you held during your life?
A. Well, I have held that of a councilman.
Q. Of the city counsel of New Orleans?
A. Yes sir.
Q. Are you connected with any bank here?
A. Yes sir.
Q. What bank and in what capacity?
A. I am president of the Peoples bank.
Q. Have you been in the habit of visiting the southern coast of Mississippi?
A. Yes sir.
Q. For how long?
A. From my infancy.
Q. Do you know the territory which lies south of the southern shore of Mississippi?
A. Yes sir.
Q. This broken portion particularly as appears on map No. 65 offered by Louisiana, what is that territory known as, amongst the people residing along the coast of Mississippi?
A. I always heard this part spoken of as the Louisiana shore, Louisiana marshes.
Q. Have you heard it called by any other name?
A. No sir.

Q. How often have you visited this Mississippi shore?

A. Well we used to go and spend every summer there, before the war.

Q. And after the war?

A. I have been several times on the coast since.

Q. And you never have heard it called by any other name than the Louisiana shore or the Louisiana marsh?

A. No sir.

Cross-examination.

By Mr. McCLURG:

Q. You have always heard that sound immediately south of the Mississippi shore called the Mississippi sound, have you not?

A. Must I give a full explanation of what I knew or heard from my youth, about it; or must I answer yes or no?

Q. Just answer yes or no?

A. I will simply state this, at the time that this Mobile line of steamers used to run, before the establishment of the Louisville and Nashville railroad, I always heard from my infancy up I may say until I left for the war, that what they called the sound was from, between the main land and the line of islands that existed, up to Mobile bay.

Q. Which line of islands do you have reference to?

A. You have Cat island, you have Ship island, you have Dauphin island and Horn island and all those islands.

Q. And your understanding has been that the sound extended between the shore and those islands?

A. Always did.

Q. And never beyond the islands?

1077 A. Never did.

Q. You notice from Cat island to the mouth of Pearl river there are some other islands and some of the Mississippi sound; where do you consider the southern boundary of the sound from Cat island to the mouth of Pearl river?

A. As far as my recollection of it and as far as my knowledge goes, I must tell you I am a sport, I am a great fisherman and a hunter, and I have always gone over the old railroad before the war, the old Mexican Gulf road that used to go to Proctorville, and I have hunted and fished on all that coast and I always considered and everybody else, that we were in Louisiana.

Q. You mean everybody else in Louisiana?

A. Always did. That is something like 45 years ago.

Q. The reason I make that modification is that some old fellows about your age, that lived in Mississippi always considered it Mississippi soil, so it depends largely on where you lived how you considered it?

A. Well, at Pass Christian where we were one of the first that went over there to establish ourselves a summer residence, my fam-

ily, we always considered this part to be Louisiana, because from our plantation, we lived in Louisiana at that time, there were no vessels, we took schooners and went through the Rigolets and went over to Mississippi, that was how we travelled at that time when I was a boy, and as far as I can recollect and as I have heard all the old people say, I have known all those people, the old Sauciers, in Pass Christian, they are still there, they are Mississippians, I always heard them talk about the Mississippi side and the Louisiana side, and they considered the outside part of these islands as the Louisiana side because when they wanted to go fishing or hunting, and I was of an age that I can recollect that, I have gone with them in their boats, they crossed over to the Louisiana side.

Q. When you struck the marsh you considered you had struck the Louisiana line?

A. Yes sir. Of course I don't know all the treaties etc., what they specified, but that is the impression that I have always been under.

Q. Do you mean to say that was the impression that was gathered from any study of the line fixed by law?

A. No sir, only by hearsay and what was considered generally.

Q. That the Mississippi line ran down to the marshes and stopped there and Louisiana began?

A. At the time I recollect the Mississippi sound, that is what they called it, Mississippi sound, in line with Cat island and all those islands.

Q. What did they call that between Point Clear or we will say Half Moon island and Malheureux point; what was that down there?

A. I suppose it was, as far as I can recollect it was always considered as crossing the Gulf and I suppose from those islands to the Louisiana marshes it was considered, that part of the water, as the Gulf, outside of Pass Marianne.

Q. Don't you think it is true that the people of Louisiana and Mississippi never considered themselves in the Gulf until they passed around Chandeleur, around east of Chandeleur, before they got into the Gulf proper; in other words, Chandeleur sound, Cat Island pass, Ship Island pass, and all those places, they were not considered the Gulf were they?

A. Well, of course we did not go that far, but I always understood we had to cross the waters, the Gulf, to go to the Louisiana side and I considered, from my knowledge of it, that the mo-
1078 ment we left the sound we had to cross the Gulf before we reached that part of Louisiana, that is what I always considered.

Q. So, then, you think that the northern shore of Cat island is the southern boundary of the Mississippi sound?

A. That is how I always considered it to be.

Q. Now, going west from that then, into Lake Borgne, and to the mouth of Pearl river, you had to cross a part of the Gulf?

A. That is what we considered at that time. You know I could-'t tell whether it was the Gulf or not.

Q. Do you think there was any part of the gulf of Mexico proper between Bay St. Louis and Isle à Pitre, Grand pass, Three Mile bayou or Nine Mile bayou?

A. Well, that I couldn't answer with certainty.

Q. Has it not been universally regarded that the Gulf was to the east and southeast of the Chandeleurs and that between the Chandeleurs and Louisiana was the Chandeleur sound?

A. It may have been by mariners, but us, that had absolutely no object in learning exactly the thing, I couldn't answer you precisely on that point.

Q. Do you know such a thing as the Chandeleur sound?

A. No; whenever we went to the Chandeleurs, we simply said we were going to the Chandeleur islands.

Q. You don't know where Chandeleur sound is?

A. I never looked so close to that, never studied that geographically.

Q. Did you ever hear of it?

A. No sir.

Q. Did you ever hear of Cat Island pass?

A. Is that what you mean by Pass Marianne, I think——

Q. No, Pass Marianne is north of Cat island, as I understand it. Cat Island pass, as I understand it, is between Cat island and Isle à Pitre, Pass Marianne is north and northeast of Cat island?

A. That line of islands, and that Pass Marianne where the steamers used to go through to Mobile in low tide, at that time was considered so I always heard, as the line between the two States, whoever went on one side or the other was either in Mississippi or Louisiana.

Q. There have been some maps introduced in this case that showed that the sailing line or line of steamers from New Orleans to Mobile went north of Cat island and Ship island and of this line islands you speak of; that was one route. And another route was to go down through Cat Island pass to the northeast of Chandeleur islands and around to Mobile. Which of those lines have you reference to?

A. I understand exactly, I know very well all that line from Mobile; I have been so often all through that country, I understand exactly. I saw one map but I don't know that it could be found in this city. It was made for the use of the Mobile and New Orleans line of steamers. It used to be in the office of Mr. R. Heddes who was the agent of that line.

Q. When was that?

A. That was before the war; I saw that myself in the office because I used to go, very often there, nearly every day. But that is an old map and possibly that cannot be found. That is the only map I ever saw drawn where the line of steamers, their route was put exactly as you have got them across the Atlantic or Pacific.

Q. And that was between Cat island, and Ship island and the Mississippi sound?

1079 A. It was right along that whole line.

Q. And that is the line that you always considered was the dividing line between the two States?

A. That is always what I understood it to be.

Q. Have you any idea how much sea frontage that line, if it is the boundary line between the two States, would leave to the State of Mississippi?

A. From my recollection, I knew Mr. Quavers who used to be for years and years the keeper of Ship island and very often we saw him at home. He died I think about the year 1902 or 1903, about two years ago, in Biloxi, and I always heard him say it was to Ship island from the shore about 12 miles, I recollect that much. Now about the other measurements. I could not. I never had any interest to study that.

Q. This steamer line that you speak of from New Orleans to Mobile, is not more than 12 miles at any point from the Mississippi shore is it?

A. That is what I always understood. Of course I had no interest to go and measure those things, I couldn't say exactly.

Q. You have never been engaged in the oyster taking industry?

A. No sir, but I tell you what I did, I went out to Ship island and ate some mighty good oysters there.

Q. Did you ever go down through Nine Mile bayou?

A. Yes sir I have.

Q. I wish you would tell me, if you can, in passing through Nine Mile bayou down towards the Lake of the Mound, do you know where that is, Indian Mound bayou?

A. No, I don't recollect.

Q. Down towards Treasure bay?

A. I don't recollect, many of those things have escaped my memory. A man that goes out hunting does not go there to make a survey.

Q. Nor to establish State boundaries?

A. No sir.

Q. I want to ask you, if you can tell me, where the high tide mark is on the Louisiana land west of Nine Mile bayou?

A. I couldn't tell you.

Q. There is a high tide mark across the eastern boundary of St. Bernard parish somewhere, is there not, a place where the ebb and flow of the tide reaches?

A. Yes sir, there are many places. I have gone all through that St. Malo country.

Q. You know where Bayou aux Terre Bœuf is?

A. Yes sir.

Q. Now what I want to know is, north of Bayou aux Terre Bœuf where the high tide mark is on the Louisiana soil along the western coast of Three Mile bayou?

A. I have known where there were camps on Riviere au Chenes used to go through Bayou Terre Bœuf to reach there. Then I hav known the encampments of the Malays that were there on St. Mal that is way off inside of the marsh further.

Q. Is St. Malo north of Terre Bœuf?

A. Oh, yes, it reaches toward the shore of Mississippi. And the I knew La Chinch, that is where the big settlements begin.

Q. Tell me if you can where is the point at Proctorville whic the map shows to be at the southern shore of Lake Borgne, and am sure you understand it that way, do you? Look at the map i front of you. You see Proctorville is right at the southern extren ity of Lake Borgne. Now, run your finger from Proctorville du east, and tell me about where you strike the high tide mark

1080 A. Where the camp was of those Malays on that rive there, I can tell you I came very often and crossed from m club at Lake Catherine and crossed over here at Bay Biloxi, Litt Biloxi——

Q. And came down Nine Mile bayou?

A. On here, yes sir, to go to Biloxi and fish.

Q. You failed to answer my question. Putting your finger o Proctorville and moving it directly eastward, where do you strik the high tide mark on the main land of Louisiana?

A. That I could not answer because those are things I neve studied.

Q. You don't know?

A. No sir.

Q. Now, please go up a little higher on your map there and pu your finger at Point aux Marchettes and then move eastward an tell me if you can where you strike the high tide mark on th Louisiana main land?

A. I tell you frankly I don't know.

Q. Does the high tide ever entirely over run Malheureux point

A. On the edge I found out that it takes a good tide to go over— a heavy tide to go over the edges, they are always dry.

Q. It takes something above the ordinary high tide to go ove Malheureux point?

A. Yes sir, I think it does.

Q. You notice Nine Mile bayou is the first water course eastwar from Malheureux point. Is there not some place along the west shor of Nine Mile bayou down towards Point aux Marchettes and in th direction of Proctorville where the high tide stops?

A. That is exactly what I can't answer. You will agree with m that a man that goes out sporting is not going to survey the land o tide whether they are high or low, therefore it would be impossibl for me to tell you whether—to tell the distance whether it is——

Q. I don't ask you for the distance. I ask you if it is not a fac if there is not some point about the western shore of Nine Mil bayou where the ebb and flow of the high tide mark on the Louisi ana main land is; it stops somewhere and I want you to fix it a

near as you can according to your best judgment. I understand, of course, you never made any survey.

A. Like I tell you, on the shore, all along the shore of Lake Borgne and the Gulf, those marshes are always above water, and it takes a high tide to cover most of those marshes.

Q. And the most of them are covered by the high tide are they not?

A. That is what I understand.

Q. Hardee's map of 1868 has been introduced in evidence and I will ask you to please look at this map beginning at Malheureux point and going to the northeastern point of Isle à Pitre and tell me whether or not you find on this map a string of islands?

A. I see them there; but when I went in a boat I was not going to stop on all those islands.

Q. In passing you saw a number of islands?

A. I went right out to the place I wanted to go, whether for fishing or hunting. Of course I am acquainted with those things like all those men that go fishing and see a lot of things passing by.

Q. You saw no industrial life of any kind in there, any stores, habitations or houses?

A. No sir, the only thing that I ever heard was I know that one of the oldest families of Mississippi, the McCans, they are from Mississippi City I believe, they had cattle there, most of those
1081 people could give you testimony, they had cattle on all those islands and they owned——

Q. Which islands do you mean?

A. On the Louisiana side, they had cattle, even up to the parish of Plaquemines, that they sold since the war.

Q. Are you not referring to the cattle that Mr. Seal had on Chandeleur island and Cat island? He never had any cattle on Isle à Pitre or any islands——

A. I can't tell you on which, but I often heard of them.

Q. You never saw them?

A. No sir.

Q. Well, the record shows that Mr. Seal or Mr. —— had cattle on Chandeleur and perhaps on Cat island, but nobody testified about any cattle being in the marsh and you never saw any in the marsh?

A. No sir.

Q. And in fact you never saw any on Chandeleur or Ship island or Cat island yourself?

A. I saw hogs.

Q. On what?

A. On all those islands.

Q. You mean on Cat island and Ship island?

A. There are still some in the marsh territory right along that coast.

Q. What?

A. Hogs, even on this coast.

Q. You are pointing to the north coast of Lake Borgne, that is not in controversy.

A. Well, right in here they had hogs.

Q. Now, you are pointing in the heart of St. Bernard parish; we are talking about the marshes?

A. I am talking about the marshes.

Q. Did you ever see any hogs on Isle à Pitre?

A. No sir, I never stopped on Isle à Pitre.

Q. Where was it you saw hogs?

A. I saw some of the hogs I believe on this island.

Q. That is Chandeleur island?

A. Yes sir, I saw them on Chandeleur island; I am telling you simply what I heard from people that had cattle there.

Q. I am asking you whether you saw any hogs in this marsh land?

A. No sir, I never went inside there, I never paid any particular attention to that.

Q. I suppose at this late date you do not remember any discussion before the war as to where the boundary was between Louisiana and Mississippi in those waters?

A. No sir. I must say the only thing I ever heard as I said before, was, on this side we called it the Louisiana side, that is all I can tell you.

Q. And on the other side what?

A. I mean all over; when we wanted to cross over to the marshes we called it the Louisiana marshes.

Q. You mean sailing from Mobile?

A. No, from Pass Christian, for instance, where I spent most of my youth, there in Mississippi, we would always, when we wanted to cross, say, let us go to the Louisiana marshes.

Redirect examination.

By Mr. ZACHARIE:

Q. You have said, in regard to what you have called the
1082 Louisiana marshes and the Louisiana shore, that we always called them so and so considered them. Who do you mean by we, do you mean Louisianians only or people from Mississippi living on that coast.

A. I mean all those people.

Q. You mean Mississippians as well as Louisianians?

A. Yes sir. I used to go with young Mississippians over there.

Q. Now you have mentioned that in going, in your hunting and fishing days, starting from the parish of St. Bernard, that you would go north to the channel, do you mean the channel that runs north of Grand island, Half Moon island and Round island?

A. Let me make it clear and you will know as well as I do what I am going to say what is the route that the people went for amusement. All these parties that went either for fishing or

hunting, they all went about the same route. Now when they would go for ducks and fish they would go for them and not to study the channels. Now, if you ask me about a line, that it came there for a specific purpose, I could not tell you, because I never went there to survey or study the country, I went there to fish or hunt ducks.

By Mr. McCLURG:

Q. You never went to look for the State line?
A. No sir.

By Mr. ZACHARIE:

Q. Now, you have spoken about what was considered the boundary line. Will you look at map No. 57 offered by the State of Louisiana and you will see a channel running from the mouth of East Pearl river, running east and coming down between Cat island and Isle à Pitre. Is that the channel which you have testified to as the one that was considered the boundary line between Louisiana and Mississippi?

A. From what I understood, I will repeat it again, that they considered—of course I suppose they were all like myself, they had no interest in studying the geography or topography of that part of the boundary—they considered that line of islands and the sound, and after that was——

Q. Answer my question. Is that the channel which you spoke of as pursued by the Mobile boats, running out to a certain—continuing out to a certain point and then diverging and going down between Isle à Pitre and Cat island, is that the channel which you have alluded to as the one that was considered the boundary line between Louisiana and Mississippi; just answer that question?

A. You want me to show you exactly what they did and not what the map shows. I have gone over that 500 times so I ought to know that route. We passed St. Joseph island coming from Milneburg——

Q. Did you go through the Rigolets at that time?

A. Yes sir, followed that route to St. Joseph island, right into Bay St. Louis.

Q. Now is that the channel that goes down between Cat island and Isle à Pitre?

A. No sir.

Q. You mean to say that you followed that channel partly and then went up towards Mississippi, do you?

1083 A. You want to know the line of the steamers, I suppose?

Q. I am talking about the line going on to Mobile.

A. I don't know——

Q. Now, the line which you have described as the boundary, left Grand island and Grassy island and Round island to the south of that channel, did it not, as belonging to Louisiana?

A. I don't know about this outside island?

Q. That is south of that channel, south of the channel which the Mobile line of steamers pursued, those islands are all south of it are they not?

A. If you let me explain the route, and if I am wrong and don't come to your question, then we will begin over, but let me show the route. If you are trying to get what I know I am going to show you what I know, and then afterwards if it is not what you wish, then question me. Starting from Milneburg we reach the Rigolets, we go through the Rigolets and pass by the St. Joseph lighthouse.

Q. Did you pass north of Half Moon or Grand island?

A. No, because I never saw those islands, the route of the steamers was too far away to see those islands. From St. Joseph lighthouse we followed the course up to Bay St. Louis.

Q. In what direction?

A. This way.

Q. Isn't that northeast?

A. I suppose so, I have not the compass to see.

Q. Here is the arrow in front of you?

A. We followed the coast, we could see the coast very well, after reaching Bay St. Louis we go around there to Pass Christian and from there to Mississippi City and from Mississippi City to Biloxi and from Biloxi to Ocean Springs and then to Mobile, that is exactly the route we followed. Now if that is not what you want just ask me the question. That is what I know.

Q. You see on this map, do you know where these islands are, Grassy island, Grand island, Round island.

A. I heard of them, but I never saw them.

Q. Are they south of that channel, or not, in going from the Rigolets to Bay St. Louis?

A. How could I know that if I didn't see them, just now I told you so.

Q. Now, do you know, after passing St. Joseph island, whether there was another channel which went off to the southeast passing between Isle à Pitre and Cat island?

A. Yes, sir.

Q. Was that the main channel for large vessels?

A. It was a channel that was used for the Mobile line of steamers that came then at that time very much loaded and they were pretty large steamers; they took the outside pass; they came right inside of Cat island; I have seen them hundreds of times, that was done only in low tide and in winter.

Q. Was that the channel which was considered the boundary line between Louisiana and Mississippi?

A. I don't know whether they considered it at that time, that channel as the line itself, but what I always understood from all the old people over there that the line of islands constituted the line. That is what I always understood.

1084 Recross-examination.

By Mr. McCLURG:

Q. Look at this map about which you have just been examined, map No. 59, offered by the State of Louisiana. There is a channel that runs between Cat island, Ship island, Horn island and the Mississippi shore?

A. They used to call that Pass Marianne, I don't know whether that is correct.

Q. That is correct.

A. That is the channel that many vessels travelled from New Orleans to Mobile, that was the channel in winter especially.

Q. And that is the channel which you say those people considered on one side of it Louisiana and on the other side Mississippi?

A. No, I don't say that, I just said no, that I could not say that, but I recollect very well they considered that line the line of islands, but how far outside or how far inside——

Q. On the outside of the islands was Louisiana and on the inside was Mississippi?

A. All that was inside of the islands was Mississippi.

Q. And on the outside Louisiana?

A. Yes sir.

JOHN DYMOND, JR., is recalled by the State of Mississippi for further cross examination.

By Mr. McCLURG:

Q. I notice in the original bill of complaint, Mr. Dymond, upon which you are marked as counsel in this cause, that you refer to the reconnoissance of the Fish Hawk, and you filed an exhibit to the bill, a map filed with the report of that reconnoissance showing a portion of the oyster beds and some of the soundings, and I infer from the draft of the bill that some of the information obtained by you in preparing the original bill of complaint was taken from that reconnoissance and the Report of the United States Commission of Fish and Fisheries, George C. Bowers Commissioner, Report on the Oyster Beds of Louisiana by H. F. Moore, Washington, Government Printing Office, 1899. It seems that this reconnoissance by the Fish Hawk was the result of a resolution passed by the legislature of Louisiana which Hon. Adolphe Meyer who is a member of Congress from this State as I understand it, presented in Congress, and this reconnoissance was ordered accordingly. In the rebuttal testimony on the part of Mississippi I will offer this report in evidence to show that the Fish Hawk map filed with your bill is not claimed to be accurate and that the survey and reconnoissance by the Fish Hawk was imperfect and the report thereof was not made by Lieut. Franklin Swift whom it had been intended should make the report. You will notice on page 49 and 50, statements in the report

that it was to the effect that it was not thorough and it was a hurried examination and especially at the bottom of page 49 the reporter says "Contrary to expectation was found that the topography in general had not
1085 gone many important changes since the survey which the Coast Survey charts were based and several could be identified and located with sufficient accuracy to serve purpose of a reconnoissance" and similar expressions throughout report which indicates that it was not intended to be an accurate survey or that the map accompanying it was accurate. I call attention to the fact that the writer of the report acknowledges indebtedness to Col. F. C. Zacharie, Hon. E. McCullom, Hon. Adolph Meyer and Hon. S. P. Henry, for valuable assistance and information and to Mr. F. F. Hansell for the use of his yacht in visiting St. Bernard beds in August 1897, for the purpose of asking whether these gentlemen were not then and are now citizens of State of Louisiana?

A. Yes sir, they were and are.

Q. And the Colonel F. C. Zacharie mentioned here is one of counsel in this case?

A. Yes sir.

Q. Have you any personal knowledge, Mr. Dymond, of that survey?

A. There was no survey. The purpose of that expedition was to locate the natural oyster reefs and to examine them and make a report. Dr. Moore was the oyster expert of the Bureau of Fisheries of the United States Government; Lieut. Swift was also to a certain extent pretty well posted on the oyster industry but not as well posted as Dr. Moore. Lieut. Swift had taken charge in the survey of the Apalachicola waters in Florida a report of which was previously made on the oyster conditions existing in that portion of Florida, but it was [illegible] in regard to St. Bernard that they made a map at all; the other parishes, Plaquemines, Jefferson, Terrebonne and other localities visited by Dr. Moore he merely mentioned in his report and described the conditions without essaying to show with the assistance of any map where the oyster beds were located. I understood that Dr. Moore or the topographer in making up the map took the data which was originally compiled by the Coast and Geodetic Survey and shown in the Land Office of the United States in making up this map of that portion of St. Bernard.

Q. Exactly so, but the purport of my question was whether any actual surveys were made to locate the boundaries of St. Bernard parish or the lines of township and range?

A. No sir; there was none.

Q. Then I want to ask you, Mr. Dymond, with reference to the first annual report of the Oyster Commission of Louisiana to the legislature and General Assembly, dated from August 11th 1902 to January 31st 1904, whether Mr. N. H. Nunez a member of that commission, Mr. Breaux, Mr. Cage, Mr. Smith and Mr. John Dymond

Jr., are the same persons who have testified on the part of Louisiana in this case?

A. Yes sir.

Q. I notice in this report that the oyster commission called upon Mr. J. B. Baylor to prepare a written report to your commission to recommend such changes in the present oyster laws of Louisiana as would seem to him to encourage a development of the oyster industry in the State of Louisiana. He is the same Mr. Baylor who testified in this case?

A. Yes sir. With the assistance of our Congressmen, General Adolph Meyer endeavored to get the United States Fish and Fisheries Commission to co-operate with us in developing the
1086 oyster industry in Louisiana and investigating it from a scientific point of view. One of the greatest questions that we were confronted with was to devise an intelligent system by which we could locate the surveys of private leased bedding grounds and the department of Coast and Geodetic Survey at Washington had a balance which was available on the request of the head of another department, and the Fish and Fisheries Commission or the superintendent of that body got the United States Coast and Geodetic Survey to send Mr. Baylor down here and he co-operated with us in the matter of locating township and range lines for the purpose of locating our surveys of private leased bedding grounds and devise and recommend a system whereby we could effectively carry out all future locations of that character.

Q. When was that?

A. That was, I should judge, about, a little over a year ago. You said when was that?

Q. That he came down here to devise with you about it?

A. He made two trips. He first came down here in the spring of 1903, and worked for some time using the oyster commission's patrol boat and I think left here about the month of May or June; then he came down again the following winter and was here in the spring of 1904. His first work was in the neighborhood of St. Bernard parish and his work on the second trip was down around the mouth of the Mississippi river to the eastward in the neighborhood of Cubics gap and Paptiste Collette.

F. C. ZACHARIE, witness sworn on behalf of the State of Louisiana, testified as follows:

I wish to state that in regard to the mention of my name in connection with the report on the oyster beds of Louisiana by H. F. Moore, my only connection with that is, that having written an essay on the general subject of the oyster fisheries of Louisiana for which I was employed by the Manufacturers Record of Baltimore, Dr. Moore the biologist of the Fishery Commission brought a letter of introduction to me and asked my assistance in getting proper accommodation for visiting the oyster beds of Louisiana. I succeeded in getting the loan of Mr. Hansell's nap-tha or gasoline

launch and at the request of Dr. Moore secured for him a pilot to take him out to a portion of the oyster beds located in the neighborhood of St. Bernard and I accompanied him at his request on that trip to the oyster beds of St. Bernard. The trip had nothing to do at all with any boundary question. It was simply a courtesy that I showed Dr. Moore. Subsequently when Dr. Moore returned to the city of New Orleans I gave him letters of introduction to gentlemen living west of the Mississippi river, in order that they might assist him in inspecting the oyster beds of Louisiana to the westward of the Mississippi river. My connection with Dr. Moore had nothing at all to do with the boundary question in any way in the world nor was it ever mentioned or discussed between us.

1087 By Mr. McCLURG:

Q. One question, Colonel, that I want to ask you in conclusion, is, of you and Mr. Dymond who has just left the stand, whether these services and reconnoissances and work done by Mr. Baylor were not *ex parte?*

A. I don't know anything about that.

Mr. Dymond what do you say about it. Mississippi was not invited to take any part?

Mr. DYMOND: What the Baylor——

Mr. McCLURG: Yes.

Mr. DYMOND: That had nothing to do with the boundary line.

Mr. McCLURG: I know but it has something to do with it now because the result of his work is used not only in your bill indirectly but directly by his testimony showing his familiarity with it. You used him to good effect in his testimony by reason of his having been out there and my sole purpose now is to show that Mississippi knew nothing of that and had nothing to do with it, it was *ex parte.*

Mr. DYMOND: In answer to that question, unquestionably Mississippi had no knowledge, officially, of the surveying work being done here by Mr. Baylor of the United States Coast and Geodetic Survey or the Fish Hawk reconnoissance. On the other hand it is equally true that Mr. J. B. Baylor's work had no connection intentionally with the boundary dispute between Louisiana and Mississippi.

By Judge GUION: Counsel for the State of Louisiana announce their endeavor to have produced as a witness in this case Hon. F. A. McLain member of Congress from the State of Mississippi and offer and produce and file in evidence the subpœnas issued for service upon him with the returns thereon which read as follows:

" United States Supreme Court.

No. 11, Original, Oct. Term, 1903.

The President of the United States to Hon. F. A. McLain, Gloster, Mississippi:

You are hereby commanded to appear before me, a commissioner appointed by the Supreme Court of the United States, at my office in the U. S. customhouse building, New Orleans (in clerk's office, U. S. district court, room No. 4) on Friday the 26th day of August 1904 at 11 o'clock a. m. and there to testify the truth according to your knowledge in the matter of State of Louisiana *vs.* State of Mississippi. And herein fail not under the penalty of two hundred and fifty dollars.

Commissioner's office, New Orleans, La. Aug. 19,'04.

(Signed) FRANK H. MORTIMER,
Commissioner."

1088 Return of Sheriff on Above.

" I have this day executed the within writ personally by leaving a true copy of this writ at the residence of F. A. McLain with his daughter who is over the age of sixteen and was willing to take and deliver same.

This August 22nd A. D. 1904.

(Signed) W. H. BATES, Sheriff."

" United States Supreme Court.

No. 11, Original, Oct. Term, 1903.

The President of the United States to Hon. F. A. McLain, Gloster, Mississippi:

You are hereby commanded to appear before me, a commissioner appointed by the Supreme Court of the United States, at my office in the U. S. customhouse building, New Orleans, (in clerk's office, U. S. district court, room No. 4) on Tuesday the 6th day of September 1904, at 10.30 o'clock a. m. and there to testify the truth according to your knowledge in the matter of State of Louisiana *vs.* State of Mississippi. And herein fail not under the penalty of two hundred and fifty dollars.

Commissioner's office, New Orleans, La. August 31, 1904.

(Signed) FRANK H. MORTIMER,
Commissioner."

Return of Sheriff on Above.

"The within named F. A. McLain not found in my county.
This Sept. 5th 1904.

Return of Marshal on Above.

"Received this subpœna Sept. 13, at Little Rock in the eastern district of Ark. and after diligent search the within named F. A. McLain could not be found in the eastern dis. of Ark.

(Signed) A. S. FOWLER,
U. S. Marshal,
By F. D. LEARNING, Deputy."

ADMISSION.—It is admitted by counsel for Mississippi that the letter dated Gloster, Mississippi, 10th September 1904 addressed to Hon. F. H. Mortimer, New Orleans, is written by Hon. F. A. McLain and that the same is in the following language, to-wit:

"GLOSTER, MISS., 9/10/04.

Hon. F. H. Mortimer, New Orleans, La.

DEAR SIR: On my return home Sept. 3rd the enclosed subpœna was handed to me (by a member of my family) which explains itself. I did not know of the existence of the subpœna until my return home Sept. 3rd and you will note the subpœna required my appearance before you on Friday the 26th day of August last. Since my return home I have been sick in bed with rheumatism and am so afflicted now, and I will leave for Hot Springs Ark. tonight. Should you still need me, if you will notify me the day on which you require my presence I will come down. I could not do so now for I am suffering intensely with rheumatism and fever, but I hope to be well and at home within the next ten days or two weeks. Any time after this I can come down upon short notice.

I assure you my non-appearance before you on August 26th was caused for the reason above stated—that I did not know of the existence of the subpœna until Sept. 3rd of this month, and since then I have been sick. I hope you did not enter a penalty against me for non-appearance.

Yours sincerely,
(Signed) F. A. McLAIN."

Mr. DYMOND: The evidence in rebuttal on the part of the State of Louisiana is this day closed, with the agreement on both sides that either side shall have the right up to October 1st to introduce any documentary evidence or maps which they may deem necessary and thereupon the commission was adjourned to meet in Jackson, Mississippi, on Thursday September 22nd 1904, at 10 o'clock a. m. at the office of the attorney general of the State of Mississippi.

FRANK HASTINGS MORTIMER,
Commissioner.

1090 In the Supreme Court of the United States, October Term, 1904.

STATE OF LOUISIANA
vs.
STATE OF MISSISSIPPI. } Original Bill, No. 11.

I, Reginald H. Carter, appointed stenographer by the Honorable Frank H. Mortimer, commissioner appointed by the Supreme Court of the United States in the above entitled and numbered proceeding, do hereby certify, that under the agreement between counsel for the respective parties therein of record, I took testimony on behalf of the State of Louisiana at the several sittings the commission held in the city of New Orleans, and that a true and faithful transcript thereof is contained in the record of testimony of the State of Louisiana in volumes I., II., III., and IV., beginning on page 1, and ending on page 1477.

In witness whereof, I have signed these presents at the city of New Orleans, State of Louisiana, this 23rd day of February, A. D. 1905.

ST. BERNARD, P. O., LA., ——, 190–.

Whereas, it has come to the knowledge of this police jury that a great number of citizens of other parishes and of the State of Mississippi are fishing oysters within the limits of this parish, in contravention of the State oyster law, and the police jury being desirous of correcting such violations of the law,

Be it resolved, That the president of the police jury is hereby authorized and empowered to equip and man a boat for the purpose of sending an expedition to the oyster reefs; and

Resolved further, That the object of said expedition being, primarily, the gathering of all information essential for the proper enforcement of the law, the parties composing the said expedition are hereby instructed to make a protracted cruise, covering all the oyster territory and make an intelligent report of all information gathered to this police jury.

(Endorsed.)

I hereby certify the reverse hereof to be a true and correct copy of resolutions adopted by the police jury of the parish of St. Bernard, on January 10th, 1898.

1095 DOCUMENT NO. 4.

Office Oyster Commission of Louisiana.

NEW ORLEANS, LA., September 9th, 1902.

Oyster Commission of Louisiana met this day in special session. Members present: James M. Breaux, president; Thomas Shannon, Jr., N. H. Nunez, Frank P. Parra and attorney John Dymond, Jr. Absent: Ben Mitchell.

On invitation from President Breaux the Oyster Commission of Mississippi, together with their attorney and chief inspector presented themselves, and after a lengthy address of welcome by President Breaux, the Oyster Commission of Louisiana and Mississippi convened jointly.

On motion of Mr. Breaux, duly seconded by Mr. Nunez, Mr. Hatlestad, president of the Oyster Commission of Mississippi was elected chairman of the joint meeting, and John R. Langridge was elected secretary.

Extract From Minutes of a Joint Conference of the Oyster Commissions of the States of Louisiana and Mississippi, Held at New Orleans, La., Tuesday, September 9th, 1902.

Present: James M. Breaux, president; Frank P. Parra, Thomas H. Shannon, Jr., N. H. Nunez, Louisiana commissioners; John R. Langridge, secretary, John Dymond, Jr., attorney; Harry Cage, chief inspector; H. C. Smith, surveyor oyster commission.

J. A. Hatlestad, president; Frank J. Ladner, Ferdinand Patenotte, O. Y. Cassibry, J. D. Minor, Mississippi commissioners; F. S. Hughes, secretary, Messrs. McDonald attorney, Mosley chief inspector.

On motion of Commissioner F. J. Ladner of Mississippi, seconded by Commissioner N. H. Nunez of Louisiana, the following resolution was adopted:—

Be it resolved by the Oyster Commissions of the States of Louisiana and Mississippi, in joint conference, that all the water territory embraced within the following limits, to-wit:

Beginning at a point in the center of the mouth of Pearl river, thence in a south easterly direction to Malheureux point, thence in an easterly and north easterly direction following the shore lines to Grand pass, thence along the western shore line of Grand pass, thence easterly to the southernmost point of Sundown island, thence in a northeasterly direction to the center of deep water channel called Cat Island pass, and thence following the deep water channel, westwardly, passing between Grassy island and St. Joseph light house to the point of beginning;

Shall, pending the final decision by the Supreme Court of the United States in the boundary suit to be instituted, remain a common fishing ground to be fished by boats of either States in accordance with, and upon compliance with the laws of either State, and inspectors and officers of the respective commissions (oyster) will govern themselves accordingly.

We certify the above and foregoing to be a true extract as aforesaid.

J. A. HATLESTAD,
Chairman Joint Conference Oyster
Commissions of Louisiana and Mississippi.
JNO. R. LANGRIDGE,
Secretary Joint Conference Oyster
Commissions of Louisiana and Mississippi.

I hereby certify that the above and foregoing is a true and correct copy of the minutes of a meeting held on September 9th, 1902, jointly between the Oyster Commission of Louisiana and the Oyster Commission of Mississippi, as taken from the records of my office.

A. G. GUGES, [SEAL.]
Secretary Oyster Commission of Louisiana.

EXECUTIVE DEPARTMENT,
JACKSON, MISS., December 8th, 1902.

His excellency Gov. W. W. Heard, Baton Rouge, La.

MY DEAR GOVERNOR: Replying to your favor of December 5th advising joint meeting of the oyster commission of our respective States and suggesting Wednesday the 17th instant at 12 o'clock at No. 339 Carondelet street New Orleans, I beg to thank you fi

for the careful and courteous consideration which you have given the subject matter in question, and to say that owing to the fact that the 17th of December will conflict with an engagement which I had previously made I took up the subject with Hon. John Dymond, Jr., attorney for the Louisiana Oyster Commission, who in turn arranged with the president of said commission for the said joint meeting to occur on the 16th instead of the 17th of December, and I indulge the hope that this date will meet your approval and also of our commissions, and that I shall have the pleasure of meeting you on the occasion named and that our joint commissions will have the benefit of your co-operation and wise counsel looking to a just and amicable adjustment of the oyster disagreement. I have advised the Mississippi commission of the above proposed arrangement and asked complyance and co-operation on its part.

I have the honor to be, very sincerely,

A. H. LONGINO, Governor.

Endorsed: Document No. 5 offered by State of Louisiana Apr. 5, 1904. Frank H. Mortimer, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905. James H. McKenney, clerk.

DOCUMENT No. 6.

"Mississippi Boundary Commission.

On February 9, 1901, I appointed the following named gentlemen as commissioners to confer with a like commission appointed by the governor of Louisiana to consider the water boundary line between the two States, and arrange for the easy location and identification of the same by a proper system of buoys, to wit:

Hon. J. I. Ford, Scranton, Miss.
Hon. E. J. Bowers, Bay St. Louis, Miss.
A. Keller, Bay St. Louis, Miss.
Hon. W. A. White, Biloxi, Miss.
Hon. H. T. Howard, Biloxi, Miss.

This commission met at Biloxi and elected H. T. Howard chairman and J. I. Ford secretary. Their report, which is transmitted to you, will acquaint you with the whole matter, and from which you will find that they suggest a friendly suit in the Supreme Court of the United States as the best method to fix the true boundary between the two States. I submit the matter for such legislation as in your judgment is best."

STATE OF MISSISSIPPI,
Hinds County.

I do hereby certify that the above and foregoing is a true and correct copy of that part of a message relative to the Mississippi bound-

ary commission sent to the legislature by the governor of the State of Mississippi at its meeting in January, 1902.

Witness my signature this the 29th day of March, A. D. 1904.

[SEAL.] GEO. E. MYERS,
Clerk of Supreme Court.

declared void, the aforesaid board shall not reimburse to the said purchaser any sum whatsoever.

This sale is made and accepted for and in consideration of the price and sum of sixty-three & 75/100 dollars ($63.75) cash, which the purchasers have presently paid in ready current money unto the said John Dymond, president, who acknowledges the receipt thereof and grants full acquittance therefor.

By reference to the certificates of the clerk and recorder of the parish of St. Bernard, it appears that the above described lands were not alienated by the State of Louisiana, except by the sale made to the Board of Commissioners for the Lake Borgne Basin Levee District; and by the same certificate it appears that the said lands were not heretofore alienated by the present vendor. The taxes of the year 1902 are assumed by the purchaser.

To have and to hold the above described lands unto the said purchasers, their heirs and assigns forever.

Thus done and passed in the parish of St. Bernard, on the day month and year first above written, in the presence of Messrs. John Dymond, Jr., and Milton P. Doullut competent witnesses who have signed their names hereto, with the said appearers and me notary, after due reading of the whole.

HOUSE OF REPRESENTATIVES U. S.
WASHINGTON, D. C., 1, 27, 1901.

Hon. O. H. Tittman, Supt. C. & G. Survey, Washington, D. C.

DEAR SIR: I herewith enclose to you a letter from Mr. I. Heidenheim of Biloxi, Mississippi, which fully explains itself. If you can furnish the information he seeks I would appreciate it.

While the letter says "Give us all the information on record at Washington, bearing on the question of the boundary line between Louisiana & Mississippi," I think he *only* wants that information pertaining to boundary line at or near the coast.

Very respectfully,
(Signed) F. A. McLAIN.

Copy.

F.

TREASURY DEPARTMENT,
COAST AND GEODETIC SURVEY,

DEPARTMENT OF COMMERCE AND LABOR,
WASHINGTON, D. C., March 18, 1904.

I hereby certify that the annexed is a true copy of the original report of January 30, 1901, and accompanying sketches, submitted by Mr. W. C. Hodgkins, assistant Coast and Geodetic Survey, on the boundary line between the States of Mississippi and Louisiana in the waters bordering upon the gulf of Mexico.

ANDREW BRAID,
Assistant in Charge of Office Coast and Geodetic Survey.
(Official Title.)

OFFICE OF THE SECRETARY.

I hereby certify that Andrew Braid, who signed the foregoing certificate, is now, and was at the time of signing, assistant in charge of office, Coast and Geodetic Survey and that full faith and credit should be given his certificate as such.

In witness whereof, I have hereunto subscribed my name, and caused the seal of the Department of Commerce and Labor [SEAL.] to be affixed this 19th day of March, one thousand nine hundred and four.

GEORGE B. CORTELYOU,
Secretary of Commerce and Labor.

1107 All communications should be forwarded under cover to the "Superintendent U. S. Coast and Geodetic Survey, Washington, D. C."

TREASURY DEPARTMENT,
OFFICE OF THE COAST AND GEODETIC SURVEY,
WASHINGTON, D. C., January 30, 1901.

Mr. O. H. Tittman, Superintendent C. & G. Survey, Washington, D. C.

SIR: I beg to submit the following report upon the question of the boundary line between the States of Mississippi and Louisiana, in the waters bordering upon the gulf of Mexico, referred to in the letter of Hon. F. A. McLain, M. C., dated January 27, 1901, and in the letter of Mr. I. Heidenheim, of Biloxi, Miss., dated January 23, 1901, and transmitted by Mr. McLain.

I have consulted, in my search, the acts of Congress under which both Louisiana and Mississippi were admitted to the Union, and other authorities, like the State codes, in the law library of Congress.

I have also consulted numerous atlases and maps of various scales and dates, both in the library of the Coast and Geodetic Survey and in the Library of Congress.

In addition, I have investigated the information which is on

file in the General Land Office, where every facility was kindly afforded me.

Appended to this report are tracings of the locality in question, compiled from Coast & Geodetic Survey charts Nos. 19, 190 and 191. These are identical in regard to the natural outlines, and serve to illustrate, by means of the colored lines, the differences between various authorities.

The following facts appear on record. According to the treaty with Spain, concluded October 27, 1795, the parallel of 31° north latitude formed the southern boundary of the United States from the Mississippi to the Apalachicola.

1108 By the treaty of Paris, concluded April 30, 1803, the Louisiana territory was ceded by France to the United States and on March 6, 1804, was divided into two Territories, called Orleans and Louisiana.

By the act of April 8, 1812, the Territory of Orleans was admitted to the Union as the State of Louisiana, (the Territory of Louisiana taking the name of Missouri). In this act the eastern and southern limits of the State are thus described: "Down the said river" (Mississippi) "to the River Iberville" (Bayou Manchac) "and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by said Gulf to the place of beginning" (the mouth of the River Sabine) "including all islands within three leagues of the coast."

The boundary line thus established is shown, in part, on the map marked # 1.

In 1812, also, Congress added to Louisiana the territory lying to the eastward of the boundary just described and limited by the parallel of 31° on the north and by the Pearl river, through its eastern mouth, on the east. The territory south of 31° and between the Pearl and Perdido rivers was added to the Territory of Mississippi. It will be noticed that all of this was Spanish territory under the treaty of 1795, but the United States apparently claimed it by right of occupation and in 1819 this occupation was confirmed by the cession by Spain of all of her territory east of the Mississippi river.

In 1817 Congress, by act dated March 1st, provided for the admission to the Union of the western part of the Mississippi Territory under the name of the State of Mississippi. The boundaries of the new State are described as follows:

SEC. 2. And be it further enacted That the said State shall consist of all the territory included within the following boundaries, to-wit: Beginning on the River Mississippi at the point where the southern boundary line of the State of Tennessee strikes the same thence east along the said boundary line to the Tennessee river, thence up the same to the mouth of Bear creek, thence by a direct line to the north west corner of the county of Washington, thence due south to the gulf of Mexico, thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl

river with Lake Borgne, thence up said river to the thirty-
1109 first degree of north latitude, thence west along the said de-
gree of latitude, to the Mississippi river, thence up the same to the beginning."

The six league limit described by the above, as well as the three league line mentioned in the Louisiana act are shown on the map marked # 2.

A. "league" is generally understood to mean a distance of three miles which may be either statute or nautical miles. As the acts in question do not specify either, both are shown. It is evident that there is a chance for uncertainty as to what line constitutes the "coast" of Louisiana within the meaning of the act, and several different lines might be drawn, according to the way in which this expression is interpreted. These are illustrated upon the drawing. It is pretty evident, at any rate, that the extensive group of islands, of which Isle au Pitre forms the northeastern angle, is part of Louisiana, and the only doubtful points are as to the jurisdiction over Cat island and the islands called *Malheureux*, lying at the entrance of Lake Borgne.

Although under the organic act Louisiana might have some claim to Cat island, it does not appear that such claim was ever made, though on a few of the maps inspected it appears as part of that State. The land surveys of Louisiana were not extended to Cat island, while those of Mississippi were so extended. There seems to have been a general consensus that the passage called Cat Island channel divides the jurisdiction of the two States.

With regard to the Malheureux islands, which are situated at the entrance to Lake Borgne, between point Malheureux and Lower Point Clear, there seems to be more uncertainty. These small marshy islands, which on many of the ordinary maps are either not shown at all or else very incorrectly represented, seem to have been considered by the map makers as of too little importance to receive any careful consideration. In fact, at least one case is found in which two editions of the same map issued by the State of Louisiana vary the ownership of these and other islands.

As shown on the Coast Survey chart, from a survey made in May,
1852, there are four of these islands, viz: *Grassy*, *Grand*,
1110 *Round* and *Petit Pass* islands, St. Joseph's island, east of Point
Clear, Mississippi, being considered as not one of this group and as undoubtedly in Mississippi, by nearly constant usage if not by prescription.

All of the above islands would be included within Louisiana's three-league limit of 1812 and also within Mississippi's six league limit of 1817. It is to be presumed that a later grant would not be held to include islands already granted by an earlier enactment.

The American Atlas, of H. S. Tanner, published at Philadelphia, in 1820, and generally esteemed the best authority of the day, shows the States of Mississippi and Louisiana in conjunction on plate 20. This map is clearly and neatly drawn and is colored by counties,

(or parishes in Louisiana). The southeastern shore of Lake Borgne is not correctly drawn and Petit island is not shown separately. The Malheureux islands are, however, shown and are colored as part of St. Tammany parish, Louisiana. Cat island is shown as part of Hancock county, and Ship and Horn islands as belonging to Jackson county, Mississippi. All islands south west of Cat islands are shown as in Plaquemines, (now St. Bernard) parish, Louisiana.

About 1827 the U. S. land survey was extended to the southwestern part of Mississippi and the marshy point east of the Pearl river was surveyed as township 10. S. range 15 W. and was subdivided into sections. Two small portions of the eastern shore of Point Clear extended into sections 6 & 7 of township 10 S. R. 14 W., and St. Joseph's island, still farther to the eastward, was located by a course and distance from a point on the main shore. The northern point of Grand island was also located by two courses and distances taken from Lower Point Clear and from the south point of St. Joseph's island. Grand island was not subdivided on the rectangular system, but seems to have been surveyed in some way, as the area is given on the plat as equal to 1612 acres. Its outline, however, is very incorrectly given. It falls in the extreme S. E. corner of twp. 10 S. R. 15 W. and small portions of it extend into each of the adjoining townships, viz: T. 10 S. R. 14 W.; T. 11 S. R. 14 W.; and T. 11 S. R. 15 W. As above stated, it was not subdivided and none of the sections within which it would fall are entered on the transfer
1111 books of the General Land Office.

Grassy or Marsh island, which is about three quarters of a mile W. N. W., from Grand island, is not shown on this Mississippi plat, nor are Round and Petit Pass islands.

In the years 1843 and 1845 the land surveys in the southeastern district of Louisiana were extended to the broken marshy region east of Lake Borgne, and all four of the Malheureux islands were included in the survey and were subdivided by the rectangular system upon the plats, the original surveys being by meanders proceeding from Point Malheureux to Petit Pass island and from there to Round, Half Moon (Grand) and Marsh (Grassy) islands, in the order named.

It will be noted that the names of the islands in the Louisiana survey differ from those now in use. In this survey, also, the islands fall in four townships, viz: T. 10 S. R. 17 E.; T. 11 S. R. 17 E.; T. 10 S. R. 18 E.; and T. 11 S. R. 18 E. This was evidently a careful survey, the outlines of the islands upon the plat agreeing very closely with the topographical survey of 1852.

Under the marsh-land act of March 2, 1849, the State of Louisiana selected all of the above islands as marsh land and the release of the same to the State was approved by the Secretary of the Interior on May 6, 1852. This release had the force of a patent and would seem to settle the ownership of these islands as being in the State of Louisiana. Presumably, jurisdiction would go with ownership, especially as no question seems to have been raised. Yet the evidence of the maps is most conflicting. The earliest maps of

Louisiana after the cession represent the Malheureux islands as not belonging to Louisiana. A large and elaborate map of the Territory of Orleans and of western Florida, (then Spanish), with part of the Territory of Mississippi, made by B. Lafon and published at New Orleans in 1806, gives the islands to western Florida, and the latest official maps issued by the State of Louisiana similarly indicate them as part of Mississippi. Of the large number of maps examined I have notes of seventy-three which show these islands more or less distinctly.

1112 Twenty-six of these do not indicate in any definite way the State to which the islands belong; twenty-six put the whole group in Louisiana; seventeen put them in Mississippi; and three divide the group by putting Grassy and Grand islands in Mississippi and Round and Petit Pass islands in Louisiana. An official map of the State of Mississippi by T. S. Hardee, published in 1872 even puts St. Joseph's island in Louisiana. Nine maps put Cat island in Louisiana, but twenty-six put it in Mississippi. All of this shows that the average publisher's map carries very little weight, the possibility being that one is copied from another without discrimination. Great carelessness is frequently shown in the coloring which is the usual mark of distinction between the political subdivisions. Different copies of the same map show the islands colored differently. Comparing the various authorities, it would appear that the earlier map makers generally considered the islands as belonging to the north shore of the lake, probably on account of the wide passage which they showed to the southward in place of the very narrow "Petit pass" as it actually existed. It would also appear that most of the maps issued by the governments of the two States have continued in that view; but the maps of the General Land Office are consistent in showing these islands in Louisiana, and most recent maps and atlases follow them.

Considering that the Malheureux islands lie within the three leagues from the coast of Louisiana mentioned in the organic act of 1812, and that the General Government relinquished title to the State of Louisiana in 1852, it would seem necessary to consider that Louisiana has at least a *prima facie* claim. It is also worth noticing that the principal channel into Lake Borgne lies to the northward of the islands between them and Lower Point Clear.

From all the information at hand, therefore, it would appear that the boundary between the States probably takes the course indicated on the final tracing, *i. e.*, north of the Malheureux islands, and thence through the Cat Island channel to the gulf of Mexico.

Respectfully submitted,

(Signed) W. C. HODGKINS,
Assistant, C. & G. Survey.

UNITED STATES OF AMERICA, }
Library of Congress. }

To all to whom these presents come, Greeting:

I certify that the fifteen maps described on the attached list and forwarded herewith to the Howard Memorial library at New Orleans to be offered in evidence in the suit referred to below, are a portion of the collection in the Division of Maps and Charts in the Library of Congress; that on or about the fourth day of March, A. D. one thousand nine hundred and four, Mr. Alexander Porter Morse, understood to be counsel for the State of Louisiana, in the matter of an original suit in the Supreme Court of the United States, entitled "The State of Louisiana *vs.* The State of Mississippi," now pending in said court, requested the privilege of having photographs taken of such maps; that this request was granted, and that on certain days subsequent to the above date these maps were delivered to Levin C. Handy, a photographer representing the said Morse, in order that he might photograph them in a room within the Library building designated for that purpose; and that on certain days thereafter the same maps were delivered to one Louis P. Spinner, who stated that he desired to color according to the originals, prints made from the negatives thus taken by said photographer.

In testimony whereof I, Herbert Putnam, Librarian of the Library of Congress, have hereunto subscribed my name.

HERBERT PUTNAM.

Done at the city of Washington this 31st day of March, A. D. 1904, and of the Independence of the United States of America, the one hundred and twenty-eighth.

Witness:
ALLEN R. BOYD.

1120 From the Maps & Charts Division.

To the Librarian of Congress:

Referring to La. and Miss. Maps Used by Mr. Morse. March 30, 1904.

The maps in the following list numbered from 1–15 are the maps examined by Mr. Morse, and photographed at his request by Mr. Handy. The same maps were used by Mr. Spinner for the purpose of reproducing their coloring upon certain photographs in his possession.

1. Lafon. Carte generale de territoire d'Orleans. (1806)
2. Darby. A map of the State of Louisiana, 1816.

3. Ludlow. A map of the State of Louisiana with part of th State of Mississippi and Alabama territory. (1819–1820)
4. Melish. Map of Louisiana, (1820)
5. Tanner, Louisiana and Mississippi. 1820.
6. Mitchell. Map of Louisiana, Mississippi and Alabama, 183
7. Graham and Tanner. A map of the State of Louisiana wit its counties, parishes &c., including the central & southern portion of the State of Mississippi 1834.
8. Tanner. A map of the State of Louisiana with its counties parishes, &c., including the central & southern portions of the Stat of Mississippi. 1837.
9. La Tourette. An accurate map or delineation of the State o Mississippi with a large portion of Louisiana and Alabama. 183
10. Bayley. New and improved map of Louisiana, 1853.
11. Schonberg. Map of Louisiana. 1866.
12. Hardee. Geographical, historical and statistical official ma of Louisiana. 1871.
13. Gray. New map of Louisiana. 1878.
14. Wall. Official map of the State of Mississippi. 1882.
15. Hinman. Map of Louisiana. 1885.

American History Leaflets of September 10, 1892, No. 5.

The definite treaty of friendship and peace between His Britan-ic Majesty and the Most Christian King and the King of Spain, con cluded at Paris the tenth day of February, 1716, in which the King of Portugal acceded on the same day. * * *

Article VII.

In order to establish peace upon solid and durable foundation and to remove forever all subjects of dispute with regard to the limits of the British and French territories on the continent o America; that for the future the confines between the dominions o His Britan-ic Majesty and those of His Most Christian Majesty, in that part of the world shall be fixed irrevocably by a line drawn along the River Mississippi from its source to the River Iberville, and from thence by a line drawn along the middle of this river and the Lakes Maurepas and Pontchartrain to the sea; and for this purpose His Most Christian Majesty cedes in full right and guarantee- to His

Britan-ic Majesty the river and the port of Mobile, and everything which he possesses or ought to possess on the left side of the River Mississippi except the town of New Orleans and the island on which it is situated shall remain to France, provided; that the River Mississippi shall be equally free as well to the subjects of Great Britain as to those of France, in its whole breadth and length from its source to the sea, and expressly that part which is between the said island of Orleans and the right bank of that river, as well as the passage both in and out of its mouth.

It is further stipulated that the vessels belonging to the subjects of either nation, shall not be stopped or subjected to the payment of any duty whatsoever. The stipulations inserted in the fourth article in favor of the inhabitants of Canada, shall also take place with regard to the inhabitants of the country ceded by this article.

Treaty of Friendship, Limits, and Navigation between the United States of America and the King of Spain, Oct. 27, 1795.

"His Catholic Majesty and the United States of America, desiring to consolidate, on a permanent basis, the friendship and good correspondence which happily prevails between the two parties, have determined to establish, by a convention, several points, the settlement whereof will be productive of general advantage and reciprocal utility to both nations.

With this intention, His Catholic Majesty has appointed the most excellent Lord Don Manuel de Godoy, and Alvarez de Faria, Rios, Sanchez, Zazosa, Prince de la Paz, Duke de la Alcudia, Lord of the Soto de Roma, and of the State of Albala, grandee of Spain of the first class, etc., * * * and the President of the United States with the advice and consent of their Senate has appointed Thomas Pinckney, a citizen of the United States and their envoy extraordinary to His Catholic Majesty. And the said plenipotentiaries have agreed upon and concluded the following articles:

Article I.

"There shall be a firm and inviolable peace and sincere friendship between His Catholic Majesty, his successors and subjects, and the United States and their citizens, without exception of persons or places."

Article II.

"To prevent all disputes on the subject of the boundaries which separate the territories of the two high contracting parties, it is hereby declared and agreed as follows, to wit: The southern boundary of the United States, which divides their territory from the Spanish colonies of east and west Florida, shall be designated by a line beginning on the River Mississippi, at the northernmost part of
1126 the thirty-first degree of latitude north of the equator, which from thence shall be drawn due east to the middle of the

River Apalachicola, or Catahouche, thence along the middle there to its junction with the Flint; thence straight to the head of S Mary's river, and thence down the middle thereof to the Atlant ocean. And it is agreed that if there should be any troops, garr sons or settlements of either party in the territory of the other, a cording to the above-mentioned boundaries, they shall be withdraw from the said territory within the term of six months after the rat fication of this treaty, or sooner if it be possible; and that they sha be permitted to take with them all the goods and effects which the possess."

* * * * * * *

Article IV.

"It is likewise agreed that the western boundary of the Unite States which separates them from the Spanish colony of Louisian is in the middle of the channel or bed of the River Mississippi, fro the northern boundary of the said State to the completion of th thirty-first degree of latitude north of the equator. And His Cath lic Majesty has likewise agreed that the navigation of the said rive in its whole breadth from its source to the ocean, shall be free onl to his subjects and the citizens of the United States, unless he shoul extend this privilege to the subjects of other powers by special con vention."

Treaty between the United States of America and the French Re public, April 30, 1803.

Article I.

"Whereas by the article the third of the treaty concluded at S Idelfonso, the 9th Vendemiaire, an 9 (1st October 1800,) between th first consul of the French Republic and His Catholic Majesty, it wa agreed as follows: "His Catholic Majesty promises and engages o

his part, to cede to the French Republic, six months after the full and entire execution of the conditions and stipulations herein relative to His Royal Highness the Duke of Parma, the colony or province of Louisiana, with the same extent that it now has in the hands of Spain, and that it had when France possessed it, and such as it should be after the treaties subsequently entered into between Spain and other States." And whereas in pursuance of the treaty, and particularly of the third article, the French Republic has an incontestible title to the domain and to the possession of the said territory: the first consul of the French Republic desiring to give to the United States a strong proof of his friendship, doth hereby cede to the said United States, in the name of the French Republic, forever and in full sovereignty, the said territory, with all its rights and appurtenances, as fully and in the same manner as they have been acquired by the French Republic, in virtue of the above-mentioned treaty, concluded with His Catholic Majesty."

Article II.

"In the cession made by the preceding article are included the adjacent islands belonging to Louisiana, all public lots and squares, vacant lands, and all public buildings, fortifications, barracks, and other edifices which are not private property. The archives, papers and documents, relative to the domain and sovereignty of
1128 Louisiana and its dependencies, will be left in the possession of the commissaries of the United States, and copies will be afterwards given in due form to the magistrates and municipal officers of such of the said papers and documents as may be necessary to them."

Eighth Congress, 2nd Session. Appendix 1804 and 1805.

Description of Louisiana.

(Communicated to Congress Nov. 14, 1803.)

To the Senate and House of Representatives of the United States.

Page 1498.

I now communicate a digest of the information I have received relative to Louisiana, which may be useful to the legislature in providing for the government of the country. A translation of the most important laws in force in that province, now in the press, shall be the subject of a supplementary communication, with such further and material information as may yet come to hand.

TH. JEFFERSON.

November 14, 1803.

An Account of Louisiana.

Page 1498.

The object of the following pages is to consolidate the information respecting the present State of Louisiana, furnished to the Executive by several individuals among the best informed on the subject.

Of the province of Louisiana no general map, sufficiently correct to be depended upon, has been published, nor has any been yet procured from a private source. It is, indeed probable that surveys have never been made upon so extensive a scale as to afford the means of laying down the various regions of a country which in some of its parts, appears to have been but imperfectly explored.

Page 1504.

St. Bernardo.

On the east side of the Mississippi, about five leagues below New Orleans, and at the head of the English bend, is a settlement known by the name of the Poblacion de St. Bernardo, or the Terre au Bœufs extending on both sides of a creek or drain, whose head is contiguous to the Mississippi, and which flowing eastward,
1132 after a course of eighteen leagues, and dividing itself into two branches, falls into the sea and Lake Borgne. This settlement consists of two parishes, almost all the inhabitants of which are Spaniards from the Canaries, who content themselves with raising fowls, corn and garden stuff for the market at New Orleans. The lands can not be cultivated to any great distance from the banks of the creek, on account of the vicinity of the marsh behind them, but the place is susceptible of great improvement, and of affording another communication to small craft of from eight to ten feet draught, between the sea and the Mississippi.

Page 1505.

Country from Plaquemines to the Sea, and Effect of the Hurricanes.

From Plaquemines to the sea is twelve or thirteen leagues. The country is low, swampy, chiefly covered with reeds, and having little or no timber, and no settlement whatever. It may be necessary to mention here, that the whole lower part of the country, from the English Turn downwards, is subject to overflowing in hurricanes, either by the recoiling of the river, or reflux from the sea on each side; and, on more than one occasion, it has been covered from the depth of two to ten feet, according to the descent of the river, whereby many lives were lost, horses and cattle swept away, and a scene of destruction laid. The last calamity of this kind happened in 1794, but fortunately they are not frequent. In the preceding year the engineer who superintended the erection of the fort at Plaquemines was drowned in his house near the fort, and the workmen and garrison escaped only by taking refuge on an elevated spot in the fort, on which there were notwithstanding two or three feet of water. These hurricanes have generally been felt in the month of August. Their greatest fury lasts about twelve hours. They commence in the southeast, veer about to all the points of the compass, are felt most severely below, and seldom extend more than a few leagues above New Orleans. In their whole course they are marked
1133 with ruin and desolation. Until that of 1793, there had been none felt from the year 1780.

Vol. 2, Page 641.

An act to enable the people of the Territory of Orleans to form a constitution and State government and for the admission of such State into the Union on an equal footing with the original States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled: That the inhabitants of all that part of the territory or country ceded under the name of Louisiana, by the treaty made at Paris on the thirtieth of April, one thousand eight hundred and three, between the United States and France, contained within the following limits, that is to say: Beginning at the mouth of the River Sabine, thence, by a line to be drawn along the middle of the said river, including all islands, to the thirty second degree of latitude, thence due north to the northernmost part of the thirty third degree of north latitude, thence along the said parallel of latitude to the River Mississippi, thence down the said river to the River Iberville, and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico, thence, bounded by the said Gulf, to the place of beginning, including all islands within three leagues of the coast, be, and they are hereby authorized to form themselves a constitution and State government, and to assume such name as they may deem proper, under the provisions and upon the conditions hereinafter mentioned.

SECT. 2. And be it further enacted, That all free white male citizens of the United States, who shall have arrived at the age of twenty-one years, and resided within the said Territory at least one year previous to the day of election, and shall have paid a territorial, county or district, or parish tax, and all persons having in other respects all legal qualifications to vote for representatives in the General Assembly of the said Territory, be, and they are hereby authorized to choose representatives to form a constitutional convention,
1136 who shall be apportioned amongst the several counties, districts, or parishes, in the said Territory of Orleans, in such manner as the legislature of the said Territory shall by law direct. The number of representatives shall not exceed sixty, and the election for the representatives aforesaid shall take place on the third Monday of September next, and shall be conducted in the same manner as is now provided by the laws of the said Territory for electing members of the house of representatives.

SECT. 3. Be it further enacted, That the members of the convention when duly elected, be, and they are hereby authorized to meet at

the city of New Orleans on the first Monday of November next, which convention, when met, shall first determine by a majority of the whole number elected, whether it be expedient or not at that time to form a constitution and State government for the people within the said Territory; and if it be determined to be expedient, then the convention shall in like manner declare, in behalf of the people of the said Territory, that it adopts the Constitution of the United States; whereupon the said convention shall be, and hereby is authorized to form a constitution of the said Territory; *provided:* that the constitution to be formed in virtue of the authority herein being given, shall be republican and consistent with the Constitution of the United States, that it shall contain the fundamental principles of civil and religious liberty, that it shall secure to the citizens the trial by jury in all criminal cases, and the privilege of the writ of *habeas corpus*, conformably to the provisions of the Constitution of the United States; and that, after the admission of the said Territory of Orleans as a State into the Union, that the laws which such State may pass, shall be promulgated, and its records of every description shall be preserved, and its judicial and legislative written proceedings, conducted in the language in which the laws and the judicial and legislative proceedings of the United States are now published and conducted; *and provided also:* That the said convention shall provide by an ordinance, irrevocable without the consent of the United States, that the people inhabiting the said Territory, do agree and declare, that they forever disclaim all
1137 right or title to the waste and unappropriated lands lying within the said Territory, and that the same shall be and remain at the sole and entire disposition of the United States; and moreover, that each and every tract of land sold by the Congress shall be and remain exempt from any tax laid by the order, or under the authority of the State, whether for State, county, township, parish or any other purpose whatever, for the term of five years from and after the respective days of sales thereof; and that the lands belonging to citizens of the United States residing without the said State shall never be taxed higher than the lands belonging to persons residing therein; and that no taxes shall be imposed on lands the property of the United States; and that the River Mississippi and the navigable rivers and waters leading into the same, or into the gulf of Mexico, shall be common highways, and forever free, as well to the inhabitants of the said State, as to other citizens of the United States, without any tax, duty, import or toll therefor imposed by the said State.

SEC. 4. Be it further enacted, That in case the convention shall declare its assent, in behalf of the people of the said Territory, to the adoption of the Constitution of the United States, and shall form a constitution and State government for the people of the said Territory of Orleans, the said convention, as soon thereafter as may be, is hereby required to cause to be transmitted to Congress the instrument by which its assent to the Constitution of the United States is

thus given and declared, and also a true and attested copy of su constitution and form of the State government as shall be form and provided by the said convention; and if the same shall not disapproved by Congress at their next session after the receipt ther the said State shall be admitted into the Union upon the same fo ing with the original States.

SEC. 5. And be it further enacted, That five per centum of the proceeds of the sales of the lands of the United States, after the fi day of January, shall be applied to laying out and constructing pu lic roads and levees in the said State, as the legislature thereof m direct."

Approved February 20th 1811."

An Act for the Admission of the State of Louisiana into the Union and to Extend the Laws of the United States to said State.

Whereas, the representatives of the people of all that part of the territory or country ceded under the name of "Louisiana" by the treaty at Paris on the thirtieth day of April one thousand eight hundred and three, between the United States and France, contained within the following limits, that is to say: Beginning at the mouth of the River Sabine; thence by a line drawn along the middle of said river, including all islands, to the thirty-second degree of latitude; thence due north to the northernmost part of the thirty-third degree of north latitude; thence along said parallel of latitude to the River Mississippi; thence down the said river to the River Iberville; and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by the said Gulf to the place of beginning, including all islands within three leagues of the coast; had on the twenty-second day of January one thousand eight hundred and twelve formed for themselves a constitution and State government, and given to the said State the name of Louisiana, in virtue of an act entitled "An act to enable the people of the Territory of Orleans to form a constitution and State government; and for the admission of the said State into the Union on an equal footing with the original States, and for other purposes," and the said constitution having been transmitted to Congress and by them being hereby approved; therefore: Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the said State shall be one, and is hereby declared to be one of the United States of America, and admitted into the Union on equal footing with the original States in all respects whatever, by the name of Louisiana; *Provided* That it shall be taken as a condition upon which the said State is incorporated in the Union, that the River Mississippi and the navigable rivers and waters leading into the same, and
1143 into the gulf of Mexico shall be common highways and forever free, as well to the inhabitants of the said State as to the inhabitants of other States and the Territories of the United States, without any tax, duty, impost or toll therefor imposed by the said State; and that the above condition and also all other conditions and terms contained in the third section of the act, the title whereof is herein before recited, shall be considered, deemed and taken fundamental conditions and terms upon which the State is incorporated in the Union.

* * * * * * *

SEC. 3. Be it further enacted that the said State, together with the residue of that portion of the country which was comprehended within the Territory of Orleans, as constituted by the act entitled "An act erecting Louisiana into two territories and providing for the temporary government thereof," shall be one district and called the Louisiana district; and there shall be in the said district a district court to consist of one judge who shall reside therein and be called the district judge; and there shall be annually four stated sessions of the said court held at the city of New Orleans, &c.

Resolution.

Taking into view the peculiar situation of Spain and her American provinces, and considering the influence which the destiny of the territory adjoining the southern boundary of the United States may have upon their security, tranquillity and commerce; therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States, under the peculiar circumstances of the existing crisis, can not without serious inquietude see any part of the said territory pass into the hands of any foreign power; and that a due regard to their own safety compels them to provide under certain contingencies for the temporary occupation of the said territory; they at the same time declare that the said territory shall in their hands remain subject to future negotiations.

An Act for Ascertaining the Titles and Claims to Land in that Part of *the* Louisiana which Lies East of the River Mississippi and Island of New Orleans.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of ascertaining the titles and claims to lands in that tract of country which lies south of the Mississippi territory, east of the

River Mississippi and island of New Orleans, and west of the Ri
Perdido and a line drawn with the general course thereof to
southern boundary of the said Mississippi territory to the la
within the said limits, shall be laid off into two land districts,
tween which Pearl river shall be the boundary; and for each
which districts a commissioner for land claims shall be appoin
by the President of the United States, with the advice and cons
of the Senate. The said commissioners shall respectively h
power to appoint a clerk who shall be capable of translating
French and Spanish languages, and who shall, in addition, to
other duties required of him by this act, perform the duties of tra
lator when required by the commissioner. And the said comm
sioner and clerk shall, before entering on the duties of their appoi
ments, respectively take an oath or affirmation truly and faithfu
to execute the duties imposed on them by this act.

SEC. 2. Be it further enacted, That for the more convenient asc
tainment of the titles and claims to the lands aforesaid, it shall
the duty of each of the said commissioners respectively, and th
clerks, to attend in each of the several parishes in his district,
such time and place therein as he shall appoint, for the purpose
receiving notices and evidences of titles and claims to lands wit
the same; and when the commissioner shall have appointed
time and place for his attendance in any parish, he shall ca
public notice thereof to be given to the inhabitants of the same
at least twenty days previous to the time of his commencing
business of his appointment therein.

Resolutions.

1. Resolution for the Admission of the State of Mississippi into the Union.

Whereas, in pursuance of an act of Congress passed on the first day of March one thousand eight hundred and seventeen entitled "An act to enable the people of the western part of the Mississippi territory to form a constitution and State government, and for the

admission of such State into the Union on an equal footing with the original States," the people of the said territory did on the fifteenth day of August in the present year, by a convention called for the purpose, form for themselves a constitution and State government, which constitution and State gove-nement so formed is republican and in conformity to the principles of the articles of compact between the original States and the people and States in the territory north-west of the River Ohio, passed on the thirteenth day of July one thousand seven hundred and eighty-seven,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the State of Mississippi shall be one, and is hereby declared to be one of the United States of America, and admitted into the Union on an equal footing with the original States in all respects whatever.

Approved December 10, 1817.

Louisiana and the Territory Acquired from Mexico.

The Louisiana purchase was effected in 1803. In 1804 it was divided into two parts, that portion which now comprises the State of Louisiana being organized as Orleans Territory, while the balance remained as the Louisiana Territory. The State of Louisiana, comprising most of the Territory of Orleans, was admitted to the Union in 1812, and in the same year it was enlarged by the addition of

the portion lying between the Mississippi and Pearl rivers, in the southeastern part. In the same year the name of Louisiana Territory was changed to Missouri Territory. In 1819 Arkansaw Territory was created, and in 1836 it was admitted as a State.

* * * * * * *

1157 Louisiana.

The original Territory of Louisiana was acquired from France (see p. 21). In 1804, a portion of this, comprising the area of the present State of Louisiana, with the exception of the southeastern portion immediately adjoining the present State of Florida, was organized into a territory under the name of Orleans, while the balance of the Louisiana purchase retained the name of Louisiana Territory. On April 30, 1812, the Territory of Orleans was admitted as a State under the name of Louisiana, and at the same time the name of the Territory of Louisiana was changed to Missouri Territory. In the same year the limits of the State were enlarged in the southeast to its present boundaries.

The following act defines the Territory of Orleans:

All that portion of country ceded by France to the United States, under the name of Louisiana, which lies south of the Mississippi territory, and of an east and west line to commence on the Mississippi river at the thirty-third degree of north latitude, and to extend west to the western boundary of the said cession, shall constitute a Territory of the United States, under the name of the Territory of Orleans. (Eighth Congress, first session.)

The following clause from the act admitting Louisiana defines its original boundaries:

Beginning at the mouth of the River Sabine, thence by a line to be drawn along the middle of said river, including all islands, to the thirty-second degree of latitude; thence due north to the northernmost part of the thirty-third degree of north latitude; thence along the said parallel of latitude to the River Mississippi; thence down the said river to the River Iberville; and from thence along the middle of the said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence, bounded by the said Gulf, to the place of beginning, including all islands within three leagues of the coast. (Twelfth Congress, first session.)

The following is a description of the addition to the State of Louisiana, in terms of the act:

Beginning at the junction of the Iberville with the River Mississippi, thence along the middle of the Iberville, the River Amite, and of the Lakes Maurepas and Pontchartrain, to the eastern mouth of the Pearl river; thence up the eastern brance of Pearl river to the thirty-first degree of north latitude; thence along the said degree of latitude to the River Mississippi; thence down the said river to the place of beginning, shall become and form a part of the State of Louisiana. (Twelfth Congress, first session.)

The north boundary of Louisiana was surveyed by a joint commission of the State and the United States.

HISTORICAL DIAGRAM OF LOUISIANA.

* * * * * * *

1158 Mississippi.

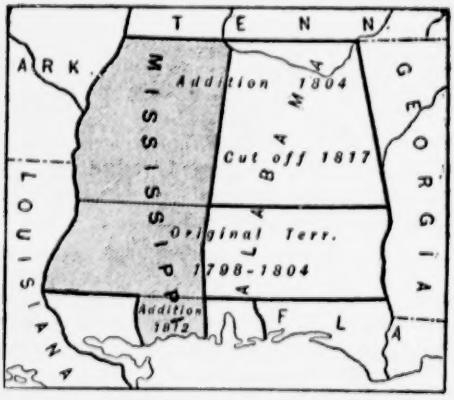
(For the early history of the extent of Mississippi territory *vide* Alabama, p. 108.)

On December 10, 1817, the western part of the Mississippi territory was made a State and admitted into the Union, with the following boundaries, viz:

Beginning on the River Mississippi at the point where the southern boundary of the State of Tennessee strikes the same; thence east along the said boundary line to the Tennessee river; thence up the same to the mouth of Bear creek; thence by a direct line to the northwest corner of the county of Washington; thence due south to the gulf of Mexico; thence westwardly, including all the islands within six leagues of the shore, to the most eastern junction of Pearl river with Lake Borgne; thence up said river to the thirty-first degree of north latitude; thence west along said degree of latitude to the Mississippi river; thence up the same to the beginning. (*Vide* U. S. Stat. at Large, vol. III, p. 348.)

(For further information concerning eastern boundary, *vide* Alabama, p. 108.)

In 1819 the line between Mississippi and Tennessee was run by commissioners. Their report is not at hand. In 1833 the legislature of Tennessee passed an act establishing "Thompson's line." The detail of "Thompson's line" have not been found. In 1837 the line was again run by commissioners from the two States, and ratified by the legislatures. The commissioners' report was as follows, viz:



Commencing at a point on the west bank of the Tennessee river six four-pole chains south, or above the mouth of Yellow creek and about three-quarters of a mile north of the line known as "Thomp-

on's line," and twenty-six chains and ten links north of Thompson's ne at the basis meridian of the Chickasaw surveys, and terminating t a point on the east bank of the Mississippi river (opposite Cow isl-nd) sixteen chains north of Thompson's line. (See Laws of Ten-essee, 1837, p. 27.)

The boundaries were fixed by the act of Congress admitting the tate of Mississippi as follows, viz.

Commencing at the most eastern junction of Pearl river with Lake Borgne, thence up said Pearl river to the thirty-first degree of north atitude, thence west along said degree of latitude to the Mississippi iver, thence up the same to the point where the southern boundary f Tennessee strikes the same. (See U. S. Laws, vol. 6, p. 175.)

Mississippi claims to the middle of the Mississippi river, where he river forms her western boundary. (See Rev. Stat., 1857.)

Orleans Territory.

The house resolved itself into a committee of the whole on bill for admitting the Territory of Orleans as a State into the Uni

Mr. Bibb said it was very far from his intention to oppose the p sage of the bill. On the contrary, he was favorably disposed to but a difficulty had occurred to him, which he would state a reason for delaying decision on the bill for the present; the bill p posed including in the State all that part of the territory which west of the Perdido &c*t*. The President by his proclamation, though he had required its occupation, he declared that the ri should be subject to negotiation. Now if it became a State, wo not all right of negotiation on the subject be taken away from President?

Mr. Barry said that the necessity of the State government, want of proper control by the General Government, and its inabil to attend to the municipal concerns of the territory imperiou called upon Congress to erect it into a State. * * *

Vol. 4, p. 323.

Mr. MILLER: * * * Again sir, there are objections to the as presented that renders it impossible for me to give it my sancti It will be seen sir, that the bill proposes to annex that portio West Florida in dispute between this and the Spanish governm to the State to be formed out of the Territory of Orleans. President has declared to the world, that this portion of the coun in our hands shall be subject to mutual arrangements hereafte be entered into between the two governments. But once anne to a State, and the power to negotiate ceases. What power have to negotiate about the territory of any State? We have none.

Again sir, I never will consent that the bay of Mobile shall annexed to any State which includes New Orleans and the mouth the Mississippi, unless indeed they were included in the same St with the whole country north up to the Tennessee line.

* * * * * * *

I therefore move sir, to strike out the whole of the bill from words "A bill," for the purpose of inserting a section by way amendment, the effect of which will be to consolidate both terri into a single State, which will include the whole country belongi to the United States east of the Mississippi and south of the State Tennessee.

* * * * * * *

1161 Page 324.

Mr. GHOLSON: * * * In no point of view, said Mr. G., in which the subject has been considered can I perceive any reason for adopting the amendment offered by the gentleman from Tennessee (Mr. Miller). If the gentleman will advert to the treaty of cession between France and the United States, and to the act of Congress passed pursuant to that treaty, he will readily discover that the amendment he proposes cannot be sanctioned without a manifest violation of public faith. By the third article of the treaty it is stipulated that "the inhabitants of the ceded territory shall be incorporated in the union of the United States, and admitted as soon as possible, according to the principles of the Federal Constitution, to the enjoyment of all rights, advantages and immunities of citizens of the United States." On the second of March 1805 Congress proceeded by an act of legislation to fulfill this engagement with France; and accordingly by the seventh section of that act provided "that whenever it shall be ascertained by actual census or enumeration of the inhabitants of the Territory of Orleans, taken by proper authority, that the number of free inhabitants included therein shall amount to sixty thousand, they shall thereupon be authorized to form for themselves a constitution and State government, and will be admitted into the Union upon the footing of the original States in all respects whatever, conformably to the provisions of the third article of the treaty concluded at Paris on the thirtieth of April one thousand eight hundred and three between the United States and the French Republic." Now if to the Orleans Territory you add the Mississippi Territory, and of the two erect one State, you evidently will not comply either with your stipulations with the French Republic, or with your covenant to the Orleans Territory * * *

Page 324.

Mr. Bibb conceived that the House could not adopt such an amendment as that proposed, without the consent of Georgia, for without her consent they could not make an addition to or division of the Mississippi Territory. It was true, he said, that he had on a former day proposed to make an addition of territory to the Mississippi Territory, but it was only during such time as it should remain a Territory. To this there could be no objection, as there was no prohibition to it in the compact. It had been his intention, if the House had thought proper to sanction his motion, to have made a proposition to the State of Georgia to admit that territory to be incorporated with the Mississippi. The amendment now offered evidently proposed a violation of the compact with Georgia.

Page 325.

Mr. POINDEXTER: * * * That geographical limits other than those which now divide the Orleans and Mississippi Territories

might be designated to comport more with the future convenie
and prosperity of the country cannot be denied. I would su
for the reflection of the gentlemen who have to act on this su
the expediency of making the great River Mississippi the high
between the Eastern and Western States to be formed on its wa
that no one State should possess both banks of that river.

* * * * * * *

Mr. Miller's motion was not agreed to.

Boundaries of the Province of Louisiana as Contained in a P
Communicated by Mr. Jefferson to Congress.

The precise boundaries of Louisiana westward of the Mississ
though very extensive, are at present involved in some obsca
The data are equally wanting to assign with precision its north
extent. From the source of the Mississippi it is bounded eastwa
by the middle of the channel of that river to the thirty first de
of latitude; thence it is asserted upon very strong grounds that,
cording to its limits when formerly possessed by France, it stretc
to the east as far at least as the River Perdido, which runs into
bay of Mexico eastward of the River Mobile. It may be consis
with the view of this notice to remark that Louisiana, including
Mobile settlements, was discovered and peopled by the Fre
when monarchs made several grants of its trade, in particula
Mr. Crozat in 1712, and some years afterwards, with his acquiesce
to the well known company projected by Mr. Law. This comp
was relinquished in the year 1781. By a secret convention on
third of November 1762, the French government ceded so muc
the province as lies beyond the Mississippi, as well as the islan
Orleans, to Spain; and by the treaty of peace which followed
1763, the whole territory of France and Spain eastward of
middle of the Mississippi to the Iberville, thence through the mid
of that river and the Lakes Maurepas and Pontchartrain to the

was ceded to Great Britain. Spain having conquered the Floridas from Great Britain during our Revolutionary war, they were confirmed to her by the treaty of peace of 1784. By the treaty of St. Ildefonso of the first of October 1800, His Catholic Majesty promises and engages on his part to cede back to the French Republic six months after the full and entire execution of the conditions and stipulations therein contained relative to the Duke of Parma "the colony and province of Louisiana with the same extent that it actually has in the hands of Spain, that it had when France possessed it, and such as it ought to be after the treaties subsequently entered into between Spain and other States."

This treaty was confirmed and enforced by that of Madrid of the twenty first of March 1801. From France it passed to us by the treaty of the thirtieth of April last, with a reference to the above clause as descriptive of the limits ceded.

(1857.)

List of Hurricanes on the Coast of the South Atlantic States and on the North Coast of the Gulf of Mexico.

1700, Sept. 16.—(Ramsey.) Sea rushed in upon Charleston with amazing impetuosity." Many lives lost.

* * * * * * *

1723.—(Burton.) A remarkable hurricane visited New Orleans this year, and nearly destroyed all the buildings.

* * * * * * *

1772, 31 Aug. to Sep. 3.—(Gayarre.) A destructive hurrican in the southern Louisiana, though not so great in the city of New Orleans. The sea was driven over the islands along the Gulf coast. East of Lake Borgne the wind was from the sea (E. S. E.), but further westward it blew with the greatest violence from N. N. E. and E. Towards Mobile it destroyed woodlands for thirty miles inland; and spray was driven four or five miles inland in heavy masses and showers. Mulberry trees subsequentle bloomed and bore a second crop of fruit.

1778, Oct. 7 to 10.—(Galvez, Gayarre.) Cited by Gayarre as very destructive to coast establishments near New Orleans.

1779, Aug. 18.—(Gayarre.) Cited by this author as of less severity than others.

1779, Oct. 7 to 10.—(Galvez and Gayarre.) "It raged with such violence in lower Louisiana that the sea was higher than ever before, entirely destroying all establishments at the Balize, Bayou St. John and Tigouyou."

1780, Aug. 21.—(Gayarre.) This swept over the province of Louisiana, destroying all crops, tearing down buildings, and sinking every vessel or boat which was afloat on the Mississippi river. The Intendant, Navarro issued a consolatory circular to the inhabitants.

* * * * * * *

1811.—(Dr. Burton.) Hurricane cited in Dr. Burton's report at New Orleans.

* * * * * * *

1812, Aug.—(Drake.) At the mouth of the Mississippi the Balize inundated, buildings washed away &c*t*.

* * * * * * *

1821.—(Dr. Burton.) Cited as one of the hurricanes experienced at New Orleans.

1831, Aug. 10 to 18.—(Redfield, 1832, Berlandier.) At Barbadoes Aug. 10; 13 east of Cuba; 14 at west end of Cuba and Havana; 16 near north shore of Gulf south of New Orleans; 17 and 18 continuing on the coast, inundating the Balize, and sweeping away houses, and wasting in heavy rains inland. This did not reach the Atlantic coast, though in all respects like those that do so by the longer route west of Florida. The rate of the movement was 13 & ½ nautical miles per hour by Mr. Redfield's calculation. It was very destructive at the Rio Grande in lower Texas.

1831.—(Burton.) Cited by this author as one of the storms inundating New Orleans.

* * * * * * *

1835, Aug. 12 to 18.—(Redfield; Berlandier.) At Antigua &c*t*. on 12th, 13 Porto Rico, 14 Hayti and Turk's island, 15 Matanzas and Havana, 16 Tortugas and the central districts of the Gulf towards New Orleans, 18 at Matamoras, Mexico. "It went to Galveston, but was not felt at New Orleans." This is one of the hurricanes which were exhausted in the western areas of the Gulf, and on the coast of Texas, without returning eastwardly by the higher latitudes.

* * * * * * *

1165 1837, Sep. 27 to Oct. 10.—(Berlandier, Lopez, Redfield.) Sep. 27 south of Jamaica; Oct. 1 at Yucatan, 2′ & 3′ at Matamoras, destroying the town of Brazos Santiago, and inundat-

ing the coast for many miles inland. (Berlandier.) 5th at Galveston, 6th near New Orleans, 7′ at Mobile, 8th near Charleston, 9 & 10 passing E. N. E. from Charleston, southward of the usual line.

* * * * * * *

1842, Aug. 30 to Sep. 9.—(Redfield, Lopez.) This pursued a nearly direct line from its point of origin in long. 63 W. to the coast of Mexico at Tampico, the track lying between the 21st and 30th parallel. First observed in latitude 25′ 54 long. 63 W. on Aug. 30th. Sep. 1 at Turk's island, Sep. 3 south of Nassau N. P. Sep. 4 between Key West and Havana, 5 S. W. of Tortugas, 6 south of New Orleans in lat. 25, 7 S. E. of Matamoras between Matamoras and Tampico, 9 wasting at 60 miles inland from Tampico. This inundated the coast of the lower Rio Grande. The body of the hurricane passed over the south part of the peninsula of Florida on Sep. 4th. Its track was nearly due west at a mean rate of 10½ statute miles per hour. (Redfield.) * * *

1846.—(Barton.) Cited by this author as inundating the coast near New Orleans.

* * * * * * *

1856, Aug. 9–12.—(Barton's New Orleans Papers &c.) This hurricane produced a fatally destructive inundation of portions of the coast south of New Orleans, last island (Island Derniere) particularly. At New Orleans 13 inches of rain fell. (Barton.)

From the New Orleans Picayune.

October 7th, 1837.

Last night was really tempestuous and dreadful; the rain continued to pour a torrent until 12 o'clock, when the wind blew from the N. W. a terrible gale. Chimney tops were blown off, awnings ripped up, and the roofs of many buildings greatly injured; and the wind whistled, howled, roared &c. * * *

Effect of the Storm.

Since writing the article on the weather, we have been informed that the damage done to property is much more general than we had supposed. The masts of several ships anchored at our wharves were swept away, and some broke from their moorings. Two steamboats were sent adrift from the other side of the river, and were much damaged. The roofs of several dwellings in the lower part of the city were carried away, being found in some instances a hundred feet from where they were placed. Fences and trees were blown down, and several of the latter were torn up by the roots. * * *

Great Destruction of Property.

Further Effects of the Storm.

Just as our paper was going to press, a gentleman informed us that the destruction of property at the railroad on Lake Pontchartrain by the storm last night has been very great. All the boats at the piers were completely wrecked, and driven into the woods, except the South Alabama.

The steamers Merchant and Mobile, the two best boats in the trade, and the Columbia and Pontchartrain are a total wreck, being so much injured as to be unfit for further use. The waves
1166 are mountain high in the lake. All the houses at the railroad were blown down, except two. The scene is one of distress and uncommon ruin. The water is three or four feet above the railroad. We are pained to hear this news, but cannot wait to give particulars.

New Orleans Picayune, Sept. 10th, 1846.

Wreck of the New York, 18 Lives Lost.

By the arrival of the steamship Galveston, Captain Wright, yesterday morning from Lavacca and Galveston, the sad intelligence was received of the total loss of the steamship New York, Captain Phillips. By this calamity no less than eighteen lives were lost. The following statement of the circumstances of this deplorable event was prepared by the clerk of the New York, and was promptly issued by us yesterday in an extra:

The steamship New York, Captain Phillips, left Galveston on Saturday September 5th at 4 p. m., and at half past 10 o'clock p. m. came to anchor about fifty miles eastward of Galveston, eleven fathoms of water; blowing very heavy from E. N. E. with a very heavy sea running eastward. At 10 a. m. on Sunday 6th the wind having lulled in a great measure, weighed anchor and proceeded on our course. At 11 a. m. finding she had no headway against the sea and wind, came to anchor in ten fathoms of water, it blowing a gale from N. E. At 12 o'clock midnight she commenced dragging her anchor; fired up strong, and commenced working the engines to keep her up to her anchor. At 2 p. m. the wind hauled to the S. W. which hove her in the trough of the sea. Slipped her cable, and set her jib, in hopes to get her before the wind; split the jib. At this time the sea struck the caboose and carried it away; sprung the boat, and caused her to leak. Let go the best bower, and paid out seventy five fathoms of chain, in hopes to bring her head to the sea; but owing to the violence of the wind, she would not come in. At 4 p. m. a heavy squall carried away the smoke pipe, fouled the promenade deck, stove in the starboard guard and wheel-house,

using the boat to leak so badly as to extinguish the fire. All hands went to bailing and working in hopes to get her free, until the wind and sea abated, which was of no avail, for at 6 o'clock p. m. she went down in ten fathoms of water.

New Orleans Picayune, Tuesday, Aug. 11th, 1856.

The Weather.

Frickleness is proverbially characteristic of mete-riological phenomina; and we have just had a very palpable illustration of the fact. It was but Saturday last that we were congratulating ourselves on the moderate heat and gentle showers with which we had been favored, and on Sunday a storm commenced which continued with scarcely abated fury nearly all the day and yesterday, and promises to last for some time to come, although last evening it hauled up. For thirty hours the wind roared and howled and whistled, &c.

167 New Orleans Picayune, August 14th, 1856.

Last Island Inundated.

Shocking Loss of Life.

The rumor which prevailed yesterday of the destruction of Last Island in the late storm is probably too true. We have only some general reports of the greatness of the disaster, and a few vague particulars of the loss of individuals and families. The accounts brought from Thibodaux and Berwicks bay by the Opelousas railroad are confirmatory of the inundation of the island, the destruction of the buildings and the probable loss of a great many lives reaching perhaps to six or seven score. In the mean time the anxiety to learn the particulars is very great, and the means of communication between the city and the scene of suffering are very slight. Last island is an island in the gulf of Mexico which has been for some years made a summer resort for planters and their families from the interior parishes of Louisiana and Attakapas, and some from this city. It is distant from the main land at the mouth of the bayou about twenty miles. The nearest land is five or six miles distant. The island is about twenty five miles in length, and from one half to three quarters of a mile wide—only three or four feet above the level of the Gulf. It is exposed to the full sweep of the waters, and the southern breezes, which have made it a desirable retreat in the summer months. * * *

The depth of the water on the island, referring as we understand it, to the highest point, is reported at five feet. The wreck of the steamboat Star is stated to be lying on the island near where the hotel of John Muggah formerly stood.

The rise of the inundation is said to have been of unparalleled rapidity, the height of five feet being reported to have been attained in two minutes. Although we were to read "hours" instead of "minutes," it will not be difficult to understand what a wild excitement and fearful havoc it must have caused, with no succor on hand. All the houses on the island are swept away, and it is particularly reported that most of those staying at the hotel were drowned. * * *

The Picayune of Aug. 15th, 1856 gives further particulars, and a list of the missing.

New Orleans Picayune, October 2, 1893.

Along the Coast.

The Terrible Experience of the Louisville & Nashville Train.

All Louisville & Nashville trains, passenger and freight, due in the city after ten o'clock were late from three to five hours. Passen- train No. 5, which was due at 10.25 a. m. did not get in until after one o'clock, while three freight trains, all due before ten o'clock, did not show up until after 12. Last night was a severe one on trains. From engineers and crews arriving last night at midnight it was learned that a perfect gale followed all along the line as far as Chef Menteur, twenty miles out of the city. At this place they found the gale so rough that it was impossible to proceed, the wind coming against them from right angles. Freight trains numbers 12, 15 and 2 were all blockaded at or near this point by the violence of the storm, and it was only by each assisting the other that they run into this city.

1168 Speaking of the storm, one engineer said he never experienced such a night; it was simply terrific. So great was the roar of the wild winds as they swept over the black marshes that "when I'd give a signal for brakes, they could not hear it. You could not see your hands before you. All the rain came in torrents—not falling but blowing square in your face, and the wind simply made it impossible to walk a car. The ma-sh country was a jet black wilderness of howling winds. We could only make it by helping one another." This same engineer said that there was imminent danger at one time as they crept slowly through the furious gale towards the city, of the cars being blown from the tracks at points where there were sharp turns in the rails.

The Louisville & Nashville wires were not injured however by the storm. Mr. Hobbs, the Louisville & Nashville's well known train dispatcher had possession of the wires until one o'clock. From him it was learned that at Bay St. Louis there was a gale blowing, one of the fiercest known there for years. At Mississippi City also the rain and storm held high carnival.

* * * * * * *

Trainmen all state that the waters along the lake coast and the Gulf were lashed into a perfect overflow of water.

New Orleans Picayune, October 3, 1893.

The Whole Coast Swept by the Storm.

Sad Havoc Among the Resorts Over the Lake.

All the Way from Chef Menteur to Mobile.

The Bridges at Bay St. Louis and Biloxi Reported Damaged.

And Traffic Likely to Be Interrupted for Some Days to Come.

One of the most disastrous washouts in the history of the Louisville & Nashville railroad occurred during the terrific wind and rain storm along the coast Sunday night and Monday morning. The extent of the damage can not be ascertained yet, but from the statements of trainmen it is thought that the entire roadbed between Scheaud and Mobile is in an unpassable condition. Railroad men report that the Bay St. Louis bridge is gone, and part of the Biloxi bridge has been washed away.

* * * * * * *

New Orleans Picayune, October 4, 1893.

Grand Isle—Bayou Cook.

The Two Settlements Swept by Wind and Waves.

And Many Lives Lost in the Terrible Calamity.

Nothing Left of Fort Livingston but the Light.

Grand Bay and Island Settlement Destroyed.

And Much Ruin Wrought to Valuable Property.

Bodies Beginning to Float in from the Wrecks.

Parties who escaped from horrible death bring the stories of many tragedies. The fearful storm which many years ago washed Last Island from the face of the sea in a single night has ever been looked upon as a most terrible calamity in the history of Louisiana. The Last Island disaster has a parallel. Along the shores of Bayou Cook, Oyster bayou, Bayou Challon, Adam's bay and Grand bay, have lived for a number of years several hundred Italian and 50 Austrian fishermen. Of these inhabitants a very small percentage survived the terrible storm of Sunday night. It was 5 o'clock in the afternoon of Sunday when the weather assumed a

threatening aspect. The wind was blowing from the southeast at a lively, but not dangerous rate, and the tide much higher than usual. Later in the night the wind shifted to the northward and began blowing very heavily. Again, about midnight, the course was changed, and in a southwesterly direction, this taken as a steady course. By this time the blast howled over the miles of marsh at the rate of a hundred miles an hour. Within an hour after the wind had taken its permanent course the tide rose five feet, covered the settlements along the shores of the bayous and bays, and was making its way rapidly towards the tracks of the New Orleans, Port Jackson and Grand Isle railroad. A locomotive and three cars were lying on the side track of the little village where the road terminates. During the night many people were carried from their demolished homes to these cars, which served as temporary shelter for fully fifty destitutes, the engineer and porter acting as Samaritans.

New Orleans Picayune, October 6, 1893.

St. Bernard's Island.

Two Thirds of the Houses Washed Away.

At 174 Marigny lives John Alphonso, who is engaged in the vegetable business. He received a letter yesterday from the firm of V. Gonzeles & Co. of St. Bernard parish, in which is con-
1170 tained the information that the island of St. Bernard received severe damage from the storm. Of the sixty houses on the island only nineteen are left standing; the rest were all washed from their foundations, and many of them washed away. No lives were lost however.

New Orleans Picayune, October 7, 1893.

Death Work at Biloxi &c*t*.

(Page 2.)

* * * * * * *

From Cat island the rescuing party left at four o'clock Thursday morning for the Louisiana marsh. At the mouth of Grand pass three bodies were found and buried; two of the unfortunates were recognized as Frank and Paul Guatan, known as the Rubio brothers of Biloxi. The other body was in such a condition as to be unrecognizable. The unknown dead was a man of about *firty* years, slightly gray and partially bald, with heavy stiff mustache and side beard.

At Brush island five new graves were seen, one near Doe point, three at Caraco bay, five at Creole gap, four at Mitchell keys, one at Drydock, and five at Johnson bayou, all victims of the storm.

Leaving Grand pass the wreck of the lugger Sunnyside of New Orleans was seen. Three of the crew were drowned in Caraco bay, the captain only having been saved.

THE STATE OF LOUISIANA.

Patent (Vignette.) No. 4955.

To all to whom these presents shall come, Greeting:

Whereas, Henry J. Leovy of the parish of Orleans in the State of Louisiana, purchased per certificate No. 4287 N. S. D., Jan. 26, 1883, three islands in sections twenty, twenty one, twenty eight and twenty nine of section No. 20, 21, 28, 29 in township No. 10 S., range No. 20 E., in the S. E., E. of R., land district, containing 51 acres according to the official plat of the survey of said lands in the State land office.

Now know ye, that the State of Louisiana in consideration of the premises and in conformity with law in such case made and provided, has given, granted and sold, and by these presents does give, grant and sell unto the said Henry J. Leovy and to *their* heirs, the above described land, to have and to hold the same together with all the rights, titles and privileges thereunto belonging unto the said Henry J. Leovy and to *their* heirs and assigns forever.

In testimony whereof, I, Samuel Douglas McEnery, governor of the State of Louisiana, have caused these letters to be made patent, and the seal of the State land office to be hereunto affixed.

Given under my hand at the city of Baton Rouge on the 26 day of Jan'y in the year of our Lord, one thousand eight hundred and eighty three and of the Independence of the United States the one hundred and seventh.

By the governor:

S. D. McENERY.

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1906.

No. 11, ORIGINAL.

STATE OF LOUISIANA, COMPLAINANT,

vs.

STATE OF MISSISSIPPI.

IN EQUITY.

Vol. II.

(Pages 1069 to 2141, Inclusive.)

BILL FILED OCTOBER 22, 1906.

1186 DOCUMENT No. 52.

Patent No. 5093.

THE STATE OF LOUISIANA.

Patent Number 5093.

To all — whom these presents shall come, Greeting:

Whereas, Joseph C. Gilmore, of the parish of Orleans, in the State of Louisiana, purchased per certificate No. 2804, N. S. L. dated 27th April 1894, the east fractional half of northwest fractional quarter—tidal overflow—of section No. four, in township No. eleven, south of range No. twenty east, in the southeastern, east of River Land district, parish of St. Bernard, containing thirty three acres, according to the official plat of the survey of said lands in the State land office.

Know ye, that the State of Louisiana, in consideration of the premises, and in conformity with law in such cases made and provided, has given, granted and sold and by these presents do give, grant and sell, unto the said Joseph C. Gilmore and to his heirs, the above described land to have and to hold the same, together with all the right, titles and privileges thereunto belonging, unto the said Joseph C. Gilmore, and to his heirs and assigns forever.

In testimony whereof, I Murphy J. Foster governor of the State of Louisiana, have caused these letters to be made patent, and the seal of the State land office to be hereunto affixed.

Given under my hand at the city of Baton Rouge, on the 27th day of April, in the year of our Lord 1894, and of the Independence of the United States of America the 118th.

By the governor

1232 DOCUMENT No. 59.

STATE OF LOUISIANA,
Parish of St. Bernard.

Cash Sale of Lands by Board of Commissioners for the Lake B
Basin Levee District to George Ruppel.

Be it known that on this 7th day of March A. D. 1902, befo
James D. St. Alexandre a notary public in and for the parish
Bernard, State of Louisiana, duly commissioned and qualified
sworn personally came and appeared: Mr. John Dymond pres
of the Board of Commissioners for the Lake Borgne Basin Leve
trict a corporation created by act No. 14 of the General Asse
of the State of Louisiana approved June 21st, 1892, domiciled i
city of New Orleans; the said appearer acting in his afo
capacity by virtue of a resolution adopted by the said Board of
missioners for the Lake Borgne Basin District, at their sitti
Friday February 21st 1902, a certified copy whereof is hereun
nexed and made a part hereof.

Which said appear-s, acting in his aforesaid capacity, in the
and on behalf of the said Board of Commissioners for the Lake B
Basin Levee District, declared that for the consideration and
terms and conditions hereinafter expressed, he does by these
cuts grant, bargain, sell, convey, transfer, assign and set over,
out any warranty whatsoever, unto: Mr. George Ruppel,
present, accepting and purchasing for himself, his heirs and as
and acknowledging delivery and possession thereof, the follo
described lands, to wit:

The east half of section thirty three (33) containing abou
hundred acres, and the west half of section thirty four, conta
about two hundred acres, in township (11) eleven, south of ra
east.

The north west quarter of section three (3) containing seventy acres, more or less, and

The north east quarter of section four (4) containing one hundred and fifty acres, more or less, in township twelve (12) south range twenty east.

All of the above lands are in the south eastern land district east of river, and contain six hundred and twenty acres, more or less. The whole according to the map filed in the office of the Board of Commissioners for the Lake Borgne Basin Levee District.

It is distinctly understood by the parties hereto that the Board of Commissioners for the Lake Borgne Basin Levee District, through their said president transfer, assign and set over, only those rights and interests which the said board now have in and to the aforesaid lands, giving hereby simply a quit claim, and making and giving no warranty whatsoever; and further, that should the said title be subsequently declared void, the said board shall not reimburse to the purchaser any sum whatever. It is further distinctly agreed and understood between the parties hereto that this sale is made and accepted subject to all the existing and necessary rights of drainage of property holders, which shall not be injured in any way, shape or form, that is to say, the purchaser does hereby accept the sale of the above described lands subject to the servitudes of drainage from the river and Terre aux Boufs Ridge edge, and that the survey of said lands shall be made at the expense of the purchaser, by a surveyor who must be acceptable to the vendor, and in the absence of any survey, any error in location, quantity, or description, shall be at the risk of the purchaser.

1233 This sale is made and accepted for and in consideration of the price and sum of seventy seven & 50 100 dollars ($77.50) cash, which the purchaser has presently paid in ready and current money, unto the said John Dymond, president who hereby acknowledges the receipt thereof and grants full acquittance and discharge therefor.

By reference to the certificate of the clerk and recorder of the parish of St. Bernard, it appears that the herein above described lands were not alienated by the State of Louisiana, except by a sale thereof to the Lake Borgne Basin Levee District Commissioners; and by the same certificate it does not appear that the Lake Borgne Basin Levee District Commissioners have alienated the same from the time of their acquisition thereof.

The taxes of the current year 1902 are assumed by the purchaser. To have and to hold the said above described lands his heirs and assigns forever.

Thus done and passed at the parish of St. Bernard on the day, month and year first above written in the presence of Messrs. Nemours H. Nunez, and Esteve E. Nunez, competent witnesses of lawful age, residing in this parish, who have signed their names hereto,

ith the said appearers and me notary after due reading of the hole.

GENERAL LAND OFFICE, May 7th, 1852.

I, John Wilson, acting Commissioner of the General Land Office, do hereby certify that the foregoing is a correct copy of the list of swamp and overflowed lands, selected for the State of Louisiana, under the act of Congress approved March 2nd, 1849, entitled "An act to aid the State of Louisiana, in draining the swamp lands therein"—in the district of lands subject to sale at New Orleans, Louisiana, taken from the original list on file in this office, which original list was submitted to the Secretary of the Interior, on the 4th day of May, 1852, for his action and decision thereon, and was by him returned on the 6th day of the same month, with a letter and an endorsement thereon, advising this office that he had approved the same in accordance with the provisions of the second section of the act aforesaid, and which list now remains on the files of this office.

In testimony whereof I have hereunto set my hand and caused to be affixed the seal of the General Land Office, at the city of Washington the day and year above written.

[SEAL.] (Signed) JOHN WILSON,
Acting Commissioner.

STATE OF LOUISIANA, }
City of Baton Rouge. }

I, Jas M. Smith, register of the State land office, do hereby certify that the annexed twelve pages *is* a true and correct extract, showing the approval, under the swamp land grant of 1849, of lands in T. 11 S., rgs. 17, 18, 19 & 20 E.; T. 12 S., rgs. 16, 17, 18, 19 &
20 E.; and T. 13 S., rgs. 16, 17, 18, 19 & 20 E., as appearing
1245 in record of "Swamp Lands, Approvals and Rejections, South Eastern District, Louisiana, vol. 1," on file in this office.

Given under my hand and seal of office, this 26th day of April, A. D. 1904.

[Seal of the Land Office, State of Louisiana.]

JAS. M. SMITH,
Register of the State Land Office.

(Endorsed:) Document No. 63 Offered by the State of Louisiana. April 28, 1904. Frank H. Mortimer, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905, James H. McKenney, clerk.

Parish of St Bernard

1279 DOCUMENT No. 66.

UNITED STATES OF AMERICA,
State of Louisiana,
Parish of Orleans, City of New Orleans.

Be it known, that on this sixteenth day of the month of January, in the year of our Lord, one thousand nine hundred and of the Independence of the United States of America, the one hundred and twenty-fourth,

Before me, William F. Brewer, a notary public, duly commissioned and qualified, in and for the parish of Orleans, State of Louisiana aforesaid, therein residing, and in the presence of the witnesses hereinafter named and undersigned: Personally came and appeared: Charles Sanger, a resident of Bay St. Louis, Mississippi,, temporarily in this city of New Orleans, La., of full age of majority who declared, that he does, by these presents, grant, bargain, sell, convey, transfer, assign, set over, abandon and deliver, with all legal warranties and with full substitution and subrogation in and to all the rights and actions of warranty which he has or may have against all preceding owners and vendors unto Albert L. Hunt, of Richmond, Va. Charles F. Forsythe and John McGraw, both residents of this city, here present, accepting and purchasing for themselves, their heirs and assigns, and acknowledging due delivery and possession thereof, all and singular *one undivided one-fourth (1/4) to each* of the following described property or lands situated in the parish of St. Bernard, Louisiana, *to-wit:* Fractional south half of north east quarter and fractional south half of section fifteen, east half; fractional southwest quarter and fractional east half of north west quarter of section twenty-one; all of sections twenty-two, twenty-seven and twenty-eight. north half of section thirty-three, north half of section thirty-four, containing three thousand, four hundred and forty acres, and the south half of north west quarter and south west quarter of section twenty-three; west half of north east quarter and west half of section twenty-six; west half of north east quarter and north west quarter of section thirty-five, containing eight hundred and eighty acres. All situated in township No. eleven south of range No. nineteen east in the south eastern land district east of Mississippi river and aggregating four thousand, three hundred and twenty acres according to the plats of U. S. surveyor general on file in the office of the Board of Commissioners for the Lake Borgne Basin Levee District.

Being the same property which was acquired by the present vendor by purchase from the Board of Commissioners for the Lake Borgne Basin Levee District, by act under private signature, of date September 16, 1898, and on same date, before Chas. B. Upton notary public in New Orleans, the signature- of the subscribing parties were sworn to by Jos. R. Bres, one of the witnesses in said act; registered

in the parish of St. Bernard, La., on December 8, 1898, in Conveyance Book, No. 19, folios 349 *et seq.*

To have and to hold the above described property unto the said purchasers, their heirs and assigns forever.

This sale is made and accepted for and in consideration of the price and sum of *four hundred and five dollars* (*the sum of one hundred and thirty-five dollars being paid by each of* the purchasers herein) cash, which the said purchasers have well and truly paid, in ready and current money, to the said Chas. Sanger who hereby acknowledges the receipt thereof and grants full acquittance and discharge therefor.

The said *Chas. Sanger* here declared, that he has been 1280 married but once and his said wife is alive and residing with him in Bay St. Louis, Miss.

All State and city taxes up to and including the taxes due and exigible are paid as per declarations of the parties hereto.

The mortgage, conveyance, and tax certificates are waived by the parties hereto, who exonerate me, notary, from all responsibility for their non-production.

Thus done and passed, in my office, in the city of New Orleans on the day, month and year herein first above written, in the presence of Messieurs *James H. Nobles* and Oliver T. Nobles, competent witnesses, who hereunto signed their names with the said appearers, and me, notary, after reading of the whole.

(*Original signed*) CHS. SANGER.
JOHN McGRAW.

Darby, William, author of various geographical works from 1816 to 1821—now superseded by others adapted to the advancement of the country, and also editor in 1823 of Brook's Gazetteer. He was an able engineer and was employed in surveying the boundary between the United States and Canada. He also served in the army under General Jackson in Louisiana.

(Endorsed:) Extract from Appleton's Cyclopedia of Biography 1856. Document No. 67 offered by State of Louisiana, May 30, 1904. Frank H. Mortimer, commissioner. Office Supreme Court U. S. Filed Mar. 13, 1905. James H. McKenney, clerk.

1282 DOCUMENT No. 68.

Extracts from a Geographical Description of the State of Louisiana, the Southern Part of the State of Mississippi, and Territory of Alabama, &c.,

Together with

A Map

From Actual Survey and Observations, Projected on a Scale of Ten Miles to an Inch, of the State of Louisiana and Adjacent Countries.

Second Edition, Enlarged and Improved.

By William Darby.

New York, 1817.

Preface to First Edition.

* * * * * * *

Page IX.

A period of near eleven years has now elapsed since this work was first undertaken. Most of that time has been employed in the collection of materials, &c.

Page 52.

To the left of the Mississippi river, and right of Lakes Maurepas, Pontchartrain and Borgne, the country, except upon the margin of the streams, where timber is alone found, presents one vast grassy marsh, interspersed with lakes.

1283 Page 71.

(Under the head of "Parish of Plaquemines," which included the present parish of St. Bernard.)

The settlements are confined to the banks of the Mississippi, above Fort St. Philip, and those of Terre au Bœuf, above its confluence with Lake Lery. Some lands fit for culture exist on Bayou Bastien; but not of great extent, and remain mostly unoccupied. The border of the Mississippi and Terre au Bœuf are similar in soil and timber. When receding but a short distance from either, the surface of the earth sinks to a level with high tide; and is devoid of wood, is covered with grass, and is an irreclaimable morass.

Page 72.

Fort Darby, at the confluence of Terre au Bœuf, and the discharge of Lake Lery, was built during the campaign of 1815, under the direction of the author of this work, by order of General Jackson, to prevent the advance of the enemy through the Terre au Bœuf, or Riviere aux Chenes.

Page 308.

The islands of Malheureux, Marianne, and Cat-island, are included in the bounds assigned to both the States of Louisiana and Mississippi. There must have been some oversight in framing the respective acts, which marked the possessions of each State.

The islands are in themselves of no great consequence, they are mere banks of sand, decorated with sea myrtle and a few pine trees. There are two good harbours contiguous to Cat-island, but its position will render them in a great measure useless to navigation, except as a temporary shelter to vessels approaching the coast.

On the map accompanying the book is the following entry on the peninsula which is part of the present parish of St. Bernard: "This peninsula has never been surveyed N. E. of Bayou Terre au Bœuf; the coast and interior remain but imperfectly known. The surface is flat, and but little elevated above the level of the sea.

Page 357.

Explanation of the Map.

The principles upon which the large map of Louisiana and adjacent regions has been framed, demand a more explicit development than will be found in the body of the work.

The points upon the 31° N. latitude, were laid down from Ellicott's survey. The same *like* was subsequently to Ellicott's survey, extended to the Sabine river by the authority of the United States Government. From the line of 31° N. lat. was made the general survey of the State of Louisiana, the State of Mississippi, and
1284 the south part of Alabama territory, &*ct.* * * *

I was myself one of the surveyors employed in the work from 1806 to 1814, &*ct.* * * *

I was obliged, however, to make very expensive admeasurements beyond the work performed in virtue of the laws of the General Government. The State of Louisiana south of Red river, and west of the meridian of Nachitoches, has never been surveyed except by myself. The waters of the Sabine, the mouth and western branches of the Calcasiu river, were surveyed by me in 1812 and 1813; and at my sole expense. The same process I was obliged to perform with many other parts of the country; particularly West Florida, Mobile bay, *the islands between Mobile bay and the mouth of the Mississippi*, and the numerous outlets of the latter stream. The parish of Orleans, and the coast of the gulf of Mexico from the mouth of Lafourche to Baritaria inclusive, was laid down from a survey made by Mr. B. Lafon, in virtue of an order of the supreme court of the then Territory of Orleans, &*ct.* * * *

Page 19.

The inside passage from New Orleans to Mobile and Blakely, and of consequence to all the country upon the waters of Mobile, Alabama and Tombigby rivers, is perfectly safe and commodious for small vessels. The depth of water in the passes of Christian and Heron is not sufficient in ordinary times for vessels of more than six feet draught. The force of the sea is broken by the long peninsula that bounds Lake Borgne on the south-east, and by a chain of islands consisting of Malheureux islands, Marianne islands, Cat-island, Ship island, Isle aux Petit Bois and Dauphin island. The bottom of this strait is soft sand.

A singular circumstance communicated to the author by an intelligent commander of a vessel respecting the nature of the component parts of the banks upon the islands and main shores, may be of some use to persons navigating in this place. The person who made the communication had navigated frequently between New Orleans and Mobile; and observed that in the darkest night he could always determine on which side of the strait the vessel was; as along the islands there were no shells mixed with the sand, whilst broken shells were invariably brought up by the lead when on the main shore. This information is introduced here with the more confidence, because perfectly corresponding with the observations of the author.

The southern shore of Lake Pontchartrain is low land, scarcely rising above common tides, with very little timber. There are two passages from Lake Pontchartrain into Lake Borgne, the pass of the Rigolets and that of Chefmenteur. The latter is of little consequence, not having more than four feet of water at its respective bars. The Rigolets are properly the mouths of Pearl river, and afford nine feet water at each extremity. This pass either in a commercial, naval or military view, is of great consequence; it is in fact, after the Mississippi the most important inlet of Louisiana, and ought to be strongly fortified.

Lake Borgne is a prolongation of the strait reaching from the Rigolets to Mobile. It is thirty five miles in length from Cat island to the mouth of Bayou Bienvenu, with a medial width of twelve miles. Lake Borgne is checkered with two groups of small islands, Malheureux and Marianne islands. It is extremely shoal; excepting a narrow channel running along its north-western border, there is not more than two feet of water to be found in the whole expanse of the lake. Lake Borgne is terminated on N. E. by the beautiful Bay St. Louis; on the east by Cat island, and S. E. by a long flat peninsula already noticed.

There are three passes from the east extremity of Lake Borgne the pass of Christian, the pass of Marianne, and that of the south-east. The former is generally used in navigating between Mobile and New Orleans. There is excellent anchorage on the south-west and north of Cat island. The island itself is a mere bank of sand, but might be rendered of importance by its position. It was to the south of this island that the British ships of the line lay during the campaign of 1814–15 in Louisiana; their smaller vessels took shelter on the north side of the island.

1286 Page 16.

From the mouth of the Mississippi river a strong current sets westwardly along the shores of the Mexican gulf, carrying with it timber brought by that stream. That this current is uniform is proved by the fact that none of the debris thrown into the Gulf by the Mississippi is found to the north-east of the mouth of that river,

whilst to the west the whole coast is strewed with cottonwood, cypress and other trees, with rails, planks, pieces of flat-bottom boats, and in fact wood in all its forms into which it is generally wrought and left exposed to be swept away by the flood.

Page 16.

It would appear from an inspection of a map of the gulf of Mexico and Carribean sea, that the current flows from the latter into the former between Cape St. Antoine, and assuming a northern direction, reaches the shore of Florida between Apalachicola and Mobile rivers, and there divides; one part traversing the western shore of East Florida, encounters and is carried away by the Gulf stream between Florida point and the island of Cuba; but much the largest mass turns to the west, passes along West Florida, Alabama Territory, the State of Mississippi, Louisiana, and the province of Texas, until reaching the bay of St. Joseph, it winds with the coast to the south along the shore of the vice-royalty of Mexico, and finally sweeping the bay of Campeachy and the western and northern shores of Yucatan, meets the current from which it originated. This current is the parent of the Gulf stream, and divides the gulf of Mexico into two immense, but unequal, whirlpools.

Page 16.

The settlements continue in descending the Mississippi, from New Orleans compactly on both banks of the river to Point lè Hache. Terre aux Bœuffs is a settlement, which is connected with those on the Mississippi, and winds along both banks of a small ancient outlet. The lands upon the Terre aux Bœuffs are excellent. Sugar, cotton, and cattle are the staples of the settlement, and some fine sugar houses are established. The adjacent country towards Lake Borgne and Chandeleur bay is an open grassy morass.

Page 41.

As to families, the provision of musqueto curtains is absolutely indispensible. * * *

The author was one who learned, from dear bought experience, this useful addition to his traveling equipments. During a resi-

dence of nearly sixteen years. in the region near and in the delta of the Mississippi, the only indisposition of any great consequence he ever experienced, was in first descending the Mississippi to Natchez; and his sickness was then occasioned by the pain and venom of the sting of the musquito.

Treaty between the United States and Spain, February 22d, 1819.

Article III.

The boundary line between the two countries west of the Mississippi shall begin on the gulf of Mexico at the mouth of the River Sabine in the sea, continuing north, along the western bank of that river, to the 32d degree of latitude; thence, by a line due north to the degree of latitude where it strikes the Rio Roxo of Nachitoches or Red river; then following the course of the Rio Roxo westward to the degree of longitude 100 west of London and 23 from Washington; then crossing the said Red river and running thence by a line due north to the River Arkansas, then following the course of the southern bank of the Arkansas to its source in latitude 42; and thence by that parallel to the South sea. The whole being as laid down in Melish's map of the United States published at Philadelphia improved to the first of January 1818, &c.

(Endorsed:) Treaty between the United States and Spain February 22d 1819. Document No. 71. Offered by State of Louisiana May 30 1904. Frank H. Mortimer commissioner. Office Supreme Court U. S. Filed Mar. 13 1905, James H. McKenney, clerk.

1289 DOCUMENT No. 72.

Extract from Report upon the Physics and Hydraulics of the Mississippi River, &c., &c., by Capt. A. A. Humphreys and Lieut. W. L. Abbot.

Page 482.

As already explained in chapter 2, the tides of the Gulf at the mouths of the Mississippi are of the diurnal, or single day type, being when the moon's declination is least, scarcely perceptible, and when greatest, about 1.5 feet.

The investigations of the Coast Survey have also shown that the tidal wave approaches the mouths of the Mississippi from a south-easterly direction. With this tidal wave there is near the coast a tidal current in the same general direction. The tidal wave lifts up the river current in the Gulf, and the tidal current passes under it, though checking it to some extent in so doing. The direction of this current, is modified by its contact with the river current, and to a greater degree, by its contact with the outer slope of the bar deposit. In the case of the South-west pass, a flood tide brings a current from the south-east, which is changed to a south-westerly direction, more westerly than that of the river current, by the bar deposit along the eastern side of the mouth of the pass. The ebb tide is accompanied by a current from the opposite direction, which is similarly diverted by the deposit on the western side of the mouth of the pass, the direction being more southerly than the current of the river. Winds may change the direction and force of these currents, which in mid-river current, at a depth of 40 feet, are shown by observations to vary from 0.3 to 2.5 ft. per second, the mean being about 0.5. As a velocity of 0.5 of a foot per second is sufficient to transport the material of which the bar is formed, the action of Gulf currents in carrying into deep water the material pushed by the river into the Gulf, is apparent.

26TH CONGRESS, 1st *Session.* (SENATE.) (163.)

Document Relating to a Survey of the Coast of the State of Mississippi.

February 10, 1840.

Presented by Mr. Walker, Referred to the Committee on Commerce, and Ordered to be Printed.

Report of John Wheeler, Esq., of His Surveys of the Mississippi Seacoast.

December 13, 1839.

The undersigned, having been commissioned by your excellency engineer to survey the coast and harbors of Mississippi, by author-

ity of the act of the legislature, entitled "An act to provide for a survey of the Mississippi coast," begs leave to report that he has performed that duty, and herewith presents a chart, representing the result of his survey.

The language of the act, and the limited means provided for this work, do not justify the opinion that a very minute survey was designed, and only such a one as would enable the legislature to determine whether the State has within her limits any harbor or harbors suitable for and adapted to commercial purposes. With this view of the subject, the undersigned, at an early day after his appointment, proceeded to the task assigned him, and has made a survey sufficiently accurate to solve the question involved in the act of the legislature.

The State possesses a seashore of seventy miles on a direct line from east to west, and more than one hundred including the meanderings of the coast. In the main, this shore presents a high, healthy, and well timbered bluff, free in a great measure from the low and marshy swamps peculiar to southern latitudes.

1291 It is protected in its whole extent by a chain of islands extending from Dauphin island on the east to Cat island on the west. These, by their position to the coast, furnish many and various harbors, all more or less suitable for the anchorage of vessels, according to the depth of water found in them, which depth is clearly designated on the chart.

It will be perceived, on an examination of the chart, that the State has within her limits three bays of some magnitude—the bay of Pascagoula, the bay of Biloxi, and the bay of St. Louis: to these may be added that portion of Lake Borgne near the mouth of Pearl river. These, of themselves, without the aid of the islands off their junction with the Gulf, form safe and convenient harbors for the reception and anchorage of steamboats and other vessels of a minor class; but the depth of water through the channels communicating with them is not sufficient for the safe ingress and egress of vessels drawing more than ten feet of water; and hence they cannot be used to the extent necessary for the important purposes of commerce but they will always furnish important auxiliaries to the main harbor, and yield, through themselves and their tributaries, an extensive trade in timber—a trade which promises to be of vast importance to the commercial interest of the State.

The most important and available harbor on our coast is that formed more particularly by Ship and Cat islands. It will be perceived that these islands lie parallel with the shore, and at the mean distance of ten miles from the mainland, and are so situated with regard to the harbor, that they form a complete and ample protection for vessels at anchor. Ships may ride in perfect safety immediately under the lee of either of these islands, and within fifteen fathoms of the shore, being in this position amply protected from all seaward storms. The bottom of this harbor is peculiarly formed for safe anchorage, being composed mainly of soft mud, mixed with

sand and clay, which is the most permanent and safe for the mooring of ships; nor is its excellency in this respect impaired by sand-bars or rocks, always the most dangerous obstruction to navigation.

1292 The greatest danger to which a ship at anchor is subject is that arising from the height and consequent swelling of the sea, which, in an unsafe harbor, is often sufficient to drive her from her moorings, and cause her loss, either from the effect of the breakers, or the being cast upon a lee shore; but these difficulties are not to be apprehended in the Mississippi City harbor, because it is so completely land-locked, and protected on all sides, that no heavy sea will ever accumulate, and, consequently, no danger is to be apprehended from this cause.

The harbor is conveniently situated to the main land, which forms one of its boundaries; and the ordinary class of merchant ships can approach with safety to within one mile of the shore, for the purpose of receiving or discharging their cargoes. This distance, when we consider the favorable character of the bottom for the construction of wharves, is inconsiderable, and may, at a comparatively light expense in the construction of those wharves, be overcome, so as to save the expense of lighterage—a very considerable tax imposed upon the neighboring ports of New Orleans and Mobile.

The main entrance into the harbor is found at the west end of Ship island, and at medium tide has not less than twenty-three feet of water throughout the channel of one and a half mile in width, through which ships of war and other vessels can sail into and out of the harbor in perfect safety.

This channel can be well protected by the erection of naval forts—one on the western extremity of Ship island; and one on the bar or middle ground, west of the channel, as designated on the chart.

Besides this, there are two other channels, both between Dog island and Horn island, through which vessels can enter; but these, by reason of their narrowness and uneven bottom, are inferior to the one first mentioned, and would not be used except in good weather, and by experienced pilots. Also, by a reference to the chart it will be perceived that there are two other channels—one between Horn island and Petit Bois island, of the depth of 15 feet, leading into Horn Island sound, where there is good anchorage; the other

1293 between Cat island and the Louisiana marsh, leading *though* the south pass, towards Lake Borgne; but owing to their situation, they probably will not be much used.

With regard to the practicability of erecting a city or commercial depot on our coast, there cannot be a doubt; the whole coast presents one bold front, elevated some sixteen feet above the tides, and commanding a handsome and picturesque view of the islands, bays, and distant deep, and richly timbered with forests of valuable timber. Hence, at almost any point a city could be founded; but the precise location is a subject of some importance.

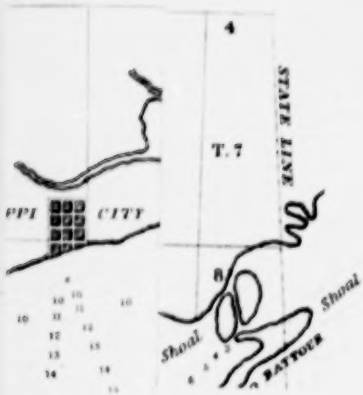
The city should be located near the most important harbor, for the sake of convenience, as well as its defence. Any point within the ranges ten and eleven are equally distant from the main anchorage, and near the line dividing these ranges the Mississippi City is situated.

The improvements made by the proprietors of this infant city have already given it some claims to a commercial character; in reference to the harbor, and the bay of Biloxi in the rear, it is certainly susceptible of being made a most important commercial point. An inconsiderable expense, compared with the importance of the object, would be sufficient to connect, by a canal of two miles in extent, the waters of the harbor with those of the bay in the rear of the city; and thus form a water communication through the heart of the city, and furnish at the same time an unquestionable retreat for steamboats and small vessels during the heaviest weather.

The Pearl and Pascagoula rivers, with their tributaries, extending as they do to the interior of the State, will afford, with a moderate improvement of their navigation, channels for the transportation of a considerable portion of the produce of the State.

The entrance of these rivers into the Gulf is about equidistant from the Mississippi City harbor, and the navigation thence for steamboats is much safer than to New Orleans.

Nor should we omit the restoration of Pass Manchac to its former navigable character, which was during the last war obstructed for purposes of national defence. Mississippi certainly has the
1294 clear right to demand its re-opening, and so make our own harbor accessible to steamboats descending the Mississippi river, and thus place the whole commerce of the State directly within our own reach.



Thus it is the opinion of the undersigned that the State of Mississippi possesses within her own limits a harbor amply sufficient for her purposes, and which holds out the bright prospect of commercial independence, with the aid it deserves, and which the interest of the State demands.

All of which is most respectfully submitted.

JOHN WHEELER, Engineer.

To his excellency A. G. McNutt, governor of the State of Mississippi.

1304 DOCUMENT NO. 80.

STATE OF LOUISIANA.

Patent 193. (Vignette.)

To all to whom these presents shall come, Greeting:

Whereas, Richard Pindell of the parish of Orleans in the State of Louisiana, purchased per warrant No. 139 dated 20th March, 1867, the following described swamp lands subject to tidal overflow to wit: The N. W. 4 of section fifteen in township 14 S. of range 16 E., in the southeastern land district of Louisiana St. Bernard parish containing one hundred and sixty acres according to the official plat of the survey of said lands in the State land office. 160.

Now know ye, that the State of Louisiana, in consideration of the premises and in conformity with law in such case made and provided, has given, granted and sold, and by these presents does give, grant and sell unto the said Richard Pindell of Orleans and to his heirs the above described land to have and to hold the same together with all the rights, titles and privileges thereunto belonging unto the said Richard Pindell and to his heirs and assigns forever.

In testimony whereof I, J. Madison Wells governor of the State of Louisiana have caused these letters to be made patent and the seal of the State land office to be hereunto affixed.

Given under my hand at the city of New Orleans on the 20th day of March in the year of our Lord one thousand eight hundred and sixty seven and of the Independence of the United States the ninety first.

By the governor:
(Signed) J. MADISON WELLS.

BILOXI, MISS., Aug. 23, 1904.

This certifies that I now have under treatment, Mr. Ed. Wentzell who is suffering from a wound of the left foot made by an old nail deeply penetrating the ball of the foot and causing much pain and swelling.

In my opinion, it might prove injurious to him to have to do any considerable amount of moving around on it.

Respt., H. M. FOLKES, M. D.

Land Office of the State of Louisiana.

Swamp and Overflowed Lands.

Warrant No. 5696.

To all whom it may concern:

Be it known, and made manifest, that in pursuance of act N
197 of the General Assembly of the State of Louisiana, approve
March 17th., 1859, B. Haralson, register of the land office, and R. A
Hunter, treasurer of the State and receiver of the land office, di
cause to be sold at the city of Baton Rouge, on the 28th. day
April, 1859, a warrant, No. 5696 for two hundred and seventy-thr
36/— acres of land, donated as swamp and overflowed land, by ac
of Congress of the 2nd March, 1849, and 25th September, 1850, an
to be disposed of under the provisions of said act of the Gener
Assembly, when Mrs. Ann B. Gordon became the purchaser there
for sixty-eight 34/100 dollars, which were paid to the receiv
aforesaid.

Now therefore, we do hereby sell and warrant to the said Ann
Gordon and hereby authorize her, her heirs and assigns, to locat
said warrant upon any of the swamp lands within the State of Louis
ana, subject to location and sale under the act aforesaid.

In faith whereof, we have hereunto subscribed our names an
affixed the seals of our respective offices, at the city of Baton Roug
the 28th day of April, 1859.

I, Chas. E. Bauer, clerk of the State land office, do hereby certify that the annexed page is a true and correct copy of warrant No. 7785, sold to Henry Florence, on file in this office.

Given under my hand and seal of office, this 5th, day of September, A. D. 1904.

[Seal of Land Office, State of Louisiana.]

CHAS. E. BAUER,
Clerk of the State Land Office.

Land Office of the State of Louisiana.

Swamp and Overflow Lands.

Warrant No. 7785.

To all whom it may concern:

Be it known and made manifest, that in pursuance to act No. 197 of the General Assembly of the State of Louisiana, approved March 17, 1859, B. Haralson, register of the land office, and R. A. Hunter, treasurer of the State and receiver of the land office, did cause to be sold at the city of Baton Rouge, on the 22nd November, 1859, a warrant, No. 7785 for 115 tidal overflowed acres of land, donated as swamp and overflowed land, by acts of Congress of the 2nd March, 1849, and 25th September, 1850, and to be disposed of under the provisions of said act of the General Assembly, when Henry Florence became the purchaser thereof for twenty-eight 75/100 dollars, which were paid to the receiver aforesaid.

Now therefore, we do hereby sell and warrant to the said Henry Florence and hereby authorize him, his heirs and assigns, to locate said warrant upon any of the swamp lands within the State of Louisiana, subject to location and sale under the act aforesaid.

In faith whereof, we have hereunto subscribed our names and affixed the seals of our respective offices, at the city of Baton Rouge, the 22nd day of November, 1859.

1342 DOCUMENT No. 103.

STATE OF LOUISIANA.

Act 65 of 1884.

An Act to Empower the Attorney General to Institute and Prosecute Suits Without Security or Advanced Costs and Without Bond.

Be it enacted by the General Assembly of the State of Louisiana, That the attorney general be, and he is hereby authorized and empowered to institute and prosecute any and all suits he may deem necessary for the protection of the interests and rights of the State; and no court of this State nor officer thereof shall demand of the State or the attorney general any security for costs, or any advanced costs but the costs for which the State may become liable shall be paid by the attorney general out of the proper appropriation therefor. That in any and all cases where bond is required by law in legal proceedings, the State and the attorney general shall be dispensed from giving such bond.

SEC. 2. Be it further enacted &c. That the defendant shall not be required to give security for costs or to advance costs in any case in which suit is brought by the State.

(Signed) H. W. OGDEN,
Speaker of the House of Representatives.
CLAY KNOBLOCK,
Lieut. Governor and President of the Senate.

Approved July 9th 1884.

S. D. McENERY,
Governor of the State of Louisiana.

A true copy from the original.

1343 DOCUMENT No. 104.

U. S. Act of Congress Annexing Part of West Florida to the Territory of Mississippi, &c.

"All that portion or territory lying east of Pearl river, west of the Perdido, and south of the thirty-first degree of latitude, shall be, and the same is hereby, annexed to the Mississippi territory; to be gov-

erned by the laws now in force therein, or which may hereafter be enacted, and the laws and ordinances of the United States relative thereto, in like manner, as if the same had originally formed a part of said territory; and until otherwise provided by law, the inhabitants of said district hereby annexed to the Mississippi territory shall be entitled to one representative in the General Assembly."

Act of Congress, May 14th, 1812, vol. XI, p. 175.

Jackson, Hancock, and Harrison Counties, in the Territory and State of Mississippi.

Act of Dec. 16, 1812 (Stat., p. 36).

SEC. II. All that tract of country within the following boundaries, to-wit: South of the thirty-first degree of north latitude and west of the dividing ridge between the Mobile and Pascagoula, and east of a line running due north from the middle of the bay of Biloxi to the thirty-first degree of north latitude, shall compose a county which shall be called "Jackson."

SEC. III. All that tract of country lying south of the thirty-first degree of north latitude and west of the line running due north from the middle of the bay of Biloxi to the thirty-first degree of north latitude and east of Pearl river, shall compose the county, and shall be known by the name of "Hancock."

Digest of Miss. Territorial Statutes 1816, digested by authority of the Gen. Ass., art. 63, p. 108.

U. S. act of Congress March 1, 1817, 2d sec., defines the boundaries of Mississippi, "including all islands within six leagues of the shore."

The constitution of Mississippi, August 15, 1817, in its preamble contains these words: "thence westwardly, including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne."

The 2nd constitution of Mississippi, adopted Oct. 26th, 1832, contains no discription of boundaries of the State.

1344 Chapter 36, Laws of Mississippi, 1839, p. 56.

"An Act to Provide for a Survey of the Mississippi Coast Section.

SEC. 1. Be it enacted by the legislature of the State of Mississippi, That an engineer shall be appointed by the governor of the State whose duty it shall be to make, as early as practicable, a survey of the whole of the sea coast upon the southern boundary of this State, who shall lay the same before the legislature at its next session.

SEC. 2. And be it further enacted, That this act shall be enforced from and after its passage.

Approved Feb. 14, 1839.

An Act to Establish a New County in this State, to be Called the County of "Harrison."

SEC. 1. Be it enacted by the legislature of the State of Mississippi, That a new county shall be, and the same is hereby created in this State, to be bounded as follows: Beginning at the point where the line dividing ranges thirteen and fourteen strikes the bay of St. Louis, then with said line due north to the northern boundary of township three south, thence due east to the center of range nine, thence south to the bay of Biloxi, thence southeast to the Point Caddi, thence westwardly with the sea shore, and the shore of the bay of St. Louis to the beginning, which county now includes a portion of the county of Hancock, and a portion of the county of Jackson.

Chap. 35, Laws of Miss. p. 145 approved Feb. 5, 1841.

An Act to Extend the Jurisdiction of the County of Harrison and for Other Purposes.

SECTION I. Be it enacted by the legislature of the State of Mississippi That the county of Harrison shall be bounded on the south by the southern boundary of the State of Mississippi."

Laws of Miss. chap. 52, p. 174, approved Feb. 22, 1842.

All the foregoing acts are cited and quoted from, giving the texts, in Hutchinson's Code of Mississippi of 1848, adopted by an act of the legislature approved March 2, 1848, under caption of "Counties and their Boundaries" p. 70 *et seq.*

Also in Revised Code of Miss. adopted and approved Feb. 2, 1857.

1345 An Act to Provide a New Code of Laws for the State of Mississippi and for Other Purposes.

SEC. 1. Be it enacted by the Legislature of the State of Mississippi, That it shall be the duty of the judges of the high court of errors and appeals, or a majority of them, to appoint three commissioners to revise, digest, and codify the laws of this State, and to propose such alterations or amendments thereof and such new laws as they may deem expedient."

Chap. 50, p. 154 Laws of Miss. Approved March 1, 1857.
Code approved Feb. 2, 1857.

"In defining the boundaries by the act of first of March 1817, which authorized the people of the territory to form a State government, the territory east of the eastern branch of Pearl river, and south of the thirty-first degree of north latitude, being the country bordering on the gulf of Mexico, including the islands within six leagues of the shore, was added to, or included in the State of Mississippi."

Introductory remarks, Code 1857 p. 49.

Limits and Divisions of Boundaries of the State of Mississippi.

ART. 2. * * * and the counties bordering on the gulf of Mexico, to-wit: Jackson, Harrison and Hancock, shall respectively have and possess jurisdiction and extend to the southern boundary of the State within the space embraced by extending their boundary lines which strike the gulf of Mexico or the inlets thereto, on a continuous direct course to the southern boundary of the State, including all islands that may lie within the limi-s thus defined."

Introductory remarks, Code of 1857 p. 80.

"The western boundary of this section was only defined as being within the United States and the southern boundary of this cession was defined by reference to the dividing line between Spain and the United States. It becomes necessary therefore, to ascertain the true western boundary, and also the southern boundary of the United States.

Miss. Code of 1857, p. 47.

Art. 88 of the Code of Miss. of 1857 leaves the boundaries of Harrison county as provided for by acts of 1841 and 1842, without mentioning anything about the islands. There are no mentions of southern boundary of Hancock county in the Code of 1857, except what is contained in introductory remarks.

(Pp. 49, 50, 51, already quoted.)

Hardee's Map.

A State Map.

"I deem the publication and distribution of a State map to
1346 the various State and county officers whose business requires the possession of one, a matter of sufficient importance to call your attention to it. It should contain a correct delineation of everything of importance and information, that it can embody and be a reference not only to our officials, but to all persons entrusted in the affairs of the State, whose correctness should settle all doubts upon any points or subjects it embodied."

Extract from Gov. Humphrey's message to Mississippi legislature, Oct. 16th, 1866, p. 17 Miss. Journal of House, 1866–1867.

Chapter XVII, Laws of Mississippi, 1866 & 1867, p. 27, Approved Oct. 26, 1866.

'An Act to Create the Office of State Engineer for the Purpose of Compiling a New State Map under Certain Conditions.

SEC. 1. Be it enacted by the legislature of the State of Mississippi, That the governor is hereby authorized to appoint a State engineer

whose duty it shall be, under his direction, to compile a geographical, historical and statistical map of the State; said map to be not less than five feet by three feet in size, to contain such information as the governor in his judgment may deem necessary, and before publication to receive his sanction and approval.

* * * * * * *

SEC. 3. * * * But the said engineer shall be required to enter into a good and acceptable bond and security in the full sum to be received for the delivery to the State, without further compensation than that which is hereinbefore provided, of such a number of the copies of said map for the use and benefit of the State as will carry out the following schedule for distribution, viz; the secretary of state, to whom the maps will be delivered, shall cause three copies to be furnished to each county in the State, to become the property of said counties and for use respectively in the offices of the sheriffs, and the circuit and probate clerks, at each county in the State. He shall also supply the different State officers at the capitol each with a copy, and six copies for the State university, and besides these, shall have delivered to him such additional copies as will enable the governor to exchange maps of other States and Territories, and the maps so received in exchange shall become a part of the property of the State library.

SEC. 4. Be it further enacted, That it shall be the duty of the different county officers throughout the State to afford the State engineer every facility for obtaining such information as he may require in the compilation of said work."

Report on Governor's Message.

* * * * * * *

"State map—to a select committee of three."

Miss. House Journal, 1866, p. 27.

"On motion of Mr. Webb of Amite, the report of the committee was received and agreed to."

1347 Miss. House Journal, 1866, p. 27.

"The speaker announced as the select committee of three on State map, Messrs. Hunter, Liddell and Williams."

Ibid. p. 29.

Map Bill Reported with Amendments.

Ibid., p. 98.

Amendments to 3d section were:

1st amendment: Three maps to each county and for use respectively in the offices of the sheriff and the circuit and probate clerks at each county *site*."

2nd amendment to 3d section, by adding "and six copies to the University of Mississippi."

"On motion of Mr. Suratt the rule was suspended, the bill was read the third time and passed as amended."

"That portion of the message which refers to a State map was, on motion of Mr. Sevett, referred to a select committee consisting of Messrs. Sevett, Napier and Stephens."

Miss. Senate Journal, 1866 & 1867, p. 25.

Bill reported favorably, p. 72 *ibid.*

Bill finally passed, p. 97 *ibid.*

"Yeas: Mr. President, Messrs. Bonford, Brooks, Brown, Cain, Hawkins, Hooker, Jackson, Lowry, Lyles, Miller, Montgomery, Nosely, Napier, Seal, Stephens, Stone, Sevett, Wisdon, Wolff and Yerger—21.

Nays: Messrs. Anderson, Lyle, Martin, McCargo, Robinson and Taylor."

Constitution of the State of Mississippi, 1869, Article II.

Boundaries of the State.

The limits and boundaries of the State of Mississippi shall remain as now established by law.

The Constitution of Mississippi.

Dec. 1, 1869.

Art. II. Boundaries of the State.

"The limits and boundaries of the State of Mississippi shall remain as so established by law."

Miss. Code of 1871, p. II. State Boundaries, etc.

"Thence westwardly including all islands within six leagues of the shore, to the most eastern junction of Pearl river and Lake Borgne; * * * comprising therein six leagues from the shore of the Gulf boundaries, except the jurisdiction ceded to the United States over Ship island and one mile adjacent thereto."

Revised Civil Code of Mississippi, 1871, by Amos Johnson.

Act Approved May 12th, 1871, p. 17, # 40.

"*Hancock county* (established Dec. 14, 1812) is bounded by beginning at that point on Pearl river where the lines between townships two and three south intersect said river; thence east on said township lines to the line between ranges thirteen and fourteen west; thence south on said range line, to the boundary of the
1348 State on the gulf of Mexico; thence westwardly on said boundary to the eastern junction of Pearl river with Lake Borgne; thence up Pearl river to the beginning.

41. *Harrison county* (established Feb. 5, 1841), is bounded by beginning at the northwest corner of township two, range thirteen west; thence east to the line between ranges nine and ten west; thence south with said range line between townships two and three south; thence east to the center of range nine west; thence south on the section lines, to the southern boundary of the State on the gulf of Mexico; thence westwardly on said boundary line to the line between ranges thirteen and fourteen west; thence north on said range line to the beginnings."

Sec. 8, Code of 1871, p. 8.

"From and after the first day of October A. D. 1871, this revised code shall take effect, and be received in use, as the statutory laws of Mississippi of a general nature, and shall supercede and repeal all pre-existing laws of a general nature, the subjects of which are herein revised and consolidated.

Approved May 12, 1871.

Sec. 44 Rev. Code of 1880, p. 55.

In boundaries of Hancock county includes "thence westwardly, including all the islands within six leagues of the shore of the gulf of Mexico."

The same clause occurs in boundaries of county of Harrison.

(*Ibid.*, sec. 45.)

Revised Code of Mississippi—1880.

44. *Hancock county* (established December 14, 1812), is bounded by beginning at the point in the middle of East Pearl river, where the line between townships two and three, south, in range eighteen, west intersects said river; thence due east, along said township line to the line between ranges fourteen and thirteen, west; thence due south, along said range line, to the middle of the bay of St. Louis; thence along the middle of said bay of St. Louis, southwardly to its entrance; thence due south to the southern boundary of the State of Mississippi in the gulf of Mexico; thence westwardly with said boundary, including all the islands within six leagues of the shores of the Gulf and Lake Borgne, to the most eastern junction of Pearl river and Lake Borgne, and to the east mouth of Pearl river; thence up said river by the middle thereof, to the point of beginning.

45. Harrison county (established February 5th., 1841), is bounded by beginning at the northwest corner of township two south, in range thirteen, west; thence extending due east, along the line between townships one and two, to the line between sections three and four, township two, range nine, west; thence due south, through the middle of said range nine, to the middle of the bay of Biloxi; thence along the middle of said bay of Biloxi to its entrance, at the east end of Deer island; thence due south to the southern boundary of the State of Mississippi, on the gulf of Mexico; thence

westwardly along said boundary to a point from which a line due north strikes the middle of the Bay St. Louis; thence due north to the entrance of said bay, including all the islands within six leagues of the shore of the gulf of Mexico; thence along the middle of said bay of St. Louis, northwardly to a point from whence the point at which the line between ranges fourteen and thirteen comes to said bay bears due north; thence due north to the place of beginning.

1349 # 98. The foregoing sections are intended to define the boundaries of counties as heretofore established by law; and if the boundaries as defined in said sections are not the same as heretofore established by law, the former law on that subject shall not be held to be repealed or affected thereby, but shall remain in force as to said boundaries, notwithstanding the passage of this act.

Revised Miss. Code of 1880, sec. 98, p. 70.

Chapter XVIII, Laws of Mississippi, 1882, p. 26.

SEC. 5. Be it further enacted That it shall be the duty of the said commissioner, under the direction of the said board to cause to be made geographical, geological and typographical maps and charts of this State, showing the various counties, with all their water courses, railroads, lakes, timber belts, classifications of soil."

Chap. XVIII, Laws of Mississippi, p. 45, 1884.

"An Act to Continue the Department of Immigration and Agriculture Established in Pursuance of Art. 12, Sec. 23, of the Constitution, and for Other Purposes."

Constitution of the State of Mississippi, 1890.

Article 2.

Boundaries of the State.

SEC. 3. The limits and boundaries of the State of Mississippi are as follows: to-wit:—Beginning on the Mississippi river (meaning thereby the center of said river or thread of the stream) where the southern boundary line of the State of Tennessee strikes the same, as run by B. A. Ludlow, D. W. Connelly and W. Petrie, commissioners appointed for that purpose on the part of the State of Mississippi A. D. 1837, and J. D. Graham and Austin Miller, commissioners appointed for that purpose on the part of the State of Tennessee; thence east along the said boundary line of the State of Tennessee to a point on the west bank of the Tennessee river, six four-pole chains south of and above the mouth of Yellow creek; thence up the said river to the mouth of Bear creek; thence by a direct line to what was formerly the north-west corner of the county of Washington, Alabama thence on a direct line to a point ten miles east of the Pascagoula river on the gulf of Mexico; thence,

westwardly, including all the islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne; thence up said Pearl river to the thirty first degree of north latitude; thence west along said degree of latitude to the middle or thread of the stream, of the Mississippi river, thence up the middle of the Mississippi river, to the place of beginning, including all islands lying east of the thread of the stream of said river, and also including all lands which were at any time heretofore a part of this State.

The Constitution of Mississippi of 1890, art. 2, contains the provision including the islands.

1350 Annotated Code of Mississippi, 1892.

§ 368. *Hancock county* (established December 14, 1812) is bounded by beginning at the point in the middle of East Pearl river, where the line between townships four and five, south, in range eighteen, west, intersects said river, thence due east along said township line to the line between ranges fourteen and thirteen, west; thence due south along said range line to the middle of the bay of St. Louis; thence along the middle of said bay of St. Louis southwardly to its entrance; thence due south to the southern boundary of the State of Mississippi in the gulf of Mexico; thence westwardly with said boundary, including all the islands within six leagues of the shores of the gulf of Mexico and Lake Borgne, to the most eastern junction of Pearl river and Lake Borgne, and to the east mouth of Pearl river; thence up said river by the middle thereof to the point of beginning, county site, bay — St. Louis.

§ 369. *Harrison county* (established February 5, 1841) is bounded by beginning at the north-west corner of township two, south in range thirteen, west; thence extending due east along line between township one and two to the line between sections three and four, township two, range nine, west; thence due south through the middle of said range nine to the middle of the bay of Biloxi; thence along the middle of said bay of Biloxi to its entrance at the east end of Deer island; thence due south to the southern boundary of the State of Mississippi on the gulf of Mexico; thence westwardly along said boundary to a point from which a line due north strikes the middle of the bay of St. Louis; thence due north to the entrance of said bay, including all the islands within six leagues of the shore of the gulf of Mexico; thence along the middle of said bay of St. Louis northwardly to a point from whence the point at which the line between ranges fourteen and thirteen comes to said bay bears due north.; thence due north to the place of beginning, county site, Mississippi city.

Mississippi Code of 1892.

In giving boundaries of Hancock and Harrison counties, includes all islands within six leagues of the shore. (Secs. 368 & 369.)

1351 DOCUMENT No. 105.

CHAPTER 1.

An Act Supplementary to an Act Entitled "An Act Providing for the Superior Court Going Circuit for Establishing Courts of Inferior Jurisdiction.

SEC. 1. Be it enacted by the legislative council and house of representatives of the Territory of Orleans in general assembly convened. That for the purpose of carrying into effect the act to which this is a supplement, the Territory shall be, and hereby is divided into five districts, to be called superior court districts, in the manner following, viz.

The parish of the city of New Orleans with its precincts;
The parish of St. Bernard, commonly called La Terre aux Bœufs;
The parish of Plaquemines;
The parish of St. Charles;
And the parish of St. John,
Shall compose the first district.
The parish of St. James;
Of the Ascension;
Of the Assumption;
The settlement of the La Fourche;
The parish of Iberville, including the settlement of Galveztown;
Shall compose the second district.

That part of the Territory known under the name of Baton Rouge, Point Coupee, comprehending the parish of St. Francis, and the county of Concordia,
Shall compose the third district.
The counties of Ouachita, Rapides and Nachitoches,
Shall compose the fourth district,
And the counties of Opelousas,
And Attacapas,
Shall compose the fifth district.

SEC. 2. ——.

SEC. 9. And be it further enacted, That the said Territory shall be and the same is hereby divided into nineteen parishes as follows, to-wit:

The city of New Orleans with its precincts as they formerly stood, shall form the first parish;

The parish of St. Bernard, commonly called the Terre aux Beuf, shall form the second;

The third called the parish of Plaquemines, shall comprehend all that part of the country on both sides of the Mississippi below the Parish St. Bernard as far as the Balize;

The parish of St. Charles shall form the fourth parish;

The parish of St. John Baptist shall form the fifth;

The parish of St. James shall form the sixth;

The parish of Ascension, shall form the seventh.

The settlement of La Fourche shall be divided into two parishes, the nearest of which to the river, shall form the eight- parish, under the name of the parish of the Assumption, and shall include one half of the population;

The ninth parish shall consist of the other settlements in the lower part of La Fourche, and shall be called the Interior parish;

The parish of Iberville, including the settlements of Galveztowns shall form the tenth;

That part of the Territory known by the name of Baton Rouge, from that part which is opposite the bayou of Manchac until the lowest part of the mouth of the Falfe river, shall form the eleventh.

Pointe Coupee shall comprehend the parish of St. Francis and shall form the twelfth.

1352 The county of Concordia, as now established, shall form the thirteenth;

The settlements of Ouchita, shall form the fourteenth;

The settlement of Rapides and its former dependencies, shall form the fifteenth;

The Avoyelles shall form the sixteenth;

The parish of Nachitoches shall comprehend the parish of St. Francis, and shall form the seventeenth;

The parish of St. Landry in the Opelousas, shall form the eighteenth;

And the parish of Attacapas, called the parish of St. Martin, shall form the nineteenth.

And in case of any difficulty relative to the boundaries of the respective parishes above described, it shall be the duty of the person exercising the powers of governor of the territory to declare and establish the boundaries between those parishes in relation to which doubts may have arisen, and to give notice of such declaration and establishment, by public proclamation and otherwise as may be deemed expedient, and to submit the same to the next session of the legislature.

Sec. 32. And be it further enacted, That the division of the Territory into counties shall subsist for the purpose of making the election of the representatives of the territory, and levying the territorial taxes.

Sec. 33. And be it further enacted, That the act entitled "An act

for dividing the Territory of Orleans into counties, and establishing courts of inferior jurisdiction therein." be — the same is hereby repealed, except in what is expressly preserved by this act.

N. C. C. CLAIBORN,
Gov. of the Territory of Orleans.

Approved March 31, 1807.

An Act to Remove Certain Doubts Relative to the Limits of the Parishes of New Orleans, Plaquemine, and St. Bernard.

Be it enacted by the legislative council and house of representatives of the Territory of Orleans in General Assembly convened, That the limit of the parish of Orleans is hereby fixed at Dessales' plantation included on the right shore of the river below the city, and at the plantation of Toutant Beauregard inclusively on the left shore; that the limit of the parish of Plaquemine shall commence on the right shore of the river at the lower line of Dessales' plantation and on the left shore at the lower line of Dessales' plantation; and the limit of the parish of St. Bernard shall commence at Delasise's plantation inclusively, running along the settlements of the bayou of Terre aux Bœufs.

TH. URQUHART,
Speaker of the House of Representatives.
J. D. DEGOUTIN BELLECHASSE,
President of the Legislative Council.

Approved March 20th, 1809.
WILLIAM C. C. CLAIBORNE,
Governor of the Territory of Orleans.

1353 An Act to Amend the Act Entitled "An Act to Remove Certain Doubts Relating to the Limits of the Parishes of New Orleans, Plaquemines, and St. Bernard."

Be it enacted by the legislative council and house of representatives of the Territory of Orleans, in General Assembly convened, That the limit of the parish of New Orleans be, and that the same is hereby fixed at Dessale's plantation inclusively on the right bank of the river down to the city, and at the upper limits of Rinker's plantation on the left bank; that the limits of the parish of Plaquemines shall begin on the right bank at the inferior limits of Dessale's plantation, and on the left bank at the upper limits of Rinker's plantation inclusively; and that the limits of the parish of St. Bernard shall begin at the back lines of Lasise's plantation, including all the settlements on Bayou Terre aux Bœufs.

MAGLOIRE GUICHARD,
Speaker of the House of Representatives.
JEAN NOEL DESTREHAN,
President of the Legislative Council.

Approved, April 10th, 1811.
WILLIAM C. C. CLAIBORNE,
Governor of the Territory of Orleans.

An Act.

An Act Further to Determine the Limits of the Parish of St. Bernard.

Be it enacted by the senate and house of representatives of the State of Louisiana, in General Assembly convened, That from and after the passage hereof, the limits of the parish of St. Bernard shall be and the same are hereby removed, so as to comprehend the tract of country situate on the left bank of the River Mississippi, from Julian Poydras' plantation to the Canal des Pecheurs, and that all acts or parts of acts which may be contrary to the provisions and meaning of this act, shall be and the same are hereby repealed.

MGRE. GUICHARD,
Speaker of the House of Representatives.
N. MERRIAM,
President of the Senate.

Approved, February 22nd., 1817.
JAMES VILLIERE,
Governor of the State of Louisiana.

1354 An Act.

No. 14.

An Act to Determine the Limits between the Parishes of Plaquemines and St. Bernard.

Be it enacted by the senate and house of representatives of the State of Louisiana, in General Assembly convened, That the limits between the parishes of Plaquemines and St. Bernard shall be determined as follows, to wit: Beginning at the already established limits between Morgan and Poydras plantation on the river, and following the same one league from the river, thence running a straight line to the junction of the Bayous Grove and Mandeville thence following the middle of Bayou Mandeville to the Lake Lery thence to the southeast part of Lake Lery, thence running a line to the northeast part of Black bay to the Chandeleur bay.

(Signed) WM. HC. C. CLAIBORNE,
Speaker of the House of Representatives.

(Signed) FELIX GARCIA,
President of the Senate.

Approved January 12, 1842.
(Signed) A. B. ROMAN,
Governor of the State of Louisiana.

An Act to Provide for the Removal of the Seat of Justice of the Parish of St. Bernard and Re-divide said Parish into Wards.

SECTION 1. Be it enacted by the senate and house of representatives of the State of Louisiana in General Assembly convened, That the seat of justice of the parish of St. Bernard be and the same is hereby removed from the site heretofore occupied to such location as may be selected, according to the provisions of this act.

SEC. 2. Be it further enacted, etc., That the governor is hereby authorized and required to appoint three citizens of the parish of St. Bernard as commissioners, whose duty it shall be to select a suitable location for the seat of justice of said parish, at some convenient point not more than half a mile from the Mississippi river, and not below the Mississippi and Mexican Gulf ship canal. The said commissioners are authorized and required to secure a title in the name and on behalf of said parish in and to any suitable lot of ground at the point selected by them as the parish seat of justice, not to exceed five acres in area nor one thousand dollars in cost, upon which lot the said commissioners shall cause to be erected a courthouse and a parish jail, at a cost not to exceed fifteen thousand dollars. Said commissioners are authorized to lease for a term not to exceed two years *in* the necessary buildings for temporary use as a courthouse and jail, which buildings shall be located near the point selected for the seat of justice, and shall be occupied and used by the parish only until the permanent parish buildings shall have been erected.

SEC. 3. Be it further enacted, etc., That the said commissioners shall discharge the duties imposed upon them by this act, and assumed by them in accepting their appointment as such within the period of ninety days from the date of their appointment. At the expiration of ninety days from the date of their appointment, they shall report to the police jury of said parish their action in the premises. Said report shall contain a statement of the amount
1355 of indebtedness contracted by them in the name of and in behalf of said parish, together with an estimate of the cost of removing parish records and the movables belonging to the court house, and other parish offices from their present location to *to* the buildings leased by the commissioners for the temporary use of the parish. They shall also deliver to the police jury the original copies of all contracts and other papers which may have come into their hands pertaining to parish business while in the discharge of their duties as commissioners.

SEC. 4. Be it further enacted, etc., That the police jury for *for* the parish of St. Bernard are hereby authorized and required without delay, after having received the report of the commissioners required by section three of this act, to estimate and levy a tax of all the taxable property of the parish, which shall be sufficient to pay all the costs of grounds, buildings, lease and removal, herein above

stated, and the said tax shall be assessed and collected in curr funds, and in addition and in the same manner and subject to same penalties, as the present parish taxes are assessed and collect The proceeds of said special and additional taxes shall be appli exclusively and without delay to the payment of the debt or de contracted and *and* reported by said commissioners in accorda with the provisions of this act; provided, that no more than one-h of said tax shall be assessed and collected in any one year; and p vided further, that the whole amount shall be collected within th years from the date of letting the contract for the permanent bui ings.

SEC. 5. Be it further enacted, etc., That the parish of St. Bernard hereby divided into five wards, as follows: The first ward shall co mence with the upper line of said parish, and extend to the upp line of the plantation and extend to the lower line of the Merr plantation; the third ward shall commence with the lower line the Merritt plantation and extend to the lower limit of the Milla don plantation and extend to the mouth of Terre aux Bœuf; t fifth ward shall commence with the upper line of G. Proctor's pla tation and extend to Lake Borgne, including all that part of t parish known as Proctorville and La Chincha.

SEC. 6. Be it further enacted, etc., That all acts or parts of acts ordinances in conflict with this act are hereby repealed, and this a shall take effect from and after its passage.

(Signed) CHARLES W. LOWELL,
Speaker of the House of Representatives.
C. C. ANTOINE,
Lieutenant Governor and Pres. of the Senate.

Approved April 14, 1874.
(Signed) WILLIAM P. KELLOGG,
Governor of the State of Louisiana.

A true copy:
P. G. DESLONDE,
Secretary of State.

1356 No. 23.

An Act to Change the Boundary of the Parish of St. Bernard.

SECTION 1. Be it enacted by the senate and house of representa tives of the State of Louisiana in General Assembly convened, That hereafter the boundary of the parish of St. Bernard shall be from the left bank of the Mississippi river along the lower line of the property known and used as the United States barracks, and the prolongation of said line until it intersects the prolongation of the line of the south side of Florida walk, one of the avenues of the city of New Orleans, thence in an easterly direction to the point where

FOLD OUT IS TOO LARGE TO BE FILMED

the Canal des Pecheurs or Fishermen's canal intersects the Bayou Bienvenue, thence along the south side of said bayou to the Lake Borgne, and thence along the boundaries of said parish as now established to the left bank of said Mississippi river, where the parish of Plaquemines begins.

SEC. 3. Be it further enacted, etc., That this act takes effect from and after its passage, and that all laws in conflict with its provisions be and the same are hereby repealed.

(Signed) MICEAL HAHN,
Speaker of the House of Representatives.

(Signed) C. C. ANTOINE,
Lieutenant Governor and President of the Senate.

GENERAL LAND OFFICE,
WASHINGTON, D. C., July 9, 1904.

Address only the Commissioner of the General Land Office.

Mr. E. H. Nall, State land commissioner, Jackson, Mississippi.

SIR: Replying to your letter of the 30th ultimo, you are advised that photolithographic copies and tracings of the following plats showing islands surveyed as lying within the State of Mississippi (except as to Petit Bois island) and reckoned from St. Stephen's meridian can be furnished at the price placed opposite thereto.

1361 T. 8 S., R. 5 W.—Greenwood's island (abandoned military reservation), June 5, 1900, tracing $1.50 uncertified or $1.75 certified with stamp certificate.

T. 9 S., rgs. 3, 4 & 5 W. 10 " " 4 & 5 "	Petit Bois island	On 1 plat approved Feb. 4, 1847—25 cents uncertified or 50 cents with stamp certificate.
9 " " 5, 6 & 7 "	Horn island	

NOTE.—It shows where State line between Alabama and Mississippi crosses Petit Bois island.

T. 9 S., rgs. 4 & 5 W. 10 " " 4 & 5 "	Petit Bois island, all in Mississippi, showing changes on 1 plat approved July 29, 1847—25 cents uncertified or 50 with stamp certificate.

1362

T. 7 S., R. 9 W.	Deer island not subdivided into lots	On 1 plat approved Feb. 4, 1847.
8 " " 8 & 9 "		
9 " " 9 & 10 W.	Ship island	Tracing $2.00 uncertified or $2.25 with stamp certificate.
10 " " 10 "		
9 & 10 S., 11 W.,	Cat island	
8 & 9 " 6 "	Round island	
T. 7 S., R. 9 W.	Deer island subdivided into lots.	On 1 plat approved Aug. 5, 1897. Tracing $1. uncertified or $1.25 with stamp certificate.
8 " 8 & 9 "		

10 " R. 15 " —Showing St. Joseph's island not surveyed, and Grand Island acreage given, plat approved Aug. 14, 1828. 25 cents uncertified, or 50 cents with stamp certificate.

10 & 11 S., R. 17 & 18 E.—St. Helena meridian La., showing outlines of marsh, Half Moon, Petit pass and an unnamed island, approved July 31, 1846, surveyed as within the State of Louisiana and which lie within Lake Borgne and Mississippi sound and within six leagues of the main north shore thereof can be furnished at a cost of 25 cents uncertified or 50 cents with stamp certificate.

1363

By reference to inclosed portion of the map of the State of Louisiana, it will be seen that a line drawn parallel to the north-shore line of Lake Borgne and Mississippi sound and at a distance of six leagues therefrom, would include portions of townships 11, 12 and 13 south, ranges 17, 18 and 19 east; and townships 10, 11 and 12 south, range 20 east, St. Helena meridian, in St. Bernard parish, Louisiana, in which are to be found many tracts of land surrounded by water and which would therefore be denominated as islands, but which are in fact hummocks of land surrounded by the marsh and swamp in said townships. You are requested to state whether you desire copies of the plats showing such lands south of the south shore of Lake Borgne and Mississippi sound, including the islands shown among the bayous and lakes within the townships mentioned, or whether your inquiry relates only to the islands in tps. 10 and 11 south, ranges 17 and 18 E., which are shown on the map as islands within said bodies of water.

1364

1365 This office would be glad to furnish the plats desired gratis, but the statute provides that charges must be made.

Very respectfully, J. H. FIMPLE,
Acting Commissioner.

Inclosure.

(Endorsed:) State of Louisiana *vs.* State of Mississippi. Exhibit Louisiana No. 2 Offered by State of Louisiana Aug. 20, 1904. W. D. Bullard, commissioner. Office Supreme Court, U. S. Filed Mar. 13, 1905. James H. McKenney, clerk.

FOLD OUT IS TOO LARGE TO BE FILMED

1377 In the Supreme Court of the United States, October Term, 1904.

STATE OF LOUISIANA *versus* STATE OF MISSISSIPPI. } Original Bill Number 11.

I, Frank Hastings Mortimer, commissioner, appointed by the honorable the Supreme Court of the United States in the above entitled and numbered proceeding, do hereby certify that the accompanying four (4) volumes, each identified by my signature on the first and last pages thereof, and paged respectively,

Vol. 1, from p.	1	to p.	484,	inclusive,
Vol. 2, " "	485	"	921,	"
Vol. 3 " "	922	"	1177,	"
Vol. IV " "	1178	"	1477,	"

contain the testimony taken before me in behalf of the State of Louisiana in said proceeding on the several days therein stated:—part of said testimony, as contained in vol. # 4 from pages # 1294 to # 1477, inclusive, having been taken before the Honorable W. D. Bullard, also commissioner in this proceeding, acting in my stead, as per agreement between the parties of record.

I further certify that the several maps offered by the State of Louisiana in connection with said testimony, and enumerated and set out therein, each identified by the commissioner before whom the same was offered, are transmitted herewith; said maps being assembled in atlas form, under my supervision, in obedience to the order of the said Supreme Court heretofore rendered in said proceeding, and numbered as follows, to wit:—

Nos. 6, 7, 8, & 8 A, 9 & 9 A, 10 & 10 A, 11 & 11 A, 12, 13 & 13 A, 14 & 14 A, 15, 16, 17, 18, 19 20 & 20 A. (21—it not having been possible to photograph map # 21 it will be produced before the court in the original from the Library of Congress:) 22, (23—same as to No. 21) 24, 25, (in four sections), 26, (in 4 sections), 27, (in 6 sections), 28, (in 2 sections), 29, 30 (in 6 sections), 31, 32, 33, 34 & 34 A, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, & 57 A, 58 & 58 A, 59, 60 & 60 A, 61 & 61 A, 62, 63, 64, 65, 66 & 66 A.

I further certify that the several documents offered by the State of Louisiana in connection with said testimony taken in its behalf, and enumerated and set out therein, each identified by the commissioner before whom the same was offered, are transmitted herewith, said documents being numbered respectively, as follows:

Nos. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, (there being none offered bearing the No. 37) 38, 39, 40, 41, 42, 43, 44, 45, 46, 47

48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104 & 105.

1378 I further certify that the exhibits marked "Louisiana 1, Louisiana 2, and Louisiana 3," offered by the State of Louisiana in connection with said testimony taken in its behalf, as set forth therein, each identified by the commissioner before whom the same was offered are transmitted herewith.

I further certify that the offerings marked "Diagram No. 1, Diagram No. 3, and Diagram No. 5," made by the State of Louisiana in connection with said testimony taken in its behalf, as set forth therein, are transmitted herewith.

I further certify that the offering marked "Diagram P," offered by the State of Louisiana in connection with the testimony of Major B. M. Harrod, and attached thereto at folio # 11 of vol. # 1 of said testimony, is transmitted herewith.

I further certify that I do not transmit herewith exhibits marked A, B, C, D, E, F, G, H, I, J, K, L, M, and Z, referred to in the testimony herewith forwarded, for the reason that I am informed that the originals of said exhibits are now in the possession of the clerk of this honorable court in Washington D. C., certified copies thereof being used in the proceedings before me.

In testimony whereof, I have signed these presents, at the city of New Orleans, State of Louisiana on this the thirty first day of January, A. D. 1905.

FRANK HASTINGS MORTIMER,
Commissioner.

(Endorsed:) Supreme Court of the United States, October term 1904. Original bill No. 11. State of Louisiana *vs.* State of Mississippi. Certificate of commissioner transmitting testimony, & offerings in connection therewith, taken in behalf of State of Louisiana. Frank Hastings Mortimer, commissioner.

1379 And on the same day, to wit, on the 13th day of March, A. D. 1905, the evidence for the defendant was filed in the words and figures following, viz:

1384 THE STATE OF LOUISIANA }
vs. } No. 1.
THE STATE OF MISSISSIPPI. }

1385 In the Supreme Court of the United States, October Term, 1903.

THE STATE OF MISSISSIPPI }
vs. } Original Bill, No. 11.
THE STATE OF LOUISIANA. }

In accordance with the agreement executed between the attorney general of Mississippi, and the attorney general of Louisiana on file in this case stipulating how the testimony should be taken on this the 1st day of June 1904, at the yacht club house in the city of Biloxi Mississippi, pursuant to notice duly given and acknowledged, Hon. William D. Bullard, commissioner appointed by the Supreme Court of the United States to take the testimony in this case on the part of the State of Mississippi, together with Hon. William Williams, attorney general of the State of Mississippi; Hon. Monroe McClurg, appointed by the governor of the State to assist said attorney general, and the Hon. Walter Guion, attorney general for the State of Louisiana, and Hon. F. C. Zacharie, and Hon. John Dymond Jr., in this cause associated as counsel with the attorney general of Louisiana, met and proceeded to take the testimony on behalf of the State of Mississippi.

The notice given by the attorney general of the State of Mississippi is as follows:—

"JACKSON, MISSISSIPPI, May 19th, 1904.

Hon. Walter Guion, attorney general, New Orleans, La.

DEAR SIR: In compliance with the agreement entered into by and between Louisiana and Mississippi in respect to the taking of evidence in the case of Louisiana *versus* Mississippi I beg leave to notify you that Mississippi will begin taking her evidence in the case of Louisiana *vs.* Mississippi before the Hon. William D. Bullard, commissioner appointed for that purpose at the hour of 11 o'clock a. m. on Wednesday, June 1st, 1904, at the yacht club in the city of Biloxi Mississippi, and will continue to take evidence at the said place until and including June 25th, 1904. After which
1386 time we will adjourn to the city of Jackson and take evidence there in the capitol building of the State of Mississippi until and including July 16th, 1904, when we will return to Biloxi and continue to take evidence there until we shall have finished, subject to agreements heretofore made and to be made in this matter by counsel for the States of Louisiana and Mississippi.

Yours truly, WILLIAM WILLIAMS,
Attorney General for the State of Mississippi.

The answer to the above notice being as follows :—

"NEW ORLEANS, LA., May 21st, 1904.

Hon. William Williams, attorney general of Mississippi, Jackson, Mississippi.

DEAR SIR: I am in receipt of your letter of the 19th instant, in which you notify me that on Wednesday June 1st, 1904, at 11 o'clock a. m., at the yacht club in the city of Biloxi, Mississippi you will begin taking the evidence for the State of Mississippi in the boundary suit between Louisiana and Mississippi.

Under the agreement entered into with your associate ex-Attorney General McClurg it was understood that Louisiana's case was not closed at the time we finished the taking of certain evidence here, and that Louisiana would have the right to offer certain evidence during this month on giving you notice. I therefore take this means of notifying you that on Monday 30th of May, 1904 at 11 o'clock a. m. the State of Louisiana will offer the additional evidence which it proposed to introduce before Mr. Frank H. Mortimer, Louisiana's commissioner, at his office in the custom house, New Orleans. This will give you ample time to make your arrangements to go over to Biloxi on the 31st of May, so as to prepare for the taking of evidence on the following day, June 1st. If, however, another day prior to the 1st June 1904 will be more convenient to you I beg to state that counsel for Louisiana hold themselves in readiness to take the evidence on any other day that will best suit your convenience.

Yours truly,

WALTER GUION,
Attorney General of Louisiana.

Thereupon the commissioner on the part of Mississippi Hon. William D. Bullard appointed Frank M. Peyton, official stenographer on the part of Mississippi in this cause, and he was thereupon duly sworn as such.

AGREEMENT.—It is now here agreed in the presence of the commissioner by and between the two States represented by their
1387 respective counsel that it shall be unnecessary for the witnesses to sign their depositions taken by the stenographer on behalf of either State. Said depositions are to be typewritten in triplicate. The original copy to be filed with the commissioner, and a copy to be given to counsel for either State.

By Gen. MCCLURG: In order that the commissioner appointed by the Supreme Court of the United States to take testimony on the part of the State of Mississippi may understand at the outset the general drift of our evidence, I desire to state here: the contention of the State of Louisiana as set forth in her original bill of complaint is that the boundary line dividing these two States in the waters of the gulf of Mexico is "a line beginning at the most southern junc-

tion of the channel of the east branch of Pearl river with Lake Borgne; thence eastward following the deep water channel to the north of Half Moon island; through the Mississippi Sound channel and Cat Island pass, north east of Isle à Pitre into the gulf of Mexico."

This claim of Louisiana to this line, as stated in her bill, is based upon the acts of Congress, one approved April 6th, 1812, admitting that State into the American Union and fixing her boundary about the controverted point as follows. "Thence down said River Iberville, and from thence along the middle of said river to Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence upon said Gulf to the place of beginning. (Sabine river)., including all islands within three leagues of the coast." The other act approved April 14th, 1812, under which we state by moving this boundary line eastward and northward, saying that instead of passing through the lakes mentioned "to the gulf of Mexico," it should run "along the middle of the Iberville and of the River Amite to Lakes Maurepas and Pontchartrain to the mouth of Pearl river; thence by the eastern branch of Pearl river to the 31st, degree of north latitude; thence on the said degree of latitude to the Mississippi river."

To sustain her contention as here stated Louisiana has introduced much testimony and closed her evidence in chief.

On the part of Mississippi, it is denied that there is anything in the acts of Congress fixing the boundaries of Louisiana at the "deep water channel," nor is there any thing in law or in fact to uphold such contention; but by way of cross bill it is contended by Mississippi that the act of Congress of March 1st, 1817, admitting her into the Union leaves no doubt as to the boundary in controversy when it says; "Thence due south" between Mississippi and Alabama to the gulf of Mexico; thence westwardly, including all islands within six leagues of the shore to the most southerly junction of Pearl river with Lake Borgne; thence up said river to the 31st degree of north latitude."

So, you will observe, Mr. Commissioner, that the testimony which we now begin to take on the part of Mississippi will be directed to the establishment of the line designated in our cross bill which
1388 of course will tend to disprove the correctness of the contention on the part of Louisiana.

We begin by offering certain documents being copies of treaties between England, France, Spain and the United States bearing upon the issues here made and certain acts of the territorial and State legislatures of the litigant States, and then we propose to offer testimony to establish certain facts that aid our construction of the laws fixing boundary lines in the waters of the Gulf in support of our contention generally.

Thereupon on the part of the State of Mississippi the following documentary evidence was offered in evidence. The production of the books from which the extracts introduced were taken is waived by the counsel for the State of Louisiana and a copy of the original

filed by the commissioner in each instance is furnished to the counsel for the State of Louisiana, to-wit:—

Mississippi Document No. 1, entitled A definitive treaty of friendship and peace between His Brittan-ic Majesty and Most Christian King, and the King of Spain. Concluded at Paris on the 10th day of February 1763, to which the King of Portugal acceded on the same day.

Mississippi Document No. 2, entitled A definitive treaty of peace and friendship between His Brittan-ic Majesty, and the Most Catholic King. Signed at Versailles on the 3rd, day of September 1783 as published by authority.

Mississippi Document No. 3, being chapter 22, volume 2 of the United States Statutes at Large, entitled An act for the disposal of certain tracts of land in the Mississippi territory claimed under Spanish grants, reported by land commissioner as ante-dated, and to confirm the claims of Abraham Ellis and Daniel Harregal.

Mississippi Document No. 4, entitled Sections No. 1 and No. 2 of chapter 100 and volume 3, of the United States Statutes at Large. An act for adjusting the claims to lands and establishing land offices in the districts east of the island of New Orleans.

Mississippi Document No. 5, being An act concerning an act to enable the President of the United States under certain contingencies to take possession of the country lying on the east of the River Perdido and south of the State of Georgia and the Mississippi territory and for other purposes, approved January 15th 1811, page 471, volume 2 of the United States Statutes at Large.

Mississippi Document No. 6, entitled An act to enable the President of the United States under certain contingencies to take possession of that country lying east of the River Perdido and south of the State of Georgia and the Mississippi territory and for
1389 other purposes. Approved January 15th, 1811. Page 471, volume 2 of the United States Statutes at Large.

Mississippi Document No. 7. Resolutions of the Congress of the United States. Approved January 15th 1811, relative to the occupation of the Floridas by the United States of America. Page 47, volume 2. United States Statutes at large.

Mississippi Document No. 8, being the 1st, paragraph of section 1, chapter 50, volume 2, of the United States Statutes at Large. An act for the admission of the State of Louisiana into the Union and to extend the laws of the United States to the said State.

Mississippi Document No. 9, being chapter 57, volume 2, of the United States Statutes at Large. An act to enlarge the limits of the State of Louisiana, approved April 14th, 1812.

Mississippi Document No. 10, being chapter 84, volume 2 of the United States Statutes at Large. An act to enlarge the boundaries of the Mississippi Territory, approved May 14th 1812.

Mississippi Document No. 11. An act authorizing the President of the United States to take possession of the tract of country lying south of the Mississippi Territory, west of the River Perdido. Ap-

proved February 12th, 1813. Page 472, volume 3 of the United States Statutes at Large.

Mississippi Document No. 12, sections No. 1, and No. 2, chapter 23, volume 3 of the United States Statutes at Large. An act to enable the people of the western part of the Mississippi Territory to form a constitution and State government, and for the admission of such into the Union, on an equal footing with the original States.

Mississippi Document No. 13, being resolutions for the admission of the State of Mississippi into the Union, approved December 10th 1817, page 473, volume No. 2 of the United States Statutes at Large.

Mississippi Document No. 14, being a copy of one of the Spanish grants annulled by a treaty between the United States and Spain on February — 1819.

Mississippi Document No. 15, being article No. 2 of the treaty of 1819 between the United States and Spain, signed at Washington on the 27th, day of February 1819. John Quincy Adams. Louis De Onis.

Mississippi Document No. 16, being sections No. 1 and
1390 No. 2, chapter 39, volume No. 2, of the United States Statutes at Large. An act for carrying into execution a treaty between the United States and Spain, concluded at Washington on the 22nd. day of February 1819. Approved March 3rd, 1821.

Mississippi Document No. 17 being an opinion of Chief Justice Marshal, in the case of Foster & Elam *vs.* Neilson, 2nd Peters, page —.

Mississippi Document No. 18, being the boundaries of Hancock county, as established December 14th, 1812, taken from section 44 of the Code of 1880 of Mississippi. Section 368 of the Code of 1892 of Mississippi.

Mississippi Document No. 19 being the boundaries of Jackson county Mississippi as established December 14th, 1812, taken from section 50 of the Code of 1880 of Mississippi, and section 37 of the Code of 1892 of Mississippi.

Mississippi Document No. 20, being the boundaries of Harrison county, Mississippi, established February 5th, 1841. Taken from section 45 of the Code of 1880 of Mississippi and section 396 of the Code of 1892 of Mississippi.

Mississippi Document No. 21, being chapter 52 of the Laws of Mississippi of 1842. An act to extend the jurisdiction of the county of Harrison, approved February 22nd, A. D. 1842.

Mississippi Document No. 22, being article No. 2, section 2, chapter No. 2, of the Revised Code of 1857 of Mississippi, respecting the boundaries of Jackson, Harrison and Hancock counties.

The commission here adjourned until nine o'clock tomorrow morning, which is June 2nd, 1904.

Upon reassembling of the commission this morning Mr. Bullard, commissioner on the part of Mississippi appointed Richard Pollard, Esq., as special bailiff to wait upon him and to execute his

orders during the taking of the testimony on the part of Mississippi, and Mr. Pollard was accordingly sworn and entered upon the discharge of his duties.

Mr. B. R. CLEMENTS being sworn as a witness on the part of the State of Mississippi testified as follows :—

Q. Mr. Clements, how old are you?
A. 74.
Q. Where do you reside?
A. I live in Biloxi.
Q. How long have you resided in Biloxi?
A. Since 1851.
Q. What has been your occupation generally since 1851?
A. Boatman running yachts and steamers, hoist boats and pilots etc.

Q. Where?

1391 A. All the way from Lake Pontchartrain, Mississippi sound and Louisiana marsh. Mississippi sound here and Mobile bay, as far as Pensacola.

Q. This is a controversy Mr. Clemens between the States of Louisiana and Mississippi in which it is claimed by Louisiana that the line dividing these two States is the deep water channel which passes out of the mouth of Pearl river through the Mississippi sound as far as Cat island and into the Gulf, and in which Mississippi claims that the real boundary between the States is a line drawn at six leagues from every point of the Mississippi shore between Pearl river and the Alabama line. Are you familiar with the territory that I have indicated to you and that is in dispute between these two States?

A. Yes, sir, I have been all over it.

Q. I understand you to say that since 1851 that you have been a boatman on these waters, and that you are familiar with the territory in dispute between these two States. Am I correct in that?

A. Yes sir.

Q. I will be obliged to you Captain to tell us if you can of your own personal knowledge what has been understood by you, and so far as you know other boatmen to be the dividing line between these two States since 1851?

A. Well sir it has always been my impression and all the boatmen's impression that Pearl river was the dividing line between Louisiana and Mississippi running due south.

Q. Running due south how far?

A. About 18 or 20 miles.

Q. You say that has been the impression of yourself and other boatmen so far as you know?

A. Yes sir, I never knew anything to the contrary.

Q. Now I will ask you to please state how you and other boatmen so far as your knowledge extends have acted upon that impression as to the boundary line between these two States?

A. Well sir we have made no distinction at all. We have fished all over there.

Q. All over where?

A. All over the marsh.

Q. How far south of the Mississippi shore?

A. Well say from where the oysters commence by Grand pass to Isle à Pitre and all of these places clean down to the Mississippi river.

Q. You have fished indiscriminately?

A. Yes sir.

Q. Was there ever any objection to your doing that?

A. Not any.

Q. The bill of complaint in this cause filed by the State of Louisiana against the State of Mississippi alleges that there is a deep water channel leading out of the mouth of Pearl river, as I have before mentioned, which is the dividing line between these two States. I want to ask you whether that channel has ever been recognized by you and all of the fishermen and boatmen on these waters so far as your knowledge extends as the dividing line between these two States?

A. No sir, I never heard anything of that kind.

Q. The answer of the State of Mississippi and her cross bill is to the effect that the dividing line between these two States is eighteen miles south of the shore at every point from Pearl river to the Alabama line. I wish you would please state how this line has been regarded by you during the last 50 or 53 years, and the other boatmen and fishermen in these waters, with reference to ownership, possession, and jurisdiction of the State of Mississippi to this eighteen mile limit?

A. Well sir I don't know how to explain that. We have always considered that Pearl river was the boundary line of the two States. As for the deep water channel, I don't know what you call the deep water channel. From Pearl river it runs into St. Joseph's, that runs east and west, and you have to go around there to get into Cat Island channel. That runs east and west. We always considered
1392 that the boundary line was due south from Pearl river.

Q. For how far?

A. About 20 miles.

Q. Did you always regard this channel as in the State of Mississippi?

A. Yes sir. Most undoubtedly, because there were oysters all around St. Joseph's, and Half Moon, and Cat island, and from there to the marsh and Grand pass.

Q. How far is it south of the Mississippi shore to Malheureux point?

A. Well, I could not say that now. It has been so long since I have been there that I could not say exactly. They change the names of those places so often down there. I could not say the distance exactly.

Q. It is less than 18 miles is it not?

A. Yes sir, I would not think that it was more than 18 miles any way.

Q. Do you know where Nine Mile bayou is?

A. Yes sir.

Q. The map shows that that is east of Malheureux point. Is that correct?

A. Yes sir.

Q. How wide is Nine Mile bayou?

A. Well the last time I was there I do not think it was over a quarter of a mile.

Q. And to the east of Nine Mile bayou is Three Mile bayou as shown by the map. Is that correct?

A. Yes sir.

Q. And then we have Johnson bayou. Do you know where that is?

A. Yes sir, I have heard of it, but every man that comes along there gives it a different name.

Q. And to the east of that we have Turkey bayou. Do you know where that is?

A. Yes sir.

Q. And to the east of Turkey bayou is Grand pass. Is that correct?

A. Yes sir.

Q. Grand pass as we understand it separates Isle à Pitre from the string of islands west of it?

A. Yes sir.

Q. You know where Creole gap is do you not?

A. Yes sir.

Q. It has been testified in this case that Creole gap is in part an artificial water course that cuts Isle à Pitre in two. Do you know whether that is true or not?

A. Well these storms had a great effect on these bayous. One storm would come along and fill it up, and next one would wash it out. For instance there is Grand pass. When I went there in the 50's it was not a quarter of a mile wide. Now it is two and a half miles wide. There were good oysters in there then but they are all washed away now. The reefs inside of it are washed up.

Q. You mean the natural reefs of oysters?

A. Yes sir, and in proportion all along through the marsh there. There are places that have been washed away there and others filled up, but from the chart there I recognize it as the same it was fifty years ago with the exception of some places that are washed away.

Q. I will ask you to please examine this chart exhibited with the cross bill of Mississippi in this cause and mentioned as Exhibit A to the testimony of Mr. W. K. M. Ducate in his cross examination by counsel for Mississippi as a witness introduced by the State of Louisiana and say whether the general contour of this chart or map correctly shows the Mississippi sound south of the Mississippi shore

and what is termed the Louisiana marshes within 18 miles of the Mississippi shore. Tell us whether this map is correct or substantially correct in showing land and water and the general surface and contour of the territory disputed in this cause?

A. Yes sir, that looks to me that it is about the same as when I went through it.

Q. Do you mean to say when you first went through it?

A. Yes sir.

Q. When did you first go through it Captain?

1393 A. In about 1851 or maybe before that.

Q. Do I understand you to mean that this map discloses the surface of water and land up there now about the same as it was fifty years ago?

A. Yes sir, it looks the same to me with the exception of some places as I stated before that are made wider and others narrower from the blows.

Q. This map indicates that boats of light draft may go through Nine Mile bayou into False Mouth bay, down into Treasure bay and Lake of the Mound, eighteen miles south of the Mississippi shore. Please tell me whether you could do that fifty years ago?

A. Yes sir, you could do that with a boat not drawing more than four feet.

Q. This map also indicates that you can pass through Three Mile bayou into Three Mile bay, passing between Raccoon island and little Raccoon island into False Mouth bay and around Mud island into Indian Mound bay and on down into South West pass about 18 miles south of the Mississippi shore?

A. Yes sir.

Q. Could you do that fifty years ago?

A. Yes sir, I think you could. All through there.

Q. And it also indicates that through Jones bayou you could pass down through West Karako bay to Indian Mound bay and on by water eighteen miles south. Could that be done when you first knew this country fifty years ago?

A. Yes sir, it could be done there then.

Q. I ask you this same thing with reference to Turkey bayou. Could you go through that way down as far south as 18 miles fifty years ago?

A. I have seen boats go through that way. I have not been through there, but I have seen boats go through there.

Q. Tell us what you know about Grand pass in the last fifty years please sir?

A. Well, Grand pass, as I stated a while ago, I don't think that it was over a quarter of a mile wide where it is two and a half miles wide now.

Q. What does that connect with?

A. On the west it connects with the other Louisiana shore; Louisiana marsh, and on the east the same thing down towards Isle à Pitre.

Q. What is on the east side of it?
A. Isle à Pitre.
Q. What is to the north of it?
A. Water.
Q. What water?
A. Lake Borgne.
Q. North of Grand pass?
A. Yes sir.
Q. It is Mississippi sound, is it not?
A. You do not get to the Mississippi sound until you get to St. Josephs island. The other part of it is Lake Borgne.
Q. What divides Mississippi sound from Lake Borgne. St. Josephs island?
A. Yes sir, that is the way that I have always understood it.
Q. Is not St. Josephs island a great distance to the west of Grand pass?
A. To the north of it.
Q. To the north west?
A. Yes sir.
Q. And due north of Grand pass is what?
A. North of Grand pass?
Q. Yes. What water is north of Grand pass. Is it the Mississippi sound?
A. Yes sir, and Lake Borgne comes as far as St. Josephs.
Q. And east of St. Josephs is the Mississippi sound?
A. Yes sir.
Q. What is this to the southeast of Grand pass? What water?
A. Well that is the Mississippi sound too.
Q. Mr. Clemens I wish you would tell us what right you and other boatmen have been exercising in what you call the Louisiana marshes for the last fifty years?
1394 A. What right? Well, sir, at that time we always got license for our boats that gave them the privilege of fishing
Q. Where did you get your license?
A. In Mobile and in New Orleans.
Q. What did you do after you got your license?
A. Fished oysters.
Q. Where did you fish oysters?
A. All through the Louisiana marsh.
Q. Have you any personal knowledge of any crimes committed or supposed to have been committed in what we term the Louisiana marshes and within eighteen miles of the Mississippi shore of which the Mississippi authorities took jurisdiction. If so state what they were?
A. No sir I never heard of any crimes committed except of one case of a boy getting drowned. Kennedy I believe was the name.
Q. When was this?
A. It must have been 12 or 14 years ago.
Q. Where was he drowned?

A. I could not say. I heard at the time, but I don't remember.
Q. Did you see the body?
A. I did.
Q. Where was the body when you saw it?
A. It was landed in front of the cemetery here.
Q. In Biloxi?
A. Yes sir.
Q. Was an inquest held over this body?
A. Yes sir, I was on the jury.
Q. You were on the jury of inquest?
A. Yes sir.
Q. Was violence charged by anybody?
A. Well yes sir, there was some talk about it but there was nothing proved.
Q. Who was charged if you remember?
A. Well, it was his brothers. Two brothers I think.
Q. As a member of this jury of inquest can you tell us where the body was found?
A. I heard, but I don't remember where it was.
Q. Do you know whether it was not somewhere below Isle à Pitre?
A. That is what I heard, yes sir.
Q. Is that what was proven before your jury?
A. I don't remember that how it was proven.
Q. Please refresh your memory and say whether or not this body was picked up about Jack Williams bay?
A. That is what I heard. That the body was picked up there. It was not drowned there. He did not fall off the vessel there. That is what the testimony was before the jury. But afterwards they found the body. I don't know how long afterwards.
Q. Who was the officer that held the inquest?
A. I don't remember that, but Dr. Peeley was the physician.
Q. Was it an officer of Harrison county, Mississippi?
A. Yes sir.
Q. Where did the doctor of whom you speak reside? Where did he live?
A. In Biloxi.
Q. In Biloxi, Mississippi?
A. Yes sir, Dr. Peeley.
Q. Were other witnesses introduced before the jury on which you sat in inquest upon the body of Kennedy that testified about the case?
A. There were no witnesses that I know of except the two brothers.
Q. Do you know what was developed before that inquiry as to where the boy Kennedy was drowned or murdered as the case might have been?
A. No sir, all of the report that was here was that in pushing a pole he fell overboard.
Q. At what point, do you remember, that the proof indicated?

A. I don't remember that. It was stated at that time.

Mr. McCLURG: Counsel for the State of Mississippi announces that he has information to the effect that the record in this cause will
1395 be produced, but up to this time he has been unable to find it.

By Gen. GUION: Counsel for the State of Louisiana notes an objection to the evidence of Mr. Clemens as well as to all other evidence of the same character tending to establish what took place at the inquest held, unless the State of Mississippi shows that the record of the inquest as well as all of the testimony given at the inquest has been mislaid or lost and can not be produced.

Q. Captain Clemmens, again calling your attention to the map exhibited with Mississippi's answer and cross bill in this cause, I will ask you to especially note the red lines marked out of the mouth of Pearl river, thence following what is supposed to be the Louisiana main land around to a point 18 miles south of the Mississippi shore, thence eastwardly intending to indicate a line out 18 miles from the Mississippi shore all the way to the Alabama line. Looking at these red lines I want you to say to the court whether or not these red lines correctly indicate what has been your understanding, and the understanding of all others using and frequenting the territory within the reach of these red lines as being Mississippi territory or belonging to the State of Mississippi?

A. Yes sir, we have always considered it as such. All of them that I knew of at that time were fishing there. We always considered that Mississippi territory.

Q. That covers how many years?

A. Well since 1851.

Q. About 53 years then?

A. Yes sir, there abouts.

Q. Are we to understand from this statement made by you that for the last 53 years so far as your personal knowledge goes that this territory has been considered belonging to the State of Mississippi?

A. Yes sir.

Cross-examination.

By Gen. GUION:

Q. Mr. Clemens, I understood you to say that the inquest that was held here in Biloxi was held about ten or twelve years ago?

A. Yes sir, twelve or fourteen years ago, I think it is.

Q. On the body of a boy named Kennedy?

A. Yes sir.

Q. You have no recollection as I understand you of any witnesses having testified where the body had been found?

A. No sir, not with the exception of his brothers that were with him.

Q. The two brothers?

A. Yes sir.

Q. Are those two brothers where they can be reached by the process of the court?

A. Yes sir, they are here.

Q. You don't remember any facts given in evidence at the examination held by the coroner, or who-ever held the inquest as to the place where the body was drowned?

A. Well they stated at that time, but I don't remember where the body was found.

Q. And you don't remember where they stated?

A. No sir. I do not. The body was brought up on the beach at the cemetery and then carried up to the grave and there the coroner held the inquest at the grave. They found no marks of violence on him. Nothing but bruises.

Q. When did you first take out a license as a fisherman to fish oysters?

A. Well about the first boat that I had charge of was about in 1856. Previous to that I was a hand on a boat.

Q. Previous to 1856 you were simply an employee of others?

A. Yes sir.

Q. But in 1856 you began to gather oysters on your own account?

A. Yes sir.

1396 Q. And you got a license to fish oysters from whom?

A. From New Orleans and from Mobile.

Q. What person in New Orleans did you get it from?

A. From the custom house.

Q. From the custom house?

A. Yes sir.

Q. And from what person in Mobile did you get the license to fish oysters?

A. From the custom house.

Q. From the custom house?

A. Yes sir.

Q. Have you any of these licenses in your possession?

A. No sir, it did not say in that, "oysters and fishing license." It says coasting license and fisheries.

Q. Did you understand that this license gave you the authority to fish oysters?

A. Yes sir.

Q. Were you informed by any of the officials in the custom house that you had the authority to gather oysters under that license?

A. Yes sir, we always asked that. What did it consist of, the fisheries. "Well you can fish anything you please." "Oysters, fish, crabs or anything else."

Q. That was told you by whom. Do you remember?

A. The custom house officer that issued the license.

Q. You don't remember any of their names, do you?

A. No sir.

Q. Captain, do you think you could not find one of these licenses if you were to look among your papers?

A. No sir, because I owned three or four boats, and when you sell the boat you give the license with it.

Q. When was the last one that you took out?

A. The last one was at the commencement of the war. About 1862 was the last one that I took out.

Q. 1862. That is during the war?

A. Yes sir.

Q. Do you remember who was in charge of the office in New Orleans at that time?

A. No sir, I could not say.

Q. And it was by virtue of these licenses and the supposed right you had that you gathered oysters in what you called the Louisiana marshes?

A. Yes sir.

Q. Did you apply to any authorities in Louisiana for this privilege?

A. Well you could go with this license any where. Alabama, Mississippi or Louisiana. It did not make any distinction where we were to catch oysters. We brought oysters to New Orleans and brought oysters to Mobile and brought oysters here even.

Q. Do you say that you got any authority from any person representing the State of Louisiana to fish oysters down in the Louisiana marshes?

A. I got the authority from the custom house.

Q. That was the United States office, was it not?

A. Yes sir.

Q. It was not an official holding the authority from the State of Louisiana?

A. No sir, I suppose not. It was at the custom house.

Q. I may be mistaken but I understood you to say just now that you and other fishermen had fished oysters down in what you call the Louisiana marshes as far back as 1851?

A. Yes sir.

Q. That you were then employed; in the employ of others?

A. Yes sir.

Q. And that you kept that up until when?

A. Until 1862.

Q. Until 1862?

A. Yes, sir.

Q. Well have you been fishing oysters since 1862?

A. No sir, not to sell.

Q. You mean to make a distinction then between the fishing of oysters for sale which you did from 1851 up until 1862, and fishing for oysters not for sale since 1862?

A. Yes sir, I did in this way. Previous to that we used to
1397 carry our oysters to market.

Q. Previous to what?

A. Previous to this time.
Q. You used to carry your oysters to market?
A. Yes sir.
Q. And since 1862?
A. Since 1862 I have been planting oysters here on Deer island.
Q. Planting oysters?
A. Yes sir.
Q. Then as I understand you have not been fishing oysters in the Louisiana marshes since 1862?
A. No sir.
Q. You only fished down there from 1851 up until 1862?
A. Yes sir, because after that we used to fish around Mobile.
Q. Do you know much about this territory or country of what is called the Louisiana marshes since this time. Have you visited it since this time?
A. I have been there but not very often. I think I have been there three or four times since.
Q. Only three or four times?
A. Yes sir.
Q. That is since 1862?
A. Yes sir.
Q. Now I understood you to say that you fished down in these Louisiana marshes believing that Mississippi went down eighteen miles from Pearl river. Eighteen or twenty miles?
A. Yes sir.
Q. What reason had you at that time, having a license from the United States Government which authorized you as you *to* say to fish oysters in Louisiana and Mississippi and Alabama to consider where you were fishing?
A. Well we made no special point of where we were going. We just went according to the water and the best places to fish.
Q. You had the authority as I understand it from the United States Government to fish in Mississippi and Louisiana and Alabama?
A. Ye- sir, it did not mention that in the license though.
Q. But you knew that the license that you got from the custom house authorized and permitted you to fish oysters in these three States?
A. Yes sir.
Q. What reason had you with this license in your possession to consider where you were, whether in Mississippi or Louisiana or Alabama?
A. We did not consider it at all. We just went where the oysters were the thickest.
Q. You went where you found the oysters?
A. Yes sir.
Q. Regardless of where they were?
A. Yes sir.

Q. Well what basis of information had you for fixing upon the 18 or 20 miles limit from Pearl river?

A. Well I can not exactly explain that, but all of the boatmen understood that the boundary line was Pearl river and eighteen miles due south of Pearl river.

Q. 18 miles due south?

A. Yes sir.

Q. Then if you would see upon the map that has been shown to you that the line is not due south of Pearl river, it would not be the line that you supposed was the line that governed you and other fishermen in finding the line between Louisiana and Mississippi would you?

A. Well Judge, that way we haphazard that. We say Pearl river runs due south. It might run south east, or east south east or some where around there. We never mentioned anything of that kind, but the supposition was among the boatmen that this was the boundary line between the two States.

Q. And that was the prevailing idea among the fishermen, you say?

A. Yes sir.

Q. That the line was due south 18 miles from the mouth of Pearl river?

A. Yes sir.

Q. Well now could you tell me what point you considered
1398 was 18 miles due south of Pearl river?

A. Well no, I could not say exactly now. Well from Pearl river that would go way into the marsh.

Q. I understand that, but what point in your mind could you fix upon as being the point which was 18 miles due south of Pearl river. I am now speaking without reference to your examining any maps. I am trying to test your memory.

A. Well due south from Pearl river. It ought to hit Three Mile bayou I think. Inside of Three Mile bayou.

Q. Do you consider Three Mile bayou about 18 miles?

A. No sir, inside of the marsh I say.

Q. You mean south of it?

A. Yes sir.

Q. How far is it to Nine Mile bayou from Three Mile bayou?

A. I could not say that now. It is a good distance though.

Q. Three Mile bayou is a good distance east of Nine Mile bayou?

A. Yes sir.

Q, Can you fix on some point due south of Pearl river. I don't want to go as far east as Three Mile bayou, but due south of Pearl river which is eighteen miles south of it?

A. No sir, I could not fix on any point and be sure of it.

Q. Did you ever fish as far down south as Drum bay?

A. Yes sir.

Q. Did you ever fish as far south as Live Oak bay?

A. Yes sir. No, I did not know it by that name then.

Q. Did you consider Drum bay and California bay in Mississippi or Louisiana?

A. Well we could not say Judge. We considered the whole business there in Mississippi at that time because we were never restrained from catching anything and nobody told us anything about it.

Q. No Louisiana authorities ever interfered with you did they?

A. No sir.

Q. No question was ever raised as to where you were?

A. No sir.

Q. Did I not understand you to say that you fished as far south as the Mississippi river?

A. Yes sir.

Q. Do you mean the mouth of the Mississippi river?

A. No sir.

Q. How do you mean as far south as the Mississippi river?

A. Right back on the quarantine station. That is a little north of Breton island.

Q. I understood you to say, Mr. Clemmens, in your testimony in chief that in fishing oysters you and others fished oysters as far down as the Mississippi river. Will you please indicate some point on the map before you marked "Tunison's new railroad, post-office, and distance map of Arkansas, Mississippi and Louisiana," which has already been offered in evidence for the State of Louisiana and state what point you have reference to as being one as far as the Mississippi river to which you went in fishing oysters?

A. I went as far as Eloi bay, Point Chico and Lake La Fortuna.

Q. Now I will ask you also if you remember having fished in what is called Junius pass?

A. Yes sir, I have but I don't remember the distance now.

Q. Well at the time you were gathering oysters in these waters had you any mind or idea of not going upon Louisiana or Mississippi either?

A. No sir, we considered it, the whole of what you call the Louisiana marsh. We considered all of that Mississippi marsh.

Q. Even as far south as Drum bay?

A. Yes sir, the boatmen considered it that way.

Q. Did you consider Point Chico as being in Mississippi?

A. Yes sir, we never made any inquiries about the boundaries or any thing that way you know.

Q. You were not concerned in boundaries at that time were you?

A. No sir, or nobody else.

Q. Was this matter discussed much between you and others at that time as to where this boundary line was between Louisiana and Mississippi. Were these boundary lines discussed between you
1399 and others connected in fishing oysters.

A. No sir, not unless the question came up. Do you mean since the question came up?

Q. No, at the time you were fishing oysters?

A. No sir, we never thought of such a thing.

Q. What depth of water at the time you were fishing oysters, down there in 1851 up to 1856 was there in Nine Mile bayou?

A. Well sir that portion of Nine Mile bayou. Five feet, six feet, and sometimes as high as seven feet. It is all according to the tides.

Q. After you get out of the Nine Mile bayou going south into the marsh proper, what depth of water was this?

A. Different depths. From four to five feet and some places three feet. I have gotten aground many a time drawing two and a half feet going through there. It is all according to the tides.

Q. How about the depth of water in Three Mile bayou? Was this more or less than this in Nine Mile bayou?

A. I think that it was about the same.

Q. And the marsh south of Three Mile bayou. Would this correspond with the marsh south of Nine Mile bayou?

A. Yes sir, very near it. As I mentioned during the storms some of the places would fill up and others get deeper, and *vice versa*.

Q. You did not then as a resident of Biloxi and a citizen and resident of Mississippi fish in what is called the Louisiana marshes at the point where you did in the belief that you were simply fishing in Mississippi waters did you?

A. Well not exactly.

Q. Did you understand that you had the right to fish whether it was in Louisiana or Mississippi?

A. Yes sir.

Q. In any part of this marsh?

A. Yes sir. We had the right according to our license.

Q. Do you know why this country down there was called the Louisiana marshes?

A. No sir.

Q. You never heard?

A. No sir. Why it was called the Louisiana marshes?

Q. Yes sir?

A. No sir.

Q. Did you ever enquire?

A. No sir.

Q. I understood the question or rather one of the questions put to you just now by counsel for Mississippi as suggesting to you and possibly your having answered it with the idea that you were answering the suggestion that Mississippi had in some way in her sovereign capacity claimed jurisdiction over some part of this Louisiana marsh. Do you know of any instance where Mississippi as a State has claimed jurisdiction over any of the Louisiana marshes?

A. Well not that I know of except since this talk has come up over it. Since this boundary question has come up.

Q. How long ago has this been?

A. It has been now a couple of years has it not?

Q. I would prefer you to answer it yourself?

A. I do not keep track of these kind of things at all. Only what I see in the papers and what I hear about the boundary question.

Q. In what way has the State of Mississippi been assuming jurisdiction since the time that you speak of. Since the last two or three years that you mention?

A. They claimed it I suppose because they thought it belonged to them.

Q. In what way has she been exercising any jurisdiction over it?

A. I don't know that sir.

Q. Was there any part of this Louisiana marsh or what is called Louisiana marsh assessed in the State of Mississippi?

A. I could not say.

Q. Does the State of Mississippi or any of the counties of Jackson, Harrison or Hancock collect any taxes on any of the lands lying in what is called the Louisiana marshes?

A. I could not answer that.

Q. Don't you know that it is a fact as an old resident of Biloxi that there are no taxes collected in this county, Harrison
1400 county, on any lands south of Harrison county in what is called the Louisiana marshes?

A. I don't know anything at all about that sir.

Q. Mr. Clemens, at a point south of Pearl river where you say; or rather to which you say the boundary line of Mississippi extends in your opinion, or as you and others believe. Starting from that point going eastward to the Alabama line is there any channel leading across this marsh?

A. Well there is Cat Island pass. That is about the only channel south of Cat island.

Q. Cat Island pass is east of Isle à Pitre, is it not?

A. East of Isle à Pitre?

Q. Yes sir, is not Cat Island pass between Cat island and Isle à Pitre?

A. Yes sir.

Q. I am not speaking of the north east part of this territory. I am speaking of the extreme southwest corner. As I understood you to say, you and others thought and believed that the Mississippi line extended due south from the mouth of Pearl river 18 miles down into the Louisiana marshes?

A. Yes sir.

Q. Now I ask you whether starting from this south western corner and going eastward towards the Alabama line is there any channel along that border line coming out into the deep water?

A. Well there is no channel except Cat Island channel and Pass Marianne channel.

Q. There is no channel then down in the marshes?

A. Yes sir, it is open and you can go through the marsh. You can go in between the Chandeleurs and the marsh.

Q. Between Chandeleur islands and the marsh?

A. Yes sir.

Q. I speak of in the marsh proper?

A. I say from different parts of the marsh you can go into the Chandeleur bay, I believe they call it, without coming clean out.

Q. You don't seem to have exactly understood my question. What I want to know is whether there is such a thing as a channel of water, water deep or shallow, that would conduct you from the south west corner of the line drawn from the southern corner to the eastern extremity of that line going east. Any channel through the Louisiana marshes?

A. No sir, you can go from one bayou to another and then come out as I say.

Q. Now examine this map about which you have already been testifying which is a map offered by Mississippi and concerning which her counsel has just examined you in chief and state whether on a line you find marked on this map in red ink; starting from the southwest corner and coming across eastward towards the Alabama line, does it not cross there bodies of land as well as water. Does this red line which is the most southerly line drawn on this map extend across land in going eastward?

A. Well it looks to me like this is all land that the line goes through. There is no channel that I know of.

Q. There is no channel that you know of extending from this southwest corner going eastward?

A. From the south west line of Louisiana marsh proper going eastward you can go between Grand pass. There are some islands there.

Q. Here is Grand pass way up here. I am not speaking about that part of the country up here. Is this red line here the channel?

A. No sir, if it is I don't know it.

Q. Do you know how far from the Mississippi shore this red line is Mr. Clemens that you have just been testifying about. How far this red line is from the shore?

A. No sir, I could not say.

Q. Then you cannot testify can you that it is 18 miles from the shore line of Mississippi?

A. Well no, I would not swear to that unless I measured it.

Q. Unless you measured it?

A. No sir.

Q. Can you measure it from this map?

A. No sir.

1401 Q. The reason I ask you is that it has been testified to by one of the witnesses for the State of Louisiana that this line was more than 18 miles south of the shore line of Mississippi.

A. (The witness does not answer this question.)

Q. One of the witnesses stated that it was 25 miles at some points.

A. (The witness makes no answer to this question.)

Q. Well now have you any idea how far Petit pass is from the mouth of Pearl river?

A. No sir, it is so long since I have been out there that I could not say.

Q. Do you know how far Round island is from the mouth of Pearl river?

A. Round island is inside of the marsh is not it. I don't know it by that name.

Q. You don't know of any island by the name of Round island?

A. I have heard of it.

Q. Where is it?

A. I could not say.

Q. Where was it when you heard of it?

A. I have heard of it since I have been out there. Judge, all of these oystermen go out there and they come to places and they give them different names.

Q. The Round island that I am speaking of is not in the marsh?

A. The only Round island that I know of is east of here.

Q. The Round island that I am speaking of is supposed to be and is south of Grassy island.

A. Well I know where it is then. I know the island but I don't know it by that name.

Q. How far is it from the mouth of Pearl river?

A. Well I don't think that it is over ten or twelve miles.

Q. Well some witnesses have testified if I am not mistaken that there was an island known as Round island which has entirely disappeared. Is that the one that you have reference to?

A. There is an island on this side of Grassy island. The last time I was there was 12 or 15 years ago. I could not say any thing about its disappearing since. I have never heard that it disappeared.

Q. Do you know how far south of the shore line of Mississippi Half Moon island is?

A. From the shore proper or from the marsh?

Q. From the Mississippi shore?

A. Well you might call it two shores, because there is a main land and then a lot of marsh run out where the channel commences. Do you mean from that or from the shore proper?

Q. Well take both. Well we will take the main land first. How far is it from that to Half Moon island?

A. I don't think it is over five miles.

Q. How far east from the edge of the marsh?

A. I could not say about the marsh. That marsh must be at least a mile or a mile and a half wide from the shore.

Q. What point on the Mississippi shore is due north of Half Moon island?

A. St. Josephs comes about the closest on it.

Q. St. Josephs?

A. St. Josephs island.

Q. I am not speaking of islands. I am now speaking of the main land. What part of the main land?

A. I don't know the name of that place there. Claiborne poin they call it.

Q. Is that marsh along there?

A. No sir, that is on the main land.

Q. Is there a marsh off the point?

A. Yes sir, there is St. Josephs island, and three or four litt islands lying between that and St. Joseph.

Q. Did you ever go down Turkey bayou?

A. I think I have.

Q. When was this. Do you remember?

A. It was a long time ago.

Q. Did you ever go down Three Mile bayou?

A. Yes sir.

1402 Q. You have been down Nine Mile bayou?

A. Yes sir.

Q. How far down Nine Mile bayou have you been?

A. I have been all through there. I could not tell you the di tance.

Q. You have gathered oysters all through this country?

A. Yes sir.

Q. And you have gone down as far south as Drum bay?

A. Yes sir.

Q. And Junius bay?

A. Yes sir.

Q. Now Mr. Clemens tell me if you please the exact line that yo and other boatmen understood to be the line drawn from the mout of Pearl river going south. Where did it strike the Louisian marshes?

A. Well sir, we considered the whole Louisiana marsh as belon ing to Mississippi.

Q. I understand you——

A. We have made no distinction about any line. We neve thought of such a thing. All that we knew was that Pearl rive was the boundary line.

Q. That is the boundary line between the western part of Missi sippi and the eastern part of Louisiana, you mean do you not?

A. Yes sir.

Q. What I want you to tell me if you can is what point in t Louisiana marsh do you first strike in drawing that line due sout from Pearl river?

A. Well you would strike about Bayou Boudreaux, I think the called it then. I don't know what they call it now.

Q. Where is this? Is it any where near Malheureux point?

A. No sir. Malheureux point lies to the east of that.

Q. Is it anywhere near Petit Pass island?

A. No sir, that is to the eastward of that too.

Q. Petit Pass island was to the eastward of Bayou Boudreaux?

A. Yes sir.

Q. Is there not a Bay Boodre too?

A. No sir, they always called it Bayou Boudreaux.

Q. Was it your understanding and the understanding of every one that was engaged in fishing at that time that the line after it left Pearl river went due south all the way down 18 miles into this marsh?

A. We never thought any thing about lines sir. We never thought anything about the lines.

Q. I understood you to say a while ago in giving your testimony in chief that you had always understood that the lines of Mississippi; the southern boundary line of Mississippi after it left Pearl river was 18 miles due south of Pearl river?

A. Yes sir.

Q. Well now I ask you the question whether you considered that the line that you refer to as being the southern boundary line of Mississippi was reached by going due south from Pearl river right straight down?

A. I do not get that exactly.

Q. You don't understand my question?

A. No sir.

Q. What I asked you was this Mr. Clemens. In order to find the southern boundary line of Mississippi after you leave the mouth of Pearl river, which is the boundary line between eastern Louisiana and western Mississippi, how far south do you go of Pearl river?

A. Well I don't know exactly how to answer that.

Q. Did you not state awhile ago that you understood that the Mississippi southern boundary line was found by going south 18 miles after you got out of Pearl river?

A. That is what I heard.

Q. That is what you understood?

A. Yes sir.

Q. I say was this understanding in your mind this. That this southern boundary line was found by going due south after
1403 you come out of Pearl river?

A. Well I don't know how they found it. I could not say that.

Q. Did not you undertake to say awhile ago when you had this map before you that was introduced in evidence that the line followed a certain course indicated by red marks?

A. Yes sir. I don't know anything at all about these red marks though.

Q. You don't know anything at all about that?

A. No sir.

Q. Did you ever hear anything at all about the line running down from Pearl river due south to a certain point and then going eastward to a certain point and then down Nine Mile bayou?

A. Well I have heard talk of that kind yes sir, but I never paid any attention to it at all.

Q. When did you hear that?

A. I could hear that every day when the crowd gets to talki about the boundary line, but I never paid any attention to it.

Q. When did you first hear of it?

A. Why about a year or so ago, I suppose.

Q. That is the first time, a year or so ago, that you heard abo this line being the line?

A. Yes sir.

Q. Going south to a certain point and then going around by t Nine Mile bayou?

A. I did not say anything about it going around anywhere.

Q. Going down by Nine Mile bayou?

A. No sir, it did not mention any thing about no bayou all of t time I have heard.

Q. Did you ever hear then, I will put it that way, that the li between Mississippi and Louisiana went down Nine Mile bayou?

A. No sir.

Q. Or followed Nine Mile bayou?

A. No sir.

Q. You testify for yourself and other fishermen that the line b tween the southern boundary line and Mississippi was found b going 18 miles due south after you left Pearl river.

A. Yes sir.

Q. I understood you to say that you had never heard any thi about the claim of the deep water channel being the boundary li between Mississippi and Louisiana. Am I correct in that?

A. Me hearing about the deep water channel?

Q. I understood you to say that you had never heard any clai being made that there was a deep water channel that separated Mi sissippi and Louisiana?

A. Well I have heard people talk about that. That Louisian claimed that.

Q. When did you hear that first?

A. I heard that some time ago. I could not say exactly when bu I heard that when this question came up.

Q. Do you remember when was the first time that you heard it

A. No sir, I could not say.

Q. Where were you planting oysters?

A. Right out here at Deer island.

Q. Are you planting there now?

A. No sir.

Q. How long have you been planting oysters there?

A. A couple of years. We are out of seed now.

Q. How far is that from Biloxi?

A. Right over here. That island that you see over there.

Q. The court don't know about that. How far is it?

A. I would call it about a mile.

Q. Is it a good bedding country?

A. Yes sir.

Q. Is not this whole coast country here a good bedding country for oysters?

A. Yes sir, very good.

Q. Is it not a good bedding country from Pearl river as far as the Alabama line?

A. Well no.

Q. Where is it that it is not good?

A. Well from Hendersons point clean here to the Biloxi pass. It is too much exposed. You plant oysters there and they will
1404 get covered up. That has been tried. There are people that have tried it.

Q. Covered up by what?

A. By the sand and mud.

Q. That is not the condition of the coast here?

A. No sir, you plant them here and Deer island and Back bay and all the way down to Pascagoula.

Q. How far is that?

A. Pascagoula is 25 miles from here.

Q. That is all good bedding country, is it not?

A. It is all good bedding country.

Q. Are there any natural reefs along there?

A. Yes sir, at Pascagoula there is.

Q. What was your reason for stopping fishing oysters in Louisiana marshes as far back as 1862?

A. Because I quit it altogether.

Q. You quit the business?

A. Yes sir.

Q. Is there not a channel between Cat island and Isle à Pitre?

A. As I stated before there is a channel between the islands but there is hardly any water in it. You could not take more than three or three and a half feet in good tide.

Q. Between Cat island and Isle à Pitre?

A. Yes sir.

Q. How do vessels come in here?

A. They come through Ship Island pass and Cat Island pass.

Q. What do you call Cat Island pass?

A. South of Cat island.

Q. Between Cat island and Isle à Pitre?

A. Yes sir.

Q. How far does this extend?

A. As far as St. Joseph island.

Q. How far is St. Joseph island from the mouth of Pearl river.

A. About five miles I suppose.

Q. From St. Joseph island to Pearl river is there a channel?

A. Yes sir.

Q. The same channel as comes through there?

A. No sir, you call it St. Joseph channel.

Q. But that is a channel of about the same depth is it not?

A. No sir, there is more water in St. Joseph channel than in Cat Island channel.

Q. There is more water in there than in the Cat Island channel?

A. Yes sir.

Q. How much water is there in Cat Island channel from Cat Island pass to Mound island?

A. You can take from seven feet to eleven feet.

Q. And that channel passes north of Half Moon island, does not it. It passes between St. Joseph and Half Moon island does not it?

A. That channel passes south of Half Moon.

Q. Are not you mistaken about that?

A. No sir.

Q. Where does the St. Joseph channel strike it?

A. After you get out of Cat Island pass you go around north of west and go into St. Joseph pass.

Q. I understand, but let's start from Cat Island pass. The pass between Cat island and Isle à Pitre, going towards Pearl river. That pass has as much as from seven to eleven feet of water in it?

A. Yes sir.

Q. That channel goes until it strikes St. Joseph channel does it not?

A. Yes sir.

Q. At what point does it strike St. Joseph channel?

A. I could not say that exactly. It always cuts off there when you get clear of Half Moon. They come right across St. Joseph. To the east of St. Joseph in to the St. Joseph channel.

Q. And that takes you to Pearl river does it not?

A. That takes you to Pearl river.

Q. What is the depth of this channel?

A. In some places it is 20 to 25 feet deep.

1405 Q. Are you not mistaken when you say that this channel is south of Half Moon. Does it not come north of Half Moon island?

A. The St. Joseph channel? Yes sir.

Q. The St. Joseph channel is north of Half Moon is it not?

A. Yes sir, we are talking about Cat Island channel?

Q. I am talking about the channel leading out of Pearl river and going eastward which you claim is St. Joseph channel?

A. Yes sir.

Q. That channel runs north of Half Moon island?

A. Yes sir.

Q. Where does it strike Cat Island channel?

A. It don't strike it at all. It comes right on to Pass Marianne.

Q. Where do the two channels intersect?

A. The Cat Island channel shoals off when it comes close to Grassy island there, and then the vessels cut off between that and St. Joseph and go into St. Joseph channel.

Q. How do they go from St. Joseph to another one?

A. Simply crossing over.

Q. From one channel to another?

A. Yes sir, after you leave Cat Island pass there is a difference of a foot or two between that and St. Joseph's. The vessels never attempt to go through there that draw over seven feet.

Q. Let's go back from that. When you go between Isle à Pitre and Cat island. Through this Cat Island channel. That channel leads through there going west. How far does this channel go before it loses itself?

A. Up to Grassy island.

Q. North or south of Grassy island?

A. North of it.

Q. North of Grassy island?

A. Yes sir.

Q. Well then where is what you call St. Joseph channel?

A. To the south of St. Joseph island.

Q. And it goes as far as Pearl river, does it not?

A. Yes sir.

Q. Well now how does a vessel for instance that goes in between Cat island and Isle à Pitre get to Pearl river? What channel does it take?

A. The vessel comes from the outside and it takes the Cat Island pass, and comes as far as Grassy island and comes north into the St. Joseph pass.

Q. I understand you now. At Grassy island where the Cat Island pass loses itself the vessel would take a northern course?

A. Yes sir.

Q. And it goes up into the St. Joseph channel?

A. Yes sir.

Q. How far are those two channels apart at Grassy island?

A. About three or four miles or some where along there.

Q. Is there deep water at that point. At Grassy island?

A. There is about eight or ten feet there.

Q. You can take that way from one channel into the other?

A. Yes sir.

Q. How deep is St. Joseph channel?

A. In some places it is 25 feet deep.

Q. From Pearl river until you get north of Grassy island?

A. From the Rigolets. You don't want to go that far.

Q. No, I am talking about from Pearl river?

A. You can take eight or nine feet there before you get to St. Joseph and then 20 or 25 feet.

Q. What is the channel called Mr. Clemens that comes out of the Rigolets. Is not that St. Joseph?

A. No sir, we call that Lake Borgne.

Q. Is not there a channel that comes out of the Rigolets?

A. Yes sir, there is a channel, but I never heard it called any name.

Q. How far does that go eastward? Does it strike either St. Joseph channel or Cat Island channel?

A. It don't strike Cat island at all. It strikes St. Joseph.
Q. At what point?
A. It is on a straight line from St. Joseph to the Rigolets.
Q. It strikes St. Joseph?
A. Yes sir.
1406 Q. How far does St. Joseph channel run eastward from St. Joseph island?
A. I think that it goes as far as Pass Marianne. They call it Marianne pass.
Q. Where does it go into the deep water?
A. From Pass Marianne.
Q. Yes sir?
A. It goes out at Ship island
Q. North of Ship island?
A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. Gen. Guion asked you Mr. Clemens about going through Nine Mile bayou, Three Mile bayou, Turkey bayou and I believe Grand pass. When was it that you first went through these streams?
A. In the 50's.
Q. In what sort of a craft or vessel did you go through them?
A. Schooner.
Q. Schooner of what draught?
A. Two feet to two and a half feet.
Q. How far south did you go then?
A. I could not say how far south. I went all through it.
Q. You went down into the marshes did you?
A. Yes sir.
Q. Gen. Guion asked you about whether there were any channels in the marshes proper, and I think you answered that there were none. I want you to answer me now whether you had any trouble with a schooner drawing two or three feet in going around through the waters of these marshes in 1851, 1852, 1853 and along that time?
A. Well some times we had a little trouble. We would run out of the channel and get on a mud lump. The channel proper was so crooked that once in a while you would get out of it.
Q. I understand you to mean there is something like a channel through these marshes?
A. There are channels all through the marshes from one bayou to another. For instance you leave that Indian Mound Bay island. You have a channel to go through there, and on both sides of that is maybe oyster reefs.
Q. Could you go with a boat drawing three feet through Nine Mile bayou to False Mouth bay down into Treasure bay?
A. Yes sir, you can go from any of these places to any other.

Q. With a boat of three feet draught?
A. Yes sir.
Q. You said to Judge Guion that you did not know any thing about this red line on the map about which we have examined you?
A. Yes sir.
Q. And you have also stated that your general understanding was that the Mississippi line extended 18 or 20 miles south?
A. Yes sir.
Q. That is true as to your understanding regardless of the red lines?
A. Yes sir.
Q. And that has been your understanding for fifty years? Is that correct?
A. Yes sir.
Q. That Mississippi extended 18 miles south?
A. Yes sir, I have always understood it that way.

Here the commission adjourned until the afternoon session.

The commission reassembled Thursday afternoon, and the following testimony was taken, towit:

1407 Captain WILLIAM GORENFLO, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows towit:—

Q. Where do you reside, Captain?
A. On the back bay of Biloxi.
Q. How old are you?
A. I will be 61 years old on the 5th day of this month.
Q. How long have you lived in Biloxi?
A. I came here in 1853.
Q. What is your present occupation?
A. I am engaged in the canning business at present.
Q. Oyster canning?
A. Yes sir, that is right.
Q. What has been your business since 1853?
A. Well since 1874 I have been in the oyster business, and from 1868 to 1874 I was running on boats and jobbing around.
Q. Running on a boat where?
A. Part of the time in the Louisiana marsh and part of the time fishing oysters in Mobile bay. In the waters of the marsh out there.
Q. This is a suit brought by the State of Louisiana against the State of Mississippi in regard to establishing the boundary line between the two States. The claim of Louisiana is substantially that the line between the two States is one that follows the deep water channel out of the mouth of Pearl river eastward north of Half Moon island. Into South West pass between Cat island and Isle à

Pitre and to the north east of Chandeleur into the Gulf. It is claimed on the part of Mississippi that no record should be made of any channel, but that we should follow the intention of Congress in fixing the boundary between these two States at 18 miles from the shore of Mississippi, and at each point from the shore between Pearl river and the Alabama line to the eastward. This line claimed by Mississippi extends far into what is called the Louisiana marshes. I would like for you to say please whether you are familiar with this territory that is in controversy as indicated by what I have stated?

A. Yes sir, I believe that I am.

Q. How long have you been familiar with this territory?

A. Well the first time that I went out there I spent about three weeks out there when I was a boy. I think that it was in the winter of 1858 that I went out there. I spent three weeks with my father out there. He was sick and the doctor advised him to go out there.

Q. Where was it that you spent these three weeks?

A. We went in Three Mile bayou and struck off to the westward. We went out with an old man who had a sloop called the Fairy. My father went out there and spent three weeks so as to get a change of air, and be in the open air.

Q. Where were you?

A. We spent most of the time in what they call Treasure bay where this old fellow had his traps. He was catching muskrats and otter and minks and such as that. That was my first visit.

Q. If you can state I would like for you to state in what jurisdiction you were then. In Treasury bay. Whether in Louisiana or Mississippi.

A. Well at that time we did not know where we were. At that time that question had not come up. We did not know whether we were in Louisiana or Mississippi at that time. That is really in what we claim as Mississippi now according to our present contention from the map.

Q. You say that is what we contend now?

A. Yes sir.

Q. Can you say how long we have been contending that this is in Mississippi jurisdiction?

A. Well that is more than I can say. I will say that we have been contending though for the last 12 or 14 years; we have been contending that that part belonged to the State of Mississippi.

1408 Q. Treasure bay is within 18 miles of the shore is it?

A. I think that portion of it is yes sir.

Q. Have you been in that disputed territory since that time?

A. That is the first time I went out there on a short trip when I was out there about three weeks.

Q. You have been familiar with it since that time?

A. Yes sir, during the war, of course, I was not out there then. But in 1868 I think I began to give attention to it there.

Q. I wish you would please tell us what has been your uniform understanding and so far as you are informed the understanding of

every boatman, fisherman, and the people generally who have been in that section as to about where the limits of the State of Mississippi are, and have been regarded during this time?

A. Well as I stated, I think in the last 12 or 14 years this question has been broached, but previous to that I don't think that anybody gave it any thought, whether we were in Mississippi or Louisiana. We were never interfered with by the authorities of either State, Mississippi or Louisiana, and consequently we did not think about it and did not know who it belonged to, but since this question has been agitated, when we went out 18 miles; we knew that was a good long ways out; it was natural to suppose that we were in Mississippi.

Q. 18 miles from what?

A. From the main land.

Q. Of what?

A. Mississippi.

Q. I understand you to say that you and other fishermen and boatmen and the people of Mississippi have regarded yourselves within the limits of the State of Mississippi so long as you were within 18 miles of her shore?

A. We did at that time yes sir.

Q. At what time?

A. Say the last 14 years. I think that it has been about 14 years since this agitation commenced with the papers about the boundary question. I think that it has been about 14 years since the first intimation that we had of it.

Q. How long has it been since there has been any definite dispute about this boundary line?

A. I could not say exactly. It has been about four or five years ago.

Q. Previous to that time there was never any controversy about the right to go in there?

A. No sir, there was never any controversy about it no sir.

Q. I will ask you to please examine this map before you made an exhibit with the cross bill of Mississippi in answer to the original bill of complaint filed against her by the State of Louisiana in the Supreme Court of the United States and say whether you recognize the red line beginning at the mouth of Pearl river, running southward through Lake Borgne, and thence around what are termed the Louisiana marshes by Malheureux point, and between Malheureux point and Petit pass on to Nine Mile bayou, and thence going southward and westward around what is claimed to be the mainland of Louisiana to a point westward through Lake of the Mound, and thence meandering eastward with the shore of Mississippi, and supposed to be about 18 miles from the Mississippi shore. Please say whether that is according to your personal knowledge, individual judgment and general information covering all of your past observations and experience within the limits of the State of Mississippi?

By Gen. GUION: The question is objected to by counsel for Louisiana because of its leading character, and as indicating to the witness the answer that is desired, and the counsel for Louisiana further objects that the question should be put in the form of a direct inquiry to be answered by the witness as to what he considers is and should be the southern boundary line of the State of Mississippi.

1409 A. Well, I should say that so far as the southern boundary is concerned, I would say it was well within the boundaries claimed within this State. So far as the western boundary is concerned, I don't know much about that. The western boundary, because I don't know how you measured this, but I do know that all of this portion here from Treasure bay east, and south as far as the red line is concerned I would state according to my belief that it is within the State of Mississippi. That is within the 18 mile claim.

Q. What is your belief based upon?

A. Well so far as that is concerned it is both upon the distance and from the fact that we have never been molested since we started to fishing there. Nobody has tried to stop us. We have always considered that we had a perfect right to fish there and nobody has ever tried to stop us.

Q. What State did you consider your self in?

A. We considered ourselves in the State of Mississippi.

Q. Did you ever go through Nine Mile bayou southward?

A. Yes sir.

Q. When did you first make that trip?

A. I made that trip in about 1869.

Q. In 1869?

A. Yes sir, in 1869.

Q. By what means did you go through there in 1869?

A. With a schooner.

Q. What draught was she?

A. We went through there very light.

Q. About what was she drawing?

A. I suppose that she was drawing about two and a half feet of water.

Q. Where did you go?

A. We went into a half dozen different places, but our main object was to go to Bayou Treasure.

Q. That is Treasure bay?

A. Yes sir, we called it Bayou Treasure. This is the bay. The southern portion of it was then called Bayou Treasure.

Q. How wide would you say that Nine Mile bayou was at that time?

A. Distance on the water is hard to tell. At that time I would say that it was about 150 yards wide.

Q. Did you ever go through Three Mile bayou to the southward?

A. Yes sir, that has been some time ago though that I went through Three Mile bayou.

Q. About what time was it that you first made that trip?

A. The only time that I went through there is when I went with the Evangeline, about 12 years ago. You see we did most of our fishing on West Karako bay. The most of our fishing was down through Fox bay and through this section of country in Southwest pass, into East Karako and in about Greque bayou. We did a great deal of fishing below there in Bayou Greque. Through Grand Pass into Bayou Greque.

Q. Tell me if you can Captain about how wide Three Mile bayou was when you first went through it?

A. That has been a good long while ago that I first went through Three Mile bayou. I went once through Nine Mile bayou and once through Three Mile bayou, but I don't recollect how wide it was.

Q. Did you go through Three Mile bayou with the same craft that you did Nine Mile bayou?

A. Yes sir, we went with a steamer through Three Mile bayou.

Q. How much was she drawing?

A. I suppose about three and a half feet of water.

Q. Where did you go?

A. All through here by Little Raccoon and West Karako bay and through Cranetown and came out at Elephant point.

Q. Into what?

A. Out into the Gulf. We went to Martin island and through Live Oak bay and through that section of country with a steamer, and through Drum bay, and came down again through Southwest pass. We were examining the oyster reefs at the time to see whether there were any left there.

Q. When was this?

1410 A. It is about 12 or 14 years ago that we were through there on that trip.

Q. Did you ever pass through Johnson bayou to the south of it?

A. Bayou Johnson. No sir, I was not in there.

Q. Have you ever travelled through Turkey bayou?

A. Yes sir.

Q. On what kind of a craft did you go?

A. It was a small craft.

Q. Drawing how much water?

A. About 20 inches of water through Turkey bayou.

Q. Where did you go?

A. We went into Turkey bayou and then into Karako bay.

Q. When was this?

A. That was in about the '70's.

Q. What were you looking for?

A. We were fishing oysters. There are some of the finest kind of oysters in Turkey bayou.

Q. There were at that time?

A. Yes sir.

Q. And are yet?

A. Yes sir.

Q. Did you ever pass through Grand pass?
A. Yes sir, often. Hundreds and hundreds of times.
Q. Your first trip through Grand pass was about when?
A. About 1868 or 1869, because I had to go through Grand pass to get to Bayou Greque, where our fishing grounds were.
Q. What is the largest craft you were ever in going through Grand pass?
A. Well the Nymph. 42 foot keel.
Q. Drawing how much water?
A. About five feet loaded.
Q. I notice on the map before you Creole gap. Tell us what you know about Creole gap, please sir.
A. I have been through there.
Q. Did you ever go through Creole gap?
A. Yes sir.
Q. In what kind of a craft?
A. I have been through there with the schooner Nymph. I was out there with her when I was buying shrimp. I was out there buying shrimp. In 1890, 1891, 1892 and 1893 I was out there buying shrimp.
Q. When did you first go through Creole gap?
A. I don't think I went through Creole gap, not before maybe in the '80's 1882 or something like that.
Q. Are you familiar with Isle à Pitre?
A. I have been around it and on it.
Q. Since when. How long ago?
A. I have been on Isle à Pitre since 1868 off and on nearly every year.
Q. In what State is Isle à Pitre?
A. Well that is in Mississippi too.
Q. Turkey bayou is in what State?
A. The State of Mississippi.
Q. How about Three Mile bayou?
A. That is in the State of Mississippi also.
Q. Nine Mile bayou?
A. Mississippi.
Q. Petit pass?
A. Well that I don't know. I don't know much about Petit Pass section of the country. Of my own personal knowledge I don't know how that line would run. That is from the mouth of Pearl river in the southerly direction, whether it would strike Petit pass or not. Of my own knowledge I would not know whether it would or not.
Q. False Mouth bay, and Nine Mile bay are in what State?
A. In the State of Mississippi.
Q. Treasure bay is in what State?
A. In the State of Mississippi.
Q. Indian Mound bay is in what State?
A. In the State of Mississippi.
Q. Big and Little Raccoon islands are in what State?

A. Well I don't know them. Perhaps if I know them they would call up some other name.

Q. East and West Karako bays?

1411 A. According to my belief they are in the State of Mississippi.

Q. Mud island is in what State?

A. Mud Grass island we call it. That is in the State of Mississippi. That is all up to the eastward.

Q. Crane Town bay is in what State?

A. It is in the State of Mississippi.

Q. Brush island is in what State?

A. In the State of Mississippi.

Q. Jack Williams bay is in what State?

A. In the State of Mississippi.

Q. Do you know where Grassy island is?

A. Yes sir.

Q. In what State is Grassy island?

A. If Pearl river is the western boundary that is in the State of Mississippi.

Q. And Round island? What State is that in?

A. In the State of Mississippi.

Q. La Petit Pass island is in what State?

A. I don't know anything about that.

Q. Half Moon island?

A. Half Moon island is in the State of Mississippi.

Q. St. Joseph island is in what State?

A. That is in the State of Mississippi. I don't think there is any more island there. It is all gone.

Q. What has become of Half Moon island?

A. It is washed away.

Q. I will ask you to please state what change if any there has been in the general contour of this section of the country in dispute between these two States in what we term the Louisiana marshes. That is to say whether there has been any substantial transformation in any respect since you first became acquainted with the territory?

A. As far as I am concerned I don't see but very little. In fact I don't see that I see any changes really. We have to go through the same bayou and we have to go around the same island that we did 25 or 30 years ago to get to any point. Most of the islands are there yet. The only place that I see any changes. They had some reefs on the outside of Battle Door point and they are washed away.

Q. That is on the east side?

A. Yes sir, on the east coast. They are no longer there. They are gone.

Q. Have you ever noticed whether there has been any subsidence or sinking of this section?

A. No sir. The marsh is as high as it ever was. The ground is as high as it ever was. I can not see any difference.

Q. I understood from what you said that you are familiar gener
ally from Nine Mile bayou eastward to the north east point of Isle
Pitre. Am I correct?

A. Yes sir. I have travelled over this country looking for shrimp
more than I did for oysters.

Q. For how long have you been travelling this shore?

A. I have been travelling that off and on since 1885 or 1886.

Q. Have you noticed any material changes in the coast line be
tween Nine Mile bayou, and the north east point of Isle à Pitre
during this time?

A. No sir, I could not say that I have. The bayous are there ye
and the islands are there yet.

Q. Are they there substantially the same as they were when you
first saw them?

A. They are about the same that they were then.

Q. Have waves, natural, or unnatural in the shape of storms
made any material changes in the coast between Malheureux point
and Nine Mile bayou and the northeast corner of Isle à Pitre during
your knowledge?

A. No sir, the only thing, is that it might have widened the
mouth of Nine Mile bayou right at the entrance. I think it is a
little wider there than it was. But for the balance I don't see any
changes. It has cut off a little here at Grand pass, but what it has
cut off there it has made on the other side.

1412 Q. Is it true where this is cut away at one point it has
made at another?

A. It generally does. It is this way. If there is a storm, the
marsh is all low, the water rises and the whole thing is covered.
There is nothing there to offer any resistance really to wash. It is
just one lake, one sea. You can not see any land or marsh for
miles and miles.

Q. Have you ever observed any where in this marsh about which
we have been talking, or this territory, any industrial life, such as
agriculture, horticulture, stock raising or gardening or anything
like that?

A. No sir.

Q. Is it suitable now or has it ever been to any such occupation
or habitation?

A. No sir, the only habitation that was ever down there is the
fisherman's camp that was built up there for temporary houses to
fish in. I have been out there in Grand pass several times and no-
ticed them. We had a camp at Door point ourselves. We built a
fisherman's camp there but it was swept away by the gale.

Q. That was a cheap concern was it?

A. Yes sir, it was a temporary structure, but there is no place
around there that would do to cultivate or for a man to go there
and make it his permanent home. I don't know of any such place
around there in that section of the country.

Q. Taking your eyes off of the map and relying upon your own

information and memory respecting that territory, what have you to say with reference to its adaptability for habitation or industrial life of any kind?

A. I don't believe that I would live out there if a man would give it all to me.

Q. And how does that compare with the years back since your first knowledge of it?

A. It was not any better then than it is now.

Q. No worse than it is now?

A. I don't know. About the same I think. I don't think that the mosquitoes have gotten any less or any thing like that. They are about the same.

Q. Could you say whether there is more or less water now than there was forty years ago?

A. No sir, I don't think that there is.

Q. It is about the same do you mean to say?

A. Yes sir, about the same. There may be some few places that are deeper. I believe the Creole gap is cut deeper. I think there is more water in Creole gap than there was years ago. That is about the only place that I know of.

Q. You will notice on this map a line is indicated as the deep water channel leading out of the mouth of Pearl river around to the north of Half Moon island and to the southwest of Cat island, commonly called the deep water channel, and which line is claimed by Louisiana as the true dividing line between these two States. You are familiar with that channel are you?

A. I have gone up and down that channel yes sir.

Q. Could you say whether or not that has ever been recognized as the dividing line between Louisiana and Mississippi?

A. No sir, it never has. I have never heard it claimed by any one at all until this suit came up.

Q. You say that that channel was buoyed by the United States Government?

A. Yes sir.

Q. For what purpose?

A. To mark the deep water channel for the sea going vessels.

Q. For navigation purposes and for commercial purposes?

A. Yes sir, that is really the course that was pursued by vessels that used to go to Pensacola, and Florida. They used to go over this way. There was considerable traffic from Pearl river to the mouth of Mississippi river also. There are a good many schooners around there.

Q. Boats of light draught in common commercial business. Do they pay any respect to the channel or do they travel wher-
1413 ever they find water enough?

A. Wherever they find water enough. Sometimes they save a great deal of distance in doing that.

Q. The channel, if I am not mistaken, is used for vessels of deep draught?

A. Yes sir.

Q. You are familiar with the Mississippi shore line, from P cagoula to Pearl river are you Captain?

A. Yes sir. I have travelled it as far as Moreland. I have b many times a good deal west of that, but from Moreland dow have travelled it considerably.

Q. Have there been any material changes in the Mississippi co within your knowledge?

A. No sir, not that I saw.

Q. Do you remember the storm of 1893?

A. I do.

Q. What direction did it come?

A. The hardest of the blow was about south of west. South w

Q. From the south west?

A. Yes sir, that is the hardest of it. Of course it blew very hea from the southeast, but I think that the hardest blow that we h was a little to the west of south. Southwest.

Q. Then its force was strongest against the Mississippi sho was it?

A. Yes sir.

Q How was this storm with reference to its strongest force in pa ing over this disputed territory in the marshes?

A. That I could not say.

Q. How did it cross these marshes after it touched them?

A. From my own personal knowledge I could not say what w the strongest wind out there except from conversations with survivors of the storm. Of my own personal knowledge I do know. I was on the main land when it occurred.

Q. Have you any knowledge of any violation of the criminal la of Mississippi within this disputed territory? about which you ha been talking?

A. Well I know of one case where the party was arrested for offense. That is it was supposed to be some offense that was co mitted out here at Isle à Pitre. A young man was drowned there.

Q. What was his name if you know?

A. His name was John Kennedy, and his body was found on I à Pitre.

By Gen. GUION:

Q. Is that of your own personal knowledge?

A. Of my own personal knowledge? No sir.

By Gen. MCCLURG:

Q. Did you see the body?

A. No sir, I did not.

Q. What personal knowledge have you about the matter?

A. Well the personal knowledge that I have about it is from t parties that were arrested.

Q. You talked with them?
A. Yes sir.
Q. Who was arrested?
A. Well the two brothers of this man that was drowned.
Q. You talked with them?
A. Yes sir.
Q. Where did you talk with them?
A. Right here in Biloxi.
Q. Were they under arrest at the time that you talked with them?
A. No sir, it was after they were acquitted.
Q. Had they been tried?
A. Yes sir.
Q. Do you know of your own knowledge where they were tried?
A. Here in Biloxi.
Q. Here in Biloxi?
A. Yes sir.
Q. Do you know of any notice that has been taken by the officers of the State of Mississippi down there?
A. No sir, I do not.

1414 Cross-examination by Gen. Gibbs:

Q. Captain will you please examine the map before you and look in that part of it west of Nine Mile bayou and state if you can what is meant by the letter "T." followed by the figure "12," and the letter "R." "17" "E." "T. 12. R. 17. E."
A. I stated before that I did not know any thing much about west of Nine Mile bayou. I don't know what that means.
Q. You don't know what that "T. 12. R. 17 E." means?
A. No sir I do not know.
Q. Would not that in your opinion stand for township 12, range 17 east?
A. Yes sir, it would I reckon.
Q. Then a little east of that you will find this letter "T. S. corner"?
A. Yes sir.
Q. And just above that a round mark, round dot. Could you state what that is in your opinion?
A. No sir I don't know.
Q. Would not you be inclined to think that that stands for a township corner?
A. Possibly so. I don't know what it is.
Q. Then further down on the same map and still west of Nine Mile bayou you will find the following "T. 13. R. 17. E."?
A. Yes sir.
Q. Could you state what that stands for?
A. Well if the other stands for township and range I suppose that would mean the same thing. If the other stands for that.
Q. Now please examine the rest of this map and state whether

you find any lettering at all which would seem to indicate townships and ranges going east of Nine Mile bayou. Through the whole part of the map east of Nine Mile bayou do you find any lettering that would seem to indicate townships and ranges?

A. No sir, not on this map.

A. Could you give us any reason why this lettering is found west of Nine Mile bayou on this map and no lettering east of Nine Mile bayou?

A. I don't know but that was put down there from some marks they found from some old map to call that the Louisiana line. That the Louisiana line run up that far.

Q. Would you believe that to be the fact, if as a matter of fact this whole country had been laid off into townships, ranges and sections?

A. I don't know sir. That is a question I cannot answer.

Q. Captain, could you give us the distance from the mouth of Pearl river to Malheureux point?

A. No sir, I don't know but very little about Malheureux point. When I get around Nine Mile bayou I know very little of this section of country. I have passed there once or twice in my life, but I know very little about it.

Q. Then you don't pretend to state what the boundary line is between Mississippi and Louisiana going south after you leave the mouth of Pearl river?

A. No sir I don't know much about that section.

Q. Do you know any thing at all as to where the line that divided Louisiana and Mississippi in the waters south of Pearl river strikes what is called the Louisiana marshes. At what point of your own knowledge?

A. Well of my own knowledge, looking at this map of course according to this map it would strike and come along around—that is considerable distance to the west of Petit pass, but how far I don't know. As I say I am not familiar with that portion west of Nine Mile bayou. I never had any occasion to go there to work there or any thing.

Q. You know nothing at all about the boundary line between the two States in waters between the mouth of Pearl river and the first land in the Louisiana marshes do you?

A. At Malheureux point?

1415 Q. Do you know any thing at all about the boundary line after you reach the Louisiana marshes going south except from what you see on the map?

A. How do you mean?

Q. I mean what is the dividing line in the marshes between Louisiana and Mississippi?

A. No sir, I do not. That is to the westward. Because we never had any occasion to ask and find out any thing about it. I never worked much down there. Most of our work was done to the eastward.

Q. Is it not a fact Captain that when you make the statement that you believe that this red line which you find on this map before you indicates the southern boundary line of Mississippi, that you believe that this is the southern boundary line because it is supposed to be 18 miles from the shore?

A. Yes sir.

Q. In other words is it not a fact that you have simply a general idea and belief that Mississippi's line or southern boundary should extend 18 miles from the shore line following the meanderings of the coast?

A. That has always been our contention. That has always been our belief yes sir.

Q. Always?

A. Ever since this question has been agitated.

Q. That is for the last 12 or 14 years?

A. Yes sir, our attention was called to it before that. We did not know who it belonged to. We fished any where and were never bothered, and nobody interfered with us. A good many of them supposed that it belonged to the United States Government I suppose as far as we knew. We did not know where the boundaries of Louisiana came.

Q. You don't know now where the southern boundary line is. But you believe that it is 18 miles from the shore?

A. Yes sir, that is our belief so far as the boundary line of Mississippi is concerned.

Q. You don't know actually where the designated points are starting from the southwest corner coming eastward do you?

A. No, I don't know how far west they go into the marsh. No sir, how far west they extend I don't know.

Q. Did I understand you to say Captain that you believed that this red line which indicates the southern boundary line of Mississippi is the correct boundary line?

A. Well so far as I know I believe that it is.

Q. Do not you base that belief upon the fact that you believe this red line is 18 miles from the shore line?

A. We have measured the different maps with a scale and one thing another, and so far as out measurement is concerned I think this red line is very near correct.

Q. I say, do not you base your belief in stating this red line is the southern boundary line between Louisiana and Mississippi upon the fact that you believe it is 18 miles from the shore?

A. Well according to the maps and what we have measured by the scale it is about 18 miles and I base my belief on that because according to our understanding Mississippi's southern boundary line is 18 miles from the shore.

Q. Where did you get that from. That Mississippi's line is 18 miles from the shore?

A. To tell you the truth I don't know. I know that I have read it. I can not say where I have read it. I know that it has always

been considered. I know that I have read some where that Mississippi's line goes due south six leagues including the islands.

Q. How is that?

A. We have been reading up on it. I don't know whether it is in the constitution of Mississippi defining the boundaries, but I know that I have read some where that the Mississippi line goes six leagues due south including the islands.

Q. Does it say that the lines shall extend 18 miles south of the shore line?

A. I suppose if it says six leagues including all islands that it certainly means that line.

1416 Q. Your idea then is that because it says it includes all islands within six leagues that therefore the line should extend six leagues south?

A. If you read that the boundaries of the State of Mississippi shall extend 18 miles due south including all of the islands——

Q. But is that the language of the act?

A. I think that it is.

Q. Well you may be right but I don't agree with you exactly about the language of it?

A. That is where I formed my impression that the boundaries of Mississippi extended 18 miles from the main shore.

Q. And acting upon that belief you believe that this red line on this map is the boundary line?

A. I certainly do.

Q. That is because you believe that is 18 miles from the shore?

A. Yes sir.

Q. If as a matter of fact that red line was not 18 miles from the shore you would not believe that this was the boundary line would you?

A. If it was seventeen and a half miles we would have to go a half a mile further. If it was eighteen and a half miles we would have to draw back a half a mile, but it is very near it.

Q. Is there a well defined shore or coast line from Malheureux point to the north east corner of Isle à Pitre?

A. A well defined shore line all along here.

Q. Yes sir.

A. Well now from Nine Mile bayou or Malheureux point I am not prepared to say because I don't know much about that. But from Nine Mile bayou east from the places there where the shore is perhaps 18 or 20 inches high, and then you will get a low place again where there is a lot of marsh grass sticking out, and maybe covered over every high tide. It is covered with marsh grass, and you go along there and you will find little higher places where you can walk along there, and then you come to a low place covered with marsh grass. Low and no sign of land. That is the general character until you get down on the east side of Grand pass, and there are some little shell mounds there where the fishermen had their camps for awhile. When you get on the inside of Grand pass it is the

same way. Isle à Pitre is a little higher in some places I think than to the west of there.

Q. There is a well defined line of demarcation between the land and the water all along there is there not?

A. Yes sir.

Q. A part of it being land and a part being marsh?

A. Yes sir, none of the ground there is very high.

Q. The only thing that breaks that line are these bayous, like Nine Mile bayou and Three Mile bayou and Turkey and Johnson bayou-?

A. It would be the marsh because these islands are all marshes.

Q. Composed of what?

A. I say that these islands are nearly all covered with marsh grass. There is only one little piece on Isle à Pitre that there are any bushes growing on.

Q. But that marsh is definitive is not it. It is not a flooded marsh?

A. No sir, it is not a flooded marsh.

Q. It is some thing in which the marsh grass grows?

A. Yes sir.

Q. Which is soil is it not?

A. Yes sir, it is soil.

Q. What is it that breaks that line of marsh land from Nine Mile bayou to the eastern extremity of Isle à Pitre. That breaks into it. Is there anything except these bayous that you speak of?

A. That is about all. It is all cut up into bayous. There is Nine Mile bayou and Three Mile bayou, and Turkey bayou, and some little bayous there that have no names.

Q. Captain do you know when for the first time there was any law passed by the State of Louisiana that prohibited other persons than citizens of the State to fish in what was claimed to be the Louisiana waters?

A. No sir, I do not.

Q. Well is it not a fact that it was only after Louisiana
1417 passed laws confining and limiting to her own citizens the fishing of oysters in waters that she claimed that this question arose between Louisiana and Mississippi as to the exact location of the Louisiana territory?

A. Yes sir, it is.

Q. The Louisiana authorities made no attempt to interfere with the Mississippi people until after such laws had been passed did they?

A. I don't know whether they ever passed any laws, but I don't know any time that they have attempted to interfere with any body in this particular locality that I know of until about five years ago, four or five years ago.

Q. In what way did that occur?

A. Well I was informed by some of my boatmen that some sheriff or sheriff's officer had come down and notified some of the boatmen

fishing in there, I think it was in Indian Mound bay or some where around there, no, they were fishing in Drum bay I think it was. And said that they would be arrested, and in order to test the matter I made an agreement and went and employed Mr. Neville to see about this matter. Mr. Neville went over to see the district attorney of that parish, I think Estopinal was his name. He went over there and I don't know what they did do, but they never troubled us any more or came around us. We were never bothered any more about our boats at all. I don't know what arrangements Mr. Neville made with them. They never took any further steps. That was the last of it.

Q. Well is it not a fact Captain when you were fishing oysters in this territory that you have spoken of that you believed yourself in Mississippi because no one claiming to represent Louisiana made any effort to interfere with you?

A. As I stated, up to 12 or 14 years ago we never gave it a thought. We did not know where we were. We never gave it a thought at all.

Q. It is a fact that there was no question about where you fished until this interruption?

A. Yes sir, until these newspaper articles were published calling our attention to the fact, and then we began to read the constitution of the State of Mississippi to find out how far we could go.

Q. You had been fishing indiscriminately all through this Louisiana marsh country?

A. Yes sir, every where.

Q. Until this happened?

A. Yes sir.

Q. And you had never given it any thought about where your boundary line was?

A. No sir, not up to 12 or 14 years ago we did not.

Q. Has the State of Mississippi ever undertaken to exercise any jurisdiction over this territory north of this southern boundary line, which you claim to be the boundary line. Marked red on this map.

A. In what way?

Q. In any way?

A. Well I don't know that anything ever happened out there that they should claim any jurisdiction of. Not to my knowledge.

Q. Has she ever assumed the right to tax any of this property out there?

A. No sir, there was never any tax levied on oysters until the last three years.

Q. Has she ever assumed any right to collect taxes on any of these lands out there?

A. Not that I know of, no sir.

By Gen. McCLURG:

Q. Does Mississippi tax oysters taken out of that territory like he does oysters taken elsewhere?

A. Now, at the present time?

Q. Yes sir. Where ever you take oysters in this State?

A. They have for the last three years since this oyster law went into effect.

By Gen. GUION:

Q. I have understood you to say Captain that you under-
1418 stood Isle à Pitre and Three Mile bayou and Nine Mile bayou and other places between Malheureux point and the end of Isle à Pitre to be in the State of Mississippi. Am I right?

A. Yes sir.

Q. Upon what do you base that belief?

A. Because it is within this 18 mile line.

Q. Is it not entirely on that ground that you have formed that conclusion?

A. Yes sir, I have read that the boundaries of the State of Mississippi extend due south 18 miles including the islands, and of course we know very well that it is not 18 miles from Waveland to Isle à Pitre.

Q. How do you reconcile that with the claim that Louisiana makes under the act of Congress that she gets nine miles from her coast?

A. My understanding would be that nine miles would start from the main land the same that the State of Mississippi does. Not from out at this marsh.

Q. What do you mean by the main land of Louisiana?

A. I mean from *terra firma.*

Q. Where is that?

A. You can go back until you get to the cypress trees there where *terra firma* is.

Q. Where is the point in Louisiana that you would measure your boundary line from?

A. Well this map does not show it. If you go far enough. You can go through. After you pass California bay you can go through this pass there. The only place that I know of that I have struck *terra firma* I went through a place that they call Pass Fortuna. I think that went up towards Lake Leary. You can go with a schooner in six miles of the shell beach road.

Q. You have already reached the conclusion that Mississippi ought to get this territory down there that you have just designated, including that country from Nine Mile bayou, going east as far as the eastern extremity of Isle à Pitre, because you believe that Mississippi extends 18 miles from her shore line?

A. Yes sir.

Q. And it is entirely on this theory is it not, that you think she ought to get this?

A. Yes sir, I do because I believe that is her boundary.

Q. Now I ask you if you were called upon to define and give Louisiana's boundary line, giving her three leagues from her coast, where would you start her line from?

A. I would start her line from what you would call *terra firma* Land. Not this marsh.

Q. Well now, where is that point. Is it on this map before you?

A. No sir, it is not.

Q. You don't see on this map any point from which you would start Louisiana's boundary?

A. No sir, not on this map.

Q. The one before you?

A. No sir.

Q. This map is designated as Mississippi "A"?

A. Yes sir.

Q. Then according to that would not you draw a straight line from Pearl river due south 18 miles until you reached a point immediately west of the southernmost; the red line indicating the southern boundary of Mississippi?

A. I don't really know how that would be. I don't know anyabout this country. When it reaches this corner where it stops I don't know how far it is from the main land, or Lake Borgne. I don't know any thing about this country west of Nine Mile bayou. I don't know any thing about that.

Q. What would you do with the intervening space between the mouth of Pearl river and the red line, which is indicated on this map as being the southern boundary line of Mississippi. You have got to have a starting point, have you not?

A. What would I do with this intervening space?

Q. Starting from Pearl river?

A. Are you asking me as a witness or an expert?

Q. You have stated that you believed that this line which is marked red on this map, and which on this map would
1419 seem to indicate the southern boundary of Mississippi. You say that you have reached the conclusion that that is the southern boundary line of Mississippi because it is 18 miles in your opinion from the shore?

A. Yes sir, due south.

Q. I say where would you find your western boundary line starting from Pearl river?

A. That is what I say. I say I don't know anything about this. I don't know how this Louisiana shore runs here on this western line as marked on this map.

Q. You have no idea where the Mississippi and Louisiana line is on the west?

A. On the western boundary because I don't know how wide this Lake Borgne is, but I do believe this. That it is more than nine miles from this red line to what I would consider *terra firma*, or what I would call the coast of Louisiana. I believe that it is more than nine miles to the woods.

Q. You mean the main land by *terra firma?*

A. Yes sir, the main land and not the marshes.

Q. Have you ever known of any store being at Three Mile bayou. Kept there?

A. No sir. I did know that there was a travelling store on flat boats. I know a couple of boys from Biloxi. I don't know whether it was a blind tiger or what it was. They had a floating palace out there.

Q. It was not on the land?

A. No sir.

Q. Who were they?

A. Masters were the young fellows' names. One was named Toney. I don't know what the other was named.

Q. That was a blind tiger on the water was it?

A. Yes sir, on the water.

Q. Did I understand you to say Captain that you went with your father in 1858?

A. In 1858. I was quite a boy.

Q. Into this Louisiana marsh country?

A. Yes sir.

Q. By means of Three Mile bayou?

A. No sir, Nine Mile bayou.

Q. How far down this bayou did you go?

A. I was young then but the captain said that we were in Bayou Treasure. That is where he had his traps located. He was a trapper.

Q. What did you stay on at that time?

A. On the boat. We lived on the boat.

Q. Altogether?

A. Yes sir, on the sloop.

Q. You have testified have you not that there is a sailing channel from the mouth of Pearl river going out to deep water in the Gulf, which passes by Cat island and Isle à Pitre have not you?

A. Yes sir.

Q. Is that the deepest channel in this direction?

A. Yes sir, I think it is.

Q. The channel that you see marked on this map, or line rather. The marked line claimed by Louisiana in her original bill. Is that the channel that you speak of as the deep channel?

A. Yes sir, that is where they come from the outside. From the Chandeleur islands.

Q. That is the sailing channel?

A. Yes sir, the sailing channel.

Q. What depth of water is there in this channel?

A. 12, 14, 16, 18, and in some places 28 feet of water.

Q. That whole distance?

A. No sir, not the whole distance. When we get up here towards Half Moon island it gets shallower then.

Q. What is the depth there?

A. That I could not say. I never run on the large vessels. These

large schooners running down to Florida. I have noticed that they went that course.

Q. Did they go up into Pearl river?

1420 A. Yes sir, and some of them went up into the basin at New Orleans.

Q. I mean were they such vessels as could go up into Pearl river?

A. No sir, not this Pearl river. They would go through the Rigolets and get there, and then turn to the right. That is through West Pearl river. Now East Pearl river is generally used by crafts coming back light.

Q. But there is a channel to East Pearl river is not there?

A. Yes sir, there is a channel there now. There has always been a channel there.

Q. When I say channel I don't mean simply for the purposes of light draught. What draught vessel could come up that channel to East Pearl?

A. Right now?

Q. At mean season?

A. A vessel drawing six and a half or seven feet could go through there now.

Q. Is there any time that a vessel drawing more than that can go through there?

A. I don't know any thing about the larger draught vessels. I have not gone on them. There are very few oyster boats that draw more than five and a half feet. Very few of them. Some, however, draw more than that, but as a rule five feet is considered a pretty good size boat.

By Gen. McCLURG:

Q. What is the average draught of the oyster boat?

A. Say five feet is about the average.

By Gen. GUION:

Q. This person by the name of John Kennedy that you spoke of as having been drowned was found and brought here to Biloxi; the body was was not it?

A. Yes sir.

Q. You don't know of your own personal knowledge where this body was found do you?

A. No sir, I do not.

Q. You don't know that a person was drowned of your own personal knowledge?

A. No sir, not of my own personal knowledge I do not.

Q. You say that the case of the two persons charged with committing the crime of drowning him was tried here?

A. If you will allow me I will explain here why they were arrested and brought here. The young man was drowned out there, but there were quite a number of fishermen out there when the body was found that held an informal inquest over the body.

Q. Where?

A. Out at Isle à Pitre. There was no officer there. Just among themselves. In examining the body they noticed some marks as though he was cut in the neck before he was buried. Some of these fishermen came and reported these facts here and others reported that they had heard some dispute or some thing on this boat. In order to satisfy themselves there was a crowd went out from Biloxi and disinterred the body and brought it over here. In the mean time these two boys were arrested.

Q. What two boys?

A. The Kennedys. The two brothers of the drowned man, and the body was brought in here and examined, and these boys were put under arrest and tried before the justice of the peace, and the coroner's inquest said that these wounds were caused by the body being cut by the shells as it drifted ashore and the boys were released.

Q. They were released?

A. Yes sir.

Q. They were never tried then?

A. Yes sir, they were tried and acquitted.

Q. They were regularly tried?

A. Yes sir, the two boys are living now.

Q. You don't know as a matter of fact where the drowning took place.

A. No sir, I don't know. I was not out there and I don't know any thing about where it occurred.

Q. Then the drowning may have taken place in Mississippi waters and the body may have been found at Isle à Pitre and buried there, and the parties tried here because of his having been drowned
1421 in Mississippi. Could not that have been the case?

A. The boys were fishing at Creole gap at Isle à Pitre when this happened.

Q. That is what you heard?

A. That is what the two boys told me, but of my own knowledge I don't know anything about it.

Q. Where are those boys Captain?

A. They are here in Biloxi.

Q. So I understand you to say that when you first knew Nine Mile bayou that it was in 1858?

A. Yes sir, that is the first time that I went through there.

Q. At that time Nine Mile bayou was about how wide?

A. That has been a long time ago.

Q. Excuse me, but I understood you to say 150 yards.

A. I think I said 150 yards. It is a mighty hard matter to judge distance on the water. You may think that it is 150 and it may be 300. It is a hard matter to answer that question, because the water is very deceiving.

Q. Do you know what point, measuring from the shore line of Mississippi going south you would reach, without referring to the

map, as the point of division; the line of division between Louisiana and Mississippi?

A. What? Sailing in a certain direction?

Q. If you would go south 18 miles?

A. Well it would all depend upon where you would start from on the main land.

Q. I will take this point. Taking a point right opposite Gulfview. What point is there in the Louisiana marshes that would be 18 miles from that point?

A. Well that would be a hard matter to say if you started from Gulfview with a sailing vessel.

Q. I mean a line due south?

A. A direct line?

Q. Yes. That is what I understand to be the theory that you have given us?

A. You mean in my opinion where would it strike?

Q. Yes sir, what point. I am speaking of your own recollection from the country down there without reference to the map. If you know what point in your own mind would be reached as a dividing line between the two States?

A. Well if you took from there you would strike perhaps a little to the westward of Indian Mound bay. Out there some where. From Gulfview you would pass perhaps a little to the east of Half Moon island or very near it. You would pass to the east of it. Yes sir, you would pass to the east of it on the line. Of course I could not give you exactly where you would strike out in the marsh.

Q. Captain, how wide is Nine Mile bayou now?

A. I have not been in Nine Mile bayou for twenty years. As I say most of our fishing was done through this portion of the country (showing location on the map).

Q. How wide was Three Mile bayou when you first knew it?

A. When I first knew it. It has not been so long that I have known Three Mile bayou. I have only gone through there twice. I went through there in that steamer, but I never paid much attention to that. I went through there but I never gave it much attention.

Q. When was it that you first went through Three Mile bayou?

A. I went out there in 1890 after the oysters were all killed.

Q. Have you ever been there since?

A. No sir, not through Three Mile bayou.

Q. You did not know how wide it was at that time?

A. No sir.

Q. Can you give us an approximate as to how wide it was at that time?

A. No sir, I might not even have been on deck when we went through there.

Q. Do you know how wide Turkey bayou was when you first knew it?

A. Turkey bayou was about, I don't know the number of feet.

I am a poor hand to judge the distances on water. I don't think Turkey bayou when I went through there was over 100 yards wide. 80 or 100 yards.

1422 Q. When was this Captain?

A. It must have been about in the seventies when I was out there.

Q. In the seventies?

A. Yes sir.

Q. Have you ever been there since?

A. No sir, I have not been there since.

Q. Do you know anything about the width of Grand pass?

A. Grand pass, the last time I was there in the year of the storm of 1893, I suppose that the mouth of it must have been nearly a quarter of a mile wide. After you once got in the mouth it was a half a mile wide, Grand pass is that wide in some places.

Q. Was there never a time in your knowledge when it was narrower than that?

A. Well the mouth of it might have been a little narrower where the shell mounds on the east side were. I think that they washed away a little bit. On the east side of Grand pass, it might have washed away a little.

Q. Do you remember Isle à Pitre before Creole gap was created?

A. I recollect Isle à Pitre many years ago, but I don't know so much about Creole gap. I never had any occasion to go down there. I don't know much about it.

Q. Don't you know as a fact that Creole gap did not exist at one time?

A. I have heard so. I have heard that it was dug out by hand.

Q. Do you know how wide it is now?

A. Yes sir.

Q. How wide is it?

A. Well the outside of it is a quarter of a mile.

Q. What do you attribute the widening of that Creole gap and this Three Mile bayou to?

A. The currents.

Q. What sort of currents?

A. The strong currents washing out there at Creole gap.

Q. Is St. Joseph island still in existence?

A. I don't think it is.

Q. Is it not gone?

A. I think it is sir.

Q. Do you remember when it was in existence?

A. I do yes sir.

Q. How long ago was this?

A. About 18 or 20 years ago.

Q. What caused it to disappear. Do you know?

A. It was the waters.

Q. Storms?

A. It gradually washed away all the time there by the currents.

There were a good many rocks there and they seemed to wash aw there.

Q. Do you know an island called Round island just to the west Half Moon island?

A. No sir, I don't know much about that country. I have bee to Half Moon. I don't know what they call Round island. I don recollect that.

Q. Do you know anything about Half Moon island?

A. I have been on Half Moon island, yes sir, and fished oyste there. Banks of oysters east of Half Moon I have fished on.

Q. You have spoken of this land lying down here Captain throug which this red line indicating the southern boundary line of Missi sippi is drawn as being called the Louisiana marshes. Do you kno why that name was given to them?

A. The origin of it I can not say, but I would naturally suppo on account of its bordering on the lines of Louisiana. Being ju outside the waters of the Mississippi sound and bordering on Louis ana they were called Louisiana marshes, I suppose.

Q. They never have been spoken of as islands have they?

A. By whom do you mean?

Q. By any one that you know of?

A. It is all islands from Raccoon island to Isle à Pitre.

Q. But they have never been designated or called Louisian islands or Mississippi islands. They have just been known as th Louisiana marshes?

1423 A. Neither have Cat island or Ship island been designate as Mississippi islands. They have a name for them.

Q. I understand. I asked you as a matter of fact. Is it not a fa that they have always been known as Louisiana marshes?

A. Yes sir.

Q. And put in that name?

A. That section of country has been known as Louisiana marsh from time immemorial as far as that is concerned.

Q. Captain, where have the canners been getting their oyste principally for canning purposes. The canners at Biloxi and oth places along the Mississippi coast?

A. In late years, or how far back a period?

Q. Well you might say for the last fifteen years?

A. There has been a considerable portion of the oysters from Pa Christian reefs over here. They have gotten a great many from th Pass Christian reefs, and a great many from what is called Bayo reefs, but from the Pass Marianne Shoal banks and Half Moon is and, and there are a great many reefs down near St. Joseph, an then over to Isle à Pitre, and between Isle à Pitre and Cat islan that was formerly the finest kind of reefs. On either side of th Ship channel. Grand pass furnishes a great many oysters, and i side of Grand pass, and then through this section of the country he in Karako bay, and Cranetown, and Brush island and Martin islan and then the freighters they used to go through Three Mile bayo

and buy them from the fishermen in Karako and Bayou Boudreaux they used to call it, and small boats would fish through that section of the country and bring them to the larger boats.

Q. In what part of the country?

A. In this disputed territory inside of the marsh.

Q. Is it not a fact that the quantity of oysters taken from the Louisiana marshes has increased very perceptibly within the last few years and taken to the canners along the Mississippi coast?

A. No sir, I don't think so.

Q. You do not?

A. No sir, the most of our supply that we have been getting for the canners have been from Pass Christian and Cat island. In that section of the country.

Q. What class of persons use the oysters then that are taken from the Louisiana marshes?

A. A great many of them were used for the raw shippers.

Q. Are there any shipments of that kind along the Mississippi coast?

A. A few. I suppose there are a half dozen of them.

Q. At different points along the Mississippi coast?

A. Yes sir, from Pass Christian to Pascagoula.

Q. Straight west from Pass Christian?

A. Yes sir, from Pass Christian to Pascagoula.

Q. So if I understand you correctly the canners have been getting the principal quantity of their oysters from the territory not in dispute between Mississippi and Louisiana, and those engaged in shipping raw oysters have been engaged in getting their principal quantity from the Louisiana marshes?

A. Before this neutral zone was declared yes sir.

Q. Prior to that time?

A. Yes sir, prior to that time.

Q. And these people shipping raw oysters have been getting their oysters down in this disputed territory?

A. Yes sir, right in this disputed territory that Mississippi claims now.

Q. How long have they been getting their oysters down there?

A. ——.

Q. How long have you been getting oysters down there?

A. We went into the business in 1874, but we got the bulk of our oysters from what is now defined as Mississippi territory.

Q. Are you engaged in the raw oyster business?

A. Yes sir, I am.

Q. I thought that you were a canner?

A. I am both. Yes sir.

Q. Are there any natural oyster reefs along the Mississippi coast in that part of the water not in dispute between Mississippi and Louisiana?

1424 A. North of this channel?

Q. Yes sir, north of the channel.

A. Yes sir.

Q. A number of them?

A. Yes sir, quite a number.

Q. Is there not a very large area of oyster territory in the reefs starting from Pascagoula and coming west as far as Pass Christian?

A. No there are very few between say about opposite Pass Christian and Pascagoula. There are very few oyster reefs. Very few.

Q. Are there not good bedding grounds all along there?

A. There has been many a thousand dollars lost there.

Q. Are not there good bedding grounds in this neighborhood? In the neighborhood of Biloxi?

A. No sir, there are some few reefs at the mouth of Pascagoula river, and some few reefs around the mouth of Back bay and Biloxi, but not to any great extent.

Q. They are pretty much exhausted are not they?

A. No sir, there never was much of a reef. It was never very extensive.

Q. Do I understand you to mean that there are no oysters of any consequence?

A. There are some, but not until you get to Pass Christian, and then commences the oyster territory.

Q. Going east?

A. Going west.

Q. West?

A. Yes sir, going west and south.

Q. Towards Bay St. Louis?

A. Towards Bay St. Louis and the south yes sir. When you get opposite Pass Christian you commence to strike the oyster country. The oyster country is Pass Christian and Waveland and Gulf View and St. Joseph and Half Moon, out towards Cat island. All through that section of the country is where the oyster reefs are. If you leave Cat island east you don't get to the oyster reefs until you strike the mouth of Back bay of Biloxi. All in that section of the country there are no oyster reefs. There are no oyster reefs from Biloxi to Pass Christian.

Q. Is there nothing in there?

A. That I don't know sir.

Q. Is there nothing in oyster fishing coming on between Biloxi and Pass Christian?

A. Not that I know of, no sir.

Q. What difference is there in the reefs from Pass Christian going west as compared with what they were formerly. Are they depleted?

A. No sir, I don't think they are. We have gotten as many oysters from our boats as we ever did. I packed more oysters last year than I did before. I don't know that they have become any less.

Q. You are being supplied by oysters taken from that part of the water that is not in dispute between Louisiana and Mississippi?

A. No sir, I get two thirds of my stock that I put up, I get it from this section around Half Moon.

Q. A part of the area that is in dispute?

A. Yes sir, I get two thirds of my stock from there.

Q. How long have you been getting your oysters from that section?

A. I have been getting them there for about two years.

Q. Previous to this time where were you getting them?

A. All through this Mississippi sound there, Pass Christian and Cat island and westward.

Q. Why don't you continue getting them there now?

A. Because I can get better oysters out here at Half Moon.

Q. Is it not a fact Captain that all of this country you have shown us on this map from Pass Christian going westward is exhausted?

A. No sir, there are plenty of oysters there yet. This year we did not get so many over there but from the simple fact that this has been a very dry season and the oysters are salty and poor, and therefore we find oysters as near to the mouth of Pearl river as we could. Because the oysters were in much better condition. They were fat.

1425 Redirect examination by Gen. McCLURG:

Q. Do you remember the name of the justice of the peace that tried the Kennedy boys?

A. Yes sir, it was Lyman B. Holly.

Q. Where is he now. Is he living or dead?

A. No sir he is dead.

Q. Do you know how long he has been dead?

A. He has been dead about three or four years.

Q. He was a justice of the peace, was he?

A. Yes sir.

Q. Of what county?

A. Harrison county.

Q. Mississippi?

A. Mississippi.

Q. He was regularly elected, was he?

A. Yes sir.

Q. And held office under the law?

A. Yes sir.

Q. Do you know any thing about the records of his office?

A. I think that they were destroyed by fire.

Q. When?

A. About two months ago.

Q. His records were destroyed by fire?

A. Yes sir.

Q. When you spoke awhile ago of neutral ground did you mean the territory agreed upon by the oyster commission to be neutral ground for both to fish in until this suit was settled?

A. Yes sir.

Q. From Malheureux point to Isle à Pitre?
A. Yes sir.
Q. Under the agreement of the oyster commissions of Mississippi and Louisiana, Mississippians were not to go into the marsh lands until this suit was settled?
A. No sir.
Q. But both sides might go into this other land?
A. Yes sir.

And thereupon the commission took — until tomorrow morning at nine o'clock.

In the Supreme Court of the United States.

THE STATE OF LOUISIANA
vs.
THE STATE OF MISSISSIPPI. } No. 2.

And thereupon the commission met Friday morning, June 3rd, and the following testimony was taken towit:—

JOSEPH KENNEDY, a witness introduced on behalf of Mississippi, being duly sworn, testified as follows, to wit:

Q. Was John Kennedy your brother?
A. Yes sir.
Q. Where is John?
A. He is dead.
Q. When did he die?
A. On October 26th, 1886.
Q. What was the cause of his death?
A. He was drowned.
1426 Q. Where was he drowned?
A. Out at white and black buoy outside of Cat Island spit. That is the bar at Cat island.
Q. Is Louis Kennedy your brother?
A. Yes sir.
Q. And John Kennedy that was drowned out there was also your brother?
A. Yes sir.
Q. Is the place where he was drowned in the neighborhood of Creole gap?
A. It is about five miles from Creole gap where he fell over board.
Q. On which side of the deep water channel?
A. On the south side.
Q. On the south side?
A. Towards the marsh.
Q. Were you and your brother Louis charged with the murder of your brother John?
A. Yes sir.

Q. Were you tried on that charge?
A. Yes sir.
Q. Where were you tried?
A. Right here. Right up there where Mr. Elmore used to have a bar room. Right over here in Biloxi.
Q. Before whom were you tried?
A. Judge Holly.
Q. Who was Judge Holly? What office did he hold then?
A. I believe that he was the justice of the peace or coroner. I could not say which.
Q. Of what county?
A. Of this county. And State of Mississippi.
Q. Harrison county and State of Mississippi?
A. Harrison county and State of Mississippi.
Q. You were regularly arraigned before him on the charge of murder?
A. Yes sir.
Q. And what was his judgment?
A. Not guilty.
Q. Was the body of your brother recovered?
A. Yes sir, it was found in Creole gap.
Q. In Creole gap?
A. Yes sir, in Creole gap.
Q. Where was it buried?
A. It was first put away right there in the marsh.
Q. Near Creole gap?
A. In Creole gap.
Q. On what land.
A. Right there in the marsh.
Q. What do you call it?
A. Nothing but in the marsh. That is all I can say. Right in there.
Q. On Isle à Pitre?
A. No sir, it is right on the side of Creole gap. He was hauled up there, or dragged up there like a dog we might almost say.
Q. Was the body afterwards removed?
A. Yes sir, I went myself with my grandfather and cousin and uncle and took it up and brought it here and Mr. Jones the sheriff went too.
Q. So that it is buried finally in Biloxi?
A. Yes sir.
Q. That was in October 1886?
A. Yes sir, 1886.
Q. And the place where he was drowned is on the south side of the white and black buoy?
A. The white and black buoy. That is the general mark outside of Cat island.
Q. Is that the channel that runs out here and is commonly known as the deep water channel?

A. Yes sir.
Q. Who was the constable of this court?
A. Mr. Holloman was the constable.
Q. Where is he?
A. He is dead.
1427 Q. Mr. Holloman the constable is dead also?
A. Yes sir.
Q. Do you know any thing about the records of that court?
A. No sir, I do not.
Q. What was your occupation in 1886?
A. Fishing oysters.
Q. What is it now?
A. The same thing.

By Gen. GUION: To all of the evidence given by the witness concerning the arrest and trial of the witness on the charge of having been guilty of murder of his brother John Kennedy, the State of Louisiana through her counsel objects on the ground that the best evidence as to the arrest, examination and trial of the witness is the record itself, and in default of evidence of the destruction of the record no secondary evidence can be introduced, all of which objections the counsel for the State of Louisiana made timely.

Q. I understood you to say that you had been continuously in the oyster business since that time?
A. Yes sir.
Q. How long altogether have you been in the oyster business on the Mississippi sound and in the neighborhood of the Mississippi coast?
A. Twenty-five years.
Q. During that time where have you been taking oysters?
A. Well sir we do most all of our oyster work from Creole gap up to Pass Christian. All about and around in there up to about Half Moon.
Q. Any other place that you have taken them?
A. No sir.
Q. Do you take any in the neighborhood of Grand pass?
A. Well that is all about in the same neighborhood.
A. That is in the same neighborhood?
A. Yes sir.
Q. Have you taken oysters about Grand pass?
A. Yes sir.
Q. How long have you been doing that?
A. This winter we have taken some over there, and then we have fished in and about Greque a good deal too. That is right along side of Grand pass.
Q. Do you know where Turkey bayou is?
A. Yes sir.
Q. Have you taken any oysters there. In that neighborhood?
A. No sir.

Q. Do you know where Three Mile bayou is?
A. Yes sir.
Q. Have you ever taken any oysters in that neighborhood?
A. No sir.
Q. How about Nine Mile bayou?
A. I have been there but I have never taken any there. Half Moon would be some where abreast of it. In the open and outside we did fish there this winter.
Q. When did you first take oysters in the neighborhood of Half Moon?
A. This winter.
Q. Is that the first time?
A. Yes sir.
Q. In what portion of this water did you take oysters 25 years ago?
A. Creole gap.
Q. Has that been your principal fishing ground?
A. Yes sir, from there running in towards Pass Christian.
Q. Where are the best oyster places in which you have fished during these 25 years?
A. I have found them best this winter off of Half Moon.
Q. Well before that?
A. Creole gap used to be about as good as we would require.
Q. How wide is Creole gap do you think?
A. I could not tell you that. It would be a little space, I suppose of from about here to the end of the foot walk out there.
1428 Q. How many yards or feet is that?
A. I could not tell you. I suppose that it is about one thousand feet wide or something like that.
Q. Was it as wide 25 years ago as it is now?
A. No sir, it keeps getting wider.
Q. Is there any industrial life of any kind such as farming, gardens, or stock raising or anything like that about Creole gap along there?
A. No sir.
Q. Any habitations of any sort?
A. No sir, none that I know of, except there was a house out there at the time they planted oysters they stayed in it. There is only a watchman.
Q. A watchman stays in the house?
A. Yes sir, at Door point and one at Turkey bayou.
Q. What sort of houses are they Kennedy?
A. Nothing but little barns.
Q. Has your right to take oysters south of this deep water channel near to Cat island channel and along there about Creole gap ever been questioned by anybody?
A. No sir.
Q. You never have been molested by the State of Louisiana?

A. No sir, no more than winter before last when we were stopped in there.

Q. That was by agreement between the two oyster commissions?

A. Yes sir, the patrol boat at that time stopped us there. If I am not mistaken the load is there yet. He stopped us before we got our load but he made us leave them there just the same.

Q. Was this before or after this suit was started?

A. It was published in the papers, but at that time the patrol boat got to us.

Q. Was that in the papers?

A. About Louisiana owning that portion of it. Yes sir, he sure hooked us right.

Cross-examination.

By Gen. GUION:

Q. You used the word patrol. What did you mean by that?

A. He stopped us. He sure did.

Q. Where was it that this patrol boat stopped you?

A. In about Bayou Greque.

Q. When was that?

A. Winter before last.

Q. The winter of 1902?

A. Yes sir.

Q. Did not you say you fished down there last winter?

A. No sir, not in Creole gap. Not Creole gap, but down at Half Moon.

Q. Is not Creole gap in that part of the territory that it was agreed that the Mississippi people should not fish in until this suit was settled?

A. No sir.

Q. Where is that territory?

A. That line is on the west side of Grand pass; all east of that Mississippi owns. Supposed to be the Mississippi side. West was Louisiana.

Q. Well you understood then did you that west of Grand pass and all down in what is claimed the Louisiana marshes, there should be no fishing until this suit was settled?

A. Yes sir.

Q. And you understood that east of Grand pass was not included in the agreement. You understood that east of Grand pass the Mississippi people were to continue to fish if they wanted to?

A. Yes sir, to continue to fish.

Q. You spoke of the patrol boat having stopped you two winters ago?

A. There is the man that I was working for over there.

Q. Will you please tell us what patrol boat you spoke of?

A. Well the name was the Toiler. The steamboat Toiler.

1129 Q. Who did she belong to?

A. She belonged to Mr. Sweatman, but the gentlemen aboard I didn't know at all. They were from Louisiana.

Q. They were Louisiana people?

A. Yes sir.

Q. What did they tell you there?

A. They told us to stop. That we had to take out a license to fish oysters in that territory.

Q. You had no license?

A. No sir, not for that territory.

Q. Did you have any license at all?

A. For Mississippi.

Q. Where was Mississippi's license? Where did it authorize you to fish?

A. From the Grand pass all east.

Q. From Grand pass east?

A. Yes sir.

Q. Have you got that license with you?

A. No sir, it is on the boat you know.

Q. Where is that boat?

A. It belonged to Mr. Desport's brother at that time.

Q. Where is the license?

A. I suppose it is on the schooner. It is torn up by now I suppose.

Q. Could not you produce it? Could not you give it to Gen. McClurg and let the State of Louisiana look at it?

A. These things they tear them all up. They are no good for more than one season and we don't take any care of them after that.

Q. Where did you get this license from?

A. Gulfport.

Q. Who gave it to you. What authority gave it to you?

A. Mr. Hughes is the man that issued the license if I am not mistaken at Gulfport at that time.

Q. That was to fish oysters where?

A. In Mississippi.

Q. You don't mean up about Hazlehurst. I am speaking about some particular place. In what part of Mississippi did you understand that you had the right to fish oysters?

A. Any where from the west side of Grand pass running east.

Q. Did these people who stopped you from fishing oysters there in the winter of 1902 tell you that they were representing the State of Louisiana?

A. Yes sir.

Q. And that was in Creole gap where you were fishing then?

A. No sir, I was in and about Bayou Greque.

Q. That is south of Grand pass is it not?

A. No sir, it is west of Grand pass.

Q. Southwest is it not?

A. Yes sir.

Q. And it is down in what is called the Louisiana marshes
A. Yes sir.
Q. And that was in Creole gap where you were fishing then
A. No sir, I was in Bayou Greque, I was just over the line.
Q. That is south of Grand pass is it not?
A. No sir, it is west of Grand pass.
Q. Southwest is it not?
A. Yes sir.
Q. It is down in what they call the Louisiana marshes?
A. Yes sir, that is what they call them yes sir.
Q. Mr. Kennedy, won't you show me on this map if you can w
it was that your brother was drowned?
A. I say that this was in Creole gap here (witness shows on
map).
Q. He was found in Creole gap?
A. Yes sir, he was found in there.
Q. Was he drowned in there?
A. He went over board south of the white and black buoy al
Cat Island channel.
Q. Where is that?
A. It is about half way across you know of the water.
Q. It is about half way across from what?
A. From Cat island to the marsh.
1430 Q. This is the end of Isle à Pitre that I am now pointi
out to you. Do you know anything about that?
A. Yes sir.
Q. This place that I am pointing out to you on this map mark
Exhibit A is Cat island?
A. Yes sir.
Q. Now will you show me please as near as you can where yo
brother fell off the boat? Fell overboard?
A. I could go and show you the place out in the channel.
Q. What buoy did you speak of?
A. The white and black buoy just across the spit.
Q. Who put it there?
A. The United States Government I suppose.
Q. Is it the buoy that marks the channel?
A. Yes sir.
Q. Were was it with reference to that buoy that your brothe
drowned?
A. He was drowned south of the buoy.
Q. Where is the Cat Island spit that you spoke of?
A. It is a bar that leads out from Cat island in the shoal wate
After we reach that we go into the deep water again.
Q. How far south of this buoy was it that your brother went over
board?
A. I could not tell you that. It was more than I could say. I
was at night.
Q. It was at night?

A. It was at two o'clock in the morning.
Q. Was it dark?
A. It was sure and blowing a gale from the north.
Q. How did he fall over board?
A. He put his foot on a rope and it rolled and over board he went.
Q. How do you know that you were south of the buoy at that time?
A. I passed it. Certainly I passed it and saw it.
Q. Which direction were you going at that time?
A. I was running south.
Q. Did you have a compass?
A. Sure. That is the only thing that I could guide by.
Q. Who was with you at that time on the boat?
A. Two brothers.
Q. Who had the compass?
A. I did. I was the pilot.
Q. Well now after this happened you say that your brother's body was found in Creole gap?
A. Yes sir, Creole gap.
Q. How long afterwards?
A. Three days I believe. Three or four days. I think that it was three days that he was found.
Q. Were you there when it was found?
A. No sir, I was hunting for it, and there were some men that were working in Creole gap at that time that were the ones that picked him up.
Q. Did they report it?
A. Yes sir, they seen us out some distance and they blowed for us and we went to them.
Q. Who informed the authorities about it over here? The law officers. Who notified the law officers here at Biloxi?
A. I did when I brought him here. I gave myself up sir.
Q. And the examination was had over here?
A. Yes sir.
Q. And they turned your brother and yourself loose?
A. Yes sir.
Q. And this was in 1886?
A. Yes sir, in 1886.

Redirect examination:

By Gen. McCLURG: You spoke about the license issued by the authorities of the State of Mississippi to fish oysters in this State. Was this the license issued by the Mississippi Oyster Commission?

1431 A. Yes sir.
Q. It was not an United States license?
A. No sir, it was the oyster commission license.

Q. The oyster commission license of Mississippi?
A. Yes sir.
Q. It did not designate any territory except west of Grand pass?
A. Grand pass. And I don't believe it had that in it.
Q. Just to fish oysters in Mississippi?
A. Yes sir, to fish oysters in Mississippi.
Q. You don't know where this license is?
A. No sir, but I don't know why they could not get some of them. Now the license run the same thing.
Q. You could not get that license?
A. No sir, the boat has been sold and everything. After the season is over we don't take any care of them.
Q. That is two years ago?
A. Yes sir.
Q. And this agreement that you spoke of west of Grand pass was an agreement between the Oyster Commission of Louisiana and the Oyster Commission of Mississippi?
A. Yes sir.
Q. To stand until this suit was ended?
A. Yes sir.

LOUIS KENNEDY, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLUNG:

Q. Your name is Louis Kennedy?
A. Yes sir.
Q. And you are a brother of Joseph Kennedy?
A. Yes sir.
Q. What is your occupation Mr. Kennedy?
A. I am working at the ice factory at the present time.
Q. You were a brother of John Kennedy?
A. Yes sir.
Q. What was your occupation in October 1886?
A. I went out oystering then. I was in the oyster business.
Q. You were in the oyster business?
A. Yes sir.
Q. Where?
A. Out here in the marsh.
Q. Were you on the boat from which your brother was drowned?
A. Yes sir.
Q. Were you and your brother Joseph tried for the murder of your brother John?
A. Yes sir.
Q. Where were you tried?
A. Here in Biloxi.
Q. Before whom?
A. Judge Holly.
Q. Where is he?

A. He is dead.
Q. Who was the constable?
A. Mr. Holloman.
Q. Where is he?
A. Dead.

By Gen. Guion: To the above evidence and to all other evidence of the same character, whether given by this witness or any other witness, testifying to the same facts counsel for the State of Louisiana objects on the ground that no evidence can be given in respect to the arrest or the trial of the parties charged with the
1432 murder of John Kennedy, except it be the record evidence of the proceedings had in the matter. That no oral evidence can be given concerning the trial or the examination in that matter unless proof be first offered showing the destruction of the primary evidence.

Q. Where were you fishing oysters in 1883? What part of the country?
A. I had not fished any. That is the first trip that I went fishing in my life.
Q. That was your first trip?
A. Yes sir.
Q. Did you fish after that?
A. No sir, it was about a year after that before I went out. When I did go I went on the Vera for Mr. Lopez.
Q. Is that a boat?
A. Yes sir, a steamboat dredging.
Q. Where did you dredge?
A. Grand Pass reefs.
Q. Were you interfered with by anybody in your fishing out there anywhere?
A. Yes sir, they had some boats that came out there and spoke to the captain, but he never stopped.
Q. When was this?
A. It is about three years ago now. About three or four years ago now.
Q. You were acquitted by Judge Holly?
A. We were acquitted.
Q. Do you know where your brother's body was found?
A. Nothing more than what I was told. I was told that it was found in Creole gap.
Q. Was his body out there?
A. Yes sir, I went out there and saw it.
Q. Before it was brought to Biloxi?
A. I went out there and dug him up to be sure that it was him, and we came back here to get help. The other help went out there and got him and brought him back here.

Cross-examination.

By Gen. GUION:

Q. Mr. Kennedy, where was your brother drowned?
A. They told me that he was drowned off of Cat island.
Q. They told you. Who told you that?
A. My brother. He was the only one that saw this at this tim
Q. Who did you mean by saying us?
A. There were three brothers of us. One got drowned and t
other one was the one that told me about it.
Q. If you were there how come you not to know it?
A. Because it was the first time that I was out there.
Q. You did not know where you were then?
A. Certainly not. If I had gone over board I would have drow
too.
Q. You are not able to tell where you were although you wer
there at the time your brother was drowned?
A. No sir.
Q. You could not tell?
A. No sir, how could I tell when it was the first time that I wa
out there.
A. Well I don't know. I am asking you. Have you any idea
or would you have any idea as to where you were if your brother
had not told you?
A. He had told it to me that often. No sir. I would not know
if he had not told me.
Q. When was it that he told you?
A. He has told me so often.
Q. What did he tell you was the place?
A. He told me that he was drowned off of Cat island and he
marked it down in the Bible and made a record of it.
Q. He marked it down where?
1433 A. In the Bible.
Q. What is the entry in the Bible.
A. I can give you a copy of it. I just taken a copy of it.
(Witness shows a copy of the entry in the Bible to counsel.)
Q. Who made this entry?
A. An uncle of mine in New Orleans.
Q. What is his name.
A. His name was Henry Smith. He is dead now.
Q. He entered that in the Bible?
A. Yes sir, in the family Bible.
Q. In the family Bible of the Kennedy family?
A. Yes sir.
Q. Now what is marked in here are these words. "Drowned on
Wednesday, October 26th, 1886 at two o'clock in the morning at Cat
island. John Collaratt Kennedy"?
A. Yes sir.

Q. You say that you took that from your family Bible?
A. Yes sir.
Q. Whose handwriting is this in?
A. That is my little girl's. My daughter's handwriting.
Q. And the information on which your uncle made this entry in the Bible was given by your brother was it not?
A. Given by me. I wrote the letter to him and told him it was done.
Q. And you got your information from your brother?
A. Yes sir.
Q. Were you awake at the time your brother was drowned?
A. No sir, I was asleep in the cabin.
Q. You were asleep?
A. Yes sir.
Q. When did you find out that your brother had been drowned?
A. My brother called me up and told me that John was overboard, and I got up and went to him.
Q. What was the boat doing at that time?
A. She was sailing.
Q. Was the water rough when you went to get up?
A. It was not so rough but it was dark.
Q. It was dark?
A. Yes sir.
Q. Very dark?
A. Yes sir, pretty dark. I could not see very far ahead.

In connection with the testimony of this witness counsel for Louisiana now offers in evidence the memorandum of entry taken from the family Bible of the Kennedy family which was testified to by the witness and marked Exhibit "A" in connection with the testimony of Louis Kennedy.

Drowned on Wednesday October 26, 1866 at 2 o'clock in the morning at Cat island John Callavatt Kennedy.

Endorsed Exhibit A to cross examination in the testimony of Louis Kennedy State of Louisiana vs. State of Mississippi Filed June 3rd, 1904. William D. Ballard, commissioner.

Q. Mr. Kennedy, who reported to the authorities here the death of your brother? To the authorities here at Biloxi?
A. My brother did.
Q. Were not you arrested?
A. Yes sir, we were arrested. We came here and got help to go out and find him, and while we were in here they found his body and buried it, so my brother and I went and dug it up.
Q. Did the justice of the peace Judge Holly, ask you and your brother where your brother had been drowned?
A. Well he might have at that time, but if he had I could not have answered his question for the simple reason that I did not know.
Q. Did you hear him ask your brother where he was drowned?
A. No sir, I did not hear his evidence.

Q. You were separated?
A. Yes sir.

Q. You spoke just now Mr. Kennedy of having been
1434 stopped by some body from fishing oysters about two or three or four years ago?
A. Yes sir, that was the Mississippi authorities.
Q. That is the only time that you know that you have been stopped?
A. Yes sir.
Q. Where have you been fishing oysters?
A. Well I have not been fishing oysters but a little. In last winter I was fishing oysters with my brother down here at Half Moon island.
Q. Any where else last winter?
A. No sir, we fished there all of the time that I was with him. I was only there for a month or two.

Redirect examination.

By Gen. McCLURG:

Q. Mr. Kennedy, I want to call your attention to this little slip marked "Exhibit A" to your testimony in this case and ask you who copied this from the Bible?
A. My little girl. I told her to write it because she writes a better hand than I do. I asked her to make a copy of it.
Q. Who made this entry in the Bible?
A. I say that an uncle of mine in New Orleans made it. I wrote the letter to him and he taken it down.
Q. Did he put it in the Bible in New Orleans?
A. Yes sir.
Q. Did you see him do it?
A. No sir, but I know that he did it because there was only him and my grandmother there and she was too old. She could not write. She was too old.
Q. How come your uncle to state by this entry in the Bible that John Collarett Kennedy was drowned at Cat island?
A. Well that is just the saying; drowned at Cat island, but just exactly where I could not say.
Q. You just said Cat island?
A. Yes sir, I just said Cat island. You know very well that he could not get drowned on the island. He had to get drowned off of the island.
Q. You stated awhile ago that you did not know how far it was?
A. I did.
Q. And you don't know how far it was now?
A. No sir, I do not.
Q. And you did not know at the time you had this entry made in the Bible did you?
A. No sir.

Q. That was your first trip out?
A. Yes sir.
Q. And how long after that was it before you had this entry made in the Bible?
A. As soon as my case was here and gotten rid of, then we wrote the letter to my uncle, and my grand-mother. She is the one that raised me, and I wrote the letter to her to tell her that my brother was drowned. It might have been a couple of weeks afterwards.
Q. Joseph Kennedy, your brother was acting as pilot at that time was he?
A. Yes sir at that time he was.
Q. Had he been on the water longer than you had?
A. Yes sir.
Q. He was very familiar with it?
A. Yes sir, he was very familiar with it.
Q. Do you remember any buoys that night?
A. No sir, I was asleep.
Q. Were you asleep when your brother went over board?
A. Yes sir, I went to sleep about dark.
Q. Where were you when you went to sleep?
A. I was on the south side of Cat island.
Q. You were on the south side of Cat island when you went to sleep about dark?
1435 A. Yes sir.
Q. Which way were you travelling?
A. Southwest. We were making for Creole gap. That is the only thing that I remember.
Q. What time of the night was it that you and your brother were out there; that your brother John was drowned?
A. It was two o'clock in the morning.
Q. So you had been travelling from about dark when you went to sleep until two o'clock in the morning before you waked up? What was it that waked you up?
A. My brother called. He called me and told me that my brother had fallen overboard.
Q. You did not know then and you don't know now how far it was from Cat island?
A. No sir, I never have been over the same ground.
Q. You never have been over the same ground again?
A. No sir.

Here the commission took a recess for the dinner hour, and upon re-convening, with the same counsel present as this morning, the following testimony was taken to-wit:

JOHN WALKER, being duly sworn, testified as follows:—

Q. What is your age Mr. Walker?
A. I am going on 71 years of age.
Q. Where do you reside?
A. In Biloxi.
Q. How long have you lived here?
A. I have been located here and resided here permanently for the last 20 years: going on 21 years.
Q. Where did you reside before?
A. New Orleans.
Q. What has been your occupation for the last thirty years?
A. I have followed the sea since boyhood. I have been steamboating here since 1855.
Q. Are you familiar with the Mississippi sound between Pearl river and Pascagoula say?
A. Quite so. I held a pilot's license for all of these years. Master and pilot.
Q. Issued by authority of the United States?
A. Yes sir.
Q. Where was your license issued?
A. In New Orleans. I have got with me a copy of one issued. The first issued as master, and I have the 16th issued as pilot. Congress passed a law in 1872 requiring masters and mates to be licensed as well as pilots and engineers, and my pilot's license dates from 1856 and the master's license from 1872, covering all of these years.
Q. You have stated that you were familiar with the Mississippi sound east of Pearl river?
A. Yes sir.
Q. Are you familiar with what is commonly called the deep water channel that runs out of the Rigolets and Pearl river?
A. Yes sir, the deep water channel runs between Cat island, and then there are two channels with one each side of Merrilss Coquile. The other one south of that. The deep water channel would be south of it.
Q. How long have you been familiar with this channel?
A. Since 1856. That is I quit piloting in 1883, the winter of 1883. Then I retired from the water altogether, but I was at it constantly for about 27 years.
Q. That is the channel that has been buoyed by the United States Government?
A. Only recently. It was not buoyed in my days.
Q. Do you know when it was buoyed, Captain?
A. No sir I do not.
1436 Q. Could you say whether or not the deep water channel line has ever been regarded as the dividing line between Louisiana and Mississippi?
A. I never heard of it until this controversy arose between the

two States. I always heard and always considered that the boundary line was due south from Pearl river 18 miles. I always did so consider it and always heard it spoken of in that way until this lawsuit.

Q. Until this lawsuit?

A. Yes sir.

Q. What was the character of your steamboat, freight or oyster business?

A. Freight and passenger business.

Q. You were never engaged in taking oysters?

A. No sir.

Q. Do you know anything about this country that we call the Louisiana marshes?

A. I know the coast line only. I don't know anything about the inside. Not through the marshes, but I am familiar with the coast line.

Q. Are you familiar with the line from Malheureux point to Isle à Pitre?

A. Yes sir, all of the way around from the mouth of the Mississippi river, and from the passes of the river all the way around to Lake Maurepas, excepting as I say that I have never been in the marsh, except that I have been through Three Mile bayou, and once in the entrance of Nine Mile bayou from the eastward.

Q. What craft did you have in going through Three Mile bayou?

A. I had a small steamboat.

Q. How much did she draw?

A. Well she only drew about four feet, but I found seven feet of water in there.

Q. You found seven feet of water where?

A. In the entrance.

Q. You say that you went through Three Mile bayou?

A. Three Mile bayou.

Q. Where did you go Captain?

A. From Chandeleur into Lake Borgne.

Q. From Chandeleur sound through Three Mile bayou into Lake Borgne?

A. Yes sir.

Q. With a steamer drawing four feet?

A. Yes sir, she was a steamer.

Q. When was this?

A. I would have to refer to a memorandum to see. I think that t was about 1867 or 1868.

Q. Now look at this map, please sir.

A. I am not at all familiar with maps. I never used them even fter I was a licensed pilot.

Q. This is marked Exhibit "E" to this bill of complaint in this ise, and here is Three Mile bayou?

A. Yes sir.

Q. I want you to tell me how you travelled in going there?

A. Well we came up the coast and turned into the sound throug this bayou into Lake Borgne. Now that I was not familiar wit myself and I had an oyster fisherman who piloted me through tha bayou. I do not claim to be familiar with that at all, nor do I clai to be familiar with any part of the inner marsh.

Q. You came up the coast from the direction of the mouth Pearl river?

A. Yes sir.

Q. And went through this bayou into Lake Borgne?

A. Yes sir.

Q. Well that is in the Three Mile bayou, that is on the Louisian coast between Malheureux point and Isle à Pitre is it?

A. This fisherman took me through there and called that Three Mile bayou. No, that is not Three Mile bayou. The Three Mil bayou that we went through is up here somewhere in the neighbor hood of Isle à Pitre. I never did use charts in all of my piloting. I learned it from other pilots and by observation.

Q. Do you mean to say that you went through this bayou into Lake Borgne?

A. Yes sir.

Q. Does Lake Borgne extend to the east of Grassy island?

1437 A. I so consider it.

Q. How far east does Lake Borgne extend?

A. As far as Cat island pass.

Q. Where does the Mississippi sound begin on the west?

A. At St. Joseph on the west.

Q. Is Lake Borgne south of the sound? Mississippi sound?

A. Part of it.

Q. Have you ever noticed whether there had been any material changes in the Mississippi shore along east of the mouth of Pearl river?

A. Well the only change; there was not much change during my time, but there has some change taken place since. St. Joseph island is cut away some.

Q. Have you noticed any material change along the Louisiana marshes between Malheureux point and Isle à Pitre?

A. None there.

Q. When were you last through there Captain?

A. The last time was in 1883.

Q. You think that there had been no material changes from 1856 to 1883?

By Mr. DYMOND: Objected to on the ground that it is a leading question.

A. No sir, nor had there been any change on the east side of the marsh. No material change from 1856 to 1883. There was a slight change at Point Chico. Point Chico had cut away a little bit where it was exposed to the open sea.

Q. What part of the marsh is Point Chico at?

A. I would call that out about south east.

Cross-examination.

By Col. ZACHARIE:

Q. Were you in the employ of any regular line of steamboats?

A. Yes sir, at times. Of course I travelled on transient steamers around that part principally.

Q. Were you a captain on the old Geltz line of steamboats?

A. Not a captain. I was a pilot.

Q. That is prior to the Civil war?

A. Yes sir.

Q. Were you a pilot on the Morgan line after the war?

A. No sir.

Q. Those boats were running between New Orleans and Mobile were they not?

A. Yes sir.

Q. Now what was the draft of these vessels of the Geltz line?

A. Well the Creole was a light draft, she drew about five or five and a half feet and the Oregan and Cuba generally drew about six or six and a half feet of water.

Q. Now what channel did you follow after leaving the Rigolets?

A. We followed the channel—which way?

Q. Going eastward?

A. Going east, we followed the channel through St. Josephs, and up by Merrils Coquile and through Pass Marianne.

Q. How close did you run to the Mississippi shore. About?

A. Where do you mean? Very close to it at St. Joseph.

Q. I mean from the mouth of East Pearl on past the Malheureux islands and Marianne islands. About how far was this channel that you followed from the Mississippi shore. The main land?

A. Well I don't think at any time except in the middle of the sound that we were over three miles at the furthest. Some times much closer than that.

Q. Do you know what distance the main land was from the Louisiana marshes. What the distance is across there?

A. That varies a great deal too. Just tell me any particular point and I can get at it.

1438 Q. Well say at the east mouth of Pearl river?

A. Over to the marsh?

Q. Yes sir?

A. Well I would say right over on a due south line that it would probably be 11 or 12 miles.

Q. Now as you went on to the eastward until you passed Malheureux islands what would you estimate the distance between the same points. That I have just spoken of?

A. Would you call St. Joseph a part of it?

Q. Yes sir, and Round and Grassy islands?

A. Well it would be about eight miles.

Q. That was the recognized deep water channel was it?

A. Yes sir, Cat Island pass was. Yes sir.

Q. That channel branched off to the south east did not it?

A. Outside yes sir.

Q. Captain, what did you base your opinion on that the Louisiana marshes were a portion of the State of Mississippi?

A. Well on what I have always heard expressed. Whenever I heard it spoken of.

Q. Did you ever hear it discussed?

A. Yes sir, frequently, as late as 1867 I think at one time. I was then in the city of New Orleans and I thought at one time of getting a license as a Mississippi bar pilot. I thought that it extended even that far, and Mr. Henderson who was in the legislature here, we got him to introduce a bill, or he intended to introduce a bill, but he investigated it and he told us that the line only extended 18 miles south of the Mississippi shore. That Mississippi had no jurisdiction further than that. There were several of us citizens of New Orleans who were not bar pilots, and we could not get it from Louisiana, but we could get it from Pass Lucre which would be taken in by Mississippi if the line run the whole way. Mr. Henderson after investigating it told us that he could not do any thing. That the jurisdiction of Mississippi only run 18 miles south of Mississippi.

Q. When you spoke of a bar pilot you meant to the mouth of the Mississippi river?

A. Yes sir, to the mouth of the Mississippi river.

Q. Was it ever mentioned by Mr. Henderson or others that the jurisdiction of Louisiana extended three leagues or nine miles from this Louisiana marsh?

A. We never discussed that. This was in 1867 that I spoke of that Mr. Henderson told us this.

By Mr. DYMOND:

Q. Captain, will you kindly come around here and look at this map, which is called map No. 59. Will you see if you can find the mouth of Pearl river on this map?

A. Yes sir, here it is.

Q. Will you please designate in what direction from St. Joseph you find this mouth of Pearl river?

A. Well I never took the bearing directly.

Q. In a rough way. Approximately?

A. Well it would be east, north east.

Q. Well now don't you mean just exactly the opposite?

A. Yes sir, west north west.

Q. Well now if you were to come out of the mouth of Pearl river with the intention of going eastwardly would you or would you not go through what is called here Grand Island pass, between Point Clear, lower Point Clear and Half Moon island?

A. Yes sir.

Q. As you progress eastwardly what direction would you take as shown on this map?

A. Well I would run up clear by St. Joseph island and north east by east and clear Merrilas Coquile.

Q. Did you notice coming out of the mouth of this Grand Island pass a line with the sailing directions S. W. ½ S. Is that the sailing direction that you would take?

1439 A. No sir, I would go the very reverse. I would go E. ½ north.

Q. Now that was the channel in 1886 was it?

A. That was the channel.

Q. And it was for the purpose of passing to the eastward, north of Merril's Coquile was not it?

A. Yes sir.

Q. Well now was there any other channel in 1856 south of Merril's Coquile?

A. Yes sir.

Q. Will you please look at this line emerging from Grand Island pass, shown on map 59 and marked west ½ south and extending over eastwardly south of Merril's Coquile which I now point out to you?

A. Yes sir.

Q. And I ask you if this is the other channel that you would have gone through south of Merril's Coquile?

A. Yes sir.

Q. You will then notice this channel proceeds S. W. by W.?

A. I am going to the eastward. I was steamboating.

Q. You were going the exact reverse of these indications on this channel?

A. Yes sir.

Q. You notice where it comes to a point north of Porpoise shoal. That it runs south east from Cat Island channel?

A. Yes sir.

Q. Now is it this channel which we have just indicated extending from the mouth of Pearl river north of Half Moon island across Mississippi sound, south of Merril's Coquile, thence eastwardly, north of Porpoise shoals, between Cat island and Isle à Pitre, Was this channel in existence in 1856?

A. Yes sir.

Q. Was there any other channel that you know of by which you could get from the mouth of Pearl river out between Cat island and Isle à Pitre, into Chandeleur sound?

A. No other channel, but the bayou that I spoke of——

Q. Was there any other that would be commonly recognized as a deep water channel?

A. No sir.

Q. Now Captain, going back to your understanding. You never recognized or understood that to be the boundary line between Louisiana and Mississippi. What knowledge if any did you have as to what the boundary line of Louisiana and Mississippi is?

A. I did not have any more than any one expressing an opinion among others in a discussion.

Q. Well now please mention one person who expressed to you any opinion as to the boundary of Louisiana?

A. Well I could give you several. Capt. Ben Ames who was a pilot.

Q. Capt. Ben Ames?

A. Yes sir, he was a resident of New Orleans, and Capt. Jack Hoskins of Mobile, and Capt. Ben. Midget of Mobile.

Q. Now, what did they say to you?

A. Well I could not remember exactly what they said. They all expressed that that was the boundary line.

Q. Do you think that you understood my question?

A. Did not you ask me what they said to me?

Q. No, I asked you what knowledge you had in regard to the boundaries or limits of the State of Louisiana?

A. I told you that I had none except from what I had learned in discussions with others.

Q. Now what did they tell you was the boundary of the State of Louisiana in the south east portion of the State. South of the State of Mississippi?

A. I don't think they ever told me what was the boundary of Louisiana at all. They spoke of the boundary of Mississippi though.

Q. Now did you ever have occasion to look at the acts of Congress which created the State of Louisiana and the State of Mississippi?

A. No sir.

Q. Therefore you never as an independent proposition endeavored to ascertain for yourselves what was the boundary really and correctly between these two States in these waters?

A. No sir, I have never had occasion to study into it through any of the acts of Congress.

1440 Q. You simply, as I understand it, were told that in the act of Congress creating the State of Mississippi that she was given all islands within 18 miles of her shore line?

A. And what Mr. Henderson told me and others connected with him in regard to his researches when we wanted to pass the bill through the Mississippi legislature.

Q. Had you ever heard of Mississippi appointing pilots to pilot to the mouth of the river?

A. I never had. We intended to try and have a bill passed if we could do so, but I had never heard that Mississippi had done that previously.

Q. You don't know whether any Mississippians were ever arrested for piloting in Louisiana at the mouth of the Mississippi river, do you?

A. No sir.

Q. Did you ever hear that as common talk amongst old pilots or any legendary history that came down amongst the pilots of Mis-

sissippi? that any of the Mississippi pilots had been arrested and taken to Pointe à la Hache because they were piloting in Louisiana without a Louisiana license?

A. I never heard of it sir.

Q. Now in this long experience of yours of something like 27 years have you ever encountered any storms?

A. Yes sir. I have encountered a good many.

Q. Between the mouth of Pearl river and the Rigolets and the eastern extent of your voyages?

A. Yes, sir, I have been in a great many.

Q. Were they mild or severe storms?

A. Some were pretty severe. Some as severe probably as we had for many years. Two storms in 1860. Two of the most severe storms that we have had along this coast.

Q. In a rough way, about how many storms, or what you call storms have you experienced in this section in the 27 years that you have piloted? That is from 1856 to 1883?

A. Well I suppose that I have encountered eight or ten severe storms. There were two storms in 1860. One in August and one in September and both of them were severe.

Q. These storms were they as a rule about the equinoctial period in the fall.

A. Yes sir.

Q. What was the effect of these storms on the shipping in this section?

A. Well I have known vessels to go ashore and be wrecked. In one of the storms a Spanish barque went ashore on Pelican island, and a British ship went ashore on Ship island. I remember when the Josephine found herself at Ship island in a pretty severe storm. Another ship was foundered on Cat Island spits, and that is I believe about all of the wrecks of the ocean vessels.

Q. What was the effect on the smaller vessels navigating the inside and on the bath houses and piers and wharves alone on the main Mississippi shore?

A. Well there were a good many smaller vessels that were wrecked in these storms.

Q. Well now is there any effect on the shore of Mississippi itself. The main land. Any erosion as a result of these storms?

A. I don't know of any.

Q. Did you have occasion to notice whether the water was any closer to the front along the coast at any point as a result of these storms?

A. There might have been coasts where a few feet had been cut away, but if there had been any perceptible change I would have noticed it without making a close observation. I am so familiar with it all.

Q. What effect did these storms produce on the bath houses along the Mississippi shore there?

COPY BOUND CLOSE IN CENTER

A. Well sometimes it would sweep nearly all of them away along the front.

Q. Would these storms cross over to the Louisiana marshes?

A. Yes sir.

1441 Q. Would you be able to say what effect they would have produced or did produce on the Louisiana marsh from any positive personal information of yours?

A. I never noticed any effect from 1856 to 1883 except that Point Chico had cut away a little. The most of this was done in the storm of 1860.

Q. You don't mean to say that there were no changes produced?

A. No sir, but it was hardly perceptible.

Q. Do you mean to say that there were no changes produced, or that it was hardly perceptible?

A. I mean in the shore line of the marsh where I am familiar. I don't speak of the inside of the marsh for I don't know about that.

Q. You don't know what changes have been produced on the inside of the marsh?

A. No sir, I only know the coast line.

Q. As to the interior of the marsh I understood at the beginning that you were not prepared to tell. You don't know anything about that?

A. No sir.

Q. You spoke of the coast line. You know where Malheureux point is?

A. Yes sir.

Q. You know where Isle à Pitre is?

A. Yes sir.

Q. You have sailed along down there in your trips?

A. Yes sir.

Q. And you saw the coast line there as you sailed along there?

A. Yes sir, I sailed with a class of vessels that used to coast it very close when I was sailing from Chandeleur sound. I never passed through but very seldom with sea worthy boats. Whenever I was taking a sea worthy boat out from the mouth of the Mississippi out to Mobile, or Lake Pontchartrain I would go up through the middle of the sound. The most of the boats would be Red River boats, long stern wheel boats. Some were crossed out by the insurance and we had to be very careful with them.

Q. I am speaking of the shore line between Malheureux point and Isle à Pitre. You have not gotten to Chandeleur sound?

A. Sir?

Q. I was speaking of the shore line from Malheureux point to Isle à Pitre, and after you come out of the mouth of Pearl river you have not yet gotten to Chandeleur sound?

A. No sir.

Q. Well now if you had occasion to notice this shore line from these vessels as you came out of the mouth of Pearl river? Did you?

No, sir, not particularly. Not along there.
Well what shore line is it that you say you have noticed?
All the way down along the Chandeleur sound. From Isle à
down to Point Chico.
What do you know about the shore line from Malheureux point
le à Pitre?
Well I never had occasion to notice that much.
Therefore you don't know it at all?
No sir.
Could you see it from your boat as you went along there
gh the Mississippi sound?
Well we could have seen it yes sir.
Did you ever look as you were passing eastward out of Pearl
Did you ever look?
I could see Isle à Pitre of course.
Did you ever look to the south as you were passing out of the
of Pearl river and moved on eastwardly Did you ever
o the southward and see this shore line of the Louisiana line;
uisiana marshes between Malheureux point and Isle à Pitre?
No sir.
In all of your trips of 27 years you can not say that you ever
is shore line?
A. You mean south of Isle à Pitre?
A. I said south of the channel between Pearl river and Cat
island?
Yes sir, I have seen it a short distance but I could not see it
way down.
Will you please look at this map which is map No. 59, and I
ut to you on it Malheureux point. Do you recognize it as
es sir.
nd I point out this as Isle à Pitre?
es sir.
o you recognize it as such?
es sir.
nning out of the mouth of Pearl river following as I do with
l along this channel concerning which you have just testi-
f your boat was to progress in this way and you look to the
rd could you see that shore line?
o sir.
d you ever on any of those trips go close enough to the shore
e able to see it?
ell I have gone around here during the war.
here do you mean? Do you mean north of this shore line
aters of the Mississippi sound. You say that you have been
ring the war?
s sir.
w close to the shore line were you then?

A. Well I was on a steamer a short while. A boat drawing feet. Some times we would be a half a mile from it.

Q. Could you see the shore line?

A. Yes sir.

Q. Was it a drâned shore line?

A. A defined shore line. Marshes.

Q. Have you ever been continuously along this shore line fro Malheureux point following this pencil to Isle à Pitre?

A. No sir, I have down to the eastward. Chandeleur sound.

By Mr. Guion:

Q. Captain, I want to ask you a couple of questions that have o curred to me during this examination. Did I understand you t say a moment ago when you were giving your evidence that ther was a bayou that you called Three Mile bayou through which yo went?

A. I was told when I was taken through by this fisherman. H told me that he would take me through Three Mile bayou and cu off this distance up here.

Q. What do you mean by up here?

A. Up around this deep water channel. Between Cat island and Isle à Pitre. He took me through a bayou that he called Three Mile bayou to save that distance there.

Q. To save the distance between Cat island and Isle à Pitre?

A. Yes sir, we were going around into Lake Pontchartrain.

Q. Where — you coming from?

A. From Calcasieu river. When we come up by the lower lagoon we then hauled in towards this bayou and he told me that it was Three Mile bayou.

Q. I find on this map before you which is map No. 59 no bayou along that point west of Grand pass called Three Mile bayou. Could you indicate which one of these bayous it is. Which opening you speak of as Three Mile bayou?

A. No sir, I only went by what he said.

Q. Was it Grand pass through which he went?

A. It might have been Grand pass through which he took me, but he went out Three Mile bayou. This was my regular route up through Chandeleur sound, and then through Cat Island pass. That was my regular route, but on this occasion I had this fisherman aboard, and he was thoroughly posted in the marsh and he proposed to take me through Three Mile bayou to shorten the distance.

Q. At what point did you go into this marsh?

A. I don't know unless it would be —. I know that we cleared this Battle Door island. Left it to the left and went to the westward. It might have been through Grand pass that he took me.

1443

Q. You don't know what the place was except he told you that it was Three Mile bayou?

A. He told me that it was Three Mile bayou.

Q. Now there is one more question that I would like to ask you I understood you to say that you understood that Mississippi, or rather the southern boundary of Mississippi was 18 miles south of Pearl river. Did I understand you correctly?

A. Yes sir.

Q. Was it your understanding that the line was found due 18 miles south of Pearl river. 18 miles due south.

A. That the line extended due south 18 miles.

Q. Due south from what?

A. From Pearl river.

Q. Is it the western mouth or the eastern mouth?

A. The eastern mouth.

Q. The eastern mouth of Pearl river?

A. Yes sir.

Q. Have you ever heard discussed the subject of where the line after it left Pearl river, the eastern mouth struck the Louisiana marshes. At what point?

A. No sir, I don't think that I ever did.

Q. All that you heard was that Mississippi extended 18 miles south of the eastern mouth of Pearl river?

A. Yes sir.

Q. Did you ever discuss or hear discussed the subject matter of the line running along Nine Mile bayou or down Nine Mile bayou?

A. I don't think I ever did.

Q. And you are quite sure that you are not able to state the point that is reached in the Louisiana marshes after you leave the mouth of Pearl river that far down?

A. No sir.

Redirect examination.

By Gen. WILLIAMS:

Q. Captain, you explained awhile ago that your usual route was up the channel here by this point. What is that?

A. Isle à Pitre.

Q. And that on one occasion you were carried through this pass by some fisherman who was on your boat?

A. Yes sir.

Q. Now as I understand it you were questioned by the counsel for Louisiana as to the reason why you went through this way and the distance. I would like for you to state in your own way why you happened to go this way and what the distance is from this point to that one over there?

A. Well sir, when we come up north of Door point——

Q. Now call your points all of the time. You did not do it is the reason I am asking you this question now?

A. When we come north of Door point this fisherman proposed to me that he knew the way and could take me through Three Mile

CARD 16

bayou as he said and shorten the distance that we would have to g
We went right around Isle à Pitre and out this channel.

Q. To what point?

A. To the point that we were going to wherever it was. We stru
this deep water channel and came down past St. Joseph. In oth
words he would have to go through at Door point, up through th
that he said was Three Mile bayou. We would have to run in
deep water channel over here and carry us to St. Joseph island?

Q. Was your point in view St. Joseph island?

A. Yes sir, that is the point in view to keep in the channel throug
the Rigolets.

Q. To go through this way was to shorten the distance to S
Joseph island?

1444 A. Yes sir.

By Mr. McCLURG:

Q. What river was it you say you came out of?

A. Out of Calcasieu. We entered at the head of the river an
went through the head of the pass and went down Pass Alutia.

Q. And came out to the eastward?

A. Eastward. We came out of this pass and up inside of Chande
leur sound.

Q. When was this?

A. I think it was in 1867.

Q. You spoke awhile ago about some trip that you made around the
coast from Malheureux point to Isle à Pitre during the war did not
you?

A. Yes sir.

Q. Where did you start from on this trip if you remember?

A. Well it was on a small gun boat, and we were on the go all
of the time. We were on the go all of the time on a Confederate
boat.

Q. How near did you go to this Louisiana coast at that time?

A. At any time we were hardly further than a half a mile from
the shore.

Q. Did you make more than one trip?

A. Yes sir, we made probably three or four trips. There were
some Malays living on a small bayou. I disremember where it was
but we used to go there and watch them once in a while.

Q. Where were they?

A. I forget the name of the bayou.

Q. Would you recollect it if you were to hear it?

A. It was some French name. I don't think I would.

Q. Do you remember whether it was Nine Mile bayou?

A. It was not Nine Mile bayou.

Q. Turkey bayou?

A. No sir.

Q. Johnson bayou?

A. No sir.

Q. Creole gap?
A. No sir.
Q. St. Malo?
A. No sir, it was a French name. I can not think of the name that they called it.
Q. Where was it?
A. On the north coast of the marsh.
Q. Between Malheureux point and Isle à Pitre?
A. No sir, further west.
Q. It was on the coast of Lake Borgne then was it?
A. Yes sir, it was Bayou St. Malo.

T. C. MORRISON, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you reside, Mr. Morrison?
A. Biloxi.
Q. How long have you lived here?
A. I have been living here about 19 years.
Q. What is your occupation?
A. Oysters.
Q. Are you familiar with the waters to the east of Lake Borgne?
A. Yes sir.
Q. How long have you been familiar with them?
A. Ever since 1866.
Q. Tell us how your familiarity has been acquired since that time?
A. I have been getting oysters out at the marsh and bringing them to Biloxi and Mobile.
Q. Since 1866?
A. Yes sir.
1445 Q. Look at this map please sir that is marked Exhibit "E" to the bill of complaint. You will notice the red line drawn from the Rigolets and from Pearl river running eastwardly here?
A. Yes sir.
Q. What is called on the map here channel?
A. I can not see very good. Yes sir, here is Pearl river, and Petit pass, and Petit Pass island. Here is Nine Mile bayou and Three Mile bayou, and Johnson's bayou and Turkey bayou, and Grand pass and Creole gap, and here is what they call Freeze Out harbor here, and here is Isle à Pitre. (Witness points out locations on the map.)
Q. How long have you been familiar with these places?
A. Ever since 1866. That is the first year that I run over there.
Q. Have you gone through these passes?
A. Yes sir, through all of them.
Q. How large a boat did you ever carry through Nine Mile bayou?

A. I have carried a boat through there drawing four and a half feet of water light.

Q. How about through Three Mile bayou?

A. It drew the same water. It was the same boat.

Q. How about Johnson bayou?

A. That has not so much water. After you get inside it is shoals.

Q. How about Turkey bayou?

A. It is the same way.

Q. How about Grand pass?

A. It is good water all the way through, clean out to Door point.

Q. How far have you gone into these marshes with your boat?

A. I have gone down to what they call Kaliko bay.

Q. How far is that?

A. I don't know how many miles it is. We come through Three Mile bayou and into Bayou Mussell and come out in to the narrows.

Q. What State were you in. Louisiana or Mississippi when you were down there?

A. I did not know who it belonged to, but I have always heard that the line run due south from Pearl river.

Q. What line?

A. The dividing line between Louisiana and Mississippi.

Q. How far south?

A. Three leagues, 18 miles.

Q. That would be six leagues, would not it?

A. Yes sir, six leagues.

Q. Why did you think that Mississippi extended six leagues south of Pearl river?

A. I have always heard it that way. I never have heard it any different.

Q. I will ask you whether you have noticed the islands such as Big Raccoon and Little Raccoon?

A. I do not see any difference in them. They are about the same that they were when I first went there. The mouth of Three Mile bayou is washed away a little, very little. The heavy northwesters have washed it some.

Q. You have mentioned the northern coast of these marshes. Have you noticed any material change in it from Malheureux point to Isle à Pitre since 1866?

A. No, sir, these shells on the outside will wash away and wash up again, but it is just the same thing.

Q. You will notice on this map Mr. Morrison of Louisiana that she has drawn her line of contention between these two States on what is written on the original map as channel. Are you familiar with that channel?

A. Yes sir, I have been across it many a time.

Q. Do you know whether it has ever been regarded by yourself or others frequenting these waters as the line dividing Louisiana from Mississippi?

A. No sir, I never knew anything about it.

Q. Where is the east end of Lake Borgne. Tell us where you fishermen consider the east end of Lake Borgne?

A. I have never caught any oysters in Lake Borgne.

Q. Where did you catch them?

A. In the marsh.

1446 Q. Have you ever caught any around Grassy island?

A. Yes sir.

Q. Grand island?

A. Yes sir.

Q. And Petit pass?

A. Yes sir, and Nine Mile bayou and Three Mile bayou and Turkey bayou and Drum bayou, and in all of these I have gotten them.

Q. How long have you been catching them?

A. Ever since 1866. In different places. We don't work every year in the same place you know.

Q. Where is the best oyster field?

A. By the marsh. Down by Bayou Mussell.

Q. How did you get there?

A. Come through Three Mile bayou.

Q. How far is it south of Three Mile bayou?

A. It is about eight miles southwest.

Q. What kind of a vessel can you go in Three Mile bayou with?

A. I have been in there with a schooner drawing four and a half feet of water light.

Q. Through Three Mile bayou?

A. Yes sir, down abreast of Bayou Mussel.

Q. How much was she drawing loaded?

A. She would not draw very much more loaded. I had to tip her to get her out. She draws that much light. She belongs to Mr. Sweatman here. My own schooner did not draw but three and a half feet light.

Q. Can you tell us where you have been in that marsh with that schooner?

A. I have been all through there clean through from Isle à Pitre, and down to Drum bay.

Q. Have you gone through Nine Mile bayou?

A. Yes sir, I have been through there and there is plenty of water there. Deep enough water there for a full rigged ship.

Q. Did you ever go as far as Indian Mound bay?

A. Yes sir.

Q. You have been as far as Southwest pass?

A. Yes sir, as far as Southwest pass yes sir.

Cross-examination.

By Mr. Dymond:

Q. Did you ever fish oysters in Mississippi?
A. Yes sir.
Q. When did you first start to fishing them?
A. In 1886.
Q. Did you ever fish oysters in this territory lying south of the main shore line?
A. Yes sir, and along down the coast.
Q. What is that territory called?
A. I have always heard it called the marsh.
Q. Is it not a fact that you have always heard it called the Louisiana marsh?
A. No sir, I have heard it called Louisiana marsh in different parts of it. Down about the mouth of the Mississippi river down there.
Q. Is it not a fact that you have always heard it called Louisiana marsh indiscriminately?
A. I have heard it called that yes sir.
Q. Let's be frank about it. Is it not a fact that you have always heard it called Louisiana marsh?
A. Yes sir, I have always heard it called Louisiana marsh.
Q. When you went into this marsh with a boat drawing four and a half feet of water was it not high tide?
A. No sir, always low tide, so that if you go aground you can get off when the high tide comes up.
Q. Did you have any trouble in getting out?
1447 A. No sir, never. We come out in the night time.
Q. You spoke of having your boat tipped by the bar?
A. When you go inside of Three Mile bayou, it is deeper in there and there is more water.
Q. As a matter of fact Three Mile bayou is quite a short bayou?
A. Yes sir.
Q. It is right deep in the bayou, but it shoals up again as you come out of the bayou?
A. As soon as you get in the bay it shoals up.
Q. Is not it the same way in Nine Mile bayou?
A. No sir, Nine Mile bayou is deep water all through the bayou?
Q. Is it not a fact as to Nine Mile bayou and Three Mile bayou, that some differences exist. That it is deep in the bayou but as soon as you get in the end of the bayou out into Lake Boudreaux that it shoals up again just as it does at Three Mile bayou?
A. Certainly.
Q. Well now is it not a fact also in fishing oysters there that you have never considered whether you were in Louisiana or Mississippi, but that you fished as far down perhaps as American bay?
A. Yes sir.
Q. And it is only within recent years that you have thought at

about any boundary line between the two States. Is not that
rect?
. Yes sir, it is only the last two years or three years that they
e tried to stop the boats from fishing there.
. You did not know what the oyster laws were in Louisiana be-
did you?
. No sir.
. You did not know whether the laws stopped non residents
fishing or not did you?
No sir, I did not know anything about that.
It could have been possible that the oyster law of 1886 per-
d non residents to fish and the oyster law of 1892 stopped them.
could have been possible?
Yes sir, the way that I always looked at it I thought that the
p and overflowed land belonged to the United States. I
ght that everybody could fish there, and I went there to fish
You did not know whether this swamp land had been selected
e State of Louisiana and approved to it by the United States,
ou?
No sir.
And you never investigated it to find out?
No sir.
Now in your years of experience since 1866 have you had oc-
to go frequently through the interior of the Louisiana
es?
What for, oysters?
Yes sir?
Of course that was where the best oysters were.
In going through there have you ever noticed the effect pro-
by any storms?
No sir.
Have you ever been in the Louisiana marshes during a storm?
Yes sir.
When was this?
t was not a regular gale of wind but the marshes were all
The marsh is always under any ordinary tide.
ould you see the grass?
o sir, you could not see the grass. It would be even on the
of Grand pass.
low high is the grass there?
he grass grows different heights in different parts of the
aking the highest grass. How high would be the high
bout five and a half or six feet.
ow high were the camps off of the ground?
A. About this high. I don't know exactly how high they
ere but I could pretty near walk under them.

Q. You are about five and a half feet tall?

A. Yes sir, they bedded the oysters there and carried them New Orleans.

Q. Was I correct in hearing you say that you could not see th grass on account of the water?

A. Yes sir.

Q. Was it a heavy wind at that time?

A. Yes sir, it was blowing a southeaster.

Q. Was it that way as far as you could see from your boat?

A. Yes sir, as far as I could see. I had to stay up all night t keep the timber off of the boat.

Q. Were the waves big?

A. Yes sir, you would have thought so if you had been aboar of her.

Q. Did you have occasion subsequent to this storm to go up an of these bayous or places in the marsh and notice whether an changes had been produced by the heavy water and the storms?

A. Well I did not see any difference in it.

Q. I am asking you whether you went up there and noticed that Did you go with that purpose or object in view?

A. I did not go for that purpose, but I used to go out in the marsh maybe every week. Make a trip a week.

Q. Well now are you familiar with St. Joseph island?

A. Yes sir.

Q. Is it in the same condition that it was twenty-five or thirty years ago?

A. No sir, it is washed away some.

Q. It is gone almost out of sight, is it not?

A. I have not been down there very lately.

Q. How about it. What have you heard. Has it not gone nearly out of sight, and have they not had to move the light house?

A. Yes sir, they have had to move the light.

Q. Has not Round island almost washed away?

A. I have not been down there lately.

Q. When was the last time you were there?

A. Two years ago.

Q. Could you see much of Round island two years ago?

A. Yes sir.

Q. What do you call Round island?

A. I call it the next island, last next to Long point. You see nearly every body have got different names for places in that marsh.

Q. That is what I want to get at. Please look at this map marked Exhibit "E" and notice Malheureux point. Do you know where that is?

A. The point that I am talking about is lower down here. This is what I call Round island.

Q. Now what do you call this island which is just southwest of Half Moon island?

A. I don't know what that island is. This is Round island here. You see every body has a different name down there.

Q. You will notice the name Round island on this little island?

A. Yes sir, I see it.

Q. Are you familiar with that island?

A. No sir, I never went around that way much. I always went around here about the marsh and Nine Mile bayou.

Q. You would not be prepared to controvert or deny other witnesses who state that this island was almost washed away?

A. I could not, no sir.

Q. Well now take this pass between Malheureux point and this island. To your knowledge has there been any change in that pass?

A. I don't know. I have not been that way for some time. You see most of my fishing was all down through Three Mile bayou and the middle part of the marsh.

Q. Has there been any change in Three Mile bayou?

A. There is just a little bit on the point. It was washed there with a heavy north wester.

Q. How wide is Three Mile bayou now about?

A. Not very wide. Wide enough for a boat to go through.

Q. Is it a thousand feet wide?

A. I expect it is that.

1449 Q. Well now suppose that witnesses had positively testified that within their knowledge that bayou was at one time but 75 feet wide. Would you say that they were mistaken?

A. It has not been that way since I knew it.

Q. How long have you known this bayou?

A. Ever since 1866.

Q. Did you go through Three Mile bayou on your first trip?

A. Not on my first trip, no sir.

Q. When did you make your first trip out there?

A. The first of September 1866.

Q. Did you go through Three Mile bayou. You did not. Where did you go?

A. I went through Grand pass and Jack Williams bayou.

Q. Well how did you get into Jack Williams bayou?

A. Come through Grand pass.

Q. Will you please point out Jack Williams bayou on the map?

A. Yes sir, I will show it to you. (The witness shows location on the map.)

Q. That is on the eastern shore of the Louisiana marsh is not it?

A. Yes sir, just behind Sun Down island. You can go through by Sun Down island. Go through Grand pass and come out into Jack Williams bay.

Q. That led you into the interior of the marsh?

A. Yes sir, into the marsh.

Q. That is east of West Karako bay.

A. Yes sir.

Q. Did you go any further than that on that trip?
A. I could not say about that. Yes sir, I worked in Crane
bay that winter. That is the next bay from it.
Q. Did you ever in 1866 go over here in the neighborho
Raccoon island?
A. No sir, I did not work that far down that year.
Q. Have you ever noticed any changes in any of the islan
the neighborhood of Raccoon island since you were there?
A. Raccoon island is the same that it was when I first saw
don't see any difference in it.
Q. Did you ever notice any change in the island called N
island?
A. I don't know any island by that name.
Q. If witnesses testified that that island was wiped off of the
of the earth would you be familiar enough with the subject to
that it was not true?
A. I don't know of any such name for an island since I have
there at all.
Q. Is it not your idea that the success of Mississippi's case dep
upon proof that there has been little or no change in the topogra
of that part of the country?
A. No sir, there is very little change that I saw in it at all.
Q. You are sure of that?
A. Yes sir, I am sure of that.
Q. Is it not a fact that there have not been any changes at all
A. I don't know anything about it before I went there.
Q. As far as you know there have been no changes at all?
A. No changes at all only this little place washed away in
Three Mile bayou.
Q. The storms etc., made no difference down there?
A. They have not made any difference down there to my kno
edge.

By Col. ZACHARIE:

Q. How old a man are you?
A. 59 years old. I was born in 1845.
Q. How long have you lived in Biloxi?
A. 18 years.
Q. Where did you live before that?
A. I was at Mobile. Mobile bay on a skiff.

By Gen. GUION:

Q. How wide is Nine Mile bayou now at the mouth?
A. I have not been there in two years.
Q. How wide was it when you were there two years ago
1450 A. I could not tell you exactly how wide it was. I kno
that there was room enough to beat out of it with a schoone
with a head wind.

Q. How wide was it in 1866 when you first went down in this country fishing oysters?

A. I don't see any difference in it only the north point is washed away a little.

Q. How wide was Grand pass when you first saw it in 1866?

A. Well it was about the same. I don't see any difference in Grand pass.

Q. You are not answering my question. I asked you how wide it was in 1866?

A. It was about the same as it is now.

Q. That is not an answer to my question. I am asking you how wide is was. What was its width in 1866?

A. I don't know I never measured it.

Q. How wide is it now?

A. About the same that it was when I first went there. There is no difference in it.

Q. Could you say how wide it is now?

A. No sir, I could not tell you exactly how wide it is.

Q. How wide is Creole gap?

A. That is only a small place. It is shallow.

Q. What width would you call it?

A. There is room enough to beat through the bay there. It is a shallow bay inside.

Q. I don't know any thing about beating through. What I want is to get you as far as you know to give us the width?

A. It is about half as long as that wall.

Q. What distance would you give us as being half as long as that wall?

A. I don't know exactly.

Q. Can you give us an approximate? How wide is Creole gap at the mouth of it going in?

A. It is I guess about one thousand feet wide.

Q. How wide was it when you first knew it in 1866?

A. About the same that it is now.

Q. When was Creole gap made?

A. It has always been that way ever since I knew it.

Q. Did you ever know that country down there when there was no such thing as Creole gap?

A. No sir, it has never been that way since my time. It is the same now that it was when I first went down there.

Q. Did you ever hear it said that Creole gap had been cut there?

A. There was a smack got aground on the south side and they cut a place to get her out. That was before I ever run down in the marsh.

Redirect examination.

By Mr. McCLURG:

Q. You have stated on cross examination that about two years ago you stopped going down there in the marsh?
A. Yes sir.
Q. You were stopped at that time?
A. Yes sir.
Q. Before that time had you ever been disturbed by any of the Louisiana people?
A. Never.
Q. Did you ever know of any objection on the part of the State of Louisiana to fishermen going in there and taking fish and oysters?
A. No sir, they never bothered me. There were some of the Cecilian boats tried to prevent the other boats from fishing there. They told them to get on their own side but they never bothered me. I have been right along by them.
Q. Sailing boats?
A. Yes sir, luggers. They have only one sail. They run in the old basin to New Orleans.
Q. They were taking oysters in there?
A. Yes sir, taking oysters in there.

By Mr. DYMOND:

Q. They told you to stay on your own side?
1451 A. They never said anything to me. They told the other people.

By Mr. McCLURG:

Q. When was this?
A. It was some time ago.
Q. About how long?
A. About five or six years ago. That was down in Indian Mound bay, close to Chimney pass. The bayou runs through from Indian Mound bay to Drum bay.
Q. Was there any objection or interference up to the last two years by any authority or officers?
A. No sir, they never have said a word to me. Nobody has.
Q. Do you know whether you ever carried Captain Walker through the marsh in 1867?
A. No sir.

aptain JOHN WALKER being recalled on behalf of the State of Mis-
ppi testified as follows :—

By Gen. WILLIAMS :

Look at this map now before you filed with the original cross
nd answer as Exhibit " A " and which was offered in evidence
e cross examination of W. M. K. Ducate. I understood you in
examination a short time ago to say that when you were off
in island that it was suggested to you by a fisherman, who was
e boat of which you were the captain, that the most direct
to St. Joseph island was across what has been termed in the
ony heretofore taken as the Louisiana marshes, through Three
bayou. Is that true ?
Yes sir.

Gen. GUION : This testimony is objected to by counsel for the
of Louisiana as being a leading question, and not in accord-
with the testimony of the witness on the stand, who testified
at he was off Martin's island, but that it was Battle Door

You testified in your direct examination that you were directed
sherman on the boat of which you were the captain to a cer-
ute through to St. Joseph island. What route was this.
look at the map heretofore mentioned in the preceding ques-
d say where you were and which way you were going and to
oint your course was directed, and explain fully the route
d taken on similar trips and the reason why you changed it
trip to which you referred in your testimony heretofore.
here were you Captain ?
was coming up Chandeleur sound intending to go around by
of the south side of Cat Island channel towards St. Joseph,
ad an old Greek fisherman on the boat who seemed to be
hly familiar with all of the marsh.
hat marsh ?
e Louisiana marsh as it is called, and when I got abreast of
island he suggested to me that he could take me through
ttle bayou and shorten the distance to St. Joseph island. I
im if he was sure that he could do it without getting
, and he told me he certainly could, so I told him all right,
ut and took the lead line myself and did the sounding, and
he steering, but what route he took through the marsh I
ow. He did go through the marsh and come out on the
e of the marsh, thereby cutting off a great deal of the dis-

here did you reach in that course ?
went across to St. Joseph island and then followed the
down to our destination in Lake Pontchartrain.
ere were you when this fisherman suggested to you that
d go through this way across to St. Joseph island ?

A. About abreast of Martin island It was in sight.

Q. What was your usual course?

1452 A. My usual course would have been straight up Chandeleur sound to Isle à Pitre.

Q. What part of Isle à Pitre?

A. Out in the natural channel between Isle à Pitre and Cat island.

Q. Around to what point?

A. To St. Joseph.

Q. And his suggestion was that you were to do what?

A. The suggestion was that he could take me through Three Mile bayou and thereby cut off all of that distance.

Q. Was this to the east or to the west of Isle à Pitre, the channel between Isle à Pitre and Cat island?

A. It was to the west.

Q. Did you go through these marshes?

A. That is where he took me. What route he followed through the marshes I could not say.

Q. Did you pass through Three Mile bayou?

A. I could not tell you whether it was Three Mile bayou or not.

Q. Are you certain that you passed to the west of the western extremity of Isle à Pitre?

A. I am certain of that.

Q. Did you reach St. Joseph island by that route?

A. Yes sir, by that route.

Q. How much water did the boat draw that you carried that route?

A. Between four feet and four and a half. I could not tell you exactly. She drew over that when I started. I judge that she drew fully four feet at that time after burning fuel.

Q. You said awhile ago that you took the sounding. Did you find deep water through that route?

A. I got no less than seven feet at any time. After we got into some of these bayous in the marsh I got as much as twenty feet in some of them, but the wider places would shallow up again.

Q. Were you in the marsh?

A. Yes sir, in the marsh. Some of the small places that he passed through were very narrow. A long steamer could not have made the short turns.

Q. As a matter of fact you know that you did go through the marsh in some direction from Martins island to St. Joseph?

A. Yes sir, that I am sure of.

Q. And you left Isle à Pitre to the east?

A. To the east.

Q. What course were you going at that time?

A. At the time we changed the course to go in the marsh?

Q. Yes sir?

A. We were going north.

. What direction did you go in taking the route that was fixed he fisherman on your boat?
. Nearly north.
. How much water did you say the boat of which you were the ain at that time was drawing through this marsh?
. As near as I could judge after burning out considerable fuel drew about four feet. She drew about four and a half at the e we started.
. As a matter of fact, if you know, how deep did you find the er between Martin island, and St. Joseph island through the sh?
. Not less than seven feet at any place.
. And you are unable as I understand to determine the exact rse that you took?
. Yes sir, I would not know it.
. But as a matter of fact you do know that you went through n Martin island to St. Joseph island through the marsh?
. Yes sir. I had been around this other course perhaps a few ndred times. It is the usual course. Out north across Chande- sound to the north side of Isle à Pitre, and then westward to Joseph. That is the usual course. I had been there several ndred times, but this time I went through a route that I had er been before or since.
. And that route was?
. Through the marsh.
. Through what marsh?
. Through Louisiana marsh. As the fishermen told me it was through Three Mile bayou.
3 Q. And you were directed on that route by the fisherman who was on your boat?
. Yes sir.
. And he said that he carried you out through Three Mile ou?
. Yes sir.
. All the way along the route which you were carried?

By Mr. DYMOND: Counsel for Louisiana objects to the leading stion.

. Were you or not informed by the fisherman that he carried out through Three Mile bayou?
. He did not inform me afterwards. He informed me before he ted in that he would take me through that route. Through ree Mile bayou.

Recross-examination.

By Mr. DYMOND:

. You were examined in chief and cross examined and ex- ined again, and I understood that your examination was com-

pleted. At that time you testified that when this change of course was made by you that you were off Door point. How is that you have now changed?

A. No sir, I don't think I stated Door point. I said Battle Door island, but after looking at the map I find that I was mistaken about it being Battle Door island. It was Martin island.

Q. What map did you look at. What map have you looked at in the interval, and by whose request did you look at it?

A. I looked at this map while I was sitting in the room yonder.

Q. Was it not shown to you and was it not suggested to you that you had made a mistake?

A. No sir. But after looking at the map I saw that I had made a mistake in that. Instead of being Battle Door island it was Martin island that I was abreast of and in sight of when he made this suggestion.

Q. How is it that you happened to be recalled and put on the stand to correct this?

A. Oh I don't know sir.

Q. Was not the mistake called to your attention by counsel for Mississippi?

A. Not to any thing particular. They merely told me that the attorney general wanted to ask me a question or two more.

Q. Did not he know that you realized that you had made a mistake?

A. Not that I know of.

Q. Did not you tell any body that you had made a mistake?

A. No sir, I did not tell any body until I looked at this map afterwards and I saw that I had made a mistake.

Q. But you do admit that you had made a mistake?

A. Yes sir, instead of Battle Door island I should have said Martin island in my first evidence.

Q. Now you are just as likely to have made a mistake as to the other phases of this question?

A. I hardly think so. I probably, by looking through some of my papers can verify it all now. I happened to keep a daily diary and perhaps when I get through I can refresh my memory by referring to it.

Q. I understood you to say a while ago that you had perhaps made two hundred trips between the mouth of Pearl river and Chandeleur sound?

A. Yes sir, in the 27 years' time that I was there.

Q. And out of these 200 trips it was only on that one occasion that you went through there?

A. Only one occasion.

Q. Through the Louisiana marshes by this route that you have just described?

A. Yes sir.

Q. You never went before?

A. No sir.

1454 Q. And you have never been through there since?
A. No sir.

Q. This route that you have described certainly was not an ordinary route was it. The customary route for people to take?

A. I was a licensed pilot at the time I was taken through there. It was a route that I had never seen or known, and knew nothing about.

Q. Were not the conditions of the tide very favorable at the time you went through there?

A. No sir. In fact out in the water we could not have told the condition of the tide.

Q. I know, but did not you learn that after you got in there. What was the condition of the tide after you found yourself in there?

A. Just an ordinary tide.

Q. Was it a high or a low tide?

A. Just an ordinary medium tide. It was just about medium. It might have been half ebb.

Q. How long a boat were you in?

A. She was about 110 or 120 feet long.

Q. I understood you to say that you had considerable difficulty in getting around some sharp curves?

A. No sir, not with her. She was a side wheel boat.

Q. She was easily handled?

A. Easily handled.

Q. Could a stern wheel boat have gone around these corners?

A. Not very well.

Q. Therefore it was not a well defined course that was capable of being used by regular commerce between Pearl river and the Chandeleur sound?

A. Hardly so to advantage. There is not sufficient commerce going in this direction.

Q. I suppose you endeavored to pick out; and your pilot endeavored to pick out the deepest water that he could, did not he?

A. I suppose that he did because I cautioned him against running aground. He assured me that he would not go aground, and to make sure of it I went and took the lead line myself.

Q. Your boat drew four and a half feet of water?

A. Somewhere between four and four and a half feet.

Q. So far as your lead line was concerned; that was only thrown at intervals as you went along?

A. Yes sir, thrown at intervals, until you would strike these deep bayous and then I did not throw it so often.

Q. The depth of the boat was a constant thing. You knew that there was nothing under four feet?

A. Yes sir.

Q. You would not say that there were no lumps or anything so that you could take a seven foot boat through there would you?

A. No sir, I would not say that.

Q. You would not say that that was a safe thing to do?

A. Yes sir, I would if you did not have a longer boat and one that was managed as easily as she was I think you could do it again.

Q. Do you mean to go in a boat drawing seven feet of water?

A. Yes sir, after you get over the bar there is no further danger. The outer bar is where I got the seven feet.

Q. The outer bar where?

A. At the entrance from the east, and the outlet at the west.

Q. When you saw the entrance from the east you were in the neighborhood of Martin island?

A. Yes sir, where he entered the marsh.

Q. What was the name of this pilot?

A. That I don't know.

Q. Is he dead?

A. I might have his name too. He was a pretty old man then though.

Q. You would not be able to go back that way yourself would you?

A. No sir, I would not know the route that I took at all.

Q. What time was it that you made this trip. What year?

A. I think that it was in 1867. I am not quite confident of that, but I have a memorandum at home.

1455 Gen. GUION:

Q. Could you tell us please how long it took you to go through the Louisiana marshes when you went in at Martin island?

A. No sir, I don't think I could tell you, but there was no delay. No stoppage. We kept going all of the time.

Q. Were you running slow?

A. No sir, we were running full speed except at the entrance and in going out. Then I made him slow up. I was steering the boat myself.

Q. As you went out into Lake Borgne?

A. Into Lake Borgne we slowed up. As I entered there I was very careful. As soon as we got on the inside of the marsh on both sides we dropped into 16 or 18 feet of water.

Q. That is the first time that you had gone through there?

A. Yes sir.

Q. Have you ever gone through there since?

A. No sir.

Q. Do you know of *it* its being a route for vessels to go through there?

A. Not for regular navigation unless the oyster boats and fishing boats go there.

Q. I am speaking of the boats engaged in commerce?

A. I don't know of any thing going through there.

Q. I understood you to say that you had intended when you were

'handeleur sound to go on the regular channel route by Cat nd and Isle à Pitre?
. Yes sir.
. There was a well defined channel which was between Cat nd and Isle à Pitre?
. Yes sir.
. And that channel you said you intended to follow as far as St. eph island?
. Into Lake Pontchartrain. We all used to go right by St. eph island. That is the regular channel between St. Joseph nd.
. In taking this channel did you go north of Grand island?
. North of it.
. North of Grassy island?
. Yes sir.
. Is that channel a well defined channel that leads into the Rigo- ?
. Yes sir.
. Is there any channel that debouched from that and left it ng on up into Pearl river?
. Into East Pearl river?
. Yes sir?
. No sir, it was a wide channel all the way from the Rigolets up.
. How did you reach that channel coming out from Pearl river?
. You steered right straight out south.
. South out of Pearl river?
. Yes sir.
. Did I understand you to say that there was after leaving the ern mouth of Pearl river a channel that led into this other chan- that you spoke of that went into the Rigolets?
. Yes sir, it is the only channel east and west, and Pearl river ties out into this channel.
. Was this the deepest channel that you know of that would e a vessel from Cat Island pass to Pearl river?
. Yes sir, that is the deepest channel.

Redirect examination.

Gen. WILLIAMS:

. When was it that you said you went through these marshes tain in this boat. In what year?
. I could not say positively but I judge that it was about 1867.
. How long have you been on boats on this water. When did you begin?
A. Constantly about 27 years.
Q. How long from the time you began to be on a boat; captain of it; how long ago since you were captain or occupied e other position on some boat in the waters off the southern coast Mississippi and Louisiana?

A. You mean how long since I retired?
A. No sir, how long since you started?
A. I counted up to the time of my retirement. I don't know anything about the waters after my retirement. I retired in 1883.
Q. When did you start?
A. In 1856.
Q. When did you retire?
A. In the winter of 1856.
Q. Since you have ceased to be a captain on a boat on the waters of the southern coast here what has been your position and occupation?
A. Well I have been in commercial business. I have been president of several institutions here in Biloxi. I am now president of the Bank of Biloxi, and president of the Biloxi artesian ice factory, and president of the telephone Co., and president of the water works during its existence, and president of the Inter State Building and Loan Association. I have been holding quite a number of positions of that kind. I have for the last seven years constantly been the president of the Bank of Biloxi. For the last 14 years I have been president of the Biloxi Artesian Ice Mfg. Co., and am still president of it.

Thereupon the commission adjourned until Wednesday June 8th, 1904.

Upon the meeting of the commission this morning June 8th, 1904, there were present Hon. William D. Bullard, commissioner, and Gen. Monroe McClurg, counsel on behalf of Mississippi, and Col. F. C. Zacharie, and Hon. John Dymond, Jr., on behalf of the State of Louisiana.

Mr. Louis Grou, a witness on behalf of the State of Mississippi being duly sworn, testified as follows:—

By Mr. McClurg:

Q. How old are you?
A. I am 65 years old.
Q. Where do you reside?
A. Back bay.
Q. What county?
A. Jackson county.
Q. How long have you lived here Mr. Grou?
A. I was born and raised here.
Q. Are you familiar with the waters between Biloxi and the mouth of Pearl river?
A. I was raised on that water.
Q. Back bay and Jackson county are in Mississippi are they?
A. Yes sir.

Q. And the waters between Biloxi and the mouth of Pearl river are in Mississippi?

A. Yes sir.

Q. What is your occupation?

1457 A. Oysters. Oystering all of the time.

Q. How long?

A. Since 1865.

Q. Where?

A. At Grand marsh and Back bay.

Q. Where is Grand marsh?

A. It is out there 18 miles from Pearl river to the south of it.

Q. You have been taking oysters in Grand marsh since 1865?

A. Yes sir.

Q. When you were taking oysters in Grand marsh what State were you in?

A. They called it Mississippi.

Q. Do you know how far Mississippi extends from her shore?

A. 18 miles to the southward.

Q. How long have you understood it to extend 18 miles to the southward?

A. Ever since I was able to crawl I heard it.

Q. Do you know where Isle à Pitre is?

A. Yes sir.

Q. In what State is Isle à Pitre?

A. It must be in the State of Mississippi.

Q. Do you know where Grand pass is?

A. Yes sir.

Q. In what State is Grand pass?

A. It is in Mississippi.

Q. You have stated that you took oysters since 1865 in Grand marsh. Please tell us now what part of the marsh you have been taking oysters in during this time and if you believed that you were in the State of Mississippi.

A. I have been taking oysters out of Greecue bayou and Three Mile bayou and Jack Williams bay, and at Isle à Pitre, and Bayou Boudreaux and all around there.

Q. Why did you say that you were in the State of Mississippi?

A. Because they said that the line went 18 miles south of Pearl river.

Q. How long have you considered that to be the line?

A. It has been a good while. Since I was a young chap. The old folks always said that it was.

Q. Do you know where the channel is that comes out of Lake Borgne and Pearl river around Southwest pass?

A. Lake Borgne. I never have been there. I never have been in Lake Borgne.

Q. You don't know any thing about the deep water channel?

A. No sir, I never have been there fishing oysters.

Q. What sort of boats have you been fishing in?

A. Schooners.
Q. How much did these schooners draw?
A. Light draft. Skiff schooners.
Q. How much?
A. About five tons.
Q. How deep would she go in the water?
A. About two or two and a half feet. Light draft.
Q. Did you ever go in Three Mile bayou in a schooner of that kind?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Karako bay?
A. Yes sir.

Cross-examination.

Mr. DYMOND:

Q. Now Captain what makes you think that Mississippi has jurisdiction 18 miles from her shore?
A. Well that is what I have always heard the old folks say. That it was 18 miles to the south of Pearl river.
Q. Do you know what jurisdiction Louisiana has from her shore?
A. No sir, I could not tell you.
Q. Did you ever hear that she had jurisdiction for nine miles from her shore?
A. No sir.
1458 Q. You never heard that?
A. No sir.
Q. You never looked at the act of Congress creating Mississippi did you?
A. No sir.
Q. You never looked at the act of Congress creating the State of Louisiana?
A. No sir.
Q. You don't know which one was passed first?
A. No sir, I don't know.
Q. Would you be able to say where the 18 miles line was from the Mississippi shore?
A. From the shore?
A. Yes sir, 18 miles.
A. No sir, I could not tell you at all.
Q. Now all of these years that you have been fishing oysters in the Grand marsh as you call it is it not a fact that that has been called the Louisiana marsh ten times as much as it has ever been called Grand marsh?
A. I always called it Grand marsh, me.
Q. Has not every body called it Louisiana marsh?
A. I don't know. I have heard some of them call it that way.

Q. Have you not heard it called that very frequently now?
A. Some of them did call it that, but I always called it Grand marsh, me.
Q. Which did you hear the people call it most. Grand marsh or Louisiana marsh?
A. I could not say. We used to call it Grand marsh all of the time.
Q. You can understand the questions that were put to you by counsel for Mississippi, and I want you to understand the questions that I put to you. You said when you began coming out here they called it Louisiana marsh. Is that correct or not?
A. I heard it called a long time ago the Louisiana marsh. But we always called it Grand marsh.
Q. Have you ever fished in Drum bay for oysters?
A. Mighty few. Karako and Jack Williams——
Q. Have not you ever fished in Drum bay for oysters?
A. No sir.
Q. Do you know where Martin island is?
A. Yes sir.
Q. Have you ever fished for oysters around Martin island?
A. Yes sir.
Q. Were you in Mississippi then?
A. I expect that it is within the 18 miles.
Q. Did you ever fish in California bay?
A. No sir.
Q. Did you ever fish in Drum bay?
A. No sir, I have fished in Karako bay.
Q. Did you ever fish in Lake of the Mound?
A. No sir.
Q. Did you ever fish in Scow pass?
A. No sir.
Q. Did you ever fish around Mitchell's keys?
A. No sir. I never did.
Q. How far is Southwest pass from the main shore of Mississippi?
A. To what?
Q. Southwest pass. And Jack Williams bay. How far is that from the main shore of Mississippi?
A. That would be hard for me to tell you. Southwest pass is inside of Karako there.
Q. You know where Jack Williams pass is do you?
A. Yes sir.
Q. How far is that from the main shore of Mississippi?
A. I could not say now.
Q. What is your best judgment? From the main shore up at Bay St. Louis?
A. It would be about 10 or 12 miles. I don't know exactly whether it is or not. I don't know whether I am right or wrong there.

Q. What makes you think Captain that Isle à Pitre belongs to Mississippi?

A. Because it is to the east over here and within 18 miles of the shore.

Q. You think that it belongs to Mississippi because it is
1459 within 18 miles of the Mississippi shore. That is what makes you think that?

A. Yes sir.

Q. You don't know whether Louisiana has any claim to it or not do you?

A. No sir.

Q. Now when was the first time that you were ever stopped from fishing in Louisiana?

A. That is going on about two years now. They never stopped me. I quit going as soon as this law come out. I quit then.

Q. What law?

A. About the license in Louisiana and Mississippi.

Q. You did not fish oysters then any more?

A. I did not go out there. It has been a year and a half that I did not go in the marsh.

Q. Why? On account of the law?

A. Because we had to pay license from that on.

Q. You had to pay too many licenses?

A. Yes sir.

Q. Were you ever stopped by any body from fishing down in the Louisiana marshes. Did any one ever stop you from fishing there?

A. I did not give them a chance to drive me off because I quit.

Q. I mean before two years ago. Way back in 1870?

A. Nobody ever troubled me at all.

Q. Do you know what the Louisiana law provided at that time. Do you know what the Louisiana law was in 1870 in regard to oysters?

A. No sir, I do not.

Q. Do you know what the Louisiana law was in 1886 on oysters?

A. No sir, I never read the law about this suit at all.

Q. You never read the Louisiana law on oysters at all?

A. No sir.

Q. When you were fishing down there did you ever see any boats from the old basin fishing down there too?

A. There used to be luggers that fished all about there.

Q. In the same place that you were fishing?

A. Yes, sir, but they never told me nothing.

By Col. ZACHARIE:

Q. Before the Civil war were you fishing oysters?

A. No sir.

Q. You were not?

A. No sir, I was fishing in the bay here and at Mobile but not in the marsh.

Q. Why did you then in 1865 commence going to the Louisiana marshes for oysters?

A. We used to fish oysters here and for the shops all about.

Q. Prior to that time you used to get your oysters from this neighborhood did not you?

A. Yes sir.

Q. Were there plenty of oysters in Back bay?

A. In those times there was.

Q. Were there plenty of oysters all around Deer island?

A. There were oysters all around.

Q. Now what is the reason that you stopped taking oysters from your immediate neighborhood and went off this long distance to get oysters from the marshes?

A. Because we thought that we could do better you know.

Q. Why could you do better?

A. Because there were a heap more oysters around there. Around Isle à Pitre and so on.

Q. This supply around here was not sufficient?

A. No sir.

Q. Why did this supply cease to be sufficient?

A. You know when they put up all of these factories here they wanted more oysters.

Q. There were no factories here in 1865, were there?

A. I don't remember when the first factory began here.

Q. Now was it not because these reefs of oysters around here were ruined by fishing all through the season. During the spawn-
1360 ing time. Was not that the reason that these reefs and fisheries gave out?

A. They were fished mightily.

Q. They were fished all during the summer?

A. They were fished in the summer and all. A poor fellow has got to do some thing to live.

Q. Was there any attention paid to culling oysters?

A. Yes sir, we had to cull them.

Q. Was there any law in Mississippi on that subject?

A. I never heard any at that time.

Q. Now is it not a fact that the ruin of these oyster fisheries in this neighborhood was attributable to the fact that the State of Mississippi did not protect her oysters during the spawning season, and because no laws in regard to the culling of the oysters on the banks was in force. Is not that true?

A. Yes sir.

Q. Then it was, after these fisheries in this immediate neighborhood were ruined that these people commenced to go to the Louisiana marshes?

A. Louisiana or Mississippi marsh. It was Grand marsh I used to call it.

Q. Well call it Grand marsh or Louisiana marsh. That is the reason that they commenced to go over there?

A. Yes sir.

Q. You did not have any canners here until way along '70's or '80's 1882 was the first, was not it?

A. Yes sir.

Q. So it was not because the demand was any greater for but because you Mississippians had ruined these fisheries?

A. We had to work to make our living.

Q. Answer the question. Was it not because you Mississi had ruined these fisheries here?

A. They were not quite ruined you know, but we though we would go out there and get some.

Q. The oysters became so scarce that you could not get the tity that you desired from the Mississippi fisheries?

A. Yes sir, that is it, but there were oysters here all of the The poor fellows had to scratch up the best that they could to a living.

Q. There were plenty of oysters in Back bay were not there

A. Yes sir.

Q. There were plenty of oysters to the eastward. Between and Pascagoula?

A. Yes sir.

Q. And all of these fisheries were ruined because there w attention paid to them by the State of Mississippi?

A. They have to cull them now.

Q. Is that so?

A. Yes sir, they have to work them now. You know tha poor fellows here have to fish oysters to make a living. That only thing that they have here to make something out of. Ye our poor fellows have to scratch the best they can in the o business.

Q. Now these schooners that you say that you fished in with were drawing about two or two and a half feet?

A. That is the schooner that I had.

Q. She was a skiff bottom?

A. A skiff bottom with a light draft.

Q. Center board?

A. Yes sir, a light draft you know.

Q. Do you know where the deep water channel is between Grand marsh or Louisiana marsh and Mississippi. Do you k where the deep water channel is?

A. There is a channel to the southward of Cat island.

Q. I am not speaking of to the southward of Cat island. I speaking of to the northward. Towards Pearl river?

A. Yes sir, there is a main channel all along there.

Q. How close to the Mississippi shore was this deep water cha about?

A. About four miles.

1461 Q. About four miles. Was not it in some places m closer than that?

A. In some places it is shallow you know and in some it is not.

Q. I am not speaking about the depth. I mean closeness to the Mississippi shore? I am speaking of coming from the mouth of east Pearl river and coming along the Mississippi shore. How far was it from the main land to the deep water channel?

A. In some places it is about four miles and in some places it is not that far.

Q. Now does that channel pass northward of the Malheureux islands, and the little group of islands lying in there?

A. That is to the southward of Pass Marianne?

Q. That is Marianne island and Grand island, and Round island. It passes to the north there does not it?

A. It passes to the north there I believe.

Q. Is not that the channel that all vessels drawing any great depth pass through?

A. Yes sir.

Q. It was not necessary for you with your little vessels to go through that channel?

A. No sir. We would go right on through, me.

Q. Now that deep water channel passing along close to the shore of Mississippi. After it passes those islands which way does it turn. Which way does it turn after that. Does it keep to the eastward, or does it go towards the southeast towards Cat island?

A. That is from Bay St. Louis you mean?

Q. I mean that channel that comes from East Pearl river close to the north of these islands. Close to the Mississippi main land. Where does it turn to get to Cat island. The pass between Cat island and Isle à Pitre. Which direction does it take?

A. You have to go around by Pass Marianne and strike about east southeast I believe.

Q. That channel passes between Cat island and Isle à Pitre does not it?

A. Yes sir.

FRANK FOUNTAIN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. MCCLUNG:

Q. How old are you Mr. Fountain?

A. I am 70.

Q. Where do you live?

A. Back bay.

Q. What county?

A. I live in Jackson county.

Q. What is your present occupation?

A. Gathering oysters.

Q. How long have you been in the oyster business?

A. I have been in the oyster business; I can not tell you the number of years. I stayed in it nine years I believe.

Q. What did you do before that time?
A. I was running to New Orleans.
Q. In what?
A. A schooner.
Q. Do you know the waters from Biloxi to New Orleans pretty well?
A. Not now. It has been long ago.
Q. How long ago?
A. 25 years ago.
Q. When did you first commence?
A. After the war.
Q. How long after the war?
A. Well not long. Two years afterwards.
Q. About 1867?
A. About.
Q. Do you know where that part of the country is that they call the Louisiana marsh?

A. I don't know nothing about the Louisiana marsh or the
1462 Mississippi marsh I know that marsh down there. I always heard what I heard from the old people.

Q. What did the old people say?
A. They said that the line was 18 miles south of Pearl river mouth. I don't know it though. I can not prove it.
Q. How long have you heard the old people say that?
A. Since I was about this high. (The witness indicates his size)
Q. How old were you then?
A. About ten years old.
Q. Do I understand you to say that since you were ten years old that you have heard that country down there that they call the Louisiana marsh or the Mississippi marsh, that it was in the State of Mississippi?
A. Of course they said it was in Mississippi. When I commenced fishing. We were fishing in Mississippi.
Q. Where was that?
A. No further than Jack Williams bay and South East bay.
Q. When you were fishing in these days down there what State were you in?
A. In Mississippi that far. I would not know of course the minute I got over in Louisiana.
Q. Why did you think that you were in Mississippi. Because the old people said so?
A. Yes sir, of course.
Q. You never read the law on that subject?
A. No sir.
Q. Do you know any thing about that deep water channel that we have been talking about?
A. No sir.
Q. Did the Louisiana officers ever bother you when you were down there in these bays?

A. I never was bothered by any body.
Q. When were you down there last. How long ago?
A. About ten years ago. Nine or ten years ago.
Q. You thought that you were then in Mississippi?
A. Yes sir.

By Col. ZACHARIE: The counsel for Louisiana objects to the question on the ground that it is a leading question.

Cross-examination.

By Mr. DYMOND:

Q. When was it that you were fishing oysters Captain. About the year?
A. 25 years ago I went two or three times and quit. Then I was going eight or nine years.
Q. You were fishing about eight or nine years?
A. Yes sir.
Q. About when did you commence fishing oysters?
A. I could not tell you. When these factories opened.
Q. That was about 1882 was not it?
A. I think that it was about 1883.
Q. Then you fished for nine years after that?
A. Yes sir.
Q. And that would be until about 1892 and then you quit fishing oysters?
A. I know that I quit about nine or ten years ago.
Q. Well that would be just about right. If you started fishing in 1882. Did you ever fish around here in Back bay and Deer island down along to Pascagoula?
A. I would fish once in a while around here of course just to eat.
Q. Why did not you fish around here for the factories. Were not there enough oysters around here?
A. We did fish for the factories.
Q. And then you used up all of the oysters and had to go to some other place?
A. Then I fished outside.
Q. Did not you use up all of the oysters first and then have to go to other places to get them?
1463 A. They were lost three or four times.
Q. What was lost three or four times?
A. The oysters by the fresh water.
Q. The fresh water killed them off?
A. Yes sir, certainly.
Q. When was the fresh water?
A. I have not got everything down and I could not say all of that exactly.

Q. Were the oysters lost in Pascagoula on account of the fresh water?

A. Yes sir, every where. I recollect that they were all lost in Southwest pass too.

Q. Where did the fresh water come from?

A. From the river.

Q. That came from the rain did it?

A. Yes sir from the rain.

Q. Too much rain?

A. Yes sir.

Q. The water out there in the marshes came from the Mississippi River crevasse did not it?

A. Yes sir, the Mississippi river. Pass Manshac.

Q. What did you do after the war. What sort of business were you in after the war?

A. After the war I commenced running to Ocean Springs.

Q. Where from?

A. Back bay or the river or any where carrying wood for the steamboats.

Q. Did not I understand you to say that you were running from New Orleans?

A. In our business here we made one month in one business and another month in another business. You can not always stay in the same trade.

Q. Right after the war did you run at all in a boat between New Orleans and the Gulf coast over here?

A. Yes sir.

Q. Did you own a boat?

A. Yes sir, a small boat.

Q. What sort of a boat was it?

A. A seven ton boat.

Q. How much water did she draw?

A. She drew two feet.

Q. You did not have any trouble in sailing her? You always found plenty of water for her?

A. Of course I did.

Q. You did not have to pick out a channel at all did you?

A. No sir.

Q. Do you know anything about the channel that comes out of Pearl river and runs north of Half Moon island?

A. No sir.

Q. Just wait until I finish the question and then answer it. You must not answer the question before you know what I am going to ask you. Wait until I ask you and you will be able to answer it. Do you know any thing about the channel that comes out of the mouth of Pearl river and runs kind of north to Half Moon island, and runs across Mississippi sound and goes south east between Cat island and Isle à Pitre. Do you know if there is such a channel as that?

A. No sir.

Q. Are you prepared to say that there is no such channel. Do you deny that there is any such channel?

A. No sir, I don't know any thing about that. I would go to New Orleans and come on back.

Col. ZACHARIE:

Q. Captain in your various trips going to New Orleans you would on your voyages backwards and forwards see larger vessels than your own would not you? You saw other vessels larger than yours did not you passing backwards and forwards?

A. Yes sir.

Q. Well now what channel did they pursue if any?

1464 A. Starting from this coast and going where?

Q. Starting from this coast and going into the sea?

A. Starting from this coast the channel goes from Pass Marianne to St. Joseph.

Q. Would they go north of these islands and close to the Mississippi shore?

A. South of St. Joseph, and come around Herron bay and come to the Rigolets.

Q. Did they pass north of Half Moon island and these islands?

A. Yes sir, north of Half Moon island.

Q. Did they come close to the Mississippi shore. The main land?

A. No sir, except they passed out past Grand pass.

Q. And when they passed to the north of these islands did they go close to the main land? To the Mississippi shore?

A. No sir, not at all. They come close to St. Joseph and Herron island.

Q. I mean the Mississippi shore. The Mississippi marshes there. Did they pass close to that?

A. Oh no sir, they came around out.

Q. How far away from it did they pass?

A. Well I think it was about nearly a mile, from the channel going to Isle à Pitre.

Q. I am not talking about that up there. I am talking about to the north. Between the islands and the main land. The Mississippi marshes?

A. Oh I understand you now. The north marsh?

Q. Did they pass close to the Mississippi shore along there?

A. No distance at all.

Q. How far do you suppose from the Mississippi shore?

A. About 200 yards from Long Point they passed. It is a good distance in there.

Q. Now is not that what is called the deep water channel. The main channel that is followed by deep water vessels?

A. You can go pretty close there.

Q. Is not that what is called the deep water channel. The main channel?

A. That is what they call it. Main channel.

Q. Now you heard the testimony of the preceding witness Mr. Grou did not you. The gentleman that was on the stand before you?

A. Yes sir.

Q. Is it or not true as he testified that there were plenty of oysters when you were young men all about here. In Back bay and Deer island and towards Pascagoula, and to the westward of here. Were not there plenty of oysters?

A. Sometimes there were plenty and some times there were not many.

Q. Now is it true or is it not that these Mississippi oyster reefs were destroyed by fishing all through the summer and by not culling the oysters. Knocking off the young oysters. In not doing that?

A. Well there was once.

Q. There was once plenty of oysters through here. Is that true?

A. Yes sir, that is true.

Q. Now is it not a fact that only after these Mississippi reefs of oysters were destroyed, and were exhausted in this neighborhood and along this coast that these Mississippi oyster men commenced to go to these Louisiana marshes for oysters?

A. Many a time when there were oysters there they would go there too, and many a time when there were none there.

Q. Now about what year did you commence. You said about 1883. Is that right. That you commenced fishing oysters?

A. Yes sir, I believe it was.

Q. Then there was a demand. A great demand for these canneries for oysters?

A. Not much then until they had commenced and then there was a right smart.

Q. Then when the canneries got well going there was a great demand for oysters as there is now?

A. Yes sir.

Q. And so that made a greater necessity for the Mississippi oyster fishermen to go to these marshes when they had no oysters left here in the Back bay and around in this neighborhood?

A. Certainly, of course.

1465 Redirect examination.

By Mr. McCLURG:

Q. Was there ever a time when there was not oysters in Back bay and around Deer island and all the way from here to Marianne island, except when they were drowned out by the fresh water?

A. Yes sir, that is right. There were oysters about Pass Marianne and about there, and the shoal banks.

Q. Up to Back bay?

A. In the Back bay. We have got some oysters there now.

Q. Do you know where Isle à Pitre is?
A. I think I do.
Q. Are there oysters about there?
A. Well I have not been there in about nine or ten years.
Q. When did you first go there. When did you first go to Isle à itre?
A. I quit since about nine or ten years fishing oysters in the marsh.
Q. When did you first commence. About when?
A. I have told you one time.
Q. Tell me again, please sir. About when was the first time that ou commenced taking oysters?
A. I forget.
Q. About how long ago?
A. I forget.

J. B. FOUNTAIN, a witness introduced on behalf of the State of ississippi, being duly sworn, testified as follows:

By Mr. MCCLURG:

Q. How old are you?
A. I am 67.
Q. Where do you live?
A. Across the bay.
Q. In what county?
A. Jackson county.
Q. What State?
A. The State of Mississippi.
Q. How long have you lived there?
A. Since I was born.
Q. Are you familiar with the waters between Pascagoula and Pearl ver?
A. Yes sir.
Q. What is your present business?
A. My present business is oysters.
Q. How long have you been engaged at that?
A. Ever since I was six years of age.
Q. You have been on these waters since that time?
A. Yes sir.
Q. That means about 61 years.
A. Yes sir, five years ago I quit.
Q. Well do you know where what they call Louisiana marshes e?
A. I always heard it called the Grand marsh.
Q. Where is the Grand marsh, Captain?
A. Well it is south of Cat island.
Q. South of Cat island?
A. Yes sir, down to the south west.
Q. What State is Grand island in?
A. I have always heard that it was in the State of Mississippi.

Q. Why?
A. Because they say that the State of Mississippi claims 18 miles south of Pearl river.
Q. Do you know where Isle à Pitre is?
A. Yes sir.
Q. In what State is Isle à Pitre?
1466 A. I would consider it to be in the State of Mississippi.
Q. Do you know where Three Mile bayou is?
A. Yes sir.
Q. Where is the north end of Three Mile bayou? In what State?
A. Well I never measured it but I concluded it to be in the same line.
Q. Within 18 miles of the Mississippi shore?
A. Yes sir, it must be in 18 miles.
Q. What do you say about Nine Mile bayou?
A. That is outside of my limit.
Q. Where is your limit?
A. Three Mile bayou. From there down to the north.
Q. Down to what?
A. Down to the eastward. To Isle à Pitre and all aronnd there. Jack Williams and all of those places.
Q. Well do you know the country east of Three Mile bayou?
A. Yes sir.
Q. Do you know where Grand pass is?
A. Yes sir.
Q. What State is Grand pass in?
A. Well I suppose that it is all in the same limit.
Q. What limit?
A. Well they say that it is within the limit of the 18 miles.
Q. How long have you known it as being within the 18 miles limit?
A. Well first since I was a boy 15 years old, and I used to hear the old people say all of the time that that was the limit of the line.
Q. Did you ever fish oysters down there about Isle à Pitre or Grand pass?
A. Yes sir, I have fished oysters there.
Q. How long have you been doing that?
A. Well I commenced in 1883.
Q. In 1883?
A. Yes sir, 1883.
Q. Do you know anything about this deep water channel that runs some where between Cat island and Isle à Pitre?
A. Yes sir.
Q. Did you ever hear any thing about that being the line between the two States?
A. I know that there is a channel there, but I never heard of that being the line.
Q. Where did you hear that the line was Captain?

A. I have always heard that the line was 18 miles south of Pearl ver. That is what I have always heard.
Q. Have you regarded it as being 18 miles south all of your life?
A. No sir, that is what I have heard, but I am not certain about

Q. How have you regarded it?
A. All of the old settlers used to tell me that that was the limit.
Q. Did you accept that as being correct?
A. That is the way that we had to take it.
Q. Has that guided you in all of your experience?
A. That has guided me all of the time as to the lines of the Mississippi sound.

Cross-examination.

By Mr. DYMOND:

Q. Captain you never had occasion to read the act of Congress ating the State of Mississippi did you?
A. No sir.
Q. You never had occasion to read the act of Congress creating State of Louisiana?
A. No sir.
Q. If the United States gave Louisiana all islands within nine les of her coast and gave Mississippi all islands within 18 miles ier shore, would there or would not there be a lapping over down ut Pearl river and Half Moon island?
A. I think that it would go a long way south of that.
Q. Do you think you understand. Suppose that Louisiana had all islands within nine miles of her coast and Mississippi all islands within 18 miles of her coast. Now where is Louisi's coast? Is not there a coast running from Malheureux point to Isle à Pitre. Is not there a coast out there. From Malreux point to Isle à Pitre, that marsh coast. Is not there a rsh coast along there?
A. Yes sir.
Q. Suppose you were to measure north nine miles from this marsh st and then measure south 18 miles from Mississippi's shore. uld not these two lines lap over one another?
A. I suppose they would.
Q. You did not know that Louisiana had been given all islands ain nine miles of her coast. You did not know that that was ler an act of Congress did you?
A. No sir.
Q. All of the authority you have for saying that the lines are n here is that people told you that Mississippi had 18 miles from shore?
A. Yes sir.
Q. Now as a matter of fact there are no marks down there to w where this 18 miles limit is?

A. No sir.

Q. You never were disturbed there at all when you were there?

A. No sir.

Q. You fished there and the Louisiana people fished there same time, did not they?

A. At the same time.

Q. And it is only within recent years that the people of sippi have been kept out. That is only recently is not it?

A. Yes sir.

Q. When you fished down there did the question ever come to whether you were in Louisiana or not?

A. No sir, it never came up.

Q. Nobody ever discussed it?

A. No sir, I stopped fishing there five years ago.

Q. Before that the question never came up in any way?

A. No sir, no question came up to hinder me from fishing I was fishing.

Q. Did any body come there and disturb you and say Louisiana?

A. No sir.

Q. Did any body come there and say "You have a right here because this is Mississippi"?

A. No sir.

Q. Before you went and fished oysters in 1883 were you coasting business?

A. I had just quit my coasting business when I came to th ter business.

Q. What sort of a boat did you have?

A. A very small boat.

Q. You could go any where in it?

A. Any where I wanted to I had water enough.

Q. You did not have to look for channels?

A. No sir.

Q. You saw other boats going out there that drew a grea more water?

A. Yes sir.

Q. Suppose a boat was coming out of the mouth of Pear and wanted to go down around to Martin's to the southward. did she do that?

A. They had gaps to go through. They had channels through the marsh.

Q. How deep were the channels through the marsh?

A. Some of the channels are pretty deep through there.

Q. Have you ever been through them?

A. Not in the marsh. Just in the edges.

Q. What is the general course that the big boats take that out of Pearl river and want to go to the southeast? What ro they take?

1468 A. They would take I suppose about east southeast.

Q. Well now let's follow the course. Would not they come out of the mouth of Pearl river and go south of — point and north of Half Moon island. Would not they pass through this channel?

A. It is one steady course from the mouth of the Rigolets due east.

Q. When you get opposite Cat Island pass which way would you turn?

A. You would turn a little to the southward.

Q. And go between Cat island and Isle à Pitre?

A. Yes sir.

Q. You have a good deep channel there?

A. Yes sir.

Q. Has not that channel been there ever since you knew this country?

A. Yes sir.

Q. Now about this Grand marsh that you have heard of. Is not that marsh 100 miles long or more?

A. I never went down to see how far it is. I have heard other people say that it is a big marsh.

Q. It runs way down in Plaquemines parish?

A. Way down to the mouth of the Mississippi river.

Q. That is 100 miles up there?

A. I don't know how far it is. It is a pretty good ways.

Q. Did not you call it Grand marsh because it is so big?

A. Yes sir that is it.

Q. Then you heard it called Louisiana marsh too?

A. Here lately I have heard a good many call it Louisiana marsh. I don't know why they call it Louisiana marsh.

Q. You have heard it called that right among these people. The Mississippians here call it that?

A. Yes sir.

Q. Is that correct?

A. Yes sir.

By Col. ZACHARIE:

Q. When you were a young man there were plenty of oysters around here in the neighborhood of Biloxi were not there?

A. They did not grow near as thick as they are growing today.

Q. There were plenty of oysters to supply the trade here however were not there?

A. No sir, not one portion of the trade.

Q. What was the trade at that time?

A. In the oyster business mostly.

Q. I mean to say for what purpose were the oysters fished around here?

A. There were just a few shops.

Q. There was very little demand?

A. Very little demand. Just a few shipping.

Q. There were a good many more oysters around here then — there are now was not there?

A. No sir.

Q. What?

A. No sir.

Q. Do you say that there are as many oysters in Back bay and Deer island and along the coast to the east here now as there was then. As when you were a young man?

A. When they were not fished out yes sir.

Q. Were not they fished out?

A. No sir.

Q. Prior to the canners coming here and after the canners came here, were not those oyster beds here in this neighborhood pretty well exhausted?

A. Yes sir, pretty well exhausted.

Q. Were not the exhaustion of these bays attributable to the fact that the people fished them all the summer through when they were spawning?

A. Not much.

Q. Is it not a fact that all along this coast that oysters were sold all during the summer?

1469 A. A few, not so much. They did not use so many oysters during the summer.

Q. Did not all of these shops along here; have not they as long as you remember sold oysters to these visitors here in mid-summer?

A. Yes sir.

Q. Was there any law of Mississippi which compelled the oyster men to cull oysters, but was not it the habit of these oyster men to take the oysters ashore and cull them on the shore?

A. Not that I know of.

Q. Now is it not a fact that it was when these Mississippi oyster fisheries had become some what exhausted and these canneries were started here from 1882 on that the great majority of these Mississippians went over to this Grand marsh or Louisiana marsh for the purpose of getting oysters?

A. Well they had to go some where to get them.

Q. I asked you if it was not a fact. If it was not until after these fisheries were pretty well exhausted and the canneries were established that nearly all of these fishermen commenced to go to this Grand marsh as you call it to get oysters?

A. Well they had to go some where to get them. There were a good many of them working all of the time but the business could not supply them all and some of them had to go to other places.

Q. And that is the reason that they went to the marshes?

A. I guess some of them.

Q. You have had on this coast in the neighborhood of Biloxi both to the east and west going towards Pascagoula and Mobile. There were plenty of oysters in past times to supply the demand. There were plenty of them just after the war?

A. There was scarcely no use for oysters. Very little demand.
Q. You had plenty of oysters however to supply the demand?
A. Yes sir.
Q. It was this increase in the demand and the extension of your oyster fisheries along your immediate coast that led to these people going to this Grand marsh?
A. Yes sir.

Redirect examination.

By Gen. McCLUNG:

Q. You said that there were some gaps that led down into the Grand marsh. What gaps were they Captain?
A. Well sir Three Mile bayou is a good big gap that goes down into the marshes.
Q. What other gap?
A. Turkey bayou.
Q. All right. What other one?
A. Johnson.
Q. Any others?
A. Grand pass and Creole gap. That is all on the edge of the north marsh.
Q. Is Nine Mile bayou on the edge?
A. That is further west. I never went there.
Q. You have never been that far?
A. No sir, I never have been that far.
Q. Judge Zacharie asked you whether or not you all went into Grand marsh because the oysters had been exhausted to the eastward of Grand marsh. Were all of the oysters exhausted in this section?
A. They were exhausted by the water. The fresh water. They were exhausted at the other end of Grand marsh by the crevasse.
Q. Crevasse from what?
A. From the Mississippi river. They were exhausted twice in my knowledge.
Q. Where?
A. In all of the Louisiana marsh, and the Mississippi sound and all.
Q. All exhausted?
A. Every thing was killed out and has just grown up again.
Q. How long would it take them to recuperate after these overflows and freshets?
A. In two years the- would get so you could use them and in three years they would be all right.
Q. What exhausted them if they were ever exhausted from Pascagoula and about Horn island and Cat island. From Horn island to Cat island. Were there always oysters in here?
A. They did not grow there.
Q. Did they ever grow there?

A. Just here on the edge of the coast.

Q. Were they ever exhausted entirely on the edge of the between Pascagoula and Biloxi?

A. Yes sir, they were killed out twice.

Q. They were killed out in the bay of Biloxi?

A. Yes sir.

Q. Killed out all along the Mississippi sound?

A. Yes sir.

Q. When was this Captain?

A. I can not recollect what year it was, but I know very well it happened.

Q. About how long ago?

A. It has been a good many years ago. The last crevasse w New Orleans.

Q. Was not the last crevasse about 1897?

A. I believe that was when it was.

Q. That is six or eight years ago?

A. Yes sir.

Q. And then there was one about 1882 was not there?

A. Yes sir, I believe that there was.

Q. About twenty years ago?

A. Yes sir.

Q. Was there ever a time when the fisheries took them all ou made them scarce?

A. Not that I know of.

Q. You don't know of any time when the oyster catchers them scarce about Back bay and around Biloxi and Pass Christ

A. They thin the oysters out the last part of the season very but they grow up again.

Q. Has there always been a supply for the demand?

A. At Biloxi you could not furnish the demand because you to go all over these oyster reefs on the outside and Pass Chris There is the biggest part of the oysters in Mississippi.

Recross-examination.

By Col. ZACHARIE:

Q. Did you ever know prior to the Civil war of these Missis oyster fishermen going out to this Grand marsh or Louisiana m to fish oysters? Prior to the Civil war?

A. There were some of them doing it. Very few of them.

Q. Very few of them?

A. Very few of them. There was very little demand.

Q. Where did they take the oysters to; did they not take the New Orleans. They did not bring them back here?

A. There were some brought to the shops here.

Q. When did this change take place. The Mississippi oyster ermen on this coast commence going to Grand marsh or Louis marsh first. About what time?

A. Well I suppose that it must have been from about 1883 on.
Q. After these canneries were established here that created this great demand?
A. Yes sir.
Q. Well now you have spoken of these freshets in regard to these oysters about here, and over on this marsh. Is it not a fact that in two or three years after these freshets that the oysters became
1471 more abundant than they were before?
A. Yes sir.
Q. So that these freshets did not destroy the oyster reefs except for a year or two?
A. That is all.

JAMES TAPPER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. MCCLURG:

Q. About how old are you?
A. 64.
Q. Where do you reside?
A. I live in Biloxi now.
Q. How long have you resided here?
A. Well in Biloxi, I have been here off and on for about 30 years.
Q. Where did you reside before you came to Biloxi?
A. Mobile.
Q. What is your occupation now?
A. My occupation right now. Right now I am a watchman.
Q. What has been your occupation for the last thirty or forty years generally?
A. Mainly oystering.
Q. Where?
A. Well I have oystered a good deal in the Grand marsh. I have oystered in Mobile bay and I have oystered up around Biloxi.
Q. What do you mean by Grand marsh?
A. That is the marsh out here about the south west. They call it Grand marsh.
Q. South west of Biloxi?
A. Yes sir, that is what they call it.
Q. That is what is sometimes called Louisiana marsh, is it?
A. I have of late years heard it called Louisiana marsh.
Q. Do you know where Isle à Pitre is?
A. Yes sir.
Q. Turkey bayou?
A. Yes sir.
Q. Three Mile bayou?
A. Yes sir.
Q. And Nine Mile bayou?
A. I have gone through there once.

Q. And Karako bay?

A. Yes sir, I have been there.

Q. Where are these places. Are they in what you call the Grand marsh?

A. You go through the mouth of some passes in the north of the marsh.

Q. Into what?

A. Into the marsh. Through these different passes you can go into the marsh.

Q. In what State are all of these places?

A. I have always supposed that it was in the State of Mississippi.

Q. Why did you suppose that they were in the State of Mississippi?

A. Well about 15 years ago there were two men had an argument and it went so far that they went to a law book.

Q. Do you know what sort of a law book they got?

A. No sir, I don't know the number or any thing else, but it was settled between the two that it was in Mississippi. They read the part where the surveyors had come down from the north part of the two States and struck Pearl river, and they come down Pearl river and there they stopped. They went back to the north point again and went east. Took an east course.

By Col. ZACHARIE: The counsel for the State of Louisiana object to this line of testimony on the ground that this is a representation taken from a book by hearsay, which the witness has not thus far shown that he even read himself. That he has not named
1472 the book, nor the name of the surveyors with any sufficient certainty so that the counsel for Louisiana can rebut or contradict the testimony. And the State of Louisiana therefore reserves an exception to this testimony.

By Gen. MCCLURG: The counsel for Mississippi calls the attention of the counsel for Louisiana to the question asked the witness to wit:—"Why did you suppose that they were in the State of Mississippi," and submits that the witness may answer why he supposed that these places were in the State.

Q. Now, go ahead and answer it Captain. You say they started east?

A. Yes sir, the surveyors then; this is what they read in the book. I was listening to what they were reading.

By Mr. DYMOND: It is to be understood that Louisiana takes a similar objection and exception to all similar questions propounded to this witness, and Mississippi agrees that the exception may be so noted without it being repeated.

Q. Now go ahead?

A. When they got to the east as far as they were going east they come south.

Q. How far east did they go?
A. To where the boundary line was to go.
Q. What boundary?
A. Between Alabama and Mississippi.
Q. What did they do then?
A. That is how it was read. The line they got between the two States. They come down to the coast and measured it, and it said where it give six leagues from the main shore, and then turned due west. That is what they read in the argument when they got the book, and that is what made me always think that it belonged to Mississippi.
Q. Are those places that you have mentioned within six leagues of the Mississippi shore?
A. It is stated in the book that way.
Q. Do you know whether Isle à Pitre and Three Mile bayou and Turkey bayou and Johnson bayou are within six leagues of the Mississippi shore?
A. They are inside of it a good deal.
Q. Where are Karako bay and Jack Williams bay and those places?
A. Karako bay is about south from Grand pass.
Q. How far from the Mississippi shore?
A. From the Mississippi shore I would think that it is about 14 miles as far as I could judge. I could not judge exactly. I have never measured it.
Q. How long have you been familiar with these places?
A. I have run down there at different times. I run through to Mobile once.
Q. How long ago?
A. The first of my going to Grand marsh was in 1867.
Q. What part of it were you in then?
A. I was in Bayou Greecue once, catching a load of oysters for Mobile.
Q. How did you get into this bayou?
A. I went through Grand pass.
Q. You saw Grand pass then in 1867?
A. Yes sir.
Q. When did you see it last?
A. I seen it this last winter.
Q. Did you observe any material difference in its appearance and in its width the last time you saw it as compared with the first time?
A. Nothing much at all. Only I saw the camps that used to be down there were washed down. Some of the old posts are there yet. The ground is not washed away. The old posts of the old camps are there yet.
Q. What sort of camps?
A. Up on posts.
Q. Camps for whom?

A. For the fishermen that used to fish down there in the marsh.

1473 Q. Do you know anything about what they call the deep water channel?

A. There are two channels that I know about.

Q. Tell us what these two channels are?

A. One goes by Pass Christian, and another one goes by Pass Marianne.

Q. Where do they go?

A. Down by St. Joseph and into the Rigolets.

Q. Where do they go eastward from there?

A. From Pass Christian they fork. One channel comes out in what they call Cat Island channel, and the other one comes toward the black buoy.

Q. Have you ever heard anything about these channels being the dividing line between the two States?

A. I have this last year or two since this question has come up, but not before.

Q. This suit you mean?

A. This suit, and they have been trying to drive people out of the marsh.

Q. Who has?

A. Louisiana.

Q. They never did before that?

A. They never did before that.

Q. Have you ever had any trouble before that from the authorities from Louisiana. About going into Grand marsh?

A. Not a bit sir, not before that.

Cross-examination.

By Mr. Dymond:

Q. Now Captain as I understand it you were present at a discussion in regard to the line between Mississippi and Alabama?

A. It was both lines. Did not take Alabama any more than the other one. Both lines were surveyed at the same time.

Q. How do you know?

A. The way that they talked it. They got down to Pearl river first as I understood it and went back to the north point where they started from, and then went due east if I remember what I heard, and then they come south after they went far enough for the coast.

Q. Well now Captain, this is not so; you must have read?

A. I did not read it at all. I heard them read it.

Q. You must have read the act of Congress creating Mississippi. That description of Mississippi begins at the north west corner of the State, and that goes on to say that it comes over to Bear creek in the county of Washington, and then comes south to the shore and then westwardly including all of the islands within six leagues of the shore. That is probably the book that you read?

A. No sir, I never heard no such thing said. The only thing is t one of the surveyors made a new line coming down Pearl river. at is where it stated in the book. Where the surveyors took new line, and where they shifted the line I think it was through ke Borgne. Where they shifted the line. Was not the line shifted ne time?

Q. There was some additional territory added to Louisiana in 2?

A. That is where the line was drawn at that time.

Q. Mississippi was not created until 1817 five years afterwards?

A. This was stated in the book where the surveyor come down to mouth of Pearl river, and at the mouth of Pearl river, they ped and went back to the north point where they started from, went east, and when they went far enough to the Alabama line y come south to the coast, and there they stated six leagues from shore, and then due west.

Q. Now this six leagues from the shore and due west began at the bama and Mississippi line did not it?

A. That is the line coming this way.

Q. Did you understand the question, Captain?

A. Not thoroughly I did not.

Q. In your understanding of this book the first mention of six gues from the shore was in reference to the point starting at the bama line, then going west was not it?

A. At the end of this six leagues he would go west.

Q. In starting west it began at the Alabama line did not it?

A. Yes sir, when it ended at the west line of course it must have ped at the Alabama line.

Q. And going westward it started at the Alabama line and went t?

A. Yes sir, that is what it did.

Q. Because the State had the islands within six leagues from the bama line you think that she ought to have the islands within leagues of the Louisiana line?

A. I don't think any thing of that kind. I only just thought it what I heard was right because it happened to be the law.

Q. Well now Captain I take you to be an intelligent man and as have answered the question in the beginning I will repeat it to to see if you understand it. Was not it because Mississippi was et six leagues beginning at the Alabama line and going west- d that you thought she ought to get six leagues on the western ?

A. That is right. That is what I thought she ought to have.

Q. Now you don't know whether the islands on the westward in six leagues of the Mississippi line had all been given to Lou- na. You don't know that do you?

A. Well where are those islands?

Q. You don't know whether the islands on the westward within

six leagues of the Mississippi line had all been given to Louisiana. You don't know that do you?

A. No sir, I don't know that.

Q. Now are there any islands to the westward that are within nine miles of Louisiana, and yet within 18 miles of the Mississippi shore?

A. Well, I don't call the marsh islands. I never did think that marsh was an island.

Q. Therefore in this Grand marsh there are no such things as islands in there?

A. I don't think there are. I think there are settlements there and currents. In my experience and I know it from my experience that I have seen marsh grow. I can show in the Grand marsh now three different currents where there has been marsh grown there 300 yards from what I remember.

Q. What you consider islands are islands like Ship island and Cat island?

A. Yes sir.

Q. And this other stuff you consider marsh?

A. Yes sir.

Q. Now take Grand island. If the map calls that an island you disagree with the map? Grand island and Half Moon island?

A. I don't think that is an island. It has just been made by the marshes and drift.

Q. You were not there when it was made were you?

A. No sir, but I have seen some made since. I have seen such things as this that I can remember.

Q. Have you ever seen them disappear?

A. I have by currents.

Q. Washed away?

A. By crevasses.

Q. By storms?

A. More crevasses than storms.

Q. Crevasses would not ordinarily wash they away?

A. Yes sir, a heavy crevasse will *east* most any thing away.

Q. That is the current?

A. Yes sir.

Q. Produced by the crevasse?

A. Yes sir.

Q. What builds them up?

A. Why the tide.

Q. What has the tide to do with it?

A. Wherever there is a tide there is always some still water some where, and this still water is where the drift will go and settlements form.

1475 Q. What do you call drift?

A. Well there is always drift around on the top of the waters. There is grass and logs and different things that are drift, and settlements of mud.

Q. What is this Louisiana marsh?
A. I call it nothing but settlements.
Q. It is mud?
A. That is what it is. You can take a pole if you go there and et it through this hard crust and you can run it down 25 feet. here are places there now that you can stand on and shake it.
Q. That is what you call settlements that are brought there by evasses?
A. Brought there by currents. You will find it there in places. ere in Mobile and here in Pascagoula. Anywhere where there re two currents that come together that way. In between these vo currents there is a settlement.
Q. Well now Captain do you know the difference between the soil n Cat island and Isle à Pitre.
A. Yes sir.
Q. Have you ever noticed it?
A. Yes sir.
Q. Now Captain I show you two samples of soil. One marked mple No. 1, and the other marked sample No. 2, and I will ask ou to pick out of these samples the one that came from Isle à Pitre, nd which looks most like the Isle à Pitre soil?
A. Well this is sand. I never have found any of that on Isle à itre. That is sample No. 2.
Q. I repeat the question Captain. Which of these two samples most like Isle à Pitre soil?
A. Both might come from Cat island. There is a marsh on Cat land too. Any body can go on Cat island and get marsh land and ring it in here. That would not condemn me a bit.
Q. I am not trying to condemn you or to hang you either. I am ying to get you as an intelligent man. If you will *to* confine your- lf to the question that I have asked you I think we will get along etter?
A. I have heard the questions asked these other men and I see here they have been pretty badly run over by the questions.
Q. Well we will try and not take any advantage of you Captain, nd I repeat the question I have just asked you. Which of these vo samples, one marked No. 1 and the other marked No. 2, is most ke the soil of Isle à Pitre?
A. This is not soil at all. It is sand.
Q. I am not asking you that question Will you please under- and the question first. Do you know what the soil of Isle à Pitre oks like?
A. Well there are different kinds of soil.
Q. I am not asking you how many different kinds. I- there are thousand kinds or a million kinds. I am asking you the simple uestion. Do you know the soil of Isle à Pitre. If you do not I do ot want to ask you any more questions?
A. I have seen it. I have seen soil just like this here there.
Q. If you will keep your answers separate and make them re-

sponsive to the questions. Do you know the character of soil at Isle à Pitre. Do you know the character of the soil in a general way?

A. I will tell you about this marsh——

Q. I am not asking you that. Have you ever been on Isle à Pitre?

A. Yes sir, I have.

Q. Have you ever examined the character of the soil on Isle à Pitre?

A. I have walked on it from one end of it to the other.

Q. Have you ever paid any attention to the soil and looked at it?

A. Yes sir, it is something like this. I can not tell you any thing more about it. This sample No. 1, is something like the soil that I have seen out here some times.

Q. Now does this sample No. 1 look more like the soil of Isle à Pitre than sample No. 2?

A. It does in some places. There are different kinds on Cat island. You can get the same kind on Cat island.

1476 Q. Now does this sample No. 1 look more like the soil on Isle à Pitre than sample No. 2? If you would not jump at conclusions and go slow and answer the question I think we would do better. I don't want to get anything out of you except what is going to come willingly. I want you to understand the question and answer it in an intelligent way which I know you can do.

A. I am trying to do the best I can.

Q. I know you can Captain. If you will free yourself of the idea that I am trying to take any advantage of you we will get along all right. Let's go back to the subject again. I understood you to say that you knew the character of the soil on Isle à Pitre?

A. Yes sir.

Q. You know the character of the soil on Cat island in a general way?

A. Yes sir.

Q. If you will look at sample No. 1. Did I understand you to say that that looks more like the soil of Isle à Pitre than sample No. 2?

A. Yes sir.

Q. And sample No. 2 looks more like the Cat Island soil than sample No. 1?

A. Yes sir.

Q. You don't know where they come from?

A. No sir.

Q. Will you kindly look at this map marked map No. 59?

A. This is some thing that I am not much acquainted with is maps.

Q. If you will look at this map No. 59 you will notice in the north west corner the Rigolets, and just a little east of that Pearl river. You spoke a moment ago about the channel. Will you

please now notice Pearl river and follow eastward through what is called Grand Island pass?

A. I never heard it by that name.

Q. You call it what. Herron pass?

A. We call it the channel.

Q. You will notice then from there eastward that the channel forks, one going to the north east and the other going almost due east?

A. Yes sir.

Q. Is that the fork that you were speaking of a moment ago?

A. No sir, here is the fork that I was talking about at Pass Marianne, where the channel goes inside of Cat island and one went outside of Cat island. That is the fork that I was talking about.

Q. Do you know any thing about the fork that branches out immediately as the channel leaves the eastward of St. Joseph?

A. I think that I have sounded it.

Q. Have you ever sailed along this line running eastward from the St. Joseph channel towards the Southwest pass. Going between Cat island and Isle à Pitre?

A. Yes, sir, I have run that.

Q. Have you known that channel as long as you have been in the business?

A. Not since I have been going to Grand pass, I have not, but I have later on.

Q. And this channel you had reference to as forking is the one that goes up to Merrils shell bank, and branches, one going inside of Cat island and the other down between Cat island and Isle à Pitre?

A. Yes sir.

Q. The southern branch of this channel is not indicated on this map is it?

A. No sir. I guess there are some shoals in there between it, but there is deep water there too that the boats come up. Of course I have never used a chart. I have always done the soundings with a pole when I had to sound.

Q. Have you ever fished in Drum bay?

A. Yes sir.

Q. Did you ever fish in Indian Mound bay?

A. Yes sir.

Q. Did you ever fish in California bay?

A. I don't know it at all.

Q. Did you ever fish around Martins island?

A. Yes sir.

1477 Q. When you were fishing in Drum bay and around Martins island were you still fishing in Mississippi?

A. I suppose so.

Q. You thought that was within 18 miles of the shore?

A. I thought that it was inside of the 18 miles.

Q. If this is outside of the line now claimed by Mississippi and south of it you are mistaken about that?

A. Well the way that I understood it if it was on the outside it belonged to the United States.

Q. Then you think that any thing that does not belong to Mississippi belongs to the United States?

A. That don't belong to Louisiana or Mississippi either. I suppose that any thing outside of that is supposed to belong to the United States.

Q. Although Mississippi has 18 miles from the shore. No other State can have 18 miles from the shore except Mississippi?

A. I thought that Louisiana had nine miles.

Q. If Louisiana had nine miles why would you think that every thing else would belong to the United States? Did you not think that Louisiana would be entitled to the nine miles if the act of Congress said so?

A. Of course she is.

Q. Did you ever determine where this nine mile line would run?

A. It came from the main land the same as Mississippi I suppose.

Q. Do you know where the main land of Louisiana was in 1812?

A. No sir, I was not born then.

By Col. ZACHARIE:

Q. Captain what is your occupation now?

A. I am a watchman.

Q. How long have you been a watchman?

A. For six months.

Q. In whose employ?

A. I am in the employ of the Barataria Company.

Q. That is the Barataria Canning Company?

A. Yes sir.

Q. Located where?

A. At Point Cadet.

Q. That is an oyster cannery is it not?

A. That is what it is.

Q. It is considerable interested in this controversy is not it? From a money point of view?

A. There has been nothing said to me about it.

Q. I did not ask you that Captain. I asked you whether the cannery by which you are employed is largely interested in the result of this suit?

A. Of course it is interested.

Q. They get a large portion of their oysters from this territory?

A. They get most of their good oysters down there.

Q. This company is located at Biloxi in the State of Mississippi?

A. Yes sir.

Q. If they do not get these oysters they have to supply otherwise?

A. I would suppose so.

Q. They would have to stop if they could not get them would not ey?
A. I suppose so.
Q. And you would lose your job?
A. That would be certain, but that don't affect me at all; I have ner jobs that I could go to.
Q. I am not asking you that. I am asking you for the facts and t for conclusions. Where did this dispute or argument take place regard to this boundary line which you have narrated in your gument in chief?
A. About Bayou Pierre in the Grand marsh.
Q. About what time did it take place?
A. It was about fifteen years ago.
Q. Who were the parties that were disputing?
A. There was one party named Bill Smith and another called Paddie Burns.
78 Q. And they read the book there?
A. No sir.
Q. Where did they read the book?
A. They waited until they got down here.
Q. Where?
A. They come here. Right here. I don't know where they got s book. But Bill Smith stated that he knew where there was a ok that stated where the lines were.
Q. Do you know where they got this book from?
A. No sir, I do not except I happened to be there at the time of e argument and at the time they read the book. Because I was erested that far. I wanted to hear it.
Q. How did you happen to be present on the return from Bayou erre when the book was produced?
A. I was at the argument there.
Q. Did they send for you?
A. No sir, I was on one of the boats.
Q. I mean when you got back here to Biloxi?
A. I come on the same boat with one of them. I came from out ere in the marsh.
Q. Was the production of this book immediately after their return Biloxi?
A. No sir, not exactly. It might have been a week or two weeks erwards.
Q. And how does it happen that you happened to be present just actly when this book was produced and read?
A. I told you that I was running on the same boat.
Q. I understand that, but I am speaking of what occurred in oxi when the book was produced? Did you stay together in the ne house when you were ashore?
A. We did not hardly ever stay ashore. We were on the boat. e would come ashore and — right back on board of the boat again. e did not make no residence there.

Q. Was not this Bill Smith the man that kept the Hole in the Wall?

A. No sir, it was not him at all.

Q. It was another Bil Smith?

A. Yes sir.

Q. You can not tell us the names of any of these parties who were mentioned as having made this survey that you spoke of that was read from the book?

A. No sir, I don't think it mentioned the names of the surveyors. It only stated that they surveyed. I do think that it gave the head man's name, but I could not remember it.

Q. Was it Ellicut?

A. I could not remember that.

Q. Do you know by whom this book was published?

A. It was published either by Congress or the State, I don't know which.

Q. What State do you mean?

A. I could not tell you that. Now that is somethin*k* that I could not tell you, but it was the laws. I think that it was the laws of Mississippi, or some other law I could not tell you, but I know that they took the book out there and read this part. They turned the leaves until they found this part and they read it, and then they took the book back to the owner. I don:t know where the book came from. That is all that I know about it.

Q. You stated in your examination in chief that you first visited this Grand marsh as you call it in 1867?

A. Yes sir.

Q. Where were you then residing?

A. I was at Cedar point, in Alabama.

Q. Where is Cedar point, in Alabama. How far distant from Mobile?

A. About 35 miles.

Q. What did you go to this marsh for?

A. Oysters.

Q. Were not there plenty of oysters at that time on this coast in 1867 along by Pascagoula and between there and Mobile?

A. There were certain kinds of oysters, but not the kind of oysters that we wanted.

1479 Q. What particular kind of oysters did you want?

A. We were hunting what they call plants at that time. We were getting three dollars a barrel for them in Mobile.

Q. Are there not a number of bays and streams entering between here and Mobile in which there are plenty of oysters? Plenty of plant oysters?

A. Yes sir, but they are owned by owners.

Q. I understand, but were there no natural reefs at that time from which you could procure oysters?

A. Not big oysters. There were plenty of reefers.

Q. What do you mean by plant oysters?

A. The plant oyster is a big oyster.

Q. Do you mean that a plant oyster comes from the natural reefs an oyster that has been taken from the natural reefs and planted?

A. Well I will tell you. That name plant comes from the oyster that has been planted. But still we have found them naturally as big as they plant *plant*, and just as good oysters, in different places in the soft mud where they will grow fine.

Q. Is it not a fact that among oyster men, a plant oyster is known as an oyster that has been taken from the natural reefs and planted in a private bed for private persons?

A. I don't understand your question.

Q. I say is it not a fact that amongst oyster men the word from which plant oyster as used has been taken from the natural reefs and planted, and those plant oysters are the property of those who have planted them?

A. That is what I stated. I said that the first name came from oysters that had been planted, but we have found oysters that equal them and we have called them plants.

Q. You call them plants when they are not really plants?

A. They are not plants but the natural growth.

Q. Were there not at this time plenty of oysters of that description both to the east and the west, and from there to Mobile. Plenty of these plant oysters?

A. No sir, except those that were owned by owners.

Q. I mean these plant oysters that you say that you got from the natural reefs?

A. No sir, not for the market's demand at that time.

Q. You say you first went there to this Grand marsh in 1867?

A. Yes sir.

Q. How long did you remain there and how many trips did you make there?

A. Well I never counted the trips exactly. I have stayed there three or four months at a time.

Q. You have camped there?

A. Yes sir.

Q. When was this?

A. In 1880 that I stayed there for four months without coming home.

Q. When next after 1867 did you visit there?

A. Well I think that it was about 1880.

Q. So that there was an interval of 13 years was not there?

A. No sir, I had been off and on through the marsh, every winter a few trips, but I had not been steady going down there.

Q. Were you in business for yourself or did you go with the boat as an employee?

A. I went with the boat catching oysters.

Q. As an employee?

A. No sir, on shares.

Q. Are either of these men with whom you had this dispute or argument and who produced this book. Are they alive?

A. I think there is one of them, yes sir.

Q. Where?

A. In Mobile.

Q. Can you by any means ascertain for us before this examination closes *with* the name of this book is and where it can be found?

A. I will try sir.

By Mr. DYMOND:

Q. Captain will you look at this map that is No. 59 for a moment and direct your attention more particularly to Cat island.

1480 Are you familiar with that soil of Cat island?

A. I have been on Cat island, yes sir, and I have seen the soil.

Q. Is not the soil of Cat island most largely this white sand like Ship island and Horn island?

A. A good deal of it is yes sir.

Q. As a matter of fact is not Cat island the only island that has this white sand mound out there?

A. No sir, it is not.

Q. Has any other island on that coast a mound as big as that?

A. Not quite as large, but there is some. On the south side of this island you will find it as high as twenty feet high.

Q. Now Captain is it not a fact that Cat island is noted for its large white sand dune and you can see it for a number of miles off before you get to the island?

A. It is a fact that it is higher than any other place, but there are other islands out there with the sand on them.

Q. When you speak of the other islands you speak of Ship island and Horn island and Petit Bois and Dauphine island?

A. Yes sir.

Q. And all of these islands beginning at Petit Bois and taking in Horn and Ship island, Cat island is conspicuous for its high white sand dune?

A. It is higher than any other.

Q. Well now Captain is not that due to the fact that the southwest winds striking South spit, and coming up between it and the main body of the island, forces the wind into a narrow space and that carries the sand up into a pile?

A. I have stood on these islands and watched the sand move myself.

Q. Moved by the wind?

A. By the wind.

Q. Does not the conformation of these islands have an influence in making this high sand dune there?

A. It may between these trees where there are woods there, because there is a big bending to the southward, more so than there is right there. There is a space between the two woods where the sand hill

is. This sand moves by any wind, and it will get up about an inch from the body of the sand and keep moving until it gets to the top and then it will fall, just like the water falls.

Q. Well now Captain you did not find any of this character of sand on Isle à Pitre or down in the Louisiana marshes, did you?

A. No sir, I have not found any of it.

Q. You said awhile ago that perhaps sample No. 1, which it was claimed was taken from Isle à Pitre might have been taken from a part of Cat island. Will you please indicate on map No. 59 at what part of Cat island such a sample could have been gotten there?

A. Which, that sand?

Q. No, not the sand. This soil or mud?

A. That could have been taken from a place that they — Nigger point.

Q. Where is that on the map?

A. (The witness shows the location of Nigger point on the map.)

Q. Is that right up in the convexity of the South spit or main part of the island?

A. It is on the south part.

Q. It is called on the map Little bay is it not?

A. It is called here Nigger point.

Q. It has no name on the map. I think on the map it is called Little bay?

A. Yes sir, it must be way up here where they call it Little bay. It always went by the name of South bayou.

Q. Do you know a place called Middle spit?

A. Not by that name.

Q. Do you think that there is a soil of the character of sample No. 1 there?

A. Yes sir, I think there is.

Q. Have you ever examined it there?

A. No sir, not exactly, but I have seen just such soil.

Q. What is the character of the soil on South spit?

A. That is sand.

Q. Is not there soil out there near the light house of the same character as this?

1481 A. There may be because there are a few lumps like that that have been washed there by the current.

Q. Have you noticed to see whether it is white or not?

A. Some places are white and some places are bare where the sand is washed off as clean as that table, and there is nothing but a kind of dirty clay underneath.

Q. Where are these places. On this point to the west?

A. Between the point and the light house.

Q. Which point. East or west?

A. The west point.

Q. What is the character of the bottom from this Cat Island channel. Is it hard or soft?

A. In some places it is sand and shallow, and then a hard sticky

bottom, and reefs. There are oyster reefs on the edge of it, and there are the old shoal banks on the south of it. Old channel.

Redirect examination.

By Gen. McCLURG:

Q. Captain did I understand you to say that samples No. 1 and No. 2, which have been shown you by counsel for Louisiana may be found on either Cat island or Isle à Pitre?

A. It may be found on either one. Cat island has a marsh too. Marshy appearance like that.

Q. And sand?

A. And sand.

Q. Cat island has soil like muck No. 1 and sand No. 2?

A. Yes sir.

Q. And Isle à Pitre has both?

A. No sir, I could not say. There might be some fine shell but I never have seen any sand on Isle à Pitre. It might have been put there, but I have never seen any there.

Q. You have seen this *much* like sample No. 2 on Cat island?

A. Yes sir I have. I have seen it at both places.

The commission here adjourned until nine o'clock tomorrow morning.

1482 United States Supreme Court.

THE STATE OF LOUISIANA
vs.
THE STATE OF MISSISSIPPI.

Vol. 2, p. 304 to 610, incl.

1483 And thereupon the commission met this morning, June — at nine o'clock, there being present Hon. Wm. D. Bullard, commissioner, and Gen. Monroe McClurg, counsel on behalf of the State of Mississippi, and Col. F. C. Zacharie, counsel on behalf of the State of Louisiana.

J. B. MORAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you live?
A. Across Back bay sir.
Q. How far is Back bay from Biloxi?
A. Across Back bay it is very near a mile sir. Within a few hundred yards of it. Maybe 100 yards.
Q. By the Back bay you mean the bay of Biloxi?
A. On the other side of the bay.
Q. That is the bay of Biloxi?
A. Yes, sir, the bay of Biloxi. But I live on the other side of it. I was born and raised over there.
Q. How old are you?
A. I am 68.
Q. You were born and raised on Biloxi bay?
A. Yes sir.
Q. And near its entrance to the Gulf?
A. Yes sir.
Q. Are you familiar with the water between Back bay and Pearl river?
A. Yes sir, I have run schooners out there from New Orleans.
Q. How long.
A. Well it is thirty years ago since I quit.
Q. It has been thirty years since you quit?
A. Yes, sir, thirty years since I quit running to New Orleans on a schooner.
Q. When did you first begin running to New Orleans?
A. Since I was ten years old. I run there with my father when I was ten years old.
Q. Do you know what is called the deep water channel out of the mouth of Pearl river going eastward?

A. I never knew it until here lately. I have heard talk of it. I never run those channels. From here to New Orleans we passed on the inside channels.

Q. Did you ever engage in the oyster fishing business?

A. Yes sir, I fished some oysters. Here lately, about two years ago I quit.

Q. State whether or not you ever knew or heard of the deep water channel being the dividing line between the States of Mississippi and Louisiana?

A. Only here lately I heard some talk of it. I never heard anything before, but here lately I have heard some talk of it.

Q. Do you know where Isle à Pitre is?

A. Yes sir, I have been there.

Q. How long since you were there?

A. It is two years since I have been there.

Q. How long have you known Isle à Pitre?

A. I have been knowing it and I have heard of it for the last forty years.

1484 Q. When did you first see it?

A. About ten years ago. I went oystering and went around in the marsh and got some oysters. As far as Three Mile bayou.

Q. You went as far as *from* Three Mile bayou?

A. Yes sir.

Q. Did you ever go as far as Nine Mile bayou?

A. No sir, I never went in there.

Q. It was ten years ago that you were down there?

A. Yes sir.

Q. How did you go?

A. I went in a boat.

Q. What sort of a boat?

A. Flat bottom skiff; sloop that carried only fifty barrels of oysters.

Q. How much water did she draw?

A. A foot and a half.

Q. In what part of the marsh did you go?

A. I went as far as Three Mile bayou, and about Boudreaux, and down to Drum bay and Morgan harbor and such places as that, to get what they called plants.

Q. Going in there at Three Mile bayou how far could you go down with your sloop?

A. Down to the southward?

Q. Yes sir.

A. I could come out and see from there to American bay through the marsh.

Q. Was there plenty of water to go through there?

A. Yes sir, you could draw five feet of water there if you would follow the right places.

Q. Going through Three Mile bayou with a boat drawing five feet of water, to the southward could you pass down as far as Drum bay?

A. Yes sir.
Q. And California bay out into the sea?
A. Yes sir.
Q. Were you ever at Indian Mound bay?
A. Yes sir.
Q. How did you get there?
A. Well from going down through Three Mile bayou you would come right down into Indian Mound bay.
Q. Was there any trouble in that?
A. No sir, no trouble. Some times you would find shoal places, but if you followed the channel you were all right.
Q. How much water is there there?
A. I never sounded the bayou, but from the looks of it it looked like there was ten or fifteen feet of water at the mouth going in it.
Q. At Indian Mound bay?
A. No sir, Three Mile bayou. A good head of current goes through there and makes it deep.
Q. How about Turkey bayou?
A. Well the mouth of it is a little deep, but after you get on the inside it is a little shallow. Two or three feet of water is all that you can get in there.
Q. Did you ever go through Turkey bayou?
A. No sir, I have gone in there but never through it.
Q. Johnson bayou?
A. Yes sir, I was in there.
Q. How much water is there in there?
A. There is enough water at the mouth to go in there with
1485 a boat drawing five or six feet of water. If you do not follow the right channel though you will get on the shoals.
Q. About Grand pass. Were you ever through Grand pass?
A. Yes sir.
Q. Creole gap. Did you ever go through there?
A. Yes sir, I have gone through there many a time.
Q. With your boat?
A. Yes sir, and I have gone through Grand pass and Creole gap drawing five feet of water and never touched bottom.
Q. Were you ever in Johnson bay?
A. Yes sir.
Q. You have been — Bayou Grecque?
A. Yes sir, many an oyster I have caught out of there.
Q. Where did you first get oysters out of Bayou Grecque?
A. That is somewhere about 12 years ago, the first beginning 10 or 12 years ago.
Q. Were you ever disturbed in there by the Louisiana people?
A. No sir, I was not bothered by anybody at all.
Q. Do you know where West Karako and East Karako are?
A. Yes sir.
Q. Brush island. Do you know where that is?
A. Yes sir, that is right on the edge here. That is on the east side.

Q. Do you know where Raccoon island is and Little Raccoon?

A. Yes sir, you pass along by the side of it to go to Indian Mound bay. Right by the side of it.

Q. What sort of a country is that down there?

A. It is nothing but a marsh.

Q. What do you mean by a marsh?

A. It is low ground that you can hardly walk in it. You go in it and you will bog up in places. If the water is any ways high you cannot walk in it at all. It is nothing but mud and water.

Q. Does the tide submerge it?

A. Yes sir, the least tide goes all over it. It is nothing but bayous and waste and lakes.

Q. Is there any industrial life there such as farming and gardens and stock raising?

A. No sir, I never saw any at all down there.

Q. Nobody lived in there?

A. No sir, no one that I know of except there used to be a camp there.

Q. Is that down at Cat Fish pass?

A. Yes sir, they used to be eaten up by the mosquitoes and ground flies, and you could not hardly live down there. It was just these Cicilian kind of people that could live down there.

Q. What was their occupation?

A. Fishing. Catching fish and sending them to New Orleans.

Q. Well now in what State are those bayous and passes and islands that we have just been talking about?

A. Well I have always heard that they were in Mississippi as far as I know. We always thought that it was in Mississippi.

Q. Where did you first begin to take oysters. What part of the marsh?

A. Creole gap is where we began.

Q. Did you ever go in there around Half Moon island?

A. Well I have fished off there just in passing in going to New Orleans and coming back. Sometimes in a calm I would catch a few to eat, but I never fished there to sell them. On the schooner I had a pair of rakes and sometimes I would catch a few to
1486 eat. But the schooner that I have now has caught a good many around there. Dredged them.

Q. How much draft has your schooner?

A. Ten tons.

Q. How much water does she draw?

A. She draws two and a half feet light.

Q. And she goes all through these marshes?

A. Yes sir, come out of there with a load drawing four and a half feet of water.

Q. Could she go through Three Mile bayou drawing four and a half feet of water?

A. Yes sir, she could. I have come through there with her deep loaded.

. How long ago?
. Well that is some ten years ago.
. Have you noticed any material changes in these marshes since first went in there?
. Not at all. I think that it is grown up in some places. In e places where there is a current there is some dead water and marsh settles there. I know places that has grown up twenty in the last few years.
. Were you ever at Malheureux point?
. Yes sir, it is near St. Joseph is it not?
. Yes sir.
. I am not acquainted with the name. I have never heard that e, but I know that it is around there some where. It is to the thward of Herron island some where. I call that island Grassy nd. I never heard it by that name before.
. Do you know where the Marianne islands are?
. Yes sir.
. What has been your understanding as to the limits of the Mis-ppi boundary?
. I have always heard from my father when I was going to town h him, he told me from the mouth of Pearl river due south 18 es was the State limits.
. When was it that your father told you that?
. Well that is sixty years ago.
. How long did your father live here?
. He was born and raised here. Right across the bay. My ndfather was from Canada.
. Do you know when your grandfather came here. About what e?
. I don't know sir. My father never told me exactly.
. How old a man was your father when he died?
. He was 75.
. He was born here?
. Yes sir, raised and born here right across Back bay.
. And it was from him that you first learned that Mississippi ts run due south from Pearl River mouth 18 miles?
. Yes sir, he was the one that told me and I have heard it many es since.
. Can you say whether the people along the coast have to your wledge *have* regarded that as the limit of the State line?
. Yes sir, they always did from what I could hear.
. 18 miles from the shore?
. That is what I have always heard.
. And until recently there has been no molestation of any people oing within these limits?

A. Yes sir, since they sorter stopped people from going in these limits I have not been out on the boats any more.

Q. You have not been since that?

. No sir, my son runs schooners to the reefs at Pass Marianne.

Q. What is your regular business?

A. I used to follow the business of fishing oysters and farming some little.

Q. What are you doing now?

A. I am farming a little bit. I stay at home and farm a little for my own use. Not to speculate.

Q. Can you say whether or not the oysters are as plentiful in the neighborhood of Back bay and Biloxi and Cat island and Marianne island as they ever were?

A. Yes sir, I think they are. They have been caught up some but still they grow fast. As long as we don't have any freshets. They destroy them. Plenty of rain destroys them and then it is a couple of years before we have any more.

Q. The fresh water is death to them?

A. Yes sir, it kills them in Back bay and around here when we have heavy rains.

Q. What is considered the richest oyster country in this neighborhood?

A. Well I could not hardly tell you because there are places where they will grow better than others, and therefore I could not say exactly, but over in here they grow almost any where, but in some places they grow better oysters.

Cross-examination.

By Col. ZACHARIE:

Q. When did you first visit this disputed territory?

A. When did I hear about it.

Q. When did you first visit it. When did you go there first?

A. Well that is some where about ten or twelve years. I could not say exactly.

Q. Was that the first time that you were engaged in the oyster fisheries?

A. Yes sir, around in that limit. I fished oysters around in Back bay here, but not any out there.

Q. What is this territory commonly known as among the fishermen. What do they call it?

A. We have always called it Grand marsh.

Q. Have you not frequently heard it called among the boatmen Louisiana marsh?

A. Only here lately I have heard it called that. Since they stopped the people from going out there.

Q. Has it not been a common thing ever since these canneries have been established here in Biloxi, when you asked them where they got their oysters from they would tell them that they got them from the Louisiana marshes?

A. No sir, I have not heard that until lately since they had this dispute about it. I was in the marsh there but I never heard any thing about it.

Q. You spoke of plying in the New Orleans trade. What was the draft of your schooner?

A. I was running a schooner that drew five feet of water. Some times I could load her deeper.

1488 Q. What was the character of her build. Was she flat bottomed skiff built?

A. No sir, she was a round bottom boat.

Q. You have been speaking of a small sloop of about 50 tons?

A. No sir, 50 barrels. She would carry fifty barrels. She was only five tons.

Q. How much did she draw?

A. A foot and a half sir light.

Q. Is she the vessel in which you used to traverse the marsh?

A. Yes sir, and fishing oysters.

Q. Drawing one and a half feet?

A. Yes sir, and then I had a schooner after that that I went in.

Q. How much did she draw?

A. She drew two and a half feet.

Q. You never have gone through this marsh with any vessel drawing any more?

A. No more than four and a half or five feet of water. I never had any occasion to have a boat drawing any more water.

Q. You don't know much about the depth of these waters except in the mouths, and in the beginning of them?

A. No sir, there are bayous in there. You will find places in these bayous where you will find twenty feet of water or more.

Q. In spots?

A. Yes sir, in spots.

Q. You have mentioned that you have fished oysters as low down as Turkey bay?

A. Yes sir.

Q. Have you ever fished oysters as low down as Martin's island?

A. Yes sir, that is further north this way.

Q. Did you ever fish oysters in California bay?

A. Yes sir.

Q. Did you ever fish oysters back in Quarantine bay?

A. I don't know where that is.

Q. Back of the old Louisiana quarantine station?

A. No sir, I never went down there.

Q. What is the furtherest place that you ever fished oysters in to the south?

A. In California bay.

Q. Have you ever fished oysters down in American bay?

A. No sir, I have gone down there, but I never fished oysters down there.

Q. You say that you regarded this territory as Mississippi territory?

A. Yes sir.

Q. Do you mean to say that you regarded this territory as far

south as Martin island and California bay as a part of the Mississippi territory?

A. Yes sir, I do.

Q. What do you base that belief on?

A. From what I have heard of the whole business.

Q. That is mere hearsay testimony of others?

A. Yes sir.

Q. That is their opinion?

A. Yes sir.

Q. What year was it if you can fix it approximately when you first visited this territory?

A. This marsh?

Q. Yes sir?

A. Well I don't exactly know, the year exactly but it was somewhere between ten and twelve years. I could not say exactly
1489 the year that it was in. I don't hold such things as that in my mind.

Q. Then how long did you continue to visit this territory and fish oysters?

A. Well I suppose it was somewhere along eight or ten years that I did it, and then I quit here as soon as I heard about this dispute about this limit.

Q. Now when you first commenced fishing oysters in this territory did you ever hear any discussion or dispute as to what State this territory belonged to? These marshes?

A. No sir, I never did.

Q. You never heard that?

A. No sir.

Q. You only heard the rumor talked about that in the opinion of some it was Mississippi territory?

A. Yes sir.

Q. You never took the trouble to examine any books?

A. No sir, I have very little learning, and I never read but very little. In my days I could not get any schooling. I had to work very hard for a living.

Q. I believe that you have stated that one reason why you believed that to be Mississippi territory; that one of your grounds for believing that was that you were never molested or interfered with by any officers from Louisiana?

A. No sir, no one at all. No one whatever.

Q. Is it or is it not a fact that at one time there was a large abundance of oysters in the neighborhood of Biloxi and along this Mississippi coast?

A. Well I don't know. There are plenty of them here now. As many I think as when I was a child. I will tell you where they are now though. They are in deep water.

Q. Were not there in your young days a large amount of natural reefs in Back bay?

A. Yes sir.

Q. And along Deer island?

A. Yes sir, there are oysters growing all about in places like that.

Q. In front of Biloxi along the channel?

A. Yes sir, along there.

Q. Between the shore and the channel?

A. Yes sir, along the shore. In the channels there were very few.

Q. How was it to the west ward running up. Were not there a great many natural oyster reefs running south west of Pass Christian?

A. Yes sir around in there.

Q. Were not there a great many natural oyster reefs to the eastwards towards Pascagoula and even further?

A. Yes sir in shore there and down as far as Alabama and Portersville and along in there.

Q. Now when to your knowledge did the oyster men in this neighborhood first commence in any quantity to go to *to* these marshes for oysters?

A. Well I could not say exactly as to the time. It has been some years but I could not say how many years, since they began to do it exactly. I do not keep a record of such as that.

Q. Now has not it been the custom and habit of the oyster fishermen along this coast for many years to fish oysters indiscriminately during the summer time when they were spawning?

1490 A. Yes sir, they have done it.

Q. Now has it not been their custom for many years, say prior to 1886 not to cull the oysters on the banks but to cull them on the shore?

A. No sir, I never heard of it I always culled them on the reefs where I caught them myself.

Q. I am not speaking about you, but the general custom and habit?

A. Yes sir, as far as I know that has been the habit.

Q. It has been the habit of these people when they got a load of oysters and when the wind was favorable to go home to cull them as they went along and to cull them after they got home?

A. I never have seen that. I have always stopped and culled them where I caught them.

Q. Is it not a fact that up to a comparatively recent time that the State of Mississippi has had no oyster commission and no laws regulating the oyster fisheries?

A. She tried to do it here lately.

Q. No, but I mean for a long time back?

A. Not that I know of for a long time back. They culled their oysters generally where they fished them.

Q. I am speaking of the laws. Was there any commission here in Mississippi or any laws regulating the taking of oysters?

A. I don't think that there was at that time.

Q. Now is not it a fact that this habit of fishing these oysters

during the spawning season, that they culled all of the oysters in transit and on shore, and with the great demand that has been created by these canneries, that your oyster fisheries here in the immediate neighborhood of Biloxi and this immediate vicinity have been almost ruined by this constant drain?

A. This dredging?

Q. And is it not also a fact that owing to this fishing out of season and not culling on the banks and this great demand of the canneries, that for the first time the fishermen along here commenced to go to these marshes to get oysters because the supply was limited here?

A. No, there were oysters here and have always been. That was for the raw oysters and not the canning.

Q. I say, was not it attributable to these three causes which made the supply insufficient, and to supply the demand these Mississippi fishermen for the first time began in any number to go to these marshes for oysters?

A. Well I don't think that they went there until they got these canning factories.

Q. Can you tell us what year these canning factories here first come into operation?

A. No sir, not exactly I can not.

Q. Was it along early in the '80's.

A. Some where along there I think. I could not say exactly though because I never kept no record of it.

Q. Now you have spoken of freshets. The fresh water which from time to time you say have destroyed the oysters?

A. Yes sir.

Q. Did you or not state that it destroyed the oysters. That it utterly destroyed them?

A. Yes sir. For a year or so it would kill them out.

Q. In a year or so would not there be a fresh supply of oysters on these same reefs and banks?

A. Yes sir. It is nearly two years ago that they killed
1491 them in the Back bay. We have now as many as we ever had. We have plenty of oysters here in Back bay in the deep water. It is only with 22 or 30 foot rakes that we can get them though.

Q. You have stated that prior to your going into the oyster business that you were running in the carrying trade between Biloxi and New Orleans. General freight?

A. Yes sir, and after I quit that I went into the oyster business.

Q. What was the character of the vessel in which you were doing this freight trade with New Orleans?

A. Something like 15 tons or something like that. The schooner Salena was her name. I don't know whether she is living now or not.

Q. What was her draft?

A. She drew six feet of water loaded deep.

Q. Was this loaded?
A. Yes, sir, she drew that water when she was loaded.
Q. Was she a round bottom or a flat bottom?
A. Yes, sir, she was a round bottom.
Q. Was she a center board?
A. Yes, sir, she was a center board.
Q. She was a center board in addition to being a round bottom?
A. You have seen the way that these schooners are made here.
Q. Almost a false keel?
A. No sir, a regular center board.
Q. Did you follow any channel in going to New Orleans?
A. Yes sir, from here going through Pass Marianne to St. Joseph and into Pontchartrain.
Q. Is that channel what is known as the deep water channel?
A. I understand that it is. Inside of here it is.
Q. I mean as you approach the mouth of East Pearl river. Is that known as the deep water channel through which vessels of great draft pass?
A. I don't know anything about that channel. I have crossed backwards and forwards through this channel.
Q. Have you not in your various trips to New Orleans met vessels under way drawing much more water than your schooner?
A. Not on that way, but I have met them in the new basin.
Q. Well now is it not a fact that these vessels could only pass through a deep water channel?
A. They could pass through where I did drawing eight or nine or ten feet of water.
Q. I am now speaking of the particular portion of the channel near the mouth of East Pearl river?
A. I have heard of that channel lately, about this channel running out that way, but I don't know where it is myself.
Q. Have you not seen large lumber vessels. Vessels going to East Pearl river to get lumber traverse that deep water channel?
A. No sir.
Q. Vessels engaged in foreign trade?
A. No sir, I never have met them. I have met schooners coming out of Pearl river and going to New Orleans, but I never met any big outside boats.
Q. Then so far as you know there is no deep water channel there?
A. Not that I know of. I have heard of it lately. Since these boundary laws I have heard it that there was a deep water channel there, but I never went into one crossing north and south.
Q. Now all of these various bayous that you have named and penetrate these marshes about which you have testified, is it or is it not a fact, that while there is a good deal of water at the
1492 mouth of these bayous, there are many shallow places where a vessel drawing two feet or two and a half or three feet of water could not pass in low water?
A. Yes sir, there are plenty of places that come out of the water.

There are some reefs that come out of the water, but then there are gullies that you can go through them.

Q. There are deep spots?

A. Yes sir.

Q. But as a rule these various bayous that you have mentioned are not traversible by vessels drawing more than two or two and a half feet of water in low tide?

A. Drawing five feet, I have gone through them in low tide. There are gullies that you can follow.

Q. Do you mean that you can go clear through from the north side of this territory to the south side on the Gulf in vessels drawing four or five feet of water?

A. I never have gone that far.

Q. Then you don't know?

A. No sir.

Q. You only know that in certain places you can go in a vessel drawing four or five feet of water?

A. I don't know about that far. I never went through that far sir.

Q. You have spoken of certain portions of this territory in dispute growing?

A. Yes sir, I have seen it.

Q. Well now is it not a fact that in many places, especially at the mouths of these bayous it has been cutting away?

A. There are little washes in the edges. We get heavy northers in the Three Mile bayou. In three years it would not wash more than a foot or a foot and a half, but right inside I have seen it growing up, more than twenty feet in a year.

Q. During that ten years' experience that you were engaged in this business has not there been a great change in the mouths of these different bayous?

A. I did not notice it so very much myself.

Q. Well now for instance what do you know by tradition or otherwise from what you have heard about the formation of Creole gap. Do you know how this gap was formed?

A. Not exactly. I have heard of some men cutting a gap there at the time the smack Creole was blown up on the shore in a storm. I have heard some fishermen talking about that.

Q. You have heard that prior to that that there was no gap there at all?

A. No sir, they cut one there to get her out.

Q. How wide is this gap now?

A. Well I could not say how wide it is. I have not been out there in three or four years.

Q. When was the last time that you were there?

A. It is something like three years since I was there last I think.

Q. You could not say how wide it is?

A. I could not say exactly. Maybe fifty feet wide and maybe 40. I could not say exactly.

Q. Is it not nearly a quarter of a mile wide?

A. No sir.

Q. Is it not wide enough for a schooner to tack going through there?

A. Yes sir.

Q. To go about?

1493 A. Yes sir.

Q. If it was only fifty feet a vessel could not go through there?

A. I have tacked through there a many a time with my little boat.

Q. Could you tack in a space of fifty feet?

A. Yes sir, and turn around just like a top in there. It is very seldom that you have to tack through there no matter how the wind blows.

Q. And you are going into a gap that is only fifty feet wide?

A. It may be more or less. I could not say exactly.

Q. Well let's take you at your word. About fifty feet. You would have to make a very short tack would not you?

A. Yes sir.

Q. Well now in that space of fifty feet would you get space enough to go about?

A. Yes sir, you fill the sails and luff about and go again.

Q. Would you acquire headway enough to go about or would not you be caught up by the what the sailors call irons?

A. I would take a pole and push her over then.

Q. You have never taken the trouble to post yourself in any way about this boundary line question have you. Either by reading or consulting documents?

A. No sir.

Q. You have simply testified to what you have heard?

A. Yes sir, from the old citizens.

Q. Now did you ever hear any question or discussion about this matter in any way until this present suit was started?

A. No sir, I never did.

Q. You never did?

A. No sir.

Q. Then what you have said about hearing the old people here talking about this boundary line was mere rumor and talk. They did not profess to know any thing about it from a legal point of view?

A. When I was with my father going to New Orleans on the boat. When we got that far he said to me "We are going in Louisiana territory."

Q. Is it not a fact that up to a very recent time there has been a very great diversity of opinion amongst the fishermen and the people as to exactly where the line was?

A. Yes sir, I have heard some talk of it. The reason I heard of that, some Cicilians and such people as that were talking about it. I

have heard them talk about the Louisiana lines and such as that. I told them that I did not know where it was only from what I had heard. I used to run to New Orleans with lumber and charcoal and wood.

Redirect examination.

By Gen. McCLURG:

Q. You say that your father was 75 years old when he died?
A. Yes sir.
Q. How long has he been dead?
A. I don't know sir exactly. Something like 12 or 15 years. I could not say certainly unless I was at home and could see some papers there.
Q. If he was living now he would be some where in the neighborhood of ninety years old?
1494 A. Yes sir, he would.
Q. And he was born and raised on Biloxi bay?
A. Yes sir.
Q. And your grand father came from Canada there?
A. Yes sir, he did.
Q. Judge Zacharie asked you about fishing oysters in Grand marsh after these canneries started. Do you mean to say that the people of Mississippi never fished there before the canneries started?
A. Oh yes sir, I think they did, some of them, I did not.
Q. You did not?
A. No sir.
Q. The establishment of the canneries along the coast shore created a greater demand for oysters?
A. Yes sir.
Q. And a great many more people engaged in the oyster business?
A. Yes sir.
Q. And there were a great many more boats of different kinds?
A. Yes sir, of different kinds.

EUGENE TIBLIER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. How old are you?
A. 63.
Q. Where do you live?
A. In Jackson county.
Q. How far from Biloxi bay?
A. About two miles, right on the edge of Biloxi bay on the north part.
Q. How long have you lived there?
A. I was raised there in the State of Mississippi, in Jackson county and on this coast.

Q. Is your father living or dead?
A. He is dead.
Q. How long has he been dead?
A. Twenty years.
Q. How old was he when he died?
A. 72 years.
Q. How long did he live there before he died?
A. Well he lived in New Orleans a part of the time and then in Alabama and all around, and in Mississippi. My father was a turner by trade.
Q. A worker in wood?
A. Yes sir, a turner in wood and copper and so on.
Q. He was a Frenchman?
A. Yes sir.
Q. What is your occupation now?
A. Well farming. A little farming and raising vegetables.
Q. Are you familiar with the waters between the bay of Biloxi and Pearl river?
A. Yes sir.
Q. How long have you known these waters?
A. Well since I was ten years old. I used to run aboard of a little schooner when I was ten years old.
Q. Where did you run on this schooner?
1495 A. I used to run on Mr. Fountain's schooner when I was ten years old. When I was ten years old was my first trip to New Orleans.
Q. What was this schooner doing?
A. Carrying wood. Lightwood.
Q. Did you ever engage in the oyster business?
A. Yes sir.
Q. When?
A. Well since 1867.
Q. What was your business while you were engaged in the oyster business. Fishing them?
A. Yes sir, fishing them. I was fishing at Back bay at first and around Biloxi, and carrying them some times to New Orleans. I made a couple of trips to New Orleans, and then again I would fish in Grand marsh, and carry them from Grand marsh around the coast here such as to Bay St. Louis and Pass Christian and Biloxi.
Q. What part of the marsh did you fish in?
A. Well the first part of Grand marsh that I went in was Grand pass it is called.
Q. Grand pass?
A. Yes sir.
Q. What other places if any?
A. Well I went down as far as Jack Williams?
Q. You went from Grand pass into Jack Williams?
A. Yes sir, and then into what they call Bayou Grecque.
Q. How far down did you ever fish?

A. Well as far as Martin island and Cat Fish pass it is called.
Q. Did you ever go as far as Three Mile bayou?
A. Yes sir.
Q. Did you ever go through Three Mile bayou?
A. I went as far as Cat Fish pass.
Q. In what kind of craft did you go there?
A. It was a light draft boat drawing a foot and a half of water light.
Q. How much would she draw loaded?
A. Three and a half.
Q. Could you go through Three Mile bayou loaded?
A. Yes sir.
Q. When did you first go through Three Mile bayou loaded?
A. About 18 years or more ago.
Q. When you were fishing in Grand pass and Cat Fish bay and at Martin island in what State were you fishing?
A. Well I thought I was in the State of Mississippi all of the time.
Q. Was there ever any interference with you by any body?
A. No sir.
Q. Why did you think you were in the State of Mississippi Captain?
A. Because the old people in running from here to New Orleans, some times in talking on board the vessel backwards and forwards would say well this is Pearl river, and this is the dividing line between Louisiana and Mississippi. It runs due south 18 miles from Pearl river.
Q. How long had you been here before?
A. I suppose 15 years backwards and forwards on the schooner.
Q. You mean 15 years ago or that you were 15 years old?
A. I was 15 years old. That is what I meant to say I was getting a small salary then.
Q. These people would talk to you about it, and the boatmen understood that the Mississippi line run 18 miles due south from the mouth of Pearl river?
1496 A. Yes sir, that is the way I got it. I was on the schooner with old man Fountain. I was an orphan and I started out at three dollars a month. That was a right small salary was it not.

Cross-examination.

By Col. ZACHARIE:

Q. You stated that you first come into these waters on schooners carrying light wood?
A. Yes sir.
Q. From Biloxi to New Orleans?
A. Yes sir.
Q. When did you first visit what you call the Grand marsh?

A. In 1867.

Q. What was this marsh known as then and now amongst the people generally. Were not they called the Louisiana marshes?

A. No sir, not in those times. I always heard the people say Grand marsh. They would say "I am going to Grand marsh, or I am going to the marsh."

Q. Is it not a fact that amongst you old creoles here that you called it Grand marsh, but is it not a fact that the large majority of the fishermen, and the American boatmen called it the Louisiana marsh?

A. No sir, not in my time when I was there.

Q. You continued in this oyster business from 1867 how long?

A. I stopped ten years ago.

Q. Ten years ago?

A. Yes sir, but if you please my children went on the vessel. I was an old fellow to go on the water then.

Q. How far south did you fish on these trips. Did you fish as far south as California bay?

A. No sir I did not.

Q. American bay?

A. No sir.

Q. Quarantine bay?

A. No sir.

Q. You did fish as far south as Martins island?

A. Yes sir.

Q. And you say that you considered that in together with the adjacent territory to be in Mississippi?

A. Yes sir.

Q. And that you simply derived that impression from what you heard certain old people say?

A. Yes sir.

Q. That Mississippi extended 18 miles south from the mouth of Pearl river?

A. Yes sir.

Q. When you first went there to this disputed territory in 1867 is it not a fact that there was a large abundance of oysters in the neighborhood of Biloxi and around this coast here?

A. Yes sir, there were oysters all over this coast not only in Back bay, but Pascagoula and Deer island and Pass Christian.

Q. Well what was the habit of the oyster fishermen at that time and for several years afterwards. Did they fish these oysters during the spawning season. In the summer time?

1497 A. Well very few.

Q. Is not it a fact that all of these boarding houses and hotels, and oyster stands etc., were abundantly supplied with fresh oysters all through the summer?

A. Yes sir.

Q. Then there was no difficulty in getting plenty of oysters here during the summer as well as during the winter?

A. Well what they did get through the summer here it was j to furnish the families, and it did not amount to any thing: had to bring good oysters and culled oysters. If you were bring oysters here that were not culled they would not rece them, and they were culled out on the reefs and the shells w thrown back.

Q. Is not it a fact that it is only recently that the State of Mis sippi has adopted any oyster legislation to protect her oysters?

A. I don't believe they did then, because it was not necess then.

Q. Is it not a fact that when these oyster smacks got a load oysters and had a fair wind to get to their destination that th would hoist sail and would not stop to cull, but would cull on way, and even wait until they got to land before they commen culling. Was not that the case in many instances?

A. That was the case sir with the New Orleans luggers. I ha seen a New Orleans boat fish on Isle à Pitre reefs and north p of Cat island and over to Pass Marianne and started to New leans with a heavy load of oysters on board and cull as th went.

Q. Was not this common among the Mississippi fishermen well as the Louisiana fishermen in order to take advantage of wind home?

A. Yes sir, some times, yes sir.

Q. Now this fishing out of season, and this not culling, did that have a very bad effect in the way of destroying your Mis sippi fisheries in this neighborhood?

A. Well in the summer time it did not hurt because there w hardly any oysters caught to hurt. Those little reefs out th would furnish this coast.

Q. But would not they go all along this coast at Pass Christi and all along here at all of these places and also to the east of h and do this same thing?

A. I know of nothing to hurt, no sir.

Q. Now is it not a fact that these canneries were established h in the 80 '2?

A. I believe they were some where around there sir.

Q. Now did not this create a much greater and larger demand f oysters than there was before that time?

A. Yes sir, the business was that much larger, and they ha to get more labor and more boats to furnish the factories.

Q. Well now prior to the establishment of these canneries the were very few of the Mississippi fishermen that went over to Gra marsh as you call it to fish oysters?

A. Well there were a good many boats running there.

Q. I mean compared to the number of vessels that go the now?

A. I can not hear you very well. You will have to talk loud to me.

Q. I mean this. Did not this falling off of your home fisheries about here and the great demand created by these canneries lead to a much larger number of the fishermen going to this Grand marsh?

1498 A. Yes sir, of course.

Q. Well now did you ever hear of any discussion or dispute as to where the boundary line was between Louisiana and Mississippi?

A. Yes sir, I have heard that. What Louisiana claimed. That Louisiana claimed this marsh. They said that she claimed it.

Q. Now was not there a great diversity of opinion among these fishermen on this subject where ever you heard it talked about?

A. As far as I could see and hear here they were all surprised that Louisiana was claiming this marsh here, and keeping us from going in there where we had been making our living.

Q. Did you or did you not know that prior to the passage of the Louisiana act of 1886, that the Mississippi fishermen had as much right under the Louisiana law to fish in this disputed territory as the Louisiana fishermen. Do you know that to be a fact?

A. No sir, I do not.

Q. You did not know that the act of 1886 was the first act prohibiting non residents of Louisiana to fish in Louisiana waters. I merely ask for information to see whether you knew that fact?

A. What I know is when Louisiana passed these laws prohibiting Mississippians from going into the Grand marsh.

Q. Before that there was no law that prohibited the Mississippian from going there?

A. No sir, there was no law of that sort.

Q. Therefore your idea that this territory was embraced in the lines of Mississippi was largely based upon the fact that prior to 1886 Louisiana allowed Mississippi fishermen to fish in these waters without molesting or interfering with them?

A. That I don't know. I never followed that. I have very little learning and I have never read much.

Q. Did you ever fish down as far as Drum bay?

A. No sir, I did not.

Q. Did you consider Martin island and those fisheries adjacent to Martins island as a part of Mississippi?

A. Yes sir from the line of Pearl river. The 18 mile line.

Q. Now when you were in the carrying trade and freight trade between this coast and New Orleans carrying lightwood and other things of that sort, what was the draft of the vessel that you were aboard of?

A. Well when I was a boy ten years old I was on board of the schooner Julian. She would draw six feet of water loaded.

Q. Well now what channel did you persue or follow in going to New Orleans?

A. Well we went through Pass Marianne channel.

Q. You went through the Pass Marianne channel?

A. Yes sir.

Q. Do you know Grand island and Grassy island and Round island and St. Joseph and those islands?

A. Yes sir.

Q. Where did you pass. To the northward or the southward of these islands?

A. North of St. Joseph island and north of Grassy island.

Q. How close in following this channel as you approached the east mouth of Pearl river did you go to the Mississippi shore, whether the main land or marshes of Mississippi. How close did you go?

A. We passed about two miles I suppose from the land of Mississippi out, and struck the Rigolets.

Q. Now is that what is known as the deep water channel for vessels of some considerable depth and build?

1499 A. Well there is a channel that we cross from Cat island going to Grand marsh. There is a channel there but I never followed the channel.

Q. I am now speaking of a channel as you approach the mouth of East Pearl river, as you have said within two miles of the Mississippi shore. Was this channel known as the deep water channel?

A. The deep water channel that I know of is Pass Marianne.

Q. The same channel that you have spoken of?

A. Yes sir.

Q. Now going eastward from this channel. When you pass the square handkerchief. Do you know where that is?

A. Yes sir, I know where the square handkerchief is.

Q. That channel forks, one going east and the other going southeast?

A. One goes east and there is another channel that runs north east.

Q. Or southeast?

A. There are three branches or channels. There is north east. This Pass Christian channel passes right in shore there.

Q. Then there is another one going due east towards these places on this coast is not there, running towards Mobile?

A. There is a channel running by Pass Christian, and another channel that I never went through that comes from St. Joseph, and through by Isle à Pitre and Cat island.

Q. The channel that branches comes down between Isle à Pitre and Cat island. That comes down southeast does not it?

A. Yes sir, south east from St. Joseph like that.

Q. Now south of these islands that you have spoken of the water is quite shallow is not it. It is not passable for large vessels is it?

A. In the channel or marsh?

Q. No, I am speaking now of the waters lying south of these islands, Grassy island and Round island and St. Joseph island. The water there is shallow is not it and does not admit of vessels of large draft going in there?

You can draw from six and a half feet of water to seven feet.
is according to how you stand out in Lake Borgne. If you
l further out at Grassy island you find a little more water.
How long since you were there in this territory at these
ds?
1867.
You have not been there since that?
Yes sir, I have been there since.
How long since you were there the last time?
About ten years ago. That is before I quit running on the
r.
Do you know what changes if any have taken place in St.
ph island?
Well St. Joseph is a little round island. It was washed down
he heavy blow and current.
Do you know an island that is called Round island?
Well I don't know. I am not acquainted with that island.
You have not been there in ten years you say?
No sir.
Well then you would not know any thing about the recent
changes?
A. No sir.
Q. If there were plenty of oysters here in this neighbor-
l of Biloxi and to the eastward and to the westward, none of
e Mississippi fishermen would go as far as Grand marsh to get
ers would they. They would go and get oysters near at hand?
I suppose they would if they could get them plentifully. They
et them plentifully, but some times if you please by going to
nd marsh I will tell you the difference there is. When you get
Grand marsh you are in harbor, especially with small boats.
can work all of the time there. There is Pass Christian and
à Pitre and St. Joseph. There are plenty of oysters. By going
these marshes you are in the harbor and can work better.
Is it not true that they can get a load of oysters there more
kly?
Yes sir.
Then they go there because the oysters have gotten scarse about
That is on account of the demand of these canneries?
Well I don't know sir. My boys tell me there are plenty of
ers.
You don't know that of your own knowledge?
No sir, I have not been out there in 16 years.

JOHN GOODIER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. MCCLURG:

Q. How old are you?
A. 45 the 18th of this month.
Q. Where do you reside?
A. In Biloxi.
Q. How long have you resided in Biloxi?
A. About 35 years.
Q. What is your occupation?
A. Oysterman. Boatman.
Q. How long have you been in that business?
A. Well since 1876.
Q. Are you familiar with the water between Biloxi and Pearl river?
A. Yes sir.
Q. And with what we know as the Grand marsh?
A. Yes sir.
Q. Are you familiar with Isle à Pitre and Grand pass?
A. Yes sir.
Q. And Johnsons bay?
A. Yes sir.
Q. And Three Mile bayou?
A. Yes sir.
Q. And Nine Mile bayou?
A. Yes sir.
Q. And Malheureux point?
A. Yes sir.
Q. How long have you known these places?
A. I first started it there in the year 1876.

Q. How far down into Grand marsh have you been?

1501 A. I first started fishing in American bay and California bay in 1876. That is when I first started.

Q. Were you ever in Drum bay?
A. Yes sir.
Q. Like Oak bay?
A. Yes sir.
Q. At Martins island?
A. Yes sir.
Q. Southwest pass?
A. Yes sir.
Q. Indian Mound bay?
A. Yes sir.
Q. Treasure bay and False Mouth bay?
A. Yes sir, you know I am not familiar with all of these names but there is not a place in there that I have not been in. But there are lots of these names that they use now that we did not use them at

l. What you call Southwest pass in my days we called it Crazy
ss. We called it Posa Loca, and that meant Crazy pass in Italian.
Q. How did you go through this Grand marsh in 1876?
A. I was on a sloop.
Q. How much water did she draw?
A. Four and a half and five feet when we were loaded. We used
load to about four and a half feet.
Q. State please sir what part of Grand marsh you could go through
h this boat?
A. Well we fished in California bay and American bay and used
go over on the inside of Mussell bayou, down the Nine Mile bayou.
as running to New Orleans at that time.
Q. You would go from California bay to this Grand marsh at
e Mile bayou?
. Yes sir.
. Drawing four and a half feet?
. We used to load on the voyage about four feet. Sometime a
e more and sometimes a little less.
. How long have you been running through this marsh. Since
?
. I have been running pretty steady. It has been 12 or 13 years
I have not been through that portion of the marsh, but the other
Drum bay and Martin island. I am through there every year.
is my business.
. You have been through Three Mile bayou, and Johnsons
a?
Yes sir.
And Turkey bayou?
Yes sir, I have been to the mouth of Turkey bayou here lately.
me 10 or 12 years that I have not been inside of it.
Did you ever go down through Turkey bayou?
Yes sir.
What sort of a boat did you have?
Well the boat, when I was running through there then, she
draw about two and a half or three feet of water loaded.
You have been through Grand pass I suppose?
es sir, I have been through there, but not lately.
Were you taking oysters in there?
es sir, here of late I have not. I have been running on the
t. Ten or twelve years back I was running oysters.
what State is Grand marsh. What State is that in. Is it
siana or Mississippi?
hat I could not say.
Q. Do you know where the lines of Mississippi are?
A. No sir.
Q. Have you ever been troubled by any body down there
fered with?
sir.

Q. Have you observed any difference in the general conformation of these places of which you have spoken in the Grand marsh?

A. No sir, you find the same depth of water there now. The same trouble to get through there that there was when I first went there.

Q. Are there any material changes in the bayous. Nine Mile and Three Mile and Turkey bayous and Grand pass?

A. I found the mouth of Three Mile bayou washed away a little and also Grand pass.

Q. Can you say as to whether these islands or this marsh is any lower or higher than it was in 1876?

A. No sir, there is no difference. Not on the inside. There is no material difference.

Q. Is there any industrial life in there of any kind such as farming and gardening and stock raising. Any body living in there?

A. There is some way on the inside towards the woods but on the outside where we fish oysters there is nobody living there to amount to any thing. Down on California bay there are some camps down there, put there by these people in the oyster business.

Q. What kind of camps do they live in?

A. Some thing on the order of these bath houses. They are built up on high posts.

Q. Occupied by the fishermen?

A. Yes sir, just the oystermen.

Q. How much draft. A boat drawing how much water can go through Nine Mile bayou down as far as Treasure bay?

A. Well I can go down there drawing four and a half feet of water.

Q. Has that been its condition ever since you have known it?

A. Yes sir, it is about the same thing.

Q. Can you say the same thing as to Three Mile bayou?

A. Yes sir, the trouble in going there in low tide — that you can not get the water, but on an average tide it is about what you want to go through there with.

Q. And the same is true of Turkey bayou and Grand pass?

A. Yes sir.

Q. Grand pass is larger?

A. Yes sir, there is more water in Grand pass.

Q. How wide is Grand pass?

A. Well the deep water is about 100 yards wide on an average.

Q. How wide is it from bank to bank?

A. Well I suppose a half a mile in some places.

Q. How far is it if you know from the south west side of Cat island to the north east point of Isle à Pitre?

A. I would judge about four miles across. Between three and four miles as near as I can state.

Q. How far is it do you think from the northern shore of Cat island to Pass Christian?

A. I don't know. About nine miles.

Q. What is your idea about the distance Captain from Gulfview
e Waveland and along there to Grand marsh?
A. I would think about 12 miles.
Q. How far is it do you think from St. Joseph to Three Mile
ayou?
A. Between 12 and 15 miles I would say.
563 Q. How far is it from Three Mile bayou down to South-
west pass?
A. It is about eight or ten miles.
Q. What do you think that the distance is from the northern
outh of Nine Mile bayou to the southern part of Treasure bay?
A. It is about six or seven miles.
Q. Now in travelling from Pearl river to Cat island. Do you
ow what channel in there is deeper than the other part of the
und?
A. No sir.
Q. You say that you don't know where the boundary line is be-
en these two States?
A. No sir.
Q. Have you ever heard it discussed. Mentioned?
A. No sir, only about five years ago here they had the oyster com-
sioners here. They came out there one time and I was fishing on
chooner at Sun Down island, and they said that we would have
ssissippi, and I did pay the license and was fishing at Brush
nd at the southward of Door point.
. You paid the license to what State?
. To the State of Mississippi.
. To whom did you pay it?
. I paid the license to Mr. Howes at Mississippi City. I went
e and got a license.
. That is for the right to fish about British island and Door
t?
Yes sir.
And at what other points did you fish under this license?
I was fishing in Drum bay, and what they call Cranetown
Under this license that you got for these bayous and passes?
Yes sir, we have made use of these passes. It would depend
how the year was. We would go through these passes down
Where would be your objective point down there?
Drum bay.
And when you left there where would you be going?
To Biloxi.
Could you say whether other fishermen had licenses from Mis-
pi as well as yourself?
Yes sir.
To fish in there?

A. Yes sir, a good many of them.

Q. About how many of them. Do you recall?

A. I could not tell you. Some dozen or more I suppose. I never paid any attention. I know that I was delivering the oysters to Back Bay factory to Mr. Young at that time. He was the man that saw the commission and saw about these things. He came out there and said "You will have to get a license." I says "Can you say whether I am fishing in Louisiana or Mississippi and he said Yes, you are fishing in Mississippi, and he showed me the charts and I went and got the license.

Q. Did he tell you how far out the lines of Mississippi extended?

A. No sir, he told me that I was fishing in Mississippi.

Q. Do you think you were within 18 miles of the Mississippi shore?

A. Yes sir, I could not tell you how far it was exactly. The same day that he served notice on me he served notice on two schooners running to New Orleans. One was the Mary, and I don't know the name of the other one, and they told them that they would have to leave those waters.

Q. That was about five years ago?

1504 A. No sir, it is longer than five years ago. That was in 1893. When he first boarded me it was in the winter of 1892 and in 1893 he came to me again out at Brush island and I was on a different schooner then. I was on the Queen of the Fleet.

Q. Who was this?

A. Placeda Lozana I think is his name.

Q. Have you any of these licenses that you got then?

A. No sir, the license I got at that time was lost on the schooner in the 1893 storm.

Q. Your schooner was lost in the 1893 storm?

A. Yes sir.

Q. And the license went down with her?

A. Yes sir. The ones that we had on the other boat I don't know what went with it. We generally burn those things up.

Q. How much water did this other boat draw?

A. Four and a half feet and this other schooner drew five feet. Her name was the Santa Marie.

Q. Did you use her in going in these places in the Grand marsh that you have been talking about?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Where do you live?

A. Biloxi.

Q. How long have you lived here?

A. About thirty five years.

Q. You say that you first visited this territory in 1876?

. Yes sir.
. That is the first time that you commenced being engaged in oyster business?
. Yes sir.
. You have stated that you fished as low down as American bay California bay and Crazy pass and Martin island?
. Yes sir.
. Did you fish as low down as Quarantine bay?
. I have been in Quarantine bay but I never fished any oysters re. I have been through the bay.
. What is your business now?
. Oyster fishing, sir. Bedding.
. I understood you to say that you were at present engaged in e thing else?
. In the fall of the year I run the ice boat to go out and buy imp for the factories, and then in the winter time I am in the ter business.
. Then you are regularly employed off and on by these canies here?
. Yes sir.
. When was the last time you visited this disputed territory?
. I was out there last November. Up until the first of Decem-
. You have stated certain distances in your testimony in chief he counsel for Mississippi. Do you pretend to any accuracy in se distances or is it simply an off hand estimate?
. Just an off hand estimate yes sir.
. You have never measured these distances either on the map or on the water?
5 A. No sir, I never did.
Q. What are these marshes about which you have been ifying generally called by the fishermen. What name do they r?
. Grand marsh is the principal name used.
. Do not a great many and perhaps a majority of the fisherm call it the Louisiana marsh?
. Some of them call it Louisiana marsh, but Grand marsh is t is generally used.
. Now you have spoken about the depth of the water in Three e bayou and Nine Mile bayou and others. Have you ever passed ough these bayous from the north to the south all of the way ough?
. Yes sir.
. You say that the depth of the water is about the same in se bayous. About four or four and a half feet?
. We were speaking about going through these places. We not figure on the bayou. We figured on the mud flats on the side. The bayou is deep enough but the trouble was in keeping of the mud flats.

Q. Then you met occasionally mud flats?
A. Yes sir.
Q. In low water what is the general depth of these mud flats?
A. We would just heave these vessels with a foot and a half or two feet of water.
Q. Under those circumstances it would not be possible for a vessel drawing more than a foot or a foot and a half to pass through there?
A. To make a regular thing of it. Whenever we were loaded down we would have to wait for the tides to get through.
Q. You say that the Grand pass now is about a half a mile wide?
A. Yes sir.
Q. How wide was it when you first entered it?
A. It was about the same thing. I don't see any difference that I can notice.
Q. And you say that now it is about four miles down here?
A. Yes sir, from Cat island to Isle à Pitre.
Q. And you say that this pass has not grown any wider since you have known it?
A. No sir, not that I can see.
Q. How is it in regard to the mouths of these three bayous. Have they enlarged?
A. On the outer surface some of them have, maybe a few feet, but on the interior I don't see any difference in them on the inside.
Q. Is it not a matter of fact that a great many changes have taken place on the interior owing to the storms and so on during your knowledge, or are you really acquainted with the interior on this point?
A. Yes sir, I have been there as I told you since 1876. I have been running through there steady until 12 years ago. I don't see any difference in it today and the first day that I went there. That is on the interior.
Q. When was it that these Mississippi authorities first demanded a license from you?
A. That was in 1892 as near as I can recollect. In 1892.
Q. You mentioned about having lost a schooner in the 1893 storm?
A. No sir, the schooner was lost, but I did not have her at the time she was lost.
Q. About where was this schooner lost. Do you remember what point?
A. She was anchored outside of Grand pass.
1506 Q. Do you know the islands. Grassy island and Grand island and St. Joseph and Marianne island, and that group of islands lying between this disputed territory and the shore of Mississippi?
A. Yes sir.

Q. Do you know of any changes and if so what changes have taken place since you have known them?

A. No sir, I have not seen any changes there at all.

Q. Do you know Round island?

A. Yes sir.

Q. Is Round island still in existence there?

A. There used to be some grass on the top of it but the grass is washed away. The island is there yet.

Q. Is it not a fact that in high tide it is entirely covered?

A. It is covered in high tide.

Q. How about St. Joseph island?

A. The old St. Joseph island is washed away.

Q. Are there any other changes in this group of islands?

A. None that I can see. What they called Grand island is what we used to call Half Moon. It is about the same that I have always seen it and Grassy island is also.

Q. Prior to 1876 were there any men or oyster fishermen frequenting this Louisiana or Grand marsh?

A. I could not say because I was too young then to pay any attention to it.

Q. You don't know anything about any claim on one side of the other in regard to this boundary except what Mr. Young told you in taking out the license?

A. Yes sir.

Q. Do you know what is called the deep water channel between these marshes and the main land. The marsh land and the Mississippi north shore?

A. Well we call it Cat Island channel. Some of them call it south channel and some call it the deep water channel, but that is all I know about it.

Q. Starting from the mouth of East Pearl river, where does this deep water channel run?

A. The deep water comes in at Goose point.

Q. Let's take it in the reverse order coming out of the East Pearl river?

A. There is no channel coming out of there. It is about all one depth. The deep water starts in about south of Pass Marianne light.

Q. Is it not a fact that just east of the mouth of East Pearl river there is a deep water channel running close to the shore where large vessels go?

A. There is about an average of nine feet of water.

Q. Is that north of Half Moon island and these other islands?

A. Yes, sir, it is north of Half Moon island.

Q. Do you mean to say that south of these islands there is as much deep water as there is north of it?

A. No sir.

Q. Is it not a fact that the channel that runs close to the Missis-

sippi shore is known as the deep water channel through which vessels of large draft pass?

A. No sir, I have never heard it called that.

Q. How deep is the deepest draft vessel that you have ever been on board of in passing through these waters?

A. Well six feet is about our average depth.

Q. Then you have never concerned yourself out there about this deep water channel?

1507 A. No sir.

Q. That channel which passes from the mouth of East Pearl river down to the eastward, it forks when you get nearly opposite to Cat island does not it?

A. Yes sir.

Q. And then it turns to the south east?

A. Yes sir.

Q. And it passes in between Isle à Pitre and Cat island?

A. Yes sir.

Q. And there is another fork of that channel that continues eastward down this coast?

A. Yes sir.

Q. After you got your license from Mr. Young did you fish as low down as Martins island?

A. Yes sir I went to Martin island one trip.

Q. Did you fish as low down as American bay?

A. No sir, as far as I went under this license was what they call Martin island that is to the southward of Crane Town pass.

Q. You considered that you had the right to fish there because Mr. Young had told you that the Mississippi boundary extended 18 miles from the Mississippi river?

A. Yes sir, he told us that it extended three leagues. Now I did not ask him how many miles that way but he pulled out the chart and showed us. I told him where I was fishing and he pulled out the chart and said you are in Mississippi waters.

Q. Did he measure this six leagues upon the chart?

A. No sir, he did not measure it. He just showed me.

Q. Did he tell you that you could fish as far south as Martin island?

A. No sir, but he told me that I was in Mississippi waters down there.

Q. You were at Martin island?

A. Yes sir, just to the north of Martin Island point.

Q. Now you have mentioned Brush island. Where is Brush island?

A. It is just to the south of Door point.

Q. What relative position has Door point and Martins island and Drum bay?

A. Well there is some distance between the points.

Q. I understand, but I mean by the points of the compass. What

relative position by the compass does Brush island occupy to Drum bay?

A. Well Drum bay is on the inside of the marsh and Brush island is on the outside. Brush island is about seven or eight miles north of Drum bay.

Q. You mentioned Sun Down island?

A. That is down here.

Q. Tell me if you can. Cat Island channel. That you have just spoken of. How does it bear according to the point of the compass to the Mississippi main land?

A. That channel does not run straight. It makes a turn at Cat island.

Q. I know that it does. But how does it bear relatively to the main land of Mississippi?

A. It bears south from it.

Q. Due south.

A. Yes sir.

Q. About what point on the Mississippi shore would it strike?

1508 A. It would not strike the Mississippi shore. That is it would not strike the main land at all. When it comes to Cat island it takes a south west direction.

Q. I understand it takes to the south west, but running north through to the Mississippi main land, where would it strike?

A. It strikes in the mouth of Pearl river.

Q. I am speaking of the Cat Island channel. The channel where it passes between Isle à Pitre and Cat island. Now that particular part of the channel. Where would it strike the Mississippi main land. That is the northern shore?

A. It would not strike any where. It runs to the west-ward after you get to Cat island.

Q. Suppose that you run northward?

A. You can not take the channel and go northward.

Q. I am not speaking of following the channel, but I am speaking of following the points of the compass. Now please follow me on this map. You are being shown map Exhibit "A" of Mississippi, now you see this line outlined on this map running between Cat island and this point here which is supposed to be Isle à Pitre?

A. Yes sir.

Q. Now running due north from there. Where would it strike?

A. It would strike to the east of Pass Christian.

Q. Do you know what county Pass Christian is in?

A. Harrison county.

Q. What is the dividing line between Harrison and Hancock counties. Do you know.

A. Some where down about the Bay St. Louis bridge. I don't know exactly where. I could not say.

Q. I believe that you stated you have no knowledge of the boundaries between Louisiana and Mississippi except what you derived from Mr. Young?

A. That is all yes sir.

Q. You have never at any time heard the matter discussed except since this suit was instituted?

A. That is all.

Q. You have stated that in navigating these passes and bayous in the interior of this disputed territory that you had about the same trouble in passing through all of them. What is the trouble that you allude to. Running up against these mud flats in low water?

A. Yes sir, it is about the same now that it was when I first went in there. I don't see any difference at all.

Redirect examination.

By Mr. McCLURG:

Q. You mentioned awhile ago that the oyster commissioner pointed out to you that you were in Mississippi waters and that he said that the line was three leagues south of the Mississippi shore. Did you mean to say three or six?

A. At the time I said three. I don't remember. I paid no attention to it at all. He pulled out the chart and showed me where the line was but I did not pay any attention to it. I says If that is the case I will go and get my license. I was kind of angry at that time. I says "Never mind showing me any charts or any thing like that, and I went to Mississippi city the next day and got the license from Mr. Hewes.

1509 Q. How much did the license cost you?

A. I don't remember that either.

Q. You paid whatever was demanded?

A. Yes sir, I paid whatever was demanded but I don't remember what that was.

Q. When was this?

A. It was in 1892. The following year I had the Queen of the Fleet, and Mr. Lazenda boarded me outside at the Sundown island.

RICHARD LANUS, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. McCLURG:

Q. Where do you live?

A. In Biloxi.

Q. How old are you?

A. Sixty.

Q. How long have you lived in Biloxi?

A. About 57 years.

Q. What are you doing for a living now?

A. Right now I have a fishing craft.

Q. What has been your occupation during your live?

A. Boating.

Q. For how long?
A. Since about 1866.
Q. Right after the civil war?
A. Yes sir.
Q. Where have you been boating?
A. From here to New Orleans and out in the marsh.
Q. What sort of boating did you do?
A. Carrying lumber and charcoal and wood to New Orleans.
Q. Did you ever fish oysters?
A. Yes sir.
Q. Where?
A. At Grand marsh.
Q. When did you first fish oysters in the Grand marsh?
A. About 1879 or 1880.
Q. What places did you fish oysters in Grand marsh?
A. Now the names we had for it were Drum bay and Karako bay
d Bayou Greecue and Creole gap, and all around there. We never
go much further than Martin island.
Q. Did I understand you to say that you have fished in there since
first started?
A. Until about four years ago. I have not been in the marsh in
ut four years.
Q. When you were fishing in Grand marsh what State were you
. I always heard that it was the State of Mississippi as far down
went.
. Down as far as what they call Southwest pass?
. Yes sir.
Was there any license ever required of you for fishing in there?
One time there was, but I don't recollect. It is the latter part
I got a license one time. That is to fish in Mississippi.
Where did you get the license?
A. I got them from Mr. Hewes.
Q. At what place?
A. Mississippi City.
Where did you fish under this license?
I was fishing at Pass Christian.
Did you fish in Grand marsh while you had this license?
I fished one or two trips I guess. I don't remember now. It
he latter part of the season and I never went out more than one
after I got the license. Just about one trip after I got the
e.
What was the draft of your boat?
oaded she drew four feet and four inches of water.
In what part of the Grand marsh did you travel with this boat
?
came through Drum bay and through South pass, and
h Catfish pass and out through Three Mile bayou, four feet
ur inches of water.

Q. When did you first make this trip. About when?
A. Between 1893 and 1894. I bought a boat in 1893 and this was about the second year after I bought her.
Q. I forget when you stated that you first went in there?
A. 1879 or 1880.
Q. And the last time that you went in there was when?
A. It is about four years. I cannot recollect exactly.
Q. About four years ago?
A. Yes sir, I know that I lost my wife and I have not been out there since. It was about four years ago. I have got it at home, but it is about four years this coming August that I lost my wife.
Q. Now you say that you considered that part of the Grand marsh that you fished in Mississippi?
A. Yes sir, I always did.
Q. Why did you think yourself in Mississippi?
A. Well I was always told it. I heard it from other people. That is how I knew it. I did not know it only by hearsay.
Q. You never read any laws on it?
A. No sir.
Q. Were you ever as far west as Nine Mile bayou?
A. Yes sir, but I never did go through Nine Mile bayou. I have been as far west but I never went in it. I have passed both mouths of it.
Q. You have been out through Three Mile bayou?
A. Yes sir.
Q. When you made this trip how much water was your boat drawing?
A. She was drawing just about four feet of water.
Q. Do you know where Johnson bayou is?
A. Yes sir.
Q. Did you ever go there?
A. Yes sir, I went there with about three and a half feet.
Q. How about Turkey bayou?
A. I never went through it. I have been in it but I never went through it.
Q. Grand pass. Have you ever been through it?
A. Yes sir.
Q. How much water will Grand pass let a boat draw?
A. Five and a half feet of water at a pretty low tide. After I got into Grand pass I did not know what water they had in there 10 or 12 feet I guess. Outside you get five and a half or six feet of water at a pretty low tide.
Q. Did you ever fish around Sun Down island?
A. Yes sir.
1511 Q. Door point?
A. Yes sir.
Q. Brush island?
A. Yes sir.
Q. When you were fishing in this section what State were you in?

A. From what I always heard I was in the State of Mississippi.

Q. State whether or not you have noticed any material changes in these waters and islands in the Grand marsh since you first went there?

A. Very little if any at all.

Q. Very little?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. I understand you to say that you only visited this disputed territory in 1879 and 1880?

A. Yes sir.

Q. That is the first time that you ever visited that territory?

A. Yes sir.

Q. And you have fished as low down as Drum bay and Martins sland?

A. Yes sir.

Q. Have you ever fished below there as far as California bay?

A. No sir, I have freighted oysters from there but I never fished ny.

Q. Have you ever fished or freighted oysters from Quarantine ay?

A. No sir, I don't think so. I have been down in American bay ere I think, but these bays and passes are connected together so at I *know* know which is which?

Q. You quit about four years after the death of your wife?

A. Yes sir.

Q. You have called this marsh Grand marsh. Is it not a fact at generally amongst the boatmen it has been known as the Lou- ana marshes?

A. No sir, not until here of late, and now some of them call it e Louisiana marshes. I have always in my young days heard it led the Grand marsh.

Q. Well now as a matter of fact I have been told that 15 years in visiting this coast and asking where they got their oysters n they would state the Louisiana marshes. Do you swear posi- ely that you never heard these marshes spoken of as the Louisi- marshes until very recently?

. Well four or five years ago.

. Not longer than that?

. Not longer than that no sir. It was always known as the nd marsh.

. When did you first take out this license of which you spoke?

. I could not tell you now what year it was in.

How long was it before you quit. I understood you to say you only visited this marsh once or perhaps twice after taking your license. Am I correct in that?

A. I went there yes sir, a good many times.
1512 Q. I did not so understand you. Could not you g
about the time. We are not asking the time exactly?
A. The time that I got the license I think was either 1894 o
that I got the license.
Q. Now what you have stated about this boundary. You
nothing about it except the vague rumors and talk that you
heard from time to time?
A. That is all.
Q. You never have taken the trouble to look into the mat
all?
A. No sir.
Q. But from what you had heard you thought when you
fishing as low down as Martins island and American bay that
were still in Mississippi territory?
A. I never fished in American bay.
Q. Well you freighted oysters from there?
A. I was on a schooner that freighted oysters. I was not run
the oysters. I was one of the hands.
Q. You still thought that you were in Mississippi territory
you?
A. No sir, not when I was in American bay because I alw
heard that it was as far down as 18 miles, but when I fished oys
down as far as Martin island I thought that I was in Mississ
territory.
Q. Well now in regard to this boundary. You have heard v
ous expressions have not you from time to time amongst the l
men in regard to what was the proper boundary between Mississi
and Louisiana. You have heard a good deal of discussion fr
time to time about that have you not?
A. Not until the year before I quit running.
Q. That is within the last four years?
A. Yes sir.
Q. Now you have spoken about going there through these marsh
and bayous and so on, and you have given the depths which the
vessels drew. Have you ever passed from the north shore of t
marsh clear through to the south?
A. I have passed through Drum bay and Three Mile bayou is t
farthest that I have passed.
Q. Have you passed through any of the other bayous?
A. Grand pass and Three Mile bayou.
Q. Now can you give us an idea of what the average of thes
vessels in which you passed through. What was the greates
depth?
A. Four and a half feet. Four feet and four inches I mean.
Q. What has been the stage of the tide when you would pas
through. Would not it take a high tide to go through?
A. Yes sir, pretty much all of the time. Ordinary tide any way.
Q. Well at an extreme low tide what would be the average depth?

A. About two or two and a half feet. That is on these mud flats.

Q. In passing through with a vessel drawing four feet and four inches you would have to take your time and the stage of the tide to get through there would not you. Otherwise you would be stuck on the mud flats would not you?

A. Yes sir, if it was loaded.

Q. Did I understand you to say that she drew four feet and four inches when she was loaded?

A. Yes sir.

Q. Then if there was on these mud flats only about two feet you would have to take your stage of the tide to get there. Otherwise you would get stuck on the mud flats would not you?

1513 A. Yes sir, if you were to get on the mud flats yes sir, but I was not so awfully well acquainted with the marsh. I did not know the marsh like some of the boys. I never went through the marsh except through Drum bay and Three Mile bayou.

Q. Now you have stated that you have been engaged in the freight business between this coast and New Orleans?

A. Yes sir.

Q. Do you know what is called the deep water channel between the northern coast of this marsh and the main land of Mississippi. Do you know such a channel as the deep water channel?

A. That is what I have always heard the Cat Island channel. The one to the southward.

Q. How close to the Mississippi shore does that channel run when it approaches East Pearl river?

A. About a half a mile. It comes out by Grassy island. About a half a mile to the main land.

Q. It runs north of Grassy island and Half Moon and Round island and the other little islands there. St. Josephs. It runs north of that does not it?

A. Yes sir.

Q. Is that channel traversed by vessels drawing considerable depth?

A. Of course. They have to go the same way to get outside too.

Q. It would not be possible would it for vessels drawing six or seven or more feet to pass through these waters by any other channel?

A. No sir, I don't think it would.

Q. Do you know how far back the Mississippi fishermen commenced going to this Grand marsh or Louisiana marsh for oysters. When did they commence going there?

A. I could not tell you. I went in there about 1879 or 1880.

Q. Is it not a fact before the Civil war between the States and after the termination of the war there was a large quantity and abundance of oysters in the neighborhood of Biloxi and along this coast?

A. No sir, I don't think there were very many oysters around here.

Q. Were not there plenty of oysters in Back bay?

A. Yes sir, there were a few. Very few.

Q. Were there not oysters along Deer island. Were there not oysters running out to the channel coming into Biloxi?

A. No sir, I never heard tell of any.

Q. Were not there oyster reefs, natural reefs existing to the east and west of Biloxi and running to Pascagoula and beyond there?

A. Right at Pascagoula there were some.

Q. Well was not the home supply for this coast supplied from these reefs?

A. Well there was only a local business then.

Q. Well was not it the habit of the fishermen fishing these reefs, that they fished all during the summer for the local supply during the spawning season?

A. Well I don't recollect that part before the war.

Q. After the war I am speaking of. Were not all of the hotels and the families and the oyster saloons supplied with a daily supply of oysters during the summer and during the spawning season. The hotels and the families and the boarding houses and the oyster saloons all along this coast. Were not they supplied from these reefs?

A. Around Pass Christian and Pass Marianne?

Q. Yes sir, I am speaking of in this vicinity. Back bay and Deer island, and all along this coast from east to west?

1514 A. They got oysters on the outside there, on Pass Marianne in the summer time. What they supplied the hotels with.

Q. Don't you know as a matter of fact in the past when oysters were needed here for consumption in Biloxi that they just went out here in this bay fishing them up with the tongs?

A. There never were any oysters here. Between here and Pas Christian.

Q. Are there not oysters out here in front of the yacht house here and all along there?

A. There may have been but I don't recollect it. I never saw any body that did know that there were any there.

Q. Now is it not a matter of fact that during the time I have just mentioned that the fishermen were not particular where they culled the oysters, if they happened to be out in boats and the wind was fair to go to their homes that they would not stop and cull upon the reefs, but they would cull as they sailed along homeward, and in some instances culled them after they got on the land?

A. They culled them then better than they do now I think.

Q. Don't you know of instances in which they culled while they were sailing home?

A. No sir.

Q. The demand for oysters increased very much after the establishment of the canneries here along this coast did not it?

A. Yes sir.
Q. Now is it not a fact that it was only with the establishment of ese canneries that this large number of Mississippi oyster men sorted to these Louisiana marshes for oysters?
A. No sir.
Q. It is not so?
A. No sir.
Q. Do you suppose that at any time prior to the establishment of ese factories and canneries that you could see at one time 150 hing smacks in the neighborhood of Isle à Pitre, on that coast olging for oysters, or has not that been since the canneries were ened?
A. I have seen a great many yes sir, fishing in these reefs there.
Q. Before the establishment of the canneries?
A. Oh no sir.
Q. Then it is only since the canneries have been established that larger portion of these Mississippi oyster men have resorted to se marshes to get this great quantity of oysters to supply these neries. Is not that a fact.
A. I don't know whether they caught them all in the marsh. st of them caught them outside on Pass Christian and Pass Mari- e and around there.
Q. Did most of the oysters that they caught for the canneries e from off the coast of this very disputed territory. Lately s Christian reefs have not a large quantity of oysters?
A. Yes sir.
Q. Well why did all of these fishermen or nearly all of them go in these oyster reefs in the neighborhood of this disputed terri- Why is it if they can get them from Pass Christian and from reefs there, why should they go on a further distance over to coast of these marshes to get these oysters?
A. It must be better I guess. I never did go there to fish them.
Q. You never did go where?
A. I never run steam oysters.
Q. What do you mean by steam oysters?
A. Canning oysters.
Q. You never did go where?
A. To the disputed territory that you are talking about.
Q. Have not you just testified to it?
A. In the marshes. I thought that the disputed territory was out- f the marshes.
Q. No, I am speaking of these marshes. Grand marsh as you call l called by others Louisiana marsh. If they got a supply and icient amount of oysters from Pass Christian fisheries here why l these oystermen go over there to these marshes to get oysters?
A. I don't know sir.
Q. You could not say?
A. No sir.
Q. Is it not very natural and probable that if they could supply

themselves from the Pas. Christian reefs that they would not go over there to get oysters. What have you to say about that?

A. What is the question again.

Q. I say why would they go over there to get oysters if they could get them closer here?

A. I guess that they would not if they could get them here.

Q. Then does not that show that the supply of oysters from the Pass Christian reefs is entirely insufficient to supply the demand from the canneries?

A. I guess so.

Q. You have no knowledge as to where the boundary line is between Mississippi and Louisiana except what you have heard from time to time?

A. No sir, no more than I have heard the people say. That it was from the mouth of Pearl river running six leagues to the south from the main land. That is what I have heard the people say.

Q. Did you ever hear people say that under the act admitting Louisiana into the Union in 1812, five years prior to the admission of Mississippi that the State of Louisiana was granted all islands within three leagues or nine miles of her coast?

A. No sir, I never heard of that.

Q. You never heard of that?

A. No sir.

The commission here took a recess for the noon hour and reassembled with the same attorneys, and the commissioner present as this morning.

GEORGE BILLS, being duly sworn on behalf of Mississippi, as a witness, testified as follows:—

By Mr. McCLURG:

Q. How old are you?

A. 39.

Q. Where do you live?

A. In Biloxi.

Q. How long have you lived in Biloxi?

A. For thirty nine years.

Q. What is your present occupation?

A. Oysterman.

Q. How long have you been in the oyster business?

A. I suppose some where around 26 years.

1516 Q. Are you familiar with the waters between Biloxi and the mouth of Pearl river?

A. Yes sir.

Q. How long have you been familiar with those waters?

A. Well sir, about as near as I can tell you, between here and Pearl river for about 14 years.

Q. Are you familiar with what is called Grand marsh?
A. I am sir.
Q. How long have you known Grand marsh?
A. Well I suppose somewhere around 19 or 20 years.
Q. Do you know Cat Island?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Turkey bayou?
A. Yes sir.
Q. Johnson bayou?
A. Yes sir.
Q. Three Mile bayou?
A. Yes sir.
Q. Nine Mile bayou?
A. Yes sir.
Q. Malheureux point?
A. I don't know anything about that place unless it has a different name.
Q. Petit pass. Do you know that?
A. Yes sir.
Q. As I understand it Malheureux point is south of Petit Pass island and Petit pass is between Petit Pass island and what is called by the Louisiana people Malheureux point?
A. Yes sir, I am familiar with that.
Q. And Malheureux point is nearly south of Pearl river?
A. Yes sir.
Q. So you know that country?
A. I know that coast yes sir.
Q. Well to the south of these places that I have just asked you about is what I understand the Mississippians call Grand marsh?
A. Yes sir, some claims Grand marsh and some Louisiana marsh and some the marshes. I don't know what they call it.
Q. It has been called by different names?
A. Yes sir.
Q. I wish you would tell me if you have ever fished oysters south of a point extending from the north east point of Isle à Pitre around to Nine Mile bayou. If you fished south of that line. South of that line is what we understand to be the Grand marsh or Louisiana marsh or the marshes. Have you been in there?
A. Yes sir, I have been all through there. Bayou Greecue and Jack Williams and Karako bay, and Bayou Boudreaux and Johnson bay. I have been all through there.
Q. For how long?
A. I have been going there off and on for 19 years I guess.
Q. Have you ever been down as far as Drum bay?
A. Yes sir, I have fished oysters in Drum bay.
Q. Have you ever been in the Lake of the Mound?
A. Yes sir, we call that Indian mound.

Q. Have you ever been in False Mouth bay. Sometimes called by some other name?

1517 A. If you will mention some other name I might know it.

Q. It is right to the south of Nine Mile bayou?

A. No sir, I have not been south of Nine Mile bayou. I have been east of south from Nine Mile bayou.

Q. Were you ever in Treasure bay?

A. Yes sir.

Q. Well you know where Pirate point is?

A. Yes sir.

Q. You know where Raccoon island is?

A. Yes sir.

Q. And Little Raccoon island?

A. Yes sir.

Q. And Crooked island?

A. Yes sir.

Q. Mud island?

A. Yes sir.

Q. Brush island?

A. Yes sir.

Q. Door point?

A. Yes sir.

Q. Bayou Greecue?

A. Yes sir.

Q. In what State are those places?

A. In Bayou Greecue I fished there last November or December 1903 I fished there some eight years ago and it seems to me that there is less water coming through the mouth of Bayou Greecue towards Grand pass than there was eight years ago.

Q. Well tell me in what State all of these places are. Whether they are in Mississippi or Louisiana?

A. I could not say sir I don't know whether they are in Louisiana or Mississippi.

Q. Were you ever disturbed by any body in either State in your fishing there in the last twenty years?

A. No sir, I never have been.

Q. You seem to have misunderstood my question by asking you the State. You started to tell me the state of the land between Bayou Greecue and Grand pass?

A. Yes sir.

Q. Tell me about that please sir?

A. Well sir about eight or nine years ago I used to fish on an oyster boat drawing three feet four inches with about 80 barrels.

Q. Where?

A. In Bayou Greecue.

Q. How did you get into Bayou Greecue?

A. From Grand pass. You have to go in that way and then into Bayou Greecue.

Q. That is about eight or nine years ago?

sir.
ur boat drew how much water?
out twenty inches I told you.
w much did she draw loaded?
out three feet eight inches loaded, but I could only put
nty barrels on her. That made her draw about 3 feet and
es.
ld you get from Bayou Greecue into Grand pass with
rrels of oysters and your boat drawing three feet and four

very well unless I waited for a full tide.
could go out in a full tide?
A. Yes sir.
Q. When did you see this bayou last?
A. Last December.
was it then?
l with my boat then she was drawing about two feet and
hes. We had to heave her out in the night time.
derstand you to mean by that that the passage between
ecue into Grand pass had been filling up?
ems that way to me sir.
at your best judgment about it?
sir.

Col. ZACHARIE:

t did you say you had to do with her?
re her out with a windlass.
t do you mean by heaving her out?
t we mean by heaving her out is that we run a pole out
le and heave her out with our windlass.

Mr. MCCLURG:

draw her out?
ir, drag her through the mud.
it as deep last November and December as it was eight
ars ago?
uld not seem that way to me no sir.
about the general contour of the balance of the marshes?
all seem alike to me.
have not seen any material change in any of them?
r, there is not but one place that I could see any change.
he mouth of Three Mile bayou. There used to be a kind
there at the mouth of Three Mile bayou and now it is

you ever paid any license for fishing in there?
ir.
Mr. Bills?
ast two winters.
hom did you pay the license?

A. To the Louisiana commission.
Q. How much did you pay them?
A. I paid them $7.50.
Q. For fishing where?
A. They claimed in the Louisiana marsh.
Q. Any where in Louisiana?
A. Yes sir.
Q. That is since this controversy arose that you paid the license?
A. Yes sir.
Q. Did you ever pay a license or licenses before that time?
A. No sir.
Q. I understand you to say that you have been fishing in this marsh for the last 19 or 20 years?
A. Yes sir, for the last 19 or 20 years off and on.
Q. You fished from Biloxi?
A. Yes sir.
Q. And the oysters that you took were brought to Biloxi?
A. Yes sir. Except the last two seasons.
Q. Have you ever paid to the State of Mississippi any license to fish?
A. No sir, I have never fished in Mississippi since this dispute has been going on.
1519 Q. You respected the agreement made between the two commissions did you not to fish west of Grand pass?
A. Well you see my oystering is supposed to be in the marshes altogether. I never fished in this sound at all. This is disputed ground.
Q. You never fished up in the sound?
A. No sir. I have been fishing in the marshes since this dispute has been going on.
Q. Do you know where the line is dividing Louisiana and Mississippi?
A. No sir, I do not.
Q. When you were fishing at Brush island and Door point. Did you ever fish down there?
A. Yes sir, right there at Brush island.
Q. Sundown bayou?
A. Yes sir. I don't know where that is.
Q. Right south of Grand pass?
A. I know where Sun Down island is.
Q. That is right southeast of Grand pass is it not?
A. It is about east southeast or something like that.
Q. What State were you fishing in when you were in there?
A. Well I was fishing there. I don't know whether it was Mississippi or not, but I was fishing there.
Q. Well tell me about any material change that you have noticed in there at any point except the mouth of Three Mile bayou?
A. That is all I know of sir.

Q. Have you noticed any subsidence or sinking in any of these slands out there in the last 18 or 20 years?

A. No sir, if there was I never noticed it. If there was any hange at all I could not see it.

Q. Are you acquainted with St. Joseph or Grassy island?

A. Yes sir.

Q. Has there been any change up there?

A. No sir, none that I could see. With the exception of the old t. Joseph light. There used to be a kind of a little spot there and has washed away.

Q. What was the character of the land that formed that island?

A. No more than marsh. That is all that I saw there.

Q. The same kind of soil that forms Isle à Pitre and the other lands down there in the swamp? In the marsh?

A. I could not say anything about that.

Q. You never examined that soil?

A. No sir, I never went ashore there.

Q. Now have you ever made any trips there about Drum bay or lifornia bay and through this marsh towards Three Mile bayou?

A. Yes sir, I have made a many a one.

Q. How did you travel?

A. Through Cat Fish pass into Indian Mound bay and Dutch ss and from Dutch pass to Pirate point, and from Pirate point to ccoon island, and from Raccoon island into Three Mile and Nine le. Just anyway we wanted was suitable for me to go through re.

Q. How long have you been making these trips?

A. I have been fishing around Drum bay for the last six or eight rs.

Q. You would come out through Three Mile bayou?

A. I would when I was running to Mississippi. To Biloxi.

Q. Could you go through Drum bay and Indian Mound bay down there through Three Mile bayou drawing three feet and eight inches of water?

A. Yes sir, unless it was a very low tide. A dead low tide.

Q. How much in Drum bay would it be in low tide?

A. You take a low tide there in Drum bay and in some places I 't suppose that it would be over two feet wide.

Q. At mean tide or average tide?

A. About three or three and a half feet or some where along re.

Q. Well now aside from making these trips on this particular that you have mentioned, up through the marsh, and coming of Three Mile bayou could you travel on other places through marsh?

A. Yes sir, I have travelled all through there with the same

Q. Drawing from three feet to three feet and eight inches?

A. Yes sir.

Q. And you had no trouble?
A. No sir.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Bills, could you state at what time you took out this license to fish oysters in Louisiana?
A. Yes sir, my first license was taken out in last October was a year ago.
Q. You say your first license. Have you taken out two licenses?
A. Yes sir, I have taken out two licenses.
Q. Why did you take both of these licenses out from Louisiana?
A. Well sir my last boat that I have been running is small and I did not think that I could make a living by fishing in the reefs oysters and therefore I thought that the marsh was better for me.
Q. Did not you take out a license from Louisiana because you considered that the marsh was Louisiana territory in which you proposed to fish?
A. No sir, not exactly. I took out a license to keep out of trouble. To keep from being arrested.
Q. You never made any application to the Mississippi authorities for a license did you?
A. No sir, I did not.
Q. Now is it not a matter of fact that as far as you can remember back that these marshes have been generally called amongst all of the fishermen Louisiana marshes?
A. Not all sir.
Q. Well I say generally?
A. Some of them call it the Louisiana marshes and some the ma-shes and some the Grand marsh.
Q. What do the majority of them call it?
A. Well the marshes is all that I could state on that.
Q. Suppose you were to go out here and ask these people that bring in oysters for the canneries, where did you get these oysters from, would not all of them answer the *the* Louisiana marshes?
A. He would not answer that way. He would say from the marshes.
Q. I am speaking about the generality of these people. Would they not answer Louisiana marshes?
1521 A. No doubt some of them say it yes sir.
Q. Now you speak about not having perceived any changes in 19 or 20 years that you have been in the oyster trade?
A. I have been in the marshes about 19 or 20 years. I have been in the oyster business. I have made my living with oysters about 26 years.
Q. You have been in the marsh for 19 years?
A. Yes sir, between 19 or 20 years.

Q. Have not you observed that the mouths of these passes have idened very much?
A. In deep water yes sir.
Q. Have they not all widened a great deal in extent?
A. No sir, they have not widened in the last 12 or 15 years. Not at I know of.
Q. Do you know Creole gap?
A. I do very well.
Q. Has that not widened?
A. Yes sir, it has.
Q. Has not Three Mile bayou widened?
A. Not that I know of sir.
Q. Has not Nine Mile bayou widened?
A. No sir, it don't seem so to me. You just asked me about reole gap widening. It is just Creole gap since I have known it.
Q. Has it not widened?
A. No sir, I told you that it did, but I cannot say that it has dened any at all, because it looks the same to me that it did 19 20 years ago.
Q. Do you know an island that formerly existed by the name of ound island, which lay between these coasts and the main land of ississippi?
A. Round island?
Q. It was between the coast line of these marshes and the main nd of Mississippi, Do you remember such an island?
A. I remember a little island between Petit pass and Grassy and. It is there yet.
Q. It is there yet?
A. Yes sir.
Q. Have any of these islands lying between this coast line of the arshes and the main land of Mississippi disappeared in the last y years?
A. Not that I know of sir.
Q. I believe you have stated that St. Joseph island has been shed away?
A. That is near to the main land. The old St. Joseph light at is way inside.
Q. Well that is to the north of the coast line of these marshes?
A. Yes sir.
Q. That is in the group of islands. There are several islands re. Three or four or five?
A. Yes sir.
Q. Have not a portion of Grassy island and Half Moon island n washed away?
A. Not that I have noticed.
Q. Have you noticed it carefully?
A. I never was ashore there. I have fished oysters there and ed all around it.
Q. There was how much water in Bayou Greecue?

A. That is just like I say. Eight or nine years ago I used to run a boat called the Castello, and she drew three feet and four
1522 inches with about 80 barrels of oysters, and I used to go out there with my boat. This boat that I have now only draws two feet and eleven inches. That is about as much as she will draw deep loaded, and often times this winter we had to use the windlass to draw her out.

Q. You had to take a rope and windlass and warp her out?

A. No sir, I rolled her out. Heaved her out.

Q. You were then dragging her through a mud flat were not you?

A. Yes sir.

Q. You never bothered your head about the boundary much did you?

A. No sir.

Q. Did you ever hear this boundary question discussed at all until this boundary suit came up?

A. No sir, I never did.

Q. You never heard any talk about any 18 mile limit?

A. No sir, I fished oysters out there and I did not notice anything like that. I was not notified in any shape or form.

Q. Did you ever go through any portion of this marsh from the north coast of it to the south. To the Gulf?

A. I went through it from the north as far as Kaliko bay.

Q. Where is that?

A. It is just about a half a mile on the inside of the marsh on the west side.

Q. You never went through the marsh to the south?

A. Yes sir, I have been through Nine Mile bayou, down about to the southwest I told you, and Karako bay, and Gardeners point. That extends out into the Gulf.

Q. What is the depth of this water going through there?

A. There are the flats that we call Little Bay flat and another called the Big Bay flat, and at times the water there is very shallow.

Q. What do you call shallow?

A. A foot to two and a half feet. They are never more than that.

Q. Well how much did this vessel draw that you were going through there with?

A. Two feet and ten inches.

Q. Well then how did you manage to go through these mud flats?

A. We heave through there. There is more mud there than there is water.

M. MARTINEZ, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. How old are you?
A. About sixty years old.
Q. Where do you live?
A. I live in Biloxi.
Q. How long have you lived in Biloxi?
A. About eight years.
Q. Where did you live before you came here?
A. In St. Bernard parish.
Q. That is in the State of Louisiana?
A. Yes sir.
Q. How long have you lived there?
A. Since 1867.
Q. Where did you live before you went to St. Bernard parish Louisiana?
A. I come from Mobile. I stayed there about 15 days and went from there to New Orleans.
Q. And then you went over into St. Bernard?
A. Yes sir.
Q. What did you do for a living when you went over there in Bernard?
A. I was in the trapping business and the fishing business.
Q. Do you know where Terre Bœuf is?
A. Yes sir.
Q. I want to ask you Captain something about the country lying th of the east mouth of Bayou Terre Bœuf. Do you know that ntry well?
A. Very well. I stayed there about twenty five years. All the e I was down there.
Q. Out east of Terre Bœuf is California bay?
A. Yes sir, I know California bay.
Q. Now let's look to the north. Out through the marsh and the sissippi sound?
A. It is about 100 miles here and the old quarantine is about 40 es.
Q. Well about 1867 did you ever go in any of the bayous. Up in Nine Mile bayou or Three Mile bayou?
A. Yes sir, I come through there some times to kill alligators and ed both of them. I came in there about Bayou Loutre.
Q. How did you ever travel in that country down there about ou Bœuf in a boat up to Three Mile bayou and Nine Mile bayou? you ever go up there?
A. Yes sir.
Q. How deep did your boat run in the water?
A. Three to three and a half feet.

Q. Did you make it through there often in the boat. A good many times?

A. Yes sir.

Q. You have known that country ever since 1867?

A. Yes sir.

Q. Did you ever notice any changes in it?

A. No sir, there are no changes.

Q. When were you there the last time?

A. It has been about nine years.

Q. Now from 1867 up to nine years ago have you noticed any changes in the rise or fall of any of these islands or lands and if so tell us what it is?

A. I don't know. I have been twenty five years through there, and I saw every thing all the time just the same. Some times the sea washes a little bit by being heavy in eight or ten years.

Q. Washes away an island?

A. No sir, in four or five or ten years it would wash away about ten feet.

Q. Did you notice in this time some places that would grow larger and higher?

A. Yes sir.

Q. It was not sinking down any lower?

A. No sir.

Q. It was just washing a little around the edges?

A. That is all.

Q. No body ever arrested you or disturbed you when you were fishing around in this country?

A. No body did not worry me any.

Q. Do you know where Grand pass is?

1524 A. I have passed two or three times over there.

Q. At the east end of Isle à Pitre?

A. I pass there some times.

Q. When did you first go through Grand pass?

A. About one year ago.

Q. Is that the first time?

A. No sir, the second time. I went through there about two years ago.

Q. You know better down in the other part of the Terre Beuf country. You know that the best?

A. Yes sir, that is my country. Plaquemines parish and St. Bernard. I know that best.

Q. What place did you live in at St. Bernard?

A. On the Island Bayou Terre Beuf.

Q. How far from the shore, from the water?

A. You mean my house.

Q. Yes sir?

A. About ten feet.

Q. Then how far is it from there to the Gulf?

A. About Terre Beuf. They call it Lamouth too. Bayou

Lamouth is about 27 miles long, and it has 15 or 14 f[illegible] of water and in some places 20. In the mouth of a lake that they call Nigger lake there is about six or seven feet of water in high water, and in low water four or five, and the mouth in high water has seven feet and in low water four or five feet.

Q. Bayou Lamouthe runs north?

A. Yes sir, Bayou Lamouthe and Bayou Terre Beuf are the same bayou. The Frenchmen call it Bayou Terre Beuf and the Spanish call is Lamouthe. That is the difference.

Q. Have you been out Southwest pass?

A. I pass there some times.

Q. Greecue bayou?

A. No sir. I have been by there some times.

Q. Raccoon bay. Do you know where that is?

A. I pass by there some times.

Q. Well in going up through the marsh up Three Mile bayou ow did you go there?

A. I went through Lake Borgne.

Q. Were you ever at Brush island out east?

A. No sir.

Q. You don't know about that?

A. I don't know about that place.

Q. How many times do you suppose since 1867 have you gone ou down there about Bayou Terre Beuf up to the Mississippi und in your boat?

A. In the winter time I am going through there all the time for sh.

Q. Every winter?

A. Every week I would go through there. I fished in California ay even.

Q. Did you ever go through California bay up to Nine Mile ayou?

A. And Bayou Lamouthe.

Q. Did you ever come up through Three Mile bayou from wn there?

A. No sir, I came up Bayou Loutre.

Q. And you went in a boat that drew three and a half feet of ater?

A. Yes sir.

Q. And you had no trouble?

A. No sir.

Q. And you have noticed no difference there?

A. No sir.

Q. And the conformation of the land there now is just the me that it was in 1867?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Do you mean to say sir that this territory in the marshes has not undergone any changes at all from these storms?

A. Over there, no sir, it never changes.

Q. Have not the mouths of these bayous widened?

A. Well, maybe a little more wide. Not much.

Q. How many years is it since you last visited this place?

A. 1867 is when I went over there.

Q. How long ago is it since the last time you went there?

A. Nine years.

Q. You don't know any thing about the condition of the ground there now?

A. No sir, not in the nine years.

Q. Did I understand you to say that you were catching oysters there, or that you were trapping and killing alligators?

A. In the winter time I fished over there for fish and in the summer oysters and took them to New Orleans.

Q. What did they call this territory. What kind of a marsh. Did they call it Louisiana marsh?

A. Louisiana marsh.

Q. Did you ever hear any talk of this marsh belonging to Mississippi in St. Bernard parish down there?

A. St. Bernard parish and Plaquemines parish all belong to Louisiana.

Q. And they were called the Louisiana marshes?

A. I don't know what they call them. They call them the marshes.

Q. Did not the fishermen call all of these places, Three Mile bayou and Nine Mile bayou and Creole gap and all of these places. Did not they call them Louisiana marshes?

A. I did not fish over there.

Q. I am asking you what the fishermen called the places over there. Did not they call them the Louisiana marshes?

A. They called it the Louisiana marsh here.

Q. Where they catch the oysters in that territory. Where you come out from the river in St. Bernard parish out to Isle à Pitre. Did not they call all of this Louisiana marshes?

A. I told you that I went to Isle à Pitre to fish.

Q. What did they call them?

A. Called it St. Bernard down there.

Q. Was this all considered a part of St. Bernard parish. All of these lagoons and places in there?

A. St. Bernard parish.

Q. You never heard it called any thing else did you?

A. No sir.

Q. Are not you mistaken. Is not Bayou Lamouthe the bayou that runs into Terre Bœuf?

A. Of course not. They are the same. One is a French name and the other is Spanish.

1526 Redirect examination.

By Mr. McCLURG:

Q. When you speak of the St. Bernard marshes you mean that marsh country along the Terre Beuf don't you?
A. Yes sir.
Q. All of these marshes between Bayou Terre Beuf and Lake Borgne and Nine Mile bayou. How about that?
A. No sir; I don't know anything about that.
Q. You don't know anything about that?
A. No, sir, I was talking about Point Chico and the country here.
Q. Did you ever hear this country north of Bayou Terre Beuf between there and the Mississippi sound up there called Grand Marsh?
A. Some times they call it Grand marsh.
Q. There is more water than land in there is there not?
A. They have not got too much water. Three or four or five feet.
Q. When you look at it here it looks like it is more water?
A. Some places they have.
Q. I understand you to say that you had noticed no subsidence sinking in any of these islands. None of the islands have been sinking down?
A. No, sir, I have not seen any.
Q. Not since 1867?
A. No sir.
Q. You have been in there ever- week?
A. Every week fishing all around in the winter.

F. W. ELMER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. McCLURG:

Q. How old are you?
A. 57.
Q. Where do you live?
A. In Biloxi.
Q. For how long have you lived here?
A. 57 years.
Q. What is your occupation?
A. I am mayor of Biloxi.
Q. Biloxi is in Harrison county I believe?
A. Yes sir.

Q. You have represented this county in the State senate?

A. In the house on three occasions.

Q. Mr. Elmer, this is a controversy between the State of Louisiana and the State of Mississippi as you know over the location of the boundary between the two States to the waters of the Gulf. Louisiana claims that the true line is what is now known as the deep water channel coming out of the mouth of Pearl river to the Rigolets eastward near the Mississippi shore until it comes up in the neighborhood of Gulfport, turning thence southward into the Gulf east of the Chandeleurs, while Mississippi claims that under the acts of Congress admitting Louisiana and Mississippi into the American Union, that Mississippi's line follows the meandering of the shore between the Alabama line and Pearl river, and that it extends 18 miles south of it at every point from the shore and
1527 with the meanderings of the shore including all islands within that reach, and within this limit claimed by Mississippi is Grand marsh. I want you to state to the commissioner if you please what you know about this territory in dispute, as I have in a general way described it to you?

A. Well all that I know in connection with this matter is that the State of Mississippi, the description is definite, and that our western line where the State joins Alabama and extends out six leagues, meandering with the coast, including as you have stated to me the islands within the territory which would entirely take in that portion of the Grand marsh claimed by Louisiana.

Q. Do you know where Isle à Pitre is?

A. I don't know much about that country out there no sir.

Q. Were you ever engaged in the oyster and fishing trade?

A. I believe I was one of the pioneers in this industry?

Q. When was this?

A. I think that it was in 1877 that I commenced shipping fresh oysters from this territory.

Q. From what portion of the territory were your oysters taken?

A. Pretty much all of the oysters that I shipped came from Grand marsh.

Q. From 1877?

A. Yes sir.

Q. There has been a good deal said about the exhaustion of the oysters from Back bay, and that the Mississippians have gone into the marsh because of the destruction of the natural reefs at other points. We would be glad if you would tell us what you know on this subject?

A. The only natural reefs that we have here are in Back bay and off Pass Christian, and the supply was always limited and the oysters were small, and we always went to the Grand marsh to get our large stock, plants, always. From the first time I went into the business the quality around here was not such as the trade demanded, and we naturally had to go over there to get that kind of stuff.

Q. In doing so state whether or not you understood that you were
oing out of the limits of your State?
A. It was naturally understood by any one who understood the
ws of the State of Mississippi that it was included in our territory,
d no question was raised until this question came up several years
go. They began to interfere with our people out there and tried
run them off.
Q. That is since this controversy arose out of which this suit
ew?
A. Yes sir, but I never have been in the marsh so I don't know
ything about the lay of the land, except I do know that schooners
n there for me at that time, and they would tell me that they
re bringing oysters from Creole gap and Nine Mile bayou and
ree Mile bayou and all of these points in controversy.
Q. Did your ancestors live on the coast?
A. My father settled here in Biloxi in 1835.
Q. Have you any knowledge or information at all to the effect
at this deep water channel, which I assume you have some knowl-
edge of passes out of the mouth of Pearl river to the Rigolets
28 eastward and to the north I believe of St. Joseph, and Grassy
and Half Moon islands and turning southward a little west of
t island. Have you any information to the effect that that chan-
l has ever been recognized as the dividing line between the States
Louisiana and Mississippi?
A. I never heard that question raised, nor questioned. Never.
Q. Have you any knowledge or information of any kind what-
r, traditional, historical, or personal knowledge as to there ever
ving been any dispute as to Mississippi's claim to the jurisdiction
sovereignty over the waters within 18 miles of her shore?
A. No sir.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Mayor, have you ever examined the text of the act admit-
g Mississippi into the Union?
A. I have read the act.
Q. Do you remember about this description of the southern bound-
as near as I can repeat it; "Starting from a point near Pasca-
la and then westwardly to the mouth of East Pearl river, includ-
all islands within six leagues of the shore"?
A. That is not my understanding of the description of the State.
understanding is that it starts at Pearl river and runs up to a
ain paral-el and then to the Mississippi and to a certain paral-el
nd comes down on the Alabama line and runs out from there.
Q. I am speaking of the southern boundary of Mississippi?
A. I thought you meant the boundaries of the State.
Q. Do you remember the language to be westwardly from a point
r Pascagoula?

A. I think it says westwardly.

Q. Mississippi was admitted into the Union in 1817?

A. Yes sir.

Q. Louisiana was admitted in 1812 was not it?

A. Yes sir.

Q. Did you ever examine the act admitting Louisiana into the Union and see the description of her eastern boundary so far as these waters were concerned?

A. My understanding about Louisiana was that it was first formed from the Louisiana territory as purchased by the Government from Napoleon, and he did not sell anything except what has been given here and that is that portion west of the Mississippi river. All of this portion on this side was reserved and constituted Florida is my understanding.

Q. Don't you know that the French as well as the United States Government claimed that the Louisiana purchase extended to Mobile?

A. No sir, I am not familiar enough to answer that question.

Q. Do you not know that Congress passes a secret act authorizing Mr. Madison to take possession of this country as far east as Mobile with the privilege of keeping this act secret until such time as the President saw fit to promulgate the act?

1529 A. No sir, my reading of history was that the people voluntarily moved to abruptly take possession of this territory, and after that time that Congress took some action.

Q. Have you ever looked at and examined the boundary line of the State of Louisiana as admitted into the Union?

A. I have read it yes sir.

Q. Do you remember that clause in it which embraces and includes the islands of the coast of Louisiana? within three leagues?

A. Yes sir.

Q. Well would there not be a conflict there as it approaches the mouth of East Pearl river?

A. In reading the boundary line of the State of Louisiana it occurs to me that the act of Congress goes on and states where it comes through Manshac that it runs on through Lake Pontchartrain and to the Rigolets, and it is lost right there and does not go any further, and the second description runs out to East Pearl river. But the first description loses itself at the Rigolets.

Q. Undoubtedly it did, because a month or two later Congress passed an act annexing what are now four or five Florida parishes to Louisiana, and leaving it to Louisiana whether she would accept this addition to her territory, and if she did then the line should be down to East Pearl river to the mouth of it. Do you remember that?

A. Yes sir.

Q. And Louisiana accepted that addition to her territory?

A. I don't know what Louisiana did. I know in the description of the State that is the way that the boundaries are defined.

And then the act admitting Louisiana was amended in order brace that territory, and the boundary was fixed at East Pearl going down to the mouth of East Pearl river, and thence to ulf of Mexico, including all islands within three leagues of the iana coast. Now is there not a conflict there between these escriptions. One of Mississippi and the other of Louisiana?

I cannot answer that question, because in reading the descrip- f Louisiana this second act that you speak of, I did not notice further than to carry the line to East Pearl river, and said ng about any islands within three leagues in my reading of it.

Mr. McCLURG: The State of Mississippi by her counsel reserves ception to this question on the ground that it calls for an on of the witness as to the construction of an act of Congress ting these States, and the witness is not competent to testify s point.

How long have you been a resident of Biloxi?

57 years.

Is it or is it not a fact that so far as your recollection extends his marsh territory has been almost universally called the iana marshes?

Not originally. When I first went into this line of business ey frequently called it Grand marsh. Here lately they have calling it Louisiana marsh.

Q. Since when?

A. In the last seven or eight or ten years. Possibly a little longer than that.

You have stated that there were oyster reefs here in Back bay t Biloxi and also in front of Pass Christian. Were there not oyster reefs to the east of here, between here and Pascagoula, hen on in the different bays and inlets to Mobile?

Yes sir, there is quite a large reef opposite Pascagoula river, has only come into the market in the last eight or ten years ly of much value.

Well now is it not a fact that until quite recently the fisher- n this coast were in the habit of fishing from these reefs all g the summer when the oysters were spawning. Pass Christian nd at Pascagoula and in this neighborhood?

I think that it has been customary for the most of the people un a retail trade here in oysters to get them from the outside

What do you mean by that?

On the Grand marsh and outside of Pass Christian.

Has it not been the habit of the people here in regard to the n the vicinity of Biloxi both to the eastward and the westward, ting the oysters from these reefs to fish them in the summer the oysters were spawning?

Well they fished in the year round, but a very limited quan- n the summer time.

Q. Well there is a large aggregation of strangers here in the summer is not there?

A. Yes sir.

Q. Along this coast?

A. Yes sir.

Q. Are not the boarding houses and the hotels and the oyster shops along this coast. Have not they been supplied with oysters during the summer?

A. Those oysters don't come from this section hardly at all.

Q. Was there any law in Mississippi regulating and concerning the fishing of oysters until quite recently?

A. Well I don't know how far back I can go in relation to that business. The boards of supervisors of this county and of all of these coast counties have had jurisdiction over this matter for a number of years. They have exercised it for a number of years back, but I cannot say how far.

Q. Can you point me to any regulation or give me the year in which the supervisors of Harrison, Hancock or Jackson counties have established any rules against fishing oysters during the spawning season in the summer?

A. Well not particularly, but to show you that they did exercise some authority over this matter, in 1882 I leased from the board of supervisors this planting ground on the bar there opposite this town. It has been 22 years ago.

Q. Now Mr. Mayor, was there until quite recently any law or regulation as to the culling of oysters on the beds. On the reefs?

A. No sir, I don't know how many years back now that that regulation was passed.

Q. Was there any law on that subject?

A. I can not answer that question.

By Mr. McCLURG: I think perhaps the first culling law was in 1896.

1531 By Col. ZACHARIE:

Q. Were not there oyster reefs on that portion adjoining Deer island out in front of Biloxi?

A. There was never an oyster reef on Deer island to my knowledge except possibly some stray oysters scattered along on the shore. I never knew of any oyster reefs except some private reefs around Deer island. I don't know of any.

Redirect examination.

By Gen. McCLURG:

Q. You spoke in answer to questions propounded by the counsel for the State of Louisiana of the boards of supervisors having the authority to enact ordinances and rules regulating the oyster business. Can you tell us how far down from the shore the boards of these coast counties undertook to exercise jurisdiction?

A. I could not tell you. I would naturally suppose that it would be to the limits of the State.

Q. You mean to say six leagues from the shore?

A. Yes sir, I would naturally presume so.

Q. You have also stated that your information was that the people abruptly took possession of this territory and that Congress afterwards acted on it?

A. That is my understanding from reading history. That is where I got my information.

Q. Do you refer to that part of our own State history in which this territory was formed into Jackson, and Hancock counties after December 1812, long before she was admitted into the Union and before this proclamation was issued by Madison?

A. About that period yes sir.

Q. That is true is it not, and introduced in evidence in this case?

A. Yes sir, to the best of my knowledge the counties were formed in 1812. Harrison coun'y was carved out of Hancock, between Bay St. Louis and Biloxi bay in 1841.

The commission here adjourned until tomorrow morning at nine o'clock.

The commission met this morning, June 10th, at nine o'clock, there being present Hon. William D. Bullard, commissioner. Hon. Monroe McClurg, counsel for the State of Mississippi, and Hon. F. C. Zacharie, counsel for the State of Louisiana.

CHARLES WILLIAMS, a witness introduced on behalf of the State of *Louisiana*, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Mr. Williams, how old are you?

A. 38 years old.

Q. Where do you reside?

A. In Biloxi Mississippi.

Q What is your occupation?

1532 A. Oystering and fishing.

Q. How long have you resided in Biloxi?

A. 38 years.

Q. How long have you been engaged in the oyster business?

A. Well I have always been in the oyster business. For about 15 years I have been running on a boat.

Q. The 15 years last past?

A. Yes sir.

By Col. ZACHARIE:

Q. You say that you have always been in the oyster business?

A. Yes sir, off and on.

Q. You have been in it all of your life?

A. Yes sir ever since I was big enough to work.

By Gen. McCLURG:

Q. On what part of the coast have you been engaged in the oyster business?

A. The Mississippi coast.

Q. Are you familiar with the Mississippi coast between Pearl river and Pascagoula river?

A. Yes sir, and over to New Orleans.

Q. All of the way to New Orleans?

A. Yes sir.

Q. Have you ever taken oysters in those waters during the last 15 or 20 years?

A. Yes sir.

Q. Tell us please sir, going west from the Bay of Biloxi where you were in the habit of fishing oysters?

A. Well I have fished them all of the way from Cat island to Half Moon to the westward and to the southward from there to what they call American bay. That is down back of Neptune.

Q. Have you ever fished oysters about Isle à Pitre?

A. Yes sir.

Q. Bayou Greecue?

A. Yes sir.

Q. About Turkey bayou?

A. No sir, I never come in Turkey bayou.

Q. Have you been through Turkey bayou?

A. No sir.

Q. Were you ever through Three Mile bayou?

A. Yes sir often.

Q. Often?

A. Yes sir.

Q. Have you ever been through Nine Mile bayou?

A. Yes sir.

Q. Do you know where Raccoon island is?

A. Yes sir.

Q. And the Karako bayous?

A. Yes sir, I have been all through there.

Q. Indian Mound bay?

A. Yes sir.

Q. Southwest pass?

A. Yes sir.

Q. You have been in all of that country?

A. Yes sir, in all of that country.

Q. Taking fish and oysters?

A. Yes sir, all through there.

1533 Q. In what State were you please sir were you when you were in that section?

A. Well I could not exactly state what State I was in.

Q. Well how far south from the Mississippi shore if you know does the State of Mississippi extend?

A. Well I have always heard that it was three leagues.
Q. Three leagues or six leagues. How many miles if you know?
A. 18 miles I have always heard it.
Q. 18 miles?
A. Yes sir.
Q. When were you in this pass and about these islands about hich I have interrogated you. State whether you considered your-lf then within 18 miles of the Mississippi shore then or not.
A. Yes sir, in pretty near all of them. That is as far down as rum bay.
Q. As far down as Drum bay?
A. Yes sir.
Q. I understand that you considered that you were in the State of ississippi. Is that correct?
A. I considered myself within 18 miles of the Mississippi shore.
Q. Now what sort of a boat did you use Captain. Have you been ing?
A. Well at first a boat 42 feet. The last one that I used was a all one drawing three and a half feet loaded.
Q. How much did your first boat draw?
A. Four and a half feet loaded.
Q. I want you to state please sir where you went through the marsh ith your first boat that drew four feet loaded?
A. Well we went pretty much all over it, but we has to wait for e tide. In a light tide we could not get through there with it aded. We had to wait for the tide. That is through the main sses. There were plenty of passes that we could not get through ere at all.
Q. Through the main passes you could?
A. Yes sir.
Q. How about Nine Mile bayou?
A. We could go through that on the west side, but on the south d east side we had to wait for the tide. In low tides we had to it for the tide to rise.
Q. Could you travel at mean tide, or average tide through Nine ile bayou and False Mouth bayou and as low down as Indian ound bay?
A. No sir, not loaded. We had to wait for an extra high tide.
Q. An extra high tide to make it down there. How about going wn through Three Mile bayou?
A. There is plenty of water at the mouth of Three Mile bayou, t when you get inside it is the same thing. You have to wait for e tide.
Q. How about Johnson bayou?
A. You can go through there with a loaded boat. In the inside outh.
Q. How much water could you draw in Johnson bayou?
A. With a low tide you could get in there about two feet.

Q. I believe you stated that you had not been through Turkey bayou?

A. No sir, I never was through Turkey bayou.

1534 Q. Have you ever been through Grand pass?

A. Yes sir.

Q. How much could you draw through this pass?

A. Well at the east mouth with a low tide you get about four and a half feet with a dead low tide.

Q. And Grand pass about four feet?

A. Yes sir.

Q. Do you know Creole gap?

A. Yes sir.

Q. Have you ever been through there?

A. Yes sir, often.

Q. Do you known Sun Down island?

A. Yes sir.

Q. Jack Williams bay?

A. Yes sir.

Q. You have been all through there?

A. Yes sir, all through there.

Q. When was it that you first went into this marsh?

A. About 15 years ago. I don't know the year exactly.

Q. Have you ever been regularly in it since?

A. Yes sir, up until last winter. I was not there last winter; not in there.

Q. About how often would you go into this marsh prior to last winter?

A. Well in the winter time we would make three or four trips there a month.

Q. Three or four trips a month?

A. Yes sir.

Q. Have you ever observed the general formation of these islands and the mouths of these bayous of which we have been speaking and can you say whether you have noticed any material changes within the last 15 years?

A. No sir, there has been no change, only maybe a little washing. Maybe they have gotten a trifle wider. That is all the change that I see.

Q. At what point, Captain have you noticed these insignificant changes?

A. Three Mile bayou is about the only one as near as I can remember.

Q. Have you noticed any subsidence, any sinking in the general surface of the marsh since you have been in there?

A. No sir, it has always been just the same since I have been running in there.

Q. Were you called upon to buy a license to go into this country?

A. No sir. The last two years I have run in the marsh, what I mean by that, I have no license from Louisiana, because for the

ast few years I have not run in Louisiana, that is in the marsh, I nean by that since I was paying license in the marsh I was running in the marsh.

Q. What did they call that marsh Captain?

A. Grand marsh is what I have always heard it called.

Q. Have you known it as Grand marsh for the last 15 years?

A. Yes sir, we always spoke of it as Grand marsh.

Q. How far west did you understand that marsh to extend?

A. Well it is all Grand marsh to me.

Q. How far west.

A. We would say Grand marsh and we would mean it all.

535 Cross-examination.

By Col. ZACHARIE:

Q. Mr. Williams, you say that you have fished oysters as far south s Drum bay? And American bay?

A. Yes sir.

Q. Have you ever fished them as far south as California bay?

A. No sir.

Q. You mentioned one point I believe, American bay, as being ack of Neptune?

A. Close to Neptune. That is close to the factory. Mr. Lopez has factory there that he calls Neptune and this American bay is close o that.

Q. What is Neptune. Is not that a little settlement in the parish f Plaquemines?

A. Yes sir, that is what I understand it.

Q. Did you consider American bay as being within 18 miles of he Mississippi shore?

A. No sir, I said when I was in Drum bay that I considered myelf within 18 miles of the Mississippi shore, and from there on down was of course further.

Q. As I understand your general testimony in regard to the navigation of these bayous and passes it is that at the mouth of the passes here was a good deal of water, but in going through from north to outh and in low water there was hardly over two feet, and you could ot get through if you were loaded?

A. No sir, you can not go through there with loaded boats on the outh side in low water. You have to wait for the high water.

Q. Did you not find yourself grounded very often on Mud flats nd you would have to heave your vessel off with a windlass and opes?

A. Yes sir, often.

Q. In order for you to get through with a vessel drawing four or our and a half feet of water you would have to wait would not you or the high tide?

A. Yes sir, in nearly all of the passes except Grand pass. In

Grand pass with an ordinary tide you could go through there easy but with a low tide you could not.

Q. Now Mr. Williams is it not a fact that these marshes are generally known and called by the fishermen the Louisiana marshes?

A. I have heard it called Grand marsh and Louisiana marsh both.

Q. Suppose prior to this dispute I went out as I have done here and asked these people where they got their oysters from, would not they almost universally reply as they have done to me, that they got them from the Louisiana marshes?

A. Some of them would yes sir.

Q. Well now you say that there has not been much change in this territory in the last 15 years during which time you have been engaged in this business. Did you ever pay particular attention to know the changes?

A. If there had been any change of note at all I certainly would have noticed it running through there so much. If there is any change at all it is very lately.

Q. Then if a number of witnesses have testified that the mouth of Nine Mile bayou, Three Mile bayou, Johnsons bayou, Creole gap and Grand pass have widened to double the amount of width. I say that if a number of witnesses have testified to that they have not testified correctly have they?

1536 By Gen. McCLURG: The counsel for the State of Mississippi reserves an exception to this question on the ground that it calls for an opinion from this witness as to the truthfulness of other witnesses who have testified in this case, and whom it has not been undertaken to impeach. The counsel for the State of Mississippi knows of no rule of evidence or practice that authorizes or justifies a question of this character. Let the witness testify to what he knows about these facts and let the court determine upon the weight and the sufficiency of the whole testimony upon these points.

Q. Then if a number of witnesses have testified that the mouth of Nine Mile bayou, Three Mile bayou, Johnsons bayou and Creole gap and Grand pass have widened to double the amount of width. I say, that if a number of witnesses have testified to that they have not testified correctly have they?

A. They have not widened to no double. I am confident of that Since my time they have not.

Q. How much have they widened?

A. It has been very little, and we can not notice it except Three Mile bayou has widened a little since I can remember.

Q. How about Creole gap?

A. Of course that has widened a little, but it has been such a little since I have been running there. I don't suppose that it has been fifty feet.

Q. How wide was Creole gap when you first knew it 15 years ago?

A. Well I cannot say exactly.
Q. No, I don't want you to say exactly?
A. It was not very wide and it is not very wide now.
Q. About how wide was it?
A. Well it was perhaps 300 feet.
Q. When you first knew it?
A. Yes sir, at the narrowest place.
Q. How wide is it now?
A. It looks like to me that it is about the same yet. I can not see any difference.
Q. Do you know the history from tradition or hearsay as to how this gap was created?
A. Yes sir. I have heard that there was a boat the Creole got ashore there around there in a lagoon and they dug there to get her out.
Q. Now Mr. Williams in regard to the shore along the coast of these marshes. Has not that shore been washed away a good deal at times within your knowledge?
A. Well on the east side there has been a little washing, and on the south side, but on the west side I can not see any change at all. The mud down there is more like putty and the water don't have much effect on it.
Q. Do you know the islands lying north of this shore commonly known as the Malheureux islands. That is Grassy and Half Moon and Round islands, and St. Joseph and those other islands?
A. Yes sir.
Q. What change has taken place in those islands if any within your knowledge?
A. Well there was a small one there that had grass on it and now it is nothing more than a shell heap. The grass is gone off of it.
Q. What is that; Round island?
1537 A. It is a little island standing southwest.
Q. Do you know it by the name of Round island?
A. No sir.
Q. Do you know what changes have taken place in St. Joseph island?
A. Yes sir, that has done the same. It has washed. It was very small when I remember it.
Q. Have not Round island and St. Joseph island entirely disappeared under the tide?
A. Yes sir, in high tide they are covered.
Q. What change has taken place in regard to the Half Moon and Grassy islands?
A. I can not see any at all.
Q. There is no washing away at all?
A. No sir, none that I can notice, no sir.
Q. Now Mr. Williams, do you know what is the deep water channel which vessels of considerable depth follow in going from Cat Island to the eastward through the Rigolets?

A. Yes sir, I know that pretty well.

Q. Where does that channel pass in relation to these islands that we have been talking about?

A. It passes on the north side of Half Moon island, and then it passes next to the main land and comes on down to the Rigolets.

Q. Now as you approach the mouth of East Pearl river how close does the channel run to the Mississippi main land?

A. It passes in less than a quarter of a mile at what they call Heron Bay point, and then of course as it goes on down it hauls off a little further and comes close to the mouth of the Rigolets.

Q. You mean that it hauls off a little to the southward?

A. Yes sir a little to the southward.

Q. Is that the channel that larger vessels and of greater depth always pursue?

A. Yes sir, that is the main channel for them going in there.

Q. Coming from the mouth of East Pearl river towards the east where does this channel branch off from the channel which continues to the eastward?

A. It is just after you get past Half Moon.

Q. St. Joseph?

A. Yes sir, and then it comes a little more to the right, and the other one goes to the left.

Q. You mean that it runs to the southeast?

A. Yes sir.

Q. Where does it pass in relation to Cat island and Isle à Pitre?

A. It passes south of Cat island and north of Isle à Pitre, and closer to Cat island than Isle à Pitre.

Q. Now in regard to Grand pass. That is the pass that is between Isle à Pitre and the marshes is it not?

A. Yes, sir, there is one south of Creole gap. South and west.

Q. How wide was this pass when you first knew it?

A. Well I could not say exactly. I don't see any change between now and then.

Q. I want an answer to my question. I am asking you about how wide this pass was at the time that you first knew it?

A. Well from one marsh to the other; from one point to the other it is may be 400 yards. I don't know that it is quite that.

Q. Not quite that?

A. No sir.

Q. How wide is it now?

A. I can not see any change. It is about the same thing.

1538 Q. Have you ever paid any particular attention to any changes as you were passing along there?

A. No change I saw, and if there had been any material change I would certainly have seen it.

Q. Now it has been claimed in this case on behalf of Louisiana that there has been a sinking going on, a gradual subsidence or sinking of these marshes. Did you ever pay any particular attention to know?

A. No sir, not exactly, but I have been walking there over the rsh and I have not seen any change in it at all.

Q. Have you ever noticed from the pilings; the pilings on which camps were erected; the poles and posts driven in the ground, ther or not the marsh soil is going down?

A. No sir.

Q. You have never noticed that?

A. No sir.

Q. Then I understand your general testimony to be that during r 15 years' experience in this section that you have noticed no nges except the widening of the mouth of Three Mile bayou and sibly a small change at Creole gap?

A. Yes sir, but if there is any change at Creole gap you can not e it at all. There has been so little.

Q. I understand you to say that you have been fishing and ghting oysters from this territory. Where to?

A. To Biloxi.

Q. To whom did you carry these oysters. To the canneries?

A. To the canneries yes sir, and to what we call the raw oyster ers too.

Q. Who are the raw oyster dealers?

A. They are the ones that open the oysters and ship them raw the States.

Q. Is that a distinct business from the canneries?

A. Yes sir.

Q. Have you ever investigated this boundary question or have not just gone along without bothering your head about the ndary?

A. Well I have not investigated it no sir.

Q. Now prior to the institution of this suit and just immediately re the suit was instituted was there any question or discussion ng the fishermen so far as you know about where the boundary between Louisiana and Mississippi was?

A. Not as I ever heard any thing of.

Q. They were allowed heretofore to fish in all of the territory out objection so far as you know, and they never bothered their s about the boundary question. Is not that so?

A. No sir, they never bothered us only way down. In Plaquemes parish it has been so for a good while that a man had to get ense there. That is down close to what they call Neptune. It been that way for the last five or six years.

Q. They did not bother you before that?

A. No sir.

Q. You say that you have not at any time taken out any license shing in this territory either in Mississippi or Louisiana?

A. No sir.

1539 Redirect examination.

By Gen. McCLURG:

Q. Counsel for the State of Louisiana asked you Mr. Williams about the deep water channel, passing out of the Rigolets and Pearl river to the eastward, and on out between Cat island and Isle à Pitre. I want to ask you whether you have ever considered; or if you know by history or tradition whether that line, the deep water channel has ever been considered the line dividing Louisiana from Mississippi?

A. Not that I know of no sir.

Q. You never heard of it?

A. No sir.

Q. You also answered that you walked over the marshes. I want to ask you if you encountered any musk rats in walking over the marshes?

A. I never saw one in my life that I remember of.

Q. Could you say whether or not they have made any depredations in this marsh?

A. I never saw any signs of that.

Recross-examination.

By Col. ZACHARIE:

Q. On that last question. Did you find places that had been burrowed in and that were soft and would give away under your feet?

A. Well I have found small islands in the marsh to the southward. I know one place, but what caused that I don't know. I know that I was walking in the marsh. That is down close to American bay. I suppose that is what you speak of.

Q. Your feet would give away and sink into these holes?

A. The holes were already there.

Q. Was there any thing about these holes to show burrowing?

A. No sir.

J. S. WENTZELL, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. McCLURG:

Q. How old are you?

A. 47 years old.

Q. Where do you live?

A. In Biloxi.

Q. How long have you lived in Biloxi?

A. I was born and raised here in Biloxi.

Q. What is your occupation now?

A. Fishing, and oystering and terrapin hunting.
Q. How long have you been so engaged?
A. Ever since I was big enough to go out.
Q. About what age were you when you began?
A. I began fishing and oystering around Biloxi here, and then
ien I started out for the marshes I guess that I was 25 or 27 years
old at that time.
40 Q. You have not visited the marsh since when?
A. It has been about twenty years since I was in the marsh.
Q. You have been there for about that time constantly?
A. Yes sir.
Q. About how many times a year did you go there?
A. When I would go out there I would generally stay there 20 or
days at a time.
Q. How often did you go?
A. I am very near all of the time in there except these hot sum-
er months, and then up to a couple of years ago I was terrapin
nting in the summer time too.
Q. Do you know where Isle à Pitre is?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Creole gap?
A. Yes sir.
Q. Johnson bayou?
A. Yes sir.
Q. Turkey bayou?
A. Yes sir.
Q. Three Mile bayou?
A. Yes sir.
Q. Nine Mile bayou?
A. Yes sir.
Q. Petit pass?
A. Yes sir, I have been in there a couple of times.
Q. You are familiar with the lands in there?
A. Not Petit pass. I have gone down to Isle à Pitre and that
ie as far as Three Mile bayou.
Q. Did you ever go south through Three Mile bayou in a boat of
y kind?
A. Yes sir, I have been down as far as Taylor's pass.
Q. How far is Taylor's pass south of the entrance to Three Mile
you from the north?
A. I could not tell you. Taylor's pass is way off by Neptune.
aylor's pass is abreast the salt works down the Mississippi river.
Q. You have gone by boat through Three Mile bayou down
rough the marsh and Taylor's pass?
A. Down through the marsh into Broad bay and through Nigger
ke. Some times we would go through the marsh and some times
the outside.

Q. Through Three Mile bayou?
A. Yes sir, through Three Mile bayou.
Q. When did you first do that?
A. About twenty years ago. First I was oystering and then I was terrapin hunting. When I went oystering I went through there, but when I went terrapin hunting I never went through there at all. I kept on down to the southward.
Q. What kind of a boat were you in?
A. A small boat and then a large boat.
Q. How much draft?
A. About 22 inches light.
Q. Were you ever in Treasure bay?
A. No sir.
Q. Indian Mound bay?
A. Yes sir.
Q. Do you know where Mud Island is?
A. Yes sir.
1541 Q. Karako?
A. Yes sir.
Q. The Raccoons?
A. Yes sir.
Q. You know where these islands are?
A. Yes sir.
Q. Bayou Greecue?
A. No sir, I never was in Bayou Greecue.
Q. Were you ever in Grand pass?
A. Yes sir.
Q. You have been in the neighborhood of Sundown island?
A. Yes sir.
Q. Brush island?
A. Yes sir.
Q. And about Door point?
A. Yes sir.
Q. Down as far as Martin island?
A. Yes sir.
Q. Now when you were in these places about which I have just asked you state if you know whether you were in Louisiana or Mississippi?
A. Before this dispute arose I always thought that it was in Mississippi, when I was in Grand pass and around those places, but here lately I have had to pay taxes in Louisiana.
Q. Within what time have you been paying taxes to Louisiana?
A. For the last couple of years.
Q. Before that time did you ever pay any. You mean a tax license?
A. No sir, I never paid them no tax license before two years ago. There were taxes paid in Plaquemines parish but not in St. Bernard. They never charged no taxes there.
Q. Did you ever pay a license to the State of Mississippi?

A. Yes sir.
Q. When did you pay the first one?
A. I don't know that they used it *for* five or six years ago.
Q. You paid one five or six years ago.
A. Yes sir.
Q. To Mr. Hewes?
A. No sir, it was a man by the name of Young here was an oyster lector. He collected the taxes.
Q. You paid the taxes five or six years ago to him?
A. Yes sir.
Q. Do you remember about how much you paid him?
A. It was fifty cents I think a ton for the boats.
Q. Where did you take oysters and fish under this license?
A. We fished in Grand pass and all of those places.
Q. All of these passes that I have asked you about?
A. Yes sir.
Q. You went through this marsh under this license did you?
A. I fished in Grand pass and Creole gap and on Cabbage reefs d all of these places.
Q. Did you go into Three Mile bayou?
A. No sir. Yes sir, I believe I did go into Three Mile bayou. I not sure.
Q. Have you noticed any change in the conformation of these ters and islands down there in Grand marsh since you have been ing in it?
A. No, sir, very little. There is a change in Three Mile bayou.
Q. What places have you noticed any change in Captain?
A. In Three Mile bayou it is washed there a little.
42 Q. Any other place?
A. Not that I know of.
Q. Have you noticed any subsidence, rising or sinking of this nd?
A. No sir.
Q. Or waters?
A. No sir.
Q. Have you ever been out on these islands?
A. Yes sir.
Q. How long ago?
A. Well we go every summer except this last summer. Go out ere terrapin hunting in the summer time and go by this country.
Q. Have you ever encountered any musk rats out there?
A. No sir.

Cross-examination.

By Col. ZACHARIE:

Q. I understood you to say that you had been engaged in the ster fishing and trade ever since you were able to work?
A. Yes sir, oyster fishing.

Q. And you are 47 years of age. When did you first visit these marshes that we have been talking about?

A. About 20 years ago I suppose.

Q. About 20 years ago. What were these marshes known by. By what name generally amongst the fishermen?

A. Grand marsh.

Q. Were not they also known to a very large extent under the name of the Louisiana marshes?

A. Yes sir, but at that time I was working for a Pascagoula firm and whenever they wrote letters they styled it Grand marsh.

Q. I am asking you amongst the fishermen were not they generally known as the Louisiana marshes?

A. Yes sir.

Q. Prior to that time you fished around Biloxi did not you?

A. I used to catch oysters for a man in Ocean Springs. Catchard I believe was his name.

Q. You fished in Back bay?

A. No sir.

Q. Where did you fish around Biloxi?

A. All around Biloxi. I used to go to school and on Saturdays I would go with my uncle.

Q. Were you and other fishermen at that time fishing generally all through the summer to supply fresh oysters?

A. No sir, I never.

Q. Did not the fishermen generally?

A. Yes sir, they used to catch oysters in the Back bay for the shops some times.

Q. Were not all of the boarding houses and oysters shops around Biloxi and Ocean Springs and these other coast places furnished with these oysters all during the summer. In the spawning season?

A. I don't know sir, I could not say.

Q. You could not say?

A. No sir.

Q. Do you know what was the habit of fishermen in those days in fishing oysters in regard to culling?

1543 A. They culled the oysters then a great deal better than they do now.

Q. Where. At what particular place did they cull them. Did they not cull them as they were sailing along, or wait until they got to the land and then cull them?

A. They generally culled as they sailed along unless they had too many. If they were over loaded they would wait to cull some of them.

Q. You say that you fished down as far as back of Neptune and the salt works?

A. No sir, I have been down there but I never fished down there.

Q. Did you freight oysters there?

A. No sir.

Q. You stated that the boat in which you generally went drew about 22 inches?
A. Yes sir, 20 to 22 inches.
Q. She was a skiff. Flat bottomed boat?
A. No sir, round bottomed.
Q. With a center board?
A. Yes sir.
Q. In going through this marsh. These different sheets of water in the marsh. Did you at any time find any trouble with your boat. Say in low tide?
A. Yes sir, in low tide.
Q. You run upon flats?
A. Not much trouble when I was light. It was when I was loaded.
Q. How much did you draw when you were loaded?
A. About three & one half feet.
Q. Your trouble was that you were running upon mud flats?
A. Yes sir.
Q. And you had to heave your boat off did you not with a windlass & cables?
A. Yes sir.
Q. That is the way you forced her through the mud. Now did not you have trouble also when you were light in a very low tide. In striking mud flats?
A. Yes sir.
—. ——.
A. Yes sir, in one place there. In Catfish pass they call it. Going through there we have had to wait for the tide to rise.
Q. You have testified in your examination in chief that you have not seen much change if any since you have been fishing in this marsh?
A. Except very little.
Q. Well now how about Creole gap?
A. I very seldom go through Creole gap.
Q. You don't know much about it?
A. No sir.
Q. Is it or is it not a fact that the shore line of this coast has washed away a good deal in storms and so on?
A. Well I don't know sir. I have not noticed much about that.
Q. Why did you take out a license in Louisiana?
A. Because I was compelled to take out a license in Louisiana. I fished oysters way down to the southward, and the patrol boat told me that I would have to take out a license there.
Q. They did not tell you that you had to take out a license for fishing in these marshes or in the neighborhood of these marshes?
A. No sir, I went out terrapin hunting out there and they told me that if I come oystering that I would have to have a license, so when I went oystering I took out a license.

1544 Q. You simply took out a license in Louisiana because you proposed to fish in Louisiana below this territory?

A. Yes sir.

Q. Do you know what is called the deep water channel between the coast of these marshes, the northern coast and the main line of Mississippi to the north?

A. No sir, I never bothered around these places at all.

Q. I suppose the reason for that was that your boat was of such light draft that you never made use of them?

A. No sir, when I left here I went right to the marshes. I never oystered any steam oysters.

Q. Do you know the islands St. Joseph and Round island and Grassy island?

A. No sir, I know nothing about them at all. I passed there a couple of times year before last.

Q. Are you still engaged in the fishing of oysters?

A. Yes sir.

Q. To whom did you deliver these oysters?

A. I sold my oysters to the steamboat out there running to New Orleans.

Q. Have you or have you not at times supplied the canneries here in Mississippi?

A. No sir.

Q. When did you first commence fishing oysters around Biloxi and in this neighborhood? At that time were there many Mississippians engaged in going to this Grand marsh or Louisiana marsh?

A. Yes sir, they used to go there for the raw oysters.

Q. A great many of them?

A. Pretty nearly all of them.

Q. Now is it or is it not a fact that the great body of Mississippi fishermen along this coast commenced going to these marshes after these canneries were established here along this coast and then there began a great demand for oysters?

A. Before the canneries were here all of the raw trade was here. The boats used to get the raw oysters. The raw oysters are bigger oysters than the cannery oysters.

Q. I want to get at the relative trade at these marshes. Is it or is it not a fact that a large proportion of these who are fishing just now down about the Louisiana marshes; that that has all grown up since the establishment of the canneries along this coast and the great demand for oysters?

A. Yes sir.

Q. There were a few that went there for raw oysters. You said something just now about going there for raw oysters. Did you say that they were better oysters?

A. Yes sir, the oysters in the marshes were better.

Q. Well now did not the oysters in this neighborhood and the oysters to the eastward from here enjoy equally if not a better reputation in the market than the oysters that come from the marshes?

A. I don't know sir.
Q. For instance the Back Bay oysters and the Pascagoula oysters, nd the oysters coming from towards Mobile. Don't they enjoy a ery high reputation and command a very high price in the narket?
A. Yes sir, the Back Bay oysters are usually considered the est oysters.
Q. Well what is the reason then that these people instead of going to the Back bay and other places in the neighborhood of Biloxi for the purpose of getting their oysters. Why is it 1545 that they would go way off to the marshes to get their oysters?
A. Because there were not enough in the Back bay to get.
Q. Now were not there other oyster reefs off to the eastward?
A. No sir, they were all scarce there. They could not get enough.
Q. Were not there oyster reefs off of Pass Christian?
A. Yes sir.
Q. Were not there small reefs off of Deer island?
A. Off the inside or outside?
Q. Both?
A. There were a few on the inside.
Q. I am now speaking of when you first commenced oyster fishing. Is it not a fact that on account of fishing oysters in your neighboring reefs here all during the summer, all during the spawning time as well as the not culling the oysters on the reefs, created a great falling off in the oyster reefs in this neighborhood and helped to destroy your oyster reefs here?
A. Yes sir.
Q. Do you know when the State of Mississippi or your board of supervisors here first commenced to enforce any regulations about fishing oysters during the summer?
A. No sir.
Q. Or about the culling?
A. No sir, they made the laws but they never enforced them.
Q. They made the laws but they never enforced them?
A. No sir.

J. M. RITCH, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. How old are you Mr. Ritch?
A. 53.
Q. How long have you lived in Biloxi?
A. I might say all of my life.
Q. What is your present occupation?
A. Well at present time I am doing nothing at all.
Q. What has been your occupation since you lived in Biloxi?

A. Carpentering and oystering.
Q. When did you begin oystering?
A. 32 years ago.
Q. Where did you oyster then?
A. Down in Alabama near Cedar point.
Q. Did you ever do any oystering between Biloxi and Pearl river?
A. Well not near the main land.
Q. At what place?
A. Cat island and around the immediate neighborhood of Cat island.
Q. Did you ever go south of Cat island?
A. Yes sir, to the southward and the westward of Cat island, mostly to Grand pass and Bayou Pierre and Creole gap and out in the neighborhood of southwest of Martin island.
Q. What state were you in then. The State of Louisiana or Mississippi?
A. I don't know sir.
Q. Have you any information at all as to the limits of the State of Mississippi?
A. Nothing more than hearsay.
Q. What is that?
A. Well I have heard that it was six leagues.
1546 Q. From what?
A. From the State line. Pearl river, that is what I have heard.
Q. You don't know of your own personal knowledge?
A. No sir.
Q. How long have you been hearing that?
A. I would judge anywhere from 12 to 20 years.
Q. When were you first about Isle à Pitre and Grand pass and Martin island?
A. About 1871 or 1872.
Q. When were you last there?
A. I was there about 1896 or 1897.
Q. Did you notice or not any material changes anywhere in that section that you frequented and were familiar with between the first time you were there and the last time? If so what was it?
A. Yes sir, I have noticed some. Principally at Creole gap.
Q. What other changes?
A. Well none to amount to anything except at Creole gap.
Q. What was the change in Creole gap?
A. A deepening of the water.
Q. Was there any change in the widening?
A. Very little. I think there was some but I won't be positive.
Q. Were you ever as far west as Three Mile bayou?
A. Yes sir.
Q. Did you ever go through Three Mile bayou to the southward?
A. I have been to the west from the southward coming out this way from the north.

Q. What sort of a boat were you in?
A. A small boat. About 38 feet I guess.
Q. How much draft?
A. About four and a half feet.
Q. You say that you have gone in and out of Three Mile bayou?
A. We have gone through. Going through to the southward when we were light.
Q. How far down did you go?
A. Well I really don't know the distance. It is down what they call Chimney bayou. I don't know the name of it really from the map. We did not use any maps at all. We used a sounding pole as a rule.
Q. Do you remember anything about Raccoon island and Karako bay?
A. I never have been ashore on Raccoon island.
Q. You know where they are?
A. Yes sir.
Q. Did you pass them when you went down there through Three Mile bayou?
A. Yes sir, we left them to the southward of us as we come through Three Mile and Nine Mile bayou. In fact it has the same mouth at the south side. You go to Nine Mile bayou and turn to the northwest and come down Three Mile.
Q. How is that?
A. It was the same mouth. We would go to Nine Mile bayou and turn to the north east if we were coming to Biloxi, and if we were going to New Orleans we would keep to the northward and go through Nine Mile bayou.
Q. Do you know where Door point and Brush island are?
A. Yes sir.
Q. Did you ever make a trip from these points through Three Mile bayou?
A. Yes sir.
Q. In your four and a half foot boat?
1547 A. No sir, not in that one.
Q. What draft?
A. About three feet.
Q. You say that you have been to Nine Mile bayou the same way?
A. Yes sir, that is the same entrance at the south entrance.
Q. Coming to Biloxi you would come out of Three Mile?
A. Through Three Mile because it was closer.
Q. And to New Orleans you would go out of Nine Mile?
A. Yes sir.
Q. What would you be loaded with?
A. Oysters.
Q. Where did you get those oysters?
A. Well at different places. Some come from Karako bay, and we have gotten them from what we call Jack Williams bay.

Q. Could you make a trip from Jack Williams bay around through Nine Mile bayou?

A. No sir, from Jack Williams you would go through Grand pass, and from the other side you would go through Nine Mile bayou.

Q. Did you ever fish oysters in Drum bay?

A. Very few. Not a great many. I never fished a great deal on the inside of the marsh. That is not any distance in. We fished about Karako bay mostly.

Q. Were you ever on any of these islands?

A. Yes sir, I have been on some of them.

Q. What islands were you ever on in there?

A. I have been on Brush island.

Q. Were you ever on any of the other islands?

A. Yes sir, different places through the marsh but I don't know the names of them.

Q. When were you first on these islands?

A. Well I could not say. We were on these islands when I first began to run down there to the marsh. When I first went down there I went from Mobile, but in bad weather we fished on what is known as the Shell Banks reefs, and bad weather we would go into the Grand pass, and then we were liable to go ashore there after coons. Different parties would ask us to catch them a coon and carry them to them.

Q. Where did you catch the coons?

A. All through the marsh land. There were plenty of them when I first went down there. There was no trouble to catch a coon after you got there. You would find a dozen of them there at a time.

Q. Where were the coons most plentiful. To the east or the west of Grand pass?

A. They were the most plentiful to the west. You could find one almost any where there.

Q. Do you know where Isle à Pitre is?

A. No sir.

Q. Do you know any thing about where it got its name?

A. No sir.

Q. Some of the witnesses have testified in this case that its name came from Isle à Pied. Isle of the tracks. That Cat island got its name from the French when they first came there and they saw a great many coons and they thought they were cats. In looking for coons on these islands have you ever encountered any musk rats?

A. No sir.

Q. Have you ever noticed since the first time you went in there any difference in the height of these islands. Has there been any subsidence, or sinking or rising?

1548 A. No sir, I have never noticed any difference in the height of them. There have been some small hills that would be probably as long as from here to the wall that have disappeared, washed outside, but outside of that I have not seen any disappear, the grass on it has been burned a great many times, and a great

many people would say that it is lower because the grass is burned, and the top of it on that account would look lower. We used to go hunting there shooting ducks and geese and things of that kind and were often ashore.

Q. Do these islands get under in high tides?

A. At high tide I have seen the water over the ground there but not over the grass.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Ritch, when did you first commence fishing oysters?

A. Well I could not say exactly. Along about 1870.

Q. I believe you stated that you first commenced fishing oysters here to the eastward. Alabama?

A. Yes, sir, down in Alabama, in what is called Cedar point.

Q. Were not there in those days a good many oysters around Biloxi here?

A. Yes sir, I always in going down there fished a few here for our own use, but not to sell. I might have sold a few of them but not to amount to anything.

Q. That is before the canneries were established here?

A. Yes sir. Before any canneries were established anywhere in this neighborhood that I know anything about.

Q. Did not the fishermen of those days fish oysters around here and to the eastward all through the summer to supply the hotels and the boarding houses?

A. No sir the principal part of the oysters that supplied the people here during the summer and the hotels came from around the immediate neighborhood of Cat island. What are known as the Shell banks.

Q. Well in those days there were a few oystermen that went as far as that for them did they?

A. There were not as many oysters taken then as now. There were some parties came here from New Orleans and made it a business after the season closed to come here and run during the summer.

Q. How about here in these fisheries. Back bay and Cedar point and other points. They did not stop fishing oysters during the spawning season. They fished them during the summer did not they?

A. No sir, nothing but for the local trade.

Q. I am asking you about the season. They fished them during the summer?

A. During the summer for the local trade. There was scarcely no local trade then. As a consequence we would fish in a little skiff, 15 or 18 feet long and carry them to a party in Mobile who would sell them to the local dealers there.

Q. Well now as a rule when these fishermen gathered these oysters and they got a fair wind when they got a load, would not they cull

the oysters while they were under sail and when they got on the land?

1549 A. I don't know any thing about when they got on the land. There were a good many that carried oysters here but I did not see them. Some of them from over there I think went clear into the basin before they culled them.

Q. There was no law then in the State of Mississippi, nor was there any regulation of the board of supervisors in regard to the culling on the reefs?

A. I think not. If there was I knew nothing about it.

Q. If there was it was not enforced was it?

A. Not strictly. Certainly not.

Q. Now were not these marsh lands of which you have testified in your examination in chief almost universally called the Louisiana marshes?

A. Well I would not know how to answer you on that. I have heard them called both by different parties.

Q. Now is it not a fact that the most of the fishermen of the Creole and French descent call them the Grand marshes, or Great marsh, and the American fishermen call them the Louisiana marshes?

A. No sir, as a general thing they were called the Louisiana marshes by the Spanish and Italians running to New Orleans, but as a rule here up until I suppose eight or ten years ago they were called the Grand marshes. I know when I first commenced I never heard it called Louisiana marsh until after this talk come from New Orleans about the time this Dunbar started a factory down about the French market.

Q. You don't know when it was that Dunbar started his factory near the French market?

A. No sir, I do not. I know that he had it there for two or three years and moved it to Bayou bridge.

Q. Was it not more than twenty years ago?

A. Yes sir, I think it was. I think it was more. Yes sir, I think it was. I think it was more than twenty years ago.

Q. Now Mr. Ritch, is it not a fact that the Mississippi fishermen along this coast only commenced going to these marshes after oysters, that is a large number of them, after the oyster fisheries and reefs of this neighborhood had begun to play out, and the canneries were established thereby causing a great demand?

A. Well I commenced long before there were any factories anywhere.

Q. But now I am asking you about the generality of the fishermen, and a large number of vessels that have been in the habit recently of going there. Is it not a fact that a large number of fishermen along this coast went to these marshes only after these reefs in this neighborhood began to play out, and there became a great demand from these canneries?

A. No sir, I think not. I think after the factory originated they

began to go to the marshes directly. They did not bother with the reefs around here as the oysters were never as valuable.

Q. That is because the canneries created such a demand that these neighboring reefs were not able to supply them?

A. To a certain extent that was not the cause. They would not get the oysters as fast as they could get them out of the Grand marsh, and the consequence is that they went there because they got them faster.

Q. They could not get them in the quantities?

A. They did not require near the time.

1550 Q. Nor the quantity.

A. It was not necessary about the quantity, because you go back on the north side of Cat island and there were plenty of oysters there.

Q. Now you have testified about going through this marsh with a vessel drawing four and a half feet of water. What would have to be the condition of the tide for you to get through with a vessel of that draft?

A. It would depend upon where we wanted to go.

Q. Well I am now speaking of the route that you have spoken of?

A. If you were at Karako and wanted to go to Chimney bayou, and you would want to go through Three Mile bayou you would have to wait for the high tide.

Q. How much water is there as a general thing in low water?

A. I could not really answer. I would judge about three or three and a half feet. Through these marshes there are mud flats and that is where this shoal water is. Almost all of the marshes have mud flats.

Q. Would not you stick on these mud flats if you attempted to go through there in low water?

A. Yes sir, as a rule. Even in high water. That is because we don't keep in the channel. You get out of the channel if you don't keep a sounding pole.

Q. If you grounded you would have to heave your vessel off with a windlass?

A. As a rule we could do it better with the anchor. Pulling the anchor back.

Q. You would have to drag through the mud would not you?

A. Yes sir, that is on the shoal places in the bays. If you hit the tides of course there is water enough there to float a dozen vessels.

Q. You never heard anything about this 18 mile limit of Mississippi until very recently?

A. Oh I heard that before I quit oystering.

Q. When did you quit oystering?

A. It was about eight years ago. I suppose maybe it was 12 or 15 years since that first originated here. I heard so much talk of it that I do not know when I first heard it.

Q. You never examined the acts of Congress admitting these States did you?

A. No sir.

Q. And all that you have heard is rumor and talk?

A. Just the talk among the people.

Q. Do you know where the deep water channel lies to the north of the coast line of these marshes?

A. That is about where it went along there. Our boats were small and did not draw much water. We did not look for the channel directly. We went anywhere as long as we kept off of the keys.

Q. Now the vessels drawing more water than your vessel took this deep water channel did not they?

A. If they were this side of Cat island they did yes sir.

Q. How close to the Mississippi line did this channel approach the main land. Did it approach the mouth of East Pearl river do you know?

A. No sir, down there by Heron Bay point it is close. I don't think that it is over a half a mile or possibly not that far. It comes in off Pass Christian I would judge anywhere about ten or twelve miles.

Q. Do you know the islands that lie between the north coast of this marsh and the Mississippi land. Mississippi main land?

1551 A. Which do you mean.

Q. The islands. St. Joseph and Grand isle?

A. I never have been there nothing more than passed by them. I fished no oysters in that neighborhood at all.

Q. Do you know whether Half Moon island and Grassy island and Round island and St. Joseph lie south of this deep water channel?

A. Well I know that they lie south of it, but the distance I could not state.

Q. During the time that you have been engaged in travelling these waters have you noticed any change in these islands

A. No sir, I never have noticed any, but as I stated to you I have not been ashore there.

Q. I mean from observation?

A. No sir, I would not have noticed it if there had been.

Q. Is it not a fact that St. Joseph has disappeared and Round island has disappeared?

A. If it has it has since I quit boating.

Q. Now about the appearance to the entrance to these marshes. What change if any has taken place in the mouth of Three Mile bayou. Has not it widened very much?

A. I don't think that it has. Not while I was running there. They tell me that it is wider now than it was before the 1893 gale, but I have not been running down there to see.

Q. How is it in regard to the Jones or Johnson bayou?

A. I never went through Johnson bayou.

Q. How is it in regard to Nine Mile bayou?

A. Nine Mile bayou is the place where we go through in going to w Orleans. I have never seen any difference while I was run- g there.

Q. How is it in regard to Grand pass.

A. Grand pass has not widened any I don't think. If it has it ery little.

Q. Now how is it in regard to Creole gap?

A. The north mouth of Creole gap has widened a little since I t commenced running down there. Up to the time I quit.

Q. Did you state in your testimony in chief that you considered e marsh territory as being in Mississippi?

A. No sir, I did not. I told you that I did not know where it s.

Q. You did not know where it was. How far south did you fish?

A. As far as Martin island.

Q. Have you ever been in American bay?

A. No sir, not as far as American bay. I have been further down re but I don't know the names of the bayous.

Q. Have you ever been in California bay?

A. I never have been in California bay.

Q. Were you freighting oysters there?

A. I never freighted any at all.

Q. Have you ever been down in Quarantine bay?

A. No sir, if I did it was only on a cruise. I did not know the ne of it. Four or five or a half a dozen times I have been ing around looking.

Q. Now about the entrance to these different bays. I understood u to say that the mouth had been a good deal changed?

A. Creole gap at the north mouth. Not the south mouth.

Q. How about Three Mile bayou and Nine Mile bayou?

A. We never bothered about them at all. Unless you got on a bar there was plenty of water. Unless you got on a mud flat.

52 Q. Do you know whether the coast line there has been partially washed away?

A. No sir, nothing more possibly than some little point. A point y wash away and then it accumulates right near it. You could ice these little things by the points being there that is all. Where er there is a wash the sea is liable to cut off the point that way. ere it is very narrow.

Q. What was the year about when you first commenced fishing the marsh?

A. About 1870 or possibly 1871.

Q. Do you know what time these canneries were established here ng the coast?

A. I don't know what year.

Q. About. I did not ask you to be certain?

A. I judge that it was about 1886 or 1887 or some where in there. on't know the year though. I am not no ways certain about the ar. I did not pay much attention to it.

Redirect examination.

By Gen. McCLURG:

Q. You have been asked about this deep water channel Captain. Tell us whether you have any personal knowledge or information of any kind of that channel ever being the line dividing the State of Louisiana from the State of Mississippi?

A. Well I have heard that here recently. I suppose in the last eight or ten years, six or five years maybe. I would not say how long. I could say that it was since the time I quit running or about the time I quit running.

Q. That is not since this suit started is it?

A. It is since the controversy started. I won't say the suit. But since there has been so much talk about it. It has been since then.

Q. And before that time what did you know of it?

A. I suppose that it is 14 or 15 years ago that Alabama passed an oyster law prohibiting other boats from coming in there, and about that time there was talk about stopping the Alabama boats from coming here fishing, and then I heard that they claimed that they had 18 miles running due south.

Q. Was it then that you first heard that the Mississippi line run 18 miles from the shore south?

A. As I remember it.

Q. These places that we have been talking about, the Grand marsh, are within that 18 mile limit?

A. Well I have heard that they were. That is as far down as Brush island.

Q. You know how far the 18 miles is and you think it extends down about Brush island?

A. Yes sir, some where in that neighborhood.

1553 PETER ANGLADA, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. How old are you sir?

A. 40 years old.

Q. Where do you live?

A. Biloxi.

Q. How long have you lived here?

A. All of my life.

Q. What is your business?

A. Boating.

Q. What sort of a boat?

A. Well I first run lumber to New Orleans and then I was in the oyster business after that.

Q. How long have you done boating between New Orleans and Biloxi?

A. Do you mean in the oyster business?
Q. In any business?
A. Since I was a boy ten years old.
Q. You know the water pretty well between New Orleans and loxi?
A. Yes sir.
Q. When did you first go in the oyster business?
A. About 13 years ago.
Q. Are you still in that business?
A. Yes sir.
Q. Where have you been taking oysters in the last 13 years?
A. We have been taking them in the Grand banks, and then we ve been taking them in the Grand marsh out here.
A. Through Three Mile bayou and southward as far as American y in places.
Q. How did you go?
A. Down through the marsh.
Q. In what sort of a boat were you?
A. In a boat drawing four feet of water loaded.
Q. Down through Three Mile bayou in a loaded boat?
A. Going through there you would have to take the tide, and I ould load it to about three and a half feet.
Q. That is in what part of the Grand marsh that you fished sters?
A. Well I fished in Indian Mound and Drum bay and Creole gap nd Grand pass and all of them.
Q. What State were you in when you were fishing there. Louisi-na or Mississippi?
A. Well as far out as the west part of Drum bay I thought that I as in Mississippi all of the time.
Q. Why did you think you were in Mississippi?
A. My old father told me that the dividing line was Pearl river nd that it run 18 miles south, so I always thought that.
Q. Is your father living?
A. No sir.
Q. When did he die?
A. 12 years ago.
Q. How old was he when he died?
A. 63.
Q. How long did he live here?
A. He had been in this country since he was a boy 15 years old.
Q. So that he had been here nearly fifty years before had he?
554 A. Yes sir.
Q. Did he live here at Biloxi?
A. Yes sir.
Q. State whether or not you have noticed any change of any kind n the width of these bayous since you first went in there?

A. Mighty little from what I can see. There is mighty little change any where.

Q. Have you noticed any changes in the islands. Where there has been any subsidence?

A. No sir, not much at all.

Q. You know where Grand pass is?

A. Yes sir.

Q. Creole gap?

A. Yes sir.

Q. Nine Mile bayou?

A. Yes sir.

Q. Three Mile bayou?

A. Yes sir.

Q. Johnson bayou?

A. Yes sir.

Q. And all of these places?

A. Yes sir.

Q. You have noticed no material changes there?

A. No sir, what ever there is you can not see it at all.

Q. Have you ever been out on these grounds?

A. Yes sir, often.

Q. Did you ever find any musk rats in this country?

A. No sir.

Q. Do these islands at Grand marsh go under at high tide?

A. It has got to be a mighty high tide for them to go under.

Q. What have they called these marshes since you have known them?

A. Well as far as I have known them they have always called them Mississippi.

Q. The Mississippi marshes?

A. Yes sir, Grand marsh generally, but they always claimed that they were in Mississippi when I come there.

Q. Did you ever hear it called the Louisiana marsh?

A. Just since this last law started.

Q. Have you paid any license?

A. The last two years?

Q. Have you paid any license to Louisiana in the last two years?

A. No sir.

Q. To Mississippi?

A. Yes sir.

Q. It is just the last two years that you have been taxed?

A. Yes sir, that is all.

Q. Have many Mississippi boats been going down there to your knowledge?

A. Yes sir, there have been a good many going in there.

Q. Since the building of the canneries the fishermen have increased in numbers?

A. Yes sir, the most of the small boats go in there yes sir.

Q. Do you know of any offenses or crimes being committed down here?

A. No sir.

Q. Were you fishing in there when Kennedy was drowned?

A. No sir.

555 Q. That is before you began?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. When did you first commence fishing in this marsh?

A. 12 or 13 or 14 years ago. I suppose. Something like that.

Q. Well now is it not a fact that at that time a large majority of the fishermen that fished in that territory called it the Louisiana marshes and regarded it as a part of the parish of St. Bernard?

A. I don't know, but as far as I went we used to claim——

Q. I am not speaking about what you used to claim. I am speaking about what this territory was called. Did not you call it the Louisiana marshes?

A. No sir, we always called it the Grand marsh.

Q. You said that you called it the Mississippi marsh did not you?

A. We called it the Mississippi marsh as far as that went. The Mississippi shore.

Q. You say that you learned this from your father about the 18 mile limit?

A. Yes sir.

Q. When did you learn this from your father?

A. When I was a boy running on schooners with him.

Q. How did your father come to speak to you about it?

A. Just like a father will speak to any other child.

Q. How did you come to get on this particular topic?

A. When we would get there he would say "Now we are in Mississippi." We would get to Pearl river and he would say "We are on Mississippi ground again."

Q. Did he say anything to you about it extending 18 miles south?

A. Yes sir.

Q. Well now is it not a fact that there has never been any talk or discussion about the 18 mile limit of Mississippi until recently. Since this controversy arose?

A. No sir, he is the only one that told us about that. I never heard any more since.

Q. He was very particular in telling you that the Mississippi boundary extended 18 miles to the south?

A. That is what he always told us that he heard.

Q. You spoke about taking out a license for fishing?

A. Yes sir.

Q. From whom did you get this license?

A. I got them here in Gulfport.

Q. Did you ever take out any license from the Louisiana authorities?

A. No sir. I never have.

Q. When did you take out a license from the authorities in Mississippi?

A. Last year before this year.

Q. When did you first commence to fish in this marsh?

A. About 12 or 13 years ago.

Q. Have you taken the trouble to pay any attention par-
1556 ticularly to the widening of the mouths of any of these bayous?

A. Well if they are widening it is so little that you can not tell it.

Q. How is it about Creole gap. Has there been any widening there?

A. What widening there is is so little that you can not hardly notice it. It looks like it is about the same thing.

Q. Is it not a fact that you never paid any particular notice. That all that was concerning you was whether or not you could get through there in a boat?

A. You can not help but notice if you are beating up and down there all day long. You are bound to notice.

Q. How about Grand pass. Has it widened any?

A. Yes sir, at the mouth it is widening a little yes sir.

Q. Is it not a fact that it has nearly doubled in width in the last twenty years. Fifteen or twenty years?

A. Well I could not answer you that. I was not running there 15 or 20 years ago.

Q. Is it not a fact that there have been great changes along this coast largely caused by the storm of 1893?

A. Well no sir, not so much.

Q. But there have been some changes?

A. Yes sir, but some were so little that you could hardly notice them.

Q. How about the deepening of the mouths there. Has there been any?

A. No sir, none that I could see.

Q. Did you ever sound to ascertain whether that is true or not?

A. You don't need to sound much. The boat will sound for you.

Q. You always had plenty of water in going through there?

A. Not all of the time. Different places you would get into it.

Q. Going into any of these passes what would the depth of the water generally be. How about Three Mile bayou?

A. Three Mile bayou has plenty of water at the mouth as you go in there.

Q. Was there plenty of water there when you first went there?

A. Yes sir, and there is plenty of water now.

Q. How about Nine Mile bayou?

A. There is plenty of water there too.
Q. I am speaking of at the time that you went in there?
A. There is a right smart of water at the north mouth, but at the south mouth there is not so much.
Q. How about Johnsons bayou?
A. I never have been through there.
Q. How about Turkey bayou?
A. I suppose there was 12 or 14 feet in there.
Q. When you first went in there?
A. Yes sir.
Q. How about Creole gap?
A. When I first went in there there was about three or three and a half feet of water.
Q. What is there now?
A. There is about the same now I suppose.
Q. How about Grand pass?
A. Grand pass has plenty of water at the north mouth but not so much at the south mouth.
Q. Has there been always the same kind of water there since you first knew it?
1557 A. Yes sir.
Q. How about the widening of Creole gap. Has it widened much?
A. No sir, it is about the same thing.
Q. How about the widening of Grand pass?
A. Only at the north mouth it is opened up a little wider.
Q. How much wider do you suppose?
A. It is so little that you could not hardly tell.
Q. How far to the southward have you fished?
A. As far as American bay.
Q. Have you fished at Martin island?
A. No sir, not oysters.
Q. Have you fished in Quarantine bay?
A. No sir.
Q. Well you have regarded American bay as within the 18 mile limit?
A. No sir.
Q. How far do you consider that the 18 mile limit of Mississippi extends?
A. To the west of Drum bay.
Q. I have forgotten, but did you testify that you had passed through these marshes in a boat?
A. Yes sir.
Q. Which way. Going from north to south or from south to north?
A. Either way.
Q. What does your boat draw?
A. Light two and a half feet. Loaded four feet.

Q. Did you experience any difficulty in going through there. Did you run on any mud flats?

A. You can not help but run on the mud flats.

Q. How was the tide when you went through there?

A. You can not go through there at all with a low tide.

Q. Then you have to go through there with a high tide?

A. Yes sir.

Q. Well then in going through with a high tide don't you run from time to time on mud flats?

A. Yes sir, you can not help running on them. You have to run on them.

Q. How do you manage when you get on them?

A. You have to wait for the tide to get you off.

Q. Do not you at times heave her off *a* with a windlass and a rope?

A. No sir, but a good many times we would lighten our boat up.

Q. Well you had to force her through these mud flats did not you?

A. Yes sir.

Q. Do you know where the deep water channel is lying close to the Mississippi coast to the northwards of this territory?

A. What they call the Cat Island channel?

Q. Yes sir?

A. Yes sir, pretty well I suppose.

Q. That is the channel that vessels of deeper draft follow?

A. Yes sir.

Q. How close to the Mississippi main land does this channel run as you approach the mouth of East Pearl river?

A. I suppose at the mouth of East Pearl river that you can go in about a mile from there.

Q. Do you know the islands known as the St. Joseph and Grassy and Half Moon and Round islands?

A. Yes sir.

1558 Q. How does this deep water channel run in regard to these islands. North or south of them?

A. It passes to the north of them all but St. Joseph.

Q. Do you know what changes have taken place in recent years in St. Joseph island?

A. That has been washed down a little.

Q. Has it not disappeared?

A. There was a little lump of marsh there about the size of this building, but it is gone now.

Q. How about Round island?

A. That is washed away and left a lump of shells there?

Q. Can this lump of shells be seen at any time except in low water?

A. In ordinary tide you can see it yes sir.

Q. How about Half Moon island?

A. There is no change at all there that I can see.

Q. None of it has been washed away?
A. No sir, none that I can see.
Q. Did you ever go ashore on these islands to make any observations?
A. Yes sir, I have been ashore often.
Q. Now is it not a fact that since this suit has been instituted that you fishermen have gotten together and agreed on this subject of calling this marsh the Grand marsh and Mississippi marsh?
A. Well no sir, I don't think we have. We always did call it the Grand marsh. Just those Dagoes and Cicilians from New Orleans called it the Louisiana marsh.
Q. Now is it not a fact that ten or twelve years ago if you would come along here and ask these people, who are supplying these canneries, or where did you get these oysters from, they would invariably reply that they got them from the Louisiana marshes?
A. No sir, not I. We always called them the Grand marshes.
Q. Suppose I would tell you that I have asked the question over and over again and had only gotten that reply, would you say that I was mistaken?
A. Yes sir, I believe you would be, because if you were to send me to Louisiana I would go out to the southward.
Q. Are you still engaged in the oyster trade?
A. Yes sir.
Q. To whom do you supply oysters?
A. To the factory and to the raw oyster dealers.
Q. What is the bulk of your trade?
A. The bulk of my trade is raw oysters.
Q. You supply a very large quantity of these canneries and factories don't you?
A. Yes sir, at times.
Q. Well you feel a peculiar interest in having this territory declared to be Mississippi territory don't you?
A. Well no more than what it is.
Q. If it was declared to be Louisiana territory you would be shut out from getting oysters?
A. No sir, not at all.
Q. Why?
A. Because I could get them elsewhere. Where we are getting them now.
1559 Q. Where have you been getting them?
A. All around St. Joseph and other places.
Q. Are there many oysters down around St. Joseph and those islands?
A. I have worked there all of the winter.
Q. Why did you care to go to the marshes?
A. I did not care about it. I could have taken to Louisiana and gone there if I had wanted to.
Q. It is a fact that you have not been fishing in the marshes recently?

A. No sir, not for the last two years.
Q. How did you happen to be summoned here as a witness?
A. I don't know sir. I was at supper last night when they summoned me.
Q. Were you told what you were wanted for. To testify to?
A. No sir, I did not know anything about it at all.
Q. Nobody has been talking to you about this being Grand marsh?
A. No sir.
Q. Then your belief and opinion is that if the fishermen were shut out from fishing in these marshes it would have no effect on the supply for the canneries?
A. No sir, I reckon not.
Q. You could get just as many oysters elsewhere as you are getting from Grand marsh?
A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. You were asked by counsel for Louisiana whether the fishermen and oystermen had not gotten together since this suit and agreed to call that the Grand marsh, and you were also asked whether you had not been groomed in this case?
A. Yes sir.
Q. Do you know of any instance where any of the witnesses on the part of the State of Mississippi has been instructed and told what to testify to?
A. No sir.
Q. You have no knowledge of any thing of that sort?
A. No sir.
Q. If you hear of any thing of that sort I wish you would please let us know?
A. If I was told to I would not be bought in so easy.

CLEMENT COX, a witness on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. How old are you Mr. Cox?
A. 57.
Q. Where do you live?
A. Biloxi.
Q. How long have you live there?
A. I have lived there since 1881.
Q. What is your present occupation?
1560 A. Oystering.
Q. How long have you been in that business?
A. Ever since I have been here. Since 1881.

Q. Where have you been getting your oysters?
A. Out here in Cat island and in different places in the marsh.
Q. What places in the marsh?
A. Well I have fished from American harbour, and I have fished a little to the southward of Kaliko bay.
Q. Are those places south of Drum bay?
A. Yes sir.
Q. Have you fished any in Drum bay?
A. Yes sir.
Q. What is that bay. Kaliko bay?
A. Foggy bay is the English of it. That is the English name.
Q. You have fished in Drum bay?
A. Yes sir.
Q. And the Karakos?
A. Yes sir.
Q. Are you familiar with Grand pass?
A. Yes sir.
Q. And the island called Isle à Pitre?
A. Yes sir.
Q. Do you know about Turkey bayou?
A. Yes sir.
Q. And Johnson bayou?
A. Yes sir.
Q. And Three Mile and Nine Mile bayou?
A. Yes sir. I never fished in these bayous but Turkey bayou, but I know all of these places.
Q. Have you ever gone through them?
A. No sir, I never went through them. I only went to the mouths of them.
Q. When did you first go into the mouths of these bayous?
A. I could not hardly tell, it has been so long, I was cruising along this coast. Not more than 15 or 18 years ago.
Q. When did you last enter along these bayous. Between Nine Mile bayou and Crane Town bayou?
A. I was down there this winter. That is through Three Mile bayou and the Karakoes.
Q. Have you ever noticed any material change in these bayous since you first went there and if so I wish you would please tell us what it is?
A. None in particular. Some of the points are washed a little, but I don't know any difference in the channels.
Q. Have you noticed any material change in that part of the Grand marsh where you have been fishing?
A. No sir.
Q. Have you noticed the sinking of any hills or the lowering of any hills?
A. No sir, unless it was a place cut off from a point and washed away. That is all.

Q. Where is the line as you understand it. The boundary line that divides the States of Louisiana and Mississippi?

A. It is Pearl river I have always heard.

Q. Do you know what the water line of Mississippi is. How far it extends to the southward from Pearl river?

1561 A. 18 miles I believe due south from Pearl river.

Q. How long have you understood that to be the line Captain?

A. About 12 years ago. This talk came up about Louisiana and Mississippi and this controversy, and there was some talk of Louisiana passing a law to cut us off there. I said then that it did not hurt us any.

Q. I believe that the line between Mississippi and Alabama now gets Petit Bois island in it?

A. Yes sir.

Q. It extends 18 miles out from the shore?

A. Yes sir.

Q. From the mouth of the river?

A. It goes down here to the Grand Matua island. East Grand bay is in Alabama and West Grand bay is in Mississippi.

Q. How far is that from the shore. That is between Petit Bois and the shore is it?

A. Yes sir, it is between Petit Bois and the shore. It is a low island, and I guess that it is about seven miles or some where along there.

Q. Can you say whether Isle à Pitre and Grand pass and the mouth of Johnson and Turkey and Three and Nine Mile bayous. Whether they are within the 18 miles of the Mississippi shore?

A. Yes sir.

Q. I believe you stated you know where Karako bay was?

A. Yes sir.

Q. And that is within 18 miles of the Mississippi shore?

A. As near as I could judge they ought to be.

Q. Do you know where Brush island is?

A. Yes sir.

Q. How — is it. How far is it from the Mississippi shore?

A. I don't think that it is over 18 miles.

Q. About how far is Drum bay?

A. It is about the same. It is very near in the line. I don't think that it is much over it.

Q. Do you know where Indian Mound bay is?

A. Yes sir.

Q. What distance is it from there to the mouth of Pearl river?

A. It is very near in the line as near as I can judge.

Cross-examination.

By Col. ZACHARIE:

Q. I think you stated you just came to Biloxi in 1881 to engage in the oyster fishery?

A. Yes sir.

Q. Do you remember what time these canneries were established here?

A. I think in 1881. The first I think at Back bay and then this one of Lopez in 1884.

Q. When you commenced oystering to whom were you delivering your oysters?

A. To Lopez and Elmer and Ducate and Macot.

Q. Those are all canneries here?

A. Yes sir.

Q. You have since that been taking your oysters to these different canneries?

A. Yes sir, first one and then the other.

Q. You are still delivering the oysters to them?

1562 A. Yes sir.

Q. I think you said when you spoke of the mouths of these different bayous and the passes going into this Grand marsh, that you had never gone through them into the interior of the marsh?

A. Yes sir, Three Mile bayou and Nine Mile bayous I went through them. I was through that this winter.

Q. How far did you go?

A. I did not go any further than Karako bay this winter. I worked up to the marsh until Christmas.

Q. You went to Karako through Three Mile bayou?

A. Yes sir.

Q. How far to the southward did you go past Nine Mile bayou?

A. You mean going right on through?

Q. How far did you go?

A. This winter?

Q. At any time?

A. I have been down to Pointe à la Hache.

Q. How far did you fish to the south at any time. The most southward point?

A. To run any length of time Kaliko bay.

Q. Did you ever fish in American bay?

A. No sir.

Q. Did you ever fish in Quarantine bay?

A. No sir.

Q. Did you ever take out a license from either Louisiana or Mississippi to fish?

A. Yes sir.

Q. From what authorities and what State?

A. For the last two years from Louisiana.

Q. From Louisiana?

A. Yes sir, about ten years ago, I guess that it was some where about eight or ten, I am not sure, I had to take out a license from Mississippi.

Q. Why did you take out the license from Louisiana?

A. Why they compelled us to do it.

Q. Because as they claimed you were going to fish in Louisiana waters. Is that the reason?

A. Yes sir, they claimed it, but we were never bothered before that. I worked in the marsh all of the time but I was never bothered up to the last two years.

Q. You never heard the boundary line discusses in any way, did you, prior to the time that this controversy arose?

A. Yes sir, when this Alabama controversy come up.

Q. About what year was this?

A. That was about ten or twelve years ago I think.

Q. Now is it not a fact that this marsh territory that we have been speaking of had been generally known as and called the Louisiana marshes?

A. Some call it one thing and some another.

Q. I am talking of the fishermen generally there?

A. I have heard as many call it Grand marsh as I did any thing else.

Q. There are a considerable number that call it Louisiana marsh?

A. It is the same thing about the boundary. Louisiana claims one thing and Mississippi another. Some claim this is Grand marsh and some claim it is Louisiana marsh.

Q. Is it not a fact that a large number of the Mississippi fishermen have called this territory the Louisiana marshes?

A. Well they might call it that way.

Q. I am not asking you what they might call it. I am asking you the fact. Have not they called it that way?

1563 A. I have heard as many call it Grand marsh.

Q. Just as many called it Louisiana marsh as called it Grand marsh?

A. As near as I can recollect.

Q. You have never consulted the acts admitting the State of Mississippi and the State of Louisiana as to the location of the boundary?

A. No sir.

Q. You have never examined any of the records of the U. S. land office in this territory?

A. No sir.

Q. You have merely heard the talk going about between the fishermen. Is that the extent of your knowledge?

A. Yes sir, that is all.

Q. Now in regard to the changes in this territory. Have you paid any particular attention to any of the changes if there have been any since the great storm in 1893?

A. No sir, maybe some of the points are washed away a little.

Q. Have you ever noticed whether the openings and the mouths and so on of these different bayous have widened?

A. Well if it has it has been a mighty little. I don't see any difference in them.

Q. Now say taking Creole gap. Has there been any change there?

A. That is about the same.

Q. Have you ever noticed any difference in the depth of the water in any of these passes or mouths?

A. Right in the mouths. Of course what they call the gap there has been plenty of water, but as soon as you get over that and get into the bay there is no difference at all.

Q. Now in going from the north to the south side of this territory, in what depth of vessels have you gone through here?

A. Well loaded it is about three and a half feet.

Q. What has been the condition in the tides when you would pass through there. Has it been in high water or low water?

A. Yes sir, you have to have a high tide.

Q. And in going through there even at high tide. Did not you then run upon shallow mud flats?

A. You have to be mighty particular if you do not.

Q. Don't you very often find yourself aground on these mud flats?

A. Yes sir.

Q. And is it not necessary for you to heave your vessel off through the mud and force it through the mud and drag her through the mud?

A. Yes sir.

Q. Have you ever fished in the neighborhood of Martin island?

A. Yes sir, but there are no oysters there now. There used to be some there.

Q. Do you consider that within the 18 mile limit?

A. Yes sir, that ought to take that in.

Q. Do you know where the deep water channel is in the territory between the north side of these marshes and the Mississippi main land?

A. Yes sir.

Q. As you approach the mouth of East Pearl river how close does *does* this deep water channel run to the Mississippi shore?

A. Well in Heron bay there and St. Joseph I don't think that it is over a quarter. Maybe it is a little more. Between a quarter and a half.

Q. Do you know where St. Joseph island is?

A. Yes sir.

Q. Do you know Grassy island?

1564 A. Yes sir.

Q. Half Moon island?

A. Yes sir.

Q. Round island?

A. Yes sir.

Q. What change if any has taken place in regard to St. Joseph island?

A. St. Joseph island has washed.

Q. Washed entirely away?

A. Well at common tide you can see the lump.

Q. How about Round island?

A. It is washed. There is a little shoal keys there: You can see it in an ordinary tide there.

Q. In regard to Half Moon and Grassy island- what change if any has taken place?

A. I cannot see that there is any there.

Q. Have you been ashore on these islands?

A. Yes sir.

Q. Have you paid any attention to any changes?

A. I could not see that there were any changes at all.

Q. Now the shore line along the north shore of these marshes. Is not the shore line washed away in a good many places?

A. Well it may have washed away a little but it is not very much. I cannot see that it has washed away so much.

Q. In regard to this deep water channel. It runs from the mouth of East Pearl river does not it to the eastward, until it passes the Marianne island and then branches off to the south east does not it towards Cat island?

A. Yes sir.

Q. Do you know the Marianne islands?

A. Well there is no island there. It is just a reef.

Q. Were not there islands there when you first commenced?

A. The shoal keys were there. They were out of the water.

Q. What is there now?

A. There is Pelican and Red Fish keys. They are out of the water all of the time unless it is a storm tide.

Q. A storm flood you mean?

A. Yes sir, and it floods all of this around here.

The commission here took a recess until two o'clock.

At two o'clock the commission resumed its hearing of the testimony as follows:—

WILMER MATHIEU, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

Q. How old are you Mr. Mathieu?

A. I am 43.

Q. Where do you live?

A. I live here in Biloxi.

Q. How long have you been living here?

A. I have been living here since 1878.

Q. What has been your occupation since 1878?
A. Oystering principally.
Q. Where have you been engaged in the oyster business?
A. In the Grand marsh and out in the sound.
Q. Are you familiar with the waters between here and Pearl river?
A. Yes sir.
Q. And with the Grand marsh?
A. Yes sir.
Q. Tell us please sir the different places in the Grand marsh
t you are familiar with and have visited?
A. Creole gap and Grand pass and Three Mile bayou, Bayou
ndreaux and Cranetown, and Martin island and American harbor.
you want me to name them clear on down to the Mississippi
er?
Q. No sir?
A. I can name them all down to the river if you want me.
Q. Were you ever in Drum bay?
A. Yes sir.
Q. Well now about how far is it from Drum bay to the Missis-
pi shore on a due north line?
A. Well I could not say exactly, but about 18 or 20 miles to go
a due north line.
Q. Then you were in that part of Grand marsh north of Drum
y, and there about Southwest pass. In what State were you then.
uisiana or Mississippi?
A. I thought that I was in Mississippi.
Q. Why did you think that you were in Mississippi?
A. Well because I considered the line and I have always heard
at the line — 18 miles south.
Q. South of what?
A. Of Pearl river.
Q. You know where Pearl river empties into Lake Borgne do
u?
A. Yes sir.
Q. Have you ever been through Nine Mile bayou?
A. Yes sir.
Q. Three Mile bayou?
A. Yes sir.
Q. Johnsons bayou?
A. Yes sir.
Q. Turkey bayou?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Creole gap?
A. Yes sir.
Q. And down through these waters that you have spoken of
while ago?
A. Yes sir.

Q. What sort of a boat have you been down there in?

A. Well I have been on different kinds. I have been on some drawing as high as five and a half feet loaded and on some two and a half feet loaded.

Q. Were you ever disturbed by Louisianans or any one else while you were in there?

A. No sir.

Q. You brought your oysters out of there to what point?

A. Biloxi. Scranton and Mobile.

Q. How long have you been doing that?

A. 22 or 25 years, except this last year or two that this law come up prohibiting us from going in there.

Q. Have you noticed any material changes in the widths of any of these bayous that I mentioned awhile ago since you have been going in there?

A. Three Mile bayou has cut a little but in the others I don't see any difference.

1566 Q. Tell us whether or not there has been any change in the general configuration of these islands between the time you first saw them and the last time you saw them?

A. Well there is one island on the outside that they call Sundown that is cut into. Some body cut it with a spade I think, in the narrow portion and widened it out. They made two islands instead of one there. There is no other change that I can see except that has been cut out with a spade in order to get into the bay or some thing instead of going around, and then when the current comes through there it will open it wider.

Q. That is the case with Creole gap is not it?

A. They claim that that was cut with a spade.

Q. Have you ever been out of the water on the top of any of these islands there in the last twenty-three years?

A. Yes sir, lots of times.

Q. Mention some of them?

A. I have been on Martin island and Brush island, and Mitchell island and Sam Holmes island, and Mud Grass island and Raccoon island.

Q. Do I understand you to mean that you have been on them at different times in the last 23 years?

A. Yes sir.

Q. Have you ever seen any musk rats on them?

A. Yes sir, plenty of them. I have seen great big rats. I don't know whether they were musk rats or not.

Q. Where did you see them?

A. On the shore. In the drift in the marshes.

Q. In what portions of these islands did you see them?

A. About 15 or 20 feet from the water, where the stuff drifts up there and makes a pile of rubbish there from these overflows. That is where I have seen them.

Q. Where you have seen these rats have you observed any ma-

rial change in the shore line different from any other portions of
e marsh?
A. No sir.
Q. Now you state that you had been in there with boats that would
raw about five feet of water loaded?
A. Yes sir, five and a half feet.
Q. Tell me what places you could travel in the marsh in a boat
rawing five feet of water?
A. Well we ran out of Moran harbor. There is a channel that
omes up there with not over nine or ten feet of water in it, and I
ould go up there and load and come out again.
Q. How about Grand pass?
A. Yes sir, you can go in there drawing any amount of water.
Q. How about Nine Mile bayou?
A. There is plenty of water in there.
Q. That is about the deepest one of these bayous is it?
A. Yes sir, Three Mile is about the deepest.
Q. 23 years ago could you go from Brush island and Door point
p into the Grand Marsh and come out of Three Mile bayou?
A. Yes sir.
Q. In your boat?
A. Yes sir certainly.
Q. Could you go up there and come out of Nine Mile bayou?
A. Yes sir, any of these points.
Q. Was there much traveling through this route by boatmen?
A. Yes sir.
Q. How much draft could you take up through this route?
567 A. Well if you were drawing four feet of water you had to be governed by the tide. If it was in low tide you had to stop n some places or you would go aground, and when the tide rose ou could go on across the mud flats. You could draw four or four nd a half feet.
Q. So that at certain times of the tide you could make these trips hrough there?
A. Yes sir.
Q. Were you ever down in Treasure bay. Bayou Tresor?
A. Yes sir.
Q. You say that that is within 18 miles of the Mississippi?
A. Yes sir, it is inside of Mississippi.
Q. You have seen St. Joseph and Brush islands there near Pearl river?
A. Yes sir.
Q. Some of them have been washed have not they?
A. Yes sir, some of them.
Q. Have you ever been required to take out a license there from Mississippi or Louisiana to fish in there?
A. I never did take out any no sir.

Cross-examination.

By Col. ZACHARIE:

Q. You said that you had been in the oyster business for about 23 years?

A. Yes sir.

Q. Is it not a fact that these marshes of which you have spoken are generally known as the Louisiana marshes?

A. No sir, Grand marsh is what we always called it.

Q. You did, but I am asking you as a general thing among the fishermen. Have not they been known as the Louisiana marshes, and have you not heard them called that often?

A. I have heard them called the Louisiana marshes.

Q. Since when have you known them to be called the Grand marshes?

A. Ever since I have been going out there we called them the Grand marshes.

Q. You say that you have always heard of the Mississippi line or limit as extending 18 miles south. When did you hear that?

A. Time and again I have heard that it ran out there. We would inquire of different people that I thought knew more than I did myself, as to how far the line of Mississippi run and they would say it run 18 miles south and then turned up east.

Q. What was your reason for inquiring that?

A. I did not have any particular reason. I just wanted to see where it was out of curiosity.

Q. You have never examined the acts of Congress have you in regard to the boundaries of the two States?

A. No sir.

Q. Then you know nothing about this boundary question except what you have heard by rumor and general talk?

A. That is all.

Q. Now is it not a matter of fact that that question has only been discussed for the last few years by the fishermen?

A. About the boundary line.

Q. Yes?

1568 A. Yes sir, it has been discussed among them about the boundary line, but they would always talk it among one another that the line of Mississippi run 18 miles south, and they would consider how far out they were and whether they were in Louisiana or Mississippi.

Q. Have you ever noticed what changes have been produced in this shore line and the mouths of these different bayous since the storm of 1893?

A. Three Mile bayou has been considerably. The mouth of Three Mile bayou.

Q. How is it with Creole gap? Has that not been enlarged to a considerable extent?

A. I have not seen any change.

Q. How is it with Grand pass?
A. I don't think Grand pass is either.
Q. You have spoken of a channel having been cut through Sun Down island with a spade. How long is that channel?
A. It is not a channel. It was cut through the island.
Q. Whatever you may call it. How far is it through there?
A. Well it is about, I suppose that it is 75 yards now.
Q. How long is it from side to side?
A. Well it is this way, just like two doors on each side and a little hole in the middle.
Q. It is through a neck there is it?
A. Yes sir.
Q. From one side of the island to the other how long is this neck?
A. It is 75 yards I think now.
Q. How do you know that it was cut with a spade?
A. I never saw the people cut it. I was told that it was cut with a spade. I have been around the island.
Q. Could that not have been cut with a big storm?
A. No sir, it was not cut in the big storm because I was out there afterwards. We go constantly around this island and I am very familiar with it. If there had been any change in it we would have noticed it right away.
Q. You spoke of the musk rats. You have seen a great many muskrats in that country?
A. I have seen rats, I don't know what kind they are.
Q. Do they not burrow in the ground?
A. They go under this drift.
Q. Don't they have entrances there so that they fish under water and go underground?
A. I don't know that.
Q. You have been over this territory on foot have not you?
A. Oh yes sir.
Q. You have gotten into these muskrat holes and had your feet to give away under you?
A. No sir, only in soft places. There are boggy places in the marshes. I never fell in no holes.
Q. About what did you say that these vessels drew that you went through the marshes with?
A. I used to be engaged in the trapping business and we would use a light draft vessel to go through there with because we would go through from one side to the other.
Q. About what draft would these vessels have?
A. About two feet.
Q. Could you go through over these mud flats in a vessel of this kind at low tide?
1569 A. No sir.
Q. If you did you would stick on the mud flats?
A. Yes sir.

Q. It was only in the highest tides that you could go through with vessels drawing four feet and over?

A. Yes sir, it would take a high tide. There would be some places that you could go and some you could not go.

Q. Did you ever notice at the mouths of any of these bayous whether it was deepening or not?

A. Well I did not notice.

Q. You never have sounded it?

A. No sir.

Q. I believe you stated that you knew these islands lying between the north coast of these marshes and the Mississippi main land?

A. Yes sir.

Q. Do you know St. Joseph island?

A. Yes sir.

Q. Do you know Half Moon and Grassy islands?

A. Yes sir.

Q. Do you know Round island?

A. Yes sir.

Q. What changes have taken place in St. Josephs island since you have known it?

A. I don't know any particular changes.

Q. Is it not a fact that St Joseph island has been washed away and the light house there since you have known it?

A. The old light house you mean?

Q. Yes sir.

A. Well if it has it has washed away since I last saw it.

Q. Is it not a fact that Round island has disappeared entirely?

A. Not to my knowledge it has not. I have not been there in a couple or three years.

Q. Is it not a fact that Half Moon is almost washed away?

A. Yes sir, it is washed some.

Q. To a considerable extent is it not?

A. Yes sir, it is washed.

Q. Do you know where the deep water channel is that is used by large vessels drawing considerable water?

A. Yes sir.

Q. Does not that channel run from the mouth of East Pearl river close to the Mississippi shore and to the northwards of these islands?

A. It does not run close to the shore.

Q. How far do you think it is from the deep water channel to the main land of Mississippi?

A. From what point?

Q. After you leave the mouth of East Pearl river going to the east?

—. ——.

Q. As much as that?

A. Yes sir.

Q. I mean near the mouth of East Pearl river going along just north of these islands?

A. It runs right close to the island there where it comes out of the river.

Q. I am speaking of how close to the main land of Mississippi. Is it or is it not a fact that it runs within a quarter or a half a mile of the main land there?

A. I don't know whether it does or not there. Coming through there *there* on large vessels they would stick right to the channel. When we went to St. Joseph we were right close to the channel.

1570 By Gen. McCLURG:

Q. How far were you then from the Mississippi shore. The main land?

A. I could not say how far.

Q. At St. Joseph or about St. Joseph?

A. I could not say how far it was. It looked like it was about a couple of miles from the main land.

By Col. ZACHARIE:

Q. Are you very sure that there have been no changes in 23 years in the coast line of these marshes?

A. Well the changes are in these cuts.

Q. Is that all the change. Is the coast not gradually wearing away. The waves undermining the soil and the crust dropping in?

A. Not that I can see.

Q. Do not you find along this coast that pieces of crust rolled up into balls, and places on the shore where it has undermined this crust?

A. Some times you see little pieces of dirt drifting along there that is washed off yes sir.

Q. What is your business now?

A. Oystering.

Q. To whom do you deliver these oysters. Are not you supplying these canneries and factories here?

A. Yes sir.

Q. That is your principal and main business?

A. Yes sir.

Q. You are dependant upon that for a livelihood are you not?

A. Yes sir.

Q. You have only engaged in this oyster business since these canneries were established?

A. No sir, before.

Q. What year was it that you commenced oystering?

A. Around 1878.

Q. Around 1878?

A. Yes sir, 1878, or 1879 or some where along there.

Q. You stated that you had been in the oyster business for 23 years?

A. About 23.

Q. If you commenced in 1878 it would be 26 or 27 years?

A. In 1878 was my first experience in the oyster business. I would cruise around on a boat and make two or three trips and quit then.

Q. You were not in the business?

A. No sir.

Q. You would go out with others?

A. I was working and they would give me some thing. I was young then.

Q. To whom did you sell your oysters?

A. To Mr. Fillmore and Mr. Desports and Mr. Elmer.

Q. That is they had places here for raw oysters?

A. Yes sir.

Q. Did you go out in the summer time?

A. Not for oysters. We would go out for bird eggs.

Q. You did not fish for oysters in the summer time?

A. No sir, I have not fished outside of a little for planting purposes in the summer time.

1571 Q. Is it not a fact that as a rule along this coast oysters were fished all through the summer during the spawning season. Were not all of these hotels and boarding houses and oyster shops etc., supplied with oysters all during the summer time?

A. Yes sir.

Q. Is it not a fact that these oystermen when they would get a load of oysters and a fair wind home, that they would not stop to cull on the banks but they would cull as they went along, or cull after they got home on the land?

A. No sir, they always stayed there and culled them. As far as I know they did.

Q. You had no law or regulation of the board of supervisors at that time of which you speak in regard to culling and fishing in the summer time?

A. No sir, the only law that we had was that if we did not cull them good a man would not buy them.

Q. What difference did it make to him if the oysters were not culled?

A. If you were to fill up the barrels with shells you could not get anything out of it.

Q. That is if you allowed the young oysters to remain to such an extent as to make a difference in the contents of the barrel he would not take it as a full barrel?

A. No sir, he did not want to measure that way. The more he got in a barrel the better it was for him.

Redirect examination.

By Gen. McCLURG:

. I presume the purport of the last few questions asked you were ustain the charge in the bill of complaint in this case to the effect t the bad management of the oyster business in Mississippi has e much to destroy the oysters. I want you to state to the best our knowledge about the quantity of oysters now as compared h 23 or 24 years ago in this section about which we have been ing you?

. Well the same oyster reefs out here. That is the reefs out in lake that we call the shell banks, 23 or 24 years ago, they were ntiful there because they were not ever used at all. They were mall that they were not hardly any use. The factories began ake them and break into them. They were very thick on the tom.

. How thick?

. Five or six or seven inches thick on the bottom. So thick t they would not grow to any size at all, but gradually working hem and picking out the large ones and throwing the others k they got to growing again.

. Are they as plentiful now as they were then?

. They are not as thick now as they were then.

. I am not speaking of any particular reefs but in the whole itory?

. Yes sir, the boats make about as quick a trip now as they did n.

. Are not there a great many more taken out now than there e then?

. Oh I should smile. There are thousands of barrels more taken out.

2 Q. When you first began it was before the first factory was established along this coast?

. Yes sir, and they could not use many at that time when Mr. ez started.

. You were asked about the deep water channel as far as Cat nd and on towards the mouth of Pearl river Before this contro- sy arose a few years ago had you ever known or heard of that being the line between Louisiana and Mississippi?

. Cat Island channel?

. Yes sir?

. No sir, I never did hear that that is the line. I always heard the line run from Pearl river until they began to scuffle about nd then they claimed that Cat island was the line.

. Since when?

. That is since they began to talk about the line in the last two hree years.

Recross-examination.

By Col. ZACHARIE:

Q. When you spoke of the thousands of barrels that are n caught were you speaking of the oysters reefs in the neighborhood Biloxi and the eastward or were you talking about these marsh

A. I am speaking of the lakes to the southward and the westw and the northward of Cat island?

Q. You mean in that sound there?

A. Yes sir.

Q. Is it not your opinion as an oysterman that the constant fi ing of these reefs in this neighborhood during the summer, and t non enforcement of the culling on the banks has done very mu to destroy the fisheries in this neighborhood of Biloxi?

A. No sir, there were never enough taken from the oyster re in the summer time to amount to any thing.

Q. Was not that enough for your trade here?

A. Yes sir, but that is not enough to mention?

Q. And still it had a great effect in destroying what was here?

A. No sir, I don't think that it hurt them at all.

Q. You don't think that the culling of all of these young oyst and fishing them during the spawning season has any effect in creasing the supply of the oysters?

A. They would cull the oysters out there where they were.

Q. Don't you think that the fishing of them in the spawning s son has the effect of decreasing them to a great extent?

A. Yes sir, certainly it does.

Q. Well prior to the establishment of these canneries or factor there was very little demand for oysters was not there except t local consumption along the coast?

A. That is all. In the winter season when the raw business w here.

H. H. MATHIEU, a witness introduced on behalf of the State Mississippi, being duly sworn, testified as follows:—

1573 By Gen. McCLURG:

Q. How old are you?

A. 37.

Q. Where do you reside?

A. In Biloxi.

Q. How long have you lived here?

A. I have lived here or right between here and Ocean Springs the last 20 or 22 years.

Q. Where were you born?

A. In New Orleans.

Q. What is your occupation?

A. Oysterman or boatman.

Q. How long have you been in that business?

A. I have been there off and on for the last twenty years.

Q. Where have you been catching oysters?

A. All through the reefs here in Mississippi and Louisiana, and down as far as Texas, Sabine pass.

Q. Have you ever been in Grand marsh?

A. Yes sir, I have been all through it.

Q. Since when. When was the first time you ever went through it?

A. I guess about twenty years ago.

Q. Have you been going through there for the last twenty years?

A. Yes sir.

Q. Name the portions of it that you are familiar with and have visited often?

A. Well I have been all through from Isle à Pitre to Three Mile bayou, and Grand pass and through it down as far as the river, and past the river on the other side to Morgan City as far as Sabine pass mostly through the bayous and lagoons.

Q. Were you ever in Nine Mile bayou?

A. Yes sir.

Q. You have been down as far as Indian Mound bay?

A. Yes sir.

Q. And Treasure bay?

A. Yes sir.

Q. And Drum bay?

A. Yes sir.

Q. And from there to the northward to the sound?

A. Yes sir.

Q. Have you noticed any difference in the waters or the islands, any material difference or changes since you first went in there?

A. Well mighty little. There are little changes in the gaps, some of them. Nothing to amount to anything.

Q. What gaps have you noticed some changes in?

A. I think that Creole gap has widened a little bit, but the channel did not change. There was no change in the channel.

Q. Did you notice whether these islands that are in that territory down there about which we have been talking have subsided any or whether they are higher?

A. I think there is one of them gone.

Q. Which island is that?

A. St. Joseph island.

Q. I am speaking about those down in the marshes?

A. No sir, I think that they are all about the same. I went off and stayed for six years and came back and went through there at night the same as I ever did.

1574 Q. How much water was your boat drawing?

A. About three and a half feet.

Q. With a boat of light draft, say two feet draft at what place could you come out of the sound or Lake Borgne into that Grand marsh?

A. You can go through Three Mile bayou and come out to the southward.

Q. Coming this way?

A. Through Three Mile bayou and Nine Mile bayou.

Q. How are Johnson bayou and Turkey bayous?

A. They are shoal bayous from the inside.

Q. Grand pass?

A. That is just a cut through the marsh across. That don't enter inside.

Q. Three Mile and Nine Mile bayous?

A. Yes sir, they are entries into the marsh. Into the lakes inside.

Q. What do you know about the boundary line between the States of Louisiana and Mississippi?

A. I don't know anything much except that they claim around that is all, and what the chart says.

Q. Do you know where Pearl river is?

A. Yes sir.

Q. Do you understand Pearl river to be the line dividing Louisiana and Mississippi north of Lake Borgne?

A. Yes, sir.

Q. What do you know about the line between Louisiana and Mississippi south of Pearl river and east of Pearl river?

A. Running to the southward.

Q. Yes sir.

A. I know they claim Chandeleur islands in Louisiana on the line I believe with Pearl river. I have brought mail out there that was directed that way.

Q. To Chandeleur, Louisiana?

A. Yes sir.

Q. In what State is Isle à Pitre?

A. The end of it is in Mississippi I think.

Q. Isle à Pitre is an island is it?

A. It is an island or peninsula or point projecting out there.

Q. What separates it from the other body of the marsh?

A. Creole gap.

Q. Have you ever been disturbed by either side in fishing down there in Grand marsh?

A. No sir.

Q. Have you paid a license to either State?

A. Yes sir.

Q. What State?

A. Mississippi.

Q. When?

A. This winter the last license.

Q. When did you buy your first license?

A. This is the first license that I ever bought.

Q. Did you ever buy one from Louisiana?

A. No sir.

Q. Where did you fish under this license that you bought from
sissippi?
A. I fished on these inside reefs here in Mississippi sound.
Q. Did you go in the marsh?
A. No sir, not inside of the marsh. To the north of the marsh.
ll Banks reefs it is called.
Q. Were you ever about Sundown island or Brush island or Door
point?
A. I have been there yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Mathieu, has not this marsh of which you have been speak-
been almost universally called amongst the fishermen the Louisi-
marshes until very recently?
A. Yes sir.
Q. Have not the mouths of Three Mile bayou, Nine Mile bayou,
key bayou, Johnson's Bayou and Grand pass worn a good deal
er since you have known them?
A. The passes have changed the least bit. Not a great deal though.
Q. Do you know how the depth of the water has changed going
these bays and bayous?
A. I think it ranges about the same with the exception of Creole
That has deepened a little.
Q. There is a greater volume of water pouring into the marshes
e is not there? Through this deepened channel at Creole gap?
A. Creole gap does not enter into the marshes. It comes through.
Q. It goes through to the south side of the marshes?
A. Yes sir.
Q. And there is more water going through there than there was
nerly?
A. Yes sir there is.
Q. Is that not true in pretty nearly all of these bayous and passes.
ave you ever sounded them?
A. Yes sir, I have sounded them. I think that these main passes
bout the same. They have about the same water.
Q. You never pretended to fish under a Mississippi license in these
shes?
A. No sir.
Q. You fished only in the sound with a license?
A. Yes sir, that is all.
Q. You never *through* that your license gave you the right to fish
ese Louisiana marshes did you?
A. Well I never had no cause to go in there in fact.
Q. Well now what did you say that the depth of these vessels that
went in there with was? Through the marsh?
A. The last time I went through there I was drawing about three
a half feet.

Q. Did you not have to wait for the high tide to go through there?

A. No sir.

Q. Did you not get stuck on mud flats in a good many places in going through there?

A. No sir, I never got stuck at all. There are places that you can get stuck there though in.

Q. Is not the coast; the northern coast of these marshes worn away considerably. The crust of the marsh being crumbled away by the eating of the waves?

A. No sir, not that I noticed. It looks about the same to me.

Q. Did you ever take any particular notice with a view to see whether they were caving away or washing away?

1576 A. I did with the passes and such as that on account of the navigation.

Q. I mean the general coast line?

A. I think I would have noticed it in that case.

Q. You have spoken of these islands lying to the north of these marshes, or between the northern coast line of these marshes and the main land of Mississippi. Is St. Joseph island one of these?

A. St. Joseph island is about washed away.

Q. Did you know an island there named Round island?

A. Yes sir, there is one called Round island.

Q. What has become of that?

A. It has washed some too.

Q. Is there any Round island any longer there?

A. No sir.

Q. Is it not a fact that it has disappeared entirely?

A. It is washed away.

Q. How about Half Moon or Grassy island. Has that become partly washed away?

A. It is there still.

Q. Is it not partly washed away?

A. No sir, I don't think that Half Moon is washed much. No sir.

Q. Do you know where the deep water channel is that runs from the mouth of East Pearl river eastward?

A. Yes sir.

Q. Do you know how close it runs to the Mississippi main land?

A. To the marshes you mean?

A. Yes sir; to the marshes on that side. I call that a part of the main land, the marshes on the Mississippi coast?

A. I would judge it to be about eight miles across.

Q. Let me see if you understand me. I am speaking of just after you leave the mouth of East Pearl river. How close does it run to the Mississippi shore. The deep channel?

A. You mean to the Mississippi shore do you?

A. Yes sir?

. You pass the land there right along the side of it. Within yards.
. That is north of these islands that you have spoken of?
. Yes sir.
. That is the route that is followed by the deep water vessels ng to the eastwards and intending to pass down to the Gulf in channel between Cat island and Isle à Pitre?
. Yes sir, that is the main channel.
. To whom have you been delivering or selling your oysters e you have been engaged in the oyster business?
. Do you mean this season?
. Generally. The whole time that you have been occupied in business?
. Oh I have run them for most every body in Biloxi here. The lers.
. I mean to say what class of dealers?
. The Barataria Canning Company, Mr. Lopez, Mr. Gornflo, and Desports. In fact most all of them here.
. The demand for oysters has been manifestly increased has not ith the establishment of these factories?
. Yes sir, I think so.
. Do you remember the condition of this oyster trade before these canneries or factories were established?
A. Yes sir, some what.
Q. There was very little demand then was not there except home consumption?
. That is about all.
. Before these canneries were established there were a great many ers around here in the neighborhood of Biloxi was not there, k bay and along these islands to the east?
. There were a few around here?
. There were a great many oysters in Back bay?
. Yes sir.
. Were not there a great many oysters to the eastward. At Cedar nt and other points?
. At Scranton and Cedar point yes sir.
. Were not these oysters for the local demand fished all through summer time. For the local demand. For the hotels and board-houses and oyster shippers and so on?
. Yes sir, there was some fishing all through.
. That is true of the spawning season. Of the summer season?
. All of the time. They never stopped. The spawning season lieve they claim is all the year round. I don't know.
. No, it is only a few months. Is it not a fact that in those days oyster fishermen were not particular in culling the oysters on banks if they had a fair wind to get home on, and that they ed them as they were going home *of* after they got there?
. No sir, I never did.
. I mean to say about the fishermen generally?

A. I could not say that about other people. I don't know whether they did that or not.

Q. Well now as an oyster man would not you say that this habit of fishing oysters during the spawning season and if they were not culled on the banks would have a great tendency to destroy and diminish the oyster reefs?

A. Yes sir, if they were not culled, certainly.

Q. Could you form any sort of an estimate as to the proportion the demand was for oysters before the establishment of these canneries and what it is now?

A. Well I have no idea.

Q. Was there 1/100 part of the demand for oysters before the establishment of these canneries that there is now. In other words is not the demand one hundred times more now than it was in those days?

A. I think that it is yes sir.

U. DESPORTS, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. MCCLURG:

Q. How old are you Mr. Desports?

A. 42 years old sir.

Q. Where do you reside?

A. Biloxi, Miss.

Q. How long have you resided here?

A. I have been here nearly all of my life with the exception of five years that I lived in Mobile when I was a child.

1578 Q. What five years was it that you lived in Mobile?

A. I was about eight years old when I went there. When I first moved there.

Q. You came back here at about the age of 13?

A. Yes sir.

Q. And you have lived here constantly since?

A. Yes sir.

Q. What is your business?

A. I am a raw oyster shipper.

Q. How long have you been in that business?

A. For 11 years.

Q. What are we to understand by your being a raw oyster shipper. Explain that?

A. I ship nothing but raw oysters. I am not a canner. I ship oysters by the thousand.

Q. How many thousand oysters did you ship this last season. That is about closed now is it not?

A. Well it closed about the 10th, of May. Of course as we approach April it keeps diminishing all of the time during the warm months. I expect on an average from the 1st of September to

the 1st of May, I expect about 60,000 a day would be a good average.

Q. You would average about 60,000 a day?

A. Yes sir.

Q. Well how does that compare with the year before?

A. A good deal better. I shipped about one third more oysters this last winter than I did the previous winter.

Q. Has your oyster business been increasing since you started it?

A. Yes sir, every year.

Q. Where have you been getting your oysters from the time you started up until now. Speaking in a general way?

A. Up to two years ago; up to the time they enforced this Louisiana law, nine tenths of my oysters came out of the Grand marsh over there.

Q. What stopped you two years ago from going down there?

A. Well there was a law there preventing boats from fishing and carrying oysters into this State and consequently I could not go there any more.

Q. Has that any reference to the beginning of the agreement entered into between the Oyster Commissions of Louisiana and Mississippi?

A. Well there is an agreement I think for the neutral ground.

Q. Where is that line?

A. It is I suppose the line along the north edge of the marsh.

Q. And where is the neutral ground?

A. That is the neutral ground.

Q. North of that line?

A. Yes sir.

Q. Are Mississippians excluded under that agreement from going into the marsh?

A. Yes sir.

Q. Out as far as Isle à Pitre?

A. They can fish under that law I think as far as Isle à Pitre and Grand pass and in through in there.

Q. Previous to that time you say the greater portion of the oysters were taken from Grand marsh?

1579 A. Yes sir.

Q. What portion of Grand marsh?

A. We got our oysters from Three Mile bayou and Nine Mile bayou and Turkey bayou and about Treasure island and Turkey bayou and Cat Island pass. In fact all of these places in there.

Q. Do you know in what State these bayous are?

A. I was under the impression that they were in Mississippi. We were never prevented from going out there up to two years ago.

Q. Why were you under that impression?

A. Boats hailing from these places would come out there and get oysters and there was nothing said about it.

Q. You know that the two States are divided north of Lake Borgne by Pearl river?

A. Yes sir, that has been my impression. I have heard them say that is the dividing line. Pearl river is the dividing line.

Q. Where is the line south of Pearl river?

A. My understanding was that the line was due south 18 miles from Pearl river.

Q. About how far down into Grand marsh would this line reach 18 miles from these places on the Mississippi shore?

A. Well it would take in these places that I have just mentioned. Three Mile bayou and Nine Mile bayou and Bayou Treasure and Mussell bayou and the principal places around where they get oysters there.

Q. Do you know where Brush island is?

A. I have not been out there lately. I only went out there twice. I passed near Brush island this last trip that I went. I never followed up catching oysters. I don't know any thing about the marsh. I never have been in the marsh. I know just what the boatmen would tell me when they come in with a load, that they got them out of Treasure bayou or Three Mile bayou, or where ever they got them down there, or Nine Mile bayou.

Q. Is there any difference in the demand for oysters since they have the canning factories?

A. Well they use a different kind of oysters. That is the highest price oysters that we use.

Q. You deal exclusively in raw oysters?

A. Yes sir.

Q. When were these factories established along here?

A. I think that the first factory was established about 1882 or 1883. The Biloxi canning factory.

Q. What effect has the establishment of these factories on the local demand for oysters?

A. It has increased the demand for oysters.

Q. About what per cent. do you reckon it has increased the demand?

A. Well I don't know. It is a very large increase. The more factories the more business there was.

Q. Well how about the growth and out-put of the oysters?

A. Well last year there were more oysters brought in than there were the years previous. We got a quantity of oysters last year.

Q. You mean to say that you judge from that there are more oysters in this territory than there was before?

A. There are just as many. There are more boats being built every year and naturally they bring in more oysters.

1580 Q. What about exhausting the supply of oysters in this territory?

A. I don't think that it has been exhausted any at all.

Q. If it be true that before the factories were established and even since that local hotels and restaurants and boarding houses have been using them through the summer months, and what is sometimes

he spawning season, has that had any influence towards ex-
g them?
don't think that it has for this reason. There are very few
brought here through the summer, and now here these sum-
ps that use oysters, they buy them from right around here from
iffs. Occasionally there is a boat comes in but there is very
mand for them. A schooner load I suppose would run all
shops in the summer time.
there any one else here dealing in raw oysters except your-

es sir, Mr. Gornflo and Mr. Mayberry.
ow many does Mr. Gornflo handle?
don't know sir how many he handles. He is a very large
also.
ou know where this deep water channel is that is between
nd and Isle à Pitre?
ell we were out there last year. That is the second time that I
er been out there, but I don't know much about these places.
ou did not go out to take oysters?
o sir, we just went out on a pleasure trip. We were out there
s. We sailed through to the southward. We passed Brush
nd Door point. We went down about twenty five or thirty

ior to the last two or three years, since this controversy arose
Louisiana and Mississippi over the location of the State line.
hat time did you ever buy any privilege license?
o sir.
d you catch these oysters or buy them?
bought them.
r the market?
s sir, off of the boats.
ou did not run these schooners?
have some of my own schooners. Yes sir, I own five
rs, but that of course would not supply me.
ou have five schooners engaged in the oyster business?
es sir.
ou bought the oysters from those who sold them and then
l them on the market?
es sir, I bought them from other schooners.
bout how much money does it take Mr. Desport to handle
ysters a day during the season, say beginning on the first of
tember and ending on the first of May?
ell including the buckets and handling and all about $180.00
They cost about $3.00 a thousand.
ell how does that compare with the expense of handling
oysters?
ell I don't know much about what it costs them to handle a
f oysters.

Q. How many hands do you generally have employed. How many men or women?

1581 A. Last winter I had about thirty openers steady. Of course near Christmas times I have extra men, but I buy a great many oysters by the thousand already opened. A great many are bought in that way from Ocean Springs, and at different places.

Q. You employ during the season an average of about thirty hands a day?

A. Yes sir, working around here. That is not the boatmen. Those are just the men that are opening. I expect about thirty-five, because I have five carpenters.

Q. How many do you have on your boats?

A. On the boats that they run to me?

Q. Yes sir.

A. There are about four men to the schooner. I have had as high as 12 to 15 schooners running. About 12 schooners would be something like fifty men.

Q. And sixty more?

A. Yes sir, about fifty more.

Q. Then you have altogether engaged directly or indirectly with your business about how many hands?

A. About 80 or 90.

Cross-examination.

By Col. ZACHARIE:

Q. Now Mr. Desports is it not a fact that until eight or ten years ago these marshes which have been testified to were almost universally known as the Louisiana marshes?

A. Well Colonel, I have heard them called Grand marshes and Louisiana marshes. I have heard them called very often Louisiana marshes.

Q. Did not the most of those fishermen here call them the Louisiana marshes?

A. I don't know that the most of them did. I expect that there were about as many called them the Grand marsh as the Louisiana marshes. I never paid any particular attention. They would say "We are going out in the marsh for oysters. Some times they would say Grand marsh and some times Louisiana marsh.

Q. Is it not a fact that this territory was almost universally conceded to be Louisiana territory until quite recently, 10 or 12 or 15 years ago?

A. No sir, not to my recollection. I never heard them say they were in Louisiana or Mississippi. They went out there and got the oysters and brought them in.

Q. Do you know that until recently the Louisiana law did not prohibit non residents of Louisiana from fishing in Louisiana waters?

A. Well I did not know that, no sir.

. Now you have spoken of the 12 or 15 boats in your employ. many of these boats are operated under a Louisiana license?
. That are run under me?
. Yes sir?
A. None at all.
Q. Were not there two or three?
A. There were three of them took out license last year of e but they were running in Louisiana in the disputed terri-. They would not allow us to fish in there. These men took this license because they have been accustomed to catch these e oysters in the marsh. They thought that they could make as h money by taking out the license and running these oysters he Rigolets. They did not know much about dredging.
. They were tong fishermen?
. Yes sir, nippers and tongs.
. Then according to your statement the only ones of the boats have taken out a license in Louisiana are boats that have taken ers from the Rigolets to New Orleans?
. The balance would not take them out because they could not y them any where else.
. Did the balance take them out in Mississippi?
. Yes sir.
. Since when did they take them out in Mississippi?
. Since the law went into effect.
. How long ago has that been?
. Two years ago.
. Is it or is it not a fact, Mr. Desports that almost from time im-norial that the reefs in the neighborhood of Biloxi and to the ward have been fished all during the summer?
. You mean over here?
. Yes sir.
. All during the summer?
. Yes sir, and the spawning season?
. I don't know. There are not many oysters fished in the sum-time. Three years ago all of the oysters we did have here were ed by the freshets, and there are very few oysters through here.
. You did not answer the question. The question is this. ether for the home supply these neighboring reefs have not been ed all during the spawning season to supply the hotels and the rding houses and the oyster shops?
. No sir.
. Can not you go into any of these hotels here and get oysters ?
. Yes sir.
. Then they are fished during the spawning season are not ?
. They are fished now what few oysters are around here. Some know come from the outside.

Q. Was not that universally the custom before the establishment of these canneries?

A. We don't handle oysters in my business in the summer.

Q. I am speaking now of the habit of the fishermen here from time immemorial to fish these reefs all during the summer season. During the spawning season?

A. For local use yes sir they would catch a few.

Q. Well do you or do you not know that almost from time immemorial, that these fishermen have been careless in culling on the banks in the neighborhood, and that whenever they got a load and the wind would spring up so they could go to their homes they would cull as they went, and then some times cull on the land after they got there. In other words was there any strict enforcement in regard to it of any kind. I am speaking of the years along back in regard to the culling on the banks so that the young oysters would be thrown back in?

1583

A. There has been a law for the last twenty years in regard to culling oysters.

Q. Has that law been enforced?

A. Well I think that it has. I never saw a schooner come in here culling oysters as they came. I have never seen that.

Q. You have not been aboard of these schooners?

A. No sir.

Q. You say that you only made two trips?

A. The trips that I made were short trips.

Q. You have been principally occupied with your business of opening and shipping oysters?

A. Yes sir.

Q. Outside of that you don't know much about the oyster trade?

A. No sir, I don't know where they catch them except when they tell me that they came from.

Redirect examination.

By Gen. McCLURG:

Q. You said that Mississippi had a law years ago in regard to license for fishing oysters. You said that you did not pay this license?

A. No sir.

Q. That is 10 or 12 or 15 years ago?

A. Yes sir.

Q. Did you own any of these boats at that time?

A. No sir, I did not own any boats at that time. There were inspectors some 15 or 17 years ago, but I did not own any boats then.

Q. Where did these inspectors come from. From what State?

A. From this State and this county.

Q. How far out did they go if you know?

A. Of my own knowledge I don't know how far they went. I could not say.

ERNEST DESPORTS, a witness introduced on behalf of the State issippi, being duly sworn, testified as follows:

By Gen. McCLURG:

How old are you, Mr. Desports?
I will be 51 my next birthday.
Where do you reside?
At Biloxi.
How long have you lived here?
I was born here.
Q. How long had your parents lived here?
A. I think that my grandfather first came to Biloxi in 1825.
What is your occupation now?
I am now bar pilot at Ship island.
Have you held any positions in Harrison county?
Yes sir, I was justice of the peace at one time. Constable at ime, and harbor master of Ship island at one time. I was r master for six years.
Of Ship Island harbor.
Yes sir.
You understand that this is a suit between Louisiana and Mis-pi over the boundary line between the two States?
Yes sir.
Now where is the dividing line between the two States. About ?
Well the dividing line of Mississippi and Louisiana is Pearl as I understand it. Well I have read the boundary of Missis-beginning there and going north, and thence east and south leagues from the main shore, and thence running in a westerly ion to the place of beginning, including all islands in the lary.
Within what distance from the shore?
Within six leagues or 18 miles.
Can you say whether the public generally before this contro-arose, generally regarded that as the true line?
I have always heard that regarded as the true boundary line sissippi.
Have you ever engaged in the oyster or fishing business here in?
For a short while I was engaged in shipping oysters. I did ep it up very long.
When was this?
That was about eight or nine years ago.
Where were your oysters taken from?
From the marshes. From the territory in dispute so the boat-old me who brought them in. I know nothing about that y out there at all. I was only there four or five days after the of 1893.

Q. Where were you then. In what portion of the marsh?

A. I only remember the names of a few places. I remember Turkey bayou and Three Mile bayou and Indian Mound bay and Isle à Pitre.

Q. How did you go out there?

A. I went out in a schooner.

Q. How much water did she draw?

A. The schooner was drawing about four feet.

Q. What route did you go?

A. I don't know.

Q. You could not tell?

A. No sir.

Q. You are not familiar enough with that territory?

A. No sir.

Q. What was your business out there?

A. I was one of a party of gentlemen who volunteered to go out to see if we could find any men in distress from the storm.

Q. Where did you go out from?

A. From Biloxi.

Q. They were the citizens of this town?

1585 A. Yes sir, we went on the schooner Emma Hand. She was one of the few schooners that was not lost in the storm.

Q. What did you find?

A. We found a great many men. Drowned men that we buried. I jotted down a description of all of those that we found. We buried them. The last few days we were out we found some floaters that we could not do anything with at all. We were too far from the marsh and we could not bury them, and we let them go, they were so swollen. We were about the first boat out. On our return trip back home we noticed a great many crosses where people had been buried, where the corpses had not drifted ashore when we first went out.

Q. Did you bury any out there?

A. We buried I think it was eight.

Q. Where did you bury them?

A. I don't remember where they were exactly except that they were buried at a place; two of them at a place called Karako camp, or bayou or some thing.

Q. What was the character of the soil in which you buried them?

A. It was dark looking mucky stuff. You would dig a little hole and it would fill with water. We would have to hold them down sometimes to bury them. We used several bottles of carbolic acid in order to get to them. My business was to jot their description down and I turned it over to a newspaper man. I think there were about three columns of that stuff that was published by the Picayune that was sent in by the correspondent here.

Q. Did you have any personal knowledge of any arrests made out there for a violation of the Mississippi laws. Out in that territory?

Well the only one that I have any personal knowledge of is Kennedy boys.

Col. ZACHARIE: This is objected to on the part of the State of iana by her counsel, as to any testimony in regard to any ju- l proceedings held in the State of Mississippi or in the county larrison unless the primary and best proof, the record of such shall be first furnished or accounted for before any secondary ence can be introduced.

By Mr. McCLURG:

You stated that you had personal knowledge of the Kennedy Were you present?

Not to the trial. Of the arrest I did. I saw them when they under arrest, but I was not at the trial.

Col. ZACHARIE: It is understood that the counsel for Louisi- make the same objection to all of this testimony of this character except to same.

By Mr. McCLURG:

There has been something said about taking the oysters here e spawning season, for the hotels and restaurants and local pur- poses. What do you know about that Captain?

A. Well I know that people do not eat oysters during the spawning season, when the oysters are in milk during the hs of April and May. When they are spawning you would not one person in five hundred that would eat an oyster then, be- they are not palatable and not fit to eat. We do not eat oys- n the spawning season. This is not the spawning season. The rs are through spawning.

Could you say whether the supply of oysters in this oyster ter- has been in any manner diminished or destroyed by reason king oysters in the spawning season?

I don't think that it has been hurt a particle.

The building of the canneries here has greatly increased the nd for oysters here has it not?

Yes sir.

Has the supply been about equal to the demand?

Last winter I understood from all of the canning factories and the raw oyster shippers that they had done a greater business they had ever done before. There seemed to be no trouble in g oysters.

That is after the agreement cutting us out?

Yes sir, this is last winter you know.

None of these oysters were taken as I understand it, west of l pass. South of the marsh land?

I have not seen an oyster come into Biloxi that looked like a oyster, except those taken from the neutral ground. There siderable difference in the looks of the oyster. One accus-

tomed to them can tell almost at once where the oyster comes by looking at the shell.

Cross-examination.

By Col. ZACHARIE:

Q. You have spoken of this territory in dispute as the G marsh?

A. I beg your pardon, I did not use that expression.

Q. What have these marshes been generally known as?

A. Generally speaking we call them the marshes. I have h them spoken of as the Louisiana marsh or the Grand marsh, bu a general thing the boatmen say "I am going out to the marsh Most of the boatmen use the expression "Marsh."

Q. Do you say that the oysters in this latitude cease to spawn the month of May?

A. In April and May they are spawning. At present you wo not find a particle of spawn in the oysters, but they have ceased spawn before this.

Q. Do you not know that it has been thoroughly established these southern latitudes that the oyster begins to spawn in the mon of April?

A. Yes sir.

Q. And extends away through to the month of October?

A. No sir, I do not, but I suppose it must be true because you c find young oysters growing on new planks in the water, but as general thing oysters are through spawing as we understand it June.

1587 Q. Well now is it not a fact that along this coast, whether yo come over here in the month of April or May or June or an other of the spring or summer months, that you can get oyster either raw or cooked at any of these restaurants or hotels or boarding houses or oyster shops along this coast. Do not they have them on hand constantly?

A. Yes sir, but none of the home folks eat oysters in the spawn ing season and very few outsiders.

Q. Well they have them?

A. Yes sir, but very few? That don't amount to anything.

Q. Then it is evident that the fishermen fish them during the spawning season?

A. Yes sir there is a small number taken out. They have noth ing else to do.

Q. Do you know anything about the habits of the fishermen in culling these oysters. Are they strict and careful to cull these oysters on the reefs, or do they when they get a load and have a fair wind start for home and cull on the way and cull on the land after they arrive home?

A. I never have seen oysters culled here after they arrived here As to what they do before they get here I don't know. I am not

accustomed to that country out there and I have never fished oysters for a living.

Q. Then you are only testifying to what you have seen and not what you have not seen?

A. Yes sir.

SATURDAY MORNING, June 11th, 1904.

The commission met this morning at 9 o'clock, and there were present Gen. Monroe McClurg, counsel on behalf of Mississippi, and Hon. John Dymond, Jr., counsel on behalf of the State of Louisiana and Hon. William D. Bullard, commissioner.

T. R. FRIAR, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you live?
A. In Ocean Springs.
Q. What county is that?
A. Jackson county.
Q. Jackson county, Mississippi?
A. Yes sir.
Q. How long have you been living there Captain?
A. Something like fifty years I think.
Q. What has been your occupation during that time?
A. I have done a great many things. I am a house carpenter by trade. I have followed that several years and several years I have shipped oysters.
Q. Where did you get the oysters that you shipped?
A. I bought them a good many, and a good many of them I planted.
Q. Are you familiar with the waters between Ocean Springs and the mouth of Pearl river?
1588 A. No sir, I cannot say that I am. I have been out there a good many times but I have always had some man that knew the water and I paid very little attention to it.
Q. When were you first in these waters?
A. I could not remember that. It is several years ago.
Q. In your best judgment. How long has it been since you first went there?
A. It must be 25 years.
Q. Were you ever in the marsh?
A. Yes sir. Not all through it.
Q. What portion were you in?
A. That is more than I can tell you. I have not been much further than Door point.
Q. Have you ever been in Isle à Pitre?
A. Yes sir, and Door point is beyond Isle à Pitre.
Q. Southwest from Isle a Pitre is not it.

A. No sir, that is southeast.
Q. Have you ever been as far west as Nine Mile bayou?
A. No sir.
Q. Three Mile bayou?
A. No sir. I am not familiar with the marsh and the names of the places. I possibly might have been there but I don't know the names of the places.
Q. Well were you ever about Isle à Pitre or Door point or in that vicinity; when you were down there as you state were you in the State of Mississippi or the State of Louisiana?
A. That is more than I can tell you, but I thought it was in the State of Mississippi.
Q. Why did you think you were in the State of Mississippi?
A. Because I have always heard that Pearl river was the line and from there running south.
Q. How far south?
A. I have heard that it was 18 miles.
Q. How long have you been hearing that?
A. I could not tell you. I have no idea.
Q. About how many years ago?
A. Twenty years I reckon.
Q. Have you ever noticed any changes in any of these bayous or islands out there since you went there?
A. No material changes. Some places get a little deeper and some places are filling up a little, but not to amount to much. The place that is called Creole gap has widened a good deal.
Q. Do you know anything about the history of Creole gap?
A. I don't know anything of it of my own knowledge. I have heard that a boat got stranded there and they had to dig it out and that caused that place to run through there.
Q. That place has widened?
A. Yes sir.
Q. How long do you say it has been since you first saw that marsh?
A. I think that it has been about twenty five years. I am not certain about that. It is somewhere about that I guess.
Q. What has it been called during this time if you know?
A. I have heard it called Grand marsh. Generally in speaking of it it was spoken of as the marsh. If you would ask a boatman where he was going or where he got his load *and* he would say in the marsh. Lately they have called it the Louisiana marsh?
Q. How long has it been since you have heard it called Louisiana marsh?
1589 A. That is just a few years ago. I don't know.

ss-examination.

By Mr. DYMOND:

ain how old are you?
59.
were born and raised in Ocean Springs?
ir, I was born in Marion county Mississippi.
n did you first come to Ocean Springs?
ld not remember. I was very small then.
t how old. Five or six years old?
ir, I suppose so.
n were you first interested in the oyster business in any

thing like 25 years. I could not say exactly.
re were you at that time. In Ocean Springs?
ir.
ou ever fish oysters in Back bay?
not remember whether I ever did or not. I might have
never fished oysters extensively.
n you first went into the oyster business were there oysters
ean Springs and Back bay and along the coast here?
ir, there were oysters.
caused you all to go over in the marsh to get oysters?
t them more plentifully.
were more plentiful there than they were here?
ir.
were they not plentiful here?
is some thing that I could not say.
t because they were fished out?
ps there is a good deal in that. That is hard to tell.
t how long ago was it that you first heard the marshes as
em called the Louisiana marshes?
is a few years back. Possibly ten years. I don't know.
nly reason that you had for supposing that you were in
when you were over there was because you thought you
18 miles of the Mississippi main shore. Was not that
ason?
ir.
lid not know what rights Louisiana had in this marsh

nly not.
lid not know you were within nine miles of Louisiana
?
d not tell you that.
matter of fact there has never been any line drawn down
marsh 18 miles from the shore?
t know sir.
ow frequently were you in the marsh?
ry often.

Q. If you were not very often in the marsh would you be competent to tell whether there had been any changes there or not?

1590 A. Well of my own personal knowledge I don't know much about it.

Q. You don't know much about that?

A. No sir, only from hearsay. What I have heard others say. Only as far as Creole gap. I have seen that and noticed it.

Q. You know that has gotten bigger?

A. Yes sir, I know that has gotten bigger.

Q. Were you ever down there in the swamp Captain?

A. No sir.

Q. These factories that have been built along the coast. They have increased the demand for oysters very much have they not?

A. Yes sir, I think so.

Q. You have had to go further and work harder to get oysters since these factoriss have been working?

A. I never got any oysters for the factories.

Q. You have always handled a better grade of oysters? Is it not a fact that the oysters for shipping purposes are more plentiful in the marshes than in the sound?

A. Yes sir, they are more plentiful.

Redirect examination.

By Gen. McCLURG:

Q. You were engaged in shipping raw oysters?

A. Yes sir, raw oysters.

Q. You never have been engaged in the canning business?

A. No sir, I never have been.

Q. Crevasses from the Mississippi river, and the fresh water coming down the streams out of Mississippi and Alabama and pouring into the sound destroyed the oysters did not it?

By Mr. DYMOND: Objected to by the counsel for Louisiana on the ground that the question is leading and an exception is reserved on that account.

By Mr. McCLURG: What effect does fresh water have upon oysters?

A. Too much fresh water will kill them.

Q. Do you know of any time that they were injured by fresh water?

A. Yes sir.

Q. Where did the water come from?

A. Well it came from too much rain.

Q. I mean how did it get into the sound?

A. Well that is through these crevasses.

Q. From the Mississippi river?

A. From the Mississippi river.

Q. Do you remember what years that was?

A. No sir, I do not.

A. RYAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you live Mr. Ryan?
A. Ocean Springs sir.
Q. How long have you lived there?
A. I was born and raised in Ocean Springs.
1591 Q. How old are you?
A. I am 59 years old sir.
Q. What do you do there?
A. I am a carpenter and a fisherman and also an oysterman.
Q. When did you first do any oyster fishing?
A. Well sir when I began I suppose that it was about six or eight years after the war.
Q. That is six or eight years after the civil war?
A. Yes sir.
Q. Somewhere about 1870?
A. Yes sir.
Q. Where did you fish?
A. The first oyster fishing I ever did I followed it right here at home. Right here in the bays for a certain length of time, and then when the oysters got a little scarce I did like the rest of them. I went elsewhere.
Q. Where did you go?
A. Out to the marsh.
Q. To what marsh?
A. At that time we always called it the Grand marsh. I don't know what they may call it at present. A great many call it the Louisiana marsh now I suppose.
Q. In what part of the marsh did you go?
A. I never went into the interior at all. I always fished near the eastern lines of the marsh. I have gone out as far as Cat Fish pass. That is about as far as I have ever gone out there in these marshes.
Q. Cat Fish pass?
A. Yes sir, that is what they called the name when I used to go out there.
Q. Have you ever been about Isle à Pitre?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Were you ever as far west as Three Mile bayou?
A. I went to Three Mile bayou yes sir. One time it was on account of bad weather that I went into Nine Mile bayou. In fact I don't know the water in there myself. I only had one of my boys with me. He had been running out there and he knew the water in there and he went in there for a harbor.
Q. How far in Nine Mile bayou did you go?

A. We went in the mouth of it I don't hardly think more than a quarter of a mile sir.

Q. What sort of a boat were you in?

A. I was in a schooner.

Q. How much did she draw?

A. She drew about three feet or three and a half feet.

Q. When was this?

A. That was three winters ago.

Q. That is the only time that you remember being in Nine Mile bayou?

A. Yes sir, I went through Three Mile bayou a great many times but there are several ways to go through the marsh, and on account of the winds. You meet a head wind and you will go one way and a fair wind and you will go another. We went through Three Mile bayou the most of the time.

Q. When did you first go through Three Mile bayou?

A. Well sir I could not tell you exactly when I first went through there. It might have been maybe three or four, or four or five years ago. Maybe it was a litle longer than that.

1592 Q. Well do you know where the eastern mouth of Pearl river is?

A. Yes sir.

Q. When you were out there in the mouth of Nine Mile bayou and about Isle à Pitre and Cat Fish pass. They are there close together?

A. That is I suppose about south of Isle à Pitre.

Q. What do you know about the line between Louisiana and Mississippi there?

A. Well sir, I don't know that I know a great deal of the lines but I have always heard it said you know that the lines run south from the river straight out.

Q. From what river?

A. From Pearl river.

Q. Straight our how far?

A. I believe it is 16 or 18 miles is what I have always understood.

Q. How long have you been understanding that this is the line?

A. Well for 18 or 20 years or maybe more. Maybe it is thirty years.

Q. Do you know anything about the lines. Did you ever read any of the laws describing them?

A. No sir.

Q. What you know about it is entirely f-om what you have heard?

A. That is what I have heard yes sir. I am here under oath and I would not like to say one thing more than what I really know what is right.

Q. And I would not have you to do any thing else?

A. No sir.

Cross-examination.

By Mr. DYMOND:

Q. Now Captain when you fished in the marsh did you see any oats from the Old Basin fishing in there?

A. Yes sir, I saw a great many all over the marsh sir. That is here I have fished, at Grand pass and around Cat Fish, and come hrough Three Mile bayou and you have to go around the Karako here.

Q. Did you or did you not know what the law of Louisiana was that time in regard to non residents fishing in Louisiana?

A. No sir, I did not.

Q. You were not disturbed in fishing there at all?

A. No sir, not at all.

Q. It might have been that the Louisiana law permitted you to sh there at that time might not it?

A. Well every body fished in there at that time sir. I thought at I had as much right to fish there as any body else.

Q. Your idea about your thinking you were in Mississippi was ue entirely to the idea that you had that Mississippi run 18 miles the south of Pearl river?

A. Yes sir.

Q. You knew nothing about what claim Louisiana had to this territory did you?

593 A. Well no sir. What made me think that it might have been in the Mississippi, on account of this line if it run out athward from Pearl river I thought that I was always to the east-ard of this line.

Q. But you did not know that there was a line of Louisiana run-ng three leagues or nine Miles from her shore line over this way stward towards Malheureux point?

A. No sir.

Q. Or that she claimed any thing like that?

A. No sir.

Q. In fishing there Captain did you ever see any boats running tween New Orleans and the coast over here. Running by the golets?

A. Running this way?

Q. Any boats engaged in the coast trade from here to New Or-ans?

A. Well no sir as a general thing when they come from the arshes this way they generally strike out north east is our course.

Q. I don't mean from Three Mile, because that is on the coast be-ween Malheureux point and Isle à Pitre. I mean coming out of e mouth of Pearl river and out of the mouth of the Rigolets. ast boats going from here with charcoal and wood. Do you ow what route they followed. Was there any special course that ey used to go along?

A. Well yes sir, they went down this coast here towards the Rigolets. About a south west course.

Q. Why did they take this course. Do you know?

A. They had to go that way so that they can go straight through the Rigolets I suppose.

Q. Is there any deeper water there than any where else. I mean along through the sound there?

A. I suppose there must be.

Q. Do you know any thing about a channel that runs out of the mouth of Pearl river?

A. No sir, I am not very well acquainted with the channels in that country sir. I have made a few trips to the city but it was always on small boats, and on them you don't have to look for any such things as channels.

Q. When you started fishing oysters you used to get plenty of them around here?

A. Yes sir, I used to fish here.

Q. And as they got scarce here and there was more of a demand you went to other places to get them?

A. Yes sir, in the long run they got scarce. But at present a man can go out there and made a pretty fair day's work yet when he has the weather to do it.

Q. Is not the quality of the oysters in the marshes better for the shucking trade?

A. No better than it is out. Of course in quantity you can get more from there, especially in the raw oyster business.

Q. That is what I say?

A. Yes sir.

Q. You can get more oysters of a better class in the marshes than you can around here for the same kind of work?

A. Yes sir.

1594 A. BEAUGEZ, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. How old are you?
A. 45 years old.
Q. Where do you live?
A. In Ocean Springs.
Q. How long have you lived there?
A. 23 years.
Q. Where were you born?
A. In Jackson county, right across the bay.
Q. What is your occupation?
A. Well carpenter work. I follow boat work.
Q. How long have you been in the oyster business?
A. It has been a good long time.

Q. How many years do you think?
A. Well it has been at least about twenty five years.
Q. Where did you get your oysters?
A. In Grand marsh I run a boat about 12 years, and quit for about 15 years.
Q. When did you run the boat last. When did you quit?
A. Oh it has been about 15 years ago. We stayed on Cat island 11 years.
Q. You stayed on Cat island 11 years?
A. Yes sir.
Q. You lived on Cat island?
A. Yes sir.
Q. Who did you live with?
A. With my folks. My father and brother and sister.
Q. How long is Cat island?
A. The main body of the island is about seven miles long or maybe a little more.
Q. How wide is it out to the woods point?
A. The woods point is about three quarters of a mile wide.
Q. Did you go into Grand marsh from Cat island?
A. Yes sir.
Q. What part of Grand marsh did you go in?
A. The furtherest I went any ways was Cat Fish bayou. You now around the front was covered up with oysters then and we did ot have to go way back.
Q. Did you ever go through Grand pass?
A. Yes sir.
Q. Did you ever go through Three Mile bayou?
A. Yes sir.
Q. When did you first go through Three Mile bayou?
A. I was a young fellow and I did not take no recollection of all f these trips. It has been so long that I have almost forgotten it.
Q. How long did your father live on Cat island?
A. 11 years. We all stayed there together.
Q. In what State is Cat island?
A. I have always heard that it was in Mississippi.
Q. Do you know where Isle à Pitre is?
A. Yes sir.
Q. What State is Isle à Pitre in?
A. I have always heard that it was in Mississippi.
595 Q. Why do you say it is in this State?
A. That is what I have heard. I don't know nothing bout the law. I am not educated enough to know the law.
Q. Tell us what you have heard about it?
A. I have always heard that it was in Mississippi.
Q. Do you know where Pearl river is?
A. Yes sir.
Q. What has been your understanding as to the limits of Mississippi. As to how far it went?

A. The line you mean.
Q. Yes sir?
A. I have always heard that it was the line. That Pear
was the dividing line.
Q. Between Louisiana and Mississippi?
A. Yes sir.
Q. Th-n which way did Mississippi go from the mouth of
river?
A. I have always heard that it went south.
Q. How far?
A. I don't know sir how far.
Q. Could you say as to whether it went to Grand marsh?
A. I have always heard that it went 18 miles. That is w
have heard, but to say that I know it I suppose that I do not.
Q. When were you over there in the marsh the last time?
A. I went in a trip about two or three years ago. I stoppe
business of fishing about 15 years ago.
Q. Did you notice any changes in the bayous and lakes and is
down there?
A. The only place that I saw much change was at Creole g
Q. What change did you notice in Creole gap?
A. It is wider there.
Q. Do you know whether any body ever lived in the Grand
like you did on Cat island.
A. Well there was a camp that the Pascagoula factory had p
there at Kazako bay. The camp stayed there for a good long
Q. What became of it?
A. I don't know sir. I think that they took it up if I am
mistaken.
Q. When was this. How long ago?
A. Just as I told you I was young and I did not keep any re
of it.

Cross-examination.

By Mr. DYMOND:

Q. You say that you have not been fishing for about 15 y
Captain?
A. Yes sir.
Q. This is 1904. 15 years would carry you back to 1889. D
to that you fished and lived on Cat island?
A. Before we moved to Ocean Springs. You can count that
Q. Do you know any people living in Pass Christian?
1896 A. Yes sir, I do.
Q. Do you know a Mrs. Monroe, or the Missies Monroe
the house on the beach there at Pass Christian?
A. No sir, I don't know them. I knew Dr. Laroux.
Q. Did you ever know a man by the name of J. Leori?
A. No sir, I did not know him.

Q. Did you ever know of any body claiming to own Isle à Pitre; having bought it from the Government?

A. No sir, I never heard of it.

Q. So as a matter of fact you don't know whether Isle à Pitre belongs to any body or not?

A. No sir.

Q. You say you thought you were in Mississippi because where you were was 18 miles from the Mississippi shore?

A. Yes sir.

Q. Did you know any thing about what the claims of Louisiana were?

A. No sir, I just went by what I heard.

Q. Now is it not a fact Captain that the marsh has been called the Louisiana marsh just about as much as it was ever called Grand marsh?

A. Well the first time that I heard it it was Grand marsh. The parties would leave here and go to Grand marsh.

Q. How long ago is that?

A. It has been a good long while ago.

Q. When did you first hear it called the Louisiana marsh. About how many years ago do you think?

A. It has been a good while since we stayed on the island. There is Louis Gren, and Baptiste Moran that called it the Grand marsh.

Q. When did you first hear it called Louisiana marsh?

A. Lately.

Q. How many years ago?

A. I could not say.

Q. As much as ten years ago do you think?

A. About.

Q. You don't know what the lawyers from Mississippi say about this being Louisiana marsh in their papers in court?

A. No sir, I did not read the papers. I am not a scholar much.

1597 United States Supreme Court.

THE STATE OF LOUISIANA }
vs.
THE STATE OF MISSISSIPPI. }

Vol. 3, p. 611 to p. 923, incl.

1598 J. B. BEAUGEZ, a witness introduced on behalf of the St of Mississippi, being duly sworn, testified as follows:

By Gen. McCLUNG:

Q. Where do you live?
A. Ocean Springs.
Q. Jackson county, Mississippi?
A. Yes sir.
Q. How old are you?
A. I am 48.
Q. How long have you lived at Ocean Springs?
A. 23 years.
Q. What has been your occupation during this time?
A. Fishing.
Q. Where have you been fishing?
A. Well I have fished all over here in these waters. Chandeleu island and Horn island and Cat island. I have fished a good deal.
Q. Oyster fishing?
A. Fishing mostly.
Q. Do you know where Isle à Pitre is?
A. Yes sir.
Q. Nine Mile bayou?
A. No sir, I have not been in there.
Q. Three Mile bayou?
A. Yes sir, I have been as far as Three Mile bayou and that is about all.
Q. Did you ever fish in this section?
A. Yes sir.
Q. What is that section of country down there called where Isle à Pitre and Grand pass and these bayous are?
A. I have fished down there.
Q. What is the name of the place down there?
A. There is Jack Williams and the Karakos and Three Mile bayou.
Q. How long have you known these places?
A. About 31 or 32 years.
Q. Do you know where the line is that divides Louisiana and Mississippi?

A. Well no sir. I have heard a good many times that the line run from East Pearl river south.

Q. How far south?

A. About 17 or 18 miles south. That is what I have heard.

Q. How long have you been hearing that?

A. Oh well ever since I was a little boy. I have always heard my folks say so. That is the old people.

Q. Have you heard this marsh down there called by any other name except the marsh?

A. I have always heard it called Grand marsh except lately.

Q. Is that marsh; any portion of it within 18 miles of the Mississippi shore?

A. Well yes sir, it is.

Q. The Karako and Jack Williams and these other places. Are they within 18 miles of the Mississippi shore?

A. Yes sir, I rather think they are.

Q. Isle à Pitre?

A. Yes sir, Isle à Pitre is a heap closer than these other places.

Q. When you were in this country down there. At Isle à Pitre and Karako. What State were you then in?

A. Well I thought I was in Mississippi State according to what I have heard.

Q. You have never read any of the laws on the subject?

A. No sir, I never did.

Cross-examination.

By Mr. DYMOND:

Q. You thought you were in Missi-sippi because you thought you were within 18 miles of the shore?

A. Yes sir.

1760 Q. Whether Mississippi is really entitled to the 18 miles from the shore you don't know?

A. No sir.

Q. And as to what Louisiana's rights are in the matter you don't know?

A. No sir.

Q. When you fished there did you not see Louisiana boats fishing there the same as you were?

A. Yes sir, I have seen a good many Louisiana boats fishing there also.

Q. Could you tell exactly what points were 18 miles from the Mississippi shore?

A. No sir.

Q. You don't know whether Martin island is in Mississippi or not do you?

A. No sir, I could not say if it is or not. Martin island is a long ways out.

Q. Did you ever fish oysters?

A. Yes sir, I have fished oysters, but a mighty few.
Q. Where did you fish oysters down there?
A. When I did the oyster fishing I always fished on the r
mostly in front of Isle à Pitre, and all around Cat island and so
at Jack Williams bay, and south of the Karakos.
Q. You are a brother of Mr. A. Beaugez who testified just bef
you did?
A. Yes sir.
Q. And you lived on Cat island with the family?
A. Yes sir.
Q. Did you ever know one John Leovi who had a home at Pa
Christian?
A. No sir.
Q. You quit fishing about the same time that your brother di
About 15 years ago?
A. Yes sir, about that.
Q. Did you know a gentleman by the name of Mr. Gilmore wh
claimed to own Isle à Pitre?
A. No sir, I did not.
Q. You have not fished there since about 1889?
A. No sir.
Q. Now in regard to this being called Louisiana marshes. As I
understand it you say that it has recently been called Louisiana
marshes. Lately?
A. Yes sir.
Q. Well for how many years do you think?
A. Well for about eight or ten years.
Q. Well now as a matter of fact you really don't know which of
these States these marshes belong to do you. As a matter of law or
of fact?
A. No sir, I don't know.

E. LADNIER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you reside?
A. Ocean Springs.
Q. For how long?
A. It has been 23 years that I have been there.
Q. How old are you?
A. 37.
Q. What is your business?
A. Well I have not been doing nothing but oystering.
Q. How long have you been oystering?
A. Well I have been oystering now about 23 years.
Q. Where?
A. Out in the marsh. On the reefs.

Q. What part of the marsh have you been in within the last 23 years?

A. Well we have been working the most in the northern part of it.

Q. Name some of the places?

A. We have been working in Karako bay and Indian Mound bay and Drum bay and in through there.

Q. Were you ever up in the neighborhood of Nine Mile bayou?

A. Yes sir.

1600 Q. Do you know where that is?

A. Yes sir.

Q. Three Mile bayou?

A. Yes sir, Three Mile bayou.

Q. Johnson bayou?

A. Yes sir.

Q. Turkey bayou?

A. Turkey bayou.

Q. Creole gap?

A. Creole gap.

Q. Grand pass. You know all of those places?

A. I know them all.

Q. When you were in those places what State were you in, Louisiana or Mississippi?

A. Well I always thought I was in the State of Mississippi.

Q. Why did you think that?

A. Because I always heard that the line run due south from the mouth of Pearl river.

Q. How far south?

A. I have always understood that it was 18 miles.

Q. Did you ever read the laws on this subject?

A. No sir, I am a mighty poor scholar.

Q. And what you heard is by tradition and what the people say about it?

A. Yes sir, that is all.

Q. Have you noticed any changes in the bayou and islands in the marsh?

A. Not a bit. It has been the same to my knowledge. Only one place, and that is on account of the tide running so hard I suppose. That is Three Mile bayou.

Q. What change did you notice there?

A. Well they washed away there I expect about 100 feet. That is about all.

Q. At what place?

A. At Three Mile bayou, about on the west point of it.

Q. On the west point of Three Mile bayou?

A. Yes sir.

Q. About 100 feet washed away?

A. Yes sir, to my knowledge. It has been 23 years.

Q. State whether or not you have noticed any change in the

height of the islands. Whether they are higher or any lower than they were when you first noticed them?

A. I don't suppose that there is an inch.

Q. You don't suppose that there is an inch?

A. No sir, it has always been the same, only in some places the strong stream of the tide will take the mud off. That is all.

Cross-examination.

By Mr. DYMOND:

Q. You say that you have been fishing oysters for 23 years?

A. Yes sir.

Q. You live at Ocean Springs?

A. Yes sir.

Q. Did you ever fish oysters back here in Back bay about Gravelling?

A. No more than to get a catch of them, a mess for my own use.

Q. Why did you go over to the marshes to fish oysters?

A. That is where I always went. I never made it my business to work here at all.

Q. Were the factories here when you first started to fish oysters?

A. Well no sir, not exactly. When we first started running we got them for shop use.

Q. You think that is 23 years ago as well as you remember?

A. Yes sir, about 23 years ago.

Q. When was the last time you passed through Three Mile bayou?

A. About a month ago.

Q. And you say that the only difference in Three Mile bayou in the last 23 years is that about 100 feet of the west side is washed away?

1601 A. The west point on the bayou is washed away.

Q. Did you ever measure it there?

A. No sir, I did not go to that much trouble.

Q. How wide was Three Mile bayou when you first saw it?

A. Well I suppose that it was about three or four hundred feet or something like that. I would not say exactly.

Q. That is 23 years ago?

A. Yes sir, 23 years ago.

Q. How wide is it today?

A. Today I don't suppose that it — more than 500 feet.

Q. What is the condition of the west side of Three Mile bayou today. What does it look like when you go in there? What is the difference between the west side and the east side?

A. The west side of it comes in to a point like and the east side is a body of land.

Q. What is the condition of the point on the west side?

A. Well it comes right narrow just like I am telling you, to a point.

Q. And that is all there is to it?

A. Yes sir, that is all.
Q. You are positive about that?
A. Yes sir.
Q. You could not be mistaken?
A. No sir.
Q. And you were out there a month ago?
A. Yes sir, there is a narrow point comes there and makes a little mud shoal.
Q. Is not there a little grass on it. Is there not a little island down there on the west point?
A. Yes sir, it is from the point washed away like I tell you.
Q. Is not it much more than a hundred feet from that island back to the main shore on the west side?
A. It may be. I have not measured it.
Q. Well now did it not use to run away beyond this little point that is left there. Did not this point use to run much further north east and did you not use to have to come in on a south west course?
A. You have to now.
Q. Did you not have to come in on a much more southwest course 23 years ago than you do now?
A. Not much.
Q. How much then?
A. Well no more than a couple of hundred feet anyway.
Q. Now Captain if you were told that certain witnesses knew that bayou when it was not more than seventy five feet wide would you be prepared to say that the witnesses were not stating the truth?

By Gen. McCLURG: Counsel for Mississippi notes an exception to this question on the ground that it is incompetent to have this witness express his opinion as to the truthfulness or untruthfulness of what other witnesses have testified in this case. It being left to him to tell what he knows, and then it to be compared by the court with what other witnesses have to say, and who have not been impeached.

Q. Now Captain, if I were to tell you that certain witnesses knew hat bayou when it was not more than seventy five feet wide, would ou be prepared to say that those witnesses were not telling the uth?
A. I don't know. It might have been seventy five feet beyond y knowledge.
Q. Now Captain were you ever stopped from fishing oysters in the arshes Did any body ever stop you from fishing them there?
A. No sir.
Q. Did you fish there last year?
A. Yes sir, I fished there last year.
Q. Did you have a license when you fished there?
A. Yes sir.
Q. A Louisiana license?
A. Yes sir.

Q. With that Louisiana license did not you have as good a chance as any one else to fish in there?
A. Yes sir.
Q. What did you do with your oysters?
A. I brought them to the Rigolets.
Q. To the Louisiana Oyster Company?
A. Yes sir.
Q. It did not work any hardship on you because you had to get a Louisiana license?
A. Not to say a hardship. I paid $16.50 for it.
Q. How many boats did you have?
A. One big boat.
Q. How much was the Mississippi license?
A. The Mississippi license cost ten dollars.
Q. You had to send your oysters to Louisiana. You could not take them to Mississippi?
A. No sir.
Q. You had as much opportunity to fish down there as you did before except that you fished under a Louisiana law?
A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. When did you first buy a Louisiana license?
A. This winter past. Last year.
Q. When did you first buy a Mississippi license?
A. I got that two years ago.
Q. Where did you fish under the Mississippi license two years ago?
A. We fished as far as Grand pass.
Q. Have you ever fished any in the marshes under the Mississippi license?
A. No sir.
Q. What has that marsh been called down there?
A. I have always called it and heard it called Grand marsh, or the marsh.
Q. You have heard it called Louisiana marsh have not you?
A. Yes sir, here lately.
Q. Since when?
A. It has not been more than a couple of years since I have heard it called that.

LOUIS RYAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. How old are you?
A. I am 65 years old.
Q. Where do you live?
A. At Ocean Springs, Miss.
Q. How long have you lived there?
A. I was born and raised there.
Q. Do your parents live there?
A. Yes sir.
Q. How long did they live there?
A. I don't know how long they lived there. I know that I was born and raised there so far as I know. I could not tell you how long they have lived there.
Q. What is your present business?
A. Boating.
1603 Q. How long have you been boating?
A. Almost all of my business is boating in these waters. Running pleasure boats and so on. That is the most of my work.
Q. Are you familiar with the waters between Ocean Springs and Pearl river?
A. Yes sir, as far as Pearl river, yes sir.
Q. Do you know any thing about Nine Mile bayou and Three Mile bayou and Turkey bayou?
A. No sir.
Q. Do you know any thing about the marsh?
A. No sir.
Q. How long have you been knowing the eastern mouth of Pearl river?
A. Well I guess that I have been knowing the eastern mouth of Pearl river somewhere around 25 years.
Q. Where have you been generally running your pleasure boats?
A. Between here and Pass Christian and Scranton and so on.
Q. Did you ever go out south of Deer island and Ship island?
A. Yes sir, I have gone as far as Horn island.
Q. How long have you been going in that territory. Out in the Ship Island territory?
A. Well I have not been at Ship island for I don't know how long.
Q. When did you first see Ship island?
A. I guess I must have been about 14 years old. That is when I first went there.
Q. Well tell us what you know about the boundaries of Mississippi and Louisiana, Captain.
A. I don't know any thing about it sir.
Q. You have never read any books on it at all?

A. I never have.
Q. Have you ever heard the old people say any thi
A. Only lately I have heard the people talking abou
the boundaries of Louisiana and Mississippi, that is all
about it. As far as my own knowledge is concerned I
any thing about it.
Q. You don't know where the line is?
A. No sir, I do not. All that I heard, that the line t
the State of Louisiana and Mississippi they say is Pearl
Q. You know where East Pearl river is do you?
A. Yes sir, I know that.
Q. Have you any idea which way the line runs out of
of East Pearl river?
A. No sir.
Q. You don't know?
A. No sir.

L. FAYARD, a witness introduced on behalf of the State
sippi, beirg duly sworn, testified as follows:—

By Gen. McCLURG:

Q. Where do you reside?
A. Ocean Springs.
Q. How old are you please sir?
A. I will be 55 in July.
Q. How long have you lived at Ocean Springs?
A. I came to Ocean Springs five years after the surrende
Q. Where from?
A. I was in Mobile during the war. My native home i
town of Biloxi.
Q. What is your present occupation?
A. My present occupation is attending to a county bridg
Q. What is your occupation during your past life?
A. An oysterman.
Q. From Ocean Springs?
A. Yes sir.
1604 Q. Where did you take oysters?
A. You mean the place that I took the oysters from
is what we call Grand marsh.
Q. When did you first take oysters in Grand marsh?
A. I think as near as I can recollect it was about 1870.
Q. How long did you continue to take them from 1870?
A. Well along for about 15 or 20 years.
Q. So then you took oysters from about 1870 to about 189
A. Yes sir.
Q. From what place in the Grand marsh did you take oyst
A. Well from the two point lagoon and Karako bay, and
pass, and Creole gap and Jack Williams bay.

Q. In what State are those places?

A. Well I have always heard it called the Grand marsh.

Q. Is it in the State of Mississippi or in the State of Louisiana?

A. We have always been under the impression that it was in the State of Mississippi.

Q. Why?

A. I have always heard that it was that way.

Q. Do you know where Isle à Pitre is?

A. Yes sir.

Q. It is north of these places that you have mentioned or north east is it?

A. It is north east.

Q. You know where the mouth of Pearl river is?

A. Yes sir.

Q. Malheureux point and all of those places out there?

A. Yes sir.

Q. How long has it been your understanding that these places that you have mentioned are in the State of Mississippi?

A. About 12 years.

Q. Did you ever buy any license 12 or 15 years ago to fish oysters in the State of Mississippi?

A. No sir.

Q. Did you ever buy any license at all?

A. No sir.

Q. Did you ever buy one from Louisiana?

A. No sir.

Q. Tell us how it was that you first come to the understanding that these places we are talking about were in the State of Mississippi?

A. Well I just knew that in running for these different firms along down the coast, and running some times down to Mobile.

Q. For what?

A. Oysters.

Q. At what points here did you deliver your oysters to?

A. Well I delivered them —; it was what was called the raw oyster business at that time.

Q. Was this before the canneries started?

A. I run with Mr. Gornflo and Mr. Lopez, and I used to run for Mr. Desports down here and I run back to Back bay too.

Q. When were you in the marsh the last time?

A. It has been a good while. I freighted oysters out of Three Mile bayou about three years ago.

Q. What was the draft of your boat?

A. My boat that I run on when it was loaded was carrying 450 to 500 barrels and drawing five feet of water.

Q. How far down Three Mile bayou did you travel thus loaded?

A. I did not go any further than about a half a mile or three quarters inside of the bayou.

Q. Do you know whether or not that trip could be made through

Three Mile bayou out into the sea about Door point and San
island and Brush island and down in that country?
A. Do you mean to go down into the marsh?
Q. Yes sir.
A. Do you mean what draft?
Q. Yes sir.
A. I have run a schooner through with about 150 barrels of
ters on board, drawing three and a half feet.
1605 Q. What course did you take?
A. It is generally northeast all the way through.
steered about south southeast to get through the Karakos and
up north east.
Q. Through Three Mile bayou?
A. Through Three Mile bayou into the marsh?
Q. Yes.
A. I come out to what they call Deep Water point.
Q. Where is that?
A. It sets about north east also.
Q. Through Three Mile bayou?
A. Yes sir, coming out that way through the marsh.
Q. How long have you been knowing that marsh?
A. I have been knowing that marsh ever since I can remembe
Q. What has it been called?
A. I have always heard it called Grand marsh.
Q. Did you ever hear it called the Louisiana marsh?
A. Well I have heard it called Louisiana marsh about two yea
to my knowledge.
Q. Before that time it was called what?
A. Grand marsh.

Cross-examination.

By Mr. DYMOND:

Q. You never heard it called Mississippi marsh, did you?
A. No sir.
Q. Now when you were freighting oysters was not it the custom
of the big boats like you were on to lay in the mouth of Three Mile
bayou and wait for the little boats to come there and deliver their
loads to you?
A. Yes sir, not in the mouth. From one half to three quarters
of a mile inside.
Q. Is it not a fact that the freight boats did not go further out
into the marsh. That they lay as you say less than a half a mile
on the inside of the marsh. Take these boats that Dunbar and
Ducate and Lopez had. Are not they accustomed to lay less than
half a mile on the inside of the mouth of the bayou?
A. Well that is customary, yes sir.
Q. When you spoke of going through with a boat drawing three

and a half feet of water. You referred to Deep Water point. Is not that also called Deep pass?

A. Well they have different names for it. We have always called it Deep Water point.

Q. Is that not just south of Brush island?

A. Yes sir.

Q. And that is on the course east from Raccoon island, is not it?

A. Yes sir.

Q. Well now you state that it was north east. Where did you get the idea that it was north east Captain?

A. I mean sailing from the coast.

Q. You mean that when you left Deep Water pass that you have to sail north east to get to the coast?

A. Yes sir.

Q. You sailed east up this way, did you?

A. Yes sir.

Q. Now the boats that usually fish in the marshes. They were small boats so far as the draft was concerned?

A. Some are small draft, but as a general thing the boats would run into the marsh for good oysters. As a general run of the boats none of them drew any less than my recollection is three feet. Since we have had these canning factories of course the canning factories have made smaller draft barges and run them in there.

Q. Those boats can not go through the marshes?

A. Yes sir, if you know your route you can go through the marshes with a boat drawing three or three and a half feet of water, all through there but you have to know your road.

1606 Q. When did you first start in the oyster business?

A. In 1870.

Q. At that time where did you fish mostly?

A. Mostly in the Grand pass.

Q. Did not you ever fish around here at Back bay and at any of these reefs in this locality?

A. Yes sir.

Q. How were the oysters then in 1870 in this locality. Were there many of them?

A. Yes sir, there was a right smart of them.

Q. What sort of trade did you supply with these oysters?

A. We fished for the Mobile market and would also fish and take a load to New Orleans.

Q. There were no canning factories here then were there?

A. No sir.

Q. What was it that caused you to start fishing over there in what you call the Grand marsh?

A. We went out there fishing and found the oysters plentiful.

Q. You did not have to work so hard to get a certain amount of oysters?

A. No sir.

Q. Well now you saw boats from the old basin and other pl in there fishing also?

A. Yes sir.

Q. Did any one stop you from fishing there when you were f ing out there in the marsh?

A. No sir.

Q. When was the last time that you fished out there Captain?

A. Well it has been according to my recollection about ten ye ago.

Q. Well now you say that you think that it is about two ye ago that this place was first called Louisiana marshes? Are y not mistaken about that and has it not been longer than that it h been called Louisiana marshes?

A. No sir, not to my recollection.

Q. If you have not been there for ten years how do you know th it has only been two years that it has been called that?

A. Well that is the general talk when they originated this licen business.

Q. Was not it called Louisiana marshes before this license busine was started?

A. Not to my recollection, no sir.

Q. How do you account for the fact that the lawyers for Missi sippi admitted that it was called Louisiana marshes?

A. I could not say sir.

Q. How do you account for the fact that the witnesses on thi stand who have testified this morning; Mississippians say that t their knowledge it has been called the Louisiana marshes for ten years?

A. I have not heard it.

Q. You just simply have not heard it?

A. No sir.

Q. Now, Captain as a matter of fact have not you fished in Drum bay?

A. Yes sir.

Q. Did you consider that you were in Mississippi when you were fishing in Drum bay?

A. We considered that we were fishing in Mississippi waters, yes sir.

Q. You don't know whether Drum bay is within 18 miles from the Mississippi shore or not do you?

A. No sir, I have not measured it and I could not tell you that.

Q. You fished at Martins island?

A. Yes sir.

Q. You thought that you were fishing in Mississippi then?

A. Yes sir.

Q. Well now Captain is it not a fact that you never did consider whether you were fishing in Mississippi or not. That never came up for you to consider it. Nobody never disputed it with you down

there and said that you were not in Mississippi and must stop fishing?

A. No sir.

Q. Is it not a fact that you never had that question to come up in any way at all to make you say positively that you were not
1607 in Mississippi?

A. No sir.

Q. Well now did the thing ever come up in any way to make it necessary for you to determine whether you were or whether you were not in Mississippi?

A. No sir.

Q. You say when you fished in Drum bay you thought you were in Mississippi?

A. Yes sir.

Q. Well now let's look for a moment Captain at this map which is called Mississippi "A" attached to the testimony of W. K. M. Ducate, and I will ask you to look at this red ink line which is called the Mississippi line?

A. Yes sir.

Q. And I will ask you to see whether Drum bay is north or south of the red ink line?

A. It is south.

Q. I will ask you to look at Martin island and see whether that is north or south of that red ink line?

A. It is south according to that line.

Q. It is what?

A. It is south.

Q. Well now if the 18 mile line is represented by this red ink line, if that is the end of the Mississippi line, then when you were fishing in Drum bay and at Martins island were you or were you not fishing in the State of Mississippi?

A. We always thought we were fishing in Mississippi but according to that business there it looks like we were not.

Q. Well is it not a fact Captain that there was not any boundary line or post down there or any thing of that sort so that you could not really tell whether you were or were not in the State of Mississippi?

A. I could not say no sir.

Redirect examination.

By Gen. McCLURG:

Q. Your attention was called to this map south of the Mississippi line and you were asked whether any measurement had been taken or any line had been marked out?

A. No sir.

Q. Did you see any marks or posts indicating where the southern boundary was?

A. No sir.

Q. You supposed that you were within 18 miles of the Mississippi shore?

A. Yes sir.

J. S. CATCHOT, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. How old are you?

A. I am going on 44 years old.

Q. Where do you live?

A. At Ocean Springs.

Q. How long have you lived there?

A. All of my life. I was born and raised there.

Q. What is your present business?

A. The oyster business.

Q. How long have you been in the oyster business?

A. Since I was a child.

Q. Where have you been taking oysters?

1608 A. The most of my oysters I have taken since 1869 was from the Grand Louisiana marsh, and Cat island. I have been in the oyster shipping business and shipping in Alabama.

Q. When you were taking oysters down there in what State were you?

A. Well we were taking the most of them from Louisiana marsh. Getting most of our oysters from Louisiana marsh.

Q. Where did you carry them?

A. To Ocean Springs. Most of our business was shipping oysters. Alabama, Tennessee and Georgia.

Q. Did you ship raw oysters?

A. Yes sir, we got them for the shops around here. The local use.

Q. Why did you go down to the marshes to get them?

A. I had not been out there very much, but we had boats running them. We had as high as seven or eight schooners, or twelve, running oysters.

Q. How often did you go out there yourself?

A. My first visit in the Louisiana marshes was in 1874. I had a schooner of my own, not of my own, but my father rented a schooner from Mr. Nelson by the name of Effie May. My father built a schooner afterwards and I went out there running oysters at Creole gap and Grand pass, and I have gone as far as what they call Cranetown pass down there.

Q. What sort of boats did you go in there in?

A. Boats carrying 150 barrels of oysters.

Q. What draft?

A. Light draft. Drawing about three feet or three and a half at the most.

Q. Did you ever go through Three Mile bayou?
A. I don't know much about Three Mile bayou. I have been out in the Grand marsh a great many times.
Q. Did you ever go through Grand pass?
A. Yes sir, I have fished oysters there many a time.
Q. How deep did your boat draw?
A. My boat never drew over three and a half feet of water.
Q. Did you ever go through Johnson bayou?
A. I think I have but I would not state.
Q. Have you ever been through Turkey bayou?
A. I could not state. I might have been but I don't know.
Q. Have you ever been in the Karakos?
A. Yes sir.
Q. How deep did your boat draw through there?
A. Well I could go through there with a boat drawing three feet of water or three and a half.
Q. Were you ever in Indian Mound bay?
A. No sir.
Q. Drum bay?
A. No sir, I could not state.
Q. You have been about Bayou Greecue?
A. Yes sir.
Q. How deep was your boat drawing there?
A. I could go in Bayou Greecue in some places drawing ten feet of water.
Q. I am talking about going through it?
A. I could go through there all right.
Q. At what draft?
A. At three and a half feet yes sir.

Cross-examination.

By Mr. Dymond:

Q. What was the name that you knew the marshes to be called by?
A. Well sir, I have known those places that I have been at there. There is Creole gap and Grand pass and Karako bay, and Cranetown pass and Brush island and Martin island. I have been as far down as what they call Martin island.
Q. Was this in Louisiana or Mississippi?
A. It was in Louisiana. Yes sir, I think it was. It was pretty far down south. Now I will tell you. I don't know much about Louisiana and Mississippi boundary, but it was stated it was Louisiana. It was pretty far down. I was never a great oyster man to say running schooners and making a living out of them. I
1609 was in the oyster business, shipping oysters and buying them.
Q. Is it not a fact Captain that you understood that these oysters were coming from the Louisiana marshes?

A. Well now the men would state that.

Q. They would tell you that they were getting oysters from the Louisiana marshes?

A. Yes sir, and you see why. You see all of these shell banks from Cat island were considered in the State of Mississippi, and down 25 miles down they called it the Louisiana marshes oysters. But to know about this business I am ignorant of it.

Q. Now these Louisiana marsh oysters. Did they not come from Karako bay?

A. Yes sir.

Q. And Three Mile bayou and Grand pass?

A. Yes sir.

Q. In fact all of the oysters that they caught down there in the marshes were better oysters for your shuck business than the oysters gotten out here on the reefs?

A. Oh my God, yes sir, those were finer oysters.

Q. You had to go there to get them?

A. Yes sir, and without those oysters—I will tell you my friend, the people are in need of them, because they are the best oysters. The shell bank oysters are no circumstance to the Louisiana marsh oysters, and there are millions of barrels of oysters in these Louisiana marshes. They will never destroy them in hundreds and hundreds of years to come. Cull the oysters and throw the shells back. Mississippi or any other State can go there and catch for 100 years and never destroy them. There will always be oysters there. There are oysters there for centuries and centuries and they never could destroy them for hundreds and hundreds of years to come. Mississippi or any other State could not destroy them I am going to get me a schooner and go there and catch me a load of oysters, and they can put me in jail if they want to.

Q. When did I understand you to say that you were going down there to get them?

A. I don't know when. I don't know when. I say if I ever take a notion to.

Q. If you take a notion you are going there to get your oysters whether they put you in jail or not?

A. I made my first visit there in 1874. I fished there in 1874, 1875 and 1876 and 1878. I went out and got a load of oysters in the marsh in 1880, 1881 and 1882.

Q. You don't believe that one State has the right to use that place down there and say that another State can not go in there and fish?

A. I will tell you if I could vote a few times on that. I would say that I would try and prohibit it. I would say let's go there and be friends and catch oysters. It is some thing that grows and increases. You know there is nothing on the face of the earth that increases like oysters.

Q. You do not think that one State ought to stop another State from fishing in there?

A. No sir, Louisiana ought not to stop Mississippi from going in there, because they could go in there and catch oysters year after year. I know men that have been fishing in the marsh before the war and after the war, and they fished up to the time that the laws of Louisiana prohibited them from going in there. It is ridiculous.
Q. You think that is all wrong?
A. It is wrong and very wrong. It should be stopped sir.

Redirect examination.

By Gen. McClurg:

Q Did you ever see a whale down there?
A. No sir, I never saw a whale there.

The commission here adjourned until tomorrow morning at nine o'clock.

1610 Tuesday Morning, June 14th, 1904.

The commission met this morning at 9 o'clock. There were present Col. F. C. Zacharie, representing the State of Louisiana as counsel, and Gen. Monroe McClurg, and Hon. J. N. Flowers, on the part of the State of Mississippi as counsel, and Hon. William D. Bullard, commissioner.

Z. T. Champlin, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McClurg:

Q. How old are you Mr. Champlin?
A. 57 years old.
Q. Where do you reside?
A. In Biloxi, Miss.
Q. How long have you resided in Biloxi?
A. 17 years.
Q. Do you hold any office in this county?
A. Yes sir.
Q. What office is it?
A. Justice of the peace and county administrator.
Q. This is Harrison county?
A. Yes sir.
Q. What district?
A. District No. 1.
Q. Of Harrison county?
A. Of Harrison county.
Q. How long have you held that office?
A. A little over 16 years. Going on 17 years.
Q. This is an office of record?
A. Yes sir.

Q. And it uses no seal?

A. It uses no seal.

Q. It has jurisdiction of civil matters within a certain limit, a final jurisdiction of misdemeanors under the laws of this State?

A. Yes sir.

Q. And has had during the whole time that you have been ju tice of the peace?

A. Yes sir, the whole time, 16½ years.

Q. Are the books and records of this office in your keeping?

A. Yes sir.

Q. I have here a certificate signed by you on the 14th day of Jun 1904 certifying to the correctness of final judgments entered b you on the 14th of March 1890 against divers persons for market ing unculled oysters to-wit: —— Miller, —— Fulford, M. Edwards J. Pervisich, Capt. Strong, Marco Ladina, Dominick Dulcich, John Baker, M. Bagatella, Emile Borsorge, George Smee, R. B. Galloway John Raymond, Jack Covacovitch, John McAdy, Capt. Raymond, Tony Bonacich. I will ask you to state whether you have ex amined and compared these certificates with the original entries made by you on your docket and see whether they are correct?

A. I have compared them and found them correct.

Q. I notice in your certificate that you say that you have made search for the affidavit and other papers accompanying these rec ords and have not been able to find them. Is that correct?

A. Yes sir, I have. It has been so long ago since they were made.

Q. Your docket shows the charges against these several persons "The marketing of unculled oysters," but the docket fails to dis close where the offense was committed. I will ask you to state whether the affidavit or warrant made any specific statement other than in the county as to the commission of the offence?

1611 A. No sir, the affidavit only states that it occurred within my county.

Q. Have you any personal knowledge as to where these offences occurred?

A. All that I know is they were here in *in* this district. Right here in the city of Biloxi or in this neighborhood that the oysters were unculled. That is the violation of the law. To market them in that way.

Q. I notice here on your certificate it is noted "In channel, wharf unloading, in front of Lopez factory" and memoranda like that. What does that mean?

A. I think that it is merely to indicate where they were at the time they were arrested by the officers or as a memoranda for the officers to locate them. Perhaps the man who made the affidavit told that. I have no recollection about that.

Q. As to the place where they got these oysters have you any personal knowledge?

A. None in the world.

By Gen. McCLURG: Counsel for Mississippi here now offers to introduce in evidence the certified copies of the records above mentioned, and furnishes to the counsel for the State of Louisiana a true copy of the same. The records now offered in evidence are marked Mississippi Document No. 23.

Q. I have here also Mr. Chamberlin copies made from your docket of final judgments, one in the case of The State of Mississippi *vs.* M. Bagatella, for violating oyster ordinance of Harrison county, in which you imposed a fine of ten dollars and costs, and also the case of The State of Mississippi *vs.* Jake Stanovitch for violating the oyster ordinance of Harrison county Miss. in which you fine- him ten dollars and the costs. Those two cases were tried it seems on the 20th of January, 1894, upon affidavits filed on the 27th of November 1893. I also have a copy from your docket in the case of The State of Mississippi *vs.* John Bowen charged with resisting arrest, affidavit filed December 22nd, 1893, and final judgment entered on February 17th, 1894, upon a verdict of the jury acquitting him. I wish you would please see if you have compared these certificates with the original entries on your docket to see whether they were correct?

A. I have compared them and found them correct.

Q. I notice in your certificate that you say that you have made diligent search for the affidavit and other papers in your office and all places where they are usually kept or likely to be found and that you have been unable to find them?

A. That is so.

Q. Have you any personal knowledge as to where these violations of the ordinances of Harrison county occurred?

A. Nothing except that they were in my county. Nothing more than they are on the record. No personal knowledge at all. I have a recollection of the Bowen case.

Q. The case against John Bowen for resisting arrest, you have the same certificate, not being able to find the affidavit and warrant and other papers?

A. Yes sir.

Q. Have you any personal knowledge as to the place where that offense was alleged to have been committed?

A. I have a recollection as to where it occurred. It was said to have occurred in the evidence before me to the best of my recollection now that it occurred some where below Grand pass or Sundown island or some where down in there.

By Col. ZACHARIE:

Q. You have no personal knowledge of it?

A. No sir, no personal knowledge except that the evidence was before me.

By Col. ZACHARIE: This evidence is objected to on the part of

the State of Louisiana for the reason that this is mere hear-
1612 say evidence, and can not be admitted even as secondary evidence under the circumstances detailed by the witness.

By Gen. McCLURG: Counsel for the State of Mississippi here produces and offers in evidence on the part of said State the certified documents being transcribed from the docket of Z. T. Champlin, justice of the peace, in the cases of The State of Mississippi vs. M. Bagatella, Jake Stanovitch, and John Bowen and furnishes the counsel for the State of Louisiana a copy of the same, and marked Mississippi Document No. 24.

Q. I understood you to say that you had been holding the office of justice of the peace for district No. 1, of Harrison county, Mississippi for nearly 17 years, and that you have been exercising jurisdiction as shown by the certificates which have been taken from your dockets and certified by you to some extent on the waters of the Mississippi sound. I will ask you to please state how far to the southward of the Mississippi shore line you have exercised jurisdiction during the time that you have been holding office?

A. A distance of six leagues from the main shore.

Q. Where is that if you know. The southern boundary of the State of Mississippi?

A. The southern boundary of the State of Mississippi. Do you mean to locate the place?

Q. No?

A. It would be six leagues or 18 miles from the main shore line of the State of Mississippi. I have always considered that my jurisdiction was 18 miles due south. In fact I have exercised it often as far as Ship island until I was stopped by the Supreme Court deciding that the United States had jurisdiction of that island, and within one mile of the waters surrounding it. Then I have gone as far east of here as Grand pass.

Q. Did you ever go any further than Grand pass?

A. That is considered the limits of Harrison county.

Q. What county to the westward of Harrison county?

A. That is Hancock county.

Q. I will ask you to look at the map Exhibit "A," exhibited with Mississippi's answer and cross bill and see if you can find Grand pass on the map?

A. Yes sir, here is Grand pass (the witness shows the location on the map).

Q. And Sundown island?

A. Yes sir, this is Sundown island. This is about the place where Bowen is said to have committed the offense for which I tried him.

By Col. ZACHARIE: The same objection is entered on the part of the State of Louisiana in regard to hearsay testimony as was entered above.

Q. About how far is it from the Mississippi shore about the center of Bay St. Louis to Sundown island?

A. Well I don't know only approximately. I would judge that it was 14 or 15 miles or some thing like that.

By Col. ZACHARIE:

Q. You have never been there?

A. No sir. I have never been to these islands.

By Gen. McCLURG:

Q. Have you ever been on Isle à Pitre?

A. No sir, I never have been on it.

Q. Did you know Mr. James B. Holly in his lifetime? The justice of the peace?

A. I knew the justice of the peace, but it does not seem to me that that was his name. It is L. B. Holly.

Q. L. B. Holly. Yes sir, that was his name.

A. Yes sir, Lyman Holly was his name. I knew him.

Q. What office did he hold if any?

A. The office of justice of the peace of district No. 1. This district.

1613 Q. When?

A. My recollection is that he was holding the office of justice of the peace when I came here in 1887.

Q. Whom did you succeed to that office?

A. I succeeded W. M. Jordan, because I believe Holly was elected with me that year. We are entitled to two justices of the peace in this district. I think that he was elected with me and Jordan was the one that went out. One of these dockets is Jordan's docket that he handed to me when he went out.

Q. Where is L. B. Holly?

A. He has been dead for some years.

Q. Where is Jordan, the other justice of the peace that you spoke of?

A. He also is dead. Has been for a number of years.

Q. Can you say whether or not these officers exercised jurisdiction to the same extent that you have been exercising it since that time?

A. Well I can not say except, I know of no particular instance where they exercised it, except that it was thoroughly understood that our jurisdiction was as I have stated it.

Q. You have no personal knowledge about it?

A. No sir, I have no recollection of where they exercised it.

Q. I will ask you this question. What the general understanding of the public was, has been in and about Biloxi and within your district as to the southern boundary line of the State of Mississippi, and Harrison county?

A. The general understanding of the public, deriving it from the description of the boundary of Harrison county, is that it takes in

18 miles south or six leagues south of the main shore, includ islands within that distance. It has always been so, and few years ago I never heard a contradiction of that question.

Q. About how many years ago, Captain?

A. Well I would say six or eight years ago. I do not rem exactly.

Q. Mr. John Bowen is the man here that you tried for res an officer?

A. Yes sir.

Q. Is this the gentleman that is present here now?

A. Yes sir, that is the gentleman over there. He is Capt. Bowen.

Q. That is the man whom you tried as certified to by you i record, which we have introduced in evidence here?

A. The same man, yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Chamberlin, in all of these cases which you say brought before you, these first cases alluded to in the certific first offered by the counsel for the State of Mississippi. The offe charged was for marketing unculled oysters was not it?

A. Yes sir.

Q. Now I see here "In channel, unloading, in front of Lopez' tory." Those parties were committing those offences in the im diate vicinity of Biloxi were not they?

A. Yes sir.

Q. Now I see in some of them that the State failed to lay t venue. What does that entry mean?

A. It failed to show that it occurred in my district, district No. of Harrison county. It did not show where it was. If you wi pardon me right here it has occurred to me that those entries wi show that when they were out there getting the oysters they we not committing any offense. The statute seems to be marketin them. The mere having them in possession would not be a viola tion of the law.

Q. What do you mean in there by channel. That is the channe in front of Biloxi?

A. Yes sir, out in front of Biloxi. I see here one time i
1614 says unloading. He made the trade at that time and was marketing his oysters.

Q. Do I understand that these entries that are here as they appear here are exact transcripts of what appears on your minutes?

A. Exactly what appears on my dockets word for word.

Q. There are no papers or documents connected with these suits?

A. I have none. I have made a diligent search for them, but on account of the changes and the time that has elapsed I have been unable to find any of them.

Q. Now will you please explain what you mean by district No. 1. Is Harrison county divided into districts?

A. Yes sir, Harrison county is divided into three districts fronting the shore line. The coast. District No. 1 runs from the eastern limits of Harrison county to what is known as Beauvoir, which is west of us, and then there commenced district No. 2. It runs north between parallel lines you know, then from Beauvoir district No. 2 commences, and I believe it is my understanding that it runs to about Long Beach on the coast. Then No. 3 commences to run and goes to the western limits of Harrison county.

Q. That is to Bay St. Louis?

A. To the center of the draw bridge at Bay St. Louis

Q. I notice in the case of Bagatella, as it is mentioned in what purports to be a transcript here, that it is a general charge of violating the oyster ordinance of Harrison county, Mississippi. What was the specific violation?

A. Just now I could not tell you. I would have supposed that the affidavit would have stated in what way he violated it, but I have no recollection as there was the usual ordinance passed and I was enforcing it.

Q. You could not tell the locality where the violation took place?

A. No sir, except that it was within my county.

Q. Now in the case of Stanovitch. Do you recollect what was the particular offence?

A. No sir, I don't remember. Just as in the other case.

Q. Now in regard to John Bowen. As I understand your testimony in chief he was charged with resisting an officer?

A. Yes sir.

Q. And you testified merely from hearsay that it occurred at Grand pass?

A. Yes sir, I said near Grand pass. I think that it occurred somewhere about Sun Down island, or between Sundown island and Grand pass. That is my recollection. I remember having the map there, or rather a chart of the coast. Not exactly a map because it showed the depth of the water and everything of that kind. I had that in my court at the time the case was tried.

Q. Now will you please examine this map Mississippi Exhibit A, and say run a line due south from Bay St. Louis. Would not both Sun Down island and Grand pass both fall without your jurisdiction and within the jurisdiction of the justice of the peace of the third district, if it was at all within the jurisdiction of Mississippi. You will notice on this map where Bay St. Louis is?

A. Yes sir.

Q. Now run this south line down there?

A. The south line would come over in and take in the west ward of Grand pass down there.

Q. Would not they fall then, both Sun Down island and Grand pass. Would not they fall outside of your jurisdiction?

A. I am a conservator of the peace for the whole county. I can try cases where it occurs outside of my own district.

Q. As I understand you as the justice of the peace, *has* general jurisdiction over the whole country?

A. Yes sir.

Q. What does that extend to, misdemeanors?

A. Yes sir, misdemeanors.

1615 Q. Do you remember what was the character of the resistence — the officer. Was there a warrant issued?

A. Yes sir.

Q. What for?

A. For resisting arrest.

Q. Oh I mean what was the original offence?

A. No sir, I have no recollection of that at all. I have no recollection outside of what the record shows, except the fact where it occurred and that I recollect from the use of the map to locate it.

Q. Well now, what time were you inducted into office? First as justice of the peace?

A. January 1st, 1888.

Q. January 1st, 1888?

A. Yes sir.

Q. Had you been residing in Biloxi before and if so how long?

A. I moved to Biloxi in March 1887, and was elected justice of the peace at the November election following, and have held the office continually since.

Q. Well now you were asked the question in your examination in chief by the counsel for Mississippi as to the general public opinion as to the southern boundary line of the State of Mississippi and you answered to that question that you had always considered the boundary as extending six leagues of 18 miles south of the main shore. Now is it or is it not a fact that this marsh territory to the southern has been from time immemorial, as far back as you can remember, considered a portion of Louisiana and a portion of the parish of St. Bernard?

A. No sir, I don't know that to be a fact.

Q. I am speaking of the general understanding?

A. I think if you will look at my answer I stated that the general understanding of the public was that the Mississippi territory extended that far.

Q. Well now is it or is it not a fact that those marshes over there were generally called both amongst the fishermen and others the Louisiana marshes?

A. Well I have heard them called both Louisiana marsh and Grand marsh.

Q. Is it not a fact that the more general appellation was Louisiana marsh?

A. Well I don't know just which one was called Louisiana marsh. It might have been the southern portion of them and it might have been the northern portion of them.

Q. I am speaking of the generic name for the whole of these low lying marshes over there. Has it or has it not been the general expression when the mosquitoes got bad on this coast, that they would say that they came from the winds bringing them from the Louisiana marshes?

A. I have heard that many a time. There is no question about that.

Q. I understood you to say in your examination in chief that you personally did not know where this Mr. Bowen resisted arrest?

A. No sir, personally I know nothing of it at all. All that I know is what my records disclose, and my memory that the question of jurisdiction was brought up and I decided that it was in my jurisdiction.

Q. As magistrate have you or have you not derived your idea of the boundary, of the southern boundary of the State of Mississippi from the inspection of an act admitting Mississippi into the Union in 1817, and also from the boundaries laid down in the Mississippi laws?

A. That is what I have worked on. That is my authority.

Q. Did you ever take into consideration the fact that in the act admitting Louisiana into the Union five years prior to the admission of Mississippi; that is Louisiana was admitted in 1812 and Mississippi was admitted in 1817. Did you ever take into consideration that the prior act admitting Louisiana gave Louisiana all islands within three leagues or nine miles of her coast?

A. Yes sir, I have always taken that into consideration and
1617 believed that Congress when it made that allowance had reference to her southern coast entirely. I never did believe that they had any thought of the northern coast of Louisiana. I believe that it has reference entirely to the south coast of Louisiana just as it did to the south coast of Mississippi, and the south coast of Alabama and the south coast of Florida.

Q. Did you ever take into consideration in arriving at that opinion that the geography of this country was very little known and that Congress unintentionally brought about a conflict there?

A. I don't know whether they did it intentionally or otherwise. I never thought that Congress understood that Louisiana had a north coast. When she gave her that boundary she had reference entirely to her southern boundary and not her northern boundary. This part that is in dispute would seem then to be the north part of St. Bernard parish. That would give her a northern as well as a southern boundary down there. That would give her a double boundary down there. Nine leagues on the northern shore as well as nine leagues on the southern shore.

Q. Have you ever known any effort on the part of the Mississippi authorities to collect any taxes over in the disputed territory in the marshes?

A. No sir.

A. No sir.

Q. You never have?

A. I never have.

Q. Do you know whether any portion of that property there is assessed on the tax rolls of Harrison or Hancock counties?

A. No, sir, I know nothing about it.

Q. Do you know whether the islands north of the coast between the Mississippi main land and that coast have ever been assessed in any county or any effort made to collect the taxes?

A. No sir, I do not, no sir.

Q. I thought you said that you had never visited this territory?

A. I never have. The nearest I suppose I was ever to it was three or four miles. I have been out there with the steam dredge.

Q. Is there such a thing as a printed regulation or rules of the board of supervisors. Oyster supervisors, or what is the name that you call it?

A. The supervisors of Harrison county. They pass ordinances and have them entered upon their minutes as a record, and I believe that in some instances they have them in a printed pamphlet form. I have a recollection of having seen some of them but I have none of them now.

Q. Where do you think that a copy could be procured up to date?

A. I should think that the Biloxi Herald might have copies of them. You know that they have been nearly all of the time in the county paper, and published all of the proceedings, and I know that some of their ordinances have been printed. Their road ordinances and such as that.

Q. Now if it be a fact as you have stated that to a considerable extent this marsh territory in dispute was called the Louisiana marshes, how do you reconcile that with the statement that you have made that it was only six or eight years ago that the question was ever agitated as to this disputed territory belonging to Louisiana?

A. Simply because I did not know whether these marshes are within the limits of what I concluded to be Harrison county or any county 2. I did not know. These marshes may be the other side. These are islands out there and the Louisiana marshes may still be to the southward of that, but I don't know about that because I have never been there. I don't know really what are called the marshes.

Q. Will you please examine this Mississippi Exhibit A to which your attention has been called, and you see these red lines delineated as Mississippi's claim?

A. Yes sir.

Q. Now then that broken mass of marshes and islands and
1617 water delineated there within these red lines. Are those the marshes that have been alluded to and only spoken of as the Louisiana marshes?

A. That I could not say. I never have been there. I would call this Isle à Pitre and I do not know whether there is a marsh on it.

ve been there at all and I don't know whether these
oken are of are to the southward and on a line with
or whether they are further up here. I don't know any-
t it as I never have been there. Here on this map it
islands.

as a matter of fact, Mr. Chamberlin, although you per-
a magistrate might have read the laws of Mississippi
admitting the State of Mississippi into the Union, has
been any question or discussion amongst the people
regard to the southern boundary of Mississippi extend-
marshes until this controversy arose?
always been understood that Mississippi owned all of
within six leagues of the main shore of Mississippi.
ore of Jackson, Harrison and Hancock counties.
u ever hear the matter discussed among the generality
e prior to this suit?
heard it discussed, but I could not say how much. I
has been mooted in my court. We have had the maps
o prove my jurisdiction down there.
y that you went into office in 1888?
y 1st, 1888.

ll. No business with them. It is very seldom that

e only the common interest?
he common interest.
ng this territory?

Redirect examination.

By Gen. McCLURG:

Q. You answered Louisiana's counsel awhile ago that Mississippi had never collected any taxes in this disputed territory. I suppose you had reference to ad valorem taxes. Can you say whether she ever collected any revenue taxes in this territory?

A. She has collected the oyster taxes. That is all that I know of. I know of her collecting the oyster taxes.

Q. Since when?

A. In the last two years. She collected a license I think. Some of those fellows that I have got there. Some of those fellows
1618 were perhaps for not procuring a license. I don't know just what it was, and the records don't show, but I expect it was for a failure to procure a license.

Q. The cases here for violating the ordinances of Mississippi might have been for that?

A. Yes sir, it might have been for that It might have been for that I could not say.

Q. In 1887 when you were elected was before the constitution of 1890?

A. Yes sir.

Q. And you were not disqualified under that law?

A. No sir.

Recross-examination.

By Col. ZACHARIE:

Q. So far as you are concerned you know of no other prosecution for violating the oyster laws or oyster regulations of the county of Harrison prior to March 14th, 1900? That is the date given here in your transcript?

A. I don't think I know of any prior to that.

Q. That is two years after your induction into office?

A. Yes sir, I have no recollection of any prior to that.

Redirect examination.

By Gen. McCLUEG:

Q. In that connection you spoke of some cases as to the question in which the southern boundary line of the State was involved and in which you had the maps before you?

A. Yes sir.

Q. About when was this?

A. I have been raking my brain to find just exactly. I have just about come to the conclusion that it was during the trial of John Bowen that we had the maps so as to show that we had jurisdiction over it. Whether it occurred in the county of Harrison. I may be mistaken in that.

Recross-examination.

By Col. ZACHARIE:

. Your record shows that this case was tried on February 17th, 4, that is in the Bowen case?
. Yes sir.
. That is correct, is it?
. Yes sir.

OHN BOWEN, a witness introduced on behalf of the State of sissippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

. Mr. Bowen were you ever tried before Squire J. T. Champlin?
. Yes sir.
. For resisting an officer?
. Yes sir.
. The record shows that the trial of John Bowen was had before on the 17th day of February 1894, upon an affidavit filed on ember 22nd, 1893?
A. Yes sir.
Q. Are you that man?
A. Yes sir.
. Where was it that you are charged with having resisted an er?
. Between Grand pass and Sundown island.
. Between Grand pass and Sundown island?
. Yes sir.
. In what State?
. Mississippi.
. What county?
. I suppose that it was Harrison county. I don't know much it the counties. I was tried in Pass Christian before Judge Espy he offense.
. What officer did you resist?
. Placida Lazana.
. What were you doing?
. Taking oysters sir.
. Were you tried for any other offense at about that time at that e?
. For taking oysters without a license I was tried for.
. Where were you tried for that?
. Before Judge Espy at Pass Christian. He is the collector of oms at Bay St. Louis now.
. For fishing oysters between the mouth of Grand pass and Sun- n island?
. Yes sir.
. Without a license from Mississippi?
. Yes sir.

Q. When was this?
A. In 1893 in November.
Q. Pass Christian is in what State?
A. The State of Mississippi.

Cross-examination.

By Col. ZACHARIE:

Q. What was the result of the trial before Judge Espy in November 1893?
A. I got clear by getting a license from Mississippi City to fish oysters.
Q. Now when were you arrested for resisting an officer?
A. In February 1894.
Q. Will you please state the circumstances of your resisting an officer and tell us what occurred?

By Gen. MCCLURG: The counsel objects on behalf of the State of Mississippi on the ground of irrelevancy.

A. When he came out aboard the schooner where I was I did not even know that he was an officer, or had any authority to arrest me out there in the first place. I did not know who he was.
Q. Did he exhibit a warrant?
A. No sir.
Q. Who was he, do you know?
A. That gentlemen there. Mr. Lazana.
Q. What official position did he occupy?
A. It seems that he had been appointed for that purpose. To arrest if they fished oysters without a license, but I did not know he was the one that was appointed. *I* man named Young was before that.
Q. Why did you resist his arrest?
A. The same that I would resist any one else that I did not think had any authority to take me out of a schooner.
Q. Now Mr. Bowen, did you not resist that arrest because you thought you were in Louisiana territory?
A. No sir, I did not.
1620 Q. Did you believe that you were within the jurisdiction of Harrison county and the State of Mississippi?
A. Well I did not think much about it, but I was satisfied that I was in the State of Mississippi, and it did not bother me much at that time what county I was in. In fact I never thought of it.
Q. What was that marsh country over there generally called amongst the fishermen?
A. Well some years ago when I first went there they generally called it the Grand marsh. That is about 1893, but the last few years it has been called Louisiana marsh.
Q. Was not it prior to 1883 called the Louisiana marshes?

A. I could not say. I was on the upper lakes before that and I don't know what they called it.

Q. Did you ever hear it spoken of as being in the parish of St. Bernard or the State of Louisiana?

A. Which part of the marsh?

Q. I mean the marshes extending from Isle à Pitre westward towards Malheureux point?

A. No sir, too tell you the truth I don't know much about that. I know a good deal about the marshes and through there, but to tell you what parish they are in I don't know any thing like that.

Q. Then you simply resisted this officer because he did not exhibit any warrant and you did not know that he was an officer?

A. I did not know that I was violating any law. I did not feel like letting any body come to a schooner and take me out of a schooner for nothing, and he also wanted to take all of the crew, so I resisted just like I would resist any other private or any thing else coming after me that way.

Q. Where do you live?

A. On Main street in Biloxi. No. 722.

Q. You commenced in this oyster business when?

A. The first time that I went oystering was in the latter part of 1883?

Q. Have you continued since then in the oyster business?

A. Not entirely. I never have been off the coast: Sometimes I have been running lumber to New Orleans.

Q. Are you in the oyster business now?

A. Yes sir, I have been for years.

Q. Who were you supplying with oysters?

A. Almost any body. The steamers that come over here. I run a steamer for a canning factory for three years.

Q. You were employed for three years in one of these canneries?

—. *No sir, we have fished for any of the factories.*

Q. You were employed by the factory running the steam process?

A. No sir.

Q. You were simply supplying oysters to these factories?

A. Yes sir.

Q. Which factory?

A. Any of them. Any of them that would buy them.

Q. That is your means of livelihood. That was your means of supporting yourself?

A. I was running a steamer dredge. The steamer belonged to Mr. Heidenham, but the factory was not open. We were selling oysters to Mr. Lopez and Julien and any body that would buy them.

Redirect examination.

By Mr. McCLURG:

Q. Where did you go and get oysters in this time?

A. At that time we were fishing in the sound. Any where over

here in the sound, from where the oysters commenced down aroun
Cat island. Over there about Grassy island and the mouth of Pea
river.

Q. Did you go out much into Grand pass then?

A. No sir, the steamers were drawing too much water to go ou
there.

Col. ELLIOTT HENDERSON, a witness introduced on behal
1621 of the State of Mississippi, being duly sworn, testified as fol
lows:

By Gen. MCCLURG:

Q. What is your age Colonel?

A. I am 71 years old.

Q. Where do you reside?

A. I reside at Pass Christian.

Q. How long have you been residing there?

A. Well sir I can hardly say. The first recollection I have wa
being a child at Bay St. Louis as a child with my father. He wa
secretary to —— —— grant at Bay St. Louis.

Q. Did your father ever hold any office of any kind in the Stat
of Mississippi?

A. Yes sir, he was United States Senator in 1840.

Q. Have you ever held any official positions since Colonel?

A. Yes sir.

Q. At what place?

A. I was mayor of my town I think for about five years.

Q. What town. Pass Christian?

A. Yes sir.

Q. About what time?

A. I think that it must have been about; I will say between 186
and 1875 or some where along there. I have forgotten the exac
time.

Q. What other positions if any have you held?

A. I was State senator for one term consisting of two years. 188
and 1884, and I was a member of the constitutional convention i
1890.

Q. Now from your childhood where has your home been Colonel

A. My home—I was absent of course—I was partly educated i
the North. I was sent away to school but my home proper ha
always been Pass Christian up to 1859 when I went up on the Mis
sissippi river intending to locate there, and then the war was goin
on in 1860. I was in the army of Virginia for four years and re
turned to Pass Christian and have been there permanently eve
since.

Q. What do you know about the southern boundary lines of th
State of Mississippi?

A. Well of course I know generally that the southern boundar
of the State of Mississippi as long as I can remember, and as a law

yer I had occasion to examine it, has extended six leagues from the southern boundary of the land, the seashore of Harrison, Hancock and Jackson counties.

Q. You know of course that Pearl river is the western boundary?

A. Yes sir, I know that.

Q. Mr. John Walker has testified in this case that he conferred with you at one time with reference to getting an act passed through the legislature authorizing the appointment of bay pilots at the mouth of the Mississippi river, perhaps representing the steamboatmen interested in the business. That you advised him on that subject after investigating the law. Do you remember about that Colonel?

A. I don't remember ever having done so. If I did so at all it must have been either in 1882 or 1884 when I was in Jackson attending the terms of the legislature. It might have occurred because you know those things pass in the daily routine of introducing bills and I might have overlooked it, but if I did advise him at all, if the conversation occurred I would certainly have advised him that it was not within the jurisdiction of the State of Mississippi. That they would have to go to Louisiana because the mouth of the Mississippi is in the State of Louisiana. If that conversation took place. I don't say that it did not. I don't recollect it just now. I know Mr. Walker and have known him for a number years.

Q. I understand you to say as a practitioner of law that you have examined the question as to the limits of the State?

A. Only so far as our constitution and statutes and the
1622 inauguration of the State. That is all I can be governed by.

Q. Were you a member of the old board of police. What is called the board of supervisors of the county now?

A. I never was. I never have been.

Q. Do you know of any civil or criminal jurisdiction that the courts of your county have taken of the waters in front of Harrison county?

A. I happen to remember a case——

By Col. ZACHARIE: The counsel for the State of Louisiana objects to any testimony in regard to any judicial proceedings unless the foundation is first laid by showing that such records have been lost or destroyed, in which event alone can parol evidence be introduced as secondary evidence.

By Gen. MCCLURG: Counsel for Mississippi asked for no proof of the contents of any official record, but merely wanted to draw out from the witness any fact that might lead up to the record, or any knowledge that he had of any judicial act without undertaking to state what the proceedings or result was.

Q. Do you know of any civil or criminal jurisdiction that the courts of your county have taken of the waters in front of Harrison county?

A. It was not a case. The event that I remember particularly

came to me while I was a member of the senate. I was asked to introduce a bill to permit prize fighting in the State of Mississippi and I refused, and then the gentleman who was promoting the enterprise said Very well, if you do not do it we can fight over on Ship island. I remarked to him "Well that is in the jurisdiction of the State of Mississippi. I presume that he looked into it and the fight never took place. I refused to do it I knew that if he had the fight there that it would be in our jurisdiction. I don't know of my own personal knowledge but I am satisfied there was a case in which a man was arrested at Ship island and brought here and tried. For what offense or misdemeanor I don't know.

Q. There is no controversy about Ship island being in Mississippi?

A. Well sir that is one of the islands. So far as their taking control of the waters they have done it, and are doing it now under the oyster commission.

Q. Can you say whether or not in this county, Harrison has ever had any ordinances passed by her board of supervisors regulating the taking of oysters in the sound?

A. Well I know that such have been passed, and I know that we convicted a man, which is previous to the Bowers law, we convicted a man of trespassing upon oysters under the law in Pass Christian.

By Col. ZACHARIE: The counsel for Louisiana renews his objection as made above in the prior objection, in regard to the introduction of primary evidence of the judicial record before the secondary evidence is admissable at all the record must be proven to have been lost or destroyed.

Cross-examination.

By Col. ZACHARIE:

Q. I think you have stated Col. Henderson that you are a practicing attorney and have been for many years?

A. Yes sir, I have been practicing for nearly 36 years.

Q. You have stated that under the statutes of Mississippi you have always regarded the southern boundary of the State of Mississippi as extending six leagues or 18 miles to the south. Have you ever examined the act admitting Louisiana into the Union?

A. I never have no sir.

1623 Q. Have you ever visited the territory in dispute here.

A. This marsh territory. Yes sir, frequently.

Q. Is it or is it not a fact that up to a very recent date that marsh country in dispute here has been generally known as Louisiana marshes?

A. I have always heard them called Louisiana marshes, yes sir.

Q. Is it not a fact that at Pass Christian when the mosquitoes were bad that the common expression is that they come from the Louisiana marshes, meaning this territory in dispute?

A. I cannot say, meaning the territory in dispute, but I will say they come from the Louisiana marshes. As I understand the territory in dispute is not only the Louisiana marshes but the adjacent waters thereto. Now i am directing my answers to the marsh country, which have been marked upon the map as a part of the parish of St. Bernard.

Q. When did you first hear generally of these marshes being claimed as a part of the State of Mississippi. I mean amongst the people at large?

A. Well they were called generally as I say to you the Louisiana marshes but I never have heard that the boundary of the State of Mississippi was disputed, so far as the southern boundary being 18 miles from the adjacent shore. It was necessary to pass through a portion of these marshes and a portion of these marshes would be then included in the southern boundary of Mississippi as I understand it.

Redirect examination.

By Gen. McCLURG:

Q. Have you ever heard these marshes called by any other name?

A. Well I don't know sir. Fishermen are in the habit of going through there, and they will give two or three names to a small island or bayou and things of that sort and it fixes itself to it, and some times it is forgotten and some times it is renewed, but as a general rule these marshes over there were called Louisiana marshes because they were adjacent to the State of Louisiana. How far the Louisiana line came out there we never stopped to inquire.

Original question by agreement.

Q. Col. Henderson, do you know what is usually termed the deep water channel running out of the mouth of Pearl river and the Rigolets through Lake Borgne and around and north of Half Moon island and to the southwest of Cat island?

A. Well sir there is a channel that runs out here, and it comes down here and it branches and runs down by Goose point, but that channel, a good many vessels carrying lumber come on the north side of Cat island, and run up to the light house here and run up Pearl river.

Q. This channel that I speak of runs between Cat island and the point of Isle à Pitre?

A. Yes sir.

Q. In her original bill of complaint Louisiana claims that is the real boundary line between the two States. Have you any knowledge of that?

A. I never heard that contended at any time until I saw some of the testimony in some of the papers.

Q. Is that the first time you ever heard of that?
A. That is the first time I ever heard it contended.

By Mr. FLOWERS:

Q. You mean since this controversy arose?
A. Yes sir, since this controversy. It came out while they were examining the witnesses in Louisiana. I read the reports of the testimony.

1624 Recross-examination.

By Col. ZACHARIE:

Q. I think you stated that you never have read the act admitting the State of Louisiana into the Union?
A. No sir, I never have.
Q. That act says "including all islands within three leagues of the coast?
A. Yes sir.
Q. And the claim I will state to you as a lawyer is not only based upon that, but the rule of international law between States, is that where there is a deep water channel, the jurisdiction of each State extends to the middle of the thread of the channel, but you have never examined it to understand it from that stand point?
A. That is confined to rivers is not it?
Q. It also applied to a number of decisions of international commissions to decide boundaries. The Alaska boundary was decided that way, and also the decision of the Emperor William in the San Juan islands?
A. I will say that if that marsh that we have always called the Louisiana marshes; if the State boundary of Louisiana extends three leagues in a northern direction from that I think it will go pretty near back to Cat island, and would come along over here, because that marsh from over here I don't think it is over 18 or 20 miles, or maybe 25 miles, and therefore I hardly think that such a conflict as that could have occurred, as Mr. Champlin suggested that must have had reference to the southern portion of Louisiana, fronting upon the Moratuie property to the mouth of the Mississippi river. If it was not that their boundary would run up in here.

The commission here took a recess for the noon hour, until 2 o'clock.

The commission reassembled at 2 o'clock with the same presences as this morning, and resumed the taking of evidence as follows:

By Gen. MCCLURG: The counsel on the part of the State of Mississippi now introduces in evidence a certified transcript of the original proceedings. The record and judgment, in the matter of the inquest held by L. B. Holly, justice of the peace at Biloxi, Harrison county, Mississippi, during the latter part of October or the 1st of

November, 1886, over the body of John Kennedy, found at Creole gap. The original copy certified by the circuit clerk of Harrison county being filed as Document No. 25, and a true copy thereof furnished the counsel for the State of Louisiana.

F. P. LIZANA, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you reside?
A. At Pass Christian, Miss.
Q. How old are you?
A. 45.
Q. What is your occupation?
A. I am now constable and deputy sheriff of Harrison county.
Q. Have you ever had any connection with the oyster laws
1625 of Mississippi?
A. Yes sir, I was appointed by the board of supervisors.
Q. Of what county?
A. Of Harrison county, Mississippi. In 1893 in October.
Q. You were appointed by them to do what?
A. To go out and see that the licenses were obeyed for fishing oysters, and to see that the oysters were properly culled.
Q. What was your office called?
A. It was called oyster inspector.
Q. You were appointed first when?
A. In 1893, right after the October storm. I was appointed on the third day of October and the storm was on the first.
Q. What was your territory?
A. 18 miles. Supposed to be six leagues from the shore.
Q. Running from what points?
A. Supposed to be the eastward point of Chandeleur island running in a westerly direction to the mouth of Pearl river.
Q. That is your territory?
A. Yes sir.
Q. Where did your eastern territory strike the shore line?
A. On Harrison county was supposed to be right on the eastward side of Ship island.
Q. Were you appointed for the whole of the county or a portion of it?
A. The whole county. There was only one inspector.
Q. And the eastern shore of Harrison county is supposed to be where?
A. The eastern shore is right here at the bay of Biloxi. Between Biloxi and Ocean Springs.
Q. And the western shore is at Bay St. Louis?
A. Yes sir.
Q. That is the shore front of Harrison county?

A. Yes sir, a little beyond the draw bridge.

Q. Well as oyster inspector had you authority under the laws of the State of Mississippi to arrest persons violating the laws?

A. Yes sir.

Q. Do you remember to have arrested one John Bowen?

A. Yes sir, I arrested one John Bowen.

Q. Did you see him here this morning?

A. I did sir.

Q. The same man that you arrested?

A. The same gentleman that I heard testify here this morning.

Q. We have a record in these files that he once resisted arrest by an officer. Are you the officer?

A. Yes sir, I am the officer, and he resisted me.

Q. Where did this happen?

A. Right in the southern part of Grand pass. Between Grand pass and Sundown island, but more towards Grand pass.

Q. What was he doing?

A. He was fishing oysters.

Q. What did you arrest him for?

A. I arrested him on two charges I believe. I am not quite certain, but one charge that I arrested him on was for not having a license to fish in Mississippi waters.

Q. For not having a license from whom?

A. From Mr. Hewes, in Harrison county.

Q. Why did he resist arrest?

A. I went to him and boarded him and asked him if he had a license and he told me no. At first he told me he did not know whether he had any right to answer me or not. I told him that he did. I told him that I was an oyster inspector, and he said he did not know whether I was or not. He said "Where did you get your authority from." I says "I have been appointed by the board of supervisors for the oyster inspector of this county. He said, "I don't know whether you have or not. I did not have my commission with me at the time. I told him I had my assistant with me, he is now dead Joe Busick. I says "Captain, I can show you the law or the certificates I have. He said "Never mind your certificates. Show me your authority. I says I will show my authority, and I jumped on board his schooner, and I told him I would bring them to the Pass. He said
1626 "I guess you won't." I says "I guess I will." I did not have anybody but an old man with me, and when I got aboard of him he started to get his crew, and I supposed to throw me overboard. I did not know what he was going to do I says "You need not try anything like that. I guess there will be some funny business about here, and I told him to throw up his hands. I told the crew to come on and raise up the anchor. I had nothing but a little sloop and I told the men with me to hoist up your sails and we would take him to the Pass. It was right after the storm and I had taken a great deal of responsibility on my shoulders. The most

of these schooner men had suffered a good deal from the storm. I took a great deal of pity on them. If I would catch one out there without having their license I would always give them a chance to go inside and get their license, and make their first load so that they could make money enough to get their license. When he saw that I meant business and that he could not bluff me out of it, I told him that it was my duty and I was going to do my duty whatever it cost, he said that he would come to Biloxi and get a license the next trip. The next trip I missed him and I found that he had gone out and had not gotten his license from Mr. Hewes, and I went down to Biloxi and had him arrested as a fugitive from justice.

Q. In executing your office as oyster inspector from November 1893, what territory did you inspect or patrol?

A. Well sir I patrolled from this coast here up to Door point. I cannot remember all of these islands. It has been quite a while ago. But I took a chart and took the code and several of us, Mr. Easly and Mr. Bowers, and all of us sat down there with a compass and a code, telling us where the code said the line was. We took the compass and measured, and the lines of Mississippi run a little west up on Door point, not very far. What we call Door point is Deep Water point. Some of them call it Door point, and some of them call it Deep Water point.

Q. According to that line in what State is Isle à Pitre?

A. Well according to that line Isle à Pitre should be in Mississippi in Harrison county.

Q. Do you know about where the line would strike this marsh between Harrison and Hancock counties?

A. Between Harrison and Hancock. I believe that the Hancock line runs somewhere to the eastward of Half Moon island. I am not sure. It has been so long since I looked over these charts that I don't remember exactly. I think that it is somewhere to the eastward of Half Moon island.

Q. You know where Grand pass is?

A. Yes sir.

Q. What county is Grand pass in?

A. It is supposed to be by the Mississippi code and what I have always heard in Harrison county.

Q. And you patrolled these water there as inspector?

A. Yes sir.

Q. Did you make any other arrests?

A. Well I suppose that I made 15 or 20 arrests while I was there.

Q. Where were they when you arrested them?

A. Well there were some in Grand pass, and some between Sundown island and Grand pass, and some in Creole gap.

By Col. ZACHARIE: Counsel for Louisiana here reserves an exception to the testimony in regard to arrests and judicial proceedings, until the loss of the documents or the destruction of the records has been shown, the proof cannot be admitted as to their contents.

Q. Did you have warrants for the arrest of these persons or did you arrest them by taking them in the actual violation of the law?

A. In the actual violation of the law.

Q. Was it necessary to have a warrant?

A. No sir, the laws of the State of Mississippi says whenever
1627 an officer finds a man in the act of violating the law, that is the way that I understand it, he has a right to arrest the man right in the act.

Q. You think that you made fifteen or twenty arrests?

A. Yes sir, probably more than that. I cannot remember exactly.

Q. In that neighborhood?

A. Yes sir, between Creole gap and Grand pass, and between Sundown island and Grand pass, and between Cat island and Isle à Pitre and all around these places and at Pass Christian, and at Pass Marianne, and I made some arrests on what they call Telegraph reefs.

Q. Do you know where what they call the deep water channel is coming out of the mouth of Pearl river and Lake Borgne, north of Half Moon island, and between Cat island and Isle à Pitre. What they call the deep water channel?

A. Yes sir, we have three channels We have the channel that goes by Pass Christian. That is Pass Christian channel. That is what Pass Christian is named from. Then we have the channel that goes up by Pass Marianne light house and comes to the northward of Cat island, and then we have the deep water pass, another channel that comes to the southward of Cat island. We have three channels right there.

Q. Now these arrests that you made. On which side of this deep water channel were they?

A. I made some of them southward of these channels, and some in between these channels and some to the north of these channels.

Q. State what you may know if any thing about this deep water channel being the true boundary line between Louisiana and Mississippi?

A. Well sir, I have been going up there out through these islands I went out there with my father when I was quite a young boy, I suppose ten or twelve years of age, and the way that my father always spoke and these old people, they always told me that we were in Mississippi when we went there.

Q. Mississippi for how far?

A. We have been as far as Isle à Pitre.

Q. In miles or leagues?

A. About six miles.

Q. Six miles.

A. Six leagues I mean. I went out there when quite a small boy with my father.

Q. I don't believe you answered me directly as to whether you have heard of this deep water channel being the true dividing line between the States?

A. No sir, I have not.

Q. How old was your father?

A. He has been dead going on thirty years. He was 58 when he died.

Q. So he would have been eighty years old now?

A. Yes sir, more than that.

Q. Have you heard him speak of the limits of the State of Mississippi?

A. I heard he and my uncle just like two brothers that always lived together, they used to talk very often about Louisiana and Mississippi. I have always heard him talk about the Grand marsh.

Q. You spoke of the Grand marsh. Is that what this disputed territory down there is called?

A. Yes sir, that is what I understand to be the disputed territory.

Q. What about it being called the Louisiana marsh up there?

A. Some people that I heard talk about these Louisiana marshes, and the others I have always heard talk about the Grand marsh. All of these old people. Captain Louis Shruff was very old when he died, and my father, and my uncle, and all of these people always talked about the Grand marsh. They were all foreigners you know and they came here when they were very young. I always heard it from a young boy. They would see the land up there, from the east point if I am not mistaken; from the north east point of Chandeleur islands, in a westerly direction to the mouth of Pearl river. That is what I always heard the lines were.

1628 In fact my grandfather was a Spaniard, and my father and my uncle, they were just like two brothers. They were two brothers in law. They would go out and get to talking, and one would say "You are in Mississippi now." They were always joking one another. The other one would say "Now you are in Louisiana." I can recollect it when I was a little boy.

Cross-examination.

By Col. ZACHARIE:

Q. You say that you have frequently heard this disputed territory called Louisiana marshes?

A. Frequently, and then I have heard it called Grand marsh.

Q. How far back can you remember that you have heard it called Louisiana marsh?

A. Well sir, it has not been very far back. From a young boy I have heard my father and them call it Grand marsh, but after I got of age and I got to be an oyster inspector, I used to hear a good many of these New Orleans boats that used to come around there call it Louisiana marsh.

Q. Now as a matter of fact have you not heard any number of these fishermen and Mississippians call it Louisiana marsh?

A. I have heard a part of it called Louisiana marsh.

Q. Would not that extend twenty or twenty-five years back?
A. Well no sir.
Q. Can you fix the date when you first heard it called Louisiana marsh?
A. No sir, I can not. I don't think that it would date far back. The only time I ever heard it a great deal was between a New Orleans and a Mississippi boat disputing.
Q. That has been very recently?
A. It has been since about 1878.
Q. At that time did any of the fishermen call it Louisiana marsh?
A. Not that I know of no sir.
Q. You say that you live at Pass Christian?
A. Yes sir, I was born and raised there.
Q. Is it not a fact that from time immemorial there whenever the mosquitoes were bad at Pass Christian all of the people would say that they were due to a wind coming from these Louisiana marshes?
A. No sir, you go there and stay a week and you will find out whenever we have a wind from a westerly direction, from towards the Rigolets you will find that we are pestered with mosquitoes. That is what we call the Louisiana marshes.

Redirect examination.

By Mr. FLOWERS:

Q. Explain what you mean by the Louisiana marshes?
A. What we call over there the Louisiana marshes whenever we have a westerly wind look out for mosquitoes, that means around the Rigolets or some where around there. It is a terrible place for mosquitoes. In fact that marsh out there is very bad, but you very seldom see any mosquitoes in around our coast with southwardly or southeast winds.

Recross-examination.

By Col. ZACHARIE:

Q. How far it it from the Rigolets to Pass Christian?
A. I think that it is about 35 or 40 miles.
Q. Do you mean to say that the mosquitoes that you are troubled with in Pass Christian come 35 miles from the Rigolets?
A. I mean to say this. You can start from Pass Christian or from Biloxi, and the further west you go the worse the mosquitoes are.
1629 Q. That is not an answer to my question. I asked you the question, do you mean to say when Pass Christian is infested with mosquitoes that they come 35 miles from the Rigolets?
A. I think they will sir for this reason. We hear up the country here 35 or 40 miles up the country last summer, it was a thing that was not known to have mosquitoes there, and the whole country was

infested with them with these westerly winds, and I attribute it to that.

Q. Do you know that the most recent scientific investigations show that mosquitoes are never known to travel or be carried more than two or three miles from their locality?

A. I have never studied it in that way, but I can simply tell you that you may be here now and not a mosquito here and in five hours you can not run away from them.

Q. That is simply your idea that these Louisiana mosquitoes come from the Rigolets and that they travel 35 miles to Pass Christian?

A. I think that they will travel most any where that the wind will blow them, and I have fished and hunted all over the Rigolets. I have fished oysters and hunted all through the marsh out here, and that is the worst point I have ever seen for them is right around the Rigolets. I have sailed all through there from place to place as a boy.

Redirect examination.

By Gen. McCLURG:

Q. I understand you to say that you have never studied the mosquito problem scientifically?

A. No sir, I have not.

Q. You speak from observation and practical experience?

A. Yes sir.

Q. Did you ever have any observation of or practical experience with musk rats?

A. Well I have killed a few.

Q. You don't know whether they are active agents in the destruction of the marshes or not?

A. No sir, I do not. I know that they make holes in the marsh and you will sink up to your body in them, in the holes that they make. They dig under the ground and you will sink up to your arm pits in the holes. Right here in any of this marsh. You can go there and see.

Q. There are no alligators there?

A. No sir, not where the musk rats are.

Q. You know where there are alligators they will destroy the musk rats?

A. They destroy the musk rats.

Q. Louisiana once passed a law making it a misdemeanor to kill an alligator because the alligators killed the musk rats?

A. We don't have to go far to find that. We go out into our little marshes here, and since the trappers have been killing the alligators you can hardly walk through the little marshes that we have here.

Q. The musk rat undermines it?

A. Yes sir, the musk rat undermines them.

Q. There has been no ordinance passed by any of these coast counties against mosquitoes or muskrats has there?

A. No sir, I don't think there has. I don't think that they lost their time in doing any thing like that.

EMILE BOSARGE, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. MCCLURG:

Q. Where do you reside?

1630 A. Biloxi.

Q. How long have you lived here?

A. I have been here since 1886.

Q. How old are you?

A. 46.

Q. Where did you come from?

A. From Alabama.

Q. What is your present occupation?

A. Oystering.

Q. How long have you been in the business please sir?

A. About 30 years.

Q. Where have you been taking oysters?

A. Out in the marsh and the Mississippi sound here.

Q. What portions of the sound and of the marsh?

A. From St. Joseph as far as American bay.

Q. American bay?

A. Yes sir.

Q. That is the southern portion of the marsh?

A. Yes sir, that is in the southern part of the marsh.

Q. In saying from St. Joseph, you mean from St. Joseph island.

A. Yes sir.

Q. Southward to the American bay. What State were you in?

A. I supposed I was a part of the way in Mississippi. Part of the time and the other time in Louisiana. American bay I think is in Louisiana.

Q. What part of the time were you in Mississippi?

A. When I was up around this edge of the marsh. Around Grand pass and Three Mile bayou.

Q. Do you know how far the limits of Mississippi are south from her main shore?

A. I have always heard that it was 18 miles from the mouth of Pearl river.

Q. Did I understand you to say so far as you were within 18 miles of the Mississippi shore that you considered yourself in the State of Mississippi?

A. Yes sir, that is what I thought.

Q. How long has this been your understanding?

A. 13 or 14 years. Since 1893 I think we had the first inspectors here.

Q. Did you pay a license?

A. Yes sir.

Q. Where did you pay it?

A. Here in Biloxi.

Q. To whom did you pay it?

A. Captain ——.

Q. Who was he?

A. The inspector. The oyster inspector.

Q. Appointed by whom?

A. By the board of supervisors.

Q. Of Harrison county, Mississippi?

A. Yes sir, of Harrison county, Mississippi.

Q. Under this license did you fish in this territory that you have mentioned?

A. Yes sir, I have fished in this part of the territory. I never went any further than Three Mile bayou then.

Q. Were you ever in Three Mile bayou?

A. Yes sir.

Q. Under this license?

A. Yes sir.

Q. Did you go down through Three Mile bayou any distance?

A. Yes sir, I went down through the Karakos and up as far as Bayou Mussell.

Q. That is under this license that was issued to you that you have just mentioned?

A. Yes sir.

Q. Did any of the Louisiana authorities disturb you down there in 1893?

A. No sir.

Q. Were you ever as far west as Nine Mile bayou?

1631 A. Yes sir, I have been out through Nine Mile bayou a few times.

Q. Under this same license?

A. I did not have any license at that time. The law was out and no license was required at that time.

Q. That is afterwards?

A. Yes sir, after I had license.

Q. I believe you stated that you never got a license from Louisiana?

A. No sir.

Q. You have never been interfered with by the people from Louisiana in fishing there?

A. No sir I never have.

Q. Now I want to show you please sir Exhibit A to Mississippi's answer and cross bill. Here is Three Mile bayou marked on this map, and that is I understand the bayou that you have been through?

A. Yes sir.
Q. Are you acquainted with the Raccoon islands?
A. Yes sir.
Q. With Crooked island?
A. Yes sir.
Q. Wild Goose island?
A. Yes sir.
Q. Indian Mound bay?
A. Yes sir.
Q. Southwest pass?
A. Yes sir.
Q. And here is Cat Fish pass?
A. Yes sir, I have been all through there.
Q. When you went through Three Mile bayou as you stated awhile ago down to Bayou Mussell; point out now please sir which way you went down there. Commence at Three Mile bayou.
A. Three Mile bayou, Raccoon island, Crooked island, Dutchman's pass.
Q. Were you ever in Indian Mound bay?
A. Yes sir.
Q. How did you get there?
A. Through Three Mile bayou and by Wild Goose island.
Q. Here is Crane Town bay. Were you ever in that?
A. Yes sir.
Q. How did you get there?
A. Went through Karako bay and Three Mile bayou down through Karako bay and come out at Crane Town.
Q. How did you get out of Crane Town?
A. Through Elephant pass and I got to Biloxi through Ship Island pass.
Q. Where is Ship Island pass?

(Witness shows location on the map.)

Q. When you left Elephant bayou which way did you turn?
A. North east.
Q. Did you go in the neighborhood of Brush island?
A. Yes sir.
Q. Cheno bay?
A. Yes sir.
Q. Jack Williams bay?
A. Yes sir.
Q. How did you go into Jack Williams bay?
A. I come in through Creole gap by Sun Down island into Jack Williams bay.
Q. Were you ever in the neighborhood of Door Point?
A. Yes sir.
Q. How did you get there?
A. I come through Creole gap and come through Ship Island pass.

Q. Where is Ship Island pass?
A. Right here. South, southwest from Biloxi to Door Point.
Q. Now let me ask you. You will notice on this map Cat Island channel. Do you know where that is? The same figures that you notice along here come out through the sound into Lake Borgne, between Brush island and Door point on the Mississippi shore. Do you know where that deep water channel is?
A. Yes sir.
Q. Now where did you take your oysters? From the north side or the south side of this channel?
1632 A. I have gotten oysters from both sides of it.
Q. Where did you take most of your oysters?
A. On the south side.
Q. Were you taking them under the license that you spoke of awhile ago?
A. Yes sir.
Q. And since 1893?
A. Yes sir.
Q. Have you had any license before that?
A. No sir.
Q. Have you had a license from Louisiana?
A. No sir.
Q. Were you ever disturbed by any body from Louisiana?
A. No sir.

Cross-examination.

By Col. ZACHARIE:

Q. How long did you say you had been engaged in the oyster business?
A. About 30 years.
Q. At what points?
A. I began oystering in Alabama.
Q. When did you come to this coast here of Biloxi?
A. In 1886.
Q. To whom have you been delivering oysters? Selling them?
A. I began here for Mr. Lopez.
Q. Mr. Lopez carries on a cannery?
A. Yes sir.
Q. And afterwards to whom?
A. Well I carried some to the Barrataria, the Biloxi Canning Co., and some to Julian & Co.
Q. Those are all canning companies?
A. Yes sir.
Q. You are still engaged in that business of delivering oysters to the canneries?
A. Not at the present time?
Q. I mean to say when the season is on?
A. Yes sir.

Q. Well now in regard to this disputed territory. These marsh
Is it not a fact that these marshes have been generally called
Louisiana marshes?

A. No sir, my first knowing of the name of the marsh was Gra
marsh?

Q. Have you not ever heard it called the Louisiana marshes?

A. Yes sir, of late I have.

Q. How far back did you hear them called Louisiana marshes?

A. That I could not say. It has not been so very long thou
I have heard — the Louisiana marsh when I was a little boy.
father used to go to the Louisiana marsh to get gull eggs.

Q. Since you were a little boy?

A. Yes sir.

Q. How did you come to know about Mississippi claiming
leagues or 18 miles south of the Mississippi shore?

A. When this law come up in 1893 I think it was.

Q. You never knew anything about it until 1893?

A. No sir, I never knew anything about the 18 miles until th

Q. Prior to 1893 did Mississippi or any of these coast count
have any laws or regulations about the license for oyster fish
men?

A. None that I know of, no sir.

Q. Have you ever known of this disputed territory, this mar
being called a part of the parish of St. Bernard in Louisiana?

A. No sir, I don't really know any thing about it.

Q. Have you ever heard it spoken of as a part of Hancock coun
or Harrison county?

A. Yes sir, I have heard them speak about it.

Q. Since when?

A. In the last few years.

Q. How many years back?

1633 A. Well I could not say because I have not paid mu
attention to it.

C. S. STRONG, a witness introduced on behalf of the State
Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you reside, Mr. Strong?

A. In Biloxi.

Q. How long have you resided here?

A. Well at this time I have been here about three years. But
have lived here about ten years.

Q. How old are you?

A. I am 45.

Q. What is your present business?

A. Oystering in the winter time.

Q. How long have you been oystering?

A. I have been oystering all of my life, but I have been oystering around Grand marsh since 1881.

Q. Name some of the points in Grand marsh where you have been oystering since 1881?

A. Well I could take in the whole thing, and commence from Isle à Pitre to Creole gap, and Grand pass and Turkey bayou and Johnson bayou and Three Mile bayou. I have been down as far as Nine Mile bayou, but I never had much business down there. There are not many oysters in Nine Mile bayou, and I have been around Raccoon island, and as far as Bayou Treasure on this side. I could mention all of the places.

Q. Well when you were in there what State were you in?

A. Well we always considered that Mississippi had jurisdiction over the whole marsh.

Q. Did you ever have a license to go in there?

A. Yes sir, I had a license in 1891 I believe it was.

Q. Where did you get your license?

A. At Mississippi City at the court house.

Q. What was this license for?

A. It was to fish oysters in Mississippi.

Q. And under this license you fished where?

A. We were not limited. Where ever we wanted to go. Any where as far as Three Mile bayou. We could go down as far as Bayou Chico if we wanted to nobody would stop us.

Q. Did you ever go in Nine Mile bayou under this license?

A. I don't know that I ever went in Nine Mile bayou under this license, but we have been to Bayou Tresor, and through Three Mile bayou. You leave Nine Mile bayou to the north of you.

Q. In what size boat could you go through Three Mile bayou and Bayou Tresor?

A. I had a schooner that was drawing four feet of water loaded and we came out of Bayou Tresor.

Q. Could you go through Bayou Tresor and Three Mile bayou drawing four feet?

A. You could by watching your tide. There is a great rise and fall in the tide out there.

Q. I want to ask you whether you could go into Nine Mile bayou from the north east, and come back out through Three Mile bayou?

A. Yes sir, you can go in there.

Q. Could you go in there from the north through Three Mile bayou and come around out of Johnsons bayou?

A. Well you can do it with a boat not drawing much water. The trouble comes in here. You can go through Three Mile bayou with a boat drawing about two and a half feet of water and go through Johnson bayou.

Q. You can go in there at Johnsons bayou and come around and come out of Turkey bayou?

A. No sir, I don't think you could carry much water through t way.

Q. Well could you go in at Grand pass and come out at Bay Pierre?

A. Yes sir.

1634 Q. And come in Bayou Pierre and come out at Creole ga

A. Yes sir, I have done that many a time.

Q. Creole gap and come around Isle à Pitre?

A. Yes sir.

Q. Can you sail around Sundown island?

A. Yes sir.

Q. You can go through Grand pass into Jack Williams bay?

A. Yes sir, you can go in there.

Q. You can go from Jack Williams into Northeast bay here?

A. Yes sir.

Q. Have you ever been in Crane Town bay?

A. I have — all through Crane Town bay.

Q. You have been all through the marsh have you?

A. I have been all through the marsh from one end of it to t other.

Q. How long have you been going in there?

A. I don't know how long. It has been since 1881. It has be about 22 or 23 years I guess.

Q. And you believed that you were in what State?

A. They never barred us from Louisiana. We had Mississi license but we considered that we were all right as long as we h Mississippi license.

Q. How far would you go under these license- south of the M sissippi shore. South. How many leagues or miles?

A. I have heard it said that it was 18 miles, but we went furth than 18 miles if we wanted to.

Q. You have always heard that called the Louisiana marsh?

A. Yes sir, I have heard it called Louisiana marsh and Gra marsh too.

Q. How long since you heard it called Louisiana marsh?

A. When I was a boy I lived in Mobile on the bay, and we us to plant oysters and we would always say we were going to t Grand marsh. Since I have come to Biloxi, I have heard it call Louisiana marsh. I thought when we were transporting oyst down there to Mobile bay that we were getting them out of Miss sippi waters.

Cross-examination.

By Col. ZACHARIE:

Q. When did you take out your license in Mississippi?

A. I think that it was in 1891 or 1892. I did not try to reme ber the time.

The commission here adjourned until Wednesday June 22 1904.

WEDNESDAY, June 22nd, 1904.

The commission met this morning at ten o'clock, and then adjourned until 2 p. m. in the afternoon. There were present Gen. Monroe McClurg on the part of the State of Mississippi, and Col. F. C. Zacharie on the part of the State of Louisiana, and Commissioner William D. Bullard.

The commission met at two o'clock with the same presence as above, and adjourned until nine o'clock to morrow morning.

THURSDAY MORNING, June 23rd, 1904.

1635 The commission met this morning. There were present William D. Bullard, commissioner, Gen. Monroe McClurg, counsel on the part of the State of Mississippi, and Col. F. C. Zacharie, counsel on behalf of the State of Louisiana.

Capt. S. R. THOMPSON, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. How old are you Captain?
A. I am 65 years old.
Q. Where were you born?
A. Ocean Springs, Jackson county, Mississippi. W. B. Smith owns the residence now.
Q. Have you lived in Mississippi during your life?
A. Yes sir.
Q. And along this coast line?
A. Yes sir.
Q. What has been your business during your life?
A. Well my step father was a mechanic and I followed that. I went in the army later, before I was 21, and then after I came out of the army I went into the mechanic's business for a year or two, and then I went into this lake trade running vessels to New Orleans.
Q. About what time did you go into the lake trade?
A. In the beginning of 1867.
Q. How long did you continue it?
A. I run to New Orleans four years steady. The old basin and the new basin, with lumber from Denny & Co. I run lumber from their saw mill.
Q. There at Scranton?
A. No sir, at Mess point.
Q. What other firm?
A. Gautier, there at West Pascagoula. On the western side.
Q. What different places have you lived on the Mississippi shore?
A. Well I was in Lutchers Louisiana for seven months and then on the Mississippi shore. I have been at Bay St. Louis for four

months, and Pass Christian for three or four months, and I lived in Biloxi for ten years, and we have been in Ocean Springs about 15 years, and I have been in Pascagoula and Scranton.

Q. In this suit by Louisiana against Mississippi what is called the deep water channel line out of the mouth of Eastern Pearl river, through Lake Borgne to the Mississippi sound as far as Cat island, into the Gulf, is claimed to be the dividing line between the two States. What have you to say with reference to that claim?

A. Well I have been through that channel several times. When we came by St. Joseph island after we passed it three or four or five miles we steered to the southward, to what is called South channel there, and when it approached near Cat island we called it Cat Island channel. It is south of Cat island. It is deeper than the Pass Marianne channel. I have been that way going to and coming from New Orleans.

Q. You know where the deep water channel is then?

A. Yes sir, I have been through it.

Q. What have you to say about its being the dividing line between these two States?

A. Well I have never known it to be the dividing line.

Q. Have you never heard of its being the dividing line?

A. No sir, I never have.

1636 Q. State if you know where the line is between the two States?

A. Well the dividing line between the two States has always been understood with me and most of the captains that I talked with to be Eastern Pearl river. The line followed this river while it flowed in its banks, and after it left its banks and emptied into the lake we thought the line extended due south 18 miles. That is the way that we looked at it.

Q. Did you know any thing of any occupation or actual possession of any territory by any company or mill from Pascagoula or other place of any part of the territory within this 18 mile limit and if so state what you may know about it?

A. Yes sir, I recollect for instance going down there fishing in that marsh for oysters for Mississippi here, for Mississippi consumption and in the beginning of 1881 there was a factory located at Pascagoula river. On the east bank of the Pascagoula river.

Q. What was this?

A. It was the Mexican Gulf Canning Co. It was a canning factory and canned oysters for shipping purposes.

Q. What did it do?

A. Well they got their oysters from the Grand marsh. They sent their vessels down there under the control of a man by the name of Thomas Bendon.

Q. Where is he?

A. He is dead. He died in Florida. They employed a great many vessels in their oyster business. They went down there and built a camp at Cranetown pass. Right by Martin island, Martin

island and Brush island is just outside. They built camp there at Cranetown pass.

Q. Near Martin island and Brush island?

A. Yes sir, they built a camp about 75 feet long, and it had one big room in it. It was a long house with one solid room for the men to camp in. There was no partition in it.

Q. How long were they there?

A. Well they were there during the oyster season, the winter season of the year for two years. Two winter seasons they took possession and fished there.

Q. Can you state in what State they supposed themselves to be?

A. In Mississippi. They said that they were in Mississippi.

Q. Was there any interference with them by the Louisiana authorities?

A. No sir, I never heard any claim made by the Louisiana authorities against them. Mabury is dead. He was the foreman of the factory. He died here in Biloxi. Benton is dead also. He died in Florida. He has a son in Mobile by the same name now running a tug boat.

Q. What has that marsh been called since you first knew it?

A. Grand marsh.

Q. When did you first know it Captain?

A. The first time that I ever was out there was before the Civil war. I went in a small boat to Cat island fishing oysters. One time with one of the Holly boys, and we went over there by Isle à Pitre and they called it Grand marsh.

Q. Have you ever heard it called Louisiana marshes?

A. Here lately I have. It is only just lately that I have heard them call it that.

Q. Were you ever in Nine Mile bayou?

A. Yes sir—no sir, I have passed by it. My step father run in there in the Civil war to get provisions.

Q. Were you ever in Three Mile bayou?

A. No sir, I never went through any of these bayous except Grand pass. I used to go fishing and hunting around there. I did not fish oysters for a living.

Q. When were you there last?

A. It has been a good many years ago. It has been ten or twelve years. Twelve years or maybe more.

Q. There has been some testimony introduced in this case Captain to the effect that there is a subsidence of that territory. Sinking. What have you to say to that if any thing?

A. Well I don't know. On the northern bank of the Grand
1637 marsh I don't know that there is any change in that, except at the mouths of the bayous some times there are bars formed there, and makes them shoal and some times they get deeper. They are not permanent.

Q. What have you to say with reference to the subsidence?

A. My experience in this matter is that the deposit from the river,

all the rivers around there, instead of the land sinking it rises, from the fact that the deposit from the river is made there and it gets to the top of the water and the marsh grows up. I can see many places where the marsh has raised by the filling. You understand the river strikes the sea and the soil that it carries is deposited there, and that is the reason that we have these islands.

Q. I am not speaking of the mouth of the Mississippi. I am speaking of the territory in dispute?

A. I don't think there is much change in it.

Q. Do you know where Petit Pass island is and Grand island, Grassy island and Round island and St. Joseph?

A. Yes sir, I have seen them. They have different names for these islands. I believe they used to call that Rabbit island 25 years ago.

Q. You spoke of Isle à Pitre and Grand Pass?

A. Yes sir, you see that St. Joseph island is almost washed away. There is a portion of it that is there yet. But the storm of 1893 nearly washed it all away.

Q. When was it that you say you first became acquainted with Grand marsh?

A. Well that was in 1858 or 1859 when I first went out that way.

Q. And you last saw it ten or twelve years ago?

A. Yes sir.

Q. Now have you ever noticed any material changes any where between the first time you saw it and the last time you saw it. If you have seen any I wish you would please let us know what those changes are?

A. No sir, I never noticed any changes there. The things are about the same that they were when I first went there. There might be a change by a close examination. By sounding you might find it, but I have never inspected it that closely.

Q. Where was your father born if you know?

A. My father was born in England.

Q. When did he come to this country?

A. He came in 1834 to Boston and from Boston here in 1835.

Q. Do you know whether he was familiar with this country about which we are speaking?

A. He built a vessel at Ocean Springs for a man named Belmont before Texas was annexed to the United States, and that vessel was chartered by Ashbury and the Brandon Bank people there. They took her to Texas with a load of negroes and the vessel was lost by going into that territory, and it not being a part of the United States. She went out of here at night with the negroes on board and Belmont lost his schooner. It was seized and held over there.

Q. Can you tell us what the understanding and belief of your father was as to the limits of Mississippi territory?

A. No sir, he died when I was quite young and I could not say. I could not say what his belief about it was.

Q. What is your present occupation?

A. I am merchandising sir.

Q. Now I understand you to say that you have lived at several places along this coast?

A. Yes sir.

Q. I wish you would tell us if you can what the general belief and opinion of the people in the communities in which you have resided of these several places was as to the boundaries of the State of Mississippi and her jurisdiction south of her *her* shore line?

A. Well the first understanding that I had about the jurisdiction of the State to the south was a case that came up before the court and my step father was acting deputy sheriff of Jackson
1638 county, and there was a levy made on a vessel at Chandeleur island.

By Col. ZACHARIE: The counsel for Louisiana here enters an objection and exception to any testimony in regard to any suit or legal proceedings being testified to by this witness, unless the foundation is first laid by showing that the record or other proceedings in such suit have been lost, destroyed or mislaid. That is to say the counsel for Louisiana objects to any hearsay, verbal testimony as to any such legal proceedings.

By Gen. MCCLURG: The witness was only stating a fact and was not attempting to state the pleadings or the matters tried and adjudicated contained in any record.

Q. You were saying that there was a vessel levied on at Chandeleur islands?

A. Yes sir, the deputy sheriff levied on her.

Q. Who was the deputy sheriff?

A. That was my step father. He levied on her in the name of the sheriff, and when they investigated the matter they found that the State of Mississippi had no jurisdiction out there, because it was beyond the 18 mile limit.

Q. They levied on a vessel on what island?

A. On Chandeleur. They withdrew the attachment.

Q. About what year was this?

A. I think that is was in 1851 or 1852, before the yellow fever epidemic.

Q. Where is your step father?

A. He is dead sir. This levy was before the big yellow fever epidemic.

Q. Can you say whether or not the records of Harrison county and the court house have been destroyed since that date?

A. Yes sir, twice, by fire.

Q. Twice since that?

A. Yes sir, twice destroyed by fire. There is no record of this thing now I don't think. That has all been destroyed by fire.

Q. Did you ever have any connection with the ordinances of Jackson, Harrison, or Hancock counties, with reference to taking fish or oysters, or with reference to fixing quarantine regulations?

A. Yes sir, in Jackson county I have.

Q. When?

A. That is some years back. I was on the board of health for six years.

Q. What years were those about?

A. I believe that it was in 1876. Along that time.

Q. As a member of the board of health of Jackson county and dealing with matters of quarantine, what was taken as southern limit or outside water limit of Jackson county?

A. The same that it is all along the coast here. Six leagues from the main land, excepting the quarantine regulations you know, they would not allow a vessel south of 29 to come into port without being fumigated, and submitting to the regulations of the board of health.

Q. 29 you say?

A. Yes sir, 29 latitude. We are about 30. Between 29 and 30 along here.

Q. In dealing with quarantine and health matters your board at that time exercised jurisdiction did I understand you to say over six leagues limit from her shore line?

A. Yes sir, they claimed that.

Q. I asked you awhile ago about the jurisdiction of the board of health of your county. I wish you would say whether you were ever a member of the board of supervisors of your county?

A. Yes sir, I am a member of it.

Q. Now?

A. Yes sir.

Q. How long since?

A. I have been since the first Monday of January last.

1639 Q. Were you ever a member of the board before?

A. Yes sir.

Q. When?

A. 1876 and 1878 I think it was.

Q. The laws of Mississippi authorize the boards of supervisors of these coast counties to make regulations for the taking of fish and oysters and game. Will you say whether your county has ever had any regulations of that kind?

A. Yes sir.

Q. While you were a member of the board?

A. Yes sir.

Q. In making these regulations and enforcing them according to the powers conferred upon the board by the laws of the State, what territory south of the shore line if any was covered in the making of these regulations and in the enforcement of them?

A. Well the jurisdiction of the board of supervisors of these

atters is coextensive with the county. And upon the petition of e citizens of a locality we would pass an order by the board pro- cting the portion of the county where they desired it. That is the ay that we acted on it generally. Some times it would be on the ay shore east of the town of Pascagoula, and some times at the outh of the river, and some times north of the railroad bridge. ascagoula river and Bluff creek and those tributaries ordinances ave been passed by the board of supervisors protecting the fishing ere, and to prevent fishing with a smaller fish net than a certain ze. To protect the spawn of the fish.

Q. How far out from the shore did you exercise jurisdiction in is matter?

A. We never went any further than the Mississippi sound, but we new that we had jurisdiction coextensive with the county, the me as the State, 18 miles. We know that we can arrest any body ith a process that far out. As far as Ship island and out there.

Q. Were you ever mayor of your town?

A. Yes sir, for two years. I was mayor of the town.

Q. Mayor of what town?

A. Scranton.

Q. What years?

A. I have forgotten the years now.

Q. About how long ago?

A. I think that the town has been incorporated about fourteen or xteen years, and I was the first mayor of it.

Q. Now under the law the mayor of these incorporated cities and wns are made *ex-officio* justices of the peace?

A. Yes sir.

Q. You acted in that capacity also, did you?

A. Yes sir.

Q. Well do you know of any matters that came before you for ljudication involving civil and criminal trials out as far as Horn land?

By Col. ZACHARIE: The counsel for Louisiana objects and excepts any testimony of the witness as to any judicial proceeding before im as mayor of the town of Scranton or *ex-officio* justice of the eace whether civil or criminal unless the foundation is first laid y counsel for Mississippi by showing the loss, destruction or mis- ying of the record or other primary evidence of said judicial pro- eedings.

Q. I was asking you Captain whether you remembered as a fact f any matters civil or criminal that came before you for adjudica- on where the venue was on Horn island or to the southward of it?

A. No sir, none has come before me on Horn island or to the outh of Horn island.

Q. Can you recollect as a fact whether any such matters came up or adjudication in your county?

A. Yes sir, there has been an adjudication in the county.
1640 There was one case came up but it was settled amicably.
About Bayou Casotte. There was some infringement of the fishing there, but it was settled between them.

Q. Can you state as a matter of fact whether any matters civil or criminal have come before the circuit or chancery courts of your county respecting transactions on Horn island or to the southward of Horn island?

By Col. ZACHARIE: Counsel for Louisiana renews the same objection as made above to the witness testifying to any judicial proceedings before the courts until such time as the counsel for Mississippi may show the loss, destruction or mislaying of the judicial records in such cases, and to the introduction of all secondary evidence until such time as the impossibility of producing the primary or best evidence be shown and laid as a foundation for the introduction of secondary evidence.

By Gen. MCCLURG: The attention of the counsel for Louisiana is called to the fact that the destruction of the court house and the records of Jackson county has already been proven, and this question was initiative first, to show the fact of the adjudication of any civil or criminal matter and if any develops proceed to establish the matters in controversy by parol testimony, if it should appear to have been prior to the destruction of the court house and records, otherwise to produce the records themselves disclosed by the testimony of the witnesses.

Q. Now Captain I will ask Mr. Peyton to read to you the question that I asked you awhile ago and ask you to answer it? Can you state as a matter of fact whether any matters civil or criminal have come before the circuit or chancery courts of your county respecting transactions on Horn island or to the southward of Horn island?

A. No sir.

Q. There has been some testimony Captain in this case in respect to the destruction of the marshes by musk rats. Have you ever noticed any musk rats in that country?

A. Not in the marsh no sir.

Q. Where did you notice them?

A. On Chandeleur island there was proof of them. Before that heavy storm we had there were plenty of them on Chandeleur island.

Q. To which storm do you refer?

A. To the one in 1893.

Q. They were destroyed on Chandeleur by the storm of 1893?

A. Yes sir, they were washed off.

Q. Did you ever notice any on the Grand marsh?

A. No sir, I never noticed any particularly over there. I did not know there were any there at all. They were washed from Chandeleur islands. I guess they were washed over on the Grand marsh and that country over there in the storm.

Q. And that storm was when?

A. That was in October 1893.

Q. What have you to say if anything in regard to their destruction of the soil?

A. I don't think that they destroyed anything. I think that they tore down to make their habitation, but I don't think that they destroyed any part of the country at all. They did not carry any of it off.

Q. Have they any influence in the building up of the soil?

A. I think they have. They build a kind of a mound. They build a kind of a mound place for their nests, and they are like the raccoons, they stay there and eat roots and fish. They fish at low water. You find them outside of the reefs fishing. I used to go out there and catch them with a dog some times.

Q. Has that any influence on the sediment forming and collecting it?

A. They are something like a beaver would build his dam. They build their nests.

1641 Q. What about the wind carrying mosquitoes?

A. Well in 1858 we had a severe storm from the southeast. There was washed away all of the front of Biloxi in that storm. There was a store up here washed away in that storm. That is the worst storm that we have ever had along the coast that I can recollect.

Q. What about the mosquitoes?

A. I had to walk from Waveland to Ocean Springs. I was washed ashore in a small boat there in the storm. Every bush that I hit it looked like a thousand mosquitoes came out of it. I never saw as many mosquitoes in my life.

Q. Where did they come from?

A. They came from a southeast direction. I think that they came from the islands up there opposite the main land on the Florida coast.

Q. How far can they be blown by the wind?

A. I suppose that they were blown one hundred miles. There is no telling how far. When the wind blows they come. If we have a southwest wind here for a few days the mosquitoes will be blown from the mouth of the Mississippi river and come all along the coast.

Q. How far is it from here to the mouth of the Mississippi river?

A. A seventy-five or one hundred miles.

Q. What about mosquitoes on the marsh?

A. Well the mosquitoes on the marsh they inhabit it winter or summer. In the dead of winter you can walk in the marsh there and kick up a big tuft of marsh that has been lying dead on the soil there and the mosquitoes will come out from under it in the dead of winter.

Q. Are there more or less of them there than on the Mississippi shore?

A. Yes sir, there are more of them there than on the Mississippi shore.

Cross-examination.

By Col. ZACHARIE:

Q. What year were you born in Captain?

A. 1839.

Q. And you have been engaged in the lake trade since 1867?

A. Yes sir, that is the commencement of it.

Q. When did you first hear any discussion about the boundary line or the dividing line between Mississippi and Louisiana?

A. The first I heard of it was in running a vessel the captains would get to talking about the different places and about the dividing lines between Louisiana and Mississippi, and it was talked about a good long while before the quarantine regulations were put up, and of course then we had to know positive.

Q. About what time was it that you heard this discussion first?

A. It was way back yonder.

Q. Could you name about the time?

A. Well I heard it discussed in 1868 and 1869 and 1870 and along there among the schooner men.

Q. What did you say was the occasion that gave rise to that discussion?

A. The discussion about the boundary line was to know when we were in Louisiana and when in Mississippi.

Q. What if anything brought it up. Was it the quarantine?

A. No sir, the quarantine was not established then. That was later on.

Q. Can you give us some idea of how these discussions arose?

A. Yes sir, it was like all other matters that people on a vessel would want to know. So as to inform one another on things of that kind. That is what it was done for.

Q. You say that in 1881 the Mexican Gulf Canning Co., established on these marshes a factory?

A. No sir, not a factory.

Q. I mean to say a camp?

A. Yes sir, a camp.

Q. Did they have any store there?

1642 A. No sir, they did not have any store there. They brought the supplies on the vessels down there. Each vessel supplied herself when she went out.

Q. Did they sell to their employers or others?

A. No sir, I don't think that they did. Each vessel was furnished and she went down there with supplies for the trip.

Q. You say that they considered that they were in Mississippi territory?

A. Yes sir, that is what they said.

Q. How did you know that fact?

A. I did not know it as a fact? I know that they claimed that.

Q. How do you know that they claimed it?

A. I heard them talking about it. About the Mississippi line. Judging from the geography of the country they thought that we were in Mississippi. The Louisiana people never disputed it with them and I judged that they were right.

Q. Does not your impression on this subject arise from the fact that there was no objection or interruption on the part of the Louisiana authorities. Is not your opinion based on that fact, that the Louisiana authorities did not interfere or object.

A. Yes sir, I thought that if it was Louisiana territory that there would be an objection to their camping there and fishing oysters there.

Q. Well do you know as a fact that under the laws of Louisiana up to the year 1900 Mississippians, Alabamians and people from other States had the right to go there and camp and fish oysters?

A. No sir, I am not acquainted with the laws of Louisiana. I am not posted about that.

Q. Well your idea about their claiming this was Mississippi territory was derived from that impression?

A. Yes sir.

Q. Well now is it not a fact Captain that in speaking of these marshes in this disputed territory the common expression along this coast is to call them the Louisiana marshes?

A. No sir, not with the people that I mix with, and on the vessels that I sailed with they always called it the Grand marsh. It was always known as the Grand marsh.

By Gen. McCLURG:

Q. What is the meaning of the word Grand marsh?

A. It means Great marsh. I take the word grand to be a French word that means great.

By Col. ZACHARIE:

Q. I am asking you in regard to the general expression along this coast in regard to this marsh. Is not the expression in speaking of these marshes usually Louisiana marshes?

A. No sir, not along the coast.

Q. When the mosquitoes are very bad here is it not a common expression that they come from the Louisiana marshes borne in here by the southern winds?

A. A southwesterly wind brings them in here.

Q. Is it not a common expression that they come from the Louisiana marshes meaning the marsh within this disputed territory?

A. Within the Louisiana boundary yes sir The boundary line that is in dispute now, I have heard that was called the Grand marsh.

Q. Did you state that mosquitoes can be borne 100 miles and still live?

A. Yes sir.

Q. Don't you know it is a fact from the recent scientific study of the mosquito, that he can not be borne but a very few miles by the wind without being killed?

A. No sir, I do not know that.

Q. Where do these mosquitoes come from that you have along the coast here?

A. Well they come from water pools I suppose.

Q. I mean from what direction do they come?

A. They come from various directions. Some come from
1643 the southeast and some from the southwest. Some from Louisiana and some from Florida.

Q. I understand you to say that you have not been in this territory for ten or twelve years?

A. Yes sir. I have run a vessel since that on the regular route to New Orleans, but I have not been in that territory.

Q. Captain, you have never paid any close attention to the changes which might or might not have taken place in this disputed territory have you?

A. I have just by a casual observation. I have never made any extended observation of it.

Q. They you know nothing of the fact as to whether this territory has subsided or sunk?

A. I know nothing of it particularly only by observation, I don't think there is any material change in it.

Q. You say that you never have paid any close attention to it?

A. No sir.

Q. You have never paid any close attention to any changes which might have taken place as a result of these severe storms have you?

A. Yes sir, I have looked at them. After a storm I have usually looked very carefully to see what damage it has done.

Q. Have you ever gone ashore at any of these points on this coast extending from Malheureux point to Isle à Pitre, and noticed any changes that have taken place there in the mouths of these bayous and in the interior of these marshes. Whether the water area has increased. Have you ever been ashore to notice these particular things?

A. Yes sir, I have been ashore some on Isle à Pitre. I saw some little changes, but not any thing material.

Q. Have you been ashore at any point between Malheureux point and Isle à Pitre to notice any changes which might have taken place?

A. No sir, not lately.

Q. Have you ever been in the mouths of Three Mile bayou and Nine Mile bayou and Johnson's bayou and Creole gap and these other bayous and passes in order to notice whether they have widened any since your first visit there?

A. No sir, I have not examined them to see whether they have widened or not.

Q. They you know little or nothing about the territory to the westward of Grand pass?

A. Well I know by casual observation. I know that I have sailed along there and looked out.

Q. Well Captain is it or is it not a fact that these musk rats in burrowing under the ground leave a thin crust on top which will give away with the slightest pressure there from a person passing over it or from a body of water?

A. Yes sir, they are subject to be indented.

Q. Is it or is it not a fact that a person traversing these marshes on foot will often find himself going down to the arm pits where these musk rat holes are some times?

A. Yes sir.

Q. You stated that a vessel which had been attached and seized on the Chandeleur islands by the authorities of Jackson county was released because it was found to be beyond the 18 mile limit?

A. Yes sir, beyond the jurisdiction.

Q. How did you derive this information?

A. Well we found out by the limits of the State being 18 miles from the main land, and this was beyond the limit.

Q. Who did you know these things from?

A. My step father was the deputy sheriff and he was talking about it. He could not hold the vessel.

Q. You were only 13 years old then?

A. I was young then but I recollect what they said about it, because there was quite a talk about this vessel being seized out there.

Q. You merely got that as hearsay?

A. Yes sir.

1644 Q. You were not present in the court and saw the papers or any thing of that kind?

A. No sir, I know that he went out there and did this work and come back again. I know that they released the vessel. They put me on a horse and I went up above there 20 miles where the sheriff lived, that caused me to go up there to take the returns to the sheriff.

Q. When was the court house in Jackson county destroyed?

A. I think that it was first burned in 1872 or 1873 and then afterwards I think that it was 1874 or 1875. I am not sure about these dates.

Q. Do you know as a matter of fact whether all of the records were destroyed or whether there were any of them saved?

A. They were all destroyed from what I can learn. Every thing was destroyed in the court house. Nothing was saved. Every thing in the way of records was destroyed. Both of them were wooden buildings. They have a brick building there now.

Q. In regard to your quarantine regulations. I understand you from your testimony in chief that there were no special regulations as to the limit of your quarantine jurisdiction, and you simply passed a regulation that vessels coming from the south of the 29th, degree of latitude should be subject to quarantine and detention?

A. Yes sir, quarantine and detention.

Q. Were your quarantine regulations printed and published?

A. Yes sir.

Q. Have you got a copy or could you get a copy of these regulations?

A. No sir.

Q. There are none of them now?

A. No sir, none now I think. They had to publish them under the law.

Q. How were they published. In a newspaper?

A. Yes sir, in a newspaper.

Q. Was there a paper published at Scranton?

A. Yes sir.

Q. Do you think that could be found in the files of the paper? What was the name of it?

A. It is called the Pascagoula Democrat Star now. I believe that it was the Democrat Star then. A man by the name of Smith was the editor and publisher first there.

Q. When were these regulations of the supervisors in regard to the oyster fisheries and other fisheries first enacted?

A. Well they enacted regulations in regard to oysters and fishing I believe first in about 1876 or 1878, I believe were the first orders that were passed by the board regulating that.

Q. Was this in pursuance of the statutes of the State?

A. I believe the statutes of the State gives the board of supervisors the power to enact such orders to protect fishing and oysters.

Q. Do you know when this statute was passed?

A. Well no sir. It is not in the 1892 Code. The statute was long before that in the old code.

Q. You have spoken about the silt or deposit from rivers helping to build up these marshes and disputed territory. What rivers do you allude to from which the deposit was made?

A. Different rivers. The Pascagoula river for one, and the Mississippi river has gone a good deal down there since it was discovered by De Soto.

Q. You don't mean that the deposits from the Pascagoula river would go far enough west to build up these marshes?

A. No sir, my observation of the river is that islands have grown up from the deposits.

Q. Which river do you mean?

A. The Pascagoula river. I can show you the islands that have grown up there in my recollection.

Q. That would have no effect on the marshes?

A. No sir, the Pascagoula river would not.

Q. You have mentioned the Mississippi river. Do you know what is the demand of Louisiana or Mississippi? Louisiana
1645 was admitted to the Union in 1812 and Mississippi in 1817. Is there any silt of the Mississippi river that goes to the eastward?

A. Yes sir, I believe it does go to the eastward. That is my opinion in regard to these islands. My opinion is that the Chandeleur islands are a deposit of the Mississippi river in years gone by. I think that all of these places are deposits.

Q. Let me point out to you the distinction then. Of course it is pretty well admitted that prior to the stoppage of Bayou Manchac, the River Iberville and all of this territory was made by alluvial deposits?

A. Yes sir, Scranton is on an alluvial deposit from the Pascagoula river.

Q. Do you mean to say since the levees have been established by the State of Louisiana and along the Mississippi river, that there is any silt that comes from the mouth of the Mississippi river that would tend to raise these marshes in dispute?

A. That is my opinion that it does. I don't know that it always did.

Q. Did you ever examine the reports of the Government and the hydrographers and the engineers showing that there is a littoral current that carries all of this soil to the westward and that none of it goes to the eastward?

A. I never have examined their reports about it

Q. You spoke during your examination in chief in regard to St. Joseph island being nearly washed away?

A. Yes sir.

Q. Is it or is it not a fact that Round island has been entirely washed away?

A. I never have heard of its being entirely washed away, but there are Dog Keys between Horn island and Ship island that have been washed away and built up again.

Q. Do you know Round island?

A. Yes sir.

Q. Have you in the last few years passed there?

A. Yes sir.

Q. Have you ever noticed whether that island still appears there or not?

A. Yes sir, Round island. In Jackson county do you mean. What Round island do you mean?

Q. I mean the Round island lying between the north coast of these marshes and the Mississippi coast. Have you ever noticed that?

A. No sir, I have not noticed that.

Q. Have you ever noticed the changes which have taken place in Grassy island and Half Moon island?

A. Yes sir there are some changes in these islands.

Q. What is the change. Has not a large portion of the territory been washed away?

A. Yes sir, by this storm of 1893. That washed away St. Joseph island and some of the points of these marsh islands over there, be-

cause they were directly exposed to the force of the waves and the storm.

Q. Now you say that the storm of 1858 and the storm of 1893 produced very decided and remarkable changes along the Mississippi coast. Do you not say so?

A. No sir, I did not say that. I said the storm of 1858 was the most destructive storm we had done to the coast in the way of destroying bath houses etc., in front of the town.

Q. Then I will ask you. Did not the storm of 1893 produce remarkable changes?

A. Yes sir.

Q. A large portion of the beach along this coast was washed away?

A. It did not affect this coast country of Mississippi as much as the Louisiana coast, because the wind was a different direction. In the storm of 1858 the wind was southeast, and the waves were thrown against this coast, but the other storm started from the north east which blew on the Louisiana coast down in that country, and being from that direction it did not hurt this coast near as bad as the storm of 1858.

1646 Q. Do these great storms not generally originate from the wind blowing from the southeast for some time?

A. Well I have seen two great storms from the northeast. One time the city of Mobile was inundated, and then this 1893 storm.

Q. Do these great storms not generally originate from the wind blowing from the northeast for some time?

A. No sir, they don't originate from that.

Q. Then it is not your opinion and experience that these southeasterly winds blow away these signs by blowing up the water?

A. Easterly winds?

Q. Southeast winds?

A. Southeast winds. Well it does somewhat interfere with some of the passes between the islands. For instance Ship island and Horn island.

Q. Now in the majority of these cases if it be so that these southeast winds fill up and bank up the waters in these sounds and so on. Is it not a fact that very often in these storms the wind shifts around to the northwest?

A. Yes sir, some times it does. From the southwest to the northwest.

Q. Is not the effect of the shifting of the wind around to the northwest to blow out these waters which can readily escape through the passes and blow it through to the territory out to the south. Is not that your experience with the majority of the storms on this coast?

A. Yes sir, when the wind is northwest it blows the water out yes sir.

Q. And this water is banked up in this sound. And is not it blown with tremendous force towards the south?

A. It is blown with considerable force but not with the same amount of sea the southwest wind brings it in.

Q. Have you ever been out in any of these storms?

A. Yes sir.

Q. Have you ever been in the neighborhood of these marshes in these storms?

A. No sir, I never have been on the marsh in a storm.

JACOB CAVATCHOVITCH, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLUNG:

Q. How old are you?

A. I was born in 1834.

Q. Where were you born?

A. In Austria.

Q. When did you come to this country?

A. In 1859. In 1858, and then I went away again and then I came back in 1859 and stayed.

Q. Where have you lived since 1869?

A. Any where. I used to live on the Mississippi river, but in the summer time I would come on this coast here.

Q. What were you doing?

A. Fishing oysters in the winter time; in the summer time I would come here on the coast with boats.

Q. When did you first commence fishing oysters in this country?

A. On this side in 1866. On this side of the Mississippi river.

Q. On the east side of the Mississippi river you have been fishing oysters since 1866?

A. Yes sir.

Q. Are you familiar with the marshes?

A. Yes sir.

Q. What do they call these marshes?

A. There is one that we call Blind bay. That was shut up but it is open now. There is Petit pass.

Q. You mean Petit pass that is marked on the map?

A. Yes sir, when you come out from the Rigolets and coming to the marsh you strike then the Petit pass. If you don't go by Nine Mile bayou. You go in Petit pass.

1647 Q. Did you ever go through Nine Mile bayou?

A. Yes sir.

Q. How many times?

A. I have forgotten how many times.

Q. When did you first go there?

A. In 1866.

Q. Where else did you go there?

A. In Bayou Tresor.

Q. They call that Treasure bay now I believe.

A. There is a bayou. You have to pass through the bay and then there is a bayou coming in there. We fished in the bayou at that time.

Q. What sort of a boat did you go down there in?

A. In the Orient. A big boat that carried 160 barrels of oysters.

Q. How much water did she draw?

A. She drew three and a half feet.

Q. Did you ever go through Three Mile bayou?

A. Yes sir.

Q. When?

A. In the same year. In 1856.

Q. With the same boat?

A. With the same boat, yes sir.

Q. How far down did you go through Three Mile bayou?

A. We used to go through Karako and Drum bay and Cat Fish pass. Some times you would fish and make one place and then we would change and go to another, where we would see that there were better oysters.

Q. Did you ever go through Johnson bayou?

A. Yes sir.

Q. Did you ever go through Bayou Pierre?

A. Yes sir.

Q. Grand pass?

A. Yes sir.

Q. When did you go through Grand pass first?

A. I believe that the first time that I went there was in 1868 or 1869 or some where along there.

Q. Did you ever go through Creole gap?

A. Yes sir, Creole gap was first shut up when I first remember it, and then a fisherman cut out there with a spade. It was too far to go to the east end of Isle à Pitre, so they cut out there with a spade.

Q. When was this cut with a spade if you remember?

A. Well I believe that it was in 1867 if I am not mistaken. I can not remember just exactly what year it was.

Q. When were you through these places that I have asked you about. The last time that you went through there?

A. Pretty near every year sir.

Q. Are you in that business now?

A. Yes sir, I am.

Q. You are in that business now?

A. Yes sir.

Q. Do you know where St. Joseph island was?

A. Yes sir.

Q. Grassy island?

A. Yes sir, Grassy island.

Q. And Grand island?

A. Half Moon island now they call it.

Q. Grand island is now what is called Half Moon island?

A. Yes sir.

Q. There is a little island in there that they call Round island?
A. A small piece of it is washed away. Of Round island.
Q. And Petit Pass island. Do you know where that is?
A. Yes sir.
Q. Now these islands and this marsh territory that I have been asking you about. What State are they in. Mississippi or Louisiana?
A. I never heard any thing about it. We used to go inside of the marsh, and we never called any name Mississippi or Louisiana.
1648 Some times we used to ask Where are you going to fish, and they would say I am going to fish in Three Mile bayou. I am going to fish in Cat Fish pass. We did not call the name of it at all.
Q. You never knew about that?
A. No sir, I did not know about that. We never had no trouble there. Nobody ever troubled us there.
Q. Neither Louisiana or Mississippi ever bothered you about it?
A. No sir, only just a few years ago.
Q. Did I understand you to say that with a boat drawing three and a half feet of water you could go through any of these places?
A. Yes sir, or four feet yes sir. We used to go in Bayou Mussell fishing at low tide, and then you would have to stay there and wait until the tide comes and raises you up to go over. In getting fish it was just the same thing. There might be a low tide and you would wait for high tide to come in.
Q. Was there any difference in the marshes as it was then and now?
A. I don't find much difference. It looked like to me that it was just the same. Some times then in low tide you had to lose time in waiting for the tide just the same that you do now.
Q. It is the same now that it was in 1866?
A. Yes sir, it is the same thing now.
Q. That is about 48 years?
A. I don't know how long it is.
Q. 1866–1876—1886–1896?
A. It is about 45 years I believe.

Cross-examination.

By Col. ZACHARIE:

Q. Did you ever hear this territory in dispute called the Louisiana marsh?
A. I heard it about 20 years ago I believe or some thing like that.
Q. They called it the Louisiana marshes?
A. Yes sir.
Q. Were they not always regarded as a part of the parish of St. Bernard?
A. Yes sir, St. Bernard parish used to claim a place up there by—Mulatti bayou—Louisiana used to claim that.

Q. Well the fishermen from Mississippi as well as the fishermen from Louisiana recognized that territory as a part of the parish of St. Bernard?

A. I don't know sir. I could not tell you. We used to go fishing oysters on Pointe à Lahache. That is what they call it. That is on the Mississippi river where there is a church. Before we went to fish in Bayou Pascale.

Q. Well did you fish as low down as California bay?

A. Yes sir.

Q. Did you fish back of the quarantine?

A. Yes sir. When the oysters died here, I don't remember what year it was. Mr. Lopez took a steamboat and took me and showed me the place down there.

Q. That is after the crevasse?

A. Yes sir, after the crevasse. They took the steamboat and took me aboard and I went with them to California bay, and they showed me where there were oysters, and at that time the oysters were dying over here. Yes sir, I was all through the marshes. I can call names by name. In 1866 we made one trip by Point Pirate, and there an old man named Peter Roshandan on there and Castang Jack, we used to call him that down there, and there was a rock on that shore there on the island about a foot and a half square and that rock was there, and I asked the old man what was that rock and he said that it was the Louisiana line.

Q. Where is that?

A. On Pirate point. It was made about a foot and a half square and there was a hole in the middle of it, and a piece of iron in it put in there with lead.

Q. An iron filled with lead?

1649 A. The iron was put in there and the lead was put around it to hold it, and a year or two after that he was aboard out there—I was aboard and out there, I don't remember how long it was. He was on the edge of the marsh, and he told me that he took the rock aboard for ballast and took the iron out. He said before he would go overboard he took it out for ballast.

Redirect examination.

By Gen. McCLURG:

Q. Did you ever pay a license to fish?
A. Yes sir, in this State they make up pay a license.
Q. In Mississippi?
A. Yes sir, in Mississippi.
Q. When was the first year that you paid?
A. I don't remember exactly the year that it was.
Q. 1892. 12 or 14 years ago?
A. Yes sir, some thing like that.
Q. Did you pay it to Mr. Howes at Mississippi City?
A. No sir, I paid it here in Biloxi.

Q. Who did you pay it to?
A. I don't remember. I used to work for Mr. Lopez and he used to make me get the license. He would send for the license.
Q. Under that license where did you go?
A. We went out the same thing in the marsh.
Q. Under that Mississippi license?
A. Yes sir.
Q. And Louisiana did not interfere with you?
A. No sir.
Q. What was this license for?
A. I don't know sir.
Q. Was not it to take oysters?
A. Yes sir to take oysters.

The commission here took a recess until 2 o'clock p. m. for the dinner hour.

The commission reassembled at 2 o'clock with the same present as this morning and the following testimony was taken to wit:

K. L. THORNTON, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. Where do you reside, Mr. Thornton?
A. Pass Christian.
Q. How old are you?
A. 49 years old.
Q. Pass Christian is in Harrison county is it?
A. Yes sir.
Q. Have you ever held any office in this county?
A. I have held the office of justice of the peace of this county.
Q. What years please sir?
A. From about the middle of January 1894 to the first Monday of January 1900.
Q. What district of the county are you justice of the peace of, or were you justice of the peace of?
A. District No. 3.
Q. That embraces the town of Pass Christian does it?
A. Yes sir, that embraces the town of Pass Christian.
1650 Q. I believe under the laws of the State you had jurisdiction of civil matters not exceeding $200 in value and all criminal matters, final jurisdiction of misdemeanors, and you sit as a committing court in felonies?
A. Yes sir.
Q. Tell us please sir where your office was?
A. My office was really my residence. A part of it was a drug store.
A. In what town?

A. In the town of Pass Christian.

Q. Have you ever claimed or exercised jurisdiction as a justice of the peace of Harrison county south of the shore line and if so state how far. How far you claim to exercise such jurisdiction in either civil or criminal matters?

A. I claimed that I had the right to exercise jurisdiction in civil and criminal matters 18 miles from the shore in Harrison county. The distance of 18 miles.

Q. Did any cases ever come before you in that 18 mile limit?

A. A few criminal cases did.

By Col. ZACHARIE: The counsel for Louisiana objects and excepts to any of the testimony of this witness in regard to judicial proceedings had by him whether civil or criminal without the foundation first being laid. The production of the records or proof of the loss destruction or mislayal of that record.

By Mr. MCCLURG: The counsel for Mississippi has not attempted to prove the contents of any judicial record, but merely asks the witness to state as an independent fact whether any cases civil or criminal where the venue was laid to the south of the Mississippi shore ever came up before him and they understand that is all the witness is called upon to answer.

Q. I will now ask the stenographer to read the question to the witness. Did any cases ever come before you in that 18 mile limit?

A. A few criminal cases came before me. There were a few criminal cases came before me of a violation of the county ordinance in reference to the culling of oysters, but the same occurred within three miles of the shore of the town of Pass Christian. Nothing any further out than that.

Q. The venue of these cases was north of the deep water channel?

A. Yes sir, they were north of it.

Q. Who was your predecessor in office?

A. James H. Espy.

Q. Where is he?

A. He is dead.

Q. Who succeeded him?

A. John D. Northrop.

Q. Where is he?

A. In Pass Christian. F. L. Patenotte succeeden John D. Northrop and he is the present justice of the peace.

Q. Were you ever a member of the board of supervisors of this county?

A. No sir.

Q. Were you ever a member of the board of health?

A. I was a member of the board of health for the town of Pass Christian for a number of years.

Q. In what county?

A. No sir, not of the county. As a member of the board of health of the town of Pass Christian we only claimed to exercise jurisdic-

n over the health matters about two or three miles of the shore
ıth of us, and only two or three miles back of the town.
Q. How long have you lived in this county?
A. With the exception of ten years I have lived here since the 2nd
y of December 1865 in Pass Christian.
Q. Well during the forty years, with the exception of ten that you
ve lived in the county and at Pass Christian I would be glad if
ı would tell us if you can what has been the general acceptance
of the people of this county and of the adjoining counties along
51 the coast if you know as to the location of the southern
boundary line of the State of Mississippi?
A. Well as far as I can understand from hearsay and otherwise
ey have all claimed that the southern boundary is 18 miles from
shore, though it was not definitely located at any particular
nt. That is I have never heard them speak of any particular
nds or particular marshes or coast or any thing else as being the
thern boundary, but we have always spoken of it as being 18
les from the shore.
Q. Do I understand from your answer that that has been the
neral understanding during the forty years there in your neigh-
rhood?
A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Thornton, since when has this understanding prevailed
t the Mississippi boundary extended 18 miles south from the
ssissippi main land?
A. My recollection was from hearsay when I first came down to
coast as a child.
Q. Was this the general acceptation amongst the fishermen and
people along here?
A. Yes sir, I remember then at that time the people at Pass
ristian. Of course the most of them are dead. I reckon all of
m are dead. I have heard them speak about the Louisiana
ts fishing oysters about Pass Marianne light and in sight of the
re, and some times speaking of going out and running them
ıy from there. That they had no business in that territory.
Q. Is it not a fact that the marsh land which lies south of the
in land of Mississippi, that is south of these islands have been
nerally known by the fishermen and others along the coast as the
ıisiana marshes?
A. I have some times heard them called the Louisiana marshes,
I think they are generally known as the Grand marsh.
Q. Is it not a fact that whenever Pass Christian and these other
ces are visited with mosquitoes, that they are attributed to the
th winds blowing them from the Louisiana marshes. This dis-

puted territory. Is not that the way that they generally speal them?

A. No sir, we only have mosquitoes when we have a west w Not a very hard or a very high west wind.

Redirect examination.

By Mr. McCLURG:

Q. Judge Zacharie asked you about the mosquitoes that gathered over here, and in discussing the matter he says that t are some forty or fifty different varieties, and he has had some cussion as to how far they could be blown by the wind alive, the witnesses. I read in the Times Democrat this morning some scientists advance the theory that the mosquito has 32 te If you have any information on that subject as to how far quitoes can be blown by the wind and how many teeth they h and how many different kinds of species there are I would be to have you put it in the record?

A. I don't know much about them any more than their bi qualities.

Q. Do the- bite like they have teeth?

A. They bite like they might have some thing besides teeth.

Q. Claws?

1652 A. I suppose you might put it daggers. I know that t are a number of varieties. How many I don't know.

Q. What about the distance that they might be carried alon the wind?

A. I don't know that, but I would judge that they might be ried forty or fifty miles without any trouble at all.

Q. You are not up on the subject of musk rats are you?

A. No sir, I have seen a few at Pass Christian. I don't k where they come from.

Q. They were not disturbing the surface of the marsh or hav it to wash away the coast or the marsh to go down with them?

A. No sir, there were alligators in the edges of Pass Christi few years ago. I think there are still some there but I don't k any thing about the musk rats.

Q. I am told that they are the deadly enemy of the musk rat

A. That is what I have heard.

Q. Did you ever from your knowledge and experience during last forty years of this disputed territory and of musk rats, t that musk rats ever had much effect on the location of the bou ary between the States?

A. I did not.

Q. It is claimed by Louisiana that the deep water channel ning out of the mouth of Pearl river and to the north of Half M and Grand islands and the north of St. Joseph I believe, and aro to the southwest of Cat island into the gulf of Mexico, to the of the Chandeliers—. During the forty years that you have li

here state whether or not you know or have ever heard of that channel constituting the dividing line between these two States?

A. I don't know that I have ever heard of it until since this dispute. Just since this suit came up.

J. R. KELLY, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you live, Mr. Kelly?
A. Gulfport.
Q. In Harrison county?
A. Yes sir.
Q. Do you hold any position in this county?
A. Yes sir.
Q. What is it?
A. Justice of the peace of district No. 2.
Q. How long have you been justice of the peace?
A. Since the 19th of July 1902.
Q. Of what district?
A. District No. 2.
Q. *How long have you been justice of the peace?*
A. *Since the 19th of July 1902.*
Q. *Of what district?*
A. *No. 2.*
Q. That embraces the city of Gulfport?
A. Yes sir.
Q. Have you had before you during that time any civil or criminal cases where the venue was south of the shore line at Gulfport?
A. Yes sir, I have.
Q. Where were they. Where was the venue?

By Col. ZACHARIE: The counsel for Louisiana makes the same objection and exception as entered before to similar testimony.

A. Well I had several cases under this new oyster law, and I had one case from Cat island, that is about nine miles from Gulfport.
Q. How far south of the shore line at Gulfport does your jurisdiction extend?
1653 A. We consider it 18 miles. It takes in Cat island and Ship island.
Q. Why do you fix it at 18 miles Mr. Kelly. Why do you fix the limit at 18 miles?
A. That is what the general understanding has been ever since I have known any thing about it. Since I have been here.
Q. Is that southern limit of Harrison county to the limit of the State of Mississippi?
A. Yes sir, it is 18 miles out.
Q. Where is the court house of Harrison county?

A. It is in Gulfport.

Q. How far is it from the shore?

A. About 500 feet.

Q. How far is it from the court house to the northern limit of your county?

A. I think that it is 42 miles, but I am not sure. I know where the line is very well. I know where the county line is. I think that it is 42 miles.

Q. It is shown that the bay of Biloxi is on the eastern line of this county. How far is it from your court house to the bay of Biloxi?

A. It is about 13 and one half miles I think.

Q. Bay St. Louis is shown to be the western boundary of your county, of Harrison county. How far is it from the court house to this bay?

A. It is about the same distance.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Kelly will you look at the map and see that broken portion south of the main line of Mississippi. What name has that been known by amongst the fishermen and the people generally. Has it not been called the Louisiana marshes?

A. You mean south?

Q. Yes sir?

A. No sir, southwest. The Louisiana marsh is out that way, but I have always understood that the Louisiana marsh was 35 miles from Gulfport. That is where those oysters come from. I never have dealt in oysters and I don't know very much about it.

Q. I am not asking you what you have understood. I am asking you as to the general name common to that section of the country lying between Malheureux point and Isle à Pitre. What is that generally called amongst the people along this coast and amongst the fishermen. Is it not called the Louisiana marshes?

A. I can not answer it because I never have been out there. I understand that the Louisiana marshes are out that way.

Q. I am not asking you if you have ever been out there. I am asking you what that territory is called the Louisiana marshes?

A. Will have to answer it as I did before. I have heard that the marshes are out that way.

Q. Are you not willing to say that this particular territory is called the Louisiana marshes?

A. No sir, I am not.

Q. How did you derive your information that the southern boundary of Mississippi extended 18 miles south of the main land and south of the east mouth of Pearl river?

A. I just got it from the lawyers. They said it was the general understanding that Mississippi extended 18 miles out.

Q. You say that you got it from the lawyers?

A. The lawyers and general information around.

Q. Did you ever hear it discussed amongst the ordinary run of people. The laity. That is the ordinary run of people. You never heard it discussed among them did you?

1654 A. No sir.

Q. You do not know do you that in the act admitting Louisiana all the islands within three leagues of her coast were declared to be within her boundaries. In the act admitting the State of Louisiana into the Union, the islands within three leagues of her coast were declared to be within her boundaries. You have never taken the trouble to investigate that have you?

A. No sir.

Q. The territory that you have spoken of as the Louisiana marshes. Is that the territory from which the great mass of oysters are brought to this coast?

A. I understand that it is yes sir.

Q. Then if the large amount of oysters that are brought here come from the Louisiana marshes, and the large amount of oysters are brought from this territory in dispute, then it would fix in your mind that this territory was called the Louisiana marshes?

A. Well I just heard that it was the Louisiana marshes. I never have investigated it.

Q. Was it not the common saying among the people along this coast when you have a plague of mosquitoes that they come from the Louisiana marshes?

A. Come from the marshes. We don't say Louisiana marshes.

Q. As a matter of fact what direction do they come from?

A. Well these last come from out in the woods.

Q. What direction by compass?

A. That is north.

Q. What is the generality of the direction from which they come ordinarily?

A. Well that is what they say along here. From the south west.

Q. Well these marshes that you have spoken of as the Louisiana marshes are to the southwest of Gulfport?

A. Yes sir.

Q. Now is it not a common saying when you have these mosquitoes that they come from the Louisiana marshes? Is not that the common expression along the coast here?

A. That they come from the marshes when they come off the water.

Q. I am speaking of the common expression when the mosquitoes are abundant here. That they come from the Louisiana marshes?

A. Yes sir, they come from the marshes.

Q. You are not willing to say that the people do not say that they come from the Louisiana marshes?

A. Some do, but the common expression here is from the marshes.

Q. And some of them say that they come from the Louisiana marshes?

A. Yes sir, Louisiana marshes.

Q. You have spoken of a case that came from Cat island before you as justice of the peace. What was the character of this case. Civil or criminal?

A. Criminal.

Q. What was the charge?

A. Assault and battery.

Q. It came direct from Cat island, did not it?

A. Yes sir, the difficulty occurred on Cat island.

Q. On the western or the eastern coast of Cat island?

A. I would consider it on the northern shore of it.

Redirect examination.

By Gen. McCLURG:

Q. How far is Cat island from Gulfport?

A. Now there is a little difference in opinion. The keeper claims that it is nine miles.

Q. What keeper?

A. The keeper of the light house. Capt. McCall. Nine miles from the light to Gulfport. Now the east end of this island
1655 is a little nearer.

Q. You have been asked about what these marshes were called out there. State whether or not you have ever heard them called Grand marsh?

A. Yes sir.

Q. Is that in the same direction as the Louisiana marsh?

A. Down in the marshes. Grand marsh.

Q. You have never been down there in that section.

A. No sir.

F. W. ELMER, being recalled on behalf of the State of Mississippi testified as follows:—

By Gen. McCLURG:

Q. Mr. Elmer, were you ever a member of the county board of supervisors of Harrison county?

A. Yes sir.

Q. When?

A. Possibly ten or twelve years back. I have not fixed the date in my own mind. I was on the board some eight consecutive years.

Q. In the exercise of jurisdiction conferred by the constitution and statutes of the State upon this board. I believe that the board has jurisdiction co-extensive with the county has it not?

A. Yes sir.

Q. I wish you would state whether or not the board claims or exercises any jurisdiction south of the shore line of the county and if so how far?

A. Well I don't know if while I was a member of the board if we exercised any certain jurisdiction but it is an indisputable fact that we always claimed jurisdiction for the 18 miles south. I can not say that the exergency arose while I was there, and that we had to assert it.

Q. Were you ever a member of the county board of health?

A. No sir.

Q. You never have been a member of that?

A. No sir.

FRED. H. MCCALEB, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you live?

A. Biloxi, Mississippi.

Q. How long?

A. 58 years. I was born and raised right here in this town.

Q. Have you held or do you hold now any official position in this county?

A. No sir.

Q. Have you ever held any?

A. Yes sir.

Q. What was it?

A. I have been a member of the board of supervisors.

Q. When?

A. The best that I can remember was in 1888 to 1890. I would not be positive now, it has been so long ago, but I am almost certain of it.

Q. During the time that you were a member of the board of supervisors of this county, did the board have authority to pass quarantine regulations, and regulations for taking and fishing oysters?

A. Yes sir.

Q. In the exercise of this authority and jurisdiction how far south of the shore line did you claim to exercise jurisdiction?

1656 A. We claim back to the State limits.

Q. Where did you claim the State limits to be Captain?

A. The State limit was 18 miles. Six leagues or 18 miles.

Q. From where?

A. From the main shore.

Q. During the 58 years that you have lived here, and which I understand to be all of your life, can you say what the general understanding and acceptation of the people of this county has been as to the limits of the State and county boundary?

A. Well as far as I have always heard them express their opinions about it, it has always been as laid down in the Code, 18 miles.

Q. From the shore?

A. From the main shore including all islands.

Q. It is claimed by the State of Louisiana in this suit that the real line between the two States follows the deep water channel which flows out of the mouth of Pearl river north of Grand and Half Moon islands, and Brush island in the neighborhood of St. Joseph and around to the southwest of Cat island. If you have any knowledge or information which goes to establish that channel as the line between these two States I would like for you to state what it is?

A. No sir, I have none.

Q. You never heard any thing of that sort?

A. Nothing of it before this controversy came up.

Q. You never heard of it before this controversy came up?

A. No sir.

Q. You know where the marsh is to the southwest of here?

A. Yes sir.

Q. Were you ever there, Captain?

A. Yes sir, I have been there.

Q. How long ago?

A. That would be right hard to say. I have not been in the marsh for ten or fifteen years.

Q. What do they call that marsh down there?

A. It used to be called the Grand marsh.

Q. Have you ever heard it called by any other name lately?

A. It is the Louisiana marsh now.

Q. How long since you first heard it called the Louisiana marsh?

A. I could not say that, I have heard it called the Louisiana marsh out there for some time before the Louisiana controversy came up, but how far south they claimed that as the Louisiana marsh I could not say that.

Q. Could you say whether or not there is a marsh to the south of our 18 mile limit?

A. Yes sir, that is if I understand you right. There is a marsh south of our 18 mile limit.

Cross-examination.

By Col. ZACHARIE:

Q. Captain McCaleb, has it or has it not been the expression as to the large amount of oysters brought to these canneries here. Is it not that they come from the Louisiana marshes?

A. Before this controversy.

Q. I am speaking about before this suit or controversy arose. For instance I have been visiting this coast since I was a child, and I have always heard and been told by these people here that that territory over there was called the Louisiana marshes.

By Mr. McCLURG: Counsel for Mississippi excepts to this statement by the counsel for Louisiana.

By Col. ZACHARIE:

Q. Is my statement borne out by them now?

A. No sir. You say that since you have been coming here that it was always called the Louisiana marsh. They might have
1657 called it that to you but the old citizens around here called it Grand marsh.

Q. You stated in your examination in chief that it was called the Louisiana marsh You stated that it was called that before this controversy arose?

A. Well I have heard it a short time before this you see, I suppose it has been about five years now, but before that it was always called the Louisiana marsh.

Q. Is it or is it not a fact that whenever you have a plague of mosquitoes here that the general expression is that they come from the Louisiana marshes, meaning that territory?

A. Some times they come from the Louisiana marshes and some times they do not. It is according to the way that the wind blows.

Q. If there is a south breeze blowing is it not a general expression that the mosquitoes come from the Louisiana marshes, meaning this disputed territory?

A. I have heard of them coming from the Louisiana marsh, and I have heard of them coming from the Grand marsh. Both places.

EARNEST DESFORTS, a witness recalled on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Mr. McCLURG:

Q. I understand that there is and has been for a long number of years a board of pilot commissioners in this county?

A. Yes sir.

Q. And I presume for each county bordering on the coast?

A. Yes sir.

Q. Were you ever a member of that board?

A. No sir.

Q. You have been a pilot?

A. I am now a pilot and I have been for six years previous to this. I was harbor master of Ship island and I am now a pilot.

Q. Subject to the orders and the jurisdiction of that board?

A. Yes sir, the board of pilot commissioners.

Q. They license you?

A. Yes sir.

Q. Well under that license what is your duty as a pilot?

A. The duty is to pilot the vessels coming in and going out of any of the ports leading into this county.

Q. How far does this license authorize you to go?

A. Ship island. Outside of Ship island.
Q. Outside of Ship island?
A. Yes sir.
Q. Are there any passes outside of Ship island that it is nec
for you to pilot boats through?
A. No sir, the Ship Island bar is on the south side of Ship i
About a mile. That is the bar where the licenses go.
Q. How far is that limit that you take boats from the sh
Biloxi?
A. Between 13 and 14 miles.
Q. How far is it from Gulfport?
A. I would judge that it was about the same distance of ma
little less.
Q. How far from Pass Christian?
A. The course from Gulfport would be south east. I su
about 18 miles from here.
Q. How far would you say that a pilot's license of this co
would have to take a boat out of Bay St. Louis?
A. We would have no jurisdiction in Bay St. Louis. That
Hancock county.
Q. Is not the middle of the bay the dividing line between H
son and Hancock counties?
A. Yes sir.
1658 Q. One coming out of the bay through this count
would be your duty to take it out?
A. Yes sir.
Q. How far would you have to carry it?
A. I never have measured the distance. I would suppose in
neighborhood of 25 miles perhaps.
Q. Is it necessary at any point 18 miles from the shore of
county for you to carry a boat. To pilot them out or in.
necessary for you to go as far as 18 miles?
A. No sir, I have never handled a vessel any further than f
Ship island to Gulfport. There outside of Ship island into
Gulf would be perhaps 13 or 14 miles or some thing like that,
after we cross the bar on the outside of Ship island then we
done with the vessel there, but we go out as far as Chandeleur
ands and get aboard of the vessels there. We can get aboard of
vessels on the outside. When we get aboard of a vessel we t
command of it, and the captain turns her over to the pilot and
bring her in.
Q. How far is Chandeleur islands from the Harrison Cou
shore?
A. The north end of the Chandeleur islands is about 20 mil
Maybe 21 or 22 miles in a direct line.
Q. Any boats coming into Gulfport or Biloxi or any other port
Harrison county you go to the Chandeleurs and bring them in?
A. We go out in that direction, and any where we find them
take charge of them out there, but previous to my appointment

harbor master or pilot; the pilots of Ship island and the harbor master of Ship island always handle the vessels coming into Chandeleurs quarantine, when the quarantine was established at Chandeleurs and destroyed in 1893, that was previous to my appointment even as harbor master, and all pilots handling these vessels came into the Ship Island quarantine.

Q. Where did you get your appointment as harbor master?

A. From the board of pilot commissioners.

Q. And they got their authority under the laws of the State of Mississippi?

A. Yes sir, they are appointed by the board of supervisors of each county. There are pilots in Biloxi today who will tell you that they have handled these vessels 29 or 30 years off of Chandeleur when the quarantine was there.

FRIDAY MORNING, June 24th, 1904.

The commission met this morning at 9 o'clock and there were present Hon. William D. Ballard, commissioner, Gen. Monroe McClurg, on the part of the State of Mississippi as counsel, and Col. F. C. Zacharie, counsel on the part of the State of Louisiana, and the following testimony was taken, to wit:

R. M. MOSLEY, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. Mr. Mosley, where do you reside?
A. Biloxi, Mississippi.
Q. How long have you resided in Biloxi?
A. This next month will be eight years.
Q. How old are you?
A. I am forty years old.
Q. What is your occupation?
A. I am chief oyster inspector.
Q. How long have you been chief oyster inspector?
A. The first of September will be two years. Ever since
1659 this new law went into effect.
Q. You mean the law of 1902?
A. Yes sir.
Q. You were appointed then oyster inspector under the law?
A. Yes sir, under the law.

By Gen. McCLURG.—NOTE.—The counsel for Mississippi will introduce in evidence in this case the law to which the witness refers; all of the laws of the State of Mississippi, including the ordinances passed by the board of supervisors of the counties of Jackson, Harrison and Hancock bearing upon the authority for the passage of ordinances by these counties, and also upon the subject of quarantine and pilot commissioners.

Q. What is your duty in filling the office of oyster inspector?
A. Well my duty is to see that all oysters that are caught culled properly according to this law and to collect all of the t due the State of Mississippi under the oyster law.
Q. Over what territory have you jurisdiction?
A. The State of Mississippi.
Q. That includes these three coast counties?
A. Yes sir, these three coast counties.
Q. During the last oyster season, which as I understand it beg on the first of September and runs to the 1st of May?
A. From the 15th of September to the 15th of May.
Q. I wish you would just state about how many barrels of oyst for all purposes have been handled at Biloxi?
A. About 500,000 barrels in the town of Biloxi. Now that is sides the private bedding grounds. That is what they pay taxes I collect these taxes at two cents a barrel.
Q. What would you estimate the out put of the private beddi grounds about the city of Biloxi?
A. Well I suppose that it will run between 20,000 and 30,0 barrels, maybe more. That is as near as I can get at it.
Q. From what territory now was this five hundred and twenty five hundred and thirty thousand barrels of oysters taken?
A. They were on what we call the Pass Christian reefs and Isle Pitre, and Grand Pass and Half Moon. And all of those reefs o there, to St. Joseph light.
Q. None of them were taken from what we call the Grand marsh
A. No sir, none of them were taken from what we call the Gran marsh.
Q. If I am correctly informed the oyster commissions hav entered into some kind of an agreement by which the Mississipp oystermen do not go into the Grand marsh?
A. Yes sir.
Q. Beyond Grand pass?
A. Beyond Grand pass. That is a sort of neutral ground.
Q. You mean that it is neutral so far as Mississippi is concerned
A. It is neutral this side. Louisiana and Mississippi both fish o this side of Grand pass, but in the marsh they don't allow Missis sippi to go in at all. The two commissions met in 1902 I believe and established the line.
Q. I believe that you are not a party to the crime committed against the State of Mississippi which prohibited Mississippians from going into this territory?
A. No sir, I was not.
Q. Mississippians however as I understand it have been respect- ing that agreement?
A. Yes sir.
Q. Do you know of any authority under the law for the oyster commission of this State or of the State of Louisiana to enter into

such an agreement as that and bind the people of the two States to it?

A. No sir, I do not.

Q. I would be glad to find some man that does?

A. I have been all over those places out there.

Q. I understand that there is a tax fixed as you stated awhile ago upon the oysters taken in this territory where by the grace of the commissions Mississippians may take oysters. What is that tax?

1660 A. Two cents a barrel that is on the oysters. They pay a privilege on their boats of so much a ton.

Q. If you can recollect I wish you would state about how much the sum total of the two cent tax has amounted to during last season?

A. It will run something over four thousand dollars. About that.

Q. The two cent tax?

A. Yes sir, the two cent tax.

Q. That is for your territory?

A. Yes sir.

Q. And the privileges amount to how much?

A. I can get pretty close to that. We have got about 300 boats or 350. They will average five dollars a boat privilege. That is $1500, and we have eight factories and that is $800, and then on the raw oyster shops about $400. They are $25.00 a piece.

Q. The sum total then would amount to about what?

A. Say about $2800.00. That is for the revenue of the factories. The other is for the two cent tax.

Q. I mean altogether. The two cent tax and the privilege tax on factories and boats?

A. We collected this year some thing over $17000 all told. That is for the three counties.

Q. And outside of the marsh?

A. Outside of the marsh. You know another thing. You know what they call the neutral territory out there we don't collect any taxes. We have boats to fish in there and carry them to Louisiana but we don't get any taxes for them.

Q. Louisiana prohibits any oysters being taken from her territory and taken out of the State?

A. Yes sir, under this agreement on both sides fishing out there each side collects what is coming to it.

Q. Under this unlawful rule made by the oyster men?

A. Yes sir, I don't know what right they had to do it.

Q. They were the Solomen Zars of Louisiana and Mississippi. Well eight years ago when you first came here were there or were there not any of these restrictive rules that you speak of as to the place for taking oysters?

A. No sir, there was not. The boats went and got oysters anywhere. There was not any tax on them at that time.

Q. What have these marshes down here been called?

A. Grand marshes.

Q. Have you not some times heard them called Louisiana marshes?

A. Yes sir. I have heard that the last few years. I have heard that when I first came here.

Q. What has been your understanding Mr. Mosley during the eight years you have passed on the coast as to the limits of the territorial jurisdictional boundaries of the State of Mississippi?

A. Well I have heard these fishermen say that Pearl river was our dividing line.

Q. How far south?

A. Well all of these boats fished—you can find oysters in what they call the marsh, and they fished all down in there.

Q. Were you ever down in this marsh?

A. Yes sir, I have been in there.

Q. Have you ever fished oysters in that marsh?

A. No sir, I never fished for any oysters. I have fished for fish, but I never fished any oysters there.

Q. How far in the marsh, or how far from the south of the Mississippi shore is the southern boundary line of Mississippi?

A. The southern boundary line of Mississippi is six leagues. That is what I have always understood from the code and the books and everything that I have read.

Q. State whether or not you have understood that to be the boundary line and her territorial jurisdiction that far during the eight years you have been here?

A. Yes sir, I have always understood that. One reason why I understood it that way. I was an officer before I was chief inspector, and if any thing happened out there they would report it to me.

1661 Q. What office did you have?

A. I was marshal of the city of Biloxi.

Q. And I believe *ex-officio* constable for your beat?

A. Yes sir, I have arrested people at Ship island.

Q. How far is Ship island from here?

A. About 12 miles.

Q. And if there were any matters cognizable by the courts either civil or criminal between here and Ship island would your courts take possession of it?

A. Yes sir, I recollect one time I think I got 14 men out there and brought them in here.

Q. Now to the eastward of this neutral line, unlawfully established, or sought to be established unlawfully by the oyster commission of these two States, being due respectively to the people of Mississippi going southward from the shore line through Grand pass to the east of Isle à Pitre. How far does your jurisdiction as oyster commissioner extend from the shore southward?

A. From this shore here?

Q. Yes sir.

A. Well the way that I understand it it would be 18 miles.

Q. Have you been doing that since you have been oyster inspector?

A. Under this agreement?

Q. I am talking aside from that agreement.

A. Yes, sir, always 18 miles. I always consider it my duty. If there was any violation there I would go there and arrest them the same as if it was right here.

Q. Who issues the licenses to the factories and the boats now?

A. The secretary of our commission.

Q. Who is he?

A. F. S. Hewes.

Q. He is the chancery court clerk of this county?

A. No sir, he is the son of the chancery court clerk. It is F. S. Hewes, Jr.

Q. Under this license where can these boats and these factories take oysters?

A. They can take them anywhere 18 miles from the shore line. Take Bay St. Louis, and anywhere from the shore they can take them that way in the State of Mississippi within six leagues of the shore.

—. Then I understand that after respecting this supposed agreement between the two oyster commissions that the oyster commission of Mississippi exercises jurisdiction otherwise 18 miles from the shore line?

A. Yes sir, generally, I will tell you they made that agreement. Whenever a boat would come to me and aske me a question about it. They would come to me for information about fishing. I would tell them that they could go 18 miles to fish. If they kick about it I says Let them arrest you. They won't arrest you but once.

Q. Do you know what the penalty in Louisiana is for violating her oyster laws?

A. No sir, I do not. I have forgotten it.

Q. They make it a penitentiary offense. Has that severe penalty any effect in keeping our men out of there?

A. Yes sir, I think they would be scared to death to go in there. You know they got one boat over there and claimed that it had been confiscated.

Q. Can you tell me whether or not Louisiana boats take out any license in this State?

A. They do not. I know that they do not.

Q. I have here a list of licenses issued by authority of the laws of Mississippi in 1892, 1893 and 1894, which I propose to introduce in evidence today, and I will ask you to run through this list, and tell me whether you recognize the name of any boats belonging to Louisiana that took license in this State during those years and if so name them?

A. That is further back than I am able to state. That was before I came here.

1662 Q. The bill of complaint alleges in this case that the deep water channel, or what is shown on the face of the chart to be the sailing line, extending from the eastern mouth of Pearl river through the upper corner of Lake Borgne, north of Half Moon island and eastward to Cat Island pass, north of Isle à Pitre and southwest of Cat island which has been buoyed by the Coast Survey of the United States Government as the true dividing line between these two States. I wish you would please tell us whether you so understand it, and what information you may have as to that being the dividing line between these two States?

Q. You mean at Cat island down there?

Q. Yes sir?

A. Well I did not understaud that as the dividing line.

Q. Have you ever understood that to be the line between these two States?

A. No sir.

Q. This bill further alleges substantially that prior to the date of its filing, which was in the latter part of the year 1902, in October, 1902, that the affairs, referring of course to the taking of oysters by the two States, had reached such a crisis that it became necessary to avoid an armed conflict between the sheriff or officers of the parish of St. Bernard, and the sheriff and officers in Harrison county, State of Mississippi, that steps be taken to establish the boundary between these two States in the waters lying between them. If you have any knowledge or any information of any actual or threatened conflict between the officers of St. Bernard parish and the officers of Harrison county, Mississippi I wish you would tell us?

A. When was this?

Q. Prior to October 1902?

A. That is the first that I have ever heard of that. I have been out there since 1902 every week or two and I have never had any trouble.

Q. Have you ever heard of any threat of a conflict between the officers of Louisiana and Mississippi on this subject, and if you have I would be glad for you to state it?

A. No, sir, I have never heard a word of that. That is a new one.

Q. If you have ever heard of any such declaration since you have been here, I would be glad if you would state it?

A. No sir. I never heard anything about it. I never heard any thing of it.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Mosley you say that you have heard a portion of this territory here in dispute in this suit called the Louisiana marshes?

A. Yes sir.

Q. When did you hear it called that?

A. Well I have heard it in the last two or three years.

Q. Now is it not a fact that since time immemorial that territory has been called all along this coast the Louisiana marsh?

A. I could not tell you. I have not been down here. I don't know much about it until eight years ago.

Q. You are positive that is only within the last two years since this suit was started?

A. That is the first I heard of it Judge. Of course I could not say about it before that time I have heard it called Grand marsh.

Q. When Mr. Mosley was there any law first of Mississippi or regulation of the oyster fisheries in Mississippi?

A. Well now that is some thing that I cannot tell you. That is before my time. I understand that there was some law in Mississippi before the board of supervisors took hold of it. Of course I don't know about that.

Q. Well now according to the best of your knowledge and recollection, when — the first law was passed or ordinance in re-
1663 gard to the culling of oysters and making a close season during the spawning season?

A. You mean under this law that we are working under now?

Q. Yes sir.

A. I think that is January 1st, 1902.

Q. Prior to that time was there in existence any law or ordinance in regard to the culling of oysters or prohibiting fishing during the spawning season?

A. I understand there was. That is about the spawning season. I don't know about the culling.

Q. About what time as near as you can remember was this law passed?

A. No sir, I could not tell you when the law was passed. I don't know *know* about that. That was before my time. The reason I know about the season, they closed up here on the first of May. They told me that it was the law to close down on the 1st of May, and no boats could go out after that. That is the way I understood it. A boat that was out on the first of May had to come in. They could not fish out there.

MIKE LANIUS, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you live Mr. Lanius?

A. Biloxi, Miss.

Q. How long have you lived here?

A. For 56 years.

Q. What has been your occupation during that time?

A. Well up to the war I was pretty young and did not do much

of any thing. I just knocked about the boats. When I was a little over 14 years of age I joined the army, and I came back in 1865, and followed the lakes; the water between New Orleans and Mobile, as far down as Pascagoula and Sabine pass. I got married in 1870 and settled down in Biloxi. Shortly after the oyster business started here I went into the oyster business. I steamboated a good deal between New Orleans and Mobile on the Morgan line of steamers. The steamer Creole and the New Chameleon, running between Pass Christian and Biloxi, and Pascagoula once a week. In the winter time on the Morgan boats from New Orleans to Mobile before this railroad was built carrying cotton and passengers.

Q. You commenced this business when?

A. In about 1866.

Q. How long did you follow it continuously Mr. Lanius after that?

A. Well up to 1870 that is steamboating and schoonering on the lakes.

Q. How long after that?

A. Well almost up to the present time. About three years ago. In the summer time I was on a lumber boat and charcoal boat running between New Orleans and Mobile.

Q. Since 1866 you have been on the waters pretty well all of the time?

A. Pretty well all of the time until the last three years.

Q. In what capacity were you? Master or pilot or what?

A. Every thing from deck hand up to master.

Q. Are you familiar with the waters between Pearl river and Pascagoula, referring to the marsh lands to the south of Pearl river?

A. Yes sir, I am to the marsh.

Q. What part of the marsh have you been in?

A. Well I have been in Grand pass, and in the mouth of Creole gap, and in the mouth of Three Mile bayou; Grand pass and Three Mile bayou with steamboats. Three Mile bayou towing barges. Oysters were caught in the marsh with tongs, and they come over these bars and I towed them to Biloxi.

Q. When were you first out at these places?

A. That is about seven years ago.

1664 Q. The first time that you were there?

A. Yes sir, the first time I was there with a steamboat. I have been there shrimping and such things as that. I have fished oysters off Grand pass.

Q. When?

A. In 1897.

Q. Were you ever in the neighborhood of Door point and Sundown island and Brush island?

A. Yes sir, I went through Grand pass on a schooner and went that way.

Q. Drawing how much water?

A. About three and a half feet.

Q. When was this?
A. That was about 1895.
Q. In 1895?
A. Yes sir, 1895.
Q. How far did you go down?
A. I went to Door point and by Brush island.
Q. When you were at Door point and Brush island what State were you in Louisiana or Mississippi?
A. We thought that we were in the jurisdiction of Mississippi.
Q. Why did you think so Mr. Lanius?
A. Well they claim that this 18 miles strikes in just about Door point. You understand that is the 18 mile line south of the mouth of Pearl river.
Q. How far south of the main shore line of Mississippi did you understand Mississippi's jurisdiction to reach?
A. Six leagues or 18 miles.
Q. How long has that been your understanding?
A. I guess it was for thirty-five years.
Q. Louisiana has attempted to establish the channel which comes out of the Rigolets and Lake Borgne, north of Half Moon island, formerly called as we understand it Grand Island and as far as Cat island, and between Cat island and Isle à Pitre around into the Gulf, as the true dividing line between the States of Louisiana and Mississippi. I wish you would tell the court what you know or have been informed as to that line being the true line between these two States?
A. I know nothing about that being the line, and I never heard that it was the line. Now the channel did not run north of this Half Moon island.
Q. North?
A. It runs north of Half Moon island until it gets to St. Joseph, and you shift your course to the south of eastward, to the red buoy off Goose point and you take your course down by the Chandeleur islands.
Q. Who buoyed it there?
A. The United States Government.
Q. When?
A. I could not tell you. It is buoyed since I can recollect.
Q. What was it buoyed for?
A. To show where the deep water was.
Q. Do you mean by that the sailing line?
A. Yes sir.
Q. That is the deep water channel?
A. Yes sir, it is the only deep water entrance that there is into Lake Borgne and Lake Pontchartrain.
Q. Have you ever known or heard of its being the line dividing these two States?
A. No sir, I never did.

Q. You spoke of Grand pass. That is to the westward of Pitre, is not it?

A. Yes sir, it is.

Q. Can you sail around Grand pass in a boat. Can you around it?

A. Go around it?

Q. Around the pass, yes sir?

A. Yes sir, you can go through it and come back and go thr it again.

Q. What is an island?

1665 A. It is a piece of land surrounded by water.

Q. Is Isle à Pitre an island?

A. Yes sir.

Q. Can you sail around Grand pass and around through John bayou?

A. I don't know anything at all about Johnson's bayou.

Q. Three Mile bayou?

A. I never have been through that either.

Q. You have been only in the mouths of the bayous?

A. In the mouths of the bayous I have not had any thing t with the sailing vessels inside there?

Q. When did you first see what they call Grand marsh?

A. 1858.

Q. When was the last time that you saw it?

A. Last April was a year ago.

Q. I wish you would state whether you have noticed any s sidence of the marsh or whether it is sinking in from the first ti that you saw it, and whether there has been any violent or mater change in the coast line of the marsh from the first time you saw until the last time.

A. No sir, there has not. It looks like the same thing to me.

Q. There is no sinking of it?

A. No sir.

Q. You never noticed any thing of that kind?

A. Wha- do you mean. The land sinking?

Q. Yes sir?

A. No sir.

Q. Was it as high above the mean tide and sea level when yo last saw it as it was the first time that you ever saw it?

A. Yes sir, I could not locate any change. If there had been an of it washed away or any thing like that I would have noticed it.

Cross-examination.

By Col. ZACHARIE:

Q. I understand you to say Mr. Lanius that when you spoke about towing with a steamboat and so on that you never entered into this territory. This marsh. That you simply went in the mouths?

A. I never have been oystering since this dispute came up.

Q. Have you ever been to the interior of these marshes? In from the shore line?

A. I suppose I have been in a mile or a half mile or some thing like that except Grand pass, I have been through that, and Isle à Pitre and Jack Williams bay.

Q. Did I understand you correctly to say that any change in the general aspect of this territory; that you had never made any close observation for any change?

A. No sir, I did not. I used to be out there a good deal at one time shrimping. That was in the summer time.

Q. You never paid any particular attention to any changes?

A. No sir, I did not.

Q. You never observed whether the mouths of these bayous had been enlarged, or whether there was more water in the interior or whether the land had subsided or was sinking or any thing of that kind?

A. No sir.

W. A. TERRELL, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. Where do you live Mr. Terrell?

A. At Pass Christian.

1666 *A.* How old are you?

A. 56.

Q. How long have you lived at Pass Christian on the Mississippi coast?

A. Thirty some odd years. I think that I went there in 1866 or 1867, I disremember now.

Q. What is your present occupation.

A. Saloon keeper.

Q. Have you ever held any office in the State of Mississippi?

A. Yes sir, I have been justice of the peace some twenty odd years ago. Since that I have held little local offices there. Town marshal, councilman, and so on.

Q. Have you ever been a member of the board of supervisors?

A. No sir, I never was.

Q. Were you ever a member of the board of health?

A. No sir.

Q. I understood you to say that some twenty years ago you were a justice of the peace of Harrison county?

A. Yes sir. District No. 3.

Q. District No. 3 of Harrison county?

A. Yes sir.

Q. That included the town of Pass Christian?

A. Yes sir.

Q. While you were justice of the peace some twenty years ago of district No. 3 of Harrison county, over what territory did you exercise jurisdiction?

A. I understood that I could exercise it for 18 miles due to the south and up to the lines of my district.

Q. North?

A. Yes sir, north. And east.

Q. Where was the eastern boundary of your district?

A. It was somewhere up about Long Beach. I don't know exactly where it was, but it was somewhere in the neighborhood of Long Beach.

Q. That is the eastern boundary?

A. Yes sir, the eastern boundary. The western boundary of course is at Bay St. Louis.

Q. I understand you to answer that you understood that you had jurisdiction 18 miles to the south?

A. Yes sir.

Q. South from what point?

A. From the coast line.

Q. The coast line?

A. Yes sir.

Q. Were you ever in the marshes?

A. Well yes sir, to some extent, not very much, but I have been all along there mostly on the outside. I never have been way back in the marshes.

Q. Do you know how far it is from Pass Christian to the first touch of the marshes?

A. I could not say that I do. It must be some eight or nine miles or probably ten. I could not say.

Q. That would bring seven or eight or ten miles of the marshes in your jurisdiction?

A. Yes sir.

Q. What have these marshes been called since you have been acquainted with them?

A. They usually call it Grand marsh. Some times I have heard it called Louisiana marsh. Different people have different names for it.

Q. Is Isle à Pitre within your jurisdiction?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Which marshes were you speaking of?

A. Just south from our line. They lay from the west southwest from here.

Q. These marshes were generally called the Louisiana marshes, were not they?

1667 A. Some times some people have one name for them and some another. Generally they call them the Grand marsh or Great marsh.

Q. How long have you heard them called Louisiana marshes?

A. Some people called it the Louisiana marsh ever since I can remember. Some people have one name for it and some another.

Q. Is it not the common expression over this coast when the wind is from the south and the mosquitoes come they say that they come from the Louisiana marshes?

A. We don't have them from the south. The south wind never brings us any mosquitoes. I wish the wind had been blowing that way the last few days.

Q. From what source did you consider that your jurisdiction extended 18 miles south from the Mississippi shore?

A. I first gathered it from reading the boundary lines of the State, and it seemed to be generally accepted by every one that I came in contact with. The question was never particularly raised.

Q. Have you ever read the act admitting Louisiana into the Union?

A. No sir.

Q. You have gotten it simply from the laws of Mississippi and your Code?

A. Yes sir, but it was never denied. I never heard it denied until the last two years.

F. L. PATENOTTE, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. How old are you?
A. I am 39 years old.
Q. Where do you live?
A. Pass Christian.
Q. How long have you lived there?
A. All of my life.
Q. What position have you ever held in Harrison county if any?
A. I have held all sorts of positions. I have been holding offices of different denominations for the last 18 years.
Q. Commence at the first office that you have held and tell us what ones you have held since you have been in the county?
A. I was deputy marshal and constable and justice of the peace.
Q. When?
A. That has been 18 years ago.
Q. What others?
A. I have been marshal
Q. Marshal of what?
A. Marshal of Pass Christian and deputy sheriff of Harrison county?

Q. When were you deputy sheriff?
A. That has been eight years ago.
Q. Commencing with your first official career I will ask you please state what jurisdiction if any have been exercised over waters of the shore line, and how far south that jurisdiction been exercised by you, as marshal and *ex-officio* constable and d sheriff from the time you first held office up there to this time
A. I am at present the justice of the peace of beat 3, I have ways exercised jurisdiction as far as my office allowed. 18 mi six leagues out from the shore for the 18 years.
Q. In these several offices?
A. Yes sir.
Q. Have you ever met with any obstruction in the exercise your jurisdiction 18 miles out during this period from the St Louisiana?
A. No sir, none at all.
Q. I believe that your town of Pass Christian is in Harr county, is not it?
1668 A. Yes sir.
Q. Mississippi?
A. Yes sir.
Q. The bill of complaint in this case Mr. Patenotte alleges prior to its filing in October 1902, that the affairs from the tak of oysters in this territory now in dispute had grown to such a cr that there was a threat of armed conflict between the sheriff officers of St. Bernard parish Louisiana, and thos sheriff and cers of the county of Harrison, Mississippi. Do you know any th about any disturbance or threat or menaces of that kind. If you I would be glad of you would tell us what it was.
A. I never have heard of any sir.
Q. When were you deputy sheriff?
A. I was deputy sheriff until the 1st Monday in January 19 and then I was sworn in as justice of the peace.
Q. Up until that time?
A. Yes sir, I had been deputy sheriff then for eight years.
Q. You had been for eight years previous to January 1904?
A. Yes sir.
Q. During this time did you ever hear of any serious conflict controversy between the officers of St. Bernard parish Louisiana a Harrison county Mississippi?
A. No sir, none whatever.
Q. And as deputy sheriff, how far did the process of Mississip extend out from your shore south?
A. 18 miles. Six leagues. I have arrested parties, that has bee three years ago, but I judge a mile and a half or two miles south the Pass Marianne light house.

By Col. ZACHARIE: The counsel for Louisiana objects and except to any testimony in regard to any judicial proceedings or suit

whether civil or criminal, unless the record is produced, or the foundation is first laid to show the loss, destruction, or mislaying of the record as a condition precedent to the admission of secondary evidence by this witness.

By Mr. McCLUNG:

Q. In what capacity did you make these arrests?
A. As deputy sheriff.
Q. Of Harrison county?
A. Yes sir.
Q. Who was the sheriff then?
A. Mr. Ramsey.
Q. I believe that Mr. Seal is your present sheriff?
A. Yes sir.
Q. I understood you to say that you had lived in this county all of your life?
A. Yes, sir, Harrison county has been my home all of my life. Of course I have gone away and returned home.
Q. It is claimed by Louisiana in this controversy that there is a channel that passes out of the Rigolets to the eastern, and south of the mouth of Pearl river, running eastwardly north of Half Moon island, and what I believe was formerly called Grand island and as far as Cat island, and to the north east of Isle à Pitre and into the gulf of Mexico, as the line between these two States. Do you know of your own personal knowledge or do you have any information by history, tradition or otherwise as to this line having ever been recognized by either State as the real dividing line between those two States, and if so I would be glad if you would tell us what it is?
A. Well in answer to that I will say that I have always been guided by the officers above me, and have always stated that we had 18 miles. Our jurisdiction in other words extended 18 miles and we reach some where south of Creole gap, and I therefore exercised during my term of office jurisdiction any where north
1569 of Creole gap. I never did go beyond Creole gap.
Q. Have you any connection with the Mississippi Oyster Commission?
A. Not at present sir. I have had.
Q. When?
A. I was one of the members first appointed. I was appointed for four years.
Q. When?
A. I don't remember. When the oyster commission was first appointed. That has been September going on I think will be two or three years. I don't remember exactly.
Q. During this time that you were a member of the Mississippi Oyster Commission, how far south of the shore line along the coast counties. Jackson, Harrison, and Hancock, did this commission undertake to exercise jurisdiction?

A. Well we undertook to exercise jurisdiction 18 miles south. In other words we had a joint meeting between the Louisiana Oyster Commission and the Mississippi Oyster Commission and we then settled on—until this question would be settled and guide ourselves under certain restrictions.

Q. If you can recollect what those restrictions were let's have it?

A. That the disputed territory would be known as—, I don't know whether I can recollect it now or not. It was due south to the marshes following the marshes and Grand pass, near the edge of Grand pass and Sun Down island, and from Sundown island to the deep water channel south of Cat island, and then following said channel—I cannot remember it. Any way the records will show it.

Q. That agreement that you are speaking of. Was that by virtue of any law or was it just an agreement between the two commissions?

A. Not at all. It was an agreement between the two commissions pending this suit. We were advised that if we did not desist fishing; if we insisted on taking oysters in that territory we would be prohibited. That an injunction would be sued out by Louisiana to prevent either side from fishing in this territory.

Q. You mean the territory as it is in that line that you have just described?

A. Yes sir.

Q. And the agreement left this territory west of this line open to be fished in by Louisiana. I mean to ask you if Mississippi under this agreement:—In other words whether the people and citizens of Mississippi under that agreement may go into the marshes west of Grand pass and on down to Brush island and Treasure bay and fish down there?

A. No sir, they were not allowed there.

Q. But the people from Louisiana and fishermen from that State might go there?

A. Yes sir.

Q. In other words under that agreement by these two commissions the fishermen and citizens of Mississippi are prohibited from fishing west of Grand pass?

A. Yes sir.

Q. And west of Sundown island?

A. Yes sir.

Q. And that is left open and free for the people of Louisiana?

A. Yes sir.

Q. But in the sound north of Turkey bayou and Three Mile bayou is left open to both States?

A. Yes sir, to both States.

Q. And all out north of Cat island is left open to both States?

A. Yes sir.

Q. And the whole of the Misssisippi sound if left open to both States under that limitation?

A. Yes sir.

Q. Am I to understand from what you say that you were a party to this agreement?

A. Yes sir.

Q. And that the Mississippi Commission entered into it to prevent the threat of the injunction by the State of Louisiana being
1670 carried out to prevent either State from fishing in there?

A. Yes sir.

Q. And so far as you are informed am I to understand that you know of no law; that the commission acted under no law in making that agreement?

A. Not a particle sir.

Q. No law on the subject?

A. No sir.

Q. And that was an arbitrary rule forced on Mississippi by the threat of Louisiana?

A. Yes sir. We had a further meeting I will say with the Louisiana commission to try and get them to allow Mississippi to fish in 18 miles of her shore.

Q. What was the result of this conference?

A. Louisiana emphatically refused to go into any further agreement.

Q. By whom was this threat of an injunction made?

A. By Mr. John Dymond, Jr.

Q. Is he the man that is marked in these pleadings as counsel for the State of Louisiana?

A. Yes sir.

Q. Where was this meeting?

A. At their office in New Orleans.

Q. In Mr. John Dymond's office?

A. Yes sir.

Q. And he was the attorney for the State of Louisiana; for the Louisiana commission?

A. Yes sir.

Q. And attorney as I understand it for the Lake Borgne Basin Levee Board?

A. I don't know any thing about that.

Q. And attorney for the St. Bernard Parish Oyster Commission was not he?

A. Yes sir, so I am informed. I don't know it personally.

Q. The two commissions had several meetings in the city of New Orleans did not they?

A. Yes sir.

Q. Mr. Dymond was present at each one of these meetings was he?

A. Yes sir.

Q. And appeared as attorney for the Louisiana commission?

A. Well he appeared as attorney for the Louisiana commission and I will state further that the Louisiana commission would not take any motion or pass any resolutions pertaining to this disputed

territory until they had further investigated or conferred with Mr. Dymond. In other words he was the whole cheese.

Q. You mean to say that he was then chief cook and bottle washer for the Louisiana commission?

A. Yes sir.

Q. How long have you known this marsh down there Mr. Patenotte?

A. Well I have always heard of it sir, but I presume that the first trip that I made there was twenty-five years ago. About twenty-five years ago.

Q. Since you have known it and heard of it what have you heard it called?

A. It goes by different names.

Q. What is the most general name?

A. Some people call it the Grand marsh, and some people call it the Louisiana marsh.

Q. How long have you known it to be called Louisiana marsh?

A. I don't know what portion of it they call the Grand marsh and what portion they call the Louisiana marsh.

Q. There is a marsh south of the Mississippi 18 mile limit is there not?

A. Yes sir, in Hancock county.

Q. I mean south of the Mississippi limit. South of Hancock county?

A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

1671 Q. Mr. Patenotte, you say that this arrest was made about a mile and a half east or west of Pass Marianne?

A. It was made south east of the Pass Marianne light.

Q. What was that arrest for?

A. Violat*ain* the dredging law. Dredging oysters in less than 14 feet of water.

Q. You say that some people along this coast call these marshes to the south, this disputed territory between Mississippi and Louisiana, the Louisiana marshes. How long have you known them to call it that?

A. Well as I stated in my testimony for the last 25 years more or less, and I also stated that they called it the Grand marshes.

Q. Where did you derive your information from about the southern line of the State of Mississippi extending out six leagues or 18 miles from the Mississippi shore to the southward?

A. Well sir I have had a code and a form book since I first took the oath of office.

Q. When was this?

A. Some 18 years ago.

Q. Did you ever hear the question discussed or mentioned prior to that time?

A. No sir.

Q. Then it is only from this code and form book that you derived your information?

A. And the writs that I received from different justices of the peace to exercise jurisdiction within 18 miles.

Q. You have never read the act admitting Louisiana into the Union have you?

A. No sir.

Q. Then you don't know that under that act the islands within three leagues or nine miles of the Louisiana coast are embraced in the State of Louisiana?

A. I never heard it in my life until the two commissions met jointly in New Orleans.

Q. Do you know or do you not know that this territory in dispute, these marshes have always been considered as a part of the parish of St. Bernard in Louisiana?

A. No sir.

FRED. ELEUTERIUS, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you live?
A. In Biloxi.
Q. How old are you?
A. 28 years old.
Q. How long have you lived here?
A. I have lived here all of my life.
Q. Have you ever held any office in Harrison county?
A. No sir.
Q. What is your present business?
A. Oystering.
Q. How long have you been oystering?
A. About 15 years, I have been running a boat.
Q. In what capacity?
A. Well I have been running boats.
Q. Captain?
A. Yes sir, I have been running boats since I was 18 years old. ave been a captain for 15 years.
Q. During this time where have you been taking oysters?
A. I have been taking oysters out of the Louisiana marsh. Out Grand marsh as they call it. Great marsh, and out of the Mis- ippi sound. I have been taking oysters as far south as the American bay. Right close to the Mississippi river.

Q. Where is the southern boundary line of the State of Mississippi?

A. I don't know sir. I have always heard though that it run 18 miles south of the Pearl river, but which way it went after it got that far I don't know. I never heard.

Q. Did you ever pay a license to fish oysters?

A. Yes sir.

Q. Where?

A. From Mississippi.

Q. When?

A. I don't know what year it was. I got a license from Mr. Lazana. It was in 1893.

Q. Under that license where did you take oysters?

A. Well we got oysters everywhere in the marsh I got oysters in Morgan harbor.

Q. Did you get oysters under this license as far south as Treasure bay and Brush island?

A. Yes sir.

Q. Let us know whether under this license you went in Nine Mile bayou?

A. No sir, I never went in there.

Q. In Three Mile bayou?

A. Yes sir, I have bought oysters inside of Bayou Boudreaux. That is inside there Grassy island.

Q. Karako bay?

A. Yes sir.

Q. Sundown island?

A. Yes sir.

Q. Brush island?

A. Yes sir.

Q. Door point?

A. Yes sir.

Q. Off as far south west as Indian Mound bay?

A. Yes sir, I have been in there.

Q. Under that license?

A. Yes sir.

Q. Well during the time you have been going in there Captain have you ever noticed any subsidence or sinking of the marshes, or any material changes in the conformation of them. If so I wish you would please state about it?

A. Well no sir. Maybe the mouth of Little point may be opened a little bit, but if there were any changes down there I think I would notice it.

Q. Is there any violent changes in these bayous and islands?

A. No sir, none that I know of. I think that Sun Down island was cut in two. That is about the only change that I know of.

Q. In what State is Sundown island?

A. Well it is just the same as the balance of the marsh. Just the same.

Q. Within 18 miles of the Mississippi shore?

A. Yes sir, it is inside of the 18 miles. I guess it is.

Q. Where were you born?
A. Biloxi.
Q. Your parents lived in Biloxi?
A. Yes sir.
Q. Are they living yet?
A. No sir, they are dead.
Q. How old was your father when he died?
A. My father when he died was about 62.
Q. How long had he lived here?
A. He had lived here four or five years when he died.
Q. Was he a native Mississippian?
A. No sir. He lived in Pass Christian awhile.
Q. When he died?
A. No sir, he died in Biloxi. He was living here only four years hen he died.
Q. Was he born in Mississippi?
A. No sir.
Q. How long had he lived at Pass Christian?
A. About ten years.
573 Q. Are you able to say what the general understanding of the people along this coast, especially of Harrison county has en as to where the southern boundary line of the State of Mississpi has been recognized to be?
A. No sir, only 18 miles south of the mouth of Pearl river, and er it got there I don't know which way it went. I never had ybody to tell me.
Q. What about the shore line to the eastward of Pearl river to oxi. How far south of Biloxi is the southern boundary of the te of Mississippi?
A. I suppose that it is 18 miles. That is what I have been told. ave been told that.
Q. Can you say whether it has been the understanding generr with the public during your time that that is the line?
A. Yes sir, that has been the general run of it. That is what I e always heard.
Q. Well you were in the marshes and these places that you have ken of. What were you doing there Captain?
A. Catching oysters.
Q. Were you ever interfered with by the authorities of the State Louisiana?
A. No sir, not while I was in the marsh.
Q. You spoke of the Louisiana marsh?
A. Yes sir.
Q. And the Grand marsh?
A. Yes sir, I thought that it was far down as the river. We ld go down there in the summer time close to the river and diamond backed terrapins.
Q. Where were you then?
A. In the Louisiana marshes.

Q. Where were you in the Mississippi marshes?
A. To the north of American bay.
Q. What marsh was that. Louisiana or Mississippi?
A. We thought that it was Mississippi.
Q. Do you know of any civil or criminal action that happened out in the marsh taken cognizance of by the officers of Mississippi?
A. Yes sir, I know of one.
Q. What was it?
A. At the time that Mr. Lazana was sheriff of——

By Col. ZACHARIE: The same objection as stated before to the testimony above introduced is here renewed by the counsel for Louisiana to this class of testimony.

A. He arrested my brother in Creole for not culling oysters.
Q. What year was this?
A. I don't know sir.
Q. How long ago?
A. About 12 years I guess it was. It was in 1893.
Q. Were you present at the time?
A. No sir, I was not there. I just know of this.

By Col. ZACHARIE: The same objection is noted by the counsel for Louisiana in regard to the secondary proof as stated above.

Q. How did you get information of it?
A. I got it from my brother here in Biloxi.
Q. You were not present?
A. No sir.
Q. Have you any personal knowledge as to the fact of any arrests in or about the marsh other than the one that you have mentioned?
A. No sir, only this Johnnie Bowen.
Q. Were you present?
A. No sir.
Q. You know that only from hearsay?
A. That is only from hearsay.

Cross-examination.

1674 By Col. ZACHARIE:

Q. Do you know that portion of the territory in dispute in this case between Malheureux point and Isle à Pitre?
A. Yes sir. I know it pretty well.
Q. You have stated in your examination in chief that at that time it was sometimes known as the Louisiana marshes and sometimes as Grand marshes?
A. Well I have heard that yes sir. We considered it Mississippi when we got this side of American bay.
Q. I am now asking you about the general way in which it was called?

A. Yes sir.

Q. You say that it was called Louisiana marsh?

A. Yes sir.

Q. And Grand marsh?

A. Yes sir, and Grand marsh.

Q. Which was the more general appellation?

A. The general run there would not call it neither one. They would call it the marshes.

Q. How long have you been knowing it to be called the Louisiana marshes? Ever since you have been fishing in there?

A. Yes sir, ever since I first started. The Louisiana marsh and the Grand marsh. Most of them called it the marsh.

Q. You have been examined in regard to the subsidence of this land and any changes?

A. Yes sir.

Q. Did you ever pay any particular attention in regard to any changes in this territory, or was it merely a casual notice as you passed along? You did not notice particularly did you?

A. I will tell you how we did and paid particular attention to it. We dug into the lagoons. They were in there and entirely surrounded by land. They had fine oysters in these lagoons, and we would dig our way in there and let the current go in there and we would say that the next time we come back it would not be any trouble. But in the lagoons it would take a long time, maybe a year to dig out so there would not be any trouble in going in and out of these places.

Q. You stated in your examination in chief that you had never been interfered with by the officers of Louisiana in the marshes?

A. Yes sir.

Q. Have you ever been interfered with outside of the marshes?

A. Yes sir, I have been interfered with by the Mississippi authorities.

Q. Have you ever been interfered with by the Louisiana authorities?

A. No sir, I never have.

Q. Where did you derive your information about the southern boundary of Mississippi being 18 miles south of the mainland?

A. It was hearsay. Asking older men than myself about it. The boatmen.

Q. How did you come to ask these questions. What occasion gave rise to it?

A. This oyster law when they first started it in 1893. That was when it was first started.

Q. You never heard any discussion about the matter prior to 1893?

A. No sir, not until here of late.

Q. Did you refer to the 18 mile limit of which you have spoken as extending as far south as American bay?

A. No sir, I don't think. I always thought and have heard that

it run east after it got the 18 miles south. Now I don't know what part of the marsh that would bring you in.

Q. You did not go down to American bay to fish oysters?

A. Yes sir.

Q. I thought you went there for terrapins?

A. No sir, we went there one season for oysters.

1675 F. P. LAZANA, recalled on behalf of the State of Mississippi, testified as follows:—

By Gen. MCCLURG:

Q. You testified in this case once before I believe?

A. Yes sir.

Q. Mr. Eleterius, who has just been on the stand, testified that you arrested his brother once some where about Creole gap or Grand pass or some where in there. Is that true?

A. Yes sir, I arrested his brother, but I could not say whether it was in Creole gap or Grand pass. I am not certain. It has been so long ago.

Q. Did you have a warrant for his arrest?

A. No sir, I arrested him while he was in the act of committing the offense.

Q. The laws of the State authorized you to do that without a warrant?

A. Yes sir.

Q. What act was he committing in violation of the Mississippi law?

A. He was carrying away unculled oysters from the State of Mississippi.

Q. What position did you hold then?

A. I was then oyster inspector for Harrison county.

Q. Was that north or south of this deep water sailing line?

A. That is south of Pass Christian about 16 miles from Pass Christian. About 16 miles. Up to the place they call Door point is considered 18 miles or six leagues.

Q. What was it that Mr. Eleterius——

By Col. ZACHARIE: The counsel for the State of Louisiana here make the same objection to the introduction of secondary evidence as is noted above.

A. He was fined ten dollars and the costs.

Q. Before what officer?

A. I am not certain but I think that it was before Judge Espy. Judge James H. Espy.

Q. Will you do us the kindness to see if you can find us the original record of this case?

A. I have tried to find those records but in some way or other they have gotten misplaced and they can not be found.

Q. I have had Judge Espy summoned. You can not say whether he will be here?

A. Yes sir, he was to be here on the second train from New Orleans. He was on the first train and stopped at Gulfport. I spoke to him and he said he would be here.

The commission here adjourned for the noon recess until two o'clock p. m.

The commission met at 2 o'clock p. m. with the same presences as this morning, and the following testimony was taken, towit:—

Judge J. H. NEVILLE, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURE:

Q. Judge, this is a controversy, you know, wherein The State of Louisiana is complainant, and The State of Mississippi is defendant and cross complainant, and we are taking now the testimony on the part of Mississippi, defending the case of Louisiana and in making her case on cross complaint. I will be very much obliged if you will state to the commission your present place of residence?

A. I live at Gulfport, Harrison county, Mississippi.

Q. And your present position please?

A. I am one of the general counsel of the Gulf & Ship Island Railroad Co.

Q. You have held other positions in the State of Mississippi Judge. I will thank you to state to the commission what positions you have held under the laws of your State?

A. I was district attorney of the seventh and second judicial districts of Mississippi for 12 or 13 years. I can not remember just the exact time, but 12 or 13 years. I resigned that office I think it was in 1896, and was judge of the second judicial district of the State of Mississippi for a period of some thing less than two years, when I resigned that place in September last, and I believe those are the only public offices that I have held in the State, excepting that I was alderman once of my town.

Q. Of what town?

A. Scooba. That is the most honorable position I ever held.

Q. Scooba is in Kemper county I believe Judge?

A. Yes sir.

Q. And where you lived before you moved to Gulfport?

A. Yes sir, I lived at Scooba when I was elected district attorney and for some years thereafter. I then moved to Meridian because it was convenience to my district and then afterwards to the sea coast.

Q. I wish you would please tell us whether Hancock county was in your district while you were acting as district attorney?

A. I will be glad to explain to you so that it will better explain my answer, that I was district attorney of the second and the seventh judicial districts. When I was first elected district attorney I was elected for the seventh judicial district, and it was called the seventh judicial district of Mississippi, composed at that time of the counties of Kemper, Lauderdale, Clarke, Wynn, Green, Perry, Marion, Hancock, Harrison and Jackson. After perhaps two terms in that district of four years, and perhaps during the last of the second term, I don't remember the time, the legislature re-districted the judicial districts of the State, and then created out of the seventh, and I think possibly the first district what was called the second judicial district composed of the counties of Noxubee, Kemper, Lauderdale, Clarke, Wynn, Green, Hancock, Harrison, Jackson, Marion, and the new county of Pearl river, which had been created by the legislature, omitting the county of Perry that was in the old seventh district. So it is that Hancock county has been in the second and seventh judicial districts in which I was district attorney at all times.

Q. And you resigned the office when?

A. I think that I resigned in April 1896 to take effect on the first day of July 1896 is my recollection.

Q. That is the judgeship, is it?

A. No sir, that is the district attorney. I was first elected in 1883 I think and went into office in 1884, and held the office until 1896 is my recollection.

Q. Judge, I will be glad if you will tell us when you were appointed circuit judge?

A. I think that it was the first day of May 1902. I was appointed in May 1902.

Q. Now Judge, I desire to ask you this question. From the time that you resigned the office of district attorney in 1896 to the time you were appointed circuit judge in May 1902 where were you located?

A. In Biloxi Mississippi in the practice of law.

Q. Were you then in the private practice of your profession?

A. I was, from 1896 until I was appointed judge in 1902, I was engaged in the practice of my profession at Biloxi.

Q. And you resigned the office of circuit judge in 1903 to return to your private practice at Biloxi?

A. Yes sir, at Gulfport. I resigned the office of circuit
1677 judge in September 1903, and was appointed one of the general counsel of the Gulf and Ship Island Railroad Co., and I took up my abode then at Gulfport, the headquarters of this railroad.

By Col. ZACHARIE:

Q. Then you have been practicing law privately since 1903?

A. Yes sir, and also from 1896 up to 1902 when I was appointed circuit judge.

By Gen. McCLURG: It has been testified in this case Judge by Lieutenant Governor Estopinal of Louisiana, and his son Albert Estopinal, Jr., who is one of the counsel for Louisiana in this case, and also by Mr. Nunez, the sheriff of St. Bernard parish, Louisiana, and perhaps by some other witnesses, and I ask you to look at the original record in this case, that is of the testimony taken on the part of Louisiana, pages 47, 48, 49, 50, 71, 72, 73, 74, 75, 76, 77, 78, and 80, 81, 88, 89, 90 and 95, 96, and 97 especially, and if you have the time to examine the record there is some other testimony with reference to the same subject matter. The pages to which I have especially referred you from 47 to 50 inclusive have reference to the testimony of Mr. Nunez, the sheriff of St. Bernard, and from 71 to 81, inclusive, has reference to the testimony of Mr. Albert Estopinal, Jr., who was for several years the district attorney in the district that included the parish of St. Bernard until a few days ago he was appointed judge, and pages 88 to 97 inclusive have reference to the testimony of Lieutenant Governor Estopinal, and there is I believe some other of that testimony in the case, all to the effect that while you were district attorney in the district of Mississippi in which Hancock county was included had certain conferences mentioned in the testimony to which I have referred you, and as an officer of the State of Mississippi it is claimed by the witnesses whose names I have mentioned that you undertook to settle a controversy over the boundary line between the States of Louisiana and the State of Mississippi, and that during this time, and especially up to the filing of the bill in October 1902 there was danger of an armed conflict between the sheriffs and officers of the parish of St. Bernard, and of the sheriffs and officers of the county of Harrison in the State of Mississippi. That one or more conferences were had with you as a law officer of the State of Mississippi at the slaughter house, and possibly some other points that I do not now recollect; perhaps in the city of New Orleans, with you by the above named witnesses looking to settlement of this controversy there was some agreement or understanding as to the taking of fish and oysters and as to the line between the States. I will thank you to please state to the commission what you may know with reference to this conference and whom it represented in such conference, and then tell us what you may know with reference to any armed or threatened conflict between the sheriffs and officers of the parish of St. Bernard in Louisiana and the county of Harrison, Mississippi, or any other parishes and counties in these two States. We will ask you Judge to in your own way cover the whole ground indicated by this question.

A. Answering your question I will say that I have examined the testimony referred to and indicated in your question at my leisure and carefully one day last week. I have a very distinct recollection of the occurrences detailed by Judge Estopinal, and Lieutenant Governor Estopinal and Mr. Nunez, the sheriff. I had only one interview or conference with them in my life about this matter, possibly two with Mr. Albert Estopinal, the district attorney, and

only one with these parties in the city of New Orleans. I was engaged in the practice of my profession and while so en-
1678 gaged represented some of the oyster packers and shippers in Biloxi. I was employed by these parties to go to the city of New Orleans, as I supposed when I left here to represent some of their oystermen who had been arrested by the authorities of the State of Louisiana for violating the law with reference to taking oysters in the State of Louisiana. My information was that the prosecutions had been begun in the parish of St. Bernard, and some of the oyster people who brought the information to Biloxi also informed me, and I had that information for the first time, that Mr. Nunez was the sheriff of St. Bernard parish. I left Biloxi accompanied by Mr. Lopez, and together we went to the city of New Orleans, and the next day went down to the slaughter house, where through the good offices of some people whom I knew there we had an interview with Mr. Nunez, the sheriff, and I then learned that none of the Mississippi fishermen had been arrested. It seemed that the understanding was that a fleet of some sort had been sent out to admonish them and to warn them that they must not fish in certain territory on which they were fishing, and they became alarmed at that. I found at any rate that none of the fishermen had been arrested. I talked with Mr. Nunez about the matter and he suggested that I should have an interview with Mr. Albert Estopinal the district attorney. We took the street cars as I remember it now, I may be mistaken about that however, to Mr. Estopinal's office in the city, and if not to his office, to some place where he would be found.

Q. Can you now state as to whether that was the office of Mr. John Dymond Jr.?

A. I can not.

By Col. ZACHARIE:

Q. Do you remember what street it was on?

A. I do not. I think that it was the office of Mr. Estopinal. I think that he was practicing law with some party there.

Q. Was it near Lafayette square?

A. I could not remember as to the number. I think that it was on Natchez alley. We went up there to his office and had some conference about the matter. Altogether as to the policy that was to be pursued by the State of Louisiana. I gathered from him that the board of police, I don't know what they call it over there.

Q. The police jury?

A. The police jury. I judge that it is a board similar to our board of supervisors here, had made some order in reference to this matter and it became his duty as district attorney to see to the enforcement of that ordinance by the board. We discussed the question. I insisted that my clients, the Mississippians whom I represented, protested against an order driving them, or requiring them to leave the grounds where they were fishing and that we insisted

Mississippi that it was Mississippi's territory. That our people been fishing there all along, and that we would assert in the rts our right to continue to fish there. Some thing was said at how it would be done and what would be the result. If they ld arrest Mississippians for fishing on that ground, and I replied "Well, we did not want to engage in any thing of that sort, re had been no such thing before, that Mississippi would insist n punishing the people of Louisiana in the courts for depreda- upon her property. And I think some thing was said about not having laws similar to Louisiana prohibiting the fishing in territory and I suggested that could be easily remedied by hav- the boards of supervisors that had jurisdiction of these matters, by an act of the legislature. In other words as I now remember was purely a question between us all as to the line between the te of Mississippi and the State of Louisiana, where it was. I in- ed for my clients that we were on Mississippi soil and they as stoutly insisted that we were not. At that period of the discussion when it became manifest that we could not agree to any thing. It looked that way, it was suggested that we have eeting with Mr. Estopinal, the elder Estopinal who as I remem- it now was president of the board, or had been *it* he was not at t time president, but I think he was the president and the father of district attorney, and together we would discuss this matter and ver it, and we did.

We had a meeting at the Grunewald hotel. Adjourned to meet re and did have a meeting at the Grunewald hotel, at which the er Estopinal was present, and I think possibly Mr. Dunbar, one the shippers who had a factory at Bay St. Louis had come into discussion.

By Mr. McCLURG:

Q. Can you say whether Mr. John Dymond was present at either of these conferences?

A. I don't think he was present at either one of these conferences. ink he was not because I have no recollection of ever having met John Dymond in my life. We continued this discussion at the erview at the Grunewald hotel I think. Possibly we reached no clusion that night. My recollection is that it went over until the t morning when we met again in the office of Mr. Estopinal, and some further conversation about it, and we both reached the clusion that it was a question of the boundary between the two tes. I insisted that our people were on Mississippi soil and they sted that they were not, and it was then suggested that we settle s matter by having a friendly suit between the two States to de- mine the controversy. We discussed that for some time and the stion was suggested as to who was to bring the suit, and there se trouble again. I had no authority to say any body should ng a suit because I was there representing private parties, but we lly agreed that possibly there would not be any trouble about

that. That the State authorities could do that. We discussed that for a little while and finally agreed that that was impractical, and that Mr. Estopinal and his father as I remember it, should see the Senators from the State of Louisiana and I should on my part would interest our people here and we would see the Senators from the State of Mississippi, and see if we could not—if Congress could not in some way establish a line about which there could be no mistake between Mississippi and Louisiana, and that pending this the whole controversy was dropped right there. I was not authorized to drop it for any body, except I was there as the attorney for these fishermen, and that no steps were to be taken against them. I came home fully intending to see the Senators but in the mean time I suppose that Mr. Estopinal had reached the same conclusion that I had about it, after more mature deliberation, that it was not a political question and a political body was not the proper body to deal with it. Some time afterwards Mr. Estopinal called to see me in my office in Biloxi, and we then had a very pleasant interview about the matter and reached the conclusion, both of us, that the thing was impractical to be reached by Congress, and that the whole matter would have to be determined by a suit in the United States Supreme Court, and that ended the latter interview. I never heard of it any more and had no further conversations about it with any body from the State of Louisiana I think from that day to this that I have any recollection about. That is my recollection of the whole transaction and that is very fresh in my mind. The gentlemen are evidently *are* mistaken as to my pretending to represent the State of Mississippi as district attorney. I am sure they are mistaken about that, because I had resigned my office as district attorney in 1896 as before stated and was succeeded by Mr. W. A. White of Biloxi. We formed a co-partnership. Mr. White was at that time the attorney of
1680 Mr. Lopez, and the other factories here except perhaps the Barrataria, and I of course as his partner and engaged in the practice of law was there representing these clients of ours in the matter.

Q. Then we are to understand that in this controversy you did not undertake to represent the State of Mississippi or any political subdivision of it officially?

A. I did not. I had no authority or power to do so.

Q. The second part of my question Judge I think you have not given your attention. That was with reference to any threat of actual conflict between the sheriff and officers of St. Bernard parish and the sheriff and officers of Harrison county, Mississippi. Had you any information of any threatened conflict between the officers of that parish and this county?

A. None in the world, or of any other county in Mississippi. I might have laughed and possibly did remark when Mr. Estopinal said they would arrest the Mississippians for trespassing on this land. I possibly said "We can arrest as many of you as you can of us," and possibly in the conversation this thing occurred "Well sup-

osing we would attempt it." I then said there of course would be conflict between the States, or officers of that State and the State Mississippi in resisting process. That is about all. Nothing more an that was said though.

Q. As a matter of fact do you know of any actual or threatened nflict between the officers of these two States?

A. None in the world. Absolutely none.

Q. Can you say whether or not there was any probability of any med conflict between the officers of these two States?

A. Absolutely none that I know about.

Q. You can not be mistaken about the fact that you were repre-nting private parties and had no official office or position at that ne?

A. Not at all. I know that I was there representing Lopez, Dun-r & Co., and had no official position at all, but was occupying the onorable position of a private citizen.

Q. You had resigned your office of district attorney?

A. Yes sir.

Q. And had not committed the crime of being a circuit judge?

A. No sir, nor holding any other office up to that time. I had rned all of that part of it over to my partner White. That is the ice holding.

Q. It is alleged in this bill of complaint Judge Neville that the ne line dividing the State of Louisiana from the State of Mississippi, the sailing channel recently marked by the Federal Government om the mouth of Pearl river and Lake Borgne, out just north of assy island and Grand island which we are told has lately been lled Half Moon island, and it passes around to the south west of t island, and north east of Isle à Pitre. If you have any actual owledge or information, whether that information be legal, his-rical, or traditional, as to that line being the true boundary be-een these two States, I would be glad to have you tell this com-ssion and the court what you may know and what your informa-n is on the subject?

A. General McClurg, I have no information about it, historical, ditional, or otherwise. In this investigation that I made in Lou-ana, when I went to Louisiana I accepted the tradition of the hermen with whom I talked that the territory from which they d been—I will not use the word prevented—but admonished to p off of it, had always been regarded as Mississippi territory, d I accepted their statements and representations as true about t. I know nothing of my own knowledge whether that is the e as indicated by them or not. I could not say

Q. How far from the Mississippi shore did these fishermen and se directly interested in the disputed territory say it extended. w far south?

A. The dispute there on that occasion?

Q. Yes sir, generally. Your general information I am asking you about including that occasion. I want to ask you what your knowledge and information has been as to the southern limits of the State of Mississippi south of these three counties?

1681

A. The only knowledge that I have about it is what I would read. The constitution as to the line marked out there.

Q. What did you gather from the constitution?

A. You will have to give it to me and let me read it again.

Q. Here it is. I will be glad to furnish it to you. I will hand you Judge the bill of complaint in this case which undertakes to set forth Mississippi's boundary as well as that of the State of Louisiana, and ask you whether that coincides with the general information you have from the fishermen to whom you have spoken and others, given to you as a private citizen, or while you were district attorney and circuit judge?

A. This has always been my understanding of the southern boundary of Mississippi. The particular locality has always of course been a question of fact, as to where it was.

Q. What has been your understanding?

A. Beginning at the River Mississippi at a point where the southern boundary line of the State of Tennessee strikes the same, and thence east along the said boundary line of the State of Tennessee to the Tennessee river, and thence up the same to the mouth of Bear creek, and thence to the county of Washington, Alabama, thence to a point ten miles east of the Pascagoula river on the gulf of Mexico; thence westwardly including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne; thence up said Pearl river to the 31st degree of north latitude; thence west along said degree of latitude to the middle or thread of the stream of the Mississippi river; thence up the middle of the Mississippi river, or thread of the stream to the place of beginning including all islands lying east of the thread of the stream of said river, and also including all lands which were at any time heretofore a part of this State.

Q. Well as a private citizen, and district attorney, and as a circuit judge, and from your general information state whether or not you considered this State included 18 miles from the shore with its meanderings at all points from the Alabama line to the mouth of Pearl river?

A. That has always been my construction of it.

Q. I believe Judge that you have not been a member of any of these superfluous and illegal commissions that have undertaken to cut off the rights of the sovereign people of these two States in settling these lines, or in forming neutral territory?

A. No sir, I have not belonged to them.

Q. And of which especially the oyster commissions of Louisiana and Mississippi have undertaken to keep Mississippians from fishing

the Grand marsh, and as I once heard you say in a State convention, being turned out of the house of their fathers?

A. No sir, I have not belonged to them.

Q. You have not been a party to that crime?

A. No sir.

Cross-examination.

By Col. ZACHARIE:

Q. Judge Neville, can you remember how this interview with these gentlemen whom you have mentioned came about? Is it not a fact that you addressed them a letter asking to meet them?

A. I might have addressed a note to Mr. Nunez, asking him to meet me at the slaughter house Colonel, though that is not my recollection of it. I would not say I did not, but my impression is to give you my recollection about it, I had a brother in law who was engaged in the stock business, Mr. S. D. Jackson, at the stock landing. I think it was through his kind offices that Mr. 682 Lopez and myself met Mr. Nunez. I think we went down and he introduced us. My recollection is distinct about it, he introduced us to the deputy sheriff, some officer at the stock anding, and I might possibly have written him a note and gotten him to bear it to Mr. Nunez, I am not certain whether I did that or ast asked Mr. Nunez to come to see me.

Q. Will you give me about the time as near as you can when his interview took place?

A. That has been a long time. It was in the fall.

Q. When was it you resumed the practice of law?

A. In 1896 I think, the first day of June. I resigned to take effect on the 1st day of June 1896.

Q. You then think it was the fall of the same year?

A. Well I cannot be certain as to whether it was the fall of 1896 of the fall of 1897 or 1898. I am not positive about the year. I am pretty certain though that it was in the fall. Early in the fall when I had this interview with them.

Q. Are you not mistaken about saying that this interview took place at Albert Estopinal's office?

A. No sir.

Q. Did you not go together to the Cosmopolitan restaurant and there take lunch together and talk this over?

A. No sir. That is a mistake. The first interview was with Mr. Nunez at the stock landing, and he asked that we go to see Mr. Albert Estopinal at his office. We went to his office and my recollection is—I am sure they are mistaken about the place. We went to the café of the Grunewald hotel and there met his father, when the interview occurred between Mr. Albert Estopinal and the elder Estopinal and myself.

Q. It was not at Royal street at the Cosmopolitan?

A. No sir.

Q. They state that?

A. No sir, I remember distinctly that I was not in the Cosmopolitan restaurant for two or three years after that. I always up to that time had stopped there at Farbacher's, or at the Grunewald hotel.

Q. Now in the note that you addressed to Mr. Nunez—you say that you were in partnership with Mr. White, the district attorney?

A. Yes sir, Mr. White and myself were partners.

Q. Might not that note have been addressed on the letter head of the district attorney's office?

A. No sir, it was not, for the reason for that I remember distinctly, that that information came to me—I remember it as well as if it was yesterday, Mr. Lopez telephoned me to come to his factory. He was down at his factory. I got in a buggy and drove down to his factory and he informed me of what the boatmen had just come in and told him about it, and it required prompt and immediate action. We got off as soon as we could and went to New Orleans that evening. I think it was possibly one or two o'clock he called me down, and my impression is that we took the first train that leaves here at three o'clock in the evening and went to the city. I remember distinctly that we went to Farbacher's restaurant and took rooms and spent the night, and went down the next morning, and if I wrote to Mr. Nunez, and I have no recollection of writing to him, but if I did I wrote him on paper that I got from Mr. Derryberry who was a friend of mine in the stock business, at the stock landing, or my brother in law, Mr. Jackson.

Q. Did not Mr. Nunez, or Mr. Albert Estopinal Jr., or both parties inform you that the sheriff was then fitting out an expedition of armed men to go down there and arrest these Mississippians in that territory?

A. My understanding from them as I now remember it was, such was my understanding—that they had informed these Mississippians that they must not fish in that territory, and I got it, but I don't know that I got it from them, my judgment is that they denied that—I got it from the fishermen I think—that they thought there was an armed boat, and they made it a terrible weapon of destruction, was coming out there to kill them and run them off one
1683 way or the other. But I think Mr. Estopinal and Mr. Nunez denied any such purpose. They were simply going there to arrest them and try them in the courts.

Q. Did they not inform you. Mr. Nunez or Mr. Estopinal Jr. or perhaps both, that in order to carry out the order or ordinance of the police jury of the parish of St. Bernard that the sheriff was then organizing an armed expedition to go down and arrest all Mississippians found fishing in that territory?

A. I did not understand it was to be any armed expedition any more than what the sheriff or officer would have in going out to make an arrest under a criminal warrant. My understanding was that they were going down purely as officers of the law to execute

t they regarded as warrants that were to be placed in their
ds.
. Then I understand that you took the position that if that was
ied out that Mississippi would retort by arresting Louisiana
ermen?
. Who were found on what she was claiming as her territory.
. That would have brought about, would it not, a clash between
authorities of the two States?
. Not necessarily Colonel.
. Why suppose Mississippi authorities attempted to arrest
isiana officers, or that the officers of Louisiana would go and
t the arrest of these Louisiana fishermen who were fishing there.
uld not that have brought it about?
. I could not hardly contemplate a thing of that sort, and as I
rehended the thing would work this way, was my idea about it.
issippi was insisting that that was her territory and would
st Louisiana people and they would be carried in Mississippi
ts and tried, and tried according to the fact as we determined it,
as Mississippians fished in the same territory would possibly be
sted by Louisiana, which brought about the remark that I re-
ber distinctly making to these gentlemen, that we could arrest
any of them as they could of us.

By Mr. McCLURG:

I will ask you so that Louisiana's counsel may cross examine
on it. In that conference of which you now speak, or in one of
onferences you had with the district attorney, and the lieutenant
rnor, and the sheriff of St. Bernard parish, was it not under-
l that they would test these laws by having some of our fellows
sted and you would represent them. Was there not some sort
greement made by which this question should be decided by the
courts, and when you left there you never heard any thing
about it?
That was discussed, but my judgment is that we abandoned
as I told you on the idea that we were to see the Senators from
arious States and see if Congress could do it. And that hung
or some time, and Mr. Estopinal came to see me in my office at
i, after Mr. White and myself had dissolved partnership, Mr.
inal came to see me with reference to it and we agreed that
was impractical and a suit in the United States Supreme Court
l be the only remedy. But I will say this, that was my pur-
in Louisiana, was to represent Mississippians who had been
ted at that time, and I only found out on reaching Louisiana
it had been a general warning to them that they must get off
at territory and that nobody had been arrested.

By Col. ZACHARIE:

Was there not a great deal of apprehension expressed on one
nd the other that if the officers of either State would attempt

to arrest the fishermen of the other State that there would result resistance to the officers?

A. I don't think any of us thought seriously about that. That might have been discussed and I think possibly was dis-
1684 cussed Colonel, but my judgment is that we both reached the conclusion that the officers sent out to execute the process from Mississippi, and the officers sent out to execute the process from Louisiana would not engage in any conflict about it amongst themselves. There would be no resistance of legal process on the part of either side, and that is what brought about the determination on our part that the trial would amount to nothing. I think maybe Mr. Estopinal remarked and both of us agreed that the people arrested in the State of Mississippi would perhaps be convicted and the people in Louisiana would be convicted and nothing would be determined.

Q. Were you aware, or did they make you aware of the fact that some of the Mississippi fishermen had been previously warned off and admonished not to fish there and they had retorted they would not obey any such orders?

A. No sir, I don't think——

Q. The record does show that such had been done. Whether that had been discussed between you I don't know?

A. If that was discussed it was just discussed generally.

Q. According to your statement as I understand it there was a good deal of excitement among the Mississippi fishermen, as well as by their employers, the canneries here, and you were employed to go there to see what could be done in the premises?

A. I don't know Colonel as excitement would perhaps be the proper word. I had a very little talk with the fishermen. The most of my conversation was with Mr. Lopez and Mr. Ducate and Mr. Dunbar, and they had the boatmen employed who talked with them as they came in, and it was rather more of astonishment at the position taken by Louisiana than excitement. I don't know that there was any excitement about it. They telephoned me immediately as soon as these boatmen came in to report and we immediately went to New Orleans to see about it, and our information was that some of these men had been arrested.

Q. Now Judge you were interrogated more in the nature of an opinion by Gen. McClurg in regard to this clause in the constitution of the State of Mississippi. You have never examined the question as a lawyer have you?

A. I have examined it some but not as critically—I have examined it but not possibly as critically as a lawyer would and ought to give a matter of this sort, though I had examined it with a considerable degree of care at that time.

Q. Did you ever examine the act of Congress admitting the State of Louisiana to the Union?

A. Yes sir, I think I had at that time, I won't say very critically.

think I had examined the act at the same time, and they had veral maps at that ti... over there.

Q. Did you note particularly that portion of the act admitting e State of Louisiana which gives its southeastern boundary as fol-ws: after saying it shall go down to the mouth of East Pearl river says "Thence to the gulf of Mexico, and thence by the said Gulf the Sabine river," that is about the equivalent of it. Embracing l islands within three leagues. Nine miles?

A. Yes sir.

Q. Now is it not apparent to you that there is a clash in these o descriptions?

A. Well I declare I would rather not express an opinion about at unless I had investigated it more fully. It would be abso-tely worthless.

Q. Then Judge, in so far as the testimony of these gentlemen, ex-ieutenant Governor Estopinal, and Judge Albert Estopinal Jr., and r. Nunez is concerned. In so far as your recollection is concerned agrees pretty well with them, except on the following points as to me and place. That the interview was held, but as to the fact you ere holding any official capacity and representing Mississippi there in any way?

A. Yes sir, I think that is true. I started to say, but I thought possibly I had no right to put it in their mouths. I had en for more than twelve years the district attorney for these counties, d of course during that time was known to a good many people of uisiana, and they possibly confused that with the fact that I was that time district attorney. I do not pretend to say that they did t. Possibly there was an assumption of this sort on their part. ur interviews each and every one were of the most pleasant na-re, and I have very pleasant recollections of all of those gentlemen.

By Mr. McCLURG:

Q. By the permission of Judge Zacharie, I will interpose this estion so that he may cross-examine you Judge not only respect-g the matter about which I am about to ask. Suppose Judge, that a matter of fact you had been district attorney or even the circuit dge, under the laws of the State of Mississippi, or under her con-tution or even under the Constitution of the United States, pro-ding for the settlement of controversies between two States respect-g their boundary lines. Would you have had any authority under her the laws or constitution of the State or United States to have alt with them in respect to the settlement of that boundary?

A. Absolutely none, and I desire Gen. McClurg further more in at connection to state it in my examination in chief, that my derstanding of the law of the State of Mississippi was that if I had gaged at that time I was district attorney in the defense of any e while district attorney charged with crime I would have been ble to prosecution and conviction for a felony and removable

from office. Our laws prohibit the district attorney from engaging in the defense of any one charged with crime.

By Col. ZACHARIE:

Q. You say Judge that you have read the testimony of these gentlemen. Did they in any place or in any manner intimate that you acquiesced in the claim of Louisiana in regard to this boundary. Did they not say that you insisted that this was Mississippi territory as far as your knowledge goes?

A. I don't recollect the complete extent of their testimony. I read the testimony with reference to getting out the main facts, but I think they spoke to me two or three times possibly as the district attorney of Hancock county. I think that is the way they spoke of me. I read it the other day, but to say what all their testimony embraced, I would not undertake to say. It speaks there for itself.

Q. As I understand the testimony of these gentlemen they make no claim that you made any concession whatever on the part of the State of Mississippi, but you maintained that it was Mississippi's territory and the officers of Mississippi had a right to arrest over there?

A. Well that certainly was my opinion as I understood it.

By Mr. MCCLURG: By your permission Colonel, I will state that it occurred to me at the time Lieutenant Governor Estopinal, and the district attorney Albert Estopinal Jr. and Mr. Nunez were testifying that they laid especial stress upon the fact that Judge Neville was a law officer of the State of Mississippi and attempting, or undertaking to bind the State by his action.

By Judge NEVILLE: I think that Gen. McClurg made an objection there in the record that I had no right to bind the State of Mississippi and therefore any statements or declarations made by me were inadmissible is my recollection.

Redirect examination:

1686 By Gen. MCCLURG: By permisson of the counsel for Louisiana I would like to extend the original examination of Judge Neville.

Q. I will ask you Judge to please look at map No. 7 filed by Louisiana as testimony in this case, and I call your attention to some red lines and some blue lines. You will notice the measure double. One marked statute miles and the other nautical miles. You will notice first that there is nine statute miles, and nine nautical miles painted in blue that runs from about Point Clear southward through what we call the Grand marsh extending out to about Grand pas in its nautical mileage.

And I especially call your attention to the fact that these lines hit the main shore of Mississippi north east of Point Clear, and north of Grand island. I next call your attention to the line that branches

off from the main line which I have just mentioned from near Point Clear, marking as I have just stated the nine nautical mile line and the nine statute mile line, and then next I call your attention to the line that strikes the main shore of Mississippi east of St. Louis bay on the nine nautical mile line, and then under it the nine statute mile line. You will observe that these lines, especially the last one to which I have called your attention hits the Mississippi main land between Gulfport and Bay St. Louis, and in its reach strikes or nearly strikes the channel from Gulfport to Ship island. As I understand the claim of Louisiana from her bill and the testimony which she has already introduced in this case, that these outer lines reach the channel from Gulfport to Ship island are nine statute miles, and nine nautical miles from the north east point of Isle à Pitre, it being claimed by Louisiana under the testimony presented by this map that Isle à Pitre is the main land or coast of Louisiana, and that under the act of Congress admitting her into the Union she is entitled to three leagues of nine miles from her shore. In calling your attention to these lines I wish you to state what effect the establishment of this outer line, which reaches the channel from Gulfport to Ship island and strikes the Mississippi main land between Gulfport and Bay St. Louis, or of their inner line, being the first one to which I called your attention. What effect these lines or either of them would have upon the commerce of the State of Mississippi with reference to Ship island and Gulfport, or to any of that territory between Gulfport and the mouth of Pearl river as shown on this map?

By Col. ZACHARIE: To which question counsel for Louisiana excepts and objects as being irrelevant and as having no relevancy as to the actual situs of the boundary line between Louisiana and Mississippi as to what the consequence would be in regard to any port or any part of the coast of Mississippi.

By Gen. McCLURG: In answer to the objection of counsel, counsel for Mississippi states that there is contention on the part of Mississippi, set up in her answer and cross bill that in admitting the States of Louisiana Mississippi and Alabama, Congress had in view the southern or seaward frontage, when she gave six leagues including lands within them, and that this map being introduced by Louisiana would cut off all of Mississippi's sea front from the north end of Chandeleur islands to some where in the neighborhood of Gulfport, and would leave Louisiana jurisdiction between the north east point of Isle à Pitre, and if she should in the future from laws that made it a penitentiary offense to invade her territory, it would materially interfere with the navigation and general commercial interests of the State of Mississippi.

1687 Q. I will ask the witness to look at the map introduced by Louisiana marked as above indicated and to state according to his best knowlege and information and belief the effect that the establishment of either of these lines would have upon the

military or commercial or industrial interests of the State of Mississippi specifically and generally. The witness will please take the map and examine it and answer this question in his own way?

A. Well if the outside lines were established it would serve to cut us altogether west of Gulfport, and up the channel at places, or nearly up to it from Gulfport to Ship island. The effect if the second line should be established would be to cut us out of a large share of the frontage. Of course not quite so much as the first, and the third.

Q. Would not either of these lines absolutely cut Mississippi off the jurisdiction from the eastern mouth of Pearl river?

A. Undoubtedly.

Q. I next call your attention to the red line on map No. 7, which is supposed to be the 18 mile limit from the shore of Mississippi. The first one being statute miles and the second one being nautical miles, and they run as you see from the map with the meanderings of the Mississippi shore and hit at about the Alabama line, a finely dotted line on this map which I do not understand, and which may be a sailing line, under the act of Congress admitting Louisiana and Mississippi into the Union which of these lines would you say is the correct boundary of the State of Mississippi. The one marked in blue undertaking to mark the boundaries of the State of Louisiana or the one in red undertaking to mark the boundaries of the State of Mississippi?

A. General, I would prefer not to express any opinion about it because it would be merely an idea of my own and I don't know that I could back it up with any reason for it.

Q. I think you are quite correct Judge, but nevertheless I think it entirely proper under the pleadings in this case for you to state the effect that the establishment of the line claimed by Mississippi marked in red, as compared with that marked in blue claimed by Louisiana would have upon the material interests of the two States?

A. That I have already done as I understand it.

Q. You did say with reference to the blue lines?

A. Of course we would be in a much better condition then if the line should be adopted as the line marked in red and claimed by Mississippi. Our commercial and other affairs would not be so materially affected.

Q. I will ask you this further question Judge. Whether or not while you were presiding as circuit judge of the counties of the coast constituting a part of your judicial district there were any controversies civil or criminal—civil or criminal prosecutions where the venue was laid to the south of the shore line of Harrison or Hancock counties?

A. I have no recollection about that General. I could not say. There were some prosecutions at one time for violating the oyster laws of the State of Mississippi conducted before me while I was circuit judge of Harrison and Hancock counties. One of them The State vs. Conrad I believe I remember, and another perhaps The

State vs. Eaton and maybe another. I don't now remember, but I know that there was no controversy as to its having been done in the State of Mississippi. I could not say at what particular place the boat was lying out there at the time the alleged violation of the law occurred. I don't remember that.

Q. Could you say whether or not they were acquitted or convicted in your court?

By Col. ZACHARIE: Counsel for Louisiana objects to any testimony in regard to any judicial proceedings unless the judicial
1688 record is produced, or the foundation is laid by counsel for Mississippi by showing that such records as primary evidence have been destroyed, lost or mislaid.

A. My recollection now is General, that Mr. Conrad was convicted and fined to the limit of the law as I recollect it. His case was appealed to the supreme court of the State of Mississippi and by that court affirmed.

Mr. Eaton was tried in the circuit court of Hancock county, and convicted and his case appealed to the supreme court of the State of Mississippi, and his case was by the supreme court of the State of Mississippi reversed and remanded on the ground that we took a different view of the powers of the board of supervisors. They holding that the board of supervisors had no power to pass a law under which he was convicted. That is my recollection of the two cases.

Q. They were charged with violating ordinances passed by the board of supervisors of Harrison and Hancock counties?

A. Conrad was indicted for violating a law passed by the State of Mississippi as I remember it. For violating a law with reference to the taking of oysters. And Eaton was tried and convicted for violating an ordinance passed by the board of supervisors of Hancock county.

By Mr. MCCLURG: Counsel for Mississippi here states that these two cases to which Judge Neville here refers, reported in the official supreme court reports of the State, will be cited and made a part of the record in this case.

A. I know of no other prosecutions right now. A number of things came before me as judge. There were none that I remember that I participated except one. I remember spending about one week once while I was district attorney prosecuting some one out here for taking oysters off the natural reefs out here. Taking oysters off of a private reef and he defended on the ground that it was a natural reef. I think it was just in front of Biloxi here. Mr. Heidenham I think had the parties prosecuted for trespass on his oyster reefs. The only cases I remember now occurring out on the water during my time as district attorney or judge. There were other prosecutions. Verdicts of not guilty for a failure of proof in stating they were fishing in less than 14 feet of water.

Q. Judge I will ask you this question. You have stated that you have been district attorney for the State of Mississippi and also one of her circuit judges, whether as such, in either of these coast counties the State took civil or criminal jurisdiction of matters occurring in the sound, on the waters of the sound, and if so how far to the southward of the shore?

A. I have no recollection General except the cases I cited of any cases in my court at all. I do remember though at one time there was an attachment sued out in the circuit court of Harrison county Mississippi.

By Col. ZACHARIE: The counsel for Louisiana here interposes the same objection as was made above.

A. In the circuit court of Harrison county, Mississippi and levied on Cat island. I believe Mr. Duggan of New Orleans claiming for some debt, or some thing due to him, and I think it was levied on Cat island and possibly settled without any trial. It might have been pursued to a judgment. I don't remember that now.

Q. There is no dispute in this controversy as I understand it as to Cat island being in the jurisdiction of Mississippi?

A. Well now as to any particular instances I have no recollection of them at all.

Q. The formation of Harrison county first in 1841 amended
1689 subsequently perhaps in 1843, fixes the limit of her southern boundary co-extensive with the limits of the State according to that description given by the statutes of the State, and which have been, or will be introduced in this case—how far from the shore line would you say the southern boundary of the State of Mississippi and Harrison county was under her constitution and laws?

A. To the lines as laid down in the constitution.

Q. Which means as I understand it 18 miles from the shore?

A. 18 miles from the shore.

Recross-examination.

By Col. ZACHARIE:

Q. Judge, have you ever paid any particular attention to international law in these questions of boundaries?

A. I have not Judge.

Q. You have been interrogated in regard to certain lines on map No. 7, offered by the State of Louisiana, as to the effects upon Gulfport and other places. Have you ever studied or looked up the distinction between political jurisdiction and civil jurisdiction as affected by them?

A. I have not.

Q. Have you ever examined international law and the decisions under it in regard to fixing boundaries whether it be from the shore or coast? The distinction between shore and coast?

A. Not specially. I might have generally but not specially.
Q. Well now I understand that the opinion that you have ex-essed in looking at this map is simply an off hand opinion with-t any research upon the subject?
A. Upon the hypothetical question stated to me by Gen. McClurg, s sir.

Mr. WALTER A. WHITE, a witness introduced on behalf of the State Mississippi, being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Mr. White, where do you reside?
A. Biloxi.
Q. I notice in the original bill of complaint filed by the State of ouisiana against the State of Mississippi in this case the minutes certain proceedings with reference to the line dividing these two ates to the waters of the gulf of Mexico, had by certain citizens of ouisiana and alleged commissioners appointed by that State, and e alleged commissioners appointed by the State of Mississippi; id appointments being by the governors of these two States re-ectively, including certain resolutions passed by these commissions. ie first by the commission of Louisiana and then the joint motion the commissioners appointed by the respective States, that W. A. hite was appointed by the governor of the State of Mississippi to rticipate in one or more of these joint meetings. I wish you ould state whether you are the W. A. White quoted in this pro-eding mentioned in the bill of complaint in this case?
A. Yes sir, I am.
Q. I get from the bill of complaint Mr. White that about January 19th, 1901, some citizens of Louisiana held a meeting at the 00 office of Mr. John Dymond Jr., in the city of New Orleans, at which the governor of the State presided and Mr. John mond Jr., acted as secretary, and that Lieutenant Governor Albert topinal offered a resolution, which was adopted requesting the vernor of Louisiana to appoint a commission to consider the termi-tion of the boundary line between the two States, and arrange for easy location and identification by a proper system of buoys. at among those appointed by the governor of Louisiana was Mr. bert Estopinal, Jr., John Dymond, Jr., H. C. Cage, Clement Story d Sidney F. Laws. That on the 26th day of January 1901 the vernor of Louisiana addressed the governor of the State of Missis-pi a letter enclosing a copy of the proceedings of the meeting ove mentioned and requesting the governor of Mississippi to ap-int a like commission on the part of that State, to join the com-ssion appointed on the part of the State of Louisiana. "To con-er the determination of the water boundary line, and arrange for easy identification by a proper system of buoys." That after-rds the governor of the State of Mississippi on the 9th day of Feb-

ruary, 1901, appointed E. J. Bowers, A. Kellar, W. A. White, Harry T. Howard and J. I. Ford.

This bill further alleges Mr. White that these two commissions met at the office of Mr. John Dymond Jr., in the city of New Orleans on Tuesday March 26th 1901 "To confer as to the boundary line between the two States to the waters thereof," and that at said meeting Mr. Harry Howard of Mississippi was made chairman, and Mr. John Dymond Jr., secretary and at that meeting "Commissioner W. A. White stated to the assembly that the Mississippi commission had not yet had an opportunity to confer as to the subject matter before them, and thereupon he moved, and the same was duly seconded by Mr. Clement Story that a recess of the joint committee be taken until 11.30 a. m."

This motion was put and adopted and the meeting then took a recess until 11.30 a. m. The bill further recites in its joint copies of the proceedings here mentioned that these joint commissions met again and were called to order at 11.30 by Chairman Harry T. Howard, and that Mr. John Dymond Jr., at the request of the Louisiana commission presented to the Mississippi commission the views of the Louisiana commissioners on the subject of the boundary line in the waters between the two States. The minutes of the meeting which I have mentioned go on to state that after Mr. Dymond had presented Louisiana's claim, which is set forth in the bill with which you are familiar, states that on motion of Mr. Bowers seconded by Hon. H. C. Cage "The Louisiana Boundary Commission were requested to express their ideas as to the boundary line on the map which had been the subject of discussion, the line to be delineated in red ink, which should be presented to the Mississippi commission subsequently, and they in turn should endorse their views thereon." This motion was put and carried.

The minutes copied in the bill further recite that the Louisiana commission invited the Mississippi commission to take lunch at the Cosmopolitan hotel, etc.

The bill further recites that the commission appointed on the part of the State of Mississippi met after some five months' delay on July 20th, 1901, and stated that as to the claim submitted by Louisiana the Mississippi commission were unable to concede, and that the difference between the two commissions was so great that there was no hope of reconciling them, and that the Mississippi commission thought it useless to submit a counter line proposition. That "the Mississippi commission considers as islands considerable territory which the Louisiana commission claims as main land, and the difference over this question of fact appears to us to be past reconciling.

We beg to disclaim any idea of being discourteous in failing to submit a counter line for them to consider.

It is apparent that the only hope of settlement is a friendly
1691 suit in the Supreme Court of the United States, and we respectfully suggest this course."

I have stated the question at length Mr. White in order to refresh your memory as to dates and circumstances, and will ask you to state to the commissioner, and through the commissioner in your own way the history of these commissions and of these meetings, and if you can what authority in law there was for either the appointment of the commission or the power of the commission in undertaking to act for their sovereign State, in determining and fixing the boundary line between the two States, or in arranging the easy identification of the lines by a proper systems of buoys, and to make any other or further statement pertaining to the issue that you desire to make in this matter?

A. With your permission I will answer the latter portion of this question first. I don't understand that the commissioners on the part of Mississippi had any authority to bind Mississippi, nor that the commissioners on the part of Louisiana had any authority to bind that State, nor that the action of the joint commission was binding on either State. I understand that if the two legislatures could have agreed upon a line and adopted it, and that line had been ratified by an act of Congress, that in that way the boundary line between the two States could have been established. And this, I understood to be the purpose of the appointment of the commission. I understood that if the commissioners from the two States had been able to agree, as to what the true line between the two States was, that the governors of the two States would recommend that the legislatures adopt that as the boundary line, and *for* the members of Congress from the two States could get an act passed fixing it as the boundary line of the two States. That was understood to be the extent of the duties of the commissioners appointed by the two governors, simply to recommend a line to be adopted by the two legislatures and afterwards ratified by an act of Congress. At the time appointed for a meeting in New Orleans of the commissioners from the two States I went there to the meeting and arrived in New Orleans on the morning train that got into the city about nine o'clock. The meeting was set for ten o'clock at the office of Mr. Dymond. I went there at the appointed time and met for the first time the members who were appointed on the board for the State of Mississippi. No conference had ever been had between Messrs. Bowers, Howard, Kellar and Ford and myself, and we had no meeting up to the time the joint commission met at Mr. Dymond's office. That being the case I requested a recess until 11.30 for the purpose of having a conference with my associates before we went into a joint meeting. When the commission convened again Mr. John Dymond on the part of Louisiana stated their position, and stated what they claimed to be the boundary line between Mississippi and Louisiana, claiming that all the water front of Hancock county and a part of the water front of Harrison county was Louisiana territory. I notice that the minutes of the meeting state "This view of the matter having been presented a general discussion followed during which the members of the Mississippi Boundary Com-

mission admitted that the view was a novel one to them, they being unable to pass upon it at the moment requested further time." That statement is also true. It was a novel proposition to us, and so far as I was concerned it was the first time that I ever heard that Louisiana claimed to own all of the water south of the line marked out afterwards by the Louisiana Boundary Commission: south of the line that they claim to be the boundary line, to-wit, the deep water channel leading from the mouth of Pearl river out through the pass between Cat island and Isle à Pitre. I know that it was claimed by some parties in Louisiana that the marsh islands, such as the islands in and around Bayou Boudreaux belonged to Louisiana, but I had
1692 never heard the claim made that the water north of these islands was in Louisiana, and that Grand island, Round island and Grassy island belong to Louisiana. Their position being so entirely different from what we supposed that it would be, and their claim being so much greater than we anticipated, we requested that a recess be taken and that the Louisiana commissioners would furnish us with a map marking out the boundary as they conceived the true boundary to be, and that we would in turn furnish them with a map showing the boundary line of Mississippi as we understood it, and that afterwards we would get together and have another conference and endeavor to agree on a compromise line if possible. Some months afterwards I learned that they had furnished to Mr. Howard a map with the line marked out according to their contention.

Q. What line if you remember now was it that they had marked out. The deep water channel?

A. It was the deep water channel line as appears on this map No. 7. About on that line somewhere near that line. Mr. Howard, who lived in New Orleans and had a summer home at Biloxi where he stayed a month of two in the summer, but at that time of the year was generally in New Orleans. Messrs. Bowers, and Kellar lived at Bay St. Louis thirty miles west of Biloxi. Mr. Ford lived at Scranton, twenty miles east, and there was never any meeting of the commissioners appointed by the State of Mississippi except the meeting held in the office of Mr. Dymond and the meeting called by Mr. Howard after the receipt of the map, furnished him by the Louisiana Boundary Commission to meet at Bay St. Louis, when for the first time Mr. Ford and myself did see the map furnished and which had been in the possession of Mr. Howard. I don't know whether Mr. Kellar and Mr. Bowers had ever seen the map before or not. When we examined the map it was manifest from the claims made by the Louisiana people that there was no possibility of our ever coming to an agreement either by compromise or otherwise, and we therefore agreed that we would submit no counter proposition, but would simply recommend that a suit be brought in the Supreme Court of the United States for the purpose of settling the boundary line, and this we did, we sent in a report to Governor Longino of our action in this matter, and in addition to the report

sent in Mr. Ford and I prepared a statement of what we conceived to be the true boundary line between Louisiana and Mississippi and set out the reasons. In that report we set out the reasons for the position we took. This report was only signed by Mr. Ford and myself for the reason that we had no meeting with the other members of the commission and it was not submitted to them.

Q. If you can remember what that separate report stated I would be glad if you would let it go in the record.

By Col. ZACHARIE:

Q. Have you got a copy of it?

A. No sir, I have not got a copy of that report. I had a copy of the report but I have searched for it once or twice and failed to find it. It has been mislaid or loaned to some one.

By Mr. MCCLURG:

Q. It is true that you called on the governor's private secretary for it did not you?

A. Yes sir.

Q. When you asked me if I had seen it I told you I had not and we went to look for it and could not find it?

A. Yes sir, what Governor Longino did with that report I don't know. He never acknowledged receipt of it and his private secretary could not find it, or failed to find it when the attorney general and I went in his office to look for it.

1693 Q. Now please state that report as near as you can remember it.

A. It would be impossible for me to state any thing like the language of the report, and even the entire substance of the report, but the report was to the effect that after a thorough investigation and examination of the questions involved with all the lights before us that we were of the opinion that the boundaries of Mississippi included all of the islands within 18 miles of six leagues of the shore. That the territory in dispute belonged to the State of Mississippi for the reason that it consisted of water and marsh islands that were within 18 miles of the Mississippi shore and were not within nine miles of the Louisiana shore or land. This report was in the form of a brief and cited the acts of Congress fixing the boundaries of Louisiana and Mississippi and also cited authorities to sustain some of the positions that we took. This report was signed by myself and J. I. Ford and sent to Governer Longino. Governor Longino never acknowledged receipt of the report and did not send it to the legislature with the other papers with reference to the boundary dispute. Afterwards I called the attention of attorney general to this fact and he and I went into the governor's office and had the governor's private secretary to look for the report and he failed to find it. I will say further in reference to the reason that this brief or report was not signed only by Mr. Ford and myself. There was only one other lawyer appointed from Mississippi besides Mr. Ford and myself, and

that was Mr. Bowers, who at that time was wholly occupied with other matters, and Mr. Bowers was unable to make an examination of the questions involved, and so stated at the last meeting that we had. That during all the time of the existence of the commission that he had been wholly unable because of the press of other business to give the matter any attention whatever. Mr. Kellar was a merchant, and Mr. Howard was a capitalist and not engaged in any regular business.

Q. I wish you would state Mr. White whether Mr. Bowers or Mr. Kellar had any business connections or associations in the city of New Orleans or the State of Louisiana at that time?

A. Mr. Bowers had a law office in New Orleans. I don't know whether Mr. Kellar had any business in New Orleans at that time or not. He had none so far as I know.

Q. It has bobbed up in this case Mr. White that there has been some kind of an agreement between the Oyster Commission of Louisiana and the Oyster Commission of the State of Mississippi fixing what they term neutral ground. A neutral line, which I understand to be drawn through the western edge of Grand pass southward by Sun Down island to the 18 mile limit, westward from the northern entrance of Grand pass along the coast of the string of islands to Malheureux point, and the mouth of Pearl river. That south of this line to what we term the marsh and where the testimony shows the best oysters for raw shipping are found is reserved exclusively for Louisiana fishermen, and that north and eastward of that line which I have mentioned is called neutral ground where Louisiana and Mississippi fishermen, oyster takers may go without molestation from either side. I wish to know if you know of any law or authority that these commissions had for fixing this line so as to bind the citizens of the two States?

A. They had no such authority. The State of Louisiana had an oyster commission composed of men who were familiar with the matters in dispute, and who had as their counsel Mr. John Dymond, a lawyer who thoroughly understands every question involved in this trial. Mississippi had never an oyster commission before. By the acts of 1902 the oyster commission was created. The law made it the duty of the governor to appoint men on that commission who were not engaged in the business of fishing or canning or shipping oysters, but who were familiar with the business.

Q. You mean the laws of Mississippi?

1694 A. The laws of Mississippi. The governor of Mississippi however appointed on this commission one man who was engaged in the business of selling and buying saw logs. Another man whose business had always been that of a saw mill man as I am informed, and another whose business was that of operating a flour mill. The other two had engaged to some *t*xtent in catching and planting oysters. Outside of the last two commissioners named no man on this commission knew any thing about the territory in dispute or of the matters involved in this controversy.

. Was there either of them lawyers?
. Neither of them was a lawyer, and I think I could safely say neither of them had ever seen at the time they made that agree- t any part of the disputed territory. I know that neither of n knew any thing about the contention of Mississippi with refer- to where the true boundary line was. They had no authority ind the State, but simply permitted the Louisiana commission, succeeded in getting an agreement from them fixing as far as could the boundary lines without any authority of law and in lute ignorance of the matter about which they were dealing and e effect of their action on this suit.
Mr. White, I will ask you to look at map No. 7 filed in this by the State of Louisiana and examine those lines marked 9 te and 9 nautical miles which indicate the claim of Louisiana different points, and also the red lines marked 18 statute miles 18 nautical miles indicating the claim of Mississippi, and I will you to state what you conceive would be the effect upon mili- and naval and commercial and general interests of the State of issippi if either of these lines would be established as being the mile limit of the State of Louisiana?

Col. ZACHARIE: The counsel for Louisiana objects and excepts is question as being irrelevant to the question of boundary, ng entirely with what might be the effect of establishing that dary and also on the further ground that this is mere opinion is asked from the witness.

The effect would be to take from Mississippi the control of the r front of nearly one half of the State, as the city of Gulfport is t the center of the shore line of the State of Mississippi.
Louisiana has stated in the bill of complaint, and as you know ou not as a lawyer has made it a penitentiary offense to dredge rs under certain conditions within her jurisdiction, and if her diction should be fixed at one of these lines what effect do you it would have upon the industries of Mississippi, especially if ould be fixed at the outer line near the channel extending from port to Ship island?
The oyster industry of Mississippi would be wholly destroyed. result would be that there would not be an oyster factory oper- in the State of Mississippi. It would be impossible for an oys- ctory to operate if it was dependent upon Louisiana territory s oysters for the reason that the State of Louisiana prohibits rs from being carried out of the State for canning purposes. all of the oyster territory from which the canning factories of ssippi draw their supply of oysters lies west and south of the rn line indicated on map No. 7.
I will ask you whether you have held any office under the of the State of Mississippi and if so what it was?
I have never held any State office. I have been district attor- f the sea coast district of Mississippi.

Q. For how long?

A. From June 1st 1896 until January 1st 1904.

Q. Were Jackson, Harrison and Hancock counties in your district?

A. Yes sir.

Q. The duties of the district attorney under the laws of the State of Mississippi is to advise the grand jury and to draw indict-
1695 ments, and to prosecute persons presented by the grand jury as I understand it. I will ask you to state whether you remember as a distinct fact without going into the details of the prosecution, whether or not while filling the office of district attorney in any of these coast counties you have prosecuted any persons for violating the laws of the State or any ordinance passed by the board of supervisors of either of these counties, of the oyster laws or ordinances?

By Col. ZACHARIE: The counsel for Louisiana objects and excepts to any testimony in regard to judicial proceedings until and unless the counsel for Mississippi shall pave the way for the introduction of secondary evidence and show that such judicial records have been lost, or destroyed or mislaid.

By Gen. MCCLURG: Counsel for Mississippi states that the witness will not be asked to state the contents of any record, but as indicated by the question to state as a matter of fact whether he as district attorney in the discharge of the duties of his office was ever called upon to prosecute any persons for violating the laws and ordinances mentioned.

A. Yes sir, I prosecuted a number of men both in Harrison and Hancock counties for violating the laws with reference to fishing oysters in waters in what we term the disputed territory.

Q. When?

A. I could not give you the dates.

Q. During your term of office?

A. During my term of office between 1896 and the beginning of this year.

Q. Between June 1st, 1896, until the 1st Monday in January 1904?

A. Yes sir, the only question in those prosecutions that we ever investigated with reference to fixing the place was the question as to whether it was within six leagues of the shore.

Q. In any of these prosecutions was the jurisdiction of the State 18 miles south of the shore ever disputed?

A. Not within 18 miles of the shore.

Q. And the jurisdiction of the State within 18 miles of the shore was not disputed?

A. It was never disputed so far as I know at any time in any court of this State.

Q. Go ahead and state any thing else you may think of that has any bearing on this case?

A. I will state this fact also. That in 1892 or 1893 the first dredge

at that ever dredged oysters in the waters of Mississippi was built Messrs. Lopez and Ducate. Pretty soon after it began to work ing oysters in the territory now in dispute the board of super- ors of Harrison county passed an ordinance to prohibit the dredg- of oysters in the waters of Harrison county, and the board of ervisors of Hancock county did the same, and thereupon they to cease operating the boat, and I was employed by Lopez & cate to represent them before the board of supervisors in an effort get the board to modify their ordinance, so as to permit them to in deep water. And after several meetings of the board and siderable controversy over the matter the order was made per- ting the dredging of oysters in water of a certain depth. I think vas fourteen feet.

. You say that they ceased to dredge oysters in either of these nties until the ordinance was modified?

. The board of supervisors of Harrison county modified their inance. The legislature of the State afterwards passed a law mitting the use of dredges, and the board of supervisors of Han- k county, I don't remember exactly how their order was, passed order prohibiting the use of dredges in that county. My recol- lection is that there were several indictments for violating 6 that ordinance, F. W. Eaton, amongst others. Eaton was tried and convicted and the supreme court held that the inance of the board of supervisors was void, and reversed the , but the question of jurisdiction of the courts of Hancock county never questioned.

Cross-examination.

By Col. ZACHARIE:

. Mr. White I understand the functions of these boundary men ither side, it was simply advisory, and if the commissions had ed they were simply to recommend to the legislature of either e for the ratification and establishment of a certain boundary if could agree. The two commissions?

. Yes sir, that is my understanding.

. Mr. Bowers you say was a member of this commission. Was t that time a Congressman?

. No sir, he was not.

. Was it just prior to his election?

. Mr. Bowers afterwards was elected to Congress in 1902. In ember 1902. This was in 1901.

. In the investigation that Mr. Ford and yourself made did you then in the act admitting the State of Louisiana into the Union the State of Mississippi into the Union in limiting the bounda- that the word coast is used in the Louisiana act and the word e is used in the Mississippi act?

. Yes sir, we noted that then. That is used the word coast with rence to Louisiana and the word shore in reference to Mississippi

but we understood these provisions to have reference to the water front extending seaward, and we did not consider the marsh islands situated in the disputed territory as coming within the meaning of the word coast as used in describing the boundary of the State of Louisiana.

Q. Did you or did you not examine the authorities on the subject of boundaries in which coast is defined as embracing all the islands off the main land of the State. For instance the celebrated decision of Mansfield?

A. Yes sir, we examined the case of Mansfield against Moss.

Q. I am speaking of the English case. A Spanish vessel was captured and taken into the prize court, in which the prize court decided that these islands were a part of the coast?

A. What case was this?

Q. The case of the Anna?

A. I don't remember to have examined that case.

Q. That is the leading case on the subject?

A. You state where they decided that these islands were a part of the coast of Louisiana in that case.

Q. Yes sir. Where the word coast is used it means the islands, and included the islands adjacent to the main land?

A. That had no reference to these particular islands?

Q. No sir?

A. I think I remember the case. It has been a long time and I have had no occasion to charge my memory with it since, and I don't remember to have read that particular case, but I examined the authorities where the distinction is made between the use of the words coast and the words shore.

Q. Now did you examine the authorities of international law in regard to the distinction between the political and civil jurisdiction in fixing boundaries?

A. I don't remember sir to what extent we examined that question.

Q. Now in the opinion which you give in your testimony in regard to the effect upon Gulfport and other places along the Mississippi coast in case that the nine mile theory of Louisiana was supported.

1697 I believe you stated it would have a great effect upon the commerce and industry and so on of these ports. Would that interfere in any way in the world with the coming to and going from these ports, or would it do any thing more than to decide in this controversy that the oysters lying within these boundaries belonged to Louisiana?

A. It would have the effect of giving to Louisiana the criminal jurisdiction of Mississippi's shore.

Q. Of the Mississippi shore or the waters near the shore?

A. It would deprive the State of Mississippi of any jurisdiction either civil or criminal of any of the waters touching the western half of her shore line. Say from Gulfport to the westerly line of Mississippi.

Q. These cases which you have mentioned. The Eaton case I believe was one and another one. Are they reported in your supreme court reports?

A. Yes sir.

Q. How long ago. Could you name the year and the volume in which they are reported?

A. I think in the year 1900 or 1901 these cases were tried. I will also say Colonel that I prosecuted a man for violating the laws of the State at Ship island. That is 12 miles of the Mississippi shore. Robert Seamore, that case was also in the supreme court. I think his honor, Judge Bullard, the commissioner presiding defended him if I am not mistaken, and in that case the supreme court, without questioning the jurisdiction of the State otherwise held that the State of Mississippi had no jurisdiction of this place where this offense occurred for the reason that Mississippi in 1858 had ceded her criminal jurisdiction of that part of Ship island to the United States for military purposes.

Q. It was not a military reservation was it on the part of the United States?

A. No sir, it was not. It was a subsequent taking on the part of the United States for the purposes of a fort.

Q. Well now what you have said in regard to the effect on these places on the Mississippi coast is simply an opinion of yours?

A. If the fact that Mississippi's jurisdiction is coextensive only with its borders is a matter of opinion then my answer to that question is a matter of opinion.

Q. That is a conclusion that you draw from the facts?

A. I did not suppose that that was a matter about which an opinion could exist.

Redirect examination.

By Gen. McCLURG:

Q. When I asked you what office you had held in the State of Mississippi I understood you to say that you had not held any under the State?

A. State office.

Q. If my recollection serves me right we both fought and died together in the legislature of 1896?

A. Yes sir, I was sentenced to the legislature in 1896, and served out a part of my term and was pardoned by the governor appointing me district attorney in June.

SATURDAY MORNING, June 25th, 1904.

The commission met this morning at 9 o'clock, and there were present, Hon. William D. Bullard, commissioner, Gen. Monroe McClurg, counsel on behalf of the State of Mississippi, and Col. F. C.

Zacharie, counsel on behalf of Louisana, and the following
1698 testimony was taken, to-wit:

It is hereby agreed between the counsel for Mississippi and Louisiana here present, and in the presence of the commissioner and approved by him, that the original agreement and all agreements heretofore made in regard to the time and places of taking testimony are modified and amended, so that upon adjournment today, this June 25th 1904, no further testimony will be taken on either side until the 8th, day of August 1904, when the commission will meet at Bay St. Louis, Mississippi, and Mississippi will resume taking testimony in chief at that place or at Jackson, Mississippi as she may then determine, or at both until and including the 20th day of August 1904, when she will conclude her testimony in chief, and that thereafter the State of Louisiana shall have the period embraced between the 21st day of August and the 15th day of September for the purpose of taking evidence in rebuttal, and that Mississippi shall have after the 15th day of September up to the 1st day of October 1904 for the taking of testimony in sur-rebuttal, and it is agreed that the taking of testimony in its entirety shall be concluded on both sides on or before the 1st, day of October, 1904 as specified in the original agreement between the counsel on both sides.

Counsel for Mississippi offer and introduce in evidence the following documents, a copy of each one of which is now handed to the counsel for the State of Louisiana.

Mississippi Document No. 25 A. Being an ordinance of the board of supervisors of Harrison county adopted at the August term, 1882.

Mississippi Document No. 26, being an ordinance of the board of supervisors of Harrison county adopted at the August term, 1884.

Mississippi Document No. 27 Being an ordinance of the board of supervisors of Harrison county adopted at the March term A. S. 1885.

Mississippi Document No. 28. Being an ordinance of the board of supervisors of Harrison county adopted at the March term 1888.

Mississippi Document No. 29, being an ordinance of the board of supervisors of Harrison county, adopted at the November term 1892.

Mississippi Document No. 30, being an ordinance of the board of supervisors of Harrison county, adopted at the December term, 1892.

Mississippi Document No. 31, being an ordinance of the board of supervisors of Harrison county, adopted at the January term 1893.

Mississippi Document No. 32, being an ordinance of the
1699 board of supervisors of Harrison county adopted at the January term 1893.

Mississippi Document No. 33, being an ordinance of the board of supervisors passed at the August term 1893 of Harrison county.

Mississippi Document No. 34, being an ordinance of the board of supervisors of Harrison county, passed at the October term 1893.

Mississippi Document No. 35, being an ordinance of the board of supervisors of Harrison county passed at the November term 1893.
Mississippi Document No. 36 being an ordinance of the board of supervisors passed at the December term, of Harrison county, 1893.
Mississippi Document No. 37, being an ordinance of the board of supervisors of Harrison county passed at the February term 1894.
Mississippi Document No. 38, being an ordinance of the board of supervisors of Harrison county, passed at the September term 1892.
Mississippi Document No. 39 being the pilots' laws, and rules and regulations of Ship Island harbor, Mississippi. Annotated Code 1892, being chapter LIX, An act authorizing the board of supervisors of each county having a sea port or harbor therein to appoint a board of pilot commissioners, and amended by chapter 128 of the Laws of the State of Mississippi, passed at a regular session of the Mississippi legislature, held in Jackson, commencing on January 7th, 1896, and ending March 24th, 1896.

Capt. JOHN WALKER being recalled on the part of the State of Mississippi, testified as follows:—

By Gen. McCLURG:

Q. Captain Walker, you have testified in this case once before?
A. Yes sir.
Q. We have introduced as evidence in this case as Mississippi Document No. 39, the laws of the State authorizing the board of supervisors of each county to appoint a board of pilot commissioners and in connection with that and as a part of it "Rules and regulations adopted by the pilot commissioners of Ship Island harbor on the 15th of April 1898. Rules and regulations for harbor masters of Ship Island harbor adopted October 6th, 1894. I wish you would please state whether or not you have had any connection with that board?
A. Yes sir, In 1887 I was appointed a member of the board.
Q. Of what?
A. Of pilot commissioners, and served one term of four years, and in 1891 I was again appointed and am at present the secretary of the board of pilot commissioners.
Q. For Harrison county?
A. For Harrison county and the State of Mississippi.
Q. During your service upon that board over what territory has the board exercised jurisdiction?
1700 A. On the waters within the boundary of Harrison county.
Q. To what limit from the main shore line of the county southward?
A. Well I would consider that the board of pilot commissioners had jurisdiction over the waters inside of Ship island, Cat island, and down to the Grand marsh. The shores of the Grand marsh to the line a little west of Malheureux point, running north and south from Pearl river.

Q. How far due to the southward does that board—has that board exercised jurisdiction?

A. Well we have never had occasion during my time to administer on anything south of Cat island, or south of Ship island, nor over there to the Grand marsh even.

Q. Captain, I will ask you to look at Document No. 39 to which I called your attention awhile ago, and ask you whether those are the laws, rules and regulations under which your board has been acting?

A. Yes sir.

Q. And you were kind enough to furnish to the commission three copies of these rules?

A. Yes sir.

Q. When you were on the stand the other day you made some statement about having been carried through Three Mile bayou, and that perhaps a reference to some memorandum you had would refresh your memory about it. Have you anything further to say about that now?

A. Only as to the exact date and the name of the steamer. It was the steamboat Florence and the date was the 14th, of April 1867.

Q. What was the route that you travelled with that steamer that day?

A. Do you mean through the marsh?

Q. Yes sir.

A. Well as I stated then I could not tell exactly what the route was. This old Greek fisherman did the piloting and I did the sounding, and when I came out in Mississippi sound I did not ask him whether we came out through Three Mile or Nine Mile bayou, but before we entered from Chandeleur sound he told me that he could go through and take the boat through Three Mile bayou.

Q. What draft was your boat?

A. About four and a half feet I would judge.

Cross-examination.

By Col. ZACHARIE:

Q. Captain I understood you to say in your examination in chief, that while you considered that your jurisdiction extended to the south of Ship and Cat islands, and even down to Grand marsh as far as Malheureux point, yet you never had occasion to assert your jurisdiction in the Grand marsh as you call it down to Malheureux point?

A. That is what I said.

Q. Do you think you could recollect the name of the old Greek that piloted you through there if I should name it?

A. No sir, I could not call the name. He was a deck hand on the boat.

Q. Was it Apostalo?

A. I would not be able to say even if I heard it.
Q. I understood you to say Captain that you were first appointed on the board of pilot commissioners in 1887?
A. Yes sir.
Q. In 1887?
A. Yes sir, I was appointed some time in April 1887.
Q. Could you refer us to the act of the State of Mississippi under which you were appointed in 1887?
A. No sir, I don't believe I could.
Q. You don't know the act under which you were originally appointed?
A. Originally in 1887 I served one term.
Q. You don't know the date of the act or the number?
A. No sir.
Q. This steam Florence. She was a low pressure river steamer?
A. A high pressure side wheel steamboat.
Q. You think that she drew about four and a half feet of water?
1701 A. Between four and four and a half. I could not tell you exactly, because we had burned out some of the fuel.
Q. Did you notice the stage of the tide as you went through there?
A. No sir, I did not notice that particularly.
Q. Whether it was low tide or high tide?
A. I did not notice that particularly. I was giving my attention to the lead line.

Capt. GEORGE MCCAUGHAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Where do you live?
A. Mississippi City.
Q. How old are you?
A. 63.
Q. How long have you lived in Harrison county?
A. I was born at Mississippi City and have been there nearly all of my life.
Q. Have you ever been engaged in boating of any kind of the sound or Lake Borgne?
A. Yes sir, from here to New Orleans.
Q. Since when?
A. Since about 1867 or 1866.
Q. In what capacity? As captain or master?
A. Captain.
Q. Do you know where there is a sailing line. Deep water sailing line of channel out of the Rigolets and the eastern mouth of Pearl river going eastward, north of Grassy island and Half Moon island or Grand island?

A. Yes sir, I do.

Q. How far to the southward of the Mississippi shore have you been since 1867 or 1868?

A. About as far down as the lower end of Brush island.

Q. When you were at the lower end of Brush island in what State were you?

A. I imagined that I was in the State of Mississippi.

Q. Why did you think you were in the State of Mississippi Captain?

A. Because the boundary called for 18 miles south of the main land, which I have always understood that was the boundary line.

Q. Has that been the general acceptation and understanding of the southern limits of the State during your knowledge of it?

A. It has been with me.

Q. How has it been in the community in which you lived?

A. I have never heard it discussed at all.

Q. Louisiana claims in this suit that this sailing line to which I called your attention awhile ago is the true dividing line between the two States. Have you any knowledge or information as to that claim?

A. No sir, I have not. There are two channels there. One on the south of Cat island and the other on the north side. You go in here and pass south of St. Joseph's island.

Q. The one passing south of Cat island is the one that Louisiana is seeking to establish as the boundary?

A. Yes sir, that would not give them 18 miles by a long ways.

Q. It would give very little at some places?

A. Yes sir. You see I was on Chandeleur island with a ranch four or five years, in passing backwards and forwards, I generally came through Grand pass and Cat Island pass, south of it.

Q. What was your business on Chandeleur?

A. I had a cattle rance over there.

Q. A cattle ranch?

A. Yes sir.

Q. When was this?

A. I don't remember exactly the year, but it was about 25 years ago.

Q. Is that the ranch that Roderic Seal was interested in?

1702 A. Yes sir, I had a good many of his cattle there.

Q. I believe it was destroyed by a storm?

A. The island was going to pieces when I left there. Going to pieces and the myrtle bushes were all dying, and every blow was blowing them away.

Q. Where were you?

A. I was on a place called Schooner harbor about ten miles south of the north end. That is where I built the house.

Q. Your home was in Mississippi at that time?

A. Well I was single then. Of course I had not deserted my home. I went out to the Chandeleur islands.

Q. Mr. Seal lived in Mississippi?
A. Yes sir.
Q. He lived at Mississippi City?
A. Yes sir.
Q. And he had his cattle on Chandeleur island?
A. Yes sir.
Q. And you had cattle there?
A. Only my interest in the cattle.
Q. Was Roderic Seal who had the cattle there the old lawyer that lived down there?
A. Yes sir.
Q. Represented Mississippi in the house and senate?
A. Yes sir, I think he was up there several times.
Q. And the father of the present sheriff of this county?
A. Yes sir.

Cross-examination.

By Col. ZACHARIE:

Q. Captain, you said that when you were as low down as Brush island you imagined that you were in the State of Mississippi. When you were as low down as the lower end of Brush island?
A. Yes sir.
Q. What did you base this opinion on?
A. On the 18 miles.
Q. What did you base your opinion on?
A. On the 18 miles.
Q. Where did you derive your information from?
A. I am not positive whether I got it from the old revised code or not of Mississippi.
Q. You have never examined the act admitting Louisiana into the Union have you?
A. No sir.
Q. Giving her all of the islands with in three leagues?
A. No sir, I have not. When I was in the oyster business here there was no contention.
Q. You say that you never heard this question discussed?
A. No sir.
Q. Who owns Chandeleur islands?
A. I always thought that it belonged to the Government.
Q. Belonged to the United States Government?
A. The United States.
Q. Do you know whether it was a military reservation or not?
A. No sir, I do not.
Q. How did you regard Chandeleur islands, as being in the State of Mississippi or Louisiana?
A. I regarded them as being in Louisiana.
Q. That portion of the disputed territory lying between Malheureux point and Isle à Pitre. You know that territory do you?

A. I am acquainted around Isle à Pitre as far as Grand pass.

Q. What is that territory generally called by the fishermen and other people along this coast. Is it not called the Louisiana marsh?

A. Not there, no sir. To the south of there I think it was generally termed the Louisiana marsh.

Q. You have never heard it called Louisiana marsh?

A. No sir, not Isle à Pitre.

1703 Q. Going westward from Isle à Pitre. That portion of the disputed territory. Have you ever heard that called Louisiana marshes?

A. I don't think I have ever heard it spoken of.

Q. You have never heard it spoken of?

A. No sir.

Q. You say that you were in the oyster business for some time?

A. Yes sir.

Q. When was this. About?

A. I don't remember the date. Up to about 10 of 11 years ago.

Q. In what portion of the oyster territory were you engaged in fishing?

A. Shipping raw oysters from Mississippi City. I had them brought in there and planted there in the summer and shipped them in the winter.

Q. Did you engage in shipping oysters or in transporting them from one portion of this territory to the other?

A. I bought them from the boats. I don't know where they got them from. They fished on what is called Telegraph reefs and sometimes Creole gap, and sometimes west of that.

Q. You know that only by hearsay?

A. Yes sir that is all.

Q. You had no personal knowledge of it?

A. No sir. I paid so much a barrel for planting.

Q. You are still living at Mississippi City?

A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. You state that you had never heard the marshes spoken of. You did not mean to state that you had never heard of them?

A. I never had heard Isle à Pitre spoken of as the marsh.

Q. You know where the marsh is?

A. Well I have sailed along on what is called the Louisiana marsh. That portion of the marsh south of the mouth of Turkey bayou. I would hear some talk occasionally since this matter has come up between Louisiana and Mississippi and I always had had a chart at my house and I gave them an idea of the boundary line, across south of Brush island. I think a little below the mouth of Turkey bayou. That is my opinion.

Q. I believe you stated awhile ago that you had been as far down as Brush island?
A. Yes sir, and Martin island.
Q. Were you taking oysters?
A. No sir, I was on my way to Chandeleur island.
Q. That is at the time you were looking after the cattle?
A. Yes sir. I passed backwards and forwards in a light draft schooner.
Q. You would come up this way and through Grand pass?
A. Yes, sir, it is not such a heavy sea that way.
Q. How far is it from Mississippi City to the Chandeleur islands?
A. I always called it 32 miles on a direct line.
Q. Were you ever a member of the board of supervisors of your county?
A. No sir.
Q. Did you ever hold any office in your county at any time?
A. I was county surveyor.

Cross-examination.

By Col. ZACHARIE:

Q. I point out to you on this *pro-forma* map, not yet offered in evidence Turkey Bayou, Johnson bayou and Grand pass. I understood you to say in reply to the questions of the counsel for Mississippi that you regarded this territory south of these mouths as being the Louisiana marshes?
1704 A. Yes sir, that is my opinion. I can not — that is based on any thing.
Q. Is it not a fact that the territory to which I have just alluded is generally called amongst the fishermen and amongst the people along the coast as the Louisiana marshes?
A. I think so sir.

Redirect examination.

By Mr. MCCLURG:

Q. You have heard of the Florida parishes in Louisiana too have not you?
A. No sir.
Q. You never heard about that?
A. No sir.

By Mr. MCCLURG: The counsel for the State of Mississippi offers and introduces in evidence on the part of the State map B. to which is attached the following certificate.

"Department of Commerce and Labor.

Coast and Geodetic Survey.

WASHINGTON, June 8th, 1904.

Certificate.

A portion of the composite chart published by the Coast and Geodetic Survey in March 1904, composed in parts of charts Nos. 190, 191, 192; was enlarged by photography on bromide prints. Tracings were then made of the shore lines, by title, scale and miles and lettering from which paper negatives were made. The prints composing this map were then made from these negatives and assembled. This made is therefore a true copy of these four photographs from the above described chart. The small area not shown on said chart in the vicinity of the lettering of the — was added to the copy of said chart from surveys by the United States Land Office before the enlargement was made.

I certify that the above is a true statement.

A. L. BALDWIN,
Computer, Coast and Geodetic Survey.

Said map is further identified by the following.

"The southern boundary line of the State of Mississippi was certainly and indisputably fixed and designated by section 2, chapter 23 of the acts of the Congress of the United States creating said State and approved March 1st, 1817, found in vol. 3, p. 348 of the Statutes at Large as follows— Be it further enacted, that the said State shall consist of all the territories included within the following boundaries to wit: Beginning on the River Mississippi at a point where the southern boundary line of the State of Tennessee strikes the same; thence east along said boundary line to the Tennessee river; thence up the same to the mouth of Bear creek; thence by a direct line to the northwest corner of the county of Washington; thence due south to the gulf of Mexico; thence westwardly including all islands within six leagues of the shore to the most eastern junction of Pearl river with Lake Borgne; thence up said river to the 31st degree of north latitude; thence west along the said degree of latitude to the Mississippi river; thence up the same to the beginning."

A copy of said map is now furnished to the counsel for the State of Louisiana.

To which offer counsel for Louisiana excepts and objects in
1705 so far as the matters contained in the certificates relate to the fixing of the boundary, on the ground that the endorsements or certificates thereunto attached, that is to said map, are inadmissible as shown because declarations on the part of a subordinate officer

e Coast and Geodetic Survey Department, contained in the cer-
ates thereunto attached. That said map could only be admis-
e if at all on the person preparing said map being introduced as
tness and being subjected to cross examination as to the reasons
grounds upon which the declarations are based " That the south-
boundary lines of the State of Mississippi was certainly and in-
utable fixed etc.," that being a question of law and not a ques-
which can be certified to *ex-parte* by the cartographer. Counsel
he State of Louisiana do not object to the admission of the map
ed to prove *rem ipsam*, that such map was prepared by a sub-
nate officer of the Const and Geodetic Survey at the request of
Mississippi counsel showing the territory in dispute, and also
ing the claims of the State of Mississippi as evidenced by the
ines delineated thereon, but counsel for Louisiana excepts and
cts to the offer in evidence of this map for any other purpose,
t or effect other than as proof of *rem ipsam*.
unsel for Louisiana do not object or except to the admission of
map in evidence on account of non-authentication, but to the
ntary statements of the cartographer contained in the certifi-
annexed thereto, and except as to this voluntary statement the
is admitted to be admissable.
is agreed by counsel for the State of Mississippi and Louisiana
the counsel of Mississippi shall have delineated in a blue line
oundary line as claimed by the State of Louisiana, this being
only *pro forma*, involving no admission on either side.

Adjournment at Bay St. Louis	

1709 In the Supreme Court of the United States.

THE STATE OF LOUISIANA
vs.
THE STATE OF MISSISSIPPI. } Original Cause, No. —.

Pursuant to adjournment at the club house of the Biloxi Yacht Club at Biloxi Mississippi, on the 25th, day of June 1904. the commission on the part of the State of Mississippi met on this 8th, day of August 1904, at the court room in the city of Bay St. Louis Mississippi, and proceeded to take testimony on the part of the State of Mississippi in this case.

Present: Hon. William Bullard, commissioner on the part of the State of Mississippi. Frank M. Peyton, official stenographer on the part of said State. Hon. John Dymond Jr., and Col. F. C. Zacharie on the part of the State of Louisiana, associate counsel, and, Hon. Monroe McClurg, of counsel for the State of Mississippi.

GEORGE P. HEWES, a witness introduced on the part of the State of Mississippi, being duly sworn, testified as follows :—

By Gen. MCCLURG :

Q. Mr. Hewes, where do you reside?
A. Gulfport, Mississippi.
Q. How old are you?
A. 36 years old.
Q. Gulfport is in Harrison county?
A. Yes sir.
Q. I understand that you were born and raised in that county?
A. I was sir.
Q. Have you ever held any office in that county?
A. Yes sir.
Q. What?
A. Sheriff of the county from 1896 to 1900.
Q. Do you mean to say from the first Monday of January 1896 to the first Monday of January 1900?
A. Yes sir, and I was representative in the legislature from 1900 to 1904.
Q. Of course you mean Harrison county, Mississippi?
A. Harrison county, Mississippi.

Q. In this suit Mr. Hewes by the State of Louisiana against
1710 the State of Mississippi respecting the water boundary between the two States it is charged substantially that owing to the difference in the laws between the two States regulating the oyster industry and in providing penalties in the different States for a violation of these laws much confusion has resulted. That citizens of the State of Mississippi in violation of the laws of the State of Louisiana have been fishing oysters with dredges in the natural reefs of the waters of Louisiana under claim that they were in the waters of the State of Mississippi and that at the time of filing this bill in October 1902 affairs had reached such a crisis that to avoid an armed conflict between the sheriff and officers of the parish of St. Bernard in the State of Louisiana and the sheriff and officers of the county of Harrison in the State of Mississippi a meeting of the citizens of Louisiana was called by the governor of that State, and certain proceedings were had by that public meeting, which resulted in resolutions calling upon the governor of the State of Mississippi to appoint a commission to act with a like commission appointed by the governor of the State of Louisiana to consider the determination of the water boundary line between the two States and arrange for its easy location and identification by a proper system of buoys. I will thank you to state to the commission if during the time that you were sheriff of Harrison county Mississippi from the 1st, Monday of January 1896, to the 1st Monday of January 1900 you had any knowledge or information of any serious contention, or of any crisis, or of any threatened armed con-

flict as mentioned in the bill of complaint from which I have taken my question, and if you have to state it?

A. Well during my incumbency of the office of sheriff I never heard of the slightest contentions existing between the people of Harrison county and those of Louisiana in reference to the fishing of oysters in Louisiana or in Mississippi.

Q. Were you ever called upon in any manner as one of the civil officers of Mississippi to quell any riot or other disorder between the citizens of Harrison county Mississippi, and the citizens of St. Bernard parish Louisiana?

A. I was not. I never heard of any difference at all between the two States with reference to the oyster question.

Q. Can you say whether there was ever any appeal to the law of this State to settle any controversy over the State line at all?

A. None that came to my knowledge sir.

Q. I understand you to say Mr. Howes that you were raised in Harrison county?

A. Yes sir.

Q. If at any other time than the time that you filled the sheriff's office you had any information as to any controversy between the citizens of Louisiana and the citizens of Mississippi over any part of either State respecting the boundary line between the two State in the waters of the Gulf or the Mississippi sound state what it was?

A. I never heard anything, save what I have read in the news papers sir.

Q. Except what?

A. What I have read in the newspapers.

Q. Was that all since the institution of this suit?

A. Well the most of it has been since the institution of this suit.

Q. During the time that you were sheriff or prior to that time, as far back as you may know or recollect state if you can what the southern boundary line of Harrison county is and has been?

A. Well generally I have always understood it to be 18 miles out in the Gulf, from say the southern boundary line.

Q. You mean to say 18 miles from the shore?

A. From the shore yes sir.

Q. Please state whether or not according to your knowledge and information on the subject the authorities of the State of Mississippi, I mean by that of course to say the civil authorities of Harrison county, State of Mississippi, have claimed sovereignty

1711 and jurisdiction on the part of the State of Mississippi exercised through the officials of Harrison county as extended to the 18 mile limit of which you have just spoken?

A. I cannot say sir that I have any definite information as far as that is concerned except that I have stated. It has always been generally understood as far as I knew that Mississippi claimed 18 miles out there as the jurisdiction that the State of Mississippi had.

Q. During the time of your term as sheriff were there made any

rests in the enforcement of the rules and regulations of the oyster dustry by the board of supervisors of your county or by the laws the State of Mississippi?

A. I cannot recollect now a single arrest with reference to the elation of the oyster law during that period.

Q. Can you say how far out to the south of Harrison county the izens of Mississippi have been taking fish and oysters?

A. I can not sir.

Q. During your whole life have you had any information or owledge of any claim on the part of the State of Louisiana up to e beginning of this suit that the deep water channel running from e eastern junction of Pearl river with Lake Borgne, out north of alf Moon island through Mississippi sound, north of Isle à Pitre, uthwest of Cat island, through Cat Island pass and through handeleur sound, north east of Chandeleur island to the gulf of exico was the true water boundary between these States?

A. No sir, I never heard what Louisiana claimed as the boundary tween Louisiana and Mississippi out there.

Q. State please whether you ever heard any discussion prior to e filing of the bill in this case as to where the boundary line be- een the two States was?

A. I have not. That is the first time I ever heard any discussion the question.

Q. Your statement that it extended out 18 miles, you have said I lieve was the general understanding?

A. Yes sir.

Q. In your county?

A. Yes sir.

Q. Were you ever a member of the board of health or of the arantine board of your county?

A. No sir.

Cross-examination.

By Mr. DYMOND:

Q. Mr. Howes, what relation are you to Mr. F. S. Howes, the sec- ary of the Oyster Commission of Mississippi?

A. He is my brother sir.

Q. I understand you were the sheriff of Harrison county from nuary 1896 to January 1900?

A. Yes sir.

Q. Well if a meeting was held in New Orleans on the 19th of nuary 1901, at which the governor of Louisiana was requested to point a commission to confer with a similar commission on the rt of the State of Mississippi, to be appointed by the governor of t State to try to determine the boundaries, was not that after you d ceased to be the sheriff of Harrison county?

A. It was.

Q. Now after you had ceased to be the sheriff of Harrison county

were you as closely identified with the political and public affairs of the county as you had previously been?

A. No sir, not necessarily.

Q. Harrison county includes what cities or coast towns as the principal towns?

A. Biloxi, Mississippi City, Gulfport, Long Beach and Pass Christian.

Q. As I understand it from an oyster point of view Biloxi
1712 is the principal of these coast towns, is not it?

A. Yes sir, by far in that business.

Q. Did you ever in your incumbency as sheriff have occasion to hear any of the oyster fishermen of the State of Mississippi complain in regard to their being excluded from what is called the Louisiana marshes?

A. No sir, not during my incumbency.

Q. Did you have occasion to talk with them at all?

A. I suppose in holding a public office that I did occasionly meet some of them.

Q. If witnesses on the part of the State of Louisiana had testified that by direction of the police jury of the parish of St. Bernard of Louisiana, an expedition had been sent out and the Mississippians had been warned to keep out of what is called the Louisiana marshes you would not be prepared to deny that as a substantial fact would you?

A. I would not of course. I have no knowledge of it at all. I could not deny it of course.

Q. Those things might have happened without your knowing it and without those people reporting that fact to you?

A. Undoubtedly it could have happened.

Q. You know Judge Neville do you not?

A. Yes sir, I do.

Q. About 1898 what position did he occupy? Can you recollect from memory?

A. I think about 1898 Judge Neville was our circuit judge of this district.

Q. Was he at any time prior to that the district attorney of either Hancock or Harrison counties?

A. He was district attorney for a number of years for this district yes sir.

Q. Did that include Harrison and Hancock counties?

A. Yes sir.

Q. Did you have any talk with Judge Neville in regard to his visiting the State of Louisiana and conferring with the district attorney of the parish of St. Bernard in regard to this conflict as to the rights of the oyster fishermen of the respective States?

A. I have no recollection of having had any conversation with him about it.

Q. He never told you any thing about that so far as you know?

A. No sir.

Q. Now in regard to this question of boundary limits Mr. Howes as I understand it you say you have always understood that Mississippi's limits extended 18 miles south of her coast line. Was not that due to the fact that the constitution of Mississippi so described her limits as including all islands within 18 miles and that the act of Congress creating Mississippi also so described it?

A. I presume so. It was simply as far as I know the general accepted idea that Mississippi had jurisdiction 18 miles out there.

Q. You were not personally acquainted with what the act of Congress creating the State of Louisiana contained were you?

A. No sir, I was not.

Q. Now in your capacity as sheriff of the county of Harrison were you aware of the fact that there were lands south of the coast line and within 18 miles of the coast line of Mississippi?

A. That there were lands south?

Q. Yes sir.

A. Yes sir, I considered Ship island—as I understood it Mississippi had the right even there to follow criminals over there and return them. That certain jurisdiction was ceded to the United States in Ship island.

Q. Was Cat island within the limits of Harrison county?

A. Well I could not say. Yes sir, it was considered within the limits of Harrison county. It was assessed in Harrison county and the taxes were collected on it in Harrison county.

Q. How far westward did the Harrison County line extend?

1713 A. Well I can only tell you as far as I know that the dividing line is to Bay St. Louis. The bay of St. Louis divides Harrison and Hancock counties, as I understand it.

Q. If that line was projected south would it not go westward of the eastern end of Isle à Pitre?

A. I could not tell you Mr. Dymond. I don't know.

Q. As a matter of fact was not Isle à Pitre ever assessed on the assessment rolls of the county of Harrison and taxes collected by you while you were the tax collector?

A. I think not sir.

Q. As I understand it no occasion prior to this oyster dispute has arisen so far as your knowledge goes which would call into question the jurisdiction or the rights and powers of the respective States?

A. None at all sir.

Q. Are you aware of the channel that runs from the mouth of Pearl river southeasterly through Mississippi sound, through between Cat island and Isle à Pitre, and northeast of the northern end of Chandeleur islands. Do you know of such a deep water channel?

A. I don't know anything about that.

Q. You are not well acquainted with the waters of the Mississippi sound?

A. No sir, not that part of it.

Q. Now you have been living on the coast for a considerable length of time have you not?

A. Yes sir.

Q. You know this territory that is just south of this shore line here don't you? The marshes?

A. Why I have sailed around it there to some extent. I can not say that I am familiar with it sir.

Q. What were they commonly called Mr. Hewes. Common ordinary parlance. When the mosquitoes came from that section what did you generally call that section of the country?

A. Why I have heard them speak of the mosquitoes from the Louisiana marshes. From the marshes.

By Col. ZACHARIE:

Q. Mr. Hewes this suit was filed in October; the bill in this suit was filed in October 1902. Did you or did you not hear prior to the filing of this bill threats of arrest made by the officers of Louisiana, against Mississippi fishermen fishing in this disputed territory?

A. I can not say Colonel that I did, unless I had read something in the Times-Democrat or Picayune about it. Nothing outside of that.

Q. You never heard it from the fishermen or by common report?

A. No sir, nothing outside of these papers at all.

Q. Over the territory going westward were any of these lands assessed for taxes in the State of Mississippi or any taxes collected from it as a part of Harrison county?

A. I think not sir.

Q. I think you stated in cross examination to Mr. Dymond that you had never read the clause relating to the southern boundary of the Mississippi shore?

A. Of Louisiana?

Q. No of Mississippi. Either under the constitution or act admitting the State of Mississippi into the Union?

A. No sir, I think I have read it. It was in reference to Louisiana that he asked me. It was in reference to the southern boundary of Louisiana. In Mississippi I think that the southern boundary is fixed at 18 miles.

Q. Now that article in your constitution of your State and also in the act admitting the State of Mississippi into the Union says starting at a point near Pascagoula and then going westwardly including all islands within six leagues. You did not understand, and was it the general understanding or not, that all along this
1714 shore that the jurisdiction of Mississippi extends 18 miles out into the Gulf or sound except where there are islands?

A. I think sir the general acceptation of that is by the people that the jurisdiction of the State of Mississippi extends out 18 miles into the sound from the sea shore.

Q. That after a consultation of the constitution of the State of

ssissippi and the act admitting the State of Mississippi into the ion?
A. Yes sir.
Q. Then according to your testimony you simply say that you ard of no threats of arrest on the part of the Louisiana authorities ere during your term of office before the institution of this suit cept what you saw in the New Orleans papers?
A. Yes sir, exactly so.
Q. But you did see that in the New Orleans papers?
A. I won't say that I saw that prior to the institution of this suit, t I remember reading considerable about it about the time of the titution of the suit, or either prior or subsequent to it I won't say ich.

Redirect examination.

By Gen. McCLURG:

Q. Mr. Dymond asked you Mr. Hewes about land taxes in the sputed territory. You states that you never collected any. Do u know whether or not the marine tax or taxes on the crafts or its of different kinds has been collected by your county and by e State for fishing out there?
A. I could not tell you anything about that.
Q. You never had anything to do with that?
A. No sir.
Q. Nothing to do with the collection of these taxes?
A. Nothing at all.
Q. He also asked you about any knowledge you might have as to y armed conflict after you went — of the office. Did I under- nd you to say that you went out of the office on the 1st Monday January 1900?
A. Yes sir.
Q. The meeting to which I call your attention called by the citi- ns of Louisiana and presided over by the governor was on the th day of January 1901, about a year after you went out of office. there had been such a conflict between the citizens of Louisiana d those of Mississippi, as to threaten an armed conflict would you kely have known it?
A. I think I would sir.
Q. Where did you live from 1900 to 1901?
A. Well after the 1st of May 1900 until 1901 I was living in Gulf- rt.
Q. Who was your successor in the office of sheriff?
A. Mr. A. J. Ramsey.
Q. You said some thing about the mosquitoes from the Louisiana arshes. Did you ever hear of the Grand marsh?
A. Yes sir, I have heard of that too.
Q. Where is the Grand marsh?
A. I don't know sir. I could not tell you where that is.

Q. What direction is it from the Mississippi shore?
A. Southwest I think. I see it on the map over there.
Q. In the neighborhood of what you heard called the Louisiana marshes?
A. Yes sir, in the same neighborhood. The map shows it is southwest out here.

A. J. RAMSEY, a witness introduced on behalf of the State of Mississippi, being duly sworn testified as follows to-wit:

By Gen. McCLURG:

Q. What is your name?
1715 A. A. J. Ramsey.
Q. Where do you reside Mr. Ramsey?
A. Mississippi City.
Q. That is in Harrison county I believe?
A. It is in Harrison county, yes sir.
Q. How long have you lived in Harrison county?
A. Well I was born and raised in that county.
Q. How old are you?
A. I am 64 years old.
Q. Have you ever held any offices or official positions in Harrison county and if so I wish you would tell us what they were?
A. Yes sir, I held the office of sheriff. I was elected in 1871 and went out in 1878, and then I was elected to the legislature and served one term in 1878, and within the last four years, 1899 I ran again for the office or sheriff and was elected again. Of course I went out the 1st of this last Jnauary.
Q. What office were you elected to then?
A. I was elected circuit clerk then and I am holding that office now.
Q. You were the sheriff of Harrison county from the 1st Monday in January 1900 until the 1st Monday in January 1904?
A. 1904, yes sir.
Q. In this suit of The State of Louisiana *vs.* The State of Mississippi respecting the water boundary line between these two States, the bill of complaint on the part of the State of Louisiana states substantially, that because of a difference in the laws of the two States regulating the oyster industry and providing penalties for a violation of these laws, much confusion had resulted up to the time of filing this bill in October 1902, October 27th 1902, and that there was a demand in the State of Louisiana to have the boundary line dividing the States marked. That this difference between the citizens of the State of Louisiana and the citizens of the State of Mississippi had reached such a condition or crisis, that to avoid an armed conflict between the sheriff and officers of the parish of St. Bernard, Louisiana, and the sheriff and officers of Harrison county, Mississippi, a public meeting was called by certain citizens of

Louisiana and presided over by her governor, and a commission was appointed to consider the determination of the water boundary line between the two States and to arrange for its easy location and identification, and the governor of Mississippi was requested to appoint a similar commission. Now what I want to direct your attention to is whether during your incumbency from the 1st Monday of January 1900 to the 1st Monday of January, 1904, you knew of any threatened armed conflict, or any crisis impending between the officers of St. Bernard parish Louisiana and the sheriff and officers of Harrison county, Mississippi?

A. No sir, I never. I don't remember to have ever heard of it.

Q. Had you any information of any trouble over the State line before the filing of this bill?

A. None in the world.

Q. Had you arrested anybody for violating the Louisiana laws or the Mississippi laws?

A. No sir.

Q. Did you ever know of any warrants being issued in this State for a violation of those laws?

A. I don't think there were ever any placed in my hands.

Q. Have you any sort of information of any kind whatever of the condition which I have stated to you, and I state it from the bill of complaint filed by Louisiana in this matter?

A. No sir.

Q. It is further stated in this bill of complaint, Mr. Ramsey, that the true boundary line between these two States is what is marked on the map as the sailing line, and what is termed in this bill of complaint the deep water channel, that comes out of the eastern mouth of Pearl river, north of Half Moon island, through the Mississippi sound to Cat Island pass northeast of Isle à Pitre into the gulf of Mexico, northeast of Chandeleur islands. Have you any knowledge or information whatever as to the sailing channel or deep water channel being the true dividing line between these two States?

716

A. I never heard of it.

Q. Tell us what you may know of the south boundary of Harrison county and the State of Mississippi?

A. Well it reads that it is 18 miles from the shore. The southern boundary of Mississippi.

Q. You mean both of the county and State?

A. Yes sir.

Q. How long would you say that has been recognized as the southern boundary line of Harrison county and the State of Mississippi?

A. Well I don't remember. I have read it you know.

Q. Sir?

A. I don't remember how long, but I have always heard that you know. I think that the law says so. That is my impression at least.

Q. How long have the people of Harrison county so far as you are able to speak regarded that as the southern boundary line?

A. I suppose ever since it has been a State. I don't know any thing to the contrary.

Q. Were you ever a member of the board of supervisors of Harrison county?

A. No sir.

Q. Of the board of health?

A. No sir.

Q. Can you say whether or not there have been any revenues collected for crafts of different kinds, for taking oysters and fishing in the waters in front of Harrison county?

A. You mean whether the license was issued?

Q. Yes sir?

A. Yes sir, I have a record of that in my office. I think it was about three years. I disremember now. 1901, 1902 and 1903 I think.

Q. How far from the shore did these boats take oysters under that license?

A. Well I could not tell you that. I don't know.

Q. You could not state of your own knowledge?

A. No sir.

Q. Ship island is to the front of Harrison county is it not?

A. Yes sir, to the south.

Q. How far?

A. I think that it is about 12 miles from the shore. I believe it is about that.

Q. Do the officers of Harrison county exercise jurisdiction over Ship island?

A. Well they do I think. When the crime is committed on the shore and the parties go to Ship island, he has a right to follow them up and take them out there.

Q. How is that?

A. When a crime is committed on the shore—it belongs to the Government I think.

Q. Well there is a military reservation on the western end of the island?

A. Yes sir, I know I started out there to make an arrest once, but the fellow had left is the reason I did not get him.

Q. You felt that you had the right to serve the process of the State on this island?

A. Yes sir, the crime was committed on the shore here.

Q. Do you know where Cat island is?

A. Well I see it every day.

Q. Is it to the front of Hancock or Harrison county?

A. No sir, it is in Harrison county.

Q. How far is it from the shore?

A. I don't know the distance. I think it is six or eight miles from Pass Christian. I believe that is the nearest point.

Cross-examination.

By Col. ZACHARIE:

Q. You stated Mr. Ramsey that you never heard any ap-
17 prehension of an armed conflict between the officers of the parish of St. Bernard in Louisiana and the officers of the unty of Harrison. Did you not from time to time hear reports om the fishermen that they were threatened with arrest by the of-ers of St. Bernard parish for fishing in these waters?
A. I never. I don't remember to have heard of it sir.
Q. Do you know that territory that lies west of Isle à Pitre? Do u know where Isle à Pitre is?
A. Isle à Pitre is *sorter* south of Cat island I think.
Q. It is to the south and westward. That territory that lies to e westward there. What is that territory generally known nongst the people along this Mississippi coast as. Would you call at the Louisiana marshes?
A. No sir, I don't know that it is.
Q. Have you not frequently heard it called that?
A. I have always heard it called Isle à Pitre.
Q. I mean the territory that is west of Isle à Pitre?
A. I have heard talk of the Louisiana marshes but my impres-on was that it was out west of there.
Q. I mean west of Isle à Pitre?
A. Maybe so. I don't know.
Q. Whenever you have a wind from the southwest don't you have squitoes with it from the marshes?
A. We have plenty of mosquitoes whenever we have a southwest nd. Not a south wind though.
Q. Do you know as sheriff, whether any of this land to the west Isle à Pitre has ever been assessed on your assessment rolls for xes?
A. I don't think it has. Cat island has.
Q. That is as far westward as lands have been assessed as belong-g to Mississippi and the taxes collected?
A. I think so. That is belonging to Harrison county.
Q. Have you ever read the constitution of Mississippi in regard its boundaries or the act admitting the State?
A. Yes sir, I have read it.
Q. Do not you remember that the southern boundary is described proceeding from a point near Pascagoula westwardly to the mouth East Pearl river including all the islands within six leagues of e shore. Now do you understand that and is it generally under-od all along the Mississippi coast that the boundary extends six gues out, or is that only the case when the islands are within six gues?
A. The waters go with the islands I believe.
Q. Suppose there are no islands at the particular point on the st. Do you contend then that it extends six leagues?

A. The location of the islands you say within six leagues?
Q. I am speaking of the open water where there are no islands?
A. I don't remember about that. I have read that I know.
Q. You have never heard during your incumbency in the sheriff's office of any trouble being threatened between the Louisiana officers and the Mississippi fishermen fishing in this disputed territory?
A. I don't remember any. Well here since they have gotton up this law I might have heard something once.
Q. How long ago did you hear this?
A. It has been within the last year I think. Some trouble.
Q. Well was it not more than a year ago, because in so far as the matter exists now there is an agreement between the two States. But prior to this agreement did you not hear of trouble brewing between them?
A. I don't remember anything. I know I never had any papers.

By Gen. McCLURG:

Q. What agreement have you reference to?

By Col. ZACHARIE:

A. I said the agreement between the oyster commissions of the two States.

By Mr. McCLURG: It is denied by Mississippi's counsel
1718 that that State is bound by that agreement. It never authorized it and never ratified it.

Redirect examination.

By Gen. McCLURG:

Q. Mr. Ramsey, I have here a certified copy made by A. J. Ramsey, clerk of the circuit court of Harrison county, dated at Gulfport on the 23rd day of June, 1904, which purports to be a copy of the record of oyster boat license, account of amounts received, F. S. Hewes, clerk of the circuit court in account with the oyster fund Harrison county Mississippi, running out sums from April 12th, 1892, to April 6th 1894. Are you the A. J. Ramsey that made this certificate?
A. Yes sir.
Q. Who was F. S. Hewes?
A. He was the circuit clerk.
Q. Before you. You succeeded him?
A. Yes sir. I succeeded him.
Q. This was taken from the official records of the office of the circuit clerks?
A. Yes sir, kept by him.
Q. And under the law at that time he was *ex-officio* collector of these taxes?
A. Yes sir.

Counsel for the State of Mississippi here offers in evidence and introduces as Mississippi Document No. 41, on the part of the State of Mississippi a certified copy of the record of oyster boat licenses for Harrison county from September 12th, 1892 to April 6th, 1894, and now hands the counsel for the State of Louisiana a true copy of said document.

The commission here adjourned until 10 o'clock tomorrow morning.

BAY ST. LOUIS, MISSISSIPPI, August 9th, 1904.

The commission met this morning at ten o'clock pursuant to adjournment on yesterday evening.

There were present Hon. William D. Bullard, commissioner on the part of the State of Mississippi. Hon. Monroe McClurg, counsel on the part of the State of Mississippi, and Col. F. C. Zacharie, and Mr. John Dymond, associate counsel on the part of the State of Louisiana. F. M. Peyton, stenographer.

F. S. HEWES, a witness introduced on the part of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. Mr. Howes, on yesterday Mr. A. J. Ramsey, clerk of the circuit court of Harrison county filed as Document No. 41 with this commission a certified copy of the official record of oyster boat licenses issued by you as circuit clerk and *ex-officio* collector of these licenses covering from 1892 to 1894. I wish you would please look
1719 at this document which I have mentioned and say whether it is a correct transcript from the official record made by you?

A. Well sir, I keep such a transcript as this.

Q. That is a correct transcript is it?

A. I turned over the books to Mr. Ramsey who was my successor. I suppose that is a correct copy of it. I can not testify to that.

Q. Where do you live, Mr. Hewes?

A. I live in Gulfport, Harrison county.

Q. How old are you?

A. Well sir I am in my 75th year.

Q. How long have you lived in Harrison county?

A. Off and on I suppose since I was ten years old. My father had a place over there when I was ten years old. I have been absent of course at times.

Q. Do you hold any official position in the county now?

A. Yes sir, I am the chancery clerk.

Q. Have you held any other office in the county?

A. I have held the office of circuit clerk also.

Q. How long have you been the chancery clerk?

A. Well sir I am in my 29th year. I was circuit and chancery clerk for 28 years.

Q. You are now on the new term of the chancery clerk?

—. ——.

Q. The offices have been separated at the last election?

A. Yes sir, they were separated at the last election.

Q. Are you the official custodian of the records of the chancery court of Harrison county?

A. Yes sir.

Q. And I believe as such you are the *ex-officio* clerk of the board of supervisors of that county?

A. Yes sir.

Q. The chancery clerk is *ex-officio* clerk of the board of supervisors?

A. Yes sir.

Counsel for Mississippi here introduced and offers in evidence on the part of the State of Mississippi a certified copy of the ordinances enacted by the board of supervisors of Jackson county at the August term, 1893, against the dredging of oysters in the waters of said county, a true copy being now handed to counsel for Louisiana, and the one filed being Mississippi Document No. 42.

And also a certified copy of the ordinances passed by the board of supervisors of Jackson county with reference to taking fish and oysters in public oyster reefs of the county, enacted by the board of supervisors of that county on the 7th day of November, 1892, a true copy of which is also handed to the counsel for the State of Louisiana, said document being marked Mississippi Document No. 43, and which is introduced and filed as evidence on the part of the State of Mississippi in this case.

And also a certified copy of the ordinance passed by the board of supervisors of Jackson county on the 2nd day of June, 1885, marked Document No. 44, and which is now offered and introduced in evidence on the part of the State of Mississippi, a true copy being handed to the counsel for the State of Louisiana.

And also as Mississippi Document No. 45, being a certified copy from the minutes of the board of supervisors of Jackson county, dated September special term 1884, an ordinance respecting a petition by the citizens of said county, asking for the protection and preservation of oysters, fish, shrimp, game, etc., which is now here offered and introduced in evidence, a true copy of same being now handed to counsel for the State of Louisiana.

1720 And also Mississippi Document No. 46 being the Rules and regulations of the board of health of Harrison county, Mississippi for the year 1877, a certified copy being now offered and filed in evidence, a true copy of which is now handed to the counsel for the State of Louisiana.

And also Mississippi Document No. 47, being a certified copy of the quarantine physicians' report of Harrison county Mississippi, dated July 22nd, 1878, and which is now offered and introduced in evidence and filed as a part of the testimony on behalf of the State

of Mississippi, a true copy of the same being now handed to the counsel for the State of Louisiana.

To which said offer by the State of Mississippi of Documents No. 40, 41, 42, 43, 44, 45, 46 and 47, counsel for the State of Louisiana excepts and for cause of exception state that the said documents are *res-inter-alios-acta*, and have no reference whatever to the area in dispute in this case, and are therefore irrelevant and inadmissible in evidence.

Q. Mr. Hewes you have stated that you are the chancery clerk and *ex-officio* clerk of the board of supervisors?

A. Yes sir.

Q. Of Harrison county?

A. Yes sir.

Q. I will ask you to examine these certificates made by you or purporting to be made by you, and see if you are the F. S. Hewes that certified to these copies?

A. Yes sir.

Q. Documents 46 and 47?

A. Yes sir, those are mine I know.

Q. I believe you have testified about the record of the licenses?

A. Yes sir.

Q. Now state, Mr. Hewes if you can where the boats which you licenses from 1892 to 1894, as shown by Mississippi Document No. 41, exercised the privilege that you granted them?

A. That is impossible for me to say where they went to. I issued it for Harrison county. It is impossible for me to say where these boats went. I issued the license for Harrison county, but where they went I could not tell you.

Q. How far does Harrison county extend from the shore line?

Q. As I understand it by the constitution and laws it extends out 18 miles from the land.

Q. Did you so understand it at the time that you issued those licenses?

A. I did not understand anything else of course. Of course I followed the laws of the State. I had no personal knowledge.

Q. When was the first time if you can recollect that you ever heard any dispute of the State line between Louisiana and Mississippi?

A. Well I could not call the years. It is not many years back though.

Q. Before or since the filing of the bill in this case?

A. Oh, I expect I heard of it before the filing of this bill.

Q. That bill was filed on the 27th of October 1902?

A. Well sir I suppose that I heard that there was such a contest before the filing of the bill. I suppose that I heard that the contest would be made before the filing of the bill.

Q. Would you undertake to say how long before?

A. No sir, I can not recollect that General.

Q. Can you say whether it was shortly before, or some time before this suit was brought?

A. Well it was some time before. I have no idea of the time. I merely heard the talk of it of course.

Q. Well just as near as you can approximate it about how long ago would you say you first heard about this controversy?

1721 A. It is impossible for me to fix any date, because I don't recollect any thing about it. It is impossible for me to fix the date. I heard it rumored and talked about, but when I don't recollect. Not many years ago though.

Q. Well I understand you to say that you have lived in Harrison county ever since you were about ten years old?

A. Off and on, I went away at times, during the war and to Texas and California and so on. This was my home here and my father and family lived here.

Q. You have stated what has been considered the boundary line of the county. Now do you understand that that has been the boundary line of the State also?

A. I understand so from the constitution of the State and laws of the State.

Cross-examination.

By Mr. DYMOND:

Q. Mr. Hewes, when you spoke of rumors in regard to this contest concerning the boundary, could you recollect from what source those rumors first came to you. Was it not from the oyster fishermen?

A. No sir, I think it was merely from publications that I saw in the papers.

Q. In the papers?

A. Yes sir.

Q. Were you brought in close contact with the fishermen in 1898?

A. No sir, except in officially issuing these licenses, I was not in contact with them at all.

Q. Did you hear any thing about the police jury of the parish of St. Bernard, which corresponds with your board of supervisors, had sent out an expedition to prevent the Mississipians from fishing in the parish of St. Bernard?

A. I read it in the papers of such an expedition.

Q. At what time?

A. I don't recollect the date sir. I am a poor hand on dates.

Q. If you can recollect some such expedition, would not some comment be made in the local papers when these people returned from that section?

A. Well *there* was probably so, but I don't recollect any thing about it.

Q. Your memory is not clear on these things?

A. No sir, I never paid much attention to these things. I would read them and that is all. I had no interest in it personally.

By Col. ZACHARIE:

Q. Mr. Howes, you say that you always understood under the laws
l constitution of the State of Mississippi that the boundary line
ended 18 miles south of the shore, the southern shore of Missis-
pi?

A. I understood it begun at the east end of the State and run
tward, including all of the islands within 18 miles of the shore,
ix leagues.

Q. This is the language on that point taken from the cross bill
hence due south to the gulf of Mexico, thence westwardly in-
ding all of the islands within six leagues from the shore," and
you interpret it as the whole line extended out six leagues from
shore, or did you interpret it only as including such islands as
within six leagues?

A. I always interpreted it as extending due south six leagues all
ng the shore.

Q. Did you understand it to include the portion of the shore
rked upon the maps as the parish of St. Bernard in the State of
isiana?

A. I really don't know any thing about that map at all. I never
examined it.

2 Q. You know the peninsula or archipelago that juts out
some nine or ten miles south of Mississippi there don't you?

A. You mean including Isle à Pitre?

Q. Yes sir?

A. Yes sir, I have been out there.

Q. What has that territory been commonly known as?

A. Well sir, it has been known as the Louisiana marsh, and I
e heard it called the Grand marsh.

Q. Did you ever hear any contention previous to this suit that
portion of this particular territory was embraced within the
te of Mississippi?

A. I never heard any discussion about it previous to this suit at
The lines were not known definitely you know.

Q. Now in regard to the islands. Were you aware of the fact
t under the act admitting the State of Louisiana into the Union,
State was given all islands within three leagues of her coast?

A. Colonel, I don't recollect that law at all. I don't think that I
r examined it.

Q. Now of these licenses about which you have testified. Those
nses were only issued from the home port of the vessel were not
y? Where they hailed from?

A. No sir, there were some vessels I think that hailed from Mo-
that have license to fish there.

Q. Then it was to take fish out of the waters of Harrison county
ou understood it?

A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. Mr. Dymond, asked you about this expedition sent out from St. Bernard parish. You said that you had some recollection of hearing of it?

A. I read about it.

Q. Well can you say whether that was an expedition that was sent out after the institution of this suit or before it?

A. I could not tell you General. I don't recollect any thing about it.

JOSEPH F. CAZENEUVE, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. McCLURG:

Q. Where do you live?

A. Bay St. Louis.

Q. How long have you lived here?

A. 48 years.

Q. How old are you?

A. 48.

Q. Have you ever held any office in the State of Mississippi in this county?

A. Yes sir.

Q. Hancock county. What place?

A. I was deputy sheriff, and sheriff and tax collector.

Q. When were you deputy sheriff first?

A. I began on January 22nd, 1880.

Q. How long did you serve as deputy?

A. I served nearly four years.

Q. When were you elected sheriff?

A. In the fall of 1883 at the election.

Q. And you went into office?

1723 A. In 1884.

Q. The first of January 1884?

A. Yes sir.

Q. And you served how long?

A. I held continuously until the late change.—I went out in 1896, January 1st, and then I was out four years, and went in four years, and come out last January again.

Q. You went out January 1st?

A. January 1st, 1896, and went back on the 1st Monday of January 1900.

Q. And you served until the first Monday of January 1904?

A. Yes sir.

Q. So then you were deputy sheriff when?

A. From January 22nd, 1880. I was in the sheriff's office then until the 1st of January 1904, with the exception of four years.

Q. And in the interim you lived here in Bay St. Louis?

A. Yes sir, here in Bay St. Louis.

Q. It is alleged in this bill of complaint filed by Louisiana against the State of Mississippi—filed on October 27th, 1902, by the State of Louisiana against the State of Mississippi, that because of differences in the laws of Louisiana and Mississippi that there had been contentions between the citizens of the two States and that at the time of the filing of this bill, as stated in the 17th paragraph of the bill, that affairs had reached such a crisis that in order to avoid an armed conflict between the sheriff and officers of the parish of St. Bernard in the State of Louisiana, and the sheriff and officers of the county of Harrison in the State of Mississippi, a meeting of the citizens of the State of Louisiana was called by the governor of that State, when certain resolutions were passed at that meeting by the Louisiana citizens, to consider and determine of the water boundary line between the two States and arrange for its easy location and identification by a proper system of buoys, and they also appointed five commissioners and requested Governor Longino of Mississippi to appoint a like number to carry out the objects of that resolution they had passed. I call your attention to that with a view of asking you if at any time before the 27th of October 1901 you know of any threatened armed conflict between the sheriff and officers of the parish of St. Bernard and the sheriff and officers of Harrison county, Mississippi?

A. I never heard of it sir.

Q. Was there any trouble duing the time you were sheriff of Hancock county?

A. Never sir.

Q. You never heard of any thing to that effect?

A. No sir, I never heard it, and I never was requested to see about any thing.

Q. Can you say whether there has ever been any disturbance by the officers of Hancock county or any of the officers of St. Bernard parish while you were in there, or any other parish?

A. None during my term of office. From 1880 to 1904, with the exception of four years. That four years I can not answer for, but the rest I can.

Q. Do you know whether there was any dispute before the bringing of this suit as to the boundary line or not?

A. No sir, I saw the bringing of the suit is all. I never heard of any before.

Q. During your incumbency of the office of sheriff and as deputy sheriff how far from the shore here to the southward did the officers of this county and the State exercise jurisdiction or State sovereignty?

A. Well I never had to go very far. I had gone out on the sound here, but I don't think I ever went more than a half a mile or a mile probably. I have gone out there and taken men off of vessels but never any further than that.

Q. Have you any information or knowledge as to what w
garded as the limit of the county and State in the water?

1724 Counsel for the State of Louisiana objects as the w
has already disqualified himself to answer the question
he therefore excepts to the question.

A. Well I did not know where the line was only I heard w
it was. Of my own knowledge I did not know. I never had
occasion to go to the limit.

Q. You never heard the State line discussed before the brin
of this suit?

A. No sir.

Cross-examination.

By Mr. DYMOND:

Q. Were you sheriff in 1898?

A. No sir.

Q. Were you deputy at that time?

A. No sir, I was out altogether. I left on the 1st Monday of J
uary 1896, and did not come back until the 1st Monday in Janu
1900.

Q. Therefore in 1897, 1898, and 1899 you were not in the office
sheriff either as sheriff or deputy?

A. No sir, Mr. Ladnier was the sheriff then.

Q. Were you acquainted with Judge Neville over here?

A. Judge James H. Neville, yes sir.

Q. You knew him to be the district attorney of this district?

A. He was district attorney while I was sheriff.

Q. Was he district attorney in 1898?

A. I don't remember sir whether he was or not. I don't know
I think he was when I came out of office. I am not sure. I think
he served as long as I was in office the first time and then he re
signed. I don't think I served in my first term under Neville.
am not sure. Yes sir, I served under him in my first term.

Q. In 1896?

A. Neville was then district attorney. I went out on the 1st
Monday in January 1896. I don't remember whether he was then
or not, but my recollection is I think as long as I was in the office
there the first term he was there. That is including the year 1895.

Q. He had been district attorney previously had not he?

A. Yes sir.

Q. For how long a time?

A. I don't remember that, but it must have been; I don't know,
he might have been district attorney two terms. Eight years I
think.

Q. You think that he was district attorney eight years?

A. That is my impression sir.

Q. He was known among the people as the district attorney?

A. Oh yes sir.

Q. He had that reputation?

A. Yes sir.

Q. Did you know or ever hear that he had made a visit to the parish of St. Bernard to see the district attorney of the parish of St. Bernard of the State of Louisiana in regard to the stopping by the officers of St. Bernard parish of the fishermen, Mississippi fishermen, from fishing in the parish of St. Bernard?

A. No sir, I never heard of that.

Q. He never reported that fact to you?

A. No sir.

Q. You would not be prepared to dispute the fact that he had gone there?

A. I don't know any thing about that.

Q. And had conferred with the district attorney?

A. No sir, I could not say any thing about that. I know that he never told me any thing about it.

Q. If any thing of that sort occurred in 1898 you were not 1725 then the sheriff of this county?

A. No sir.

By Col. ZACHARIE:

Q. You have stated that you never heard of any dispute about this boundary line until after the institution of this suit. Had you not heard of the appointment of the two boundary commissions. One on the part of the State of Louisiana and one on the part of the State of Mississippi to try and adjust this dispute?

A. I heard of that. What I mean is this was all about the same thing. I heard about that yes sir.

Q. Well according to the record the meeting of these two boundary commissions took place on January 19th 1901. Now this bill in equity was filed in this suit in October 1902?

A. Yes sir.

Q. Now these two boundary commissions met about twenty months before the institution of this suit?

A. Yes sir.

Q. Then you are mistaken in saying that you never heard of this dispute?

A. What I mean is I did not hear anything of it until this commission was on; until it was appointed. I heard that of course like every other citizen did, and then when I answered Mr. McClurg I mean that. Of course I heard that like everybody else did. That is the first I heard.

Q. You never knew of any threats on the part of the officers of St. Bernard parish of the State of Louisiana to arrest Mississippi fishermen fishing in these waters?

A. No sir, I did not. If they did I never heard of it. Of course I don't say that was not done you know, but if it was I did not hear of it.

Q. What is the territory extending westwardly from Isle à Pitre commonly called by the people along this Mississippi shore. Extending westwardly from Isle à Pitre. Was not that called the Louisiana marshes generally?

A. Well I don't know where the line is. I don't know that I have ever been to Isle à Pitre.

Q. I am now speaking of the peninsular or archipelago that extends from Isle à Pitre, that is the island just west of Cat island, and then extending westwardly—is that territory not known as the Louisiana marshes?

A. I don't know sir. I could not say that. I have heard a good deal said about Louisiana marshes, but where it starts I don't know. I don't know whether it is from Isle à Pitre or where. I have heard a good deal said about Louisiana marshes but where it starts I could not tell you.

Q. Was it not commonly said by the fishermen on this coast that they would get their oysters from the Louisiana marshes?

A. Well not all, no sir. Because they get lots of them out there.

Q. Did you not hear them say that?

A. I have heard some of them say they have gone to the Louisiana marshes yes sir. I think I have heard that.

By Mr. DYMOND:

Q. Captain, is it not, as a matter of fact, since the creation of the Oyster Commission of Mississippi in January 1902; that that was the first time that the State of Mississippi gave any official recognition or control of the oyster industry to a body specially designed and intended to look after the oyster industry?

A. Well I never heard of any. I don't remember the year now, but I don't think I remember of any provision before certain acts were passed.

Q. In other words in Mississippi it was very much like it was in Louisiana. Prior to the creation of the oyster commission your counties used to look after that like our parishes looked after it, and in the multitude of other duties the counties had the oyster
1726 industry did not get that supervision it needed, and that it now gets.

A. Oh no sir, it was different than; some times there was a measure. That is they adopted measures by which the oysters were to be sold and things of that kind prior to that.

Q. And there was no supervision of the industry. There were no steps taken to protect the industry or body authorized to enforce it. patrol boats, etc.,?

A. No sir, nothing that I know of.

Q. As a matter of fact there has been more consideration given to the oyster industry by the State of Mississippi since your oyster commission was created than there has been all of the years before, has there not?

A. Yes sir.

Redirect examination.

By Gen. McCLURG:

Q. And more consideration given it since Louisiana has been after it than there was before. More consideration given it since Louisiana has been trying to get it than there has been before. Is that not true?

A. I think so.

Q. Don't you know it is a fact that we have had oyster laws to protect the oysters and fish and so on in this State for at least fifty years?

A. I don't know how long. I know that there was a law here that required a stamp measure from the sheriff and so on.

Q. Those matters of law will show on the books?

A. Yes sir, the books show it. I know that we had one factory here and I had to go down there to see about it several times.

Recross-examination.

By Mr. DYMOND:

Q. Was the oyster law ever enforced before as it is now?

A. No, but it should have been I think. I think we would be better off if it had been. There was a time when every body fished just where they pleased you know.

T. J. LADNER, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. McCLURG:

Q. Where do you reside?

A. Bay St. Louis.

Q. For how long?

A. Well I have been here all of my life.

Q. How old are you Captain?

A. 48.

Q. Did you ever hold any official position in Hancock county, Mississippi?

A. Yes sir, I was sheriff of this county.

Q. Any other position?

A. Well I was an alderman of the city.

Q. When were you sheriff?

A. I was sheriff from 1896 to 1900.

Q. You mean from the 1st Monday of January 1896 to the 1st Monday of January 1900?

1727 A. Yes sir.

Q. During the time of your incumbency of the office of sheriff have you had any information of a threatened armed conflict between the officers of St. Bernard parish Louisiana, and those of

Harrison county Mississippi, or Hancock county or any other officers of Mississippi and Louisiana, and if so, I wish you would please tell us about it?

A. No sir, I have had none.

Q. You have had no such information?

A. No sir.

Q. Well have you had any information to that effect at any other time during your whole life prior to January 1901?

A. No sir.

Q. Or prior to October 27th, 1902, and if so I wish you would please state it?

A. No sir, I have not.

Q. Before the action of the people of Louisiana about January 1901 did you ever hear any dispute about the line between these two States in the waters of the Gulf?

A. Not before that time, no sir.

Cross-examination.

By Mr. DYMOND:

Q. Mr. Ladner you knew Judge Neville did you not?

A. Yes sir.

Q. Was he district attorney when you were sheriff from 1896 to 1900?

A. I think he was when I first came in if I am not mistaken. He resigned afterwards.

Q. He had been district attorney for a number of years previous to that?

A. Yes sir.

Q. What position did he hold if any after that?

A. He was circuit judge.

Q. Circuit judge of what circuit. Of what counties?

A. Harrison, Hancock and Jackson, and the other counties in that district.

Q. That is he was circuit judge of the counties that compose this district. Of the coast counties?

A. Yes sir, and some in the interior too, such as Pearl River county was included in it.

Q. Now did you ever have any occasion to talk to any of the oyster fishermen in 1898 in regard to where they were fishing?

A. No sir, I did not.

Q. Therefore you never heard any of them talk about the fact that they had been excluded or threatened to be excluded from the Louisiana marshes?

A. No sir, not at that time. Not while I was sheriff.

Q. Did you know that Mr. Neville had gone to the State of Louisiana to confer with the district attorney of the parish of St. Bernard with regard to this subject matter?

A. I did not no sir.

Q. As a matter of fact you did not know anything of these facts as they were transpiring at that time did you?

A. No sir, I did not.

Q. Did you know that the State of Louisiana had through the police jury of the parish of St. Bernard created an expedition to go out and expel these unlicensed fishermen from the Louisiana marshes in 1898?

A. No sir, I did not.

Redirect examination.

By Gen. McCLURG:

Q. Captain, it is true, is it not that Judge Neville resigned the office of the district attorney in the spring of 1896, soon after you went into the office of sheriff?

1728 A. Somewhere about that yes sir.

Q. And that Mr. Walter A. White succeeded his as district attorney?

A. He did when he resigned. I don't remember exactly when he resigned.

Q. And then Mr. Neville was a private citizen practicing law at Biloxi until he was appointed circuit judge?

A. Yes sir.

Q. And he was appointed circuit judge in 1902 was not he?

A. I don't remember exactly when it was that he was appointed.

Q. It was about 1902?

A. Yes sir, about that time.

Q. About the latter part of 1901 or 1902?

A. Yes sir, about.

Q. And he had no authority if those dates that we speak of are true, to act as district attorney in 1898?

A. No sir, not if he was not district attorney.

Q. He was not district attorney as a matter of fact in 1898?

A. No sir, I don't think he was.

Q. Nor circuit judge either?

A. Well I don't remember when he was appointed circuit judge.

Q. You don't remember that?

A. No sir.

Q. It was some time about the latter part of 1901 or 1902 that he was appointed?

A. About that time but I could not say positively.

Q. You know nothing about any conversation between him and Mr. Estopinal?

A. Who is he?

Q. He was the district attorney in St. Bernard parish in 1898?

A. No sir, I do not.

Q. And you know nothing of the mass meetings held by the citizens of Louisiana in January 1901? and in Mr. John Dymond, Jr.'s

office in New Orleans where they passed a law and regulations about this matter?

A. Well it strikes me that I did read some thing about it, but I did not take any interest in it.

Q. You have no personal knowledge of it?

A. No personal knowledge, no sir.

Q. And the causes leading after that occasion to the effect that there was a threatened armed conflict between the civil officers of Louisiana and Mississippi. You know nothing of that?

A. No sir.

Q. Judge Neville that you spoke of is now the counsel for the G. & S. I. R. R. Co., and lived at Biloxi?

A. He is counsel for the Gulf and Ship Island Railroad Company and now lives at Gulfport.

Q. He has testified in this case and I wanted to identify him as the same man?

A. Yes sir, he lives at Gulfport.

J. A. BREATH, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Mr. McCLURG:

Q. What is your age?

A. 58.

Q. Where do you reside?

A. Bay St. Louis.

Q. How long have you lived here?

A. Since November 1870.

Q. Have you ever held any official positions in this county?

A. I have been a magistrate since June 1894. Justice of the peace.

Q. Of what district?

A. The fifth district.

Q. Does that include Bay St. Louis?

A. Yes sir, it includes Bay St. Louis.

Q. And Hancock county of course?

A. Yes sir, Hancock county Mississippi.

1729 Q. This is a controversy Mr. Breath between the State of Louisiana and the State of Mississippi, and as a jurisdictional fact it is alleged by Louisiana in her complaint filed on the 27th of October, 1902, that there was a contention between the citizens of the State of Louisiana and the citizens of the State of Mississippi, as to the water boundary line between these two States in the Gulf and Mississippi sound, and that matters had reached such a crisis that there was a threatened armed conflict between the officers of St. Bernard parish Louisiana and the officers of Harrison county Mississippi. You come from near the line of Harrison county?

A. Yes sir.

Q. And nearer to Louisiana than Harrison county. If you have any knowledge or information of any disturbance of any kind between the officers of the two States respecting the boundary between them in the waters of the Gulf I would be glad to have you tell the commission what you know about it.

A. Why, Mr. McClurg, I never heard of any rupture between the officers whatever. I never heard the matter disputed and never knew any thing about it until this discussion came up in the newspapers.

Q. About when did you first notice it in the newspaper?

A. Well I don't recollect now exactly when I first read of the meeting but it is not a great many months ago. It was shortly before they began taking the testimony.

Q. Well during your residence here whether as an officer or as a citizen, have you ever heard of any dispute of any kind. Any controversy of any kind?

A. None whatever sir.

Q. None between the citizens of this State and the State of Louisiana?

A. Never sir, until I saw it published in the newspaper.

Q. Well during your residence here as an official and as a citizen what have you to say as to the jurisdiction and sovereignty of Mississippi south of your shore?

A. Well as I have always understood it it is six leagues. It is about 18 miles from the shore and the south line begins at Pearl river.

Q. The west line you mean?

A. Yes sir, it runs southwardly.

Q. You mean 18 miles out of the mouth of Pearl river southwardly?

A. 18 miles from the shore. Now I would have to refresh my memory by looking at the statute. It is laid down in the statute and I have always considered that is the south boundary line between the two States.

Q. I don't mean the place where it is exactly?

A. Well 18 miles from the shore is what I have always understood it to be.

Q. Well did you ever at any time understand that a certain sailing line out of the mouth of Pearl river to the north of Half Moon island, which I believe is some times called Grand island, and to the south west of Cat island, and to the north east of Chandeleur. Have you at any time heard or know of that being regarded as the true dividing line between Louisiana and Mississippi?

A. Well Mr. McClurg, I don't recollect having given the matter any attention. As I told you, I in fact knew nothing about it until I read it in the newspaper.

Q. You never heard it discussed?

A. I never heard it discussed.

Cross-examination.

By Mr. DYMOND:

Q. Are you still a magistrate?

A. Yes sir, I am.

Q. Well now you stated a moment ago that the first time that you heard of this matter was since the testimony was taken in this case?

A. Since shortly before. I think the stenographer's notes will show that.

1730 Q. What do you call shortly before?

A. Well that is very indefinite. It may have been several weeks or several months. I could not tell you exactly Mr. Dymond.

Q. Well now Judge we started to take testimony in this case in April 1904. The record shows that as early as January 1901, three years and several months ago the governor of the State of Mississippi was called on by the governor of the State of Louisiana to appoint commissioners to see if it was possible to adjust this dispute in regard to the boundary between the two States. Now is it not true that you knew of that dispute and of the appointment of the commissioners at the time they were appointed?

A. I don't recollect any thing about it. I might have glanced over it in the newspapers, just the head lines and not being interested did not read it carefully perhaps.

Q. As I understand it although the governor of the State of Mississippi appointed commissioners on the part of the State of Mississippi on the 9th, of February 1901, you then did not give the matter your special attention at that time?

A. Not at all.

Q. Now Mr. Magistrate, does your office correspond to that of our justices of the peace?

A. It is a justice of the peace yes sir.

Q. As the magistrate in this section you necessarily were more or less acquainted with the laws of the State. On that subject as I understand it you gathered your information as to the territory of the State of Mississippi more from the constitution of the State of Mississippi and perhaps any statutes thereon than from any other source. Is that correct?

A. Yes sir.

Q. Now the act creating the State of Mississippi uses these words in describing the boundary westwardly from the eastern division between Alabama and Mississippi; "Thence westwardly including all islands within six leagues of the shore to the most southerly junction of Pearl river with Lake Borgne." The law doing that. That is what you refer to in your idea that the extent of the territory south was 18 miles. Is that correct?

A. I presume so sir. If the code was here I could refer to that particular section.

Q. Suppose you refer to the constitution. That is in the first part of your code?

A. Yes sir, the constitution is in the first part of the code. I now that the code gives the presumable boundary lines. The Code f 1892.

Q. Now it reads this way. Did I understand you to refer to the oundary division of the county or of the State?

A. Well I was looking more particularly at that time as to the oundary line of the county, because at that time before the Bowers w was passed there was a law against dredging, and I wanted to et the lines as near as possible because I did not wish to have an ffidavit made before me for a person violating the law where perps it was out of my jurisdiction.

Q. Did you refer to the east or west lines or to your south lines?

A. Well the line between Harrison and Hancock and also the ne between Hancock county and the State of Louisiana.

Q. Well is it not a fact Judge, that in that investigation you did ot take up the southern boundary line?

A. Well the north and south line. That would be between Harson and Hancock and the east and west boundary line would —let me see——

Q. The line running east and west would be between Louisiana nd Mississippi?

A. We run the line between Harrison and Hancock counties. I now I have been in the custom house several times and tried to ace it as near as I could from the statute, because I did not wish entertain any affidavits for dredging that were out of my jurisdiction.

31 Q. I understood you to say a moment ago that you consulted the statutes and when you say the statutes you mean e Mississippi statutes?

A. Yes sir, the Mississippi statutes.

Q. You consulted the statutes for the purpose of determining the rth and south line dividing Louisiana on the westward from Missippi?

A. Yes sir.

Q. Which starts at Pearl river?

A. Yes sir.

Q. Then you also consulted the statute to determine the line that vided Harrison from Hancock county?

A. Yes sir.

Q. Is it not a fact that you never looked into what was the east d west line dividing Louisiana from Mississippi on the southrd?

A. You mean out here. (The witness shows as indicated on the ap.)

Q. Yes sir. In order to change the question a little. Are you fond sailing Judge?

A. I have not been over these waters for a good many years.

Q. Then you have not had occasion to sail very much in Mississpi sound have you?

A. No sir, it is over thirty years since I sailed over these waters.

Q. Then you really have not had occasion to measure the distance from the Mississippi coast running south of the shore line. To the north shore line of the Louisiana marshes?

A. No sir, of course I never entertained the idea of measuring it.

Q. Therefore you don't know definitely whether they were out of the 18 miles or not?

A. I could not tell you definitely of course.

Q. Well that being the case you simply presume from the statute do you that you had 18 miles jurisdiction south from the shore did you?

A. Yes sir.

Q. Without knowing where the 18 miles was there?

A. I thought it went south 18 miles.

Q. Well now in looking at the statute you will notice that the statute says, and the constitution and the act of Congress say that Mississippi shall have all the islands within 18 miles. Were you aware of the fact that under the international law that the jurisdiction of a State only extends three miles from her most outlying islands?

A. I have always heard that; that the jurisdiction was within one league.

Q. Then if that is the case how did you conclude that your jurisdiction extended 18 miles south where there were no islands, when the only reference to the jurisdiction in the act of Congress, in your code, and the constitution refers to islands?

A. I don't recollect having said that my jurisdiction extended 18 miles. I think the lines extend 18 miles.

Q. How could the lines extend 18 miles when the international law gives the State but three miles out unless there were islands beyond that. How could it extend 18 miles out when there were no islands?

Q. You are asking me a question that is too deep for me to answer.

Q. Well did you ever make any arrests Judge for violating the law with reference to dredging?

A. I never have.

Q. Well now it is not true that the Mississippi law at present permits the dredging of oysters with sail dredges?

A. Yes sir.

By Mr. McCLURG: Counsel for Mississippi does not see that that is relevant to the question.

By Mr. DYMOND:

Q. Is it not true that just prior to the present law that steam dredges were permitted in Mississippi in water over 14 feet deep?

A. Yes sir over 14 feet.

Redirect examination.

By Gen. McCLURG:

Q. Counsel for Louisiana has just asked you if you did not know that international law only gave the State jurisdiction over
1732 three miles? I do not remember exactly your answer to this deep and learned question, but do you know whether a special act of Congress particularly defining the State line as a statute: that governs independently of international law?

A. I am not conversant with the law Mr. McClurg. You are going too deep for me.

Q. Do you understand that if Congress should say that Mississippi shall have a line marking her southern boundary in the waters of the Gulf 18 miles from her shore, that that declaration by Congress overcomes the general principles of international law and fixes a positive line on that subject?

A. I presume that my opinions would go down in the record and I don't think I can give any on that.

Q. Mr. Dymond has asked you some thing about a meeting of Louisiana citizens in his office in New Orleans January 19th, 1901. You were not present when Mr. Dymond and the St. Bernard oyster men wove a little spider web there and watched for the Mississippi governor were you?

A. No sir, I was not there. I was not invited.

Q. It seems that some body walked into that parlor of that spider. You were not in that crowd were you?

A. No sir, I was not.

Q. And you were not of the oyster commission that assumed to bind the State of Mississippi to what they called a neutral zone. You are not guilty of that crime either are you Squire.

A. No sir, I plead not guilty.

Q. And he has asked you about what you read in the statutes. I believe you stated that you regarded the State line as it is laid down by the code.

A. Yes sir.

Q. We answer Louisiana in our answer and cross bill by saying along the middle of Bay St. Louis southwardly to its entrance; thence due south to the southern boundary of the State of Mississippi in the gulf of Mexico; thence westwardly with said boundary including all islands within six leagues of the shore of the gulf of Mexico and Lake Borgne, to the most eastern junction of Pearl river and Lake Borgne, and to the east mouth of Pearl river; thence up said river by the middle thereof to the point of beginning. As I understand you you consider that statute to mean that we have 18 miles south and including every island within that limit?

A. That is my construction of it, yes sir.

The commission here adjourned for the noon recess. Upon its reassembling at 2 o'clock with the same presences as this morning, the following testimony was taken to-wit:—

PASCAL LUZZI, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows to-wit:—

By Gen. McCLURG:

Q. How old are you sir?
A. I was born in 1855 on the 29th, of April. I believe I will be 49 years old pretty soon.
Q. Where were you born?
A. I was born in Rome Italy. I can not speak the best English language.
Q. How long have you lived in this country?
A. Well I came here in 1872.
Q. That is 32 years ago?
A. Yes sir.
Q. How long have you lived in Hancock county Mississippi?
A. About 30 years.
1733 Q. How long have you lived in Bay St. Louis?
A. In Bay St. Louis 30 years.
Q. What has been your occupation during this 30 years?
A. Oyster man and fishing oysters also. Still today I keep on my little business. Oyster business.
Q. Where have you been fishing oysters during this time?
A. Well over this lake and a part of it in the marsh.
Q. Do you know where Nine Mile bayou is?
A. Yes sir.
Q. Did you ever go through there?
A. Yes sir.
Q. Three Mile bayou?
A. Yes sir.
Q. Turkey bayou?
A. Yes sir.
Q. Johnson bayou?
A. Yes sir.
Q. Creole gap?
A. Yes sir.
Q. Grand pass?
A. Yes sir.
Q. Isle à Pitre?
A. Yes sir.
Q. Sundown island?
A. Yes sir.
Q. Door point?
A. Yes sir.
Q. Karako bay?
A. Yes sir, and Cat Fish pass.
Q. Indian Mound bay?
A. Yes sir.
Q. Are you familiar with all of this country?
A. As far as the Mississippi river. Plumb to the jetties.

Q. These places that I have been asking you about there. Cat Fish pass and Nine Mile bayou and Three Mile bayou and Turkey bayou and Grand pass and Creole gap—how long have you been fishing in this country down there?

A. Well for the last thirty years.

Q. If there has been any change in this country, by which I mean to say any difference in the general appearance and make up of this country now and thirty years ago I would be glad if you would state it?

A. Well there is a little difference, but very little. You could not hardly tell the difference.

Q. Where did you notice the difference?

A. Well the biggest difference and the most of it that I noticed was Three Mile bayou.

Q. What difference did you find there?

A. We find the difference to go in there in Karako bay, the mouth of the bayou is a little larger. There used to be an island in the middle there when I used to go there 25 or 27 years ago, or not quite that long, and that island has disappeared. The mouth of Three Mile bayou has become a little larger. Now Grand pass is about the same.

Q. What about Creole gap?

A. It has increased from the time that they dug it. I helped to dig Creole gap open.

Q. You helped to dig Creole gap?

A. Yes sir.

Q. When?

A. Well that is about 25 or 27 years ago. Creole gap used to be a lagoon. A kind of a bay and we used to go in there and get a harbor sometimes. We used to fish oysters on the outside, and that was an open place and we used to look for a harbor, and the best place that we could find down there was Creole gap. We used to go inside of there. They have called it Creole gap since it was opened. We used to go inside there and drop anchor, and there used to be a little space here going to Bayou Greecue.

Q. Going to the southward?

A. Yes sir, to get to Door point and Jack Williams bay. There was a small space of about 20 or 25 feet that was open to go right through to make a short cut through this place to get to Jack Williams bay, and go to Sundown island. Sundown island is right opposite, and to get into Door point. And we cut it there one day. Me and some of the creole boys from Biloxi. We dug it out with shovels. We dug it to the water line and the next day we could pass through there with a skiff, the current washed it. In about a month afterwards we could go through there with a schooner, when the tide was out. That is what they call Creole gap. Creole gap was not on the chart at that time. I think it is on the chart today.

Q. Well now when you were fishing from Bay St. Louis in these places that we have been talking about what State were you in?

A. We believed that we were in the State of Mississippi.
Q. Why did you believe you were in the State of Mississippi?
A. The old time people told us that we were in the State of Mississippi.
Q. How long have you been understanding it that way?
A. Well that is two years after I was here in Mississippi. We knew that when we were getting down about Bayou Mussel and California bay and American bay that we were in Louisiana at that time of course.
Q. Did you have any idea how many leagues you could go from the Mississippi shore that way?
A. Not really myself, but they said that it was six leagues. I understood that. I don't know how many miles those leagues are. I suppose 16 or 18 miles.

Cross-examination.

By Mr. DYMOND:

Q. What is your business Captain?
A. Oyster fisherman sir.
Q. Where do you have your place of business?
A. Right here sir.
Q. What do you do in the oyster business?
A. In the winter time I am fishing oysters for the cannery.
Q. What factory were you fishing for?
A. I fished for Mr. Dunbar a good many years, and some times I fished for Mr. Lopez. According to where we can get the best prices for the oysters.
Q. What do you do in the summer?
A. I am fishing oysters.
Q. Don't you do any business for yourself. Don't you do a restaurant business?
A. I keep an oyster saloon sir.
Q. Those are the oysters that you sell for raw eating? You sell them for raw eating or what?
A. Raw and cooked.
Q. The character of the oyster that you use for this purpose is not the same character that you use to sell to the factories is it?
A. Well we clean them a little better.
Q. Are they not bigger?
A. We try to get them as large as possible yes sir.
Q. Don't you try to get better oysters and select oysters for your business for that place, than for the cove oysters for the factory?
A. Yes sir, to be sure.
Q. Where did you get these oysters. Where have you been in the habit of getting them?
A. This summer we got the oysters just on the outside of the Telegraph reefs.
Q. That is north of the deep water channel?

. No sir, it is south of the deep water channel. You see we start here and go across by the Telegraph reefs, before we get into the deep water there. We fish oysters with 16 foot tongs. We don't fish with dredges at all.

Q. Well now you say that you visited the Louisiana shes say 25 or 30 years ago?

Yes sir.

Did you have at that time any occasion to put down any stakes y thing of that sort to designate any definite point?

Well no sir.

Well is it or is it not your experience that if you put a down on the shore at a certain point and go back there the year that you will find that it is washed away eight or ten

You could do that, and if the pole was still there you could

Have you had any occasion to do this?

No sir, I have not.

Have you had any occasion to talk to any body about it who one any thing of that sort?

Not in my recollection.

Well now is it not a fact Captain that it is common talk f you were to put a pole down on any particular place it is exposed to the waves and wind, and you were to go ix or eight months afterwards or a year afterwards, you find that the shore line had backed away from the pole by g?

Well not inside of the Louisiana marsh. Not in the marsh. ight find that on the side of the coast.

n the shore line?

n the shore, because the sea there would eat it up. We ly work down there about Mussel or American bay and here you are enclosed on the inside and there is no water ashing to eat the bank. Unless it was an open place like gap or Turkey bayou, and all of these places that are open

ell now in these thirty years of experience of yours did you ve occasion to be out in the marsh during a storm?

es sir, twice.

hat were these years?

was not really a storm, but it was pretty good stiff

hen was this. The first time and the second time?

e first time was in 1887.

hen was the second time?

was not very long afterwards. It was in 1888 or 1891.

ell now on these occasions did the water rise very high?

rose about as high as the prairie.

did not go over the pra-rie then?

A. No sir, just even with the pra-rie.

Q. You have not been there on any occasion when the tide r so high that you could not see the pra-rie grass?

A. No sir.

Q. Well now suppose there was a storm that occurred down th where the water rose as high as the pra-rie grass by the effect of t waves. And the waves would be correspondingly strong. Wou you expect the same results there then as you would on the sho line in the matter of washing away?

A. Why that would have made a little difference I suppos Certainly it would have made a little difference.

Q. Did you ever know of an island called Nigger island just sout of Three Mile bayou?

A. Nigger point.

Q. This is an island that used to be there. Did you ever know of such an island that used to be there?

A. I don't know that name. I might have known the island.

Q. Did you ever know of any island disappearing just southeast as you entered Three Mile bayou?

A. Going to Karako bay. Yes sir, a small island.

Q. No, you don't go into Karako bay there. You go into the southern end of Bayou Boudreaux.

A. Before you get to Three Mile bayou you get to Bayou Boudreaux.

Q. Do you claim that Three Mile bayou enters into Karako bay?

A. Yes sir, enters Karako bay.

1736 Q. What is that body of water that Pirates point is in?

A. What is the depth of the water?

Q. No what is the water called? What is the body of water that Pirates point is in?

A. We call it South bay.

Q. Is it not a fact that Karako bay is out more to the eastward. Suppose you were to draw a line north and south right down through Three Mile bayou. Would not Karako bay be to the eastward of this line?

A. To be sure it is to the east of this line.

Q. What is the body of water that is immediately south of the Three Mile bayou. Three Mile bayou is only a little short thing you know?

A. Three Mile bayou is the entrance to Karako bay.

Q. You call that Karako bay do you?

A. No sir, Three Mile bayou is supposed to be the entrance. To get to Karako bay you can go the direction through Three Mile bayou.

Q. You know it is no bayou there. Three Mile bayou?

A. No sir, it is an open entrance there.

Q. What does it open into. What is the bay that Three Mile bayou enters into?

A. It leads into a pass. It goes straight to Raccoon island. Raccoon island is right opposite.

Q. You are confident that the bay that Three Mile bayou enters into is Karako bay, and Creole bay is not eastward?

A. Yes sir. I never said that it was east.

Q. Here we have a map of it. Is it not a fact that Three Mile bayou enters into Three Mile bay, and Karako bay is way to the eastward. Here is Karako bay here?

A. Well here is Three Mile bayou. When you go through Three Mile bayou and here is Raccoon island around here. Well then you go to the east of Raccoon island and you go in the Karako bay.

Q. You have to pass between Karako bay and Nigger island to get in there?

A. Yes sir, you have to pass right there through there, and that island has disappeared here. It was a very small island, a little bigger than this table, and some times you will see it out of the water yet when the tide is low.

Q. What was the cause of the island disappearing?

A. I suppose it was small and the waves would wash it up. It was there for many many years.

Q. You have fished in Cat Fish pass have you not?

A. Yes sir.

Q. And Drum bay?

A. Yes sir.

Q. When you fished in Drum bay did you consider that you were fishing in Mississippi?

A. Well I don't know sir. I have no idea about that. Whether I was fishing in Mississippi or Louisiana.

Q. When you were fishing in Southwest pass where were you fishing?

A. In Southwest pass we must have been in Louisiana. What Southwest pass do you speak of.

Q. I am speaking of the Southwest pass which is north of Drum bay. You may call it Jack Williams pass?

A. That is Jack Williams pass yes sir.

Q. Where were you when you were fishing there?

A. We expected to be in Mississippi then.

Q. Did you ever fish around Mitchell keys?

A. Yes sir.

Q. Where were you when you were fishing there?

A. I thought we were in Louisiana.

Q. Did you not fish as much in Louisiana as you did in Mississippi?

A. Well I don't know sir that I could tell you that.

Q. What I mean is that you never hesitated about fishing wherever you wanted to. Did you not fish down in American bay?

A. Yes sir, in this time we did not have a license and we used to bring the oysters in Mississippi.

Q. And you fished wherever you pleased?

1737 A. Yes sir, I used to work for the market in New Orleans. I used to take the oysters where ever I could get the best price for them.

Q. Were you fishing oysters in 1898?

A. Yes sir, I have been fishing oysters for thirty years.

Q. Were you out in the marsh at the time there was an expedition sent out by the police jury of the parish of St. Bernard to see about Mississippians fishing out there?

A. I was not out there at that time, no sir.

Q. Did you hear about it?

A. Yes sir, I heard something about it.

Q. You were in Bay St. Louis at that time?

A. Yes sir.

Q. What did you do. Did you go back there any more?

A. Oh yes sir.

Q. Now did you have any trouble about getting the oysters that you wanted for your business out here. Fishing oysters?

A. In this water out here?

Q. Yes sir.

A. No sir, we could get them out there if we wanted to.

Q. You used to get them easier when you went to Louisiana?

A. Not in the summer.

Q. In the winter?

A. Yes sir, because we worked with tongs. We did not fish with dredges. I wish they would break all of that up.

Q. You believe in tongs?

A. Yes sir, like all of the old time people.

Q. You believe that the other people get the most oysters?

A. No sir, not all of the time.

Q. It would be better for your business if there was no restraint and you could go into Louisiana like you used to. It would be better for your business?

A. If they imposed a license I think that they are entitled to it just like any other State.

Q. You would like it fixed so you could go there and fish your oysters and bring them here?

A. Either bring them here or to the market in New Orleans.

Q. There is nothing to keep you from going there and fishing for the New Orleans market?

A. No sir, not to do that. But I want to take them where I will get the best price.

Q. You can fish there now for the New Orleans trade?

A. Yes sir, I have to stay in New Orleans and deliver the goods to Louisiana. If it could be fixed up I would rather fish in Louisiana, because I have a small boat. I can not afford to get a big boat. I have a very small boat.

Q. Did you ever fish in Elephant Point pass?

A. Yes sir.

Q. Where were you then. In what State?

I don't knew. I have no idea. I thought that we were in
iana. It is a long distance from here to Elephant point.
When did you first hear what the boundaries of Mississippi
How far back?
The first time that I heard it was from these old people. I
stood that Mississippi claimed six leagues from the main land.
Hancock county. From the State of Mississippi. From the
land due south six leagues. Now what those six leagues are.
at point the boundary goes I don't know. I could not tell

What made you think that it was due south. That is what
old you?
That is what they told me. Of course as I tell you, I don't
ny thing about it.

By Col. ZACHARIE:

aptain, is it not a fact that that territory starting from Isle à
nd going westward is commonly called by the Mississippi fish-
the Louisiana marshes?
rom Isle à Pitre?
Q. From Isle à Pitre going westward?
A. Not from Isle à Pitre. I never heard that.
Q. Going westward towards the Mississippi river. Is not
led the Louisiana marshes?
understand the Louisiana marshes.
at is what — is generally known amongst the fishermen as
?
s sir.
ell now what is the character to the soil in this territory. Is
low marsh with reeds and grass.
some locations. In some parts of it.
w what would be the effect of a violent northwest storm,
he storm of 1893 which swept across this whole territory
What would be the effect upon that territory. Would it
away a great deal of the surface of the land?
would be a great destruction on the face of the marsh but
on the inside.
uld there not be large portions of this thin surface washed
h the roots of the grass and that spongy soil. Would it
shed away and the water come in there?
sir, not hardly. It would not last long enough to wash

s it not last three or four days?
ir, it only lasted about four or five hours. It covered the
It was on Sunday morning. Three or four days before
wing, but it never covered the marshes.
e you in that storm?
ir, but my boat was in the storm.
were not in it, but you can testify to that?

A. No sir, I was not in it, and I was glad that I was not in

Q. Has not that territory of which you have just been spe
has not that always been regarded as a part of the parish
Bernard and the State of Louisiana?

A. Well we had a little trouble last winter with St. Be
parish. That claims to be St. Bernard parish. I don't know

Q. I mean from a long time back have not the fisherme
people generally regarded that territory as being a part of the
of St. Bernard in the State of Louisiana?

A. It was only lately that I heard of St. Bernard parish
It was only last winter that I learned that it was St. Bernard p
Of course I am not an educated man.

Q. And your whole idea about the boundary of Mississipp
been derived from talk about its being; running six leagues
the main shore?

A. From the main land of Mississippi.

Q. You never knew or heard it pointed out that under the
admitting the State of Louisiana into the Union that her juris
tion extended three leagues from her coast?

A. No sir, not as to my recollection.

Q. Do you know the Malheureux islands?

A. Yes sir, the Malheureux islands, yes sir.

Q. How far are they distant from the coast of this disputed te
tory?

A. Well I don't know sir. I know the claims. That they show
me last winter that the edge of the marsh was to be the *mutual*
ritory. The edge of the marsh.

Q. That is in regard to the agreement that was made between t
two commissions?

A. Now Malheureux island and Grassy island, there are two islan
there close together. They are down on the other *isle* of Gra
island, what they call Half Moon, or what is called Grand islan
and the distance from the edge of the marsh and Petit pass I su
pose it is two and a half or three miles.

Q. The first island?

A. From Petit pass to the edge of the marsh, which they clai
to be the Louisiana marsh. I don't know what the disputed terri
tory is now. I could not really tell you.

Q. Well all of these islands are south of the main deep wate
channel are they not?

A. Yes sir.

Q. The deep water channel is close—coming from the mouth of
East Pearl river out to Cat island, is close to the Mississippi
1739 shore until it branches off to the eastward and southward.

A. It is close to Petit pass. It is closer to Petit pass than it
is to Grand island.

Q. I am speaking of the deep water channel which runs north of
Half Moon island where the largest vessels come in there to get

lumber and so on. The channel runs north of these islands of which you speak close to the Mississippi shore does it not?

A. Yes sir.

Q. The rest of this sound is pretty shallow water is it not, and is used by small vessels?

A. Yes sir.

Q. The water all through there is salt like the water of the gulf of Mexico?

A. Where is that?

Q. South of Pearl river and north of this disputed territory?

A. Some times it is salt, and some times it is fresh.

Q. It is always more or less salt is it not?

A. No sir, it is more or less fresh.

Q. Do you mean that it is ever fresh enough to drink?

A. Yes sir, and fresh enough to kill oysters too some times.

Q. You mean when there is a great freshet from the river?

A. Yes sir, or a heavy rain. Where it will rain for a day or so, Pearl river drains enough water out to kill the oysters here on my bedding ground.

Q. That is also because you get the same drain out of Wolf river don't you?

A. Wolf river does not drain out of there. Jordan river does We hardly ever get that water. It drains right on out.

Q. The Mississippi sound is an arm or a branch of the gulf of Mexico, is not it?

A. I suppose it is. The Gulf is the deepest water.

Redirect examination.

By Gen. McCLURG:

Q. What is this island this way to the eastward?

A. This is Cat island.

Q. How far is this here from Bay St. Louis?

A. It is supposed to be 16 miles.

Q. What is the light house that way to the westward?

A. That is the Marion Shell Bank light house. We call it Pass Marianne.

Q. What direction is Isle à Pitre from that light house?

A. It is south east from that light house.

Q. Is that light house almost between Bay St. Louis and Isle à Pitre?

A. No sir, Isle à Pitre is a little further out.

Q. Southeast?

A. Yes sir, there is one four or five miles across from Cat island to Isle à Pitre.

Q. How far is it on a direct line from Bay St. Louis to the eastern mouth of Pearl river?

A. That is 25 to 27 miles from here.

Q. Well there is an island out there near the mouth of Pearl river. Between here and the mouth of Pearl river near Half Moon island?

A. That is Grand island. It is not direct on the mouth of Pearl river. It is more to the east of the mouth of Pearl river.

Q. And Half Moon island and Grand island amount to the same thing?

A. Yes sir, the same thing. We call it Half Moon because it comes around in this direction. There is to the front of the east mouth of Pearl river Grassy island. That is right in front of the mouth of Pearl river; it is not right in front, but it is just a little to the east.

Q. Where is St. Joseph?

A. Old St. Joseph is more to the north of Half Moon. It is more north than Half Moon.

Q. You mean that it is north east then?

A. Yes sir, about north east yes sir of Half Moon. That is Old St. Joseph.

1740 Q. You see up here the L. & N. R. R. crosses Bay St. Louis?

A. Yes sir.

Q. How long is that bridge?

A. It is supposed to be two miles as I understand it.

Q. You were asked by Col. Zacharie if that marsh down there was called the Louisiana marsh. Did you ever hear it called Grand marsh?

A. No sir, it was called Louisiana marsh when we got down about Bayou Mussel.

Q. Is that where the mosquitoes come from?

A. They come from almost every where. Some times they are around here too, and down in the Rigolets and at Point Chicot, and La Fortuna, and Bayou Pascal. I can tell you all of these places. Yes sir, I am pretty well acquainted with all of this marsh. I have gone there pretty often.

E. E. O'Brien, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McClurg:

Q. Where do you live Mr. O'Brien?

A. At Bay St. Louis?

Q. How old are you?

A. I am 59 years old sir.

Q. How long have you resided in Bay St. Louis?

A. Permanently for 11 years.

Q. Had you lived in Hancock county before?

A. Well not permanently. My homestead and residence is here. I have been living in that county about 54 years.

Q. Did you ever hold any official position in Bay St. Louis or Hancock county?

A. Yes sir, I have been mayor of Bay St. Louis for the last three terms.

Q. When did you first enter upon the office of mayor?

A. I think that it was in 1900. April 1900. I then filled an unexpired term of Mr. Toulme. I was elected then, and I was re-elected last April I was re-elected again.

Q. And you were filling an unexpired term in 1900?

A. I think it was that year.

Q. Have you had any personal knowledge or information of any serious disturbance or any threatened armed conflict between the sheriff and officers of St. Bernard parish Louisiana and the sheriff and officers of Harrison county or Hancock county, or authorities of Mississippi with reference to this boundary line. If so I wish you would state what it is.

A. I never heard of any.

Q. You were here in 1900?

A. Yes sir.

Q. And 1898?

A. Yes sir.

Q. And back before that?

A. Yes sir; but I never heard of any serious conflict.

Q. You never heard of any trouble?

A. No sir.

Q. No dispute as to where the line was?

A. (No answer.)

Q. Did you ever hear at any time or in any way as to any controversy or dispute over the State line prior to the year 1901, or about that time?

A. I never heard of any dispute. I never heard of any thing at all until the controversy arose between the two States of Mississippi and Louisiana. That is the only thing that I ever heard of. I followed that pretty close, but I never heard of any dispute in that respect.

741 Cross-examination.

By Col. ZACHARIE:

Q. Mr. O'Brien, you know the territory running from Isle à Pitre eastward towards the Mississippi river?

A. Well I have been out there on fishing excursions.

Q. Is that territory not generally called by the fishermen and people along the coast the Louisiana marshes?

A. Yes sir.

Q. Has it not always been considered a part of the parish of St. Bernard in the State of Louisiana?

A. Well as far as that question is concerned I will state Mr. Zachary I don't know whether that would be considered in that way or not, but I know since my boyhood I never have known of the place or ever heard of it as anything else except the Louisiana marsh.

Q. Was it not the common expression among all of the fishermen and the people generally that that territory is the Louisiana marsh?

A. I have always heard it so mentioned.

Q. Did you hear in 1898 of an expedition being fitted out by the sheriff of St. Bernard parish to drive out the Mississippi fishermen and exclude them from fishing in this territory?

A. I don't remember it at all.

Q. When did you first hear of this dispute about this boundary?

A. When the suit was instituted.

Q. Did you not hear some twenty months before the institution of the suit of the appointment of these boundary commissioners on the part of Mississippi and Louisiana?

Q. Did I not hear what Colonel?

Q. Did not you hear of the appointment of this boundary commission?

A. Yes sir.

Q. You are familiar with this territory? You have boated and sailed around there?

A. Yes sir, I have boated around here for the last forty years.

Q. Do you know where the main deep water channel is from the mouth of Pearl river going east? Does that not lay north of Half Moon and close to the Mississippi shore?

A. It does.

Q. That is where the deep water vessels go through there?

A. Yes sir.

Q. In your various visits to this territory have you seen the effects of these storms such as the one of 1893 and others in cutting up this territory?

A. In certain portions of it. I have been down to the westward of there after the last storm. The two previous storms I noticed where the depredations were more out there at Cat island.

Q. I am speaking of the interior of the marshes. The bayous and the passes.

A. I never went through there. I was fishing on the outside there. We never went up through these bayous or anywhere there. We fished on the outside there entirely.

By Mr. DYMOND:

Q. Mr. O'Brien, do you know Judge Neville?

A. Yes sir.

Q. Was he not the district attorney here just prior to 1898?

A. Yes sir.

Q. Well you said that you had never heard of any dispute between the officers of the parish of St. Bernard and the counties of Harrison and Hancock. Were you aware of the fact that Mr. Neville went over to see the district attorney of St. Bernard parish in regard to the exclusion of Mississippians down there?

A. I never knew of it.

Q. You never knew of that fact?

A. I never knew of that fact. I have made it a rule not to come to court so I don't know what is going on.

1742 Redirect examination.

By Gen. McCLURG:

Q. Counsel for Louisiana have asked you about calling the territory west of Isle à Pitre the Louisiana marsh and you said I believe that it was generally so called?

A. Yes sir.

Q. Did you understand by that that it belongs to the State of Louisiana because it is called Louisiana marsh?

A. Well my impression would be that way if it is called Louisiana marsh, there must be some reason for giving it that name. Probably they thought it was a portion of Louisiana and extended it in that way to keep it up.

Q. You know that the Louisiana purchase does not all belong to Louisiana does it?

A. No. Maybe it don't and maybe it does. It is a question to be found out I presume.

Q. Do you know that there are some parishes in Louisiana called the Florida parishes.

A. I have heard of them.

Q. Do you imagine that it belongs to Florida because they call them the Florida parishes?

A. I don't suppose they ought to. If they did not pay for them they ought not to have them.

Q. Well if that marsh don't belong to Louisiana she ought not to claim it ought she?

A. Well that is a question for some one else to decide.

Q. The Mississippi river don't belong to Mississippi does it?

A. Yes sir, every thing that we have got in Mississippi belongs to us.

Here the commissioner appointed —— —— as bailiff of the commission during its session at this place.

The commission here adjourned until to morrow morning at nine o'clock.

BAY ST. LOUIS, MISSISSIPPI, August 10th, 1904.

The commission met this morning at nine o'clock, pursuant to the adjournment of yesterday.

There were present Hon. William D. Ballard, commissioner on the part of the State of Mississippi. Hon. Monroe McClurg, counsel on behalf of the State of Mississippi, and Hon. F. C. Zacharie, and Hon. John Dymond, Jr., associate counsel on the part of the State of Louisiana, and F. M. Peyton, stenographer.

W. T. McDONALD, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURE:

Q. Where do you live?

A. At Bay St. Louis Mississippi.

Q. How long have you resided here?

A. Six years in April 1904.

1743 Q. You are the circuit judge for the second judicial district of Mississippi are you?

A. I am.

Q. Jackson, Harrison and Hancock counties are in your district are they?

A. Yes sir, they are.

Q. In this suit Judge between the State of Louisiana and the State of Mississippi there is an allegation to the effect that a contention over the lines dividing these two States in the waters of the Gulf had reached such a crisis about the time of filing of the bill of complaint on October 27th, 1902, that there was a condition of affairs that threatened an armed conflict between the officers of the parish of St. Bernard in the State of Louisiana and the sheriff and officers of the county of Harrison in the State of Mississippi. If you know any thing about such conditions existing in Mississippi I would be glad for you to state here what you may know about it?

A. Officially I know nothing about it. My term of office began in September 1903. As a practitioner at the bars of these three coast counties in this State, I don't know of any case in the courts of these three counties involving the question of State jurisdiction as between Mississippi and Louisiana.

Q. If there had been such a contention, as a practitioner at the bars of these three counties you would have known some thing about it?

A. I would in Hancock and Harrison counties. That is since April 1898.

Q. There is also in this bill a report of an *ex-parte* mass meeting held at the office of Mr. John Dymond, Jr., in the city of New Orleans on the 19th day of January 1901, in which certain resolutions were adopted looking to the consideration of the boundary lines between the two States. Its location and identification, and that the governor of Mississippi was called upon to appoint a commission of five men to meet the commission appointed by that meeting in New Orleans to amicably determine the boundary lines between the two States, and subsequently a meeting of this joint commission was appointed and they failed to come to any agreement, except to recommend that a suit be brought in the Supreme Court of the United States. I call your attention to that for the purpose of having put in the record that you as one of the judges of the Mississippi courts to say whether there is any authority in the constitution and laws of our State which authorizes the governor of our State to under-

taken by a commission appointed by him to adjust the boundary lines between our State and Louisiana or any other State?

By Mr. DYMOND: Objected to and excepted to on the part of the State of Louisiana on the ground that the witness has not qualified himself to testify and to give an opinion on such a subject as this.

A. The governor of Mississippi has no power under the constitution or laws, in the absence of legislative authority to attempt by commission or otherwise to settle a question of disputed boundary between Mississippi and any other State.

Q. Judge, it is understood in this matter that the oyster commission on the part of Mississippi and a similar commission on the part of Louisiana have undertaken to fix what they call a neutral zone, and have attempted as I understand it to bind these two States, and especially is it insisted that Mississippi is bound by the action of these two commissions in fixing the line over which the fishermen of Mississippi may not go, and I presume over which the fishermen of Mississippi may not come, and that line extends along the northern border of the marsh lands from about Malheureux point to Grand pass, and then turns south east through Grand pass down towards Sun Down island. If I am correctly informed it is 1744 agreed that Mississippi fishermen shall not pass south or westward over that line. That they are not to go into the marshes. I want to ask you if you know of any authority under the law as far as the State of Mississippi is concerned empowering the oyster commission of this State to fix a line that is binding upon the citizens of this State in such a matter?

A. The oyster commission under the law creating it had no authority under the law to bind the State of Mississippi with reference to the boundary between Louisiana and Mississippi. I wish to state further in this connection that I was attorney of the Oyster Commission for the State of Mississippi from the date of its creation until September 1893, and attended the joint meeting of the oyster commissions of the two States in the city of New Orleans on September 1892 when the agreement was entered into between the commissions of the two States anticipating any trouble that might arise between the fishermen of the two States fishing in the same territory claimed by the two States, and over which both sides might attempt to enforce laws differing in the dredging and taking of oysters. It was understood at that time that the commissions of neither State had any power to bind its State, but it was a persuasive agreement entered into, without authority to aid in preventing any outside trouble.

Q. That condition of affairs grew out of the act originally of the Oyster Commission of Louisiana and of the parish of St. Bernard in passing strict ordinances, and the strict patrolling in the marshes of the controverted territory did it not?

A. Well I don't know whether they had been at that time espe-

Cross-examination.

By Mr. DYMOND:

Q. I understand you to say that you were at one time sheriff of Jackson county?

A. Yes sir.

Q. Where is the line that forms the eastern boundary of Jackson county?

1749 A. The line—I don't know how—the line between Alabama and Mississippi is on the east side of the State.

Q. Where is the north and south line that separates Jackson county from Harrison county?

A. Do you want me to describe it?

Q. About where it is yes sir.

A. The line is divided by the middle of the range line. Range 9.

Q. Does it not come down through Biloxi bay?

A. It comes down through the middle of range 9 until it gets to the channel of Biloxi bay, and then follows that channel in an easterly direction until it passes the east end of Deer island, and then goes out into the sound.

Q. Now is it not a fact Mr. Minor, that none of the water territory formed by the east and west boundary lines of the county of Jackson is in this disputed territory between the States of Louisiana and Mississippi?

A. I don't know how much they claim. No it would not touch that territory at all.

Q. Well now would not that also, Dauphine island, and Petit pass, and Horn and a part of Ship island form the exterior front on the Gulf side of Jackson county?

A. Well that don't touch Ship island at all I don't think. Jackson county.

Q. That is on the westward you mean?

A. No sir, there are only two islands. Well there is Horn island and Petit Pass island.

Q. What about Dauphine. Does not that form a part?

A. No sir.

Q. In what State is Dauphine?

A. That is in Alabama I reckon.

Q. There are these islands that you have mentioned, or string of islands on the south of the shore of Mississippi in Jackson county?

A. They are not on the south side of it, because the territory we claim takes in all of the islands.

Q. What I mean is that they form the southern extremity of Jackson county don't they?

A. No sir, the county goes still further south.

Q. How much further south?

A. Well we would go at Horn island some seven or eight miles.

Q. Why so?

A. Because the 18 miles would over reach it.

Are there any islands 18 miles off the shore of Jackson county?
I thought probably you were getting the question as to whether
ognized jurisdiction outside of these islands. That is in re-
o making arrests and things of that sort.
The article of the act of Congress, and the article of your con-
on gives the State all islands within 18 miles where there are
ls, but it does not say anything about jurisdiction where there
o islands. Have you been exercising jurisdiction 18 miles
e there are no islands?
. No sir.
Now I understand you to say that you were fishing oysters
1880 to 1890?
. Yes sir.
. That during that time y. . were not disturbed in the Louisi-
marsh?
. No sir.
. Do you know whether there was any one in Louisiana at that
e to enforce the Louisiana law.
. No sir.
Q. Do you know what the Louisiana law was in 1880 in regard
ion residents fishing oysters in Louisiana?
A. No sir.
Q Now you were not fishing oysters in 1898 when an expedition
s gotten up by the parish of St. Bernard?
A. No sir.
Q. Did you ever hear anything of that. The fishermen had been
cluded or threatened to be excluded?
A. I heard some little rumor at that time but it was only
50 through the newspapers. I was clear out of the oyster busi-
ness then.
Q. As I recollect it the oyster commission was created by the
gislature of Mississippi in May 1902, in January?
A. Yes sir.
Q. The Oyster Commission of Louisiana was created by the legis-
ature of Louisiana that met in May 1902. Now so far as your
knowledge goes have you any recollection of there having been on
the part of either State previous to that any such body specially
delegated by the law to enforce the laws of the two States?
A. No sir.
Q. You were a member of the oyster commission that met in
joint session in New Orleans with the Oyster Commission of Louisi-
ana in September 1902?
A. Yes sir.
Q. You were aware of the fact that prior to that time the State of
Louisiana through its governor had requested the State of Missis-
sippi through its governor to appoint an amicable boundary com-
mission, and that these two commissions met and they could not
agree, and the Mississippi commission had recommended that a suit
be filed in the Supreme Court of the United States to settle the

boundary dispute between the two States. Were not you aware of this fact when you became a member of the Oyster Commission of Mississippi?

A. Yes sir.

Q. Therefore when you met in New Orleans with the Louisiana Oyster Commission you recognized that it was necessary to do something to prevent any conflict between the two States through the instrumentality of their oyster commissions did you not?

A. Yes sir, I thought it was necessary, and when we were notified by the Louisiana commission to meet them there I thought it was a good move.

Q. Now you knew did you not that the Oyster Commission of Louisiana was specially authorized by law to maintain an armed patrol of its territory, and what it considered to be the State of Louisiana?

A. That is what I heard.

Q. You knew also that the oyster law of Mississippi authorized its commission to maintain a patrol of the waters?

A. Yes sir.

Q. Now what would have been the consequence if there had not been such an agreement, with two intelligent official bodies, patriotic, endeavoring to enforce the rights of their respective States?

A. Some body would have gotten hurt.

By Mr. McCLURG: This answer of the witness is objected to and excepted to on the part of the State of Mississippi as being the statement of an opinion.

Q. Do you recollect a talk or argument of mine as counsel for the State of Louisiana in connection with the statement that if there was no agreement that Louisiana would be compelled to enforce what she thought to be her rights, and the corresponding statement from the president of the Oyster Commission of Mississippi that Mississippi would necessarily have to follow suit and meet us with our own weapons?

A. Well we had some pretty jolly talk there. It looked like they were playing some pretty good bluffs on both sides.

Q. But as a man of good hard common sense you recognized that if there had not been such an agreement there would have been trouble between the two bodies?

A. That is the way I looked at it. There had to be some thing done.

By Col. ZACHARIE:

Q. Is it not a fact that the territory running westward from Isle à Pitre to the Mississippi river has been generally known
1751 amongst fishermen and others along this coast as the Louisiana marshes. Was not it generally called that?

A. Well my recollection is—the first trip that I ever went out in the marsh was with an old fisherman. He is living in New Orleans

d his term in using the word then was Grand marsh. Prob-
e is using it today. All of the old time fishermen when they
ing down there and you would ask them where they were
they would say to the Grand marsh. Since this oyster busi-
as been developed, I can say in the last ten years, the word
l marsh has been dropped and they use the word Louisiana
. It is very seldom now that you hear the word Grand marsh,
t you go back to Biloxi to some of those old time fellows that
been fishing down there for forty years, and they might still
at same word, Grand marsh.

Then I understand you to say if this agreement had not been
ed into between the oyster commissions of the two States that
was anticipated on both sides an armed conflict between the
rities of the two States in endeavoring to enforce what they
ed to be their rights?

Well of course it looked that way. Here is the law, and here
r law telling us to go out there and enforce the law. While
n't know that we had that same authority to mount cannons
things like that on a boat, we might have gone there in a peace-
way and tried to enforce the law. I don't think we would have
any body.

But there was danger was not there that there might be an
ed conflict. People on either side resisting the commission of
other side?

Oh yes sir, it is talked now. Some men say that we ought to
n ourselves and go on in it and pass this line, and then cooler
ads keep them down. They don't think that they have been
ated right is the reason why.

Redirect examination.

By Gen. McCLURG:

Q. There has been a great deal asked you about armed expedi-
ons and threatened conflicts. Do I understand that the oyster
ommissions of these two States forgot that there was a civil govern-
ment, and that the courts of the country and their States were able
o handle this question, or did they forget that there were courts,
and the two oyster commissions go down there and imagine they
were going to have war?

A. No sir, they did not forget it.

Q. Now is it not a fact that Mississippi never sent out any armed
expedition or boats, but sent her civil officers with the power to ar-
rest and bring them before the civil courts?

A. Yes sir, that is the way that they did it.

Q. And did not you think that the courts were competent to settle
the question as to whether any law had been violated or not?

A. Yes sir, I think that the courts had power enough.

Q. Did you not think that the courts of Louisiana and the gov-
ernment of Louisiana was big enough, and strong enough and just

enough to arrest violators of the law upon the water the same as upon the land and take them before their courts without any armed conflict, and test the question as to whether they had violated the Louisiana law or not. Did you not think that?

A. I thought that either State had power enough.

Q. Mississippi had sent no savages in there to be encountered by an armed patrol had she?

A. No sir.

Q. Then all of this stuff about armed conflicts and sending out armed expeditions. It was in the absence of any recollection that there was a judiciary established by the Government to settle

1752 these questions was not it?

By Mr. DYMOND: These quesions are excepted to on the part of the State of Louisiana on the ground of their being leading and suggestive.

A. My idea about all of this thing of an armed expedition was more of a bluff on both sides. I did not believe that any body intended to carry out any of it.

Q. Mississippi did not bluff did she. She never sent out any armed fleet?

A. No sir, I never heard of any being out there.

Q. And so when you got to the bottom truth of it it was all bugaboo. Pretense?

A. There was nothing showing on the surface.

Q. It was what they call in war a kind of a feint?

A. I thought it was a bluff.

Recross-examination.

By Col. ZACHARIE:

Q. Mr. Minor, the counsel for Mississippi has asked you was there not ample redress before the civil courts or criminal courts of either State for the assertion of rights of the other State. Suppose the sheriff was to attempt to arrest a citizen of Louisiana, fishing oysters in what was claimed at that time, and is still claimed to be Mississippi waters, and he should have been resisted by the parties sought to be arrested, would he not have resorted to a posse where he had a warrant for the arrest of the man and by force of arms arrest that man. Would it not be his duty?

A. Yes sir.

By Mr. MCCLURG: This is objected to and excepted to on the part of the State of Mississippi as being irrelevant and suppositious, in leaving out the fact in the statement of the hypothetical case that there is resistance on the part of the man sought to be arrested.

Q. You state in your examination in chief that this agreement was entered into on account of apprehended difficulties which were deemed to be impending by both commissions. Was not that diffi-

uch as I have just described of resistance to the courts, to the
of the courts, and to the exercise of authority by the sheriff
her officers. Was not that the difficulty which you sought to

?
Yes sir.
Did you not hear two or three or four years pri[illegible] to the insti-
of this suit that Mississippi fishermen had b[illegible] warned by
uthorities of the parish of St. Bernard in the S[illegible] of Louisiana
ve this ground and not to fish there and that the Mississippi
men had replied in some instances that they would not do so?
I don't know of any thing of that sort of my own knowledge.
Did you not hear of such a thing?
I never heard of it until this. Until after I was appointed on
ommission and this question came up of trouble. I have heard
eat many men say after that that they were warned away, but I
never heard of it before that time.
Now is it not a fact that as far back as you can remember that
territory lying westward from Isle à Pitre towards the Missis-
sippi river has been generally regarded as a part of the par-
ish of St. Bernard in the State of Louisiana?

A. No sir. My first recollection about any thing out there,
in that section of the country was the question where the
uisiana and Mississippi lines had passed through that marsh, and
metime in the '80's there were some beacons out there. I never
l learn who they were put there by, whether by the United States
vernment in making some of their surveys or the Mississippi or
uisiana people. I never did learn why they were put there. I
n't recollect now where they were but I have heard it said that
re were some of the surveyors surveying the two State lines, but
don't know who put them there, but I know that it was the talk
ith the boatmen that this is where they were laying out the lines.
Q. That you say was some time in the '80's?
A. Yes sir.
Q. Prior to that time in the '80's which you have mentioned was
ot that territory generally regarded as a part of the parish of St.
Bernard and of the State of Louisiana?
A. No sir, I never did know it to be a part of it.
Q. Did you ever hear of any claim prior to that time being made
that that territory was a part of the State of Mississippi?
A. I don't understand that question.
Q. I say, prior to that time did you ever hear of any claim being
made on the part of Mississippi that the disputed territory was a
part of the State of Mississippi?
A. No sir.
Q. You never had?
A. It was generally understood with all of the boatmen that the
Mississippi lines went 18 miles from the main line, and in fishing
oysters out there it was just like it was out there for everybody.

cially, but it was their intention to do so, but my recollection is now that the laws of Louisiana prohibited dredging of any description.

Q. In what kind of a penalty. They made it a felony did they not?

A. I don't know sir. I don't remember, but the laws of Mississippi permitted dredging.

Q. And the fishermen of Mississippi dredging in this territory were liable to be picked up and prosecuted and their boats confiscated?

A. Yes sir for using dredges. It was intended more as an armistice pending the determination of the local question as to where the boundary was.

Cross-examination.

By Mr. DYMOND:

Q. I understand it that you were not in Bay St. Louis in January or February 1898?

A. No sir I came to the coast on April 1st, 1898.

Q. Where did you live previous to that?

A. In north Mississippi.

Q. Therefore if in January 1898 the police jury of the parish of St. Bernard made up an armed expedition to go through the Louisiana marshes and expel therefrom non residents in complying with the Louisiana law you were not aware of that fact at that time?

A. I had not any knowledge of it living 300 miles away from this section.

Q. You were aware if I am not mistaken that the governor of Louisiana appointed a boundary commission and that the governor of Mississippi appointed a similar boundary commission in February 1902 to see if it was not possible to amicably adjust this dispute in regard to the boundary?

A. Yes sir, I know that there was a commission appointed by the governor of each State with reference to the disputed boundary between the two States.

Q. If there had been any agreement reached by those two commissions was there any thing in the law of Mississippi or in
1745 the law of Louisiana which would have prevented these two legislatures of these two States subsequently ratifying the actions of these commissions, and Congress from also subsequently ratifying such an agreement?

A. I don't remember any provision of the constitution of Mississippi as to that, but as to the legislative branch of the government, it would be a question within its power, a ratification by the legislature of the State of Mississippi. The act of the commission would have no effect at all in the absence of legislative authority and legislative ratification.

Q. But the legislature had full power to ratify the action if it chose to do so?

A. I think so.

Q. Is it not a fact that the boundary of the State of Mississippi in its relation to the State of Tennessee some time ago was settled by commissioners under authority of legislative action or otherwise?

A. There was a dispute about the northern boundary line of Mississippi, the details of which I can not recollect now, but it is my information, my recollection, it is a historical fact that there was a commission appointed to settle it.

Q. You knew did not you, Mr. J. H. Neville, who was at one time district attorney and subsequently judge in Mississippi?

A. I knew him very well.

Q. Just prior to 1898 did not Mr. Neville; had not he been district attorney here for a number of years?

A. For several years. I think that he resigned either the first of 1896 or the first of 1897, possibly 1897 as district attorney, which office he had filled for several years. He was appointed circuit judge in May 1902 I think it was.

Q. Had not he been district attorney long enough for it to become a well recognized fact through this section of the country that he was district attorney, and had been district attorney for quite a while?

A. I think it was generally known by the people here that he was district attorney.

Q. Did you know in the early part of 1898 or towards the middle of that year that he had called on the district attorney of the parish of St. Bernard in connection with *the some* other Mississippians from that section of the country?

A. I have no knowledge or recollection of any matters of that sort.

Q. As I understand it you were the counsel advising the Oyster Commission of Mississippi at the time it held its conference in the city of New Orleans with the Oyster Commission of Louisiana concerning this disputed territory in September 1902?

A. I was the legal adviser and attorney of the board.

Q. You were aware of the fact were you not that under the oyster law of 1902 of Louisiana, that the Louisiana Oyster Commission was authorized to maintain an armed patrol to enforce the oyster law of Louisiana in the State of Louisiana?

A. It is my recollection that is one of the provisions of the law.

Q. You knew also did you not that the State of Mississippi through its oyster commission was likewise authorized to maintain a patrol?

A. I knew that.

Q. Do you recollect the gentleman's name who was president of the oyster commission at that time?

A. Mr. Haddlestadt.

Q. Do you recollect that during that conference a statement was made by me that in the absence of an amicable agreement that the State of Louisiana would be compelled to use its oyster commission to enforce the law in what it, the Oyster Commission of Louisiana,

considered to be the State of Louisiana, and a counter statement from the president of the Oyster Commission of Mississippi that if Louisiana used force, that Mississippi would be compelled to protect itself in some similar way?

1746 A. I remember some thing in effect but do not remember the language.

Q. Is it not a fact that things got sorter warm there for awhile until they were quieted down by the amicable agreement?

A. I think there was a little temper displayed.

Q. While it may be perfectly true that neither commission had any authority to make this amicable agreement, was not — in your opinion, as the adviser of this commission, for the best interests of both sides that some amicable agreement should be made pending the settlement of this dispute?

A. I think so, and advised the commission to that effect. The commission of Mississippi.

Q. From your knowledge of local conditions in the absence of such an agreement would not there have been a likelihood of trouble, if there was an *affort* by them to enforce the laws of their respective States on the part of the officials?

A. On the idea that two bodies cannot occupy the same space at the same time, there would have been trouble if the commission of either State had attempted to exercise jurisdiction.

Redirect examination.

By Gen. McCLURG:

Q. As I understand it, in spite of the fact that the Constitution of the United States and of the States of Louisiana and Mississippi provided for the settlement of controversies between two States as to the boundary lines between those two States, that the oyster commissions with certain delegated powers from each State, got together down there and undertook to usurp the constitutional powers of the Federal Government, and the two States government-, and tied the hands of the State as to where they should not go. I am talking about the persuasive features and not the legal features?

A. I don't understand that it went to that extent of persuasively fixing the boundaries of the two States, but fixing a certain zone which was conceded to be in dispute between the two States, in which the fishermen might go pending the determination of the case.

Q. Now is it not also true that the legislatures of both States have met since this meeting, and neither State recognized any dispute as to the lines between the States by legislative acts, and did not ratify what had been done by the oyster commissions?

A. I can say this. That Mississippi has not taken any action so far as I know, and I have read over the acts of 1904. What action Louisiana has taken through her legislative body I don't know.

Q. You remember that the governor of Mississippi called the at-

tion of the legislature of 1902 to this matter and no action was
ken by the legislature of Mississippi?
A. I really don't recollect the circumstance. It may be that that
the case.

Recross-examination.

By Mr. DYMOND:

Q. Is it not a fact that in calling the attention of the legislature
this subject the governor mentioned the fact that an amicable
uit had been suggested to be filed in the Supreme Court of the
nited States?
A. I really don't recollect any thing was done in Mississippi by
he governor of Mississippi in regard to it.

J. D. MINOR, a witness introduced on behalf of the State of
1747 Mississippi being duly sworn, testified as follows:—

By Gen. MCCLURG:

Q. Where do you reside, Mr. Minor?
A. At Ocean Springs.
Q. In what county?
A. In Jackson county, Mississippi.
Q. How long have you resided in Jackson county?
A. I have resided in the county for 39 years.
Q. Have you ever held any official positions in the county and if
so I wish you would please tell us what they were and the dates that
you held them?
A. In 1895 I was the sheriff of the county. 1895 and 1896, and
1902 and 1903 I was sheriff of the county.
Q. Well during the time that you filled the office of sheriff of
Jackson county if you knew of any serious conflict between the
officers of St. Bernard parish Louisiana and the officers of Harrison
county Mississippi or any other portions of the State of Louisiana or
any other portions of the State of Mississippi respecting the boundary
lines of these two States please mention it?
A. No sir, I never knew of any controversy between them.
Q. Have you any information or knowledge from any source
whatever as to any dispute in the waters of the Gulf as to the line
between the two States during this time?
A. No sir, I never knew of any dispute until the last four or five
years. I don't remember exactly when the commencement of this
controversy took place, but it was some time before this law suit.
We were out a good many times to make arrests out there and we
just went on and did it. And we thought we had a right to go.
Q. To what extent did the officers of Jackson county exercise
sovereignty and jurisdiction south of Mississippi's land?
A. For 18 miles south of the shore line.

Q. Have you ever been engaged in the oyster business Mr. Minor?

A. Well I have caught some oysters in the marshes. The first time I went in the marsh I think was about in 1880. I won't say positively the different years, but from 1880 to 1890. For the ten years off and on.

Q. During this time was there ever any trouble at all about the State line?

A. No sir.

Q. Have you ever been a member of the Mississippi Oyster Commission?

A. Yes sir.

Q. When were you first appointed?

A. I was appointed when the commission was first formed. It will be two years next September 1902.

Q. Were you — of those who made an agreement with the Oyster Commission of Louisiana as to the neutral zone?

A. Yes sir, I was at the meeting in New Orleans.

Q. Where is that line?

A. The line that we agreed on on that day?

Q. Yes sir?

A. Well we began at the mouth of Pearl river and run to Malheureux point, and we followed the marsh to Grand pass, and then out to Sundown island, a northeast direction until we struck Cat Island channel.

Q. Well now that was the line. What was the agreement as to the line?

A. The agreement was that the two commissions would respect the license of either State.

Q. Up to that line?

A. Up to that line. That is if a Mississippi boat was in there with a Mississippi license why the Louisiana boats would pass her by as though she was in her own territory. The same with Louisiana.

Q. It was agreed that Mississippi boats should not cross
1748 that line into the marshes without a license from the State of Louisiana?

A. Yes sir, she would have to be licensed.

Q. The Louisiana fishermen should not cross this line?

A. No sir. It was from what was supposed to be the deep water channel to the marsh that was considered neutral ground. Both States could fish in there until the determination of this suit.

Q. Where was the territory that both States could fish in?

A. Beginning with Pearl river and going to Malheureux point, and down through Grand pass out to Sundown island, and then in a north east direction to Cat Island channel, and then following Cat Island channel back to where we started from.

Q. Following the channel?

A. Yes sir.

Q. What they term the deep water channel?

A. I term it the Cat Island channel.

Vell between that channel and that line both States could there?

Both States could fish in there provided they had a license ither State.

And below that line. South and west of that line Mississip- could not go?

And north of Cat Island channel the Louisiana people could ?

They were not permitted to go unless they had a Mississippi e.

That then deprived and debarred the Mississippi boats and ssippi fishermen from going into the marshes west of Grand

South of that line.

They were cut out of that entirely?

They were cut out of that entirely.

Now that was the action of the joint commission of the two s?

Yes sir.

Did they undertake or understand that the two States, or the ens of the two States were to be bound by that?

No sir, it was understood that this agreement that they were king had no legal standing. That is that either State could ik away from it, or the citizens of either State need not pay any ntion to it. The idea was to make this agreement so as to do y with any difficulty that might come up in the boats going into s territory.

Q. And if the Mississippi boats would not cross that line they uld not be arrested by the Louisiana authorities?

A. No sir.

Q. But if they did they would be arrested?

A. Yes sir.

Q. And *vice versa*?

A. Well no, with our lines it was different.

Q. How was it on our lines?

A. Louisiana could come in on our lines provided she took out a lississippi license.

Q. The Mississippi boats could not go into the Louisiana territory ith a Louisiana license?

A. She could go in there with a Louisiana license, but she must tay in Louisiana. The oysters had to stay in the State.

Q. Could the Louisiana boats come into Mississippi territory with a Mississippi license and haul oysters back to Louisiana?

A. Yes sir.

Q. It looks like Mississippi was playing a losing game, does not it?

A. The oysters from Mississippi were carried into Alabama from Mississippi last year. They paid a two cent tax.

you state the commercial importance of that business to the State of Mississippi?

A. I have prepared a paper here, and I want to say in this connection that I was selected as chairman of the testimony committee from the Commercial Club. As such I have tried to gather different things that might be useful.

Q. If this is correct you can file it as your statement.

A. I have prepared what I consider as a statement which in my judgment is as near correct as it can be and which I now submit.

The statement above referred to is here offered and introduced in evidence and is marked Exhibit A to the testimony of this witness.

Exhibit A furnished by the witness as an exhibit to his testimony is here filed as a part of the testimony in this case, and a copy thereof is furnished to counsel for the State of Louisiana.

By Mr. DYMOND: To which offer the counsel for the State of Louisiana object and except on the ground that it has no relation to the subject matter in controversy in this suit. And it is a statement in regard to the assessed values of property, and the cost and the value of the products produced in the counties forming the coast of the State of Mississippi, together with the statement as to the population of the several counties and the number of boats and vessels, without relation to the subject of oysters, or the territory in dispute in this case.

Cross-examination.

By Mr. DYMOND:

Q. As I understand it you have been familiar with the oyster industry on the coast for the past 18 or 20 years?

A. Yes sir.

Q. And have taken quite an active interest in the matter from the Mississippi point of view?

A. Yes sir.

1760 Q. Was I correct in understanding you to say that the first knowledge that you had of the dispute between Louisiana and Mississippi was when the two oyster commissions got into a dispute over the revenues that would come from the disputed area?

A. I can say that there was no contention or conflict until the Oyster Commission of Louisiana started to look into the question for revenue. There was no conflict or contention prior to that time so far as I know.

Q. Well as I understand it you say that in January 1902 the State of Mississippi appointed an oyster commission on the suggestion of the canning interests of the State of Mississippi thinking that by the production of a revenue the oyster interests could be better protected, and subsequently in the month of May 1902 the State of Louisiana appointed a similar commission who also provided for a

enue following the statute of the State of Mississippi, and it was
a result of this that there developed a dispute between the two
ates, especially over the revenue which was to come under the
eration of the two oyster laws?
A. Well now that is a very lengthy question and I would like to
plain it fully. There was no confusion or any thing of that sort
til the Louisiana commission did according to the views of the
ssissippi authorities usurp their authority arbitrarily by going
on these grounds and putting a patrol boat there for the purpose
arresting citizens of Mississippi. That is what brought about the
ginal question as to bringing about some amicable arrangement
tween the two commissions on a working basis.
Q. Well now Mr. Stenographer will you please refer to the testi-
ony of Mr. Heidenheim where he gave his explanation of the
rt of the controversy and read it to Mr. Heidenheim so that he
y refresh his memory as to what he has just testified to?
(The former testimony of the witness is here read over to him from
e stenographer's notes.)
Q. Mr. Heidenheim, have you heard your testimony as re-read to
u by the stenographer?
A. Yes sir, I heard that.
Q. Is that statement correct as you have heard it reread to you?
A. Yes sir, that is correct to the best of my knowledge and belief
s sir.
Q. Then as I understand it the dispute originated in 1902 between
e two oyster commissions that were appointed by the respective
ates to control the oyster industry of the respective States?
A. I hold to the original position that this conflict is due to the
ster commission sending a patrol boat into Mississippi, and that
e whole dispute rests upon that.
Q. When was this?
A. By sending a patrol boat into Mississippi and it was due to
at act.
Q. When was this done?
A. It was right after I think the Louisiana commission took pos-
ssion.
Q. After the Louisiana commission was created by act No. 153 of
e legislature of Louisiana of 1902. Then the patrol boat that you
fer to was the patrol boat of that commission?
A. No sir.
Q. It must have been subsequent to the creation of the commis-
on?
A. I think it was in 1902.
Q. You never heard of any dispute prior to that?
A. No sir.
Q. Now were you in the oyster industry in 1898?
A. Yes sir.
Q. Did you ever hear of an expedition having been gotten up by

the police jury of the parish of St. Bernard, State of Louisiana in January or February 1898, sent out by the sheriff of the parish of St. Bernard to warn from the Louisiana marshes non residents fishing there?

A. No sir, I never heard any thing of that.

Q. Did you ever have any of the fishermen to report to you

1761 that they had been expelled from that section?

A. No sir, not prior to 1902.

Q. Then as I understand it definitely and positively you had never heard any thing of the dispute prior to 1902?

A. No sir, not until these patrol boats got on our waters.

Q. And these patrol boats did not go until 1902?

A. As far as I know there has never been any patrol boat out there until 1902.

Q. You could not be mistaken about this?

A. No sir, not as I remember.

Q. I would like now to give you the benefit of every opportunity to put yourself on your guard and refresh your memory in regard to this?

A. Well as far as I know we never had any trouble until 1902 when the oyster commission was created.

Q. Now Mr. Heidenheim as I understand it you persist to state that it was 1902 when there was first any dispute as to the boundary or any endeavor to enforce the rights of the State of Louisiana?

A. That is the first information that we took any interest *any interest* in was in 1902 after the commission was formed.

Q. Now is it not true that there was held in the city of New Orleans on January 19th 1901, a meeting presided over by the governor of the State of Louisiana wherein resolutions were passed and a communication was written by the governor of Louisiana to the governor of Mississippi requesting the governor of Mississippi to appoint a boundary commission to see if it was not possible to settle this dispute amicably between the oyster commissions to be appointed by the respective governors?

A. I don't know anything of that.

Q. You are quite positive that you know absolutely nothing of that fact?

A. No sir, I know nothing of that fact.

Q. You are quite positive that you never took any steps that had any relation to that fact?

A. Not that I know of no sir.

Q. Did you ever have any conference with the amicable boundary commission which was appointed by the governor of Mississippi and did you ever give them the benefit of your advice concerning what you considered to be the Mississippi line?

A. Well when they first met in New Orleans I did give them the benefit of some advice.

Q. When was this?

A. I don't remember exactly the year now. I think that it was

t ten or fifteen days before they went to New Orleans that we
them some advice. I believe I was one of them that did.
You refer now as I understand it to the amicable boundary
mission that was appointed by the governor of Mississippi A.
Longino, to confer with a similar commission that was appointed
the governor of Louisiana?
A. Well I don't know that I understood it in that way. I under-
sd it that they were to go to New Orleans and have a conference
ether. That is the way that I understood it.
Q. You will please refer to the bill of complaint——
A. I want to correct that one minute please. There was a com-
ittee appointed. I got the oyster commission mixed with this
mmittee that you speak of. There was a committee appointed by
e governor as you say. Mr. Bowers and Mr. Neville and so on.
e thought that we had no choice as far as the packers were con-
rned. We had nothing to do with this committee at all.
Q. What committee is that?
A. That is the commissioners. The commissioners. I remember
hen they were appointed, and that we gave them no advice at all.
Q. Now you will notice that this letter of Governor Longino is
ated February 9th, 1901?
A. Yes sir.
Q. And you notice from this Exhibit "D" attached and
1762 made a part of the original bill of complaint on the part of
the State of Louisiana that this commission met in joint ses
sion on the 26th of March, 1901?
A. Yes sir.
Q. Did you as a citizen of the State of Mississippi having at heart
the welfare of the oyster industry of the State have any conference
with this Mississippi Boundary Commission either before or after it
met the Louisiana Commission in joint session in New Orleans on
the date designated?
A. I was present before this commission went to New Orleans and
there was one time, that I remember Mr. Bowers, if I am not mis-
taken, Mr. White and Mr. Ford, that is had a conference that I was
present at, but it was unanimously decided to maintain the bound-
ary line as laid down by the statute.
Q. Had you had any discussion with the commission at that
time?
A. No more than we conferred together. I think that Mr. Joul-
lian was present in this conference too. I think that it was Mr.
White, Mr. Bowers, Mr. Ford, Mr. Joullian and myself. I think
there were one or two more.
Q. Did you give that commission the benefit of your advice in
regard to the matter?
A. We just told them just what we tell you now. That we always
understood that 18 miles out from Pearl river to Pascagoula was
the boundary of the State of Mississippi.

Q. Did you give them the benefit of any study or investigation that you had made in connection with the matter?

A. I don't think that question came up at all, because Mr. White is as familiar with that question as we are ourselves, having been counsel for the oyster packers here for years, and that line of argument was therefore not necessary.

Q. Then as I understand it do you now persist in your original statement that you knew of no dispute prior to the month of September 1902 as to the boundary between the two States?

A. I mean to say that there was in 1902—I remember this transaction of 1901. I don't deny that. Now if there was any dispute with reference to oysters prior to that time we were not interested in it because as I understood it it was brought about by dredging, and this was practically no conflict at all, but it was a contention about dredging, at that time before as you say the real contention. There was no such thing at all until that patrol boat came into existence.

Q. I would like to get clear on this point. Do you maintain that this is a dispute between two States as to oysters or as to boundaries. Which is the important thing that the States are trying to settle?

A. I think that the question of oysters in this matter is only a secondary question.

Q. Is not the question of boundary the principal point?

A. The question of boundary and therefore I hold in the question of boundary there was no dispute.

Q. Is not the matter of oysters simply a result that flows from the settlement of the boundary?

A. Well I don't know that it is. I look upon the boundary question; the question of jurisdiction as of the highest importance involved therein.

Q. And the other oyster question is secondary?

A. The other is secondary, so if there would be no oysters or would be oysters. There may be gold mines out there or some thing else. There might be some thing leading up to it.

Q. If the boundary was the important matter, is it not a fact that the boundary issue was officially under consideration since the month of March 1901?

A. That might have been possible.

Q. Don't you know about that?

A. Well the only thing I know about it was I remember the first trouble we had with the patrol boat, which went on the ground trying to keep our people out of here. If that was 1901 or 1902, I am not positive.

1763 Q. Now did you ever take any steps to determine from official records what was the boundary between the States of Louisiana and Mississippi?

A. Well that is a question that I think had better be left to legal talent. I have had a resort to everything that money could buy in

the way of books and library and so on. It would take three weeks to tell you all that I know on it.

Q. Reread the question to the witness and get him to answer it yes or no, and then to explain afterwards if he desires to make any explanation?

A. I can answer that right straight and say yes. Yes sir.

Q. Did you give the benefit of the data that you so obtained to the amicable boundary commission appointed by the governor of the State of Mississippi?

A. No sir, because I have only read it since the question has been in the court.

Q. Then as I understand it you took no steps prior to October 1902 when this case was filed in the court?

A. What I want to get straightened out was, I do not deny that we were in the office with Mr. White, whatever year that was in, and Mr. Bowers and Mr. Ford I think it was, and as I stated the question did not come up as to what we knew of oysters because we knew that Mr. White was fully informed, but the question was gone over and maps submitted and everything gone over, and the contention there was the boundary line was as the act made it.

Q. You spoke of the submission of maps to Messrs. Bowers and Ford and White, members of the Amicable Boundary Commission of Mississippi?

A. Yes sir.

Q. Was this prior to the report made by that commission on July 20th 1901, when it made its final report to the Commission of the State of Louisiana?

A. That is all the conference that we had. They called us in to ask us what our opinion was on it and we gave it to them.

Q. I will have the question reread to you. "Did you give the benefit of the date that you so obtained to the amicable boundary commission appointed by the governor of the State of Mississippi?"

A. Yes sir.

Q. What maps did you submit to this commission?

A. We did not submit them any maps. They had the map and asked us our opinion of it.

Q. What map was it that they had?

A. I don't know.

Q. Did you have any maps at that time?

A. No sir.

Q. Did you have any papers at all at that time which you had gotten as a result of your investigation on this subject?

A. We had the charts of the United States Geodetic Department. We had the Fish Hawk map and one that they had in a book. I don't remember which one that was.

Q. Were these all of the maps that you had?

A. That is all that I remember.

Q. Could you possibly have had any other map that you now do not remember?

suggested by any body that the courts of the country could settle these matters. Did any body ever say that the civil courts could try men for violating the oyster laws like they did for violating any any other law, murder or larceny?

A. No sir, that question was never brought up. It was understood by all hands that this agreement we were making there was nothing binding on either State.

Q. That is not the question. I am asking you if in the general discussion in fixing on these lines; that is the neutral territory, if any body ever suggested that the courts of the country could settle all of this dispute, or were you absorbed in the idea of armed
1755 fleets and patrols and things of that sort?

A. No sir, it never was suggested.

C. JOULLIAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McCLURG:

Q. Where do you reside?

A. Biloxi.

Q. How old are you?

A. 40.

Q. How long have you lived in Biloxi?

A. 16 years.

Q. That is in Harrison county?

A. Yes sir.

Q. What is your present occupation Mr. Joullian?

A. Oyster and shrimp canner.

Q. How long have you been engaged in that business?

A. In the business actually; the canning of oyster- and shrimp for seven years. Oysters seven years, and shrimp 14 years, and previously shipped oysters about eight years.

Q. Where have you been taking your oysters and shrimp. In what territory?

A. Where I have been getting my supply of raw material?

Q. Yes sir?

A. From the territory down here in front of Pass Christian, and Bay St. Louis, Waveland, and some from Pascagoula, and some from Alabama, and some from down at Grand pass, and some from down in the marshes which might be termed Karako bay, and Fox bay, and Drum bay, and Bayou Greecue and Cranetown, and Three Mile bayou and Jack Williams, and a half a dozen other places down there.

Q. Where did you find the best oysters for the raw trade?

A. I am not in the raw trade now.

Q. Well when you were in it?

A. Out of Louisiana marshes.

Q. You understand do you this agreement that the two commissions entered into?

A. Yes sir, I understand that agreement fully.

Q. That precludes Mississippi boats from going in there and bringing raw oysters into Mississippi does it?

A. Yes sir.

Q. I believe you stated that the best raw oysters are found in the marsh.

A. Yes sir, I will qualify that by saying in any quantity. In a commercial quantity.

Q. It is alleged in this bill of complaint that there was contention over the line dividing the two States. That at the time of filing the bill on October 27th, 1902, there was a threatened armed conflict between these civil officers of St. Bernard parish Louisiana, and Harrison county Mississippi. Did you know anything about any such condition of affairs having existed prior to October 1902?

A. No sir.

Q. Did you ever hear of anything of that sort?

A. No sir.

Q. It is also alleged in this bill of complaint Mr. Joullian that the true line dividing the two States was this deep water sailing channel, commonly called Cat Island channel I think. You know where that is?

A. Yes sir, I know where that is.

Q. Do you know anything of that line being recognised as the true dividing line between these two States?

A. Not prior to the claim as set up by Louisiana.

1756 Q. The commercial interests as we understand it Mr. Joullian, are considerably involved in the correct adjustment of this matter, and I would be glad if you would state to the commission some thing of the importance of this matter to the commercial interests, especially with reference to fish and oysters and shrimp and that sort of commerce, in order that we may get in the record some idea of the commercial interests involved.

By Mr. DYMOND: The above question is objected to by the counsel for the State of Louisiana on the ground that the results flowing from a correct legal interpretation of the disputed boundary issue have nothing to do with this case, and are therefore irrelevant.

A. Well to the best of my calculation the present consumption of raw material and oysters on the coast by the factories that are situated within Mississippi would amount to some thing like a million and a quarter barrels for all purposes. Canning and bulk oyster trade, and a million of shrimp which is the only fish practically canned. It would amount to some thing like ten thousand barrels as near as I can judge. The finished product from this raw material after being turned out by the canneries would amount to near two millions of dollars.

Q. Well taking the oysters and the prosecution of the oyster interests in the territory you have described. What State were you in?

A. In Mississippi in transacting my business.

Cross-examination.

By Col. ZACHARIE:

Q. Mr. Joullian what name is that territory west of Isle à Pitre and running towards the Mississippi river called generally amongst the fishermen and people along this coast?

A. You mean the marshes where they take the oysters?

Q. Yes sir?

A. They have been known and called by people that I have come in contact with Louisiana marshes. I have seen them described on the survey of the United States Government at one time as the Grand marshes.

Q. You gave us some mental estimates both of the raw products and the finer products received and turned out by the Mississippi canneries. How large a proportion if you can fix it of this raw material was derived from that territory west of Isle à Pitre, and from these islands, the Malheureux islands in that neighborhood?

A. Well now that would have to be answered in a way that would supply the separate intervals. I will say that prior to the time that Louisiana set up her claim to the line of the deep water channel that ninety per cent. of oysters used for canning and raw came from the lands west of this line as claimed by Louisiana. Since Louisiana has set up this claim I think it can safely be said that sixty to seventy per cent. is gotten from east and north of this line.

Q. Outside of the disputed territory?

A. Yes sir. I can only answer that in so far as my individual business applies to. I don't know where the others get their oysters.

Q. I think you said if my memory serves me right in your examination in chief that you never had heard of any threats or trouble or armed conflicts between the officers of the State of Mississippi and those of Louisiana until the beginning of this suit. You were in this business in 1898 were you not. The same business?

A. Yes sir.

Q. Did you not at that time hear complaints from your fishermen and boatmen employed, and by others that they had been threatened with arrest and ordered to leave this territory?

A. I did not hear that they had been threatened with ar-
1757 rest, but the fishermen reported that some dagoes had ordered them to leave the marshes without any authority whatever.

Q. Did you or did you not hear of an armed expedition or posse being set on foot by the sheriff of the parish of St. Bernard in the State of Louisiana, and that came down and drove these people out and warned them off, the Mississippi fishermen from this territory?

A. No sir, nothing in any manner official.

Q. Of course you knew of the appointment of these boundary commissioners and their deliberations and meetings that they held in

January 1901. That was about 18 months prior to the institution of the suit in October 1902?

A. I would like to get that part of it straight. I considered that the beginning of the matter when it was set up by Louisiana that she had the sold right to the territory as she now claims it.

Q. You speak of the beginning? The papers were filed when?

A. The papers were filed some time subsequent to that.

Q. In October 1902?

A. Yes sir.

Q. You knew of the meeting of these boundary commissions and the discussion and so on?

A. Yes sir.

Q. When it took place in January 1901?

A. Yes sir.

Q. Have you ever visited this territory yourself?

A. A portion of it. Not all of it.

Q. Which portion of it?

A. The northern portion of it.

Q. That is along the shore line of the sound?

A. Yes sir, along the shore line.

Redirect examination.

By Gen. McCLURG:

Q. I understand you to say Mr. Julicun that you regard the initiation of the suit to be some time prior to the actual bringing of the suit?

A. Literally yes sir, I would judge it could be called the initiation of the suit when Louisiana set up her claim for this territory as she now claims it.

H. HEIDENHEIM, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. McCLURG:

Q. Where do you reside?

A. I reside at present in Biloxi, Mississippi.

Q. How long have you resided in Biloxi?

A. For about 20 years.

Q. What is your business?

A. At the present time I am the secretary of the Barrataria Canning Company and manager of the Biloxi plant.

Q. How long have you been engaged in that business?

A. About 18 and ½ years.

Q. The Barrataria Canning Company as I understand it is engaged in the oyster and shrimp business?

A. Yes sir.

Q. And it is located in Biloxi?

A. Biloxi, Mississippi.

Q. Where has your company been getting its oysters and shrimp?

A. Oysters and shrimp? They have been getting them out of the waters of the Mississippi sound. Principally out of the grounds that we understood to be Mississippi territory.

Q. Designate to the stenographer now what you considered to be Mississippi territory?

1758 A. We always considered Mississippi territory to include all that territory, beginning at Pearl river and running in a southern direction about 18 miles out, and then extending in an easterly direction down as far as the marshes went. Ten miles on the other side of Pascagoula.

Q. You have read the act of Congress admitting Mississippi into the Union and the statutes of the State of Mississippi defining her boundaries have you?

A. Yes sir.

Q. In taking oysters and shrimp for your factory within the limits that you have mentioned, in what State did you consider that you were exercising that privilege?

A. We always considered that we took our oysters in the State of Mississippi.

Q. It is alleged in this bill of complaint Mr. Heidenheim that there was such contention as to the boundary line between the two States in the waters of the sound or Gulf, that at the time of the filing of the bill of complaint in October 1902 there was a threatened armed conflict between the officers of St. Bernard parish Louisiana and the sheriff and officers of the county of Harrison Mississippi. If you have any personal knowledge or any information as to such a condition of affairs I wish you would please state what it was.

A. Well as far as that is concerned that was all imaginary. For 20 years we have been getting a supply of oysters out there and never had any conflict or trouble in any shape or form. We never had any trouble until there was a revenue laid on the part of the State of Mississippi by appointing commissioners, and *the* Louisiana then followed up the Mississippi commission.

Q. That Mississippi commission was appointed in 1902?

A. That Mississippi commission was appointed in 1902, and a revenue bill framed. It was framed on the ingenuity of the packers. It was to cull oysters and protect the reefs etc. Shortly after that Louisiana also framed a bill and a commission was also appointed, and as the contest then arose between these two commissions as to getting this revenue, then the conflict was brought up between the two States which was all imaginary. There never was any conflict. If there was a conflict it was the two commissions trying to get the revenue, as to which one would get it. Prior to that time, and prior to the formation of these two commissions every thing worked amicably, and my opinion is they would be working amicably today if it was not for the question of revenue. That was at the bottom of it.

Q. And that originated in 1902 you say?

A. I don't know exactly what year it was, but it originated shortly after the Louisiana commission was put in legal force, and legal working order.

Q. Now during the 18 years that you had been engaged in the canning business up to that time, if you had ever heard any dispute or controversy of any kind over the location of the State line we would like to know it.

A. No sir, there was never any dispute raised up to that time which I think was 1902.

Q. Now it is also alleged in this bill of complaint that this Cat Island channel or deep water sailing channel out of the mouth of Pearl river by Cat island, north east of Chandeleur is claimed by Louisiana as the true dividing line between the two States. What have you heard of that before if any thing?

A. My contention is that that contention is unsound and contrary to reason. If that was right Louisiana would have 34 miles, which is her coast line to Chandeleur.

By Mr. DYMOND: Objected to on the part of the State of Louisiana on the ground that the witness has not qualified himself to speak as an expert in regard to the legal correctness of the deep water channel as the boundary dividing the two States.

1759 A. I claim if that contention was sound that the boundary line from the coast of Louisiana to Chandeleur would be 34 miles or about that. Furthermore it is contended that it is not in the strict meaning of the language as I understand it defining the boundary line of the State of Mississippi and Louisiana.

Q. You mean the line that is defined in the law?

A. Defined in the different acts creating the several States. It is not within the meaning of the English language as the boundary line reads.

Q. Mr. Heidenheim, you are familiar with the oyster industry generally in Mississippi are you?

A. Yes sir, that is so far as the oyster industry is concerned. I have only been in the marshes about six or seven times. I might have been out there ten or twelve times in the 18 years that I have been out there.

Q. When were you first out there?

A. The first time that I was out there was in the year after I came here. That was in 1886.

Q. When were you there last?

A. The last that I was there was about; I think it was about four years ago.

Q. Have you noticed any difference in the general configuration or conformation of the marsh territory between the time you first went there, and the last time you went there tell us what it was?

A. No sir, it has always been practically the same.

Q. You are familiar with the oyster and fishing industry generally down along the Mississippi shore. I would be glad to have

There were no restrictions there or nothing. There would be camps out there and a big pile of men living in them.

Q. A big pile of men living there?

A. Yes sir.

Q. At what time?

A. The first camp that was built out there was built by some Baltimore people that built a cannery at Pascagoula. They had their camps built at Cranetown pass.

Q. When was this?

A. The camps were out there before I went out there. They abandoned the camps just about the time I went in the marsh. In the '80's.

Q. Did they have a store there?

A. I don't know what all they had there. They had some big buildings there.

Q. Can you name some other parties who had camps and buildings there?

A. No sir, those are the only people that had any thing there.

Q. Did you know the Biloxi firm, later on that had a camp and store there?

A. That was put up after I was out there.

Q. What was the name of this firm Ondrons and Wensel?

A. I don't know anything about that.

Q. Did you ever know of any Mississippian from Hattiesburg who had a store established on Three Mile bayou?

A. No sir, I don't know any thing about it.

Q. Then I understood you that while it was claimed that the Mississippi line extended 18 miles south, you never heard or understood exactly where this territory terminated?

A. No sir.

By Mr. DYMOND:

Q. You stated in your redirect examination awhile ago Mr. Minor that in your personal opinion you thought that the attitude of the two oyster commissions in their conferences and in their contentions was more of a bluff than any thing else. That was your personal opinion simply was it not?

A. Yes sir, and I don't think any one else thought otherwise.

Q. If your judgment in that respect had been in error and if you had acted on your judgment that it was a bluff and had refused to enter into an amicable agreement would not it have been in your opinion rather a risky thing to do, to conclude that it was a

1754 bluff?

A. Well in my judgment it was the best thing that we could do.

Q. Well did you not think it was too serious to run the risk of calling that bluff?

A. What I mean by the word bluff; that what they were doing would not bind any body. It was just sorter laying down some

; where we were trying to keep out of any trouble that might

When you used the word bluff you did not intend to belittle eriousness of the condition, where ten men of intelligence were g to do the best they could under the existing circumstances?
No sir, I did not use it that way.

By Col. ZACHARIE:

Mr. Dymond may be more familiar with the terms of poker you are. He asked you if you did not think it was too serious ll the bluff. Did you not think it was such a serious matter you could not afford to test it, as to whether it was a bluff or
In other words you did not propose to carry out what you con-red your full rights for fear that there would be a collision of e kind?
. Why certainly I thought that was best for all hands was what lid. We did a good deal of bluffing before we got to that line. Louisiana people wanted us to go back further than what we and we wanted to go further south than what they agreed to, that is where we were doing the bluffing.

Redirect examination.

By Gen. MCCLURG:

Q. Now I want to ask you Mr. Minor with reference to these ffing games that were played down there. All of this blood and nder that was raised about armed conflicts and the like of that. t any time before these two commissions met in Mr. John Dy-nd's office in New Orleans and assumed legislative, judicial and ecutive authority; with all the powers of the army and navy and Government, if there had ever been a single act of violence?
A. I had never heard of any.
Q. There had never been a single serious contention between the ople of the two States that you can recollect out there?
A. No sir.
Q. And so this was gotten up and discussed. When they got wn there and talked about what might be done by armed patrol ats and the like of that. That was a regular bluff game. Is that t about the size of it?
A. Well the newspapers were full of it, and it was talked by the atmen that it did not matter whether Louisiana armed a boat and t it out there or not, but what they would go ahead and fish these sters.
Q. That is what Louisiana claimed?
A. The Mississippi boatmen. It was given out after this act was ssed in the legislature. The law claimed that they had the right arm vessels and keep any body out of the State, and these men ought that they had the right to go there.
Q. In all of this discussion by these two commissions was it ever

A. You can find it in the atlas of 1850.

Q. Whose atlas?

A. Now I think it is Collins' if I am not mistaken.

Q. Don't you know as a matter of fact Mr. Heidenheim that it was not until 1840 that this body of water got any name at all?

A. No sir, it was called Pascagoula sound prior to 1850, and then it was called after that Mississippi sound, and Lake Borgne was a part of Pascagoula sound. A sound is a body of water connecting the — with the deep sea.

Q. Will you please look at this map marked map No. 19, offered by Louisiana and state whether you see any Mississippi sound as given to the body of water now called by that name. The map being B. Lafond's map of 1806?

A. What I want to get is I told the gentlemen that I got my reference from Collins' map of 1850, and I have also looked up other authorities on the question, and for that reason, am of the opinion that maps as a general rule are very uncertain and unreliable. I am only giving you the information as I get it.

Q. Will you please look at the map of 1834 by L. Augustus Mitchell, and say whether you find south of Hancock, and Jackson counties and Harrison county, any reference to the name Mississippi sound?

A. As far as that question is concerned, my best recollection is all old maps have been made on that line.

Q. Well I am asking you the special question which you can very readily determine by looking on the map. Is there any name of Mississippi sound on this map No. 19 of B. Lafon's of 1806?

A. No sir.

Q. Is there any name on this map of Mitchell 1834, called map Louisiana No. 24?

A. No sir, but there is no distinction on this map as to whether this is the gulf of Mexico in there.

Q. Is there anything on this map of Graham & Tanner of 1834 giving the name of Mississippi sound to the body of water south of Hancock county?

A. No sir, but I would understand by that map that all of that body was Lake Borgne.

Q. Do you see any name Mississippi sound on this map of Tanner of 1837?

A. No sir, I do not see any on the gulf of Mexico there.

Q. Will you now look at Hardee's map of 1871 and state whether you see the name Mississippi sound there?

A. Yes sir, I see Mississippi sound on this map.

Q. This is the first time you have seen that word, and those words on the maps I have shown you cover the water in question does not it?

A. That is on the maps that you have submitted to me yes sir.

Q. This last map is Louisiana map No. 30?

A. Yes sir.

Q. Will you please look at Bailey's map of 1855, called map Louisiana No. 28, and state whether or not this body of water is under the name which we call Mississippi sound?

A. There is none here for the Mississippi sound and none for the gulf of Mexico.

Q. I am not asking you about the gulf of Mexico. That is voluntary information. I am asking you about Mississippi sound.

By Mr. McCLURG: He has a right to state it.

By Mr. DYMOND:

Q. Will you look at Schonberger's map of 1866, and state whether or not the body of water that we are discussing has any name?

1771 A. The body of water that we are discussing?

Q. Is it called Mississippi sound?

A. According to this map I would consider that all of the body of water in Mississippi sound from there way down to the southern part of Louisiana.

Q. Will you please answer the exact question Mr. Heidenheim yes or no and then explain afterwards. I am asking you the simple question what we now call the Mississippi sound. What it was called before it was marked on map of Louisiana No. 29.

A. Mississippi is marked on there. I suppose sound too.

Q. Is not that word sound there?

A. Yes sir.

A. And therefore 1866 is the earliest on which you have seen this?

A. There is Pascagoula bay mentioned. That is the same body of water. Mississippi sound is not mentioned there. That is 1834. The map of 1834.

Q. Will you look at map No. 25 and state what the name of the body of water is that is south of Jackson and Harrison counties in Mississippi?

A. Pascagoula bay. Map of 1834.

Q. That is your opinion as I understand it that this Pascagoula bay extends westward until it meets Lake Borgne?

A. Yes sir.

Q. And that Lake Borgne extends eastward until it meets Pascagoula bay?

A. They come together right here.

Q. Then Pascagoula bay passess all of these intervening islands and jumps over into Lake Borgne?

A. I will call this Pascagoula bay. A lake is a body of water surrounded by land. A sound is a body of water connecting the land with the deep sea.

Q. What is a bay?

A. A bay is a name given to any irregular body of water regardless of any other name.

Q. Well is — not a fact that Pascagoula bay is called Pascagoula bay there?

A. It is called that on that map.
Q. Is it not so called there today?
A. No sir.
Q. What is Pascagoula bay called there today?
A. It is called Mississippi sound. That body of water.
Q. Do you mean to say that around Round island and off Scranton and Pascagoula that is not called Pascagoula bay?
A. No sir, this is Mississippi sound.

By Col. ZACHARIE:

Q. Mr. Heidenheim, what time of the year was it that Governor Longino visited down here and you had that conference?
A. I think that it was in 1900 Col. Zacharie.
Q. What time of the year was it. What season of the year. Was it in the spring, or summer or winter?
A. It was during the late spring or early summer.
Q. Does your recollection correspond with that?
A. Yes sir, I think so.
Q. You were aware at that time there was a question in regard to the boundary?
A. Yes sir, that is what we asked him to come here for.
Q. You knew that fact prior to the appointment of the boundary commission in 1901?
A. I think it was prior to the time the commission was appointed.
Q. If it was in the spring or summer of 1901 it must have been six months at least?
A. Yes sir.
Q. You have attempted to give the definition of a sound?
A. Yes sir.
Q. Do not all of the lexicographers give the definition of a sound as being a species of *straight* or an arm of the sea?
A. It is in one sense of the word an arm of the sea.
1772 Q. Who was Collins and where did you find this map? We have gone through everything in the public libraries of the United States and we have never come across that name yet. Where can we find it?
A. I have it in my possession, and if you wish I can submit it to the attorneys. I think it is Collins' map of 1850. I think that is the correct name. It was printed in Philadelphia.
Q. We would like to see it.
A. I am almost sure that it is Collins. I can get it for you.
Q. Mr. Heidenheim, you have been the chairman of the Commercial Club hunting up evidence in this case have not you?
A. No sir, not exactly that. I will give you the particulars if you wish. The Commercial Club held a meeting and concluded that it would be advisable to appoint a committee on testimony. That is to get what names and other desirable matter that would be useful to the attorneys. It was not a question of evidence.

Q. Had you been investigating this question for some time prior to your appointment as chairman of this committee?

A. Well I have investigated this question off and on in various ways but not exactly bearing on this care.

Q. How long have you been investigating it back?

A. Well I have been reading up on the question directly and indirectly ever since I have been in the oyster business. Ever since 1885.

Q. You have a considerable interest in the State of Mississippi winning this case have not you?

A. Well I can not say that we have any more than any other person would have that had their money tied up in an investment.

Q. How much money have you tied up in that investment?

A. The Barrataria Company has two plants. One in New Orleans and one in Biloxi. The one in Biloxi has $125,000.00 tied up in it.

Q. It would be a considerable expense and loss to you would not it if you had to remove this cannery to Louisiana or discontinue the business?

A. It would be a considerable expense. It would not be a question of discontinuing the business.

Q. You would move to Louisiana?

A. I don't say that we would. We are going to start up in Louisiana anyhow.

Q. Then you have felt a great interest individually have not you in sustaining Mississippi's side?

A. Yes sir.

Q. Your committee advertised in the news papers did not it for evidence that would go to substantiate Mississippi's case?

A. There were notices in our local papers.

Q. Did you have interviews with these witnesses?

A. Not that I know of no sir. All that we did was to furnish the attorneys with a list.

Q. Well how did you know when you furnished these lists to the attorneys what the witnesses would testify to?

A. We only went this far. We got together, our testimony committee of five, and we would recommend what we thought were desirable witnesses, and this was put before the committee. If they thought they knew any thing they were added to the list, but if they thought they did not know any thing they would drop them.

Q. In finding out what these witnesses would testify to did you or did you not state what points you wanted to establish?

A. No sir, we just saw what the testimony we wanted was. We just merely wanted to have testimony from such people as knew any thing about this question and that is about all they were asked.

Q. Did you not specify what you wanted to know about this question?

A. No sir, no more than that they should know something about

the question, that is all. Not to burden them with any unnecessary testimony.

Q. Did you not state that you wanted to establish the fact that the boundary of the State of Mississippi extended 18 miles south of the shore line?

1773 A. No sir, I don't think that question came up at any of our meetings.

Q. Did you not state that you wanted to establish that these marshes over there were not called Louisiana marshes?

A. No sir, not that I know of.

Q. Then you handed these lists to these attorneys perfectly blind as to what these witnesses would testify?

A. Yes sir, in other words the attorneys did not take one fifth of the names that we handed them.

Q. But those that they did take you put them on there blind without knowing what they would testify to?

A. No sir, we did not know any more than if you want witnesses on jurisdiction these are the people, and if you want any on the islands, these are the people.

Q. I want to know how you came to give these names in. Do you mean to say that without knowing exactly what these witnesses would testify to you gave these names to the attorneys without knowing what they would testify to?

A. No more than we had our outlines made. We had read up decisions on boundary cases prior to this one. We knew from the ruling of the court about — circumstances would come up at issue, and we formulated our plans on that basis, and we said "These are your witnesses if you want to establish jurisdiction," or "These are the ones if you want old citizens that have fished out there. If you want them for this, or this, these are the ones you want."

Q. You did not know whether these witnesses would testify in favor of or against you?

A. No sir, we did not know anything about that.

By Gen. McCLURG: Counsel for Mississippi desires now to inform the counsel for Louisiana that the witnesses who testified on the part of Mississippi in this case were not trained, nor crammed, nor fixed, nor interrogated in any manner previous to being put on the stand in this case.

By Col. ZACHARIE:

Q. Then I ask you the question again, you in no way intimated to these witnesses, a list of which you gave to your attorneys, as to what you wanted them to testify to you?

A. No sir, this committee had nothing to do with any thing of that sort. They were merely to select the witnesses and that is all.

Q. Now Mr. Heidenheim, could you produce all of the correspondence that passed between you and Mr. McLean?

A. I think I can sir. I don't think there were more than about

wo letters. One asking for information and one he sent me addressed to Mr. Dymond. I don't think there was any more correspondence.

Q. You say that you met Mr. McLean the Congressman, some time afterwards. Did you ask him or inquire any thing about why you did not receive this report from the Coast and Geodetic Survey which was promised according to the letter that he sent you?

A. No sir, I don't think I did. I think that the correspondence ended with that letter. That is the best of my recollection.

Q. I am not speaking of the correspondence. I am speaking of when you met him afterwards personally as you say you did afterwards. Did you make any inquiry as to why you did not receive any report that he had notified you by letter that it was referred to the Coast and Geodetic Survey?

A. I don't think I have seen Mr. McLean sir.

Q. I thought you said in your testimony in chief that you met him when he was canvassing?

A. I think that was prior to this correspondence. He is not now representing us in this territory.

Q. Have you seen him since that correspondence?

A. No sir.

Q. You took no further steps to make any inquiry why
774 you had not received the report that was promised?

A. No sir, not as I remember.

Redirect examination.

By Gen. McCLURG:

Q. You have been questioned rather closely Mr. Heidenheim by counsel for Louisiana with reference to obtaining witnesses on the part of Mississippi, and especially whether you had conferred with them or not. I wish you would tell the commissioner whether you have directly or indirectly procured any false testimony in this case, and have undertaken to get any witnesses to testify to any thing except the truth as they understand it?

A. All I can say about that is that the testimony committee of which I was the chairman had the duty delegated to it, and that duty was merely to get the witnesses, and that was the end of their duty and not to ask them how they would testify or what they would testify to. The lists were handed to the attorneys. Witnesses in jurisdiction. Witnesses on this thing and on that thing.

Q. How were these witnesses selected. How did you select them?

A. They were given to us by the people in Biloxi and here and elsewhere, etc.,

Q. How did you select your witnesses?

A. We did not select any particular witnesses. We handed the whole batch in to the attorneys.

Q. What did you have?

A. I have the messages of Congress. I have the opinions deliver on these questions, and I have historical matter on this questio If you will come down there I will show you what I have got.

Q. That is nothing that you bought as a result of the meeting January 19th 1901?

A. I have some that I bought before and some since.

Q. Any documents?

A. No sir, no documents only what I have in my books.

Q. You have no documents at all?

A. No sir, no documents at all.

Q. Then you did not write to Washington to get data from Was ington in regard to this dispute?

A. Yes sir, I did and I am glad that you brought that up.

Q. As a result of this meeting on January 19th 1901?

A. Yes sir, I wrote to Mr. McLean.

Q. And you did not get any reply?

A. No sir. That is the queer part about it.

Q. Did not Mr. McLean transmit to you the document that got?

A. No sir, I never did get it. I wondered why he did not send it me. I never did get it.

Q. What was it?

A. I don't know any more what the contents of this docume were than the man in the moon. I did not know until I saw it the newspapers on the day of the trial.

By Gen. McCLURG:

Q. What trial?

A. On the day you were in New Orleans when you were takin testimony there.

Q. In April?

A. Yes sir.

By Mr. DYMOND:

Q. What I understand is, Mr. McLean, although he received t document from the Coast and Geodetic Survey at the department Washington, obtained at your request you never got that documen

A. No sir, I never got an answer or anything. I never knew an thing about it until I saw it in the New Orleans newspapers.

By Gen. McCLURG:

Q. Do you know anything about that document or that McLe got it?

A. No sir, I don't know anything about it. All I know is tha have a letter in my possession which reads "I received your let and will give the same my attention." I wrote to him to try a find out what he could on this boundary question so as intellig people we would know where we stood. That was the purpose o

and no other purpose. We understood that we had money
1766 tied up in that investment. As business people it was our business to know where we stood. I wrote that letter to him. I did not know anything about this matter until I saw it in the New Orleans papers.

Q. Mr. McLean is a member of Congress from the State of Mississippi?

A. Yes sir.

Q. Is not he the Congressman from your district?

A. He was at that time.

Q. Is he a member of Congress from the State of Mississippi now?

A. He is now, but he has been re-districted I think.

Q. Do you see him frequently?

A. No sir, the last time I saw him he was running for office. He was along here after that but I did not see him.

Q. Did you ever make any complaint to him about that fact?

A. No sir, I never heard any thing more of it and I thought that it was lost sight of.

Q. Did you ever see the reply that Mr. McLean got from the Coast and Geodetic Survey?

A. No sir, not until I saw it in the New Orleans papers. That is the first information that I had of it. I expressed surprise that Mr. McLean should get information asked for by me as an individual and others should get notice of it before I did.

Q. Did you know that a report was made by the Coast and Geodetic Survey to Mr. McLean on the 30th, of January 1901?

A. No sir.

Q. And 11 days after the meeting in New Orleans?

A. No sir, all the correspondence that I had with Mr. McLean I hunted up. It was "I received your letter and will give same my attention." That is the last that I heard of him.

Q. Have you got a copy of the original letter that you wrote to Mr. McLean?

A. I think I have and I think I have his answer. There was only a few lines between us.

Q. Can you give us a copy of the letter that you wrote to Mr. McLean?

A. I think I can get it. I handed it to Mr. McClurg and he did not think he would have any use for it. I think I can find it again.

Here the commission took an adjournment for the noon recess, to resume the taking of testimony at 2 o'clock.

1767 Pursuant to the adjournment for the noon recess the commission met at 2 o'clock, with the same present as this morning and the following testimony was taken, towit:—

Mr. Heidenheim requests leave to make the following correction in his testimony of this morning. In or about 1900 I remember that some oystermen come ashore and told me that there were some

officers of the parish of St. Bernard, they did not know whether it was the sheriff or whom, that had told some of the boats to keep off of that ground. I do not know what part of the ground they alluded to. There was an agitation of the boundary line about 1900, but as near as I can remember no boats, patrol boats, were put on the oyster ground until 1902. There was no contention and no unlawful steps taken by Mississippi. That these complaints were reported to the governor of the State, and the governor came here and had a conference with us and advised us to adopt lawful methods in bringing about a solution of this question.

By Mr. DYMOND:

Q. What was the date, Mr. Heidenheim, on which the governor came to this coast?

A. The governor came on our request.

Q. About when was this?

A. I think this was in 1900 prior to the time the boundary line commission was appointed.

Q. You therefore, now, as I understand it, correct your testimony to the extent that you no longer deny——

By Gen. MCCLURG: Counsel for Mississippi objects to counsel arguing with the witness. Let him ask him questions.

By Mr. DYMOND:

Q. That you *not* longer deny that there was a dispute as to the boundary line prior to the filing of this suit in 1902, and that you knew it?

A. I won't say it was a dispute. I say that it was an agitation. There was an agitation but no dispute.

Q. Well was not there a dispute in 1901 when the two governors appointed their respective boundary commissions?

A. I would not understand that there was really a dispute. It was to the extent that there was an agitation.

Q. Well will you please define for our benefit what you call a dispute?

A. A dispute is where two disagree. An agitation is a thing where some thing is just brought up for a final consideration or solution, is the way that is the way that I understand it.

Q. Well then you conclude that there was no dispute until Louisiana and Mississippi found that they could not agree through their amicable boundary commissions?

A. There was no dispute until the two had come up and brought the matter up for consideration. If there was such a thing as a dispute it was in 1901. That was when the boundary commission met. Prior to that I would not consider it a dispute. It was merely an agitation that brought this thing up.

Q. Well then you do admit as I understand it that the dispute originated as early as July 1901?

A. When ever the governor came on the ground?

Q. When the Mississippi commission said that they could not agree?

A. Exactly. As soon as they said that they could not agree I understood that there was a dispute.

Q. Was there a dispute prior to that?

A. Not that I know of, no sir.

1768 Q. Well then, if there was no dispute prior to that why was it that you wrote to Mr. McLean, a member of Congress in the month of January 1901?

A. I have already explained it. If you want it explained again I will do it for you.

Q. If there was no dispute why did you do it?

A. I wanted to be settled in our judgment as to the business proposition where we stood. That is the idea of it.

Q. That was after you had built your factory was not it?

A. Oh yes sir, but we are always making repairs and improvements, and I wanted to see whether we were justified in making any more or not. That is the idea.

Q. Will you please look at this document called Document No. 9, offered by Louisiana and examine this letter and state whether you are the same I. Heidenheim referred to in the letter of F. A. McLean to O. H. Tittman, Superintendent of the Coast and Geodetic Survey under date of January 27th, 1901?

A. I admit getting the letter from Mr. McLean addressed to Hon. O. H. Tittman.

Q. Are you the Mr. Heidenheim referred to in this letter that you are looking at?

A. Yes sir.

Q. Had you previously written to Mr. McLean?

A. Yes sir, I had.

Q. Have you a copy of the letter that you wrote to Mr. McLean?

A. I think that I could find that in my correspondence. In our correspondence.

Q. Will you produce if you can that letter, and your letter book containing that letter and bring it where we can get it?

A. I will try my best to get it for you. What is the date of that letter?

Q. That letter would be subsequent to the 19th of April, and prior to the 27th of January 1901. Now you will please look at the next document which is a letter from Mr. McLean to Mr. Tittman. Will you please state whether you have the original of this letter?

A. I have no such copy as this. This is the only letter that I have written to me by Mr. McLean. I have the letter written by Mr. McLean.

Q. Written by McLean to Tittman?

A. No sir.

Q. Is it not a fact that you have the second letter?

A. This is the letter that I have a copy of or the original. January 27th, 1901. Either the original or a copy of this letter.

Q. Of the letter written by McLean to Tittman?

A. That is the letter I have. Either a copy or the original.

Q. How come you to have the original of this letter after it became a part of the archives of the Coast and Geodetic Survey at Washington?

A. I think that Mr. McLean gave me a copy of it to show me what he had done. That he had sent this to Mr. Titman.

Q. Could not it be that Mr. McLean sent you the letter that he received from Mr. Tittman?

A. That is the one I never got. The letter of February 1st, 1901. I have no knowledge of receiving it. The original or a copy.

Q. Now will you look at the letter of February 8th, 1901, and state whether Mr. McLean ever forwarded you the original or a copy of that letter?

A. The letter of February 8th, 1901 I have no knowledge of to my best knowledge and belief.

Q. Now will you please look at this report of Mr. W. C. Hodgkins of the United States Coast and Geodetic Survey called Louisiana Document No. 11 and state whether or not Mr. McLean ever forwarded you a copy of this report?

A. That I never did get. To my best knowledge and belief I never got any letter from Mr. McLean addressed to Mr. Titman on January 30th, 1901.

1769 Q. You don't understand me. This is a report made by W. C. Hodgkins, assistant of the United States Coast and Geodetic Survey to O. H. Titman, Superintendant of the same department on January 30th, 1901. Have you ever seen this before?

A. To the best of my knowledge and belief I never saw that report before until I saw it in the Times Democrat.

Q. Will you please look at these blue prints marked sketches 1, 2 and 3, accompanying Louisiana Document No. 11, being the Hodgkins report, and state whether you have ever seen this before or any thing similar to it?

A. Oh, I have seen this report. It is embodied on these charts as I call them.

Q. I am asking you about the blue prints or similar blue prints?

A. You mean from Mr. McLean?

Q. Made by Mr. Hodgkins?

A. No sir, I did not receive any or see any made up by Mr. Hodgkins.

Q. These blue prints are attached to and made a part of Mr. Hodgkins' original report, and originally by tracings, and these blue prints made from these tracings. Have you ever seen the original tracing or blue prints made from them before?

A. I never received any blue prints or tracings from Mr. Hodgkins or Mr. McLean, and never saw any from that source before up to now.

Q. You say when you had your conference with Messrs. Bowers, Ford and White, that you did not have before you this report of Mr. Hodgkins?

A. No sir, we did not.

Q. And you did not know that Mr. Hodgkins as the assistant in the United States Coast and Geodetic Survey had suggested the information as his opinion on the request of the Congressman from Mississippi that the deep water channel was the proper boundary line between the States in this dispute?

A. I never have recognised the report of Mr. Hodgkins as being the boundary line.

Q. You think that Mr. Hodgkins' report is wrong?

A. Why certainly I do, as other experts have been before.

Q. Were you aware that when Congress created the State of Louisiana that she gave Louisiana all islands within three leagues of her coast?

A. I don't know that she has any islands three leagues from her coast. That is not the English language or the construction of the English language.

Q. I will repeat the question to you and ask you to answer yes or no and explain afterwards. Were you aware that when Congress created the State of Louisiana that she gave Louisiana all islands within three leagues of her coast?

A. No sir, I was not aware of the fact.

Q. When Congress created the State of Louisiana she used the following language. "And from thence along the middle of said river and Lakes Maurepas and Pontchartrain to the gulf of Mexico; thence bounded by said Gulf to the place of beginning, including all islands within three leagues of the coast."

A. Yes sir.

Q. Were you aware of that fact when you concluded that Mr. Hodgkins' conclusions were wrong.

A. I can only add on that question that from that language as embraced in the boundary line Mr. Hodgkins is undoubtedly wrong.

Q. For what reason?

A. For the simple reason from the reading of this boundary line I concluded from my judgment that Mr. Hodgkins is undoubtedly wrong. Taking the reading of the English language in this boundary line, and if there were any islands in this boundary line it was after the line got down to Sabine river to the place of beginning.

Q. Do you know what the body of water which we today call the Mississippi sound was called in 1812 at the time the State of Louisiana was created?

1770 A. Why undoubtedly I do.

Q. What was it called?

A. Pascagoula sound.

Q. What makes you think that it was called Pascagoula sound?

A. Because I have an authority on that question.

Q. Where do you find that authority?

A. No sir, there were only three maps there. The charts and this map that I spoke of, and some map that they had in some book. I don't remember what book it was.

Q. You are quite positive about that?

A. I am quite positive that is all that were there.

Q. Now at this point Mr. Heidenheim I again desire to take no advantage of you, and put you on your guard and expressly request you to refresh your memory before you answer the question as you have done before unless you are positive about what you stated.

A. I am positive that we were there and had that meeting with them.

Q. Did you have any other meeting with that commission or those members of that commission?

1764 A. No sir, we never met them after that.

Q. In which you submitted any other views that you had?

A. No sir.

Q. Well now did you have any other evidence or any other data on subject matter or reports on this subject other than what you have stated prior to the month of October 1902?

A. Certainly.

Q. What other data did you have?

A. In 1885 our company organized a factory here, and we conferred with counsel in Jackson Mississippi, and Gen. Joseph Davis who was our counsel here, and before we invested money in that corporation as business people it was necessary for us to be governed by intelligent legal advice, and we were advised at that time that the Mississippi boundary line was as it reads in that statute and as it was made by Congress, otherwise we never would have come here with this question hanging over us, with a doubt of getting it settled right and investing $75,000.00 or $100,000.00

Q. Then as I understand it the other data that you got was professional legal advice?

A. Yes sir.

Q. What I am anxious to ascertain is whether between January 19th 1901 and October 1902 you had secured any data on the subject matter of this dispute and had shown such data to the Oyster Commission of Mississippi other than what you have testified to just now?

A. Well the minute that this thing was agitated, I made it my business to become thoroughly informed, and my reading has been from that time on up to the present time, and that the knowledge we had before that time is as I have stated to you, being advised by counsel that this territory belonged to Mississippi, and knowing by the reading of the act that we understood it that way we came here and made the investment. Now of course after the question was agitated it became necessary to look into the question fully the same as we did any other question in which our business was involved.

Q. Well what did you do subsequently. What did you do if any

ing subsequent to January 19th 1901 as a result of this meeting hich was held in the city of New Orleans prior to the appointent of the commissions on the part of the State of Louisiana and e State of Mississippi on the subject of boundary?

A. I won't confine myself to dates——

Q. I desire to know specifically about it. I desire that you conne yourself to dates and noticing dates answer the question careilly, fully understanding the question as propounded?

A. What I want to get at is this. I might say some thing happened in 1901 that happened in 1902. I can refresh myself from y books. I don't mean to cover 40 or 50 years. It was all in the nge of a few years.

Q. If there be any desire on your part to refresh your memory ou may do so. I don't want to take any advantage of you. As e will now adjourn for luncheon I will give you a chance to refresh our memory?

A. What is the question you want directly, and I will answer it r you.

Q. I want to know whether subsequent to January 19th, 1901 you ok any step to get any data concerning this controversy and if so hether you submitted that data to the Mississippi Boundary Commission?

A. Well the only thing that we submitted to the commissioners, hey went to New Orleans. There were the oyster commission, and ne as I understand it was the boundary commissioners. Now when he oyster commission went to New Orleans, we had spoken to them f the same thing. There was nothing except what we have spoken o the other people, only we spoke to them and told them that is Mississippi's contention under the law, and we understood that it as their duty to hold out for that contention. That is all of the onversation that we had with them.

Q. I do not desire to know any thing about your confer-765 ence with the oyster commission. What I desire to know is in regard to your conference with the Boundary Commission f Mississippi and confining it entirely to them I desire to know whether you submitted to them any data or documents, which you ourself had obtained, and if you did not whether you had documents that you did not submit to the commission?

A. We had nothing to do with the boundary commission except hat one conference in Mr. White's office which the record shows.

Q. You did not submit to them any documents other than what ou have mentioned?

A. No sir.

Q. You had no documents which you had obtained other than what you submitted?

A. I won't say that I did not have any. I might have had them n my library.

Q. Did you have any documents there?

A. Certainly I had them in my library.

Q. How was he ejected?

A. He was ejected from the state house in this way. General Ames, who was at that time a young man and whose training was that of a soldier, was appointed military governor, and he sent up an officer and some men to request Governor Humphries to vacate the office in the state house, and the governor declined to do that, and then he sent up I think an officer and four men to exclude him. The governor looked at them and he told them that they were insufficient to take charge of his office, and they asked him what number of men would be required, and he said that he would be the judge of that when they came. Afterwards the men under an officer came to the governor's office and demanded the office. They came in the office and the governor walked out to the attorney general's office, and they made no objection to that, but when he came back they stopped him with their bayonets, and told him that he could not go in there, and he was ejected then from the mansion subsequently. Well from that time on, between those dates and while Senator George was chairman of the executive committee; he succeeded me as chairman of the Democratic executive committee. I came over here. I was living at that time in Brandon, and I was on my way to make a speech I think in Brookhaven. I was stopped by some
1785 of our friends and they stated that a citizens' meeting had been held, and that 16 persons had been appointed to wait upon Governor Ames. At that time the negroes were drilling I suppose less than half a mile from the capital, over there at the southern part of the city. Every thing was in a very bad condition at that time. The object of our people was to save a conflict if possible. They waited on General Ames with that view, and after discussing the matter for some time it was agreed: General Ames had ordered arms to different parts of the State. In —— county and some other places if I remember right. Our people desired that the arms that were in the hands of the negroes at that time should be turned over to the United States officers, some of whom were here. Governor Ames was very slow to do that, but in the end it was agreed to. That brought about some peace and things went on that way until 1875, when the people of the State succeeded in the election, and when the election was upheld Governor Ames was brought to trial, and the house returned quite a number of charges and specifications against him. There were probably 15 or 20, and during that time his father in law, General Butler, sent attorneys here. And pending the matter General Ames had his attorneys to state to those who were in charge of the matter, gentlemen who were appointed by the house of representatives to bring in the charges and specifications; Governor Ames' attorneys stated to them if they would withdraw them he would retire and resign his office, which he did and left the State and has never been in it since. Subsequently the lieutenant governor stood his trial and was convicted.

Q. Who was the lieutenant governor?

1786 A. The lieutenant governor was a man by the name of Davis. A negro.

Q. He was a negro lieutenant governor?

A. Yes sir, he was a negro lieutenant governor. But to return back to the maps, I will say that I was no more impressed with the transaction about the maps than I was with any other occurrence at that time. I knew Captain Hardee agreeably and met him frequently, or I saw him occasionally.

Q. Did you know him as a cartographer or a maker of maps?

A. No sir, the most that I knew of him was that he was a nephew of General Hardee, but I knew nothing about what he did or what his avocation was, or what his profession at all was until I saw the maps. There was a good deal said about Hardee's maps.

Q. It is the integrity of the map we are assailing, you understand, We want to get into the record the conditions under which it was made that the court may estimate its value in this matter. I want you to go forward Governor and tell us about the map. The second map. Wall's emigration and statistical map. What you may know of that?

A. Well now sir that seems to have been approved on March 8th, 1882.

Q. You were governor at that time were you not?

A. I was governor at that time. Prior to that time there was a negro that was commissioner of emigration. The negro lived in Issaquena county. I knew him. The fact is I was elected to the legislature. I might remark there that I am a member of the State senate from my district, and I had resigned and I thought I was graduated in that line. After my resignation I believe the next year I was

1787 canvassing with Governor Alcorn. I was elected to the legislature from my county, the lower house. I knew this man. The negro commissioner of emigration. It seems that in 1882 Mr. E. G. Wall, who was a Confederate soldier with one leg. He had lost a leg in the army. They had him elected. And like the other commissioners he published a map. It was approved by the legislature. He published a map and I suppose his object was to get as many people here as he could. He was trying to get emigrants I took it. So far as I know Mr. Wall was about here. He never went away I reckon. If he was ever down in the locality that you speak of in your pleadings I have no knowledge of it. I have no idea that he was though. He simply got up a map in which the main object was to give his views about emigrants and where they could come. I don't know any thing else as to its accuracy. I don't know that any body paid any attention to it.

Q. I want to ask you the general question Governor. In addition to the general conditions stated by you under which these maps were made, what bearing according to the maps themselves—we have them here and will show you the maps if you would rather see them. We are taking it for granted that you are more familiar with the conditions than you are with the face of the maps——

By Mr. DYMOND: Objected to by counsel for the State of Louisiana on the ground that the witness has not qualified himself to speak authoritatively on this proposition, and it is purely a matter of opinion to which he can not testify.

By Mr. MCCLURG:

Q. Go ahead Governor and tell what effect those maps have
1788 made under those conditions upon the boundaries in the waters of the Gulf?

A. Why as far as my view is concerned I will state that I don't think they are of any value. I don't think they received any more attention from the people of the State than any other matter that was being enacted at that time.

By Mr. DYMOND: It is understood that the same objection is made by the counsel for Louisiana to all similar testimony of this character.

A. That is my view of it, as I have stated.

Q. Do you have reference to the Hardee maps and the map of Wall both?

A. Well as I stated—I want to make myself understood as far as Captain Hardee is concerned, because I remember him very kindly. But I don't think that the maps of Captain Hardee at that time received any consideration any more than any other act that was made by the legislature, which was composed largely of negroes and radicals, and foreigners and strangers to the people of the State. There were a very few of our people there is my recollection. I say this without any discredit to the maker or the author of the map, but I don't consider that any more than any other act that occurred at that time; nothing at that time received any consideration, because it was a period in the history of Mississippi when the people were struggling for a government under which they could live. That is the way that I understand it.

Q. Are you a native Mississippian?

A. No sir, I am not.

Q. How long have you lived in Mississippi?

1789 A. I have lived here almost all of my life. I was born in Chesterfield district, South Carolina, but my father left there before I recollect any thing about it.

Q. I wish you would state to the commission what positions you have held in this State?

A. I have been a member of the lower house of the legislature, and I have been a member of the State senate, and governor of the State for eight years.

Q. And you have had some military prestige have you not?

A. Well yes sir, I was in the army from 1861 to 1865. I went out as a private in Company B., Sixth Mississippi regiment, and I was appointed; was elected colonel of the regiment afterwards, and was then appointed brigadier general.

Q. I asked you that question Governor in order that the supreme court might understand that you are familiar with those conditions, and ask it with the purpose of making the most of it before the court for our State of course. Now I want to ask you another general question in view of your long life in the State and in her service with reference to her boundaries in the Gulf. It is alleged in the bill of complaint filed by Louisiana against our State that the true boundary between them is the deep water channel flowing out of the most eastern mouth of Pearl river, north of Half Moon island and to the south of Cat island, to the north east of Isle à Pitre through Chandeleur sound into the gulf of Mexico. Mississippi's contention substantially stated is that the acts of Congress admitting these two States into the Union, Louisiana in 1812 and Mississippi as you know in 1817 definit-ly fixed the boundary, and that Mississippi has jurisdiction and sovereignty according to these acts and
1790 under the constitution framed by her pursuant to the act of Congress admitting her, six leagues or 18 miles from her shore, and every part of her shore, including all islands within that reach.

If you have anything to say with reference to the exercise of sovereignty and jurisdiction by our State over the waters and islands within the limits that I have mentioned I would be glad for you to state it to the commission?

A. Replying to that I will simply state that I have never given the subject embraced in that question any special consideration, but my understanding has been that Mississippi had jurisdiction according to the act of Congress stated in the question. That has always been my understanding and as far as I know the understanding generally of the people of our State.

Cross-examination.

By Col. ZACHARIE:

Q. General, did you know either personally or by reputation Captain T. S. Hardee prior to the Civil war?

A. No sir I did not.

Q. Have you ever heard or did you know that prior to the Civil war he was one of the assistant engineers with Hazlehurst that run the Jackson and Great Northern railroad?

A. No sir, I did not know Captain Hardee prior to the war, nor did I know what his profession was.

Q. You therefore did not know that he was a resident of
1791 the Yazoo district engaged in planting operations in partnership with Gen. Wirt Adams?

A. I did not, no sir.

Q. You first knew him in the army?

A. My recollection is that I have seen Captain Hardee in the army. I knew his uncle very well, General Hardee, but I could

not say that I remember to have met or known Captain Hardee during the war, but I suppose I did.

Q. Did you know Captain Hardee on the staff of his uncle General Hardee as an engineering officer?

A. I did not. I will state in connection with that Colonel that I was in General Hardee's corps, and I was in his corps at the battle of Shiloh, but after that time upon the re-organization of the army generally I was not in General Hardee's corps, but I often saw him and I knew as well as a younger man would a gentleman of his prominence and age at that time, but I have no recollection of Captain Hardee.

Q. You don't remember Captain laying out—while you were a member of Hardee's corps, laying out the military lines and the engineering work?

A. No sir, I will make a further statement so that you will understand. As I stated before Mr. McClurg, I went into the army as a private, at the organization of the regiment in Tennessee, the regiment was made up in this section right here, and they organized later at Union City or Trenton probably. No, they organized at Grenada. I was elected major. Our lieutenant-colonel was sick and I was acting lieutenant-colonel at the battle of Shiloh, and was wounded there as the colonel was. He did not return to the army and I was elected colonel, and after that time it was reorganized, and at that time occupying the position that I did I knew a
1792 little of who was on the staff of this man and the other you know, but very little, and I suppose that accounts for my not knowing Captain Hardee.

Q. Do you *you* know or can you remember whether Captain Hardee was not promoted to major of engineers, and subsequently lieutenant colonel of engineers in the Confederate army.

A. No sir I do not.

Q. Do you know where T. S. Hardee resided after the civil war?

A. That conversation we had this morning has recalled to my mind, while we were talking about Captain Hardee, that after the war he at one time lived down on the I. C. railroad about Chattawa or some where down there. I don't know that to be a fact but that is my recollection that he was down about there some where.

Q. Do you know what his politics were?

A. I do not. No sir, I do not.

Q. He figures upon this map as State engineer. Was not he appointed State engineer by Governor Alcorn?

A. I can not tell you that Colonel. I will answer that a little further there. Whether he was appointed by General Alcorn or not I don't know for I had but little intercourse with Governor Alcorn or any of his people at that time you understand, and I did not know what was going on much. I was generally against the whole business you know.

By Gen. McCLURG:

Q. What do you mean by any of his people?

A. I mean the negroes and the carpet baggers as they were called at that time you know.

By Col. ZACHARIE:

Q. From what you know of Governor Alcorn outside of
1793 politics, was not Governor Alcorn known as a man of integrity and high personal character. I mean outside of his politics?

A. Yes sir, well I would like to answer that question in my own way if you will allow me Colonel. General Alcorn, prior to the war was a Whig. An able man and a man of large property and very highly regarded by his party. The secession convention elected with General Clark and General Van Dorn and some one else—the major general was President Davis, and there were three or four brigadier generals. General Alcorn was one of them. General Alcorn went into Kentucky as I understood it, I saw some of his people up there, and remained some sixty days or three months. I don't know how long. At all events he came back I think having some difference with Mr. Davis.

By Gen. McCLURG:

Q. You mean President Jefferson Davis?

A. Yes sir, President Jefferson Davis, believing as he did that the president should appoint him as brigadier general in the Confederate army as I understood it. He was not appointed, and after the war General Alcorn believed, it was a theory of his that the white people should take charge of the negroes, and that he could take them from the radicals or carpet-baggers as they were designated then. And General Alcorn announced himself as a Republican, and he took in charge and did have control for a long time, and he had more influence in the State with the negroes than any one else. I believe myself that personally, in all personal matters that General Alcorn was a man of integrity. I believe furthermore that he had convinced himself that the negroes could
1794 be influenced and that he could take charge of them and he would hold his leverage, and with the old Whig party in the State to follow him; that they would go with him. And he made that effort and it failed, and he had such an influence with the negroes and carpet-baggers that he held it for a time and was elected governor. General Alcorn's great ambition was to go to the United States Senate. I don't believe that General Alcorn wanted to oppress the people of Mississippi if he could avoid it, and evidently, from my standpoint, when he found he could not take the white people, the old Whig party with him, that he intended to take the negroes and make the most of it, and he did go to the United States Senate by their vote.

1776 Recross-examination.

By Mr. DYMOND:

Q. As I understand it Mr. Heidenheim, you concluded that if you can not get your oysters from south of the deep water channel which Louisiana claims to be the boundary that your factories here would suffer. Is that your idea?

A. That is not the question as I understand it. What would be the commercial losses to the territory is what I understand the question. The commercial losses to the territory would be as I stated $100,000,000.00, taking it all in all.

Q. Following it right down to its last essence. That is I understand it in your opinion what would result?

A. That would result.

Q. Because Mississippi could not get oysters out of the Louisiana marsh and what is now the neutral territory, if her claims are maintained by the decision of the Supreme Court of the United States?

A. Well now for a fuller answer to that question. Is the channel line supposed to be the one that you are figuring on?

Q. Yes sir? We have since the beginning claimed the deep water channel to be the boundary between the two States. Now that deep water channel emerges from the mouth of Pearl river and runs through Mississippi sound, south east through Cat Island channel, between Cat island and Isle à Pitre, north east of Chandeleur islands into the gulf of Mexico?

A. Then I would understand that the commercial losses from all sources directly or indirectly bearing on the oyster question would in 25 years amount to $100,000,000.00.

Q. That is if you were excluded from that territory, that is the loss that would result?

A. Yes sir.

Q. Now is not that on the assumption that there would be no development of the very great water area that is open to Mississippi and lies right in front of the Mississippi coast?

A. There would be some development, but it would be nothing compared to what it would be if there was a favorable report in behalf of Mississippi.

Q. Let us suppose Mr. Heidenheim that the Mississippi oyster law was changed so as to permit the private ownership under laws or otherwise of our bottoms in extensive reefs in the undisputed territory belonging to Mississippi. If such a law as that was passed would it not tend to increase the oyster production of Mississippi and diminish the losses which you think now might result?

A. Well the oyster packers prefer not to lose the ground. As to whether or not that territory could be benefitted, it would be very slow, and I doubt if the conditions which now exist could be reestablished in 25 or 50 years.

Q. Do you mean to say that it would be impossible to successfully cultivate oysters in Mississippi sound on any ground?

A. Well we know that the oysters won't grow on all ground. The grounds in our territory are not suitable to grow oysters, and the progress would be very slow.

By Gen. McCLURG: This is all objected to by counsel for the State of Mississippi on the ground that is is a mere proposition calling for an estimate by the witness to suppose future contingencies that are merely possible.

By Col. ZACHARIE:

Q. Mr. Heidenheim will you please examine the last three pages of Mr. Heidenheim's report, Document No. 11, and which are headed Boundary Appendix 1, 2, and 3, and see if you had received that document or appendix, whether it would not be the records which you were after. Upon which he based the report?

A. I don't think it would be what I would want from the fact that I do not take much stock in maps.

1777 Q. What records did you expect to get except the old maps, surveys and so on which were in possession of the department at Washington?

A. I would prefer to rely upon original treaties, acts of Congress and some thing more substantial than maps which are colored to suit individual desires of the parties. Of the lexicographers.

Q. You mean the cartographers?

A. Yes sir, the cartographers.

Q. Mr. Heidenheim, are not the treaties that you spoke of accessible in any library?

A. There are treaties and acts of the different governments.

Q. Are they not accessible in any public library?

A. Yes sir.

Q. Why did you apply to the department at Washington when these maps and acts of Congress were accessible almost any where. Was not this the sort of information that you wanted. The maps?

A. For the simple reason that when I applied to Mr. McLean I did not understand that getting information in reference to what he knew about the boundary question of Louisiana carried with it only what was available in the geodetic department of the Government but what might be available from any and all sources that might give me an intelligent idea of the conditions pertinent to the boundary line.

Q. Did you not understand that in this report and in these lists of maps and surveys that Mr. Hodgkins consulted every thing that was in every department in Washington?

A. Every thing that he thought would be useful without going into a very long and detailed search.

Redirect examination:

By Gen. McCLURG: You wrote for the official records and you got a sub's opinion?
A. Yes sir.

It is admitted by the counsel for Mississippi that the large map made at their request by A. T. Baldwin computer of the Coast and Geodetic Survey, Washington, D. C., made in the Department of Commerce and Labor in the Coast and Geodetic Survey, June 8th, 1904, styled a photographic reproduction of the composite chart, with the red line, purporting to mark the boundary between Louisiana and Mississippi as shown on said map, and the tinting in colors of the territory within the said boundary line do not appear on the original from which the copy was made, but that said red line and tinting of the entire map were made at the instance of the counsel for the State of Mississippi, and that the quotation from the act of Congress of March 1st, 1817, found in volume 3, page 348 of the Statutes at Large, pasted to the lower right hand corner of the said map, and the statement in relation thereto, was not on the original from which this map was made but was affixed thereto at the request of counsel for Mississippi, and that the certificate attached thereto on the upper right hand corner may be considered modified accordingly.

The commission here adjourned its sitting at Bay St. Louis, and by agreement to meet at the capitol in Jackson Mississippi on Thursday, August 18th, 1904.

Adjournment of commission at New Orleans.....

1780 JACKSON, MISSISSIPPI, August 18th, 1904.

Pursuant to agreements heretofore made and to adjournment at Bay St. Louis Mississippi on August 10th, last, the commission on the part of the State of Mississippi to take testimony in the case of The State of Louisiana against The State of Mississippi, pending in the Supreme Court of the United States, met at the attorney general's office on this the 18th, day of August, 1904.

Present: Hon. William D. Bullard, commissioner on the part of the State of Mississippi. Hon. Walter Guion, attorney general of the State of Louisiana, and Hon. Frank C. Zacharie, and Hon. John Dymond Jr., associate counsel on the part of the State of Louisiana.

Hon. William Williams, attorney general for the State of Mississippi, Hon. James N. Flowers, assistant attorney general, and Hon. Monroe McClurg associate counsel for the State of Mississippi, and Frank M. Peyton, official stenographer.

By agreement the commission adjourned until 9 o'clock to-morrow morning.

JACKSON, MISSISSIPPI, August 19th, 1904.

The commission met this morning pursuant to the adjournment of yesterday, and there were present Hon. William D. Bullard, commissioner on the part of the State of Mississippi. Hon.
1781 Walter Guion, attorney general of the State of Louisiana; Hon. Frank C. Zacharie and Hon. John Dymond Jr., associate counsel on the part of the State of Louisiana. Hon. William Williams, attorney general for the State of Mississippi, Hon. James N. Flowers, assistant attorney general, and Hon. Monroe McClurg associate counsel for the State of Mississippi, and Frank M. Peyton, official stenographer.

The following testimony was taken to wit:—

Gov. ROBERT LOWRY, a witness introduced on the part of the State of Mississippi, being duly sworn, testified as follows:

By Gen. MCCLURG:

Q. General, you are one of the ex-governors of the State of Mississippi?

A. Yes sir.

Q. When were you governor of the State General?

A. I was elected in 1881, and inaugurated in January 1882, and was governor for eight years. Until 1890.

Q. I believe you are also one of the authors of a history of Mississippi?

A. Yes sir.

Q. This case, General, of The State of Louisiana against The State of Mississippi, is a suit involving the boundary between the two States in the waters of the Gulf. Among the pleadings is a general replication by the State of Louisiana to the answer and cross bill of the State of Mississippi, responding to the original bill of
1782 complaint filed by Louisiana. In this replication to our answer and cross bill I find on page 6 a reference to Hardee's geographical and statistical map of Mississippi, embracing portions of Tennessee, Alabama, Louisiana and Arkansas, promulgated in the year 1868, and the second edition in the year 1872; also reference made to the map made under the direction of E. G. Wall, the State emigration agent in 1883. Those maps are pleaded by the State of Louisiana and sought to be made effective in establishing the boundary set up in her bill of complaint, which is to state it to you in a general way, the deep water channel, and what is marked on the United States maps as the sailing line out of the mouth of

Pearl river, northeast through Cat Island channel, Chandeleur channel and into the Gulf proper.

We will be glad to have you to state to the commission, Governor, what you may know about the maps of 1868 and 1872 and 1883 to which I have called your attention, so far as they may relate to the issues involved between these two States as I have above indicated and with which you are doubtless somewhat familiar. Please answer this question in your own way, not forgetting to let the commission know the conditions under which these maps were prepared and promulgated?

A. Well personally I know a little of the first maps of which you speak. The maps promulgated in 1868 and 1872 — made by Captain Hardee.

From 1868 to 1872 the State was in the hands of what is known as the Radical party, it was during the radical regime. A large number of negroes were members of the legislature. The
1783 people with property in the State, property holders, did not have much to do with the Government. I remember seeing a map prepared by Captain Hardee at the time. My recollection is that some one sent me one. I was then living at Brandon. What became of it I do not remember. I have not got it now at least. I would like to state here that I knew personally Captain Hardee, and I have served a time in the war under his uncle General Hardee, and I met with the Captain frequently, but what induced this map and how it came to be made at that time, or for what purpose except to sell I don't know.

As I say, our people, and I mean by that the property holders of the people of the State, the home people, had little to do with the Government. Up to 1875 when our people were driven to desperation almost: taxes had become so burdensome as to amount to confiscation almost, and the amount of lands that were forfeited for non payment of taxes was very great, I can not recollect the amount now, but it has been stated perhaps in the papers at that time. I remember so many circumstances about it, that the conditions so far as the most of our people was concerned, that they were trying to get a government under which they could live, and that they did nothing but to try and prevent taking money from the people by the legislature any way they could do it. I recollect that the public printing for one year during this time and perhaps two years was immense. Probably six or eight or ten times more than it should have been. I don't remember what it was. I recollect that during that regime there was an amount taken out of the treasury, which our people very much regret now, for a monument to a negro that
1784 stands out here in the cemetery. A monument to a negro that died, Jim Lynch, paid for out of the treasury of the State. Expenditures, which I conceive were robberies, at that time, were beyond what any one would suppose now. It exceeded anything that I ever knew. After one of the governors, Governor Humphries was ejected from the mansion——

Q. What I mean is this. They were gotten with reference to being oystermen and old sailors or what?

A. The list was submitted in this way. We first went to work and got up witnesses as to old oystermen that were in this territory and that knew some thing about the question at issue. The list was made up, and then the list was gotten up on such matters as we thought would be useful on jurisdiction, and then we had other witnesses that we thought might be useful in the way of furnishing old maps and some thing on that line.

Q. Were there any of these witnesses ever interrogated before they were put on the stand under oath?

A. No sir.

Q. Now I want to ask you about this McLean correspondence. I see by Document No. 9 offered by the State of Louisiana on the 13th, of April 1904, a copy of a letter written by F. A. McLean to the Hon. O. H. Tittman, Superintendent of the Coast and Geodetic Survey at Washington in which Mr. McLean quotes from your letter to him as follows "Give us all the information on record at Washington bearing on the question of the boundary line between Louisiana and Mississippi." Mr. McLean adds "I think he," meaning you, "only wants that information pertaining to the boundary line at or near the coast." That letter is dated January 27th. 1901, and the answer to it on February 1st 1901 by Mr. Tittman to Mr. McLean says that the information in regard to the Mississippi and Louisiana boundary asked for in his letter of the 27th ulto., has been collected and will be sent to McLean as soon as it can be put in the proper form, probably next week, and that on February 8th, Mr. Tittman wrote Mr. McLean that he sent him a report of three sketches showing information that he had been enabled to obtain in this matter, and he adds "Like all boundary questions much is left to be desired on the score of a clear definition of the original acts." And in connection with that letter Louisiana has introduced these blue prints marked Document No. 11, to which we find at-
1775 tached, not any records as called for by your letter to McLean, nor by McLean's letter to Tittman, but a lengthy opinion by one W. C. Hodgkins, an assistant in the Coast and Geodetic Survey. But no records at all that you called for. Are those things all you know about that matter?

A. All that I know about it is what I have previously stated, and I might add that I was not authorized to act for the State of Mississippi in asking for this information. It was an individual inquiry.

Q. In your letter you ask for records bearing upon this question?

A. Yes sir.

Q. Have you ever gotten any of the records?

A. No sir.

Q. You have never seen any thing except the voluntary opinion of Mr. Hodgkins have you?

A. No sir. That is all. And I saw that in print in the New Orleans papers.

Q. Do you know whether this is the same Mr. Hodgkins that ote this letter that testified in New Orleans in this case?
A. No sir, I don't know him at all. I never saw him or heard of n until I saw his name in print.
Q. I understood you to state that the Barrataria Company had out $125,000 invested in this State?
A. Yes sir.
Q. Could you state about what the Lopez & Ducate Company ve invested?
A. In Biloxi?
Q. Yes.
A. You mean in the canning plant or altogether?
Q. I mean in the fish and oyster business?
A. In the fish and oyster business, I would say about $225,000.00 $250,000 including boats etc.
Q. What other concerns in Biloxi have investments?
A. There is the E. C. Joullian Packing Co., and the Biloxi Canng Co. and the William Gorenflo Canning Co.
Q. Is there any other industry there engaged in the fish and ster business?
A. The whole Gulf coast is directly or indirectly engaged in the dustry.
Q. If the jurisdiction and sovereignty of the State of Louisiana ould be established according to their claim in the original bill, arked out on Exhibit E, filed with the bill and introduced in stimony in this case, showing that it would strike the Mississippi ain land some where about Pass Christian I believe, what effect ould that have upon the commercial interests of the State of Mississippi.

By Col. ZACHARIE: To which the counsel for the State of Louisiana object and except on the ground that *as to* the consequences or esults of any decision in this case are irrelevant, and it has no earing on the question at issue. The question simply being one f the location of boundary, and no question being involved as to hat would be the consequences or results to either side.

By Mr. DYMOND: And counsel for the State of Louisiana further bject and except on the further ground that Exhibit E, simply sets orth the deep water channel, running from the mouth of Pearl iver eastward, through Cat Island channel to the gulf of Mexico.

A. Well now to give you some idea of what the loss would be; when I came here Biloxi had 1200 population and today she has 7500 or 8000. The other places on the sea shore have equally grown directly or indirectly by this industry. The industry is in ts infancy and in my opinion if we would consider time, depreciation of real estate, and other commercial conditions that now exist that would be disturbed in the present and future that I could safely say that the losses would be over $100,000,000.00 in the space of not over twenty five years.

A. Yes sir, that is my recollection.

Q. Now General as I understand it you have been placed on the stand as a witness to testify as to the two maps of Hardee and Wall in the idea that they were begotten in the evil days of Mississippi's history and therefore not much reliance was to be placed in them. Is that correct?

A. My testimony has been to that effect. I don't know whether I was called for that or not.

Q. If there were shown to you the maps that were the children of better times in the Democratic period immediately preceding
1807 the reconstruction *area* or following the reconstruction era, after the Democrats and better people had gotten into the government of Mississippi, would that affect you in your conclusions as to the weight to be given to the maps as evidence in this case?

A. If you were to show that it came in before or afterwards. Is that the idea?

Q. Both. The first map, the Hardee map was the creature of the period when Humphries was governor, and the Wall map was the creature of the time when you were governor, would that affect your conclusion as to the weight to be given to the two maps as evidence?

A. If one map was to come in during the time that I was governor?

Q. And the other map was at the time Humphries was governor?

A. Yes sir.

Q. Would they have any better standing in your estimation than if they were the creature of the evil days of Mississippi's history?

A. I take it for granted if the appointment was made, the map of 1871, had been made in 1882 or 1888 or 1890, that I would consider myself that it was a map then made by the people of the State. The better people of the State.

Q. Suppose it was proven that the Mississippi map of 1866 was made by Hardee, and that it was made in 1866 at the time that Humphries was governor and before the reconstruction period. What would you then say of that map?

A. Well sir, I don't know. The only answer that I can give to that. If the map was made in 1865 or 1866 when Governor
1808 Humphries was governor, if there was a legislative act appointing some one to make the map at that time, and if afterwards the map was made at the time I have spoken to you of, I would give it about the same respect that I have told you here in my testimony.

Q. Well General I desire to read you and I desire the stenographer to take down the message of Governor Humphries dated October 16th, 1866 directed to the senate and house of representatives of the State of Mississippi which reads as follows. Page 17, House Journal of Mississippi 1866 and 1867.

"A State map.—I deem the publication and distribution of a

State map to the various State and county officers, whose business requires the possession of one, a matter of sufficient importance to call your attention to it. It should contain a correct delineation of everything of importance and information that it can embody, and be a reference not only to our officials but to all persons interested in the affairs of the State, whose correctness should settle all doubts on any points or subjects it embodied. I don't believe it can be published without some pecuniary aid from the State, which expenditure would be more than repaid to the State by the benefit its publication would give it. Nearly all of the old maps were destroyed during the late war. They were published nearly thirty years ago. Since then changes have been made and improvements have taken place of such a character as to render a new map, even an indispensable necessity, that is one — which we stand in very great need." That is an extract from a message signed Benjamin G. Humphries, dated Executive mansion.

I now read to you General from the Laws of Mississippi 1866 and 1867, chapter 17, page 27 as follows:—

"An Act to Create the Office of State Engineer for the Pur-
1809 pose of Compiling a New State Map under Certain Conditions.

SECTION 1. Be it enacted by the legislature of the State of Mississippi. That the governor is hereby authorized to appoint a State engineer, whose duty it shall be, under his direction to compile a geographical, historical and statistical map of the State; said map to be not less than five feet by three feet in size, to contain such information, as the governor in his judgment might deem necessary, and the publication to receive his sanction and approval.

SECTION 2. Be it further enacted, That the said engineer thus created shall continue in office for the period of 12 months from the date of his appointment, and shall receive no regular salary or compensation for his services, and shall be bound by the terms hereafter to be made as part of the provisions of this act.

SECTION 3. Be it further enacted, That the copy-right of the said map shall be vested in the State engineer and he shall receive from the State on the completion of the work the sum of twenty dollars ($20.00) per copy for each map, to be furnished as per schedule and filed, for the purpose of assisting in the expense of engraving and publication, and the said engineer shall be required to enter into an acceptable bond of security in the full sum to receive for and deliver to the State without further compensation than that which is hereinbefore provided, of such a number of the copies of the said map, for the use and benefit of the said State as will carry out the following schedule for distribution, viz: the secretary of state to whom the maps will be delivered shall cause three copies to be furnished to each county in the State, to become the
1810 property of the said counties, and for use respectively in the offices of the sheriffs, and the circuit and probate clerks, at

each county site in the State. He shall also provide the different State officers at the capital, each with a copy, and six copies for the State university, and besides those, shall have delivered to him such additional copies as will enable the governor to exchange for maps of other States and Territories, and the maps so received in exchange shall become a part of the property of the State library.

SECTION 4. Be it further enacted; That it shall be the duty of the different county officers throughout the State to afford the State engineer every facility for obtaining such information as he may require in the completion of the said work.

SECTION 5. Be it further enacted, That this act shall be in force from and after its passage.

Approved October 26th, 1866.

Was not Benjamin F. Humphries governor at the time this act was adopted and was not this in furtherance of his message to the legislature concerning which I have just asked you and read an extract from?

A. Well it would seem so from the reading of it.

Q. I now beg to direct your attention to the Laws of Mississippi of 1871, and more particularly to page 737, chapter 349 reading as follows:

"An Act to Grant Aid for the Purpose of Revising and Publishing an Official Map of the State."

"Whereas, the publication of an official map of the State of Mississippi, by T. S. Hardee, State engineer, has been entirely suspended since January 1st, 1870, by reason of the formation of new counties within the State, and,

1811 Whereas, on account of the formation of said new counties, and for the further purposes of preparing a map in greater detail, embracing the sectional lines and the sectional numbers, said T. S. Hardee has had much additional expense in having the whole work re-engraved, thus loosing entirely the cost of the original engraving, therefore.

SECTION 1. Be it enacted by the legislature of the State of Mississippi, That on the completion of the new edition of the map as above set forth, and the approval of the same by the governor, and when a number of the maps due to the State for distribution of the different counties shall have been delivered to the secretary of state, in conformity with the act of the legislature, approved October 26th, 1866, together with 54 additional maps, then, upon the certificate of the secretary of state to the effect, the auditor of public accounts is hereby authorized and required to issue to said T. S. Hardee, his warrant on the treasurer, for the sum of thirty five hundred dollars ($3500.00,) out of any money in the treasury, not otherwise appropriated, for the purposes and uses of the said T. S. Hardee for additional labor and expense incurred in the revision and republication of said official map of the State.

SECTION 2. Be it further enacted; That this act take effect from and after its passage.

Approved May 10th, 1871."

Now General I will ask you to please look at the date of the approval on this map concerning which you have been testifying, and which is known as Louisiana map No. —, and state whether this is not the map which was originally suggested in the gov-
1812 ernor's message of October 1866; authorized first in October 1866 when Governor Humphries was governor and finally revised, re-printed and approved again in 1871 on the 10th, of May.

A. Well I cannot say whether it was the map that was contemplated then or not. It might have been the map, the map upon that order, but the recommendation to Governor Humphries was made in 1866, that was when the people of the State, the property holders of the State made up the two bodies of the legislature. Five years afterwards this map was approved, but before I make further answer I want to get the journals of 1871 and look over the members of the legislature of that date.

The commission here took a recess for the noon hour, to reconvene at two o'clock p. m.

1813 The commission met pursuant to adjournment of this morning at two o'clock, and there were present the same as this morning.

Governor ROBERT LOWRY, being still on the stand, testified as follows:—

A. I have looked over the journals of 1871, and I want to say in answer to the counsel that I do not believe that the map here as approved by General Alcorn in 1871 has any connection whatever with the recommendation made by Governor Humphries in 1866. I have no recollection of any map smaller than this made by authority of this map, nor do I believe that there is such a map in the archives of the State. If so it is smaller and of little value, whether made by Hardee or any one else. My belief is that this map here had its origin in the legislative enactment which has been read by Mr. Dymond who propounded this question to me.

Q. Which act General?

A. The one that you spoke of in 1870 or 1871.

Q. Now General as I understand it you don't dispute the fact that in 1866 the legislature of Mississippi authorized the creation of a surveyor and the preparation of a map?

A. You read that awhile ago. Governor Humphries' recommendation did you not?

Q. I read the act of the legislature of the 26th, of October 1866?

A. Did you not read the recommendation of Governor Humphries?

Q. I read that at first?

A. Well let me look at that a moment will you?

Q. Now I am not asking you at all about the governor's recommendation. I am asking you about the act of the legislature?

1814 A. I want to look at the governor's recommendation at all events.

Q. Now General I will ask you the question. As I understand it you don't dispute the fact that in 1866 the legislature of Mississippi authorized the creation of a surveyor and the preparation of a map?

A. Yes sir, I say in 1866 the law approved October 26th of that year, that a law was passed authorizing the governor to appoint a State engineer to perform certain duties. To make a historical and statistical map etc.

Q. Do you know how maps are made generally so far as the preparation and compilation of the data is concerned?

A. I do not.

Q. Therefore would you be prepared to say that work on this map had not been started prior to 1866. Work on the compilation of the data?

A. No sir, I am not prepared to say anything about it either way.

Q. Are you prepared to say that work was not done on that map immediately after 1866 and prior to 1871?

A. I have no opinion upon that subject.

Q. I understand you have very considerable feeling and no doubt justly on the conditions as they existed in 1871 and during the period when reconstruction was existing in Mississippi. Now let's eliminate that entirely from our present discussion and refer to conditions existing under Governor Humphries. As I understand it Governor Humphries was an honest man. Is that right?

A. Well in answer to that question I desire to say that I think that I have sufficient conservatism to answer questions, any

1815 questions, without regard to any feeling that I might have had years ago. In my answer in regard to this map.

Q. General, I don't want to get you off. I am asking you a plain simple question as to whether Governor Humphries was or was not an honest man?

A. No sir, your question embraces more than that. I will ask you to repeat it.

Q. If you consider that my question embraces more than that I will cut my question down to the specific question. Was Governor Humphries in your opinion an honest man?

A. Well then that is the entire question is it?

Q. Yes sir, that is the one I now request you to answer. Answer it yes or no please and explain afterwards?

A. In my judgment he was an honest and honorable man.

Q. Do you then know General whether Governor Humphries appointed Mr. Hardee as a surveyor provided for by the act of 1866?

A. I do not.

Q. Will you swear whether as a member of that senate you voted for the confirmation of his appointment?

A. I don't know that either.

Q. Do you know anything at all about the ability of Mr. Hardee to prepare a correct map of the State of Mississippi?

A. I do not.

Q. Do you know whether this map that you have been testifying to is or is not a correct map of the State of Mississippi?

A. Well I have not testified any thing about its correctness or incorrectness. I never have examined it specially.

Q. Will you examine it and state whether you know it to be a correct map of Mississippi?

A. That will take some time Mr. Dymond. You want me to look over it and see whether I think it is correct or not?

Q. You might confine your investigation more particularly to the southern portion of Mississippi regarding the disputed area

1816 in controversy in this case?

Q. I want to say about the map, that I gave you in my previous answer all that I knew about it. I never paid any attention to it at the time it came out. I say I paid no attention to the map and in my judgment when that map was issued in 1871, the people of the State, the people whom I generally go with, the people who own the property and who pay the taxes here had no more to do with that map than they had with any other piece of legislation that was done in that character of legislature. Not only in Mississippi but your State and other States.

Q. Well General will you please answer what that had to do with the correctness of that map?

A. Well I don't know what it had to do with it. I don't know whether the map is correct or incorrect. I don't pretend to say. I pretend to say this, you understand——

Q. Have you any reason to suppose General Lowry that this map at the time it was prepared by Mr. Hardee did not represent the conditions as they were understood to exist at that time so far as the geography of the State was concerned?

A. I don't know whether I have or not sir.

Q. Now in 1882 E. G. Wall, commissioner of emigration and agriculture of this State prepared a map. Were you governor at the time Mr. Wall was commissioner of emigration and agriculture?

A. Yes sir, I was the governor at that time.

Q. Did you appoint him or was he elected?

A. I suppose he was elected.

Q. You don't remember though?

A. I don't remember, but I think that he was elected.

Q. Was he a Democrat?

A. I suppose he was yes sir.

1817 Q. That is at the time that the State had gotten back in the control of the Democratic party?

A. Yes sir.

A. Perhaps I can make myself better understood in this way. That during the radical days a man that wanted to get a thing passed by the legislature was here and with them, and he got it through, and if he did get it through and it was a success, the people who paid the taxes and supported the government had nothing to say about it. They could not help it.

Q. What year General did the government of the State of Mississippi pass back into the hands of its people?

A. Well now I don't recollect. You can get that from the records.

Q. Who was the first governor under the Democratic regime?

A. Governor Humphries.

1798 Q. He was displaced was he not?

A. Yes sir, he was displaced. Ames was the military governor then, and then Alcorn succeeded Ames.

Q. Well then who succeeded Alcorn?

A. Well sir Alcorn went to the United States Senate. Was elected to the United States Senate by a radical legislature. A negro by the name of Davis was lieutenant governor, and he was impeached and convicted. John M. Stone was then president *pro-tem.* of the senate, and John M. Stone was then made governor by promotion from that position.

Q. He served the unexpired term?

A. He served out the unexpired term.

Q. Or Ames?

A. Yes sir, and then he was elected governor.

Q. Who succeeded Stone?

A. I did.

Q. What year did you come into office?

A. I went in there in January 1882.

Q. Can you remember in what year the railroad commissioners for the State of Mississippi were appointed?

A. Well I think it was in 1884.

Q. Do you or not know that this same Captain Hardee was appointed under the Democratic administration as one of these railroad commissioners?

A. I do not. I don't remember. I was trying to think if there had not been one before 1884, but I don't remember.

Q. When did your last term expire?

A. It expired in 1890.

Q. Are you certain that during the term that you were governor that you did not appoint Captain Hardee one of the railroad commissioners?

A. I did not. That is my distinct recollection.

Q. You are positive that you did not?

A. I am satisfied that I did not. No sir.

1799 Q. You don't know whether he was appointed under Governor Stone. There was no railroad commission then was there?

A. I don't think there was. I appointed Governor Stone railroad commissioner under this bill creating them in 1884. I don't think Hardee was ever appointed by a Democratic administration. You know that there were a great many railroads chartered at that time. There were some men canvassing in different parts of the State for different railroads. It might have been from that that you think so. I will answer that question that I feel perfectly sure about it. Governor Stone as I stated filled out the unexpired administration of Ames, and he then served another term and I succeeded him, and then succeeded myself and then Stone succeeded me, and he was not appointed during this Democratic administration.

Q. You say General that you know nothing about the Gulf boundaries of the State of Mississippi and have not paid any special attention to it, except the general understanding that the boundaries of the State of Mississippi extended to a certain distance from the shore?

A. Yes sir, that has always been my understanding. The understanding of the people.

Q. Well now this map which was issued by E. G. Wall, the chief of the Mississippi State board of emigration and agriculture. That was issued during the Democratic administration?

A. During my administration I think sir.

Q. Was not he appointed by you?

A. I think he was elected. He was a negro.

By Gen. GUION:

Q. He was elected by the Democrats?

A. Yes sir, I think so.

Q. And after the Democratic party had taken possession of the State government?

1800 A. Yes sir.

By Col. ZACHARIE:

Q. Do you know General while you were governor of the State of Mississippi whether any taxes for the State or the counties of Mississippi were ever levied on this disputed territory. Let me ask you first, you know the disputed territory?

A. You mean the islands.

Q. The islands or what is regarded as the main land of St. Bernard parish?

A. I only know two or three of them. As I stated my general understanding was that Mississippi's jurisdiction extended as Congress provided. In the act.

Q. Well about the taxes. Did you ever know of any taxes being levied on these islands and this territory here. Those are within this red line as shown on Mississippi A.?

A. Well I am not prepared to answer that question.

Q. You don't know one way or the other?

A. No sir, not about that. The governor does not have much do with that part of it.

Q. You have spoken of the acts of Congress admitting the Sta of Mississippi; the State of Mississippi was admitted in 1817. Louis ana was admitted to the Union in 1812. Have you ever examine the act admitting Louisiana into the Union in regard to he boundaries?

A. Well my recollection is about that Colonel—I don't know tha I recollect it now, because I have not the data. When I, in co junction with Col. McCardle wrote the history, the school history Mississippi, and at that time the adjacent States—at the time Gov ernor Claiborn was you know first in this State and then over i Louisiana—I then had occasion to look up the data to see some thing that I desired to see about it, and that is about my recol
1801 lection of the examination that I made so far as Louisian was concerned.

Q. You have no recollection therefor- of what the act admitting Louisiana prescribed in regard to her boundaries?

A. No sir, I don't remember. I have no distinct recollection o that. All of my definite recollection is as to the State of Mississipp and the act of Congress as to her.

Q. Do you or do you not remember whether this map that wa approved by Mr. Wall, as the chief of the Mississippi State board o emigration and agriculture in 1883 was in pursuance of authority vested in him under the act of the State legislature of the State o Mississippi directing him to prepare such a map?

A. I don't recollect the character of the authority conferred upon the commissioner. My recollection is that it was by the immigra tion board at that time. I don't remember about that, but I pre sume though that he had some authority for it.

By Gen. GUION:

Q. It is a fact is it not General also that J. L. Alcorn was governor of Mississippi on the 10th, of May 1871?

A. Yes sir, I think he was.

Q. Do you remember whether T. S. Hardee was State engineer of the State of Mississippi in 1871?

A. I do not, no sir.

Q. Do you know as a fact that the map made by T. S. Hardee and approved by J. L. Alcorn as governor of Mississippi on the 10th, of May 1871 is a part of the archives of the land department of the State of Mississippi at this time?

A. Well I don't know personally about that sir. I know that that map was made at that time there. I don't know, I don't remember about the map at all. I don't know whether it was among the ar chives or not.

1802 Q. This came from Mr. Wall's office. I thought perhaps you knew that?

A. No sir, I don't know where it came from.

Q. Has the State of Mississippi by legislative acts or otherwise ever voided or repudiated or attempted to repudiate this map made by T. S. Hardee in 1871, and approved by Governor Alcorn in 1871?

A. I don't suppose that they ever took any action one way or the other about it. The map was made at the time I have indicated and under the circumstances and conditions that I have stated.

Q. It is a fact though is it not General to your personal knowledge that the State has never passed any act since the approval by Governor Alcorn of this map repudiating it as a correct map of the State of Mississippi?

A. Not to my knowledge sir. I don't know of any thing of that kind ever being done, no sir.

Q. Don't you know as a fact that it has never been done?

A. I suppose I would have known some thing of it if it had been done. My opinion is that it never has been done.

By Mr. DYMOND:

Q. General Lowry as I understand it you have been offered as a witness here to prove the conditions that existed at the time, supposedly, of the production of two maps, one being T. S. Hardee's map of Mississippi approved May 10th, 1871, by Governor J. L. Alcorn, and the other known as Louisiana map No. 32, a map prepared in 1883 by E. G. Wall, commissioner of emigration and agriculture. Well now first take up this map of Mr. Hardee as it is the earlier of the two maps. What do you know General as to the correctness or to the incorrectness of the southern boundary of Mississippi as interpreted by this map of Hardee?

1803 A. I don't know sir anything about it. I don't know as to the correctness or to the incorrectness of Hardee's map.

Q. I understand then if this map is correct or is not correct, you are not supposed to testify anything as to that?

A. How is that sir?

Q. As to the correctness or the incorrectness of this map you are not supposed to testify anything about that?

A. No sir.

Q. As I understand it further personally you know nothing in regard to the southern boundary of the State of Mississippi carried out in detail where it touches Louisiana?

A. I do not.

Q. You were governor from 1882 to 1890 as I understand it?

A. Yes sir.

Q. Now I believe you stated that you were unable to testify definitely as to when the white people came into control of politics in the State of Mississippi?

A. No sir, I did not state that.

Q. Can you fix that date?

A. Yes sir.

Q. What was that date?

A. In 1875 we won out.
Q. 1875?
A. Yes sir.
Q. The war ended in 1865?
A. Yes sir.
Q. What party were in power in Mississippi immediately succeeding the war?
A. The Democrats and the white people. There were Democrats and Whigs. Governor Humphries was elected and he was a Whig.
Q. There was a good government then was not there?
1804 A. Well if we had any body that was good in our State Ben Humphries was good.
Q. When was it that the radical and carpet bag element came into power in this State?
A. When Governor Ames was appointed military governor.
Q. When was this?
A. When he run Humphries out of the state house and the executive mansion.
Q. What date is that?
A. I could not give you the date now.
Q. Could you get it and familiarize yourself with it please. It is quite important to have that date. What year?
A. Well I can not say about the year sir. Let me see. It was probably in 1867. I don't remember. I can not state about the dates.
Q. Was there a good government here in 1866. Say in the month of October?
A. 1866. It is my recollection that—I am not sure—I don't think that Governor Humphries had gone out before that time. If he was in we had a government of our own people. If he was out we did not.
Q. Can you not fix that now. Have you not access to some record?
A. Excuse me. I can not come within two or three months of it. My recollection is not that good.
Q. Is there not some record which you can refer to and refresh your recollection?
A. Yes sir.
Q. Can you do it now?
A. Yes sir. That was in 1867 that Governor Humphries was ejected.
Q. Then as I understand it in 1866 on the 26th of October you say that there was a good government in the State of Mississippi?
1805 A. Yes sir, he was inducted into office on the 15th of October 1865.
Q. And remained in there until that date?
A. I think until 1866, because in the convention of 1868 the

Democratic party nominated him as a candidate on the Democratic ticket.

Q. Did I understand you to say a moment ago that he was governor on the 26th of October 1866?

A. He was inaugurated. He was governor in 1866. 1865 and 1866.

Q. Up to what time?

A. Well my impression is—I do not find the time here exactly, but my impression is that he was ejected in the latter part of 1866. He convened the legislature by a proclamation in August 1866, and I think a short time after that, on the 15th day of the following October they were to meet, a short time after that I think, before 1867 I think probably he was succeeded by Ames as military governor.

Q. I desire now to repeat the question and ask you again whether or not Governor Humphries was governor on the 26th of October 1866?

A. On the 26th of October 1866. Yes sir, I take it that he was because on the 16th of October 1866 he sent a message to the legislature.

Q. Can you fix with definiteness when he was succeeded by the military governor. You testified a moment ago that you thought that it was in 1867?

A. Yes sir I can find that I reckon.

Q. Can you from any reference you have made indicate about the time that Governor Humphries was removed from his office of governor?

A. General Humphries was a candidate for governor in 1806 1868. He had been removed——

Q. Will you please look at the School History of Mississippi by F. L. Riley, page 297, paragraph 663, and read the first paragraph to the stenographer?

A. On June 4th, 1868, General Gillam was succeeded by General Ruffain McDowal who commanded the district until July 4th, when General Gillam was reinstated. McDowal's brief reign was marked by the removal of Governor Humphries, and Attorney General Hooker, it being alleged they were an obstacle to the reconstruction cause. Brevet Major General Adelbert Ames was appointed provisional governor in the place of Governor Humphries. A military officer was detailed to perform the duties of attorney general. On February 9th, following the secretary of state was removed.

Q. General is that Humphries mentioned in the paragraph that you have just read from the Governor Humphries concerning whom you have been testifying?

A. Yes sir.

Q. I notice in the history of Mississippi gotten up by Lowry and McArdle page 371 the following clause "The legislature adjourned on the 21st of February 1867." Was Governor Humphries governor at that time?

By Mr. McCLURG:

Q. What kind of a legislature was it that elected him to the Senate?

A. It was a radical legislature. Negroes and carpet-baggers.

By Col. ZACHARIE:

Q. From your personal knowledge of Governor Alcorn, as well as from his general reputation are you of the opinion that he would have appointed to this position of State engineer Captain Hardee if he was not competent man for the position?

A. Well in answer to that question I will say that General Alcorn made appointments that he believed would benefit his party and secure influence to himself. And I want to say further that I feel that I could not do otherwise than answer when I tell you, who are a lawyer, that General Alcorn appointed to the supreme bench of Mississippi a carpet bagger, and a man who had no standing as a lawyer. He appointed him as one of the supreme judges of
1795 Mississippi, and I think I would be justified in saying, when a man would appoint as a judge of the court of last resort a man who did not have the qualifications, and he was willing to make him supreme judge, that then he would certainly make other appointments that he thought would be advantageous to himself.

Q. General, if it be shown, as we intend to show, that Captain Hardee was a Democrat, bitterly opposed in politics to the existing government at that time. Would you think that under these circumstances Governor Alcorn would have selected a man opposed in politics to himself and opposed to his government unless he had full confidence in his integrity and competency?

A. Well I would answer that question in this way. That in my judgement under the conditions that existed at that time I don't believe any living man who opposed the Republican party and had spoken against it in Mississippi could have gotten any thing from those in power at that time.

Q. I notice upon this map that there is an official endorsement as required by the statute I believe, from Governor Alcorn as the governor of the State of Mississippi. From what you know of Governor Alcorn of your own personal knowledge and by reputation, are you of the opinion that Governor Alcorn would have approved that map if he did not consider it correct. Approved that map of Mississippi?

A. I will answer that in this way. That if the legislature appointed a party; appointed Captain Hardee as State engineer. If he had been appointed as State engineer by the legislature; they appointed him to make a map of the State, my impression is that from the conditions at that time that Governor Alcorn had a competitor in the person of General Ames, and it was a contest between them my idea is that General Alcorn would have approved
1796 the act of the legislature with the hope of retaining a majority of his people.

Q. I am now speaking of and asking you questions Geneaal in regard to the act of Governor Alcorn in approving this particular map. In your opinion and from what you know of Governor Alcorn personally and by reputation, would Governor Alcorn have approved a map as governor, as the official map of the State of Mississippi, unless he believed and was satisfied that the map was a correct delineation of the State of Mississippi?

A. It is a difficult matter for one to draw a distinction between personal integrity and official life, and more especially so at the time that this map was made. I have no doubt that Governor Alcorn approved many things that he would not have done under a different state of facts.

Q. That Governor is not yet a specific answer to my specific question in regard to this particular map. I am now speaking of and asking you questions General in regard to *to* the act of Governor Alcorn in approving this particular map. In your opinion and from what you knew of Governor Alcorn personally and by reputation, would Governor Alcorn have approved a map as governor, as the official map of the State of Mississippi unless he believed and was satisfied that the map was a correct delineation of the State of Mississippi?

A. I will say this. How Governor Alcorn came to appoint a civil engineer I don't know. If he had any precedent for it I am not aware of it. My impression is that the authority of that map secured it- acceptance by the legislature from the character of men that at that time filled the two houses. The lower house and the State senate, and that General Alcorn approved that map; not only approved that, but approved other laws that he would not have done as James L. Alcorn, Whig leader of Mississippi.

Q. Now General, my brother Dymond has suggested that we are entitled to a categorical answer to the cat*a*gorical question
1797 and then of course you will be allowed to explain. I have not yet gotten a specific answer from you as to whether Governor Alcorn would have approved that map as the official map of the State of Mississippi unless he was satisfied that it was a correct and proper delineation of the State. Now I will ask you to please state yes or no according to your belief?

A. I believe he would at that time have approved it whether he believed it correct or not, and I will go further and state from party considerations. That is my opinion.

Q. General you have mentioned that he would have been influenced by an acceptance of the map by the legislature. Was there any acceptance in fact, or was there any acceptance required by the legislature. Was not it left to the approval of the governor?

A. Well now Colonel I can not answer that question. I don't know what the statute was upon the subject.

Q. Part of your reasoning was based upon the fact that he would do so and so, because of the acceptance of the legislature. Now suppose there was no acceptance by the legislature?

the channel and harbor at Gulfport of which you have spoken leading out to Ship island. That this 9. nautical blue line from Isle à Pitre reaches very nearly to the channel?

A. I notice that according to this map, if this map is correct. I can not testify that this map is correct.

Q. And you will also notice that there is a- inner line marked 9. nautical miles from Grand pass, and still another inner line marked 9. nautical miles from the main body of the marsh land. As I understand the purport of these lines Colonel, they mean the three leagues from the coast mentioned in Louisiana's bill of complaint, and that that State expects to establish her boundary or the limits of her jurisdiction there at nine miles from the main body of the marsh land; nine miles from Grand pass, and nine miles from the northeastern end of Isle à Pitre, either of which lines as you will observe strike the Mississippi shore east of Point Clear. In this connection I also call your attention to the red lines
1832 running parallel with the Mississippi shore marked 1 statute miles, and 18 nautical miles from the coast of Mississippi. You will gather from these lines a general idea of the contest in this particular locality. State what you may be able to state the effect on the commerce of Mississippi would be if the jurisdiction of Louisiana should be established according to the blue lines to which I have called your attention?

A. As I understand your question it would absolutely shut in Mississippi from Cat island and the waters east of it for several miles taking your northeastern line of nine nautical miles from Isle à Pitre. Taking your inner line it would shut off about half of Cat island. Taking your southernmost line it would shut off the most of the islands southwest of Cat island, where I was informed are the greatest oyster beds. But what effect it would have on the commerce entering into Gulfport I can not say unless Louisiana would have control of these waters. If the United States Government remained in control of the waters then I don't see how it could affect the commerce coming into Gulfport and going out into the gulf of Mexico, except it might affect the commerce that now comes down Pearl river and in Bay St. Louis that now comes to Gulfport for loading on foreign ships. That would of course be entirely shut off if Louisiana claimed absolute control of the waters.

Q. It has been shown during the progress of the testimony that has been taken in this case that licenses have been required of boats fishing in the waters of the respective States of Louisiana and Mississippi. Would the extension in your judgment of Louisiana jurisdiction according to the lines materially affect the revenues of the State of Mississippi with reference to these licenses and
1833 other matters over which the State has jurisdiction or may have concurrent jurisdiction with the Federal Government?

A. There is no question about it would shut off practically all of the State's income from catching the fish and oysters out of the water south of Mississippi as it has done. For all of the oysters

practically lie within the claims of Louisiana according to these lines and this map.

Q. How long did you say that you had been in Gulfport?

A. I would like to say that when I said nine tenths of my time, that is just an estimate. I have spent the greater part of my time in the State. Previous to that I have been interested in Gulfport and Mississippi since 1896. The fall of 1896, but I have taken charge of my property there since April 1st, 1901.

Q. State in a general way please what developments; industrial enterprises have grown up along the line of your road through southern Mississippi since you have been interested in it, and tell us something of their values?

A. There was practically no development or very little in that section of the State of Mississippi until the Gulf & Ship Island railroad started to build in 1896. There had been some work done on the railroad previous to that but it failed to mature to any benefit to the projectors of it. Since then the development of Gulfport has been from three little wooden shacks and half a dozen souls to nearly seven thousand people and various industries as pertains to such a city. The commerce at Gulfport has developed from nothing to about 22 or 23 million feet of export lumber per month, and 150,350,000 the last seven months, and 175 ship loads left the harbor 1834 for foreign lands and export trade since January 1st, 1904, to August 1st, 1904. The industries along the Gulf & Ship Island road have increased from practically nothing to 130 saw mills, with towns and little cities from Gulfport to Jackson, scattered along the road. I have been creditably informed by the commissions that assess property, that the valuation of the properties have increased over fifty million along the Gulf and Ship Island railroad, and the industries have grown in proportion, with four or five large oil mills, several cotton compresses, and four or five large manufactories. Nearly all of the naval store business, which includes turpentine and rosin from the State of Mississippi, part of Alabama and part of Louisiana come to Gulfport. Most of it from Louisiana and Alabama come by the way of the water in Mississippi sound, along the coast of the mainland to Gulfport; there it is prepared for export, and within the last two months there are three large steamers loaded with turpentine and rosin for Europe. A large steamer came to the pier this month loaded with perites of iron from Spain for the oil mill of Gulfport, and there is no question but what hundreds of more of such cargoes must come there as it is the cheapest point for all of the manufactories of the cotton seed oil mills, and fertilizing plants between Gulfport and Jackson.

By Mr. FLOWERS:

Q. Colonel Jones, you stated that if the lines which appear on this map No. 7, were established as the boundary lines of the State of Louisiana, that it would include within Louisiana territory nearly all of the valuable oyster beds. Please state whether that

would be the result if the line marked on this map No. 7,
1835 as the deep water channel claimed by Louisiana was established as the real boundary line between the States?

A. It would unquestionably cut off Mississippi from the most valuable oyster beds, leaving a very small amount of it near Cat island.

Q. Colonel Jones. Please state if you know whether the land all along the coast of Mississippi between Gulfport and the mouth of Pearl river is of considerable value?

A. Oh yes sir, it is of great value.

Q. State whether or not it is thickly settled?

A. There is a large population along the coast from Gulfport to the mouth of Pearl river, including Pass Christian, Long Beach, and many other houses along the coast.

Q. Is it not a fact that the land along the coast from Gulfport to the mouth of Pearl river is divided up into lots?

A. The most of it.

Cross-examination.

By Gen. Gunos:

Q. Col. Jones, will you be kind enough to tell me whether or not you know what the claim of Louisiana is as to the lines dividing her territory from that of Mississippi?

A. Only as I see them on map No. 7, before me.

Q. There are several lines on map No. 7, which is now before you. Will you kindly indicate to me which line is the one that Louisiana claims?

A. No sir, only as they are laid off here. Here are the lines, and I am satisfied that it is one of the three lines or four lines there.

Q. You see four lines do you not all in blue marks?

1836 A. Yes sir, I call these two lines here close together as one line, and I call this one running *paralel* more or less with the coast, and this called the deep water sailing line, that I would call the fourth line.

Q. Now if I would say to you that the State of Louisiana claims as the real boundary between it and the State of Mississippi, what is on this map marked No. 7, as the deep water sailing line from Pearl river to the gulf of Mexico, would not that line run between Isle à Pitre and Cat island?

A. Yes sir.

Q. If that should be recognized by the Supreme Court of the United States as the line between Mississippi and Louisiana will you be kind enough to state in what way there could be any interference in regard to the canal or channel that you have got from Gulfport to Ship island?

A. None whatever as I understand it except it would cut off o prevent the timber now coming down Pearl river, and sawed at th

mouth of Pearl river coming to Gulfport, only by going through Louisiana possessions or claims.

Q. Then your idea is if Louisiana is successful in having the line indicated on this map marked No. 7, as the deep water sailing line from Pearl river to the gulf of Mexico is the correct dividing line between it and Mississippi, that it would be cut off at Gulfport from any timber and supplies of any kind coming out of Pearl river. Is that your understanding?

A. No sir, unless it comes through the possessions of Louisiana as shown by this map.

Q. Do I understand you to believe that any lumber or products of any kind coming out of the eastern mouth of Pearl river down into the Mississippi sound into Lake Borgne would be cut off
1837 from coming to Gulfport altogether simply because this line between Mississippi and Louisiana would be held to be what on this map marked No. 7, is the deep water sailing line from Pearl river to the gulf of Mexico?

A. Do you ask me for my opinion?

Q. I thought that you stated opinions is the reason that I was asking you?

A. I don't think it would have any effect because I don't think that Louisiana would interfere with it.

Q. Will you state what the distance is from Gulfport to Ship island?

A. 11 miles. Now let me understand that. It is 11 miles from Gulfport pier to Ship Island light house, but only seven or eight miles to the deep water around Ship Island harbor.

Q. What is the length of the channel that you have got?

A. About eight miles from the south end of the pier.

Q. How do these vessels get to what you call Ship Island channel from the gulf of Mexico?

A. Come between Ship island and Cat island, but much nearer to Ship island where the Government has dredged the channel through the bar.

Q. Then if I understand you Col. Jones, you can not understand in what way there could be any assertion of claim of jurisdiction by the State of Louisiana between Gulfport and Ship island should Louisiana be successful in establishing as the boundary line between her and Mississippi what on this map is marked No. 7 as the deep water sailing line from Pearl river to the gulf of Mexico?

A. It would have no effect whatever sir.

Q. That would be entirely north would not it that Louisiana claims, if that be the line she claims in?

A. Yes sir, be north east.

1838 Q. And the channel by which the vessels would come out to the sea from Gulfport would be between Ship island and Cat island?

A. Yes sir.

Q. Do you know any thing at all about the channel between Cat island and Isle à Pitre?

A. I do not, only from casual expressions of other people. Not personally.

Q. Have you ever been there?

A. Yes sir, but with no intention of measuring the water or looking for any channel or any thing of that sort.

Q. You don't know the depth of the water then between Cat island and Isle à Pitre?

A. No sir, I do not.

Q. Do you know if there is a channel in between them?

A. I have been told so. I never sailed over it that I know of, only sailed around down there.

Q. Now you spoke just now of the oyster territory if I mistake not, and I understood you to say that if the line claimed by Louisiana should be held to be the proper line of boundary between it and Mississippi, that the oyster territory would be given exclusively to Louisiana or almost entirely to Louisiana. Am I mistaken in that?

A. No sir, you are not. As I understand it from this map nearly all of the valuable oyster beds would be excluded from Mississippi.

Q. Where are the valuable oyster beds located with reference to this line on map marked No. 7. called the deep water sailing line?

A. South and southwest.

Q. Have you ever been down in this territory that is broken up by lagoons and bayous, what is called the marshes, and Louisiana claims as a part of St. Bernard parish and which Mississippi claims to be within the 18 mile limit?

1839 A. Only along the northwest part of these islands, and never down among them.

Q. You have never been down into this territory proper?

A. No sir.

Q. What part did you say that you had been in?

A. The northwest, down here.

Q. That is the north east?

A. Yes sir, but I mean down over here. I have gone over the water south of the line as you state it, through here, but never down in the southern part of these islands and marshes.

Q. In other words you have never gone into what Louisiana calls the parish of St. Bernard. That is what she calls the parish of St. Bernard?

A. No sir, I never have.

Q. How old is Gulfport?

A. I think that the name was given to that port some 23 or 25 years ago, but the recent Gulfport is from 1896, and there were only about three little shacks there at that time.

Q. When did it begin to be a port of any consequence for the exportation of lumber and other materials by vessels. In other words when did it assume any commercial importance?

A. I think on the 6th day of January 1902, the first ship capable of drawing 20 feet landed at Gulfport. That year 29 ships came to Gulfport. They had a very narrow and imperfect channel.

Q. That is the first instance of vessels coming to Gulfport?

A. Yes sir, in 1903, 111 came to Gulfport.

Q. And it has been increasing ever since?

A. In seven months, in 1904, 175 up to August 1st.

Q. Colonel Jones, have you any data or information of any kind that would enable you to state to this commission, and to the Supreme Court, that in 1817 Gulfport had any commercial importance at all?

1840 A. I could only state that from my recent experience that there was nothing but the coast along there.

Q. Nothing but the coast?

A. Yes sir, with very small timber. Of course I cannot say it was all small timber at that time, but we found it very small timber. I am speaking as we found it in 1896.

By Col. ZACHARIE:

Q. Col. Jones, do you know or do you understand that since almost the foundation of the Government of the United States that it has been decided that the United States Government has exclusive jurisdiction over the navigable waters lying within the boundaries of the State?

A. I can say that has been my information and understanding.

Q. According to your understanding does not that jurisdiction refer only to the navigation and commerce passing over navigable waters?

A. I cannot say that, for on the Ohio river they assume a certain right to control the sale of liquor. Just what that right is I can not say but I know that to be a fact.

Q. You can not say that they asserted any right to control the sale of liquor except under the internal revenue law?

A. No I will not say that because I don't know what the foundation of their claims were [illegible] the sale of liquor on the Ohio river.

Q. Did you not understand that the property—that the bottoms of navigable streams and parts of the sea and sound within the jurisdiction of the State are the property of the State and can be governed by the State except in as far as not to interfere with navigation?

A. That has been my understanding so far as the commerce of the country was concerned.

1841 Q. Well what you have said about the United States interfering with the works on this channel and so on at Gulfport was simply because the United States was exercising its undoubted right to see that the rights of navigation were properly protected?

A. That was my understanding. I got that information direct

and within your knowledge independently of the face of the map or of the legislation, in that connection that indicates that these maps had any purpose or bearing upon the boundary in the waters of the Gulf between Louisiana and Mississippi I wish you would state it?

A. Well no sir. The original map as I understood it was to divide the State into counties, and giving the counties, etc., and I never knew or understood any thing about the dividing line between Louisiana and Mississippi on the maps.

Q. Prior to the institution of this suit, while you were governor, and before and since have you any knowledge of any controversy between these two States as to the boundaries in the waters of the Gulf?

A. I have none. I have not heard any dispute about the boundary. I don't remember whether it was during my first or
1821 second term as governor that I sent a message to the legislature in regard to the oysters down there. To protect the oysters. That is my only recollection. I knew nothing about the dividing line and heard nothing about the discussion of that. If there was I did not hear it. I was induced to send this message from the fact that I thought that these oyster interests ought to be preserved. I called the legislature's attention to the fact that I thought that interest should be preserved. So far as these maps are concerned I never heard any discussion of them.

Q. The messages of the governors and the acts of the legislature don't increase the power of a fellow to make a map correctly does it?

A. No sir, it does not.

Q. As I understood it in answer to the question by counsel for Louisiana in reference to the Wall map. That is a sort of revenue map. Emigration map?

A. Oh, this little thing here is about as near nothing I suppose in the shape of a map as could be gotten up. I will say this in connection with that. George Carlisle, who lives up the street here, a man of means and of property and sense. Carlisle became commissioner of emigration and I think that he got ten dollars a year. He made a much better map than this one. I was going to look in my office for Carlisle's map. He made a map and this man made a map, and Carlisle's is much better than this one.

Q. Carlisle succeeded Wall?

A. Yes sir, and he sold the Illinois Central railroad a number of maps of that kind. To, I forget his name, the man who comes down here and talks about immigration. Captain Merry.

1822 Q. Do you recognize maps as being of material value in settling State boundaries?

By General GUION: Objected to on the part of the State of Louisiana as being simply a conclusion of law and not a matter of fact.

By Mr. DYMOND: And also on the ground that the witness is not an expert on boundary matters.

Q. Governor, if there is anything else that you desire to say in this connection I would be glad for you to do so?

A. I don't know of anything that is embraced in your respective contentions that I would like to mention, but I would like to say this much. The counsel for Louisiana, as I understand it, Col. Zacharie propounded a number of questions to me about the integrity of Governor Alcorn and whether he would sign any paper or approve any law that he thought was improper etc. Now I want to say this. Governor Alcorn was a gentleman. I esteemed him very highly. A man of courage, and a man of great force of character, and will force, before he got in that condition here politically with his own people. Those who had been his friends previously as a great Whig leader of the State. He got into trouble with them and lost them all nearly, except now and then a personal friend would stand by him. Then unfortunately he failed in what he intended to do in carrying out his purpose with the negroes and carpet baggers, and then he come in conflict wih Governor Ames, and these people that had been in with him began to shove him off. He was just in that condition that he wanted to bring friends to him, and I think that the governor had to
1823 shield himself as well as he could, and my opinion is that he approved laws that differently situated he would not have done. I think that the governor was a gentleman of personal integrity, but politically he lost out, and he retained many personal friends notwithstanding he lost his political influence in the State. Now I want to add further in regard to Captain Hardee. In my intercourse with him I always esteemed him as a gentleman, and in the passage of this bill through the legislature as I have already stated in my answer today, I don't believe any living man who is a Democrat, and Col. Zacharie referred to that, I don't believe any living man could have come here as a Democrat and got any character of bill that would have been of any advantage to him through the legislature, which was composed largely of negroes and of white men who had no interest in the State. I have been looking through this legislature of 1871 and you can scarsely find one of them now that is an inhabitant of Mississippi. They did their work and left. They got what they could and cleaned out. I know nothing of the contention as to the boundary lines whatever personally nor have I ever investigated or tried to investigate the question. I have always in looking over it accepted as true the acts of Congress. That is my information generally on the subject.

1824 Col. J. T. JONES, a witness introduced on behalf of the State of Mississippi, being duly sworn, testifies as follows:

By Gen. MCCLURG:

Q. Where do you reside Col. Jones?

A. My home is in Buffalo, New York, but for the last three and a half years I have spent at least nine tenths of my time in Gulfport Mississippi.

Q. As you doubtless know we are engaged in a suit in the Supreme Court of the United States respecting the boundary between the State of Louisiana and the State of Mississippi in the waters of the Gulf, and one feature of this controversy presented by the State of Mississippi is of a commercial nature. Our contention being that matters of commerce entered into the consideration of the boundary at the time that Louisiana and Mississippi, and especially at the time that Mississippi was admitted into the Union. There is a great deal of historical matter especially in the committee reports of Congress to the effect that each State should have its frontage on the Gulf and water inlets, and as we see from Louisiana's claim by her bill of complaint and by some exhibits and maps that she has filed, this question is of importance to the State and we have asked you to come and testify along this line of commercial interest, believing as I have stated before that these matters enter largely into a proper consideration of the acts of Congress admitting these two States.

By Mr. DYMOND: Counsel for the State of Louisiana now requests of the counsel for the State of Mississippi to disclose under what allegation of their answer and cross bill they set forth these claims, and propose to introduce such evidence as is mentioned in that statement.

1825 By Mr. MCCLURG: Counsel for the State of Mississippi answer this demand first, by saying that they regard contemporaneous history, especially that part of it made by the Congress which created and admitted these States into the Union as being competent to aid the construction of the acts creating and admitting these States.

That such testimony we regard as competent in supporting our denial of the boundary claim by Louisiana, and of the boundary which is claimed by Mississippi in our cross bill, and especially with reference to paragraph 8., of the cross bill where it is set up on the part of Mississippi that the Congress in carving States out of the Louisiana purchase treated the Gulf coast or shore as a line running generally from east to west, and intended to form and bound the States on the Gulf so as to give each State jurisdiction over the waters adjacent to the shore or coast for a certain specified distance southward from its main land line, and that it was not intended by the Congress to give any State jurisdiction over waters adjacent to, and immediately south of, and in front of any other State or Territory. In view of paragraph 8. of the cross bill and of Mississippi's general denial of Louisiana's original bill, and looking to contemporaneous history, it is now proposed to be shown by the witness that the construction of the acts of Congress contended for by us is correct in view of the history of the two States in this section since their admission into the Union, and in view of the present conditions from a commercial point of view.

1826 By Mr. FLOWERS: One of the principal reasons which prompted the Congress in laying off the States along the

Gulf coast so as to give each State jurisdiction over the waters in front and immediately south of the main land was to give to the several States equal commercial advantages. The purpose of the testimony here offered is to show that the conditions along this part of the Gulf coast in controversy are such that the commercial advantages to accrue to the State of Mississippi are involved in this controversy.

By Gen. GUION: Counsel for the State of Louisiana object to any evidence being introduced by the State of Mississippi either in support of the allegations of Mississippi's answer and of her cross bill along the lines announced by counsel for the State of Mississippi because any such evidence as may be offered would be irrelevant and immaterial and inadmissable under the pleadings: that there is nothing in any of the allegations of the bill of complaint filed by the State of Louisiana, in the nature of a claim of any exclusive rights of navigation in the waters between the two States of Louisiana and Mississippi, and no claim made in any of the allegations of the pleadings of Louisiana to any exclusive commercial advantages on said waters.

By Gen. GUION: Counsel for the State of Louisiana specially objects to the line of inquiry which the State of Mississippi has just announced its purpose to persue in the examination of its witness, who has just been sworn, because the statements made by the counsel for the State of Mississippi are of such a character as to amount practically to leading the witness to the answers desired.

1827 By Mr. DYMOND: And that it is improper to state as facts contemporaneous congressional history as facts which by the record are shown not to have been proven as such.

The question was here read to the witness from the stenographer's notes as follows:

Q. As you doubtless know we are engaged in a suit in the Supreme Court of the United States respecting the boundary between the State of Louisiana and the State of Mississippi in the waters of the Gulf, and one feature of this controversy presented by the State of Mississippi is of a commercial nature. Our contention being that matters of commerce entered into the consideration of the boundary at the time that Louisiana and Mississippi, and especially at the time that Mississippi was admitted into the Union. There is a great deal of historical matter especially in the committee reports of Congress to the effect that each State should have its frontage on the Gulf and water inlets, and as we see from Louisiana's claim by her bill of complaint and by some exhibits and maps that she has filed, this question is of importance to the State and we have asked you to come and testify along this line of commercial interest, believing as I have stated before that these matters enter largely into a proper consideration of the acts of Congress admitting these two States. What interest have you if any on the coast Col. Jones?

A. I have large interests at Gulfport, and along the coast between the coast and Ship island.

Q. We would be glad to have you state to the commission in order that the court may learn the conditions existing on the Mississippi Gulf coast, with reference to her maritime and commercial
1828 interests, and in view of showing the effect of a decree establishing the line sought to be established by the State of Louisiana; what you may know about the maritime and commercial interests down there?

A. We have a harbor opposite the city of Gulfport extending over a mile from the main land or shore out into the Mississippi sound, in a direct line towards the light house on the west end of Ship island. We have dredged a channel from the end of the pier or harbor to deep water in the harbor known as Ship Island harbor.

Q. Who do you mean by "We"?

A. Well I will say the Gulf and Ship Island Railroad Company. That is to the deep water known as Ship Island harbor. We have also dredged what we call the Anchor basin, a quarter of a mile wide and a half a mile long with its approaches from the Anchor basin to the mouth of the channel. We have received 320 ships into the harbor within two years and about a half, or in other words about thirty months. We have sent out of the harbor loaded 395 ships up to the first of August this year. We believe that port to be destined to be one — the greatest ports on the southern coast of the United States. With a reasonable and moderate amount on money we believe that the channel can be cut down to 32 feet, also the harbor by which and through which the largest vessels afloat on the gulf of Mexico can go in and out of that harbor without any difficulty. We believe and our experience for the last three years has demonstrated the fact, that the channel can be kept open at a moderate, very moderate expense, and that the harbor can be maintained at a very moderate expense, cheaper than most of the harbors according
1829 to my best information. The channel is the shortest of any along the coast leading from the deep waters of the harbor of Ship island to the harbor of Gulfport, and is one of the most accessible from the waters of the Mexican gulf. We further believe that with the southern terminal of the Gulf and Ship Island road at Gulfport, that we will have one of the most active and best ports in this country. That we can take care of all of the imports, and can deliver a great quantity of exports, especially in lumber for the next 20 or 25 years, as the Gulf and Ship Island railroad runs through and practically controls the finest long leaf timber lands in the southern part of Mississippi. That is, I mean by controls, controls the freight after the timber is cut into lumber.

Any thing that would interfere with that harbor and that channel would be a most serious detriment to the whole State of Mississippi, as the Gulf and Ship Island railroad extends northward 160 miles to the capital of the State of Mississippi and the city of Jackson, connecting with one of the greatest systems of railroad in this State. That its freight can be carried to the north or northwestern territory of this country and can be received from the northwestern

section of this country and delivered through the harbor at Gulfport. The lumber interests to-day at the mouth of Pearl river are being shipped in small vessels or lighters from the mill to the harbor at Gulfport, and they are loaded on to the foreign or export ships, and any thing that would interfere with that would interfere with the harbor interests of the harbor of Gulfport. The great oyster beds that Mississippi has been getting her oysters from lay around and through the various islands south of the main land of Mississippi, as I understand the situation. Several
1830 of us owned an oyster factory at Gulfport and got our oysters from that section which lies south of Mississippi around and close to Cat island and the various islands near by Cat island. I have never known any thing about the lines or controversy between Louisiana and Mississippi at all until I saw this map before me, which is map No. 7, filed by Louisiana, as explained to me by counsel for Mississippi. If Louisiana should have the sole jurisdiction over the islands and the water that the lines on this map No. 7, as shown to me indicates, it would unquestionably deprive the State of Mississippi from getting but very few of the oysters as the oyster beds now exist. As to what effect Louisiana's jurisdiction, or sole jurisdiction of those waters as between the two States would have I don't know, as according to my experience the United States claims jurisdiction over those waters between the State of Mississippi and Cat island.

We were compelled to make a contract with the Government of the United States before we were permitted to dredge any mud from beneath the waters at the south end of the pier at Gulfport as they claimed jurisdiction, and they compelled us to carry the mud that we dredged from the channel over towards Cat island where we were allowed to dump it, and they disregarded the jurisdiction of Mississippi, as our charter rights gave us six miles out towards Ship island and a mile wide, one half mile on each side of our track, which the United States would not respect. I know nothing about the law.

Q. You have reference to the charter granted to the Gulf and Ship Island railroad by the State of Mississippi?

A. Yes sir.

1831 Q. You mean to say that that charter granted you the right out six miles from the coast shore?

A. Yes sir.

Q. And the Federal Government required you to get permission from it to make the channel?

A. Yes sir, the Gulf and Ship Island channel manager located one of its dredge boats just beyond the end of the pier, and the officer in charge of that district; the United States officer in charge of the district notified him that he would arrest him at once if he did not stop and wait until a contract between the Gulf & Ship Island railroad and the United States was executed.

Q. Now calling your attention to map No. 7, Col. Jones and to which you have referred you will note that the blue lines nearest to

Q. Now this map of Wall's reads on its face that it was prepared, and published in accordance with the act of the State legislature in question which is found in the Acts of 1882 of the State of Mississippi, page 26, chapter 18; is an act to organize and regulate the duties of the department of emigration and agriculture pursuant to article 12, section 23 of the constitution and for other purposes, and section 5 reads as follows: "Be it further enacted etc., and it shall be the duty of the State commissioner under the direction of the State board to cause to be made a geographical, geological and topographical maps or charts of this State, showing the various counties with all of their water courses, railroads, location of timber plots, classification of soil, and the number of acres for sale in each county. Industries, towns and internal improvements etc.

Will you please look at this map which is known as Louisiana map No. 32, and state whether you recognize it to be the map prepared in accordance with that act of the Mississippi legislature?

A. Well I will tell you all that I remember about this map. Wall was made the emigration agent, the emigration commissioner, and the object of this little map as I understood it, was like the railroad maps, and like the other little maps that you get up to induce people to come to the country. Nobody regarded this as a map of accuracy or anything of that sort. For instance he puts off here a big scope of country as long leaf pine, and he puts over here another yellow loam region.

Q. You seem to have misunderstood my question. I desire
1818 that the answer shall be responsive to my question. I have not asked you anything about the accuracy of this map at all. I desire you to understand the question and answer it.

By Gen. McCLURG: Counsel for Mississippi insists that the witness answer the question in his own way, and that the counsel for Louisiana will not be permitted to cut him off.

By Mr. DYMOND:

Q. I say you are not answering the question as asked. I don't think you understand it?

A. Let me see the act of the legislature. Now what is it you want to know.

Q. I want to know if you recognize this to be the map prepared in accordance with the act of the Mississippi legislature?

A. It is a map that this man prepared. I don't think it was in accordance with this law. That is the one that he prepared intending it to be in accordance with it I suppose. That is the only one that I ever knew that he prepared.

Q. Now General you never knew of any dispute as to the boundary existing in 1866 or 1871 with any body did you?

A. No sir.

Q. So there was not any reason why the map; either of these

maps should not have been as accurate as the respective parties were able to make them was there that you know of?

A. I never heard any thing of it by them at all. Whether they are correct or not I don't know any thing about that.

Q. Now you are unable to state whether this map of Hardee's known as Louisiana map No. —, and this map of Wall's
1819 known as Louisiana map No. 32. You are unable to state whether they disagree or are in accord with the previous maps so far as the southern boundary of Mississippi is concerned?

A. I can not say about that. But in regard to this map of Wall's, the greater part of his duty was to try and get emigration, and to present the counties and the number of acres of land that were clear and various things. If you want my opinion about the map and his ability I will give it to you?

Q. No, I did not ask you about that?

A. Well I say that it is defined by this law. There are so many duties, but the great object of this law was to bring immigrants here, and to advise them as to the character of the land etc., and this map here, any one would see that it was just one of those little maps gotten up for a specific purpose, just as they get up the railroad maps.

Q. Are you familiar with the maps of Mississippi prior to 1866, especially in regard to the southern boundary of the State?

A. Well sir I could not say that I am. I am pretty familiar with all of the localities of the State and the counties of the State, and I don't know whether there is a county in Mississippi that I have not been in, but I don't remember about the previous maps. I am not familiar with them now and I could not state about that.

Q. Well you have kept in touch with the maps of Mississippi since 1871, with especial reference to the delineation of the southern boundary of the State?

A. No sir, I have not.

Q. Would you or would not you be able to say under these
1820 circumstances how these two maps that you have been talking about compare with the previous and with the subsequent maps of the State so far as the southern boundary is concerned?

A. As I stated this morning my only information in regard to the southern boundary is not from maps, nor is it from information that I had from others, but it is from the act of Congress defining it. That is my opinion on the subject.

Redirect examination.

By Gen. McCLURG:

Q. Governor, you have been examined at considerable length with reference to these maps. The one by Hardee of 1872, and Wall in 1883. If there is any thing on these maps or in connection with the legislation whatever out of which they are claimed to have grown,

within the territory that you have described, and I am told that oysters will thrive upon that small area.

Q. Do you know the extent of the area?

A. No sir, I do not. I understand it to be a fact only as

1851 told me.

Redirect examination.

By Gen. McClurg:

Q. Have you ever known Colonel as to the conditions of the waters with reference to its soft temperature. Its brackishness, in relation to the growth of oysters. Fresh water and the like of that?

A. I am informed by those who grow oysters that they prosper most where they can get a certain amount of fresh water. The fresh water mixed with salt water. Too much fresh water kills them. And in the salt water they don't thrive very well. That is my opinion.

The commission here took an adjournment to meet at nine o'clock tomorrow morning at the State capitol.

1852 Jackson, Mississippi, August 20th, 1904.

Pursuant to the adjournment of the commission on yesterday evening the commission met this morning at nine o'clock at the State capitol, in the attorney general's office to resume the taking of the testimony on the part of the State of Mississippi.

There were present Hon. William D. Bullard commissioner on the part of the State of Mississippi. Hon. Walter Guion, attorney general on the part of the State of Louisiana, and Hon. Frank C. Zacharie, and John Dymond Jr., associate counsel on the part of the State of Louisiana. Hon. William Williams, attorney general of the State of Mississippi. Hon. James N. Flowers, assistant attorney general on the part of the State of Mississippi, and Hon. Monroe McClurg, associate counsel, and P. M. Peyton, official stenographer. The following testimony was taken to-wit:—

Hon. E. H. Nall, a witness introduced on the part of the State of Mississippi, being duly sworn, testified as follows:—

By Gen. McClurg:

Q. How old are you Mr. Nall?

A. My next birthday I will be fifty-five.

Q. You reside in the city of Jackson?

A. Yes sir.

Q. What position do you hold?

A. State land commissioner.

1853 Q. How long have you held that office?

A. Since July 2nd, 1898.

Q. Did you hold any other office in the State before that?

A. Yes sir, assistant secretary of state.
Q. During what period?
A. From 1893 to 1898.
Q. As State land commissioner you have in your official keeping the records pertaining to the public lands of the State have you?
A. Yes sir.
Q. I wish you would state if you have made an effort to have some maps made of our sea coast frontage?
A. About the 20th, of July I sent a request to the Land Commissioner at Washington to send me triplicate copies to the various islands there, but they have been misplaced. Thinking that the maps might have gone to Jackson, Michigan I telegraphed there, and also to Jackson Louisiana, and the replies were that there were no maps to my address at either place.
Q. Have you made any other effort to get them?
A. I telegraphed yesterday to send duplicates of all of them.
Q. When you receive them I will ask you to file them with the commissioner?
A. Yes sir, I will do so.

Counsel for Louisiana state that this is satisfactory to them, with the understanding that when the maps come, if the counsel for Louisiana desire to cross examine the witness he will appear before the commission for that purpose in New Orleans.

1854 Q. This suit Mr. Nall involves a portion of what is termed the marsh lands east of Louisiana and to the south of the State of Mississippi. Have you any records in your office showing any survey of any of that marsh land by the State of Mississippi?
A. Yes sir.
Q. What portion of it?
A. Well there are the section, townships and ranges there on this plat book.
Q. And of these records that you refer to you exhibit these official copies?
A. Yes sir, these are the originals. They have the copies.
Q. That is Grand island and some parts near the mouth of Pearl river. Those appear on these maps?
A. Yes sir, Grand island is right here.
Q. Now I want to call your attention to that part of the marsh that extends from Malheureux point eastward to Isle à Pitre. Is there any record of that part of the marsh land in your office?
A. You will have to call the township and range before I can answer that question General. If there has been any record of it I am unable to find it.
Q. The lands that I ask you about according to the Louisiana maps are in townships 10, 11, 12 and 13, and ranges 17, 18, 19 and 20 east?
A. There is no record of it in my office that I have been able to find.

Q. What can you say if anything Mr. Nall about the ownership of this territory in the townships and ranges above mentioned belonging to the State of Mississippi, and if you know whether the government of this State was ever applied to for the patents for these islands?

A. I don't know. That rests solely with the governor. He
1855 is the one authority to ask for patents from Washington.

Q. Have you ever known as to whether any governor of this State has ever asked for the patents to the land in this territory?

A. I think that Governor Vardeman asked for everything within the 18 mile limit.

Q. Recently?

A. Well it has been several months ago.

Q. No previous governor that you know of?

A. I suppose the other governors, Lowry and Stone have asked for the lands belonging to the State under the swamp land act of 1850. That would take in every thing you know.

By Gen. GUION:

Q. That is only your supposition?

A. That is all.

Q. You don't know anything personally of your own knowledge concerning the matter?

A. No sir, I do not.

By Gen. MCCLURG:

Q. What have you to say about the ownership or possession of this territory within the township and ranges above mentioned belonging to the State. In the State's possessions?

A. Well sir the act creating the boundaries of the State it seems to me would cover that, giving us all of the lands within 18 miles of the shore

Q. Have you any information as to any trouble or controversy of any kind down there prior to the institution of this suit?

A. None whatever.

Q. I mean upon the institution of the suit immediately
1856 before it or leading up to it?

A. No sir.

Q. To the bringing of the suit?

A. No sir.

Q. Under the laws of the State of Mississippi I believe you are authorized as the State land commissioner to make sales of the public lands?

A. Yes sir.

Q. Has there ever been any application to purchase any of these lands since you have been commissioner?

A. No sir.

Q. What sort of act, of possession, ownership or jurisdiction if you

ow has Mississippi exercised in the territory about which we are eaking. I mean by Mississippi, of course, her people.
A. Well our people fished and tonged oysters down there. I be- ve that is the term they use, unmolested.

Cross-examination.

By Mr. DYMOND:

Q. Mr. Nall, do you think you understood the first question that General McClurg asked you in regard to the surveys as shown by your plat book?
A. Yes sir, or I think I would not have answered it.
Q. Did you understand that question when you answered it. I will have it read to you. "This suit Mr. Nall involves a portion of what is termed the marsh lands east of Louisiana and to the south of the State of Mississippi. Have you any records in your office showing any survey of any of that marsh land by the State of Mississippi?
A. Yes sir.
Q. Will you please point out to me any survey made by the State of Mississippi?
A. Oh, no sir. That ought to be or commissions. I am
1857 glad you called my attention to that.
Q. If I understand it this — diagram you refer to in your plat book. That is not a survey made by the State of Mississippi, but it is a survey made by the United States surveyor and is a copy of his notes and plans of survey?
A. Yes sir.
Q. Now will you please look at this plat and point out upon it what land is down as belonging to Mississippi which is in dispute in this case?
A. I can not do that.
Q. Did I understand you to say that you thought that this island which is called Grand island on this map of township 10, south, range 15 west, is by this plan of survey given to the State of Mississippi?
A. I believe this island ought to have gone to the State.
Q. I am not asking you Mr. Nall whether it ought to belong or not. I am asking you whether it does belong?
A. Oh I don't know.
Q. Can you tell in what township and in what sections of that township that island is situated. From the records of the State of Mississippi. Is it not a fact that the only data given in regard to that island is that it says a certain acreage, and it is distance a certain distance from Point Clear and from St. Joseph island?
A. Yes sir, it is so many chains to that point.
Q. That is all it says?
A. That is all it says.
Q. Now will you please look at this diagram, which is marked

Louisiana Document No. 38, and which has already been offered in evidence by Louisiana, and look at the island here marked Half Moon island, and state whether it corresponds in its general formation and location to the island called Grand island on your record?

A. Well it looks the same to me.

Q. Well now will you please state according to Document
1858 No. 38 what four townships go to make up that island?

A. Well according to this it is township 10-17 east; 11-17 east, 10-18 east, and 11-18 east.

Q. Now have you on your records of the State of Mississippi, Mr. Nall, any thing that would give the data that is given by this Louisiana Document No. 38, in regard to thay particular territory?

A. You mean the township and range?

Q. Yes sir.

A. We have not.

Q. Now have you any record on your books to show the selection by the State of Mississippi of this island called Grand island and its approval by the United States office?

A. I never have been able to find it.

Q. Mr. Nall, will you please look at this township plat of township 10, range 15 west, land district east of the island of New Orleans, and east of Pearl river which for the purposes of identification will be known and marked as Louisiana Document—Louisiana 1, and state whether it is the same territory as covered by the plat on your State records of Mississippi concerning which you have testified on direct examination?

A. This is a duplicate of that it seems to me except the fractional township 10 range 15 in the lower left hand corner.

Q. You will notice that the original survey was made in 1824? And approved in 1827?

A. Yes sir.

Q. You will notice that there was a re-approval dated Jackson September 12th, 1846, signed C. A. Bradford, surveyor south of Tenn. What is the Jackson referred to here? What town is that?

A. I have no idea. I don't know whether it is Mississippi o Tennessee. I have referred to my records page 84.

Q. Do you notice that when this particular township wa
1859 approved in 1846 that no reference is made to Grand islan which appeared on the original survey?

A. There is no mention of it here.

Q. I refer now to the approval made in 1846. Was there an reference to the island?

A. The record in my office is dated 1843, and the document th I am looking at, filed by Louisiana is dated 1846.

Q. You have on your records no copy of the 1846 approval?

A. Nothing here. It is not on the records here. All of my re ords bear date 1843 and prior thereto.

Q. Mr. Nall, will you please look at this map called No. which purports to be a photographic copy of the official map of

rnard, and shows the territory south of Half Moon island and
st of a line starting the ranges 17 and 18 east, and state whether
not according to your records Mississippi has ever applied for
y of the lands there shown?
A. Well I don't know whether the governors have or not. I
now that Governor Vardeman has.
Q. When did Governor Vardeman become governor?
A. January 19th, 1904.
Q. Was that since the institution of this suit?
A. I suppose so.
Q. Now so far as your records go as I understand it you find no
record of any selection by the State or approval by the United States
of these lands under the swamp land grant?
A. None whatever.
Q. Now will you please look at this document which is marked
Exhibit G, to the bill of complaint of the State of Louisiana, and
state whether from your familiarity you recognize it as what
1860 is called an extract from the tract book of the United
States?
A. I could only tell from the official signature and the seal.
Q. Have you ever seen that tract book in any of the offices of the
United States land offices?
A. In Washington?
Q. No, in any of the land offices of the United States?
A. No sir, I have never been in a United States land office in my
life. I never have been in this one here. I have no business there.
Q. Have you a tract book in your State office?
A. Yes sir, of the land selected under the act of 1850.
Q. Do the two pages of this book look anything like the two pages
of this Exhibit G, open before you?
A. It has about the same heading. It is in a book though. They
all have simply the township, section and range.
Q. Do you recognize this to be any part of the area in dispute in
this case, for instance take the fourth item of section 13, in township
11 south, range 19 east. Do you recognize township 11, range 19
east to be the disputed area?
A. If this is the disputed area there. 11–19.
Q. And this reads "Selected by State under act March 2nd, 1849,
approved by Secretary of Interior May 6th, 1852.
A. It reads that way.

By Gen. GUION:

Q. Mr. Nall, do you know when Governor Vardeman wrote this
letter that you have just spoken of?
A. I do not.
Q. Do you know to whom he wrote it?
A. To the Secretary of the Interior at Washington.
1861 Q. Hitchcock?
A. Yes sir.

Q. Do you know whether he has received any reply to his communication?
A. No sir, I do not.

By Mr. DYMOND:

Q. Could a copy of Governor Vardeman's letter be gotten?
A. I suppose so by asking for it.

By Gen. GUION:

Q. Now Mr. Nall will you please look at this map which is now before you in this room, which is the map of the State of Mississippi made by T. S. Hardee, State engineer in 1871, and marked with the approval of Governor Alcorn as follows "Executive office, Jackson, Miss. July 4th, 1871, approved under the act of the legislature, approved May 10th, 1871. Signed J. L. Alcorn, governor of Mississippi," and being the same map concerning which Governor Lowry testified in his examination yesterday and state whether or not this map is a part of the archives of your office as commissioner of the land office of the *land* of Mississippi?
A. No sir. I think the governor gave me that map. Governor Longino, and I carried it in there and wrapped it up. I did not use that map or any other map in land matters. When I want a section township and range I go to the plots.
Q. What plats?
A. The original plats.
Q. Governor Longino, as I understand you gave you this map and you have had it ever since in your office?
A. Yes sir you see that is wrapped up. You see those white places on it.
Q. Do you know for what purpose Governer Longino gave it to you?
A. It was hanging up there and one day I asked him for it?
Q. Where was it hanging?
1862 A. In his office. In the governor's office.
Q. Do you know how long it had been there Mr. Nall?
A. I do not.
Q. Did you ask him for it or did he give it to you?
A. I asked him for the map.
Q. What was your object in wanting it from the governor?
A. Some time probably to refer to the township and range, and sections principally. This is a sectional map, and we have maps with no sections in them.
Q. You wanted it then for some uses in your office?
A. Yes sir.
Q. You considered this map did you not as a part of the archive of your office after it was given to you by Governor Longino?
A. No sir, I did not attach much importance to it except to look at the sections now and then.
Q. You did not regard it as your private property did you?

A. Oh no sir.
Q. You regarded it as the property of the State?
A. Yes sir. I would not give three cents for it. You see that map gives the sections and these little maps don't give the sections. That is the difference.
Q. Mr. Nall do you remember the date of your letter to the Land Office in Washington in which you asked for these copies that you spoke of, and that have not reached here?
A. I think it was early in July.
Q. Was it not on the 30th, of June that you wrote?
A. I don't remember.
Q. Did you receive any answer to that letter of yours?
A. Yes sir, that it would be forwarded in a few days.
Q. Have you got that letter from the Interior Department in your possession, if you received any reply to this?
A. I don't know. I gave it to Mr. Smiley, my assistant down there. He is gone and I don't know what he did with it.
1863 Q. Have you a letter from the Department of the Interior signed by J. H. Fimple, acting Commissioner, dated July 9th, 1904?
A. I don't remember.
Q. Addressed to E. H. Nall, land commissioner, Jackson, Mississippi?
A. I don't know sir. I gave all of the letters that I had to be turned over to Gen. McClurg and Mr. Williams and Flowers — to Mr. Smiley.

By Col. ZACHARIE:

Q. Mr. Nall you have been examined with reference to a letter of yours of June 30th, to the Department of the Interior General Land Office, or rather to the Commissioner. Have you a copy of your letter of June 30th?
A. No sir.
Q. What has become of that copy?
A. We never keep copies.
Q. You never keep copies?
A. No sir.
Q. You have no letter press book in which you keep copies?
A. No sir.
Q. Can you remember and state the contents of that letter to the Department of the Interior and the General Land Office?
A. No sir, we wrote so often and for so many different things that I can not recollect.
Q. Do you remember that you received a reply to your letter, the reply being dated in Washington, July 9th, 1904?
A. Well that certified copy that you showed me dated the 9th, is a copy of the original letter that I received.
Q. Have you examined this certified copy?
A. Yes sir, I read it.

from the Government agent who had jurisdiction in the waters along that coast.

Q. That being so and the United States haveing jurisdiction over such waters for the purposes of navigation, how could the State of Louisiana if she succeeded in her claim control the use of the waters within her jurisdiction so as to interfere with the commerce of Gulfport?

A. I have answered that question that I don't think it interfered.

Q. It would not interfere?

A. It would not interfere for I don't believe that Louisiana could control the water there.

Q. Then if Louisiana could control the navigation of the waters within boundaries claimed by her, how could that control interfere with the dredging of your channel from Gulfport to Ship island, or any other Mississippi port?

A. It could not interfere in any way unless they, Louisiana could prohibit the Government from allowing the mud taken from her channel dumped there along Cat island where we dump what has already been taken out. I don't think they could have any thing to say about that.

Q. Certainly Louisiana could not interfere with the entrance or exit of any veaaels to and from the port of Gulfport?

A. I don't think so according to my understanding.

Q. Louisiana is claiming as the boundary line the deep water channel running from the east mouth of Pearl river out between Cat island and Isle à Pitre. She is not claiming the exclusive use of that channel. Now under those conditions how could the

1842 establishment of this line interfere in any way whatever with the commerce of the port of Gulfport, or any other portion of the Mississippi shore lying between the mouth of East Pearl river and Gulfport?

A. I don't see any way for them to interfere unless they can control the exports from Pearl river, and I don't think they could.

Q. Louisiana is not claiming the exclusive use of the deep water channel. She only says that her boundary goes to the middle of the channel; consequently could she in any way interfere with any commerce coming out of the mouth of East Pearl river and coming to Gulfport or any of these ports. You know the Constitution of the United States would prohibit Louisiana or any other State from putting any tonnage tax, or export or import tax don't you?

A. That is my understanding of the law yes sir.

Q. Consequently if the boundary line was established at the middle of the deep water channel running from the mouth of East Pearl river down between Cat island and Isle à Pitre, there could be no interference whatever with the commerce of Gulfport, or any of the places lying between Gulfport and the mouth of Pearl river could there?

A. Not as I understand the law. Louisiana would have no control of the water.

Q. Then to narrow it down you are then of the opinion that the only effect upon the commerce of Gulfport, and of these ports or lands lying between Gulfport and the mouth of East Pearl river would be to prevent Mississippi fishermen from fishing oysters within those boundaries?

A. That is my present opinion and understanding, unless she sees fit to make laws to prevent Mississippi fishermen from catching fish in those waters as well as oysters, and crabs.

1843 Q. Don't you know as a matter of law that she would have no right to prohibit the catching of swimming fish?

A. No sir, I don't understand it that way, but I know who ever catches them can own them if they can get away with them.

Q. Louisiana would have no authority to establish quarantine stations that would affect your ports would she?

A. I think not sir.

Q. Then in so far as the commerce of Gulfport and of these lands and ports lying between Gulfport and the mouth of East Pearl river, you are of the opinion that the commerce of none of these ports would be affected except in the matter of getting oysters?

A. In the matter of getting oysters and shipping them from Gulfport harbor.

Q. You have stated that most of the rosin and naval stores from Louisiana and Alabama were shipped through Gulfport. I suppose you intended to mean those portions of these two States lying near your railroad. You did not mean to say that all of the rosin and naval stores and so on of Louisiana and Alabama were shipped through the port of Gulfport did you?

A. No sir, I meant to state that nearly all of the rosin and turpentine from southern part of Mississippi, and the eastern part of Louisiana, along Pearl river, and the western part of Alabama adjoining the Pascagoula river comes to Gulfport. That was my intention.

Q. Well is not that stating it a little too broadly; that all of the stuff from southern Mississippi. Is there not a portion of it shipped through Biloxi, through Bay St. Louis and Pascagoula and other points?

A. All of it comes to Gulfport in small boats now, and they are prepared for export and interior shipments from Gulfport.

Q. Is not there a considerable portion of this stuff shipped to New Orleans by vessels from Biloxi and Pascagoula and Pass

1844 Christian and Bay St. Louis and other ports for the New Orleans market?

A. No sir, not now. It was a year ago. There are two stores that control that product, and they have combined into one and made Gulfport their principal shipping point.

Q. Don't the rosin factories and the other naval store factories in New Orleans get a good deal of this stuff from along this coast?

A. Not now, They get very little.

Q. You have spoken of this territory between Gulfport on the

Mississippi shore extending to the mouth of East Pearl river as being thickly populated and being divided mostly up into lots. Are there any ports there of export or import?

A. None of any importance.

Q. Then the establishment of the lines by Louisiana at the middle of the deep water channel running from the mouth of East Pearl river down between Cat island and Isle à Pitre could not possibly interfere with any of the commerce at any of the places I have just spoken of except the taking of oysters from the boundary within the deep water channel. That would be all would it not?

A. As I understand the law now that would be all.

Q. Then in substance your testimony would amount to this. That if Louisiana was successful in establishing her boundary as claimed by her it would have no effect from a commercial point of view upon any of the Mississippi ports except in preventing oyster fishermen from taking oysters within that boundary?

A. As the Louisiana law is now according to my understanding that would be the principal loss.

Q. Would there be any other loss and if so what would that be?

A. If she could pass a law prohibiting catching oysters I don't know why she could not pass a law to prohibit catching most anything else.

1845 Q. She could not pass any law controlling the navigation of these waters could she?

A. No sir, I do not so understand it.

Q. Therefore it would not interfere with the commerce or navigation to any of these points would it?

A. I don't think so. I think I have answered that.

Redirect examination.

By Gen. McClurg:

Q. You have been questioned by counsel for Louisiana with reference to the effect tl at the establishment of a line claimed by that State would have upon the commerce at Gulfport harbor, and especially with reference to your opinions with reference to the power of that State to interfere with national commerce. If the jurisdiction of Louisiana should be extended to the middle of the deep water sailing line mentioned, or to either of the blue lines marked, first from the marsh land and second, from Grand pass, and third, from the north east end of Isle à Pitre, and the laws now in effect in the State should be thus extended that oysters taken within the jurisdiction of Louisiana should not be marketed out of the State of Louisiana and if that law should be extended to fish and shrimp and terrapins and lobsters and crabs, and by force of that statute be driven into New Orleans, would not it affect the commerce of Gulfport, and the commerce of the State of Mississippi along that line?

A. It certainly would.

Q. And to a material extent would not it?
A. Yes sir. Now shall I explain?
Q. Yes sir.
A. It would prevent the canning factories being established in Mississippi, and whatever freight or commerce they would
1846 produce, the labor that would be necessary to run them, and the provisions and commerce that are required to support these laborers. To that extent it would injure Mississippi.

By Col. ZACHARIE:

Q. You mean in these particular lines as mentioned. Fish and crabs and so on?
A. Yes, sir.
Q. Would *in* affect it in any other commerce?
A. No, sir.

Mr. MCCLURG:

Q. Col. Jones, you have been invited largely in this examination to deliver matters of opinion, and following that up with the latitude that we have gone into it on both sides can you imagine many great advantages that would flow to the State of Louisana to the disadvantage of the State of Mississippi, if Louisiana's jurisdiction should be extended over those waters according to her daim of the boundary at the deep water sailing line, or at one of these three lines to which I have called your attention?
A. I cannot think now of anything else than I have stated of any serious injury if the Government of the United States keeps control of the navigable water, as they have for years.
Q. Has not the State of Louisiana and the State of Mssissippi or any other State certain powers concurrent with the Federal Government, and subordinate to the general navigation jurisdition of the Federal Government that it could exercise in favor of one State and to the detriment of the other, such as levying taxes upon fishing boats, and the protection of the fish and oysters and other
1847 products of the waters as now provided under the laws of Louisiana?

By Mr. GUION: The counsel for Louisiana objects to this question being propounded and to the same being answered on the ground that the interrogatory calls for the expression of an opinion upon the legal propositions, and is purely a question of law, and also that it is hypothetical.

A. I don't know the laws of Louisiana. Mississippi taxes my dredge boats, and other boats that were in the waters thatthe United States claimed the control of. If Louisiana should do the same I can see the interference of one State with the income and advantages of the other. I can also see that if Louisiana should keep her boundary as laid out here, and keep possession of these isands whatever might be grown or raised on these islands would of course be

a benefit to Mississippi. If there is a drove of cattle on some of these islands, and I think there is on Cat island, I know there is a lot of cattle on that island, but the line here does not include Cat island as I understand it. Should the mud and accumulation of land increase in these islands and become solid land, of course whatever might be grown or raised on these islands would be a detriment to Mississippi, and to the benefit of Louisiana.

Q. What with reference to the products of the water?

A. I think that I have stated all practically that I know about that.

By Mr. FLOWERS:

Q. Col. Jones, there are several oyster packing industries along the coast are there not?

A. Yes sir.

1848 Q. How does this industry along the coast compare with the other industries of the people along the coast. As to size and importance?

A. It is very considerable at Biloxi, and quite heavy at Pass Christian, and Bay St. Louis. The factory at Gulfport burned down and the owners thought it inadvisable to rebuild it until this question is decided.

Q. Col. Jones please state how the oyster packing industry along the coast, compares in size with the other industries along the coast. As to its size and importance?

A. My understanding was that it was the most important *inportant* industry until the Gulf and Ship Island railroad and the harbor at Gulfport was established.

Q. Is it not a fact that even now it is the most important industry along the coast besides the business of the Gulf & Ship Island. Please state whether it is true that it is the most important except that of the Gulf & Ship Island Railroad Company?

A. My understanding is that it is and has been for some years the most important industry at Biloxi, and a very important one at Pass Christian and Bay St. Louis.

Q. From what waters have those oyster packing establishments been supported all of these years?

A. I am told that they came from the same waters and localities that the oysters that were used at Gulfport came from, and of which I own one half. Therefore my information is quite reliable and correct, and that way down among the islands that the deep water line here would deprive Mississippi of getting the oysters.

Q. Please state whether it is a fact that all of these oyster industries along the coast have been principally supported by fishing the waters claimed here by Louisiana?

1849 A. I can not state as to the fishermen, but as to the oysters my information is quite positive on that.

Q. Please state whether the fishing industry is quite important along the coast.

—. ——.

Q. Please state where these concerns ship their oysters principally.
A. My information is mostly to the interior and our own country. Many of them going over the Gulf & Ship Island railroad.
Q. Do you know as a matter of fact whether there are any of them shipped to foreign countries?
A. I cannot say that I know that to be a fact being shipped from Mississippi. I have never seen any ships carrying them. I will not say that they do not.

Recross-examination.

By Gen. GUION:

Q. Col. Jones, are you able to state what the area is between the eastern mouth of Pearl river as far as the—following the deep water sailing line you see on the map there marked No. 7, as far as the point where that channel enters between Cat island and Isle à Pitre, and north of that between the Mississippi main land and that deep water sailing channel. Can you give us an approximate estimate of the water area north of the sailing line?
A. I cannot sir except by measuring it here on the map.
Q. You could not give us an approximate?
A. No sir.
Q. Could you measure it and give us an idea?
A. With a map with so small a scale I doubt if I could sir.
Q. Do you know the distance from the Mississippi main
1850 land to Cat island?
A. Seven miles as near as we can estimate it. Eight miles from the main land and seven miles from the end of the pier.
Q. In a direct line north and south I mean can you give me the distance from the main land of Mississippi to Cat island. Do you know the distance. I don't mean from Gulfport. Is Gulfport out north of Cat island?
A. It is very nearly sir.
Q. Nearly due north?
A. Yes sir, in fact it is exactly due north.
Q. Well now what is there to prohibit the planting of oysters in all of that water territory there from that point; from the point that would be found by carrying the line due north and south between Gulfport and Cat island, and west between the deep water sailing line and the eastern mouth of Pearl river?
A. I know little about the raising of oysters except what I have been told in the last several years, but I am informed that the mud, soft mud, is so thick, or rather the depth of the soft mud at the bottom of the water as is such as to smother the oysters and they can not thrive. That is my information sir. I don't know it by experience.
Q. Well Colonel Jones, do you know as a fact that no oysters have ever been fished in the territory that I have just described to you?
A. There are spots and localities where there is a sand bottom

Q. It would appear from that that you had made application for certain certified copies of certain maps. Do you remember that you made such an application?

1864 A. Yes sir.

Q. This letter was a reply to that application?

A. Yes sir.

Q. Do you remember if with that reply to your letter, that is the letter from the land office of July 9th, there were certain enclosures made in regard to the maps and the data for which you inquired?

A. What do you mean by enclosures?

Q. In this letter from Fimple, acting commissioner who signs it says by reference to the enclosed portion of the map of the State of Louisiana, it will be seen by a line drawn parallel to the north shore line of Lake Borgne and Mississippi sound at the distance of six leagues therefrom, would include portions of townships 11, 12, 13 south, ranges 17, 18 and 19 east; and townships 10, 11, 12 and 13 south, range 20 east, St. Helena meridian, in St. Bernard parish Louisiana. In which will be found many tracts of land surrounded by water and which would therefore be denominated as islands, but which are in fact hummocks of land, surrounded by the marsh and swamp in said townships. Now Mr. Nall, you will notice that the acting commissioner in this letter refers to *to* an enclosed portion of the map of the State of Louisiana. Do you remember whether you received the portion of the map of the State of Louisiana with the letter that you received?

A. Yes sir.

Q. Now will you please examine these two tracings and see whether they were the portions of the map of the State of Louisiana which were enclosed to you?

A. I don't know, I will have to refer back to that map. Mr. McClurg has got it there somewhere.

Q. Will you get it please sir and look at it. Then I understand you to say Mr. Nall that these tracings of maps which I have shown you were copies of the same that were enclosed in the letter addressed to you on the 9th of July from the land office?

1865 A. I could not tell you from this. I would have to see the map that he enclosed to me first.

Q. Now will you examine this memoranda which was forwarded o me at the same time, in response to my inquiry for the correpondence between Mr. Nall and the Commissioner of the Land Office, nd was sent to me under cover, that being a part of the correpondence?

A. This seems to be a copy of the letter that I received. This eems to be the same.

By Col. ZACHARIE: The counsel for Louisiana offers in evidence n this cross examination a certified copy of the letter of J. H. imple, acting Commissioner of the General Land Office of the Dertment of the Interior, dated Washington D. C. July 9th, 1904,

nd addressed to E. H. Wall, State land commissioner Jackson Mis-
sissippi, to be marked by the commissioner Exhibit Louisiana 2.,
and also a memoranda headed Matter of Islands Louisiana and
Mississippi in pencil, Louisiana two pages and Mississippi three
pages, all in pencil, to be marked Exhibit Louisiana 3., being mem-
oranda which have been testified to by Mr. Nall, the witness, as
having been enclosed in the letter aforesaid on July 9th, 1904., from
the General Land Office, marked Louisiana 2.

Q. Then I understand Mr. Nall that the two documents purport-
ing to be tracings of this territory which I have shown you, and
have asked you if copies identical with the same were not enclosed
in the letter to the land office of July 9th, 1904, and you could not
testify without reference to the original?
A. No.
Q. Do you know where that original is?
A. No sir, I do not.
Q. Do you not keep such documents on file in your office?
1866 A. What pertains specially to my office I generally keep
those things. My impression is that I turned every thing
over to Mr. McClurg, or some body in this attorney general's office.
Mr. Smiley might possibly have them in his desk.
Q. Who is Mr. Smiley?
A. He is the man that stays in my office.
Q. You might possibly have turned them over to Mr. Smiley. Is
e a clerk in your office?
A. He is not.
Q. He is not employed by the State?
A. No sir, but he works in the office and then gets out side work.
Q. Where is Mr. Smiley now?
A. He is in Crystal Springs.
Q. When will he return if you know?
A. I don't know.
Q. What are his initials?
A. John M. Smiley.
Q. Does he reside in the city of Jackson?
. Yes sir.
. Could he be reached by a subpœnae?
. Yes sir.
. A *subpœnae duces tecum* if we desire to issue one?
Yes sir.
You in response to this letter from the Land Office of the 9th,
ly. Did you order any of the maps or plots which are therein
ioned?
Yes sir, three copies of each.
When?
I don't remember the date. I think it was about the 28th.
28th July?
Yes sir.

Q. You have not received them yet?

A. No sir, they have been misplaced. We have telegraphed for them.

1867 Q. Do you know or could you remember the number of maps certified copies of which you requested?

A. Here is the letter requesting it as follows:

Triplicate tracings of plot showing Deer, Ship, Cat, Round island, St. Joseph, Grand island, Half Moon, Petit pass, and an unnamed island presumably Isle à Pitre.

Q. Will you count there and state how many of the maps?

A. Nine.

Q. Those maps thus called for did not—the copies of plats did not embrace all of the maps or plots which the acting Commissioner described in his letter of July 9th, 1904?

A. No, they included Cat, Round, St. Joseph, Grand, Half Moon, Petit pass, and an unnamed island mentioned in the Commissioner's letter, and also Marianne and Malheureux islands.

By Mr. DYMOND:

Q. Mr. Nall, do you know whether or not the secretary of state of Mississippi has in his archives, or in his office, copies of this map of Mississippi of T. S. Hardee, approved by J. L. Alcorn, governor, May 10th, 1871?

A. I don't know sir.

Q. You don't know then whether there were furnished on application copies of this map from his office?

A. I do not.

Q. Mr. Nall, the Congressional Library at Washington has a copy of the Hardee map of 1868 of Mississippi, made under the administration of Governor Humphries. Could you tell whether or not a copy of that map is in any of the departments of the State government of Mississippi here?

A. I could not.

1868 By Gen. MCCLURG: The counsel for Mississippi excepts to the statement as to the map being in the Congressional Library at Washington made under the administration of Governor Humphries in 1868.

By Mr. DYMOND: The attention of the counsel for Mississippi is called to the report of Mr. Hodgkins already introduced in evidence which substantiates the statement just made by counsel for Louisiana.

By Gen. MCCLURG: And the counsel for Mississippi as it has heretofore done excepts and objects to Mr. Hodgkins' letter referred to by counsel for Louisiana to F. A. McLean, to whom Mr. H. Heidenheim had applied as his local Congressman to be furnished with certain records, and instead of furnishing the records called for by Mr. Heidenheim through Congressman McLean, Mr. Hodgkins turned lawyer, and gives us what the counsel for Mississippi con-

siders an uninvited opinion from a subordinate of the United States Coast and Geodetic Survey.

Redirect examination.

By Gen. McCLURG:

Q. Mr. Nall, counsel for Louisiana have asked you many questions about the Hardee map which it seems was either directly or indirectly the result of a message to the Mississippi legislature by Governor Humphries an act of the legislature passed pursuant to his recommendation, and several years later by a legislature composed largely of ignorant negroes and an irresponsible set of people commonly called carpet baggers. It will be noted that this map made by Hardee not only undertakes to be a map of the State of Mis-
1869 sissippi, but also of a large portion of the State of Louisiana. Our contention being that the map is wholly unreliable as to Mississippi and wholly without authority as to that part of it covering a portion of the State of Louisiana.

I want you tell the commission what you may know of the political conditions of Mississippi from the time that Governor Humphries recommended the publication of an official map of the State in 1866, *and the* until the appearance of this map after the action of the legislature respecting the same in 1871. Tell us what you may know of the political conditions existing in this section of the country at that time?

A. Well General I will have to answer that in my own way from my recollection. I recollect from the time the radicals were in power.

Q. You are a native Mississippian are you not?

A. Yes sir, I think from 1866 to 1875 we were struggling under the most corrupt government of any people that ever lived. I cannot place the date exactly, but I mean from the time the radicals came into power under the military rule up to 1875.

Q. You have been asked many questions respecting this map as being an official document in the archives of the land commissioner of the State of Mississippi, and of the secretary of state of the State of *the* Mississippi. I want you to tell this commission in order that the court may get a correct estimate of the value of this map how it has been valued by you as land commissioner, and so far as your personal knowledge or general information may extend, as to its value as an authentic record of the State of Mississippi?

1870 By Gen. GUION: Objected to by the State of Louisiana through her counsel on the ground that the answer of the witness to the question which is propounded would be an expression of opinion on a question of law, as to the weight to be given and attached to the map referred to as an official map.

A. It does not serve me any more than any other ordinary map of the State of Mississippi in my business.

Q. If you are able to state whether in the making of this m
there was any purpose within the perview of the act supposed
have authorized it, or upon the face of the map itself indicating th
location of the boundary in the waters of the Gulf between Missi
sippi and Louisiana tell us what you have to say on that subject.

By Gen. GUION: Counsel for Louisiana objects to this questio
and the answer of the witness thereto on the ground that the act
the legislature calling and providing for the making of a map is th
only evidence that should be considered on the subject of the objec
and purposes for which the map was made.

A. I can only say what I believe about it General.

Q. Well say that.

A. I don't believe any man has ever made a map for Mississippi
or Louisiana that knew any more about the dividing line that is
now in contention than we do about the burial place of Moses.

Q. Counsel for the State of Louisiana Mr. Nall have catechised
you particularly with reference to your correspondence with the De-
partment of the Interior with reference to furnishing certain maps
to the territory in dispute in this case, and more especially with
reference to your letter to the Commissioner of the Land
1871 Office at Washington D. C. written prior to the 9th of July
1904, about say the 30th of June. I want to ask you whether
or not this correspondence was the result of a request made by the
counsel for the State of Mississippi to secure certain maps of the Gulf
coast embraced in this controversy?

A. Yes sir.

Q. I hand you a letter, the original letter written to you by Mr.
McClurg, one of the counsel for the State of Mississippi on July 16th,
1904, and in order that it may be incorporated into the record in
this case I will ask you to read it?

A.—

"GREENWOOD, MISS., July 16th, 1904.

Hon. E. H. Nall, Jackson, Miss.

DEAR MR. NALL: I herewith return a letter from the Department
of the Interior of the 9th, inst., with reference to the cost of photo-
graphic copies and tracings of the islands on our southern coast. I
wish you would get certified copies, three each, of the following isl-
ands. Cat, Round, St. Joseph and Grand island, and what the Com-
missioner calls an unknown island. I don't think I can be mistaken
in my recollection of the original survey and plats of 1827. I think,
which we looked at in your office, showing that at least Half Moon
island was designated as belonging to the State of Mississippi, and I
believe Grassy island. In fact it was a tracing of this original sur-
vey and plat or Lake Borgne south of Hancock county which we
looked at in your office that we wanted. If you can get the depart-
ment to make an exact copy, not photography, but a true copy of the

same size and dimensions with the scales if possible of that
1872 original plot, it will be infinitely better.

We would want nevertheless in addition to the copy I have just spoken of properly certified, *or* three photographic copies, or of that and other outlines above mentioned. I also return that portion of the map of Louisiana enclosed to you by the Commissioner. I remember seeing the original of which this map was made, and with the coloring of the marsh territory designated as St. Bernard was done at the instance of Louisiana since the institution of their suit against Mississippi, and for the purpose of so coloring this marsh territory as to indicate that it belonged to the State of Louisiana, and then to have three maps made.

Let us have as quickly as possible the copy and photographic tracings of Cat, Round, St. Joseph, Grand, Half Moon, Petit pass, and the unnamed island mentioned in the Commissioner's letter and also of the Marianne and Malheureux islands. Please be careful to instruct the Commissioner not to have any copies made from any Louisiana survey or any other survey made showing any of these islands to be within the State if he can get them elsewhere. The truth is at the time of the admission of the two States into the Union there was no St. Bernard parish, and not until perhaps thirty years or more afterwards. The territory that is in dispute, and much that is not in dispute not being regarded as belonging to Louisiana. These latter day maps made by Louisiana not only create confusion but do us an injustice. Now *them* in addition to the copies above called for and in answer to — the Commissioner's letters explain we would like to have three copies of the plots showing on one paper as large as convenient 2 x 3 feet, all lands and islands
south of the shore of Lake Borgne and Mississippi sound in-
1873 cluding island- and bayous and lakes that are within the six leagues of the Mississippi shore, but not made from the Louisiana map. We want an impartial copy from a just survey. I will thank you to ask the Commissioner to give you the oldest data in his office respecting Isle à Pied, now called Isle à Pitre, especially whether there was ever on that island any military reservation. It is necessary for us to have the copies above called for by the eighth of August, when we begin our final taking of testimony in chief.

Very respectfully,

MONROE McCLURG."

Q. Following up the interrogation on the part of the State of Louisiana I wish you would state whether or not you complied with the wishes of Mr. McClurg as stated in his letter just read to you by calling on the Department of the Interior for the maps designated by him. Have you any copy of the letter that you wrote to the department?

A. No sir.

Q. I have here Mr. Nall a letter dated July 28th, 1904 which purports to have been a reply to a letter which you must have

written to the General Land Office at Washington, as request
Mr. McClurg, and in order that it may be incorporated in the
I will ask you to read it?

A.—

"DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
WASHINGTON, D. C., July 28th, 19

Hon. E. H. Nall, State land commissioner, Jackson, Mississipp

SIR: Complying with your request contained in your letter
18th, inst., and returning herewith letter from Atto
1874 Monroe McClurg, together with section of State map. I
to state that the following certified copies have been sent
under separate cover. Triplicate tracings of plats showing
Ship, Cat, and Round island- 1847, $2.25 each—$6.75. Tripl
photo lithograph of St. Joseph and Grand island- 1828, 50
each—$1.50. Triplicate photo lithograph of Marsh, Half M
Petit pass, and an unnamed island 1846—50 cents each—$1.50.

Triplicate photo lithograph of T. S. 10, 11 S. R., 20 E. 1847, s
ing as it is presumable Isle à Pitre though not named. Six co
at 50 cents each —$3.00, total due for certified copies without
$12.75. Mr. McClurg speaks of a plot of 1827 "showing Half M
island as belonging to Mississippi" a plot approved August 1
1828 according to the survey of 1827, which shows Grand islan
presumably the same. There is no data on file in this office sh
ing Marianne and Malheureux islands except an official ma
John Melish about 1819, showing Malheureux islands laying sou
east of the island called Peas "which" is in all probability the sa
island that later on was designated as Grand according to the M
sissippi survey, or "Half Moon by the Louisiana survey."

There is no record in this office that there ever was any part
Isle à Pied or Isle à Pitre reserved for a military reservation.
McClurg asks for the oldest data referable to this island. The o
data on file in this office of the township plats of which ph
lithographic copies have been forwarded, as above where this offi
has sent copies of Louisiana plats, it was the only information on
relative to the islands in question. This office is not auth
1875 ized to construct special documents for township plats a
maps and naturally does not enter into any question betwe
States as to their relative ownership of particular tracts.

Very respectfully,
J. H. FIMPLE,
Acting Commissioner."

Q. As I understand from your examination in chief you have n
yet received the maps which the Commissioner states in his lett
that he forwarded to you on the 28th, of July last?

A. No sir.

Q. And have you requested him by telegraph to send you anothe
copy of these maps?

A. Yes sir.

Q. Identical as called for in your previous letter?
A. Yes sir.
Q. And this it has been agreed may be filed in this suit?
A. Yes sir.

Q. I notice Mr. Nall that in your correspondence with the department at Washington, and to which counsel for Louisiana have called the attention of the commission volunteer, as did Mr. Hodgkins in his letter to Mr. McLean to make certain statements with reference to the boundary between Mississippi and Louisiana, and as to where certain islands or waters are, according to their gracious understanding of the matter. We want you to state as an officer of the State and in charge of its land records, whether any of these voluntary expressions made by the heads of the department at Washington or any of their subordinates have been recognized as binding upon either of these States, especially the State of Mississippi?

A. No sir, not as to the State of Mississippi. I know nothing about the State of Louisiana.

1876 Q. If you have in your keeping any other correspondence with the Interior Department relative to this matter we would be glad to have you read it to the commission in order that we may incorporate it in the record?

A. I have no other.

By Mr. FLOWERS:

Q. Mr. Nall how long have you been in public office in this State?

A. Land commissioner—I have been in office since 1892.
Q. What positions have you held?
A. Assistant secretary of state. This morning I said I was assistant secretary of state from 1893 up, but before that I was appointed by Governor Stone to adjust the direct tax commission, to refund the money. I did not put that in because I just commenced as assistant secretary of state.
Q. At that time did the secretary of state's office have any thing to do with the land records?
A. Yes sir, it had charge of the Chickasaw school lands.
Q. Any others?
A. No sir.

Q. When did you first hear that Louisiana claimed any part of the land of our territory with 18 miles of Mississippi's shore line, main land?

A. Since this controversy. I don't know when it commenced.

Q. When did you first learn that the islands in dispute south of what is claimed by Louisiana as the deep water channel through Mississippi sound had been approved to the State of Louisiana by the United States Land Office?

A. Since this morning. I believe you showed me the documents. Mr. Dymond did.

Q. Before that had the land commissioner's office so far as you

know ever heard of that application by the State of Louisiana to
United States Land Office for these lands under the sw
1877 land acts of about 1850?

A. I can not answer only for myself. I never heard
Q. When did you first hear that these lands had been appro
to the State of Louisiana by the United States Land Office?
A. From the document shown to me by Mr. Dymond this m
ing.

Q. Your office so far as you are concerned did not know t
Louisiana laid any particular claim to this particular land?
A. No sir, I did not know it.

Recross-examination.

By Col. ZACHARIE:

Q. Mr. Nall, did I understand you correctly in your examinati
in chief to testify that you did not consider the Hardee map issu
or published in 1867 or 1868 as being any more authoritative
carrying any more weight than any other map published by a
other person?

A. As far as my office is concerned and the busi*b*ess connecte
with it I do not consider it any more than any other map that wa
ever published.

Q. Now let me read to you from the official records of the Stat
of Mississippi the history of the production and publication of tha
map. I read now from the governor's message of Governor B. Hum-
phries of October 16th, 1866 to the senate and house of representatives
of the State of Mississippi, page 17, in the volume entitled Senate
Journal of Mississippi 1866 and 1867, the official edition. "I deem
the publication and distribution of a State map to the various State
and county officers, whose business requires the possession of one a
matter of sufficient importance to call your attention to it. It should
contain a correct delineation of every thing of importance and in-
formation that it can embody, and be a reference not only to
1878 our officials and to all persons interested in the affairs of the
State, whose correctness should settle all doubts upon any
points or subjects it embodied." Then in accordance with the then
governor of the State of Mississippi the legislature of 1866 passed,
page 27, chapter 17, Laws of Mississippi 1866 and 1867, official
edition, an act entitled "An act to create the office of State engineer
for the purpose of compiling a new State map under certain con-
ditions.

SECTION 1. Be it enacted That the governor is hereby authorized,
to appoint a State engineer, whose duty it shall be, under his direc-
tion, to compile a geographical, historical and statistical map of the
State; said map to be not less that five feet by three feet in size, to
contain such information as the governor in his judgement shall deem
necessary, and before publication to receive his sanction and ap-
proval."

Then under section 3 of the same act it is provided that this State engineer shall furnish a number of copies of said map for the use and benefit of the State, as will carry out the following schedule for distribution, viz.—the secretary of state to whom the maps will be delivered shall cause three copies to be furnished to each county in the State, to become the property of said counties, and for use respectively in the offices of the sheriffs, and the circuit and probate clerks, at each county site in the State.

He shall also supply the different State offices at the capitol each with a copy, and six copies for the State university, and besides those shall have delivered to him such additional copies as will enable the governor to exchange for maps of other States and Territories, and the maps so received in exchange shall become a part of the property of the State library.

1879 SECTION 4. Be it further enacted, That it shall be the duty of the different county officers throughout the State to afford the State engineer every facility for obtaining such information as he may require in the compilation of said work."

Now if it be shown that the governor did appoint T. S. Hardee in 1866 and 1867 State engineer under this act. That he qualified as such; that he prepared this map which was approved by the then governor of the State, and that these copies were distributed according to the terms of this act, and that the object of the preparation of this map was in accordance with the suggestion of the governor contained in his message that it should contain a correct delineation of everything of importance and information that it can embody, and be a reference, not only to our officials, but to all persons interested in the affairs of the State, whose correctness should settle all doubts upon any points or subjects it embodied. Now after having read to you these extracts from these official documents, are you still of the opinion that the map so prepared should have no more weight or authority that any other map prepared by other outside parties?

A. For my use, yes sir. Any other map would do me just as well in my official capacity.

Q. Is not the effect, intent, purpose and object of this recommendation of the governor as well as the act passed in pursuance thereof; that this map should be an official map, settling beyond question and beyond doubt all questions, and binding upon the officers of the State in as far as matters and things that are set forth on the map. Is not that the plan, intent and purpose of the map?

By Mr. FLOWERS: Counsel for the State of Mississippi interposes an objection to this question because it calls for the witness's opinion upon matters of law.

1880 By Col. ZACHARIE: To which objection counsel for the State of Louisiana reply that the opinion of the witness has already been called for in his examination in chief by the counsel for the State of Mississippi as to what weight and authority should be attached to this map.

By Mr. FLOWERS: I wish to add to my objection on the pa
State of Mississippi that the laws speak for themselves.

A. I still do not regard it any better that any other map. I
not go to it any oftener than I would to Rand & McNally's
body's else.

Q. Has there been any official act on the part of the legisla
the State of Mississippi repudiating or calling in question t
rectness of any of the details embodied in this map?

A. I have never heard it discussed.

Q. Have you ever heard prior to the institution of this su
correctness of this map in any particular called in question b
body. Officers or any one else?

A. No sir.

Q. Has it or has it not been the custom in suits in the St
Mississippi in the State courts of Mississippi in locating places
other matters concerning the territory in Mississippi to refer to
map as an authority in the determination of questions and locali

A. I don't know.

Q. Do you know whether this map has been exhibited; poste
the various offices of the State of Mississippi. Public offices, whe
State or county offices?

A. No sir.

Q. You don't know?

A. No sir.

1881 Redirect examination.

By Gen. MCCLURG:

Q. Mr. Nall, by permission of the counsel of Louisiana and
order to get it incorporated in the record now, furnishing Louisia
a copy, counsel for the State of Mississippi will now read to you
document copied from Goodspeed's History of the State of Mississip
published I think in 1891, and to make the testimony pertinent t
proposition is to ask you whether you regard the lines fixed in th
statement as the true boundary lines of this State, and with that vie
I read you as follows:—

"Biographical and Historical Memoirs of Mississippi.

Chapter 1. Topography and Natural History and Paleontology.

Mississippi is bounded on the south by the north line of southeas
Louisiana, Pearl river and Mississippi sound and the gulf of Mexico
on the east by the west line of Alabama, and on the northeast by
the Tennessee river; on the north by the south line of Tennessee
(latitude 35 degrees), and on the west by the Mississippi. It embraces
also the islands in the gulf of Mexico, within six leagues of the shore
viz:—Isles Dauphine, Ronde Corne, Au Chevreul, Au Vasseau, Ai
Chat, St. Josephs, Grand island, and a few smaller bodies of elevated

sand, and the territory extending from latitude 30 degrees, to latitude 35 degrees north, and from longitude 11 degrees and 25 minutes west, to 14 degrees 33 minutes west. The area in square miles, as stated in the United States census report is 46,810, the local authorities place it as 55,500.

The width of the State, on a line of latitude 35 degrees, as 120 miles, on latitude 31 degrees, 186 miles and on the Gulf coast, 78 miles.

The length of the State on a line of longitude 12 degrees 30
1882 minutes, being the greater line, is 330 miles., but the frontage on the Mississippi is continental in its proportions."

A copy of this quotation is filed in this cause as Mississippi Document No. 48, and duplicates thereof now handed to the counsel for the State of Louisiana?

A. Yes sir, it is regarded as the true boundary line of the State.

The counsel for Mississippi now introduces the following documentary evidence, and hands to counsel for the State of Louisiana true copies of each, that is to say:—

Mississippi Document No. 49, being an extract from article 9, chapter 13, (public health and safety) taken from Mississippi's Hutchinson's Code 1798 to 1848, entitled "An act to prevent the destruction of oysters in the waters of the State of Mississippi"—July 26th, 1843.

Chapter XXVI, Revised Code of Mississippi 1857. An act for the preservation of game and oysters in this State.

Chapter 30 of the Revised Code of Mississippi of 1871, being "An act in relation to the preservation of game and oysters."

Section 956 of the Revised Code of the State of Mississippi 1880 "Power of boards of supervisors."

And chapter LXXIV, Laws of Mississippi 1884 (page 89), "An act to *amend* chapter 29, Revised Code of 1880," approved March 18th, 1884.

And chapter LXXXIII, Laws of Mississippi 1884, page 88, approved March 13th, 1884.

And chapter CVI of the Laws of the State of Mississippi of
1883 1886, page 180 "An act to encourage planting oysters, and for other purposes." Approved March 4th, 1886.

And chapter 90 of the Laws of Mississippi of 1888 "An act to amend an act entitled An act to encourage the planting of oysters and other purposes," approved March 7th, 1888.

And chapter 194 of the Laws of Mississippi of 1890, page 304 "An act to protect the public oyster reefs in the counties of Jackson, Harrison and Hancock," approved Feb. 27th, 1890.

And chapter 96 of the Annotated Code of Mississippi of 1892, "oysters, crabs, fish and shrimp."

And chapter 129 of the Laws of Mississippi, 1896, page 142 "An act to regulate the fishing of oysters and crabs, fish and shrimp in the gulf of Mexico and Mississippi sound and to increase the public

revenue by leasing public oyster grounds, and to repeal chapter 9[illegible] of the Code of 1892," and chapter 58 of the Laws of Mississippi of 1902 "An act to regulate the fishing and canning of oysters in the State of Mississippi, improving and enlarging oyster beds in the Mississippi waters, and to repeal chapter 96 of the Annotated Code, chapter 129 of the Laws of 1896, an- chapter 90 of the Laws of 1898," approved February 13th, 1902.

And chapter 113 of the Laws of Mississippi of 1904. "An act to make an appropriation to purchase or build a patrol boat for the use of the board of oyster commissioners, and the inspectors appointed by said board in patrolling the waters of the Mississippi sound, and protect the natural reefs in said sound."

1884 Counsel for Mississippi next introduces in evidence as Mississippi Document No. 50.

An extract from the proclamation of the King of England of date October 7th, 1763, taken from the Annual Register for 1763 volume 6 page 208.

Counsel for Mississippi introduces as Mississippi Document No 51, being an extract from a letter of the King of France to M. d'Abbadie, ordering him to deliver to Spain the French possessions in North America of date April 21st, 1764.

Counsel for Mississippi introduces Mississippi Document No. 52, being an extract from a letter of James Madison, Secretary of State, to Robert R. Livingston, minister to France, September 28th, 1801.

Counsel for Mississippi introduces Mississippi Document No. 53, being an extract from the letter of Albert Gallatin Esq., to James Madison of date February 7th 1803.

Counsel for Mississippi introduces Mississippi Document No. 54, being a letter of Secretary of State Madison to Monroe, minister to Spain dated July 29th, 1803, taken from the American State Papers (Foreign Relations) vol. 211, page 206.

Counsel for Mississippi introduces in evidence Mississippi Document No. 55, being an extract from a letter of instructions, addressed to Monroe April 15th, 1804, as minister extraordinary to the court of Spain, with which was enclosed draught of agreement to be proposed and obtained if possible.

American State Papers (Foreign Relations) vol. 2, pages 628 and 629.

1885 Counsel for Mississippi introduces in evidence Mississippi Document No. 56, being a letter of James Madison to Monroe and Pinckney of date July 8th, 1804.

American State Papers (Foreign Relations), vol. 2, page 630.

Counsel for Mississippi introduces in evidence Mississippi Document No. 57, being an extract from the message of Thomas Jefferson, President of the United States, and both houses of Congress November 8th, 1804.

State Papers, volume 5, 1803 to 1807, second edition published in 1817, page 27.

nsel for Mississippi introduces in evidence Mississippi Docu-
No. 58, being an extract from a letter from Monroe to Tally-
lated November 8th, 1804.
American State Papers (Foreign Relations), vol. 2, page 634.

nsel for Mississippi offer in evidence, and introduce Missis-
Document No. 59, being a letter from Tallyrand to General
rong, of date December 21st, 1804.
American State Papers (Foreign Relations), vol. 2, page 635.

nsel for Mississippi introduces in evidence Mississippi Docu-
No. 60, being an extract from the letters of Monroe and Pinck-
Mr. Cerallos, dated January 18th, 1805.
American State Papers (Foreign Relations), vol. 2, page 637.

nsel for Mississippi introduces in evidence Mississippi Docu-
No. 61, being an extract from the letter of Mr. Madison and
onroe, of date May 23rd, 1805.
American State Papers (Foreign Relations), vol. 2, page 633.

Counsel for Mississippi introduce in evidence Mississippi
Document No. 62, being the people's application, by people
st Florida to be annexed to Mississippi Territory, of date No-
r 20th, 1811.
American State Papers vol. 21, Miscellaneous vol. 2, executive
page 155.

nsel for Mississippi offers in evidence Mississippi Document
, being an extract from the letter addressed to the Secretary
e by the minister of Spain, of date December 30th, 1815.
American State Papers, (Foreign Relations) vol. 4, page 423.

nsel for Mississippi introduce in evidence Mississippi Docu-
No. 64, being an extract from the letter of the Secretary of
o the minister of Spain of date January 19th, 1816.
American State Papers, vol. 4, page 425.

nsel for Mississippi introduces in evidence Mississippi Docu-
No. 65, being an extract from the letter of the minister of
to the Secretary of State, of date Feb. 22nd, 1816.
American State Papers (Foreign Relations), vol. 4, page 427.

nsel for Mississippi introduces in evidence *as* Mississippi Doc-
No. 66, being an extract from the letter to the minister of
rom the Secretary of State, of date June 10th, 1816.
American State Papers (Foreign Relations) vol. 4, pages 429,
430.

Counsel for Mississippi introduces in evidence Mississippi
Document No. 67, being an extract from a letter of Don. Jose
, to Mr. Erving, of date, August 17th, 1817.
American State Papers (Foreign Relations) vol. 4, page- 446
447.

Counsel for Mississippi offers in evidence Mississippi Document No. 68, being an extract from a letter of Don Luis, to the Secretary of State, of date January 5th, 1818.

American State Papers, (Foreign Relations), vol. 4, page 455.

Counsel for Mississippi now offers in evidence a map entitled "Mississippi Territory, Miles, taken from Carey's General Atlas, improved and enlarged, being a collection of maps of the world and quarters, their principal empires and kingdoms, etc. Published by M. Carey 121 Chestnut St. Philadelphia, 1816. A copy of this map will be filed as a part of the record in this case, and duplicate thereof furnished to the counsel for Louisiana, and will be numbered Mississippi Document No. 69.

Counsel for Mississippi also introduce in evidence a copy of a map heretofore introduced by the State of Louisiana made by Andrew Ellicott, late commissioner on behalf of the United States during a part of the year 1796, and the year- 1797, 1798, 1799 and a part of the year 1800, for determining the boundary between the United States and a part of the possessions of His Catholic Majesty in America, containing occasional remarks on the situation, soil, rivers, natural productions, and diseases of the different countries, on the Ohio, Mississippi and gulf of Mexico etc., published by William Fry of Philadelphia in 1814. This map will be found in Ellicott's Journal above mentioned between pages 202 and 203, and as filed with the commissioner in this cause, a copy of which is waived
1888 by the State of Louisiana, being already in the record as a part of the evidence introduced by that State and marked Mississippi Document No. 70.

Counsel for Mississippi now offer and introduce in evidence Mississippi Document No. 71, being "Railroad commissioners' map of Mississippi published by Rand, McNally & Co. in 1903," and counsel have hands to the counsel for Louisiana a copy of the said map.

By Gen. GUION: In addition to the agreement already entered into between counsel for the State of Louisiana and counsel for the State of Mississippi at Bay St. Louis, on or about the 10th, of August 1904, in connection with a certain map offered by the State of Mississippi, and marked Exhibit B. It is further hereby agreed, understood and admitted by counsel for the State of Mississippi that A. L. Baldwin is the computer of the Coast and Geodetic Survey of the Department of Commerce and Labor in Washington, D. C., and that on the 8th, day of June 1904, at the time he signed the certificate attached to the map marked Exhibit B., he was not acting in making such certificate by authority or under the directions from the head of the Department of Commerce and Labor of the Coast and Geodetic Survey, notwithstanding it is agreed that said map may be offered in evidence for whatever it may be considered worth by the court and may be used for the purposes of demonstration.

It is admitted by the State of Mississippi that Goodspeed's Biographical and Historical Memoirs of Mississippi show that Gov-

ernor Humphries was inaugurated in October 1865, and held
1889 office until the fall of 1868, when he was displaced under orders from Generals McDowell and Ames, the latter of whom was appointed military governor.

The commission here adjourned to meet at New Orleans on Thursday, August 26th, 1904, at 11 a. m. in the office of the clerk of the United States district court in the custom house, before Frank H. Mortimer, commissioner.

1890 NEW ORLEANS, LOUISIANA, August 27th, 1904.

The commission met this morning in the office of the clerk of the district court of the United States, in the custom house in New Orleans at 11 o'clock a. m.

There were present: Hon. Frank H. Mortimer, commissioner on the part of the State of Louisiana. Hon. Frank C. Zacharie, and Hon. John Dymond Jr., associate counsel on the part of the State of Louisiana. Hon. William Williams, attorney general for the State of Mississippi, and Hon. Monroe McClurg, counsel on behalf of the State of Mississippi.

NEW ORLEANS, August 27th, 1904.

By agreement of the two States made by their respective counsel in the presence of the commissioner, Hon. Frank H. Mortimer, commissioner on the part of the State of Louisiana, the following testimony was taken here today as a part of the testimony in chief of Mississippi. That said commissioner for the State of Louisiana is to preside, and to certify to the record when prepared by the official stenographer for the State of Mississippi, said record to be incorporated in Mississippi's testimony. All objections as to the time, place and manner of taking this testimony on the part
1891 of Mississippi is hereby mutually waived.

Counsel for Mississippi in support of her contention on the questions of the exercise of sovereignty and jurisdiction by that State over the territory in dispute, submits the following documents, now handed the commissioner to be filed by him, a true copy of each of which is now handed to the counsel for the State of Louisiana.

Mississippi Document No. 72, being an ordinance passed by the board of supervisors of Hancock county, Mississippi at the January term 1898, with reference to the regulation of dredging of oysters on the public reefs in Hancock county, and to enforce the same.

Mississippi Document No. 73, is here introduced in evidence by the counsel for the State of Mississippi, being and ordinance passed by the board of supervisors of Hancock county at the September term 1898, being an ordinance for the protection and preservation of the public oyster reefs in Hancock county, Mississippi and to enforce the same.

Counsel for Mississippi introduce in evidence Mississippi Docu-

ment No. 74, being an ordinance passed by the board of supervisors of Hancock county at the June term 1900, with reference to the catching of oysters on the public oyster reefs of the said county by means of steam vessels or any other appliances or device propelled, managed, operated or utilized by steam.

Counsel for Mississippi introduce in evidence Mississippi Document No. 75, being a certified copy of the auditor of public accounts of the State of Mississippi, showing amounts paid into the
1892 treasury of the said State on account of the oyster fund from October 1st, 1902, to September 30th, 1903, inclusive, and from October 1st, 1903, to August 24th, 1904.

Each of the foregoing documents are now introduced and offered in evidence on the part of the State of Mississippi for the purposes above stated.

By Mr. DYMOND: Counsel for the State of Louisiana now excepts to the introduction of the said documents, as they in no way show or determine or fix the boundaries of Hancock county, Mississippi, and are therefore irrelevant.

By Gen. MCCLURG: Counsel on the part of the State of Mississippi, now offers and introduces in evidence an official statement made by the secretary of the Board of Oyster Commissioners of Mississippi on May 25th, 1904, to I. Heidenheim, chairman of the committee on testimony, showing a statement of the amount collected for licenses, since the creation or the board of oyster commissioners, marked Mississippi Document No. 76.

And counsel for Mississippi also offers a similar official document of the secretary of the Board of Oyster Commissioners of Mississippi to said Heidenheim on the same date showing statements of the two cents per barrel tax, since the creation of the board of oyster commissioners of said State. Marked Mississippi Document No. 77. The original is now filed with the commissioner, and a copy of which will be handed to the counsel for the State of Louisiana.

Counsel on the part of the State of Mississippi now introduces and offers in evidence a certified copy of a report made on October 2nd,
1901, by what is known as the Mississippi Boundary Com-
1893 mission to the governor of the State of Mississippi, which is marked Mississippi Document No. 78, and is now filed with the commissioner, and a copy handed to the counsel for the State of Louisiana.

And counsel for the State of Mississippi also introduces in evidence as Mississippi Document No. 79, a report made by W. A. White, and J. I. Ford on October 1st, 1901, to the governor of the State of Mississippi, with reference to the action of the so called boundary commission on the part of the State of Mississippi. The original of which is now handed to the commissioner to be filed, and a copy handed to the counsel for the State of Louisiana.

And counsel for the State of Mississippi also introduce in evidence as Mississippi Document No. 80, a certified copy of the recommendation of the governor of Mississippi, to the legislature of the said State,

at its session of 1902, entitled Mississippi Boundary Commission. The original is now handed to the commissioner to be filed and a true copy handed to the counsel for the State of Louisiana.

1894 Hon. V. A. GRIFFITH, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows:

By Gen. McCLURG:

Q. Mr. Griffith, I believe you are the junior member of the firm of Dodds & Griffith?

A. Yes sir.

Q. And you are the Griffith who was originally of the counsel of the State of Mississippi in this case of Louisiana *vs.* The State of Mississippi, respecting the boundary in the water of the Gulf, between the two States?

A. Yes sir.

Q. And as such counsel is it true that you undertook to have a map made showing the respective contentions of the two States on this subject?

A. Yes sir.

Q. I will show you a map marked Exhibit A. To the testimony of W. M. K. Ducate, on cross examination April 8th, 1904, filed by Frank H. Mortimer, commissioner, and ask you to look at this map and see whether it is the same as Exhibit A. to the original answer and cross bill filed on the part of the State of Mississippi by your law firm and other counsel for the State?

A. I have no positive knowledge as to how it was marked as an exhibit, though my best recollection is it is called Exhibit A. When we met at Jackson to draft the answer and cross bill, it was agreed between the then counsel for the State of Mississippi that in answer to the documents made by the State of Louisiana showing her contention that it would be necessary for the State of Mississippi to have a map made and file it as an exhibit to her cross bill, setting up her counter contention. It was impossible to use the Fish Hawk map which had been used by the State of Louisiana, because the Fish Hawk map did not extend far enough in among the islands.

1895 Some of the islands that we desired to show on the map for Mississippi were not shown on the Fish Hawk map. So our ...m was instructed by the attorney general of the State of Mississippi to have a map made, and it was agreed that in accordance ...th the averments on page 15 of the answer and cross bill that the ...p should be as near as possible a reproduction of the coast ...rts No. 19, 190, 191, and 192, as prepared by the United States ...st and Geodetic Survey, thus showing all of the islands and all ...he territory in dispute as it was viewed by the then counsel for ... State of Mississippi

The documents filed by Louisiana were mere zinc etchings, and it ... considered by the attorney general and by the counsel for Mis-

sissippi that a plain zinc etching for Mississippi would be sufficient, it not being desired to go to the expense of having a map made that would be absolutely, theoretically and technically correct, but to show the contention of the State of Mississippi only in sufficient detail. We thereupon as soon as possible made inquiries as to who could do this work, and finally decided to employ the Photo-Engraving Company of the City of New Orleans to make a map, and to print some from what is called I believe zinc etchings, and we instructed them to make a map on the same steel and the same size as the Coast and Geodetic Survey maps above mentioned. My partner Mr. Dodds, and I went to the office of the Photo-Engraving Company, and consulted with them fully, and gave them a list of the maps that we desired them to consult; furnished them with a copy of the Fish Hawk map, and explained to them how we wanted the Fish Hawk map extended to the southwest so as to cover all islands that would be within the limits of the State of Mississippi as viewed by the counsel on the part of the State of Mississippi. A gentleman in the office was called and
1896 we talked to him, and he was pointed out to us by the Photo-Engraving Co. as the man who would draw the map. He was a German. I don't remember his name, but was said to be a competent man in that line. He drew the map on stiff paper and notified us he had it ready for examination, and we called at the office of the Photo-Engraving Company and compared the map with the maps mentioned, and with the Fish Hawk map, and heard his statement that he had also consulted the maps in the United States land office at New Orleans, and so far as we could possibly tell by comparing the maps with the Coast and Geodetic Survey maps it seemed to be perfectly correct. We had only a few minor changes made such as having him to embody the township and range marks to the eastern portion of the islands before the map was accepted practically as made by him, and when same was received in its printed edition, I myself undertook to mark out the Mississippi line in red ink, as stated on pages 14 and 15 of the cross bill of the State of Mississippi. In marking this I began due south of the main land of the State of Mississippi, and south of a point which would be in Harrison county in the State of Mississippi. I measured a line six leagues, or 18 geographical miles from the mainland of Mississippi until such line struck what we term or contended the main land of the State of Louisiana, some distance west of Lake of the Mound; thence drew the line northward along what we contended to be the main land of Louisiana through Nine Mile bayou, and westward, still on the main land of Louisiana, to a point due south of the mouth of Pearl river, and from thence due north entering the middle of the mouth of Pearl river at its eastern junction with Lake Borgne. That line marked in black ink on Exhibit A. was our nearest guess to the contention of Louisiana. This line was drawn on the deep water channel running out of

Pearl river, as shown by the Coast and Geodetic Sur-
897 vey maps above mentioned, and where there were no soundings to show we measured from bayou to bayou along he bayous that are situated in this vicinity. The line due south f the main land of Mississippi and measuring what is commonly alled 18 miles is not measured upon statute miles but upon nauti- al miles, which make 21 and a fraction statute miles. After full vestigation we settled in conclusion that the act of Congress meant autical miles and not statute miles. That is our firm Dodds and riffith. This completed we forwarded the maps to the attorney eneral of the State of Mississippi to be filed as exhibits.

Q. Do you recognize this Exhibit A. to the deposition of Mr. Du- te, mentioned in my question, as the map which your firm had ade?

A. I do, and the lines as being drawn by me.

Counsel for Mississippi now offers and introduces the said map ove referred to as evidence in this case.

Q. Exhibit A. to the answer and cross bill of the State of Missis- pi purports to be precisely the same as the map on which you are w looking. Exhibit A. to Mr. Ducate's testimony above men- ned. I desire to ask you whether or not you have seen and ex- ined Exhibit A. filed with the answer and cross bill to which ur firm name is signed, and whether it is precisely the same as map now before you?

. My best recollection is that I marked twenty five of the maps he outside with the style of the case and Exhibit A. to the an- r and cross bill of the State of Mississippi. My best recollection at the attorney general instructed us that it would be necessary le twenty five maps, or exhibits, with the answer and cross bill, though I am not positive as to the number.

Q. To file them where?

A. In Washington.

With the clerk of the Supreme Court at Washington?

Yes sir. Each and every one of these maps were identical very respect, and the drawings were made by me successively.

What drawings?

The lines. The lines representing the contention of the State ississippi in red ink, and the black lines representing our best ate of what was the exact contention of the State of Louisiana. is marked in black ink.

By Gen. WILLIAMS:

Were these maps and those forwarded to the attorney general State of Mississippi to be filed as an exhibit to the answer and bill, the same, identically the same as Exhibit A., that has been s an exhibit to Mr. Ducate's testimony in this case?

They are identically in every respect without a deviation in anner. I will explain that the way these maps were made.

The first line was drawn and the disputed territory was cut out with a very sharp instrument, and made a pattern which was laid down on all subsequent maps, and a line drawn along the edge of this pattern so that there would be no deviation.

Q. What do you mean by all subsequent maps Mr. Griffith?

A. I had to mark out 60 of these maps, and I mean by all subsequent maps, the 49 following the first one that I made. They were all made at one time and in one day.

Q. You marked out as I understand it twenty five maps or more which were forwarded to the attorney general of the State of Mississippi to be filed together with the answer and cross bill on the part of the State of Mississippi.

1899 A. Yes sir.

Q. And then in addition to that twenty five or twenty six, or whatever number it was. You sent other maps, and subsequently—when you say *say* subsequent maps you mean those that you prepared for that purpose?

A. Yes sir, I sent twenty five maps to be forwarded to the clerk of the United States court at Washington, and I sent twenty five maps to be used by the attorney general for the records of his office and in this case.

Q. Well now who did you send those maps to Mr. Griffith. To whom did you send those maps?

A. I am not positive about the exact address, but my recollection is they were sent to the Hon. William Williams, attorney general of the State of Mississippi at Jackson Mississippi.

Q. Twenty five of which?

A. That marked as exhibits and intended to be filed with the clerk of the Supreme Court at Washington.

Q. As a matter of fact did not you mark on the back of more than twenty five of these maps, exhibits to the answer and cross bill?

A. It might have been just possible. I know that twenty five of them were so marked.

By Gen. McCLURG:

Q. Mr. Griffith, I believe that you have no personal or financial interest in this controversy now?

A. Nothing except as a citizen of Mississippi. No more than any other citizen of Mississippi would.

Q. But you have as you have stated above, given this matter considerable attention?

A. I did up to that time, but it has since passed out of my mind some what, and I am not as familiar with it as I had been.

1900 Q. In other words since the legislature of Mississippi declined to provide for attorneys' fees in the matter you quit the case and have given it no thought since?

A. No sir, I have not given it any more thought.

Q. Now I want to ask you. You reside at Biloxi I believe?

A. Yes sir.

Q. How long have you lived there?

A. Well nearly five years.

Q. And Biloxi is in the county of Harrison?

A. Yes sir.

Q. If you have any personal knowledge or any reliable information of any serious conflict or of any conflict that amounted to a crisis, between the sheriff and other officers of the parish of St. Bernard, Louisiana, and the sheriff and other officers of the county of Harrison I would be glad to have you tell this commission what you may know of it.

A. I have no personal knowledge concerning those matters. Any thing that I would testify to in response to that question would be hearsay.

Q. Have you any hearsay knowledge even of any thing that amounted to an armed conflict between the officers that I have mentioned. Of any serious conflict between officers of the parish and county I have named or between the two States prior to the filing of this case on the 27th of October, 1902?

A. Do you want pure hearsay?

Q. Any reliable information that you may have as to the matters.

A. It would be very difficult to say you have not heard something of almost any thing concerning this dispute. The expressions have been differing and the only action I ever heard of any prospects or propositions concerning an armed conflict was the time when Governor Longino had come to Biloxi, and it was suggested by some of the gentlemen there that they would take the matter into their own hands in some manner or form, which he very promptly sat
1901 down on, as well as the good counsel of other law abiding citizens.

Q. That was subsequent to the filing of the bill in this case?

A. I don't remember whether that was subsequent to the filing of the bill or not. I really don't believe it was a serious suggestion on the part of the gentleman who advocated it. Otherwise than that I have never heard any thing from that part of the country that would suggest that there was any armed conflict, or any danger of a collision out there.

Q. The question had reference purely to the time preceding the 27th, of March 1902?

A. Preceding the time of filing this bill I had never heard this matter discussed very lengthily in any way. Certainly I had never heard of any conflict out there. Armed conflict, and had heard very little about it in other respects, except that there was a dispute and a commission had been appointed to try and arrive at an amicable settlement of the matter.

Cross-examination.

By Mr. Dymond:

Q. Mr. Griffith, I understand that you are the Mr. Griffith
was counsel at one time for the State of Mississippi in this case?
A. Yes sir.

Q. And that necessarily you had ideas as to the defense that
sissippi should put up to the suit that had been instituted by
State of Louisiana to determine the boundaries?

A. Yes sir.

1902 Q. Now will you please look at this map Mississippi
concerning which you have just been testifying, and rea
ing to your mind your remark about the islands, and that you
sired to have this map show the territory sufficiently south to
clude all of the islands, you referred did you not, to your conclu
that this body of land surrounded by water in the Louisia
marshes, or what Louisiana claims to be Louisiana marshes, a
islands?

A. Yes sir.

Q. You don't know whether they are swamp hummocks or not d
you?

A. I will state in reply to that question that in September 1902,
my partner and I went out into these marshes here to examine for
ourselves the nature of that land, so as to see if we could form a
definite conclusion as to what would properly be termed islands
It is true we did not go all over the territory, but we went in Three
Mile bayou, and from our observation of the territory there we con-
cluded that we were safe in determining this territory islands so far
as we saw it all.

Q. Was not that on the theory Mr. Griffith that it was a body of
land entirely surrounded by water?

A. Well of course that was the primary conclusion. An island is
commonly defined as a body of land entirely surrounded by water.

Q. Is it not a fact that it is a low marsh country just about on a
tide level?

A. It is a fact that except at the very edge where the water first
strikes it is low and marshy, and at high tide is to a large extent
covered with water. We found difficulty in walking on it except at
the edge of the water, where the sand had been thrown up against
the sea weed.

Q. When you speak of the edge do you speak of the shore line
from Malheureux point to Isle à Pitre?

A. I mean where the water strikes the sea grass in any of these
islands.

1903 Q. All through the marsh?

A. Yes sir.

Q. Did you ever make a trip at Petit pass, from Malheureux
point to Isle à Pitre?

A. Our trip was from Biloxi to St. Joseph island, and Half Moon

island, and in at Three Mile bayou, and out from there along westward — La Petit Pass island and from there to Pearl river. I have been at Isle à Pitre, but not on this trip or expedition, and consequently did not take as much note of it, but to answer your question I have never been from Isle à Pitre along west to Malheureux point.

Q. You therefore never had the opportunity of knowing the character of the shore line extending between those two points?

A. Not all of it, no sir.

Q. What part of it have you traversed?

A. As I stated, from Three Mile bayou, to the neighborhood of La Petit Pass island.

Q. Along the coast?

A. As the schooner would sail. As near to land as we could sail.

Q. In sight of land?

A. Yes sir.

Q. Did you notice the land continuously as you sailed along?

A. I would say yes, continuously, but I do not mean by that that we did not take our eyes off of the land.

Q. Was not there a well defined coast line between these points?

A. There is a break at Nine Mile bayou.

Q. That is a bayou entering into the marsh?

A. Yes sir.

Q. As shown on this map Exhibit A?

A. Yes sir.

Q. Did you ever endeavor to walk on the shore line from Petit pass to Isle à Pitre?

A. No sir.

1901 Q. Now when you came to the confection of this map, what was it caused you to start out at the mouth of Pearl river, a line west of Malheureux point and back to the eastward and come down Nine Mile bayou?

A. You will find by consulting the answer and cross bill on pages 14 and 15, that this gives a description of the line. I was merely following that description of the line, but however I will say that we did not begin at Pearl river, but we began to the eastward of the map.

Q. How did you happen to determine the main land of Louisiana as set forth with the red line on this map Mississippi A?

A. By an inspection of the map. By looking on the map, to see where the main land was shown there.

Q. Were you influenced by any other information you had on this subject?

A. Any detailed information?

Q. Did you have any other information on the subject at all?

A. I will say that the crew of the schooner who are old and experienced fishermen in that part of the country were plied with a great many questions by us in making our investigations, and there

statements were taken into consideration as well as what was shown on the map.

Q. Now will you please notice this map called sketch No. 2 attached to Document No. 11 of Louisiana and notice whether or not there is any thing on the map suggestive of what is supposed to be the main land of Louisiana in this locality?

A. As to what that map suggests, the mainland would seem to be clearly conceded to be south of Marsh island, but there are other drawings that would seem to indicate that the draughtsman had in mind the main land might be held to extend out towards Cat island.

Q. I don't think you have exactly understood my question Mr. Griffith. Is there any thing on this sketch No. 2 before you to indicate any measurement from the main land?

1905 A. Well I would say this nine nautical miles from main land being a line drawn north and south, not straight, but curved, would indicate it has been drawn from the line I have just spoken of south of Marsh island, as being drawn from main land.

Q. Do you notice any similarity between that line and the line which you have designated as the main land on your map Mississippi A, in a general way?

A. In a general way it is the same direction, but it extends to the eastward, nine nautical miles of an actual line drawn in red on Exhibit Map A. of Mississippi.

Q. I refer to your red ink line on Mississippi Exhibit A. Does it in a general way conform with the outline of the main land as shown on this sketch No. 2?

A. It does.

Q. Did you have before you this sketch No. 2, or a similar sketch at the time you draughted or confected your map Mississippi A.?

A. I did not.

Q. Did you have any knowledge of the existence of this sketch No. 2, or document map No. 11 at the time you made that map Mississippi A.?

A. I never have seen it until today.

Q. Was I correct in understanding you Mr. Griffith to say that you marked a number of maps as Exhibit A. to be attached to the answer and cross bill filed by the State of Mississippi?

A. As I stated before my best recollection is that twenty-five of the maps were forwarded to the attorney general and marked, and as I stated in my direct examination that — the style of the case, and below that the statement Exhibit A. It may be just possible however that instead of marking the map that way, I marked it in lead pencil Sup. Ct. with the idea that the attorney general himself would put the proper marks on the outside. It has been

1906 some time and the matter has gotten out of my mind entirely. I have not attempted to remember. I am not just positive as to which way that was done.

I will say that the same maps that I marked and sent to the at-

torney general. I saw in his office a few days afterwards, when I was there on business, and it may be that instead of marking the maps on the outside as exhibits, the only time I did mark them as exhibits was on the inside when I instructed the printer to print it that way, and it will be found that way. My best recollection now after refreshing my memory is I marked in lead pencil U. S. Supreme Court.

Q. You will notice on page 15 of your answer and cross bill the following language "And your orator will file in due time proper copies thereof now being made as Documents No. 1, 2, 3, and 4, and made parts hereof." Is not that the only reference to that document or map, Mississippi A, concerning which you have testified as made in that answer and cross bill?

A. It is as I remember it. At the time we wrote this cross bill it had not been definitely determined whether we would make only one map or have the four, or whether we would have four, the map being a composite of all the four, or have the four 1, 2, 3, 4, corresponding and 19, 190, 192, and 191. We could not use this Coast and Geodetic Survey maps as exhibits because they were too large and stiff.

Q. As to the accuracy of this map you are not prepared to testify to that in any way. You never have taken a compass and scaled it off to see whether it was correct?

A. Upon the accuracy of that map I will state as I did before we applied to these people who were recommended to us as experts in the work. We had notice furthermore that the maps filed by Louisiana were rough, and not intended to set out absolutely correctly the then contention, with the exception of the Fish Hawk map, and our conclusion was that a map that sufficiently outlined our contention would be required in this exhibit, with out further testimony to be absolutely technically correct, and ould be introduced on the hearing. So that map when I came to xhibit it was compared with the Coast and Geodetic Survey maps st are mentioned here, and we had them to change the names of e or two of those bays, and so far as we could tell by the closest ritiny it was a true and faithful copy of the Government maps specting that territory.

Q. I understood you to say from the data you had prepared by s expert, that it showed that this territory had been surveyed and e township and range and section lines were projected on this data had?

A. Yes sir.

Q. And you had that data eliminated from your map north and t of your red ink lines?

A. Yes sir.

Q. Those township and range lines showed that the lands had been veyed as a part of Louisiana did it not?

A. We did not take the time and trouble to investigate by whom survey had been made. We assumed that it had been made by

Louisiana, but granting the assumption it was a part of our contention that the State of Louisiana had no right to survey it, and therefore it should be eliminated on this map as surplusage, and also had the names of some of the islands eliminated so as to prevent this map from being too full of details and names that would detract from taking a proper view of it.

Q. Your idea was to prepare a special map for this particular case rather than to prepare a map truly representing every thing collected from the sources which you state?

A. Our purpose was simply to have a map that would indicate to the court exactly what our contention was. We wanted a map that would be correct so far as the topography was concerned, and wanted the outlines of the islands to be carefully and correctly shown
1908 so far as possible with a zinc etching. It was not our purpose to go to the expense of having a photograph made. We wanted the scale of miles to be correct, and we wanted the names of the islands and waters that we put in there to be correct and as I stated before I had some of the names changed for that reason, as we did not desire to have a map too much written over with names, and data that could not be of any assistance in this controversy, but that would confuse the court and others in looking over the map.

Q. But you were particularly careful to see that any evidence of the ownership of Louisiana, of that territory shown by the map should be removed, from any part of the map that you were preparing?

A. I don't recollect that there was any evidence of ownership appearing on the map, unless you consider the mark of the township and range on there as being an evidence of ownership. That is the only thing that we had eliminated that could show any thing of that kind and you will notice that on the main land, or that part we concede to be the main land the township and range are still left.

Q. Well Mr. Griffith, you were interrogated a few minutes ago with reference to a dispute or conflict between the two States. Is it not a fact that you know that there have been negotiations pending between the two States in regard to this boundary since January 1901?

A. I know that there have been negotiations certainly.

Q. Now did you ever hear of previous efforts on the part of the State of Louisiana and more particularly the sheriff and officers of the parish of St. Bernard Louisiana, being as far back as 1898 to expel non residents from this particular territory?

A. All of these matters I have heard of since this bill was filed. Previous to that time if I heard any thing about it it made absolutely no impression on me and I don't recollect it.

1909 By Col. ZACHARIE:

Q. Mr. Griffith are you a surveyor or civil engineer?

A. I will say that in my course of mathematics in the University

of Mississippi it was a part of the prescribed course that I should take surveying. As such I did field work there.

Q. You did field work simply at college?

A. Yes sir, that is all.

Q. Are you a cartographer?

A. No sir, I claim no technical knowledge about that map at all. All we did in accepting this map was it seemed so far as we could observe by the naked eye it was a correct transcript of the Coast and Geodetic Survey map. We were not making maps. We were attempting to practice law.

Q. Then you did not make use of the compass, theo*g*olites or any other surveying instruments to determine the correctness or anything on this map?

A. The only thing we did I have just stated. We compared it with the Coast and Geodetic Survey maps that we referred to and it seemed to be correct by them.

Q. And you put upon this map only such data as you thought would illustrate the claims of the two States?

A. The claims of the two States yes sir.

Q. This you did under instructions. Did you not carry out all data which is embraced in the second and third articles of the cross bill of Mississippi printed on up 14 and 15?

A. The third paragraph 14 and 15.

Q. Did you not also take into consideration the whole portion of paragraph of article 2, of the cross bill on page 14?

A. Yes sir.

Q. Then as I understand you Mr. Griffith this map was not prepared as an original map for the purpose of correctly showing
1910 the territory, but was sim-ly a *pro-forma* map gotten up under instructions to show the respective claims of Louisiana and Mississippi in this litigation?

A. Yes sir, we took it for granted that counsel for Louisiana would never insist that the maps zinc etchings filed by them, with the exception of the Fish Hawk map was any thing approaching a correct map. It was a very rough draught made by some print shop in this city, and we thought that we were going a distinct step further when we had as correct a map as that prepared as an exhibit.

Q. In other words you considered the maps that had been filed with Louisiana's bill of complaint as being simply *proforma* maps?

A. Yes sir.

Q. And you proposed on the part of Mississippi only to show the contest between the two States, and prepared this map and submitted it as illustrative of the claims of the two States?

A. Yes sir, we prepared a better map than the one used by Louisiana.

Q. Did you or did you not know that Louisiana had filed as Exhibit E with her bill of complaint an actual facsimile, or copy of the geodetic maps of the United States Coast and Geodetic Survey. Did you or did you not know that?

A. If it was a fact I knew it. I don't recollect now what m knowledge was about that.

Q. Then I don't understand you to say in so far as an origin map to establishh by proof any thing; that this map was ever pr pared for any such purpose?

A. You are correct in that. That map is a copy of the Coast a Geodetic Survey map just as the copy that you have spoken of having been filed with your bill.

Q. But you stated a moment ago that you did not make a copy the Coast and Geodetic Survey maps, because you left out certa details in regard to the townships and ranges and so on. So that is not a copy of these maps?

A. My recollection is, and I think the Coast and Geodet
1911 Survey maps mentioned in our answer will show it, th townships and ranges are not shown on the Coast and Ge detic Survey maps. I don't recollect to have seen it. This mea was taken to make these maps. He procured as he stated to us, procured these townships and ranges from the land office here New Orleans.

Q. Then I understand you to say that this map was not prepar by you that it should be proof of anything further than to show t claims of the two States?

A. To show the claims of the two States, and as one being corre without having a- original map made by measurements.

Q. So that the court might understand the merits of the contr versy?

A. Yes sir, but after having the map made, we were much i pressed both from our observation of the territory itself, and fro our examination of maps that the map was practically correct detail.

Q. Do you know where the idea of including this territory in r lines on this map came from?

A. Our idea is that it came from the Congress in 1817.

Q. Do you know who first suggested this delineation or how it w suggested?

A. Why the act of Congress in 1817 suggests that delineation.

Q. Was that the only way in which the suggestion was made?

A. Why I could not state as to that.

Q. Had you seen the report and accompanying documents of M Hodgkins of the Coast and Geodetic Survey when you prepared th map?

A. I had not. I had not heard of it. And my first informati concerning this matter was when I read it in the daily papers New Orleans at the time Louisiana was taking her testimony chief. That is as to the report. As to the map, I have seen it he this morning for the first time.

1912 Q. You may have stated it in your testimony and it caped me. Under whose instructions did you prepare th map, and everything generally?

A. As I stated in my direct examination, the attorney general for Mississippi requested us to have a map made as an exhibit to the cross bill of Mississippi so as to show the contention of Mississippi, and that matter was left to the judgement of the firm of Dodds and Griffith, and we had that map made.

Q. And did his instructions embrace that you were to follow what was laid down in the second and third articles of Mississippi's cross bill?

A. No specific instructions were given us on that point. That was work that we did from our own best judgement.

Q. Did you follow the instructions; the second and third articles in the cross bill, in preparing this map?

A. We followed the articles both in the cross bill and articles inclusive.

Redirect examination.

By Gen. McCLURG:

Q. Were there any specific instructions given you at all. Was it not rather a request. You took the matter of map making in hand and did it as you thought best?

A. My recollection is that after the answer and cross bill were prepared at Jackson, Mississippi, that it was agreed that we would have a map made, and following that agreement we received a letter from the attorney general of the State of Mississippi requesting us to have a map made and authorizing us to use our best judgement in the matter, and without suggestion stated that he and associate counsel would abide by whatever we had done about it, so that the attorney general and associate counsel Mr. McClurg had nothing to do with the construction of that map.

1913 By Gen. WILLIAMS:

Q. The only instructions you had Mr. Griffith were to go ahead and prepare a map, and let the man who made it draw on the attorney general for the amount?

A. That is correct.

By Gen. McCLURG

Q. It may be somewhat in repetition, but as we understand this map Exhibit A to Mississippi's answer and cross bill, and Exhibit A to Mr. Ducates' cross-examination on the part of Mississippi in that case, it was intended to give a succinct idea of the claims of the States as to the territory in dispute?

A. Yes sir.

Q. And the scale that is on this map corresponds with the scale on the map from which it was made?

A. Yes sir.

Q. And that map was an official map of the Coast and Geodetic Survey of the United States.

A. It was. That scale being one in correspondence with a scale of statute miles. So in drawing that line 18 nautical miles, we had to refer to fraction and make it a scale corresponding to the geographical miles. That is statute miles and it should have been geographical miles.

Q. And this red line that is drawn across this map that is filed with the clerk of the Supreme Court of the United States at Washington is Exhibit A to the original bill indicates that it is 18 geographical miles from the shore of Mississippi due south?

A. Yes sir, about 21 and a fraction statute miles.

By Mr. DYMOND: Objected to by counsel for Louisiana on the ground that the question is leading and suggestive.

1914 Q. You were asked on cross examination Mr. Griffith—?

A. I want to state this. I was asked awhile ago if that map was made on actual measurements. After that map was made this engineer who made it subsequently came to us as a private arrangement and stated that he was going on a cruise out there on these islands, and he thought we ought to pay him so much——

By Mr. DYMOND: Objected to on the part of the State of Louisiana on the ground that it is hearsay evidence, and the engineer is the only competent witness to testify to it, and that counsel for the State of Louisiana is entitled to the opportunity to know the witness's name, and having him summoned in order that he may be cross examined.

A. If we would pay him so much he would make actual measurements of all the outlines on the map, and mark out by miles the distance from point to point.

By Mr. DYMOND: It is understood that the same objection on the part of the State of Louisiana is made to this statement and all similar questions and answers propounded by the counsel for the State of Mississippi.

A. And that he would mark the map in blue and otherwise complete and execute the map in detail, and we paid him a certain sum to do this work, and we now have and had six months ago a copy of this map in our office.

By Col. ZACHARIE: The State of Louisiana by her counsel objects to all of the testimony of this witness in regard to the preparation of this map, except so far as his communicating to the engineer instructions as to how to prepare the map. That as to the preparation of the map, the only evidence admissible as to its preparation would be the person who prepared the map, and the testimony is
1915 therefore excepted to, and the fact as to the preparation of the map by a third party has only been developed on the cross examination of the counsel for the State of Louisiana.

By Gen. McCLURG:

Q. Mr. Griffith, counsel for Mississippi has called your attention to map No. 7, introduced in evidence in this case on the part of the State of Louisiana, and especially with reference to the marking on said map the red and blue lines; asking you to note the outside or northeastern circular blue line marked Nine nautical miles from Isle à Pitre, and the broken circular line marked Nine statute miles, and the next line Nine nautical miles from Grand pass, and the broken line near the Nine statute miles, and third, Nine nautical miles from the body of the marshes, and Nine statute miles. Your attention is called to that to examine you with reference to the question asked you by counsel for Louisiana as to the main land of the State of Louisiana. Now please state whether the red line marked by you on Exhibit A, to the answer and cross bill, and Exhibit A, to the cross-examination *to* Mr. Ducate, indicating the main land on said exhibit is the same as indicated on this map No. 7, as being the nine nautical miles from the body of the marsh land?

A. It is the same except in one particular in which the detail of this map differs from the map on which the line is marked. At a point about two leagues north of the most southern point on the red line, this map is drafted on such a small scale that the details of some of the outlines are lost.

Q. The exact point to which I desire to call your attention
1916 is whether there is any substantial difference between what Mississippi calls the main land, of Louisiana in her cross bill and answer in her map Exhibit A, and what Louisiana on this map now before you denominates the main body of the marshes?

A. There is no substantial difference. But this nine nautical miles from the present main body of marsh land, and nine statute miles from the same are measured from the same thing that our line going north runs along with.

Q. And I understand you to say that our line; that is the line called in our cross bill and answer as the high tide mark, or the main land of Louisiana as indicated on this map introduced by Louisiana is the main body of the present marshes?

A. Yes sir.

Q. So then there is no difference between us on the proposition as you understand it. There is no material difference?

A. No material difference.

Q. I wish you would please tell me what you understand by these measurements indicated on this map by the circular blue line. This map No. 7, introduced by Louisiana?

A. I understand that the first line to the right marked Nine statute miles, and the second marked Nine nautical miles present main body of marsh islands to be a calculation as to where the Louisiana line would run, conceding the marsh territory to be islands, and therefore this main land would run from Nine Mile bayou south as indicated in our answer and cross bill, and the next nine statute miles

and nine nautical miles from Grand pass would be what Louisiana would contend to be, the State line in case it should be held that the main land extends as far as Grand pass. The nine statute
1917 miles and the nine nautical miles from Isle à Pitre running out to Ship island would be what Louisiana would claim as the line in case that Isle à Pitre should be held a part of Louisiana main land.

Q. What do you understand by the 18 statute miles and the 18 nautical miles marked there running east and west?

A. I understand that the 18 statute miles is measured south from the main land of Mississippi, and would be the extreme of Mississippi's contention in that direction in case the court should hold that Congress meant statute miles, and 18 nautical miles would be the extreme southern line of Mississippi's contention in case the court should hold that the intention of Congress was to speak of nautical miles.

Recross-examination.

By Mr. DYMOND:

Q. Mr. Griffith will you please look at map No. 7, concerning which you have just been testifying, and state whether you do not recognize the blue and red lines thereon to be the exact lines projected by Mr. W. D. Hodgkins of the United States Coast and Geodetic Survey as shown on Document 11, and sketches 1, 2, and 3, attached thereto?

A. I have testified to the reports of Mr. Hodgkins that I have never seen the maps until today.

Q. You will please look at it now and state, after examining the notes that appear on the map, and on the sketches which are pointed out to you, and state whether or not you do not recognize the lines on maps 7, to be the identical lines as shown on sketches 1
1918 and 2, Document No. 11 prepared by Mr. Hodgkins?

A. So far as the eye could detect by a casual examination I would say that they do.

Q. I will state for your information Mr. Griffith that we have had a witness on the stand who testified that he made these lines and made them from the Hodgkins survey actually. Now you have testified as to what was the intention of Louisiana to be shown by these various lines that appear on map second, and you have stated that such conclusion would result if Isle à Pitre was held to be a part of the main land of Louisiana. Will you please state where you got your authority for any idea that the main land figures in this matter in any manner whatsoever.

A. I will state that any statement I will make concerning this will be opinion. Just my opinion after studying the case.

Q. Are you not familiar with the act of Congress creating the State of Louisiana?

A. Very familiar.

Q. Do you not know in place of using the word main land it uses the word coast?

A. Yes sir, coast in Louisiana and shore in Mississippi.

Q. Have you ever examined the authorities to ascertain what the word coast means?

A. I have.

Q. Have you found any reference to any main land in the legal definition of the word coast?

A. Yes sir, I have a brief that states all of the authorities.

Q. Can you find any of them now?

A. You will find an authority in the text book called Careless on Sewers that goes so far as to hold that the coast is always a part of the dry land.

1919 Q. That is your authority?

A. No sir, not the only authority.

Q. Do you know of any other authority?

A. A decision by Judge Field while he was on the bench in California is another.

Q. What case?

A. I don't remember the cases. I have it in a brief.

Q. A brief prepared in this case?

A. Yes sir.

Q. Your brief has never been filed has it?

A. No sir, we have not gotten to the filing point yet. I suppose we will some day.

The commission met at 2 o'clock pursuant to the recess for the noon hour, and there were present the same as this morning.

Governor JAMES K. VARDEMAN, a witness introduced on behalf of the State of Mississippi, being duly sworn, testified as follows, to-wit:—

By Gen. MCCLURG:

Q. Governor Vardeman, in order that you may get at least a chronological idea of this suit by the State of Louisiana against the State of Mississippi; about January 1901 there was some thing in the nature of a mass meeting held in the city of New Orleans looking to the location of the boundary between the State of Louisiana and the State of Mississippi in the waters of the Gulf.

At that meeting as stated in the bill of complaint and generally stated to you now, a boundary commission on the part of Louisiana composed of five gentlemen was appointed, and resolutions were adopted requesting the governor of Louisiana to ask the gov-

1920 ernor of Mississippi (at that time Governor A. H. Longino), to appoint five gentlemen from that State to determine an easy location and marking of the boundary that I have mentioned. Governor Heard acting for Louisiana appointed five gentlemen, and he notified Governor Longino of Mississippi, who also appointed

five gentlemen some time in February, and on the 26th of March following these ten gentlemen met in the city of New Orleans, but failed to agree to make any recommendation. The Louisiana commissioners submitted to the Mississippi commissioners their suggestion as to where the boundary was. The Mississippi commissioners asked time to consider the matter. And afterwards on the 20th of July 1901, the gentlemen appointed by Governor Longino addressed a letter to the chairman of the joint commission that had met in Louisiana on the 26th of March, stating that they could not agree to the claims of Louisiana, and suggested a friendly suit between the two States in the Supreme Court of the United States to fix the line. No authoritative action was taken so far as the record shows until the legislature of Mississippi met of the 1st, Monday of January 1902, when Governor Longino called the attention of the legislature to what had transpired and recommended such action as the legislature of 1902 might deem proper. The legislature took no action in the matter, and so far as the counsel for Mississippi is informed the legislature of Louisiana, which met in May 1902, took no action in the matter.

About the 27th of September 1902 the oyster commission of the two States met in Louisiana, and it seems in expectation of the suit that Louisiana was to bring against the State of Mississippi in the Supreme Court of the United States, agreed upon what they called a neutral line, or zone. Which marked certain lines which they expected the citizens of the two States to respect. A line
1921 which run from Malheureux point to Grand pass, following the north shore of what we call the marshes, to the westward side of Grand pass, southward of Sun Down island and into Cat Island channel, thence into the Gulf proper. South of that line was considered exclusively Louisiana territory.

The next line north of the one that I have described followed the deep water sailing line out of the most eastern mouth of Pearl river to a point in the neighborhood of the western end of Cat island, and turning thence to a line at the north mouth of Grand pass that I have before mentioned. Between this deep water sailing line and the north shore of the marsh was left open for both sides, and the territory north and east of the line last above described was exclusively in the State of Mississippi. On the 27th of October, after this meeting about the 27th of September 1902, the bill of complaint in this case was filed in the Supreme Court of the United States and soon thereafter process was duly served upon the governor and the attorney general of the State of Mississippi.

About the 17th of November 1902 Governor Longino, and the attorney general of Mississippi, met Governor Heard and the attorney general of Louisiana in New Orleans in a joint meeting with the oyster commissions of the two States for the purpose of considering either the abrogation of the neutral line, or the modification of the neutral line which had been created by the oyster commissions in September, which meeting adjourned without any action. It has

been my opinion and the counsel for the State of Mississippi that this neutral zone line agreed to by the oyster commissions of the two States in September was oppressive to Mississippians interested in the oyster business, and it is upon this proposition that you have been called to testify in this case.

This statement has been made to you that you may catch
922 the general drift of the case up to this time. I wish you would please tell the commission Governor when you were inaugurated governor of the State of Mississippi?

A. I was inaugurated on the 19th of January 1904.

Q. How long had you lived in the State of Mississippi prior to your inauguration?

A. Since 1868.

Q. Nearly all of your life?

A. Very nearly all of my life.

Q. What positions have you held in your State?

A. I was a member of the legislature in 1890, 1892 and 1894. I was speaker of the house in 1894.

Q. You have held some military offices have you?

A. Yes sir, I was first a captain and afterwards major in the Fifth United States Volunteers, and served about 10 months in Cuba in 1898 and 1899.

Q. If you have any knowledge or information Governor as to the effect upon the people of Mississippi, and especially those interested in the oyster business along the coast that this neutral zone line had or is having at this time, we would be glad to have you to tell the commission in your own way what you know about it?

A. I know very little about the oyster business in Mississippi. Since this suit was instituted and this boundary line has been discussed, I have heard a good deal talk about it. I have had a great many people since I was inaugurated governor to talk to me about the injustice done to the oyster men resident in Mississippi by the line which Louisiana has established. In fact at a meeting of the oyster commission and the citizens of Biloxi last summer the matter was discussed at length. It was urged that Louisiana had arbitrarily established a line and ordered the people of Mississippi to stay out from within these lines. I was told by these oyster dealers that it was very hurtful to their business.

923 Q. Can you say whether the people of this State, and especially those of the coast counties have been or are now satisfied with this line agreed to by the oyster commissions?

A. They are very much dissatisfied. They think that the oyster commission had no authority to establish this line, and they also think, and have so expressed themselves to me, that since the courts have been appealed to, the territory in dispute should in justice to both parties be thrown open to citizens of both States.

By Gen. WILLIAMS:

Q. As governor of the State of Mississippi would you attempt to agree to the proposition above agreed to as the neutral line between the two States?

A. I suppose you mean that as governor of Mississippi would I agree to the line established by the Oyster Commission of Louisiana, or the line agreed to by the two commissions?

Q. The two commissions?

A. Most assuredly I would not. I don't think they have any authority to do that. I don't think the legislature of either State has any authority to fix the line.

Q. Outside of legislative authority would you as governor agree to that. Would you as governor of the State attempt to establish that line?

A. I would not.

Q. Without any legislative authority?

A. I would not. Of course not. I would not undertake to do a vain thing.

By Gen. McCLURG:

Q. If the governor of the State had any thing to do with establishing that line have you any knowledge of it?

1924 A. I have not. It was done during the incumbency of Governor Longino, and I know nothing save that which I have gathered from the newspapers, and heard other people say. I can not speak of my own knowledge.

Q. Had the governor of the State of Mississippi in 1902 any authority that you know of to appoint a commission to settle the boundary between the two States?

A. I don't think there was ever any law enacted by the legislature that authorized him to do so. I have no information on that subject.

Q. Have you any information as to any statute or authority conferred upon the Oyster Commission of Mississippi to settle the neutral zone line that we have been speaking about that was binding upon either side?

A. I know of no such law. I never heard of it.

Cross-examination.

By Mr. DYMOND:

Q. Now Governor as a matter of course as the chief executive of the great State of Mississippi, you necessarily have keenly at heart the welfare of the people of your State?

A. That is very true sir.

Q. At the same time you have been asked to express your opinion and to state what you would do under certain conditions. As a matter of fact would not you before coming to any conclusion in-

estigate for yourself carefully the existing facts, at the time any
.ing would come up before you for settlement?
A. Certainly I would.
Q. And you would be very largely influenced by the equities as
ey appeared to you from a presentation of the facts then
made?
925 A. I would endeavor to do that which was right.
Q. Now have you ever sufficiently studied the facts as they
isted in September 1902 to tell whether the Oyster Commission of
lississippi fully considered the equities of both sides of this con-
oversy at the time they reached the agreement with the Oyster
ommission of Louisiana?

By Gen. McCLURG: This question is objected to because public
ficials are not governed by equities in any sense. They are con-
olled by the letter of the law, and not by equities or any condi-
ons as they may appear to them, and the question should be re-
ricted to what the law was controlling the governor and the oyster
ommission and the public officials.

A. Well now answering your question the oyster commission
ould have no right to act in this matter, and could do nothing
xcept that which the law authorized them to do.
Q. Governor pardon me, I am not asking you for an opinion as
the rights of the oyster commission from a legal point of view.
you will have the question read back to you I think you will
nderstand it better. (The question is here read to the governor as
llows:)—Now have you ever sufficiently studied the facts as they
isted in September 1902 to tell whether the Oyster Commission
Mississippi fully considered the equities of both sides of this con-
oversy at the time they reached the agreement with the Oyster
ommission of Louisiana?
A. Well as I stated a moment ago, to the time I was inaug-rated
had given very little thought and consideration to this oyster
uestion, and I am not familiar with the history of this controversy.
have though been impressed with the almost universal condem-
nation of the people living along the coast of the action
926 taken, along the coast of Mississippi, of the action taken by
the oyster commission in establishing this neutral zone,
aintaining as they have as I stated almost universally, the rights
the people of Mississippi had not been protected in the settlement
the matter.
Q. Now Governor you are a lawyer if I am not mistaken are you
t?
A. Yes sir.
Q. Are you familiar with the decisions of the Supreme Court of
e United States which recognize the rights on the part of each
ate in her sovereign capacity to control the oyster waters within
r borders and to legislate in regard thereto?
A. I have not given very much thought to the matter.

Q. Well assuming that the Supreme Court of the United States in the case of McReady *vs.* Virginia held that each State was entitled to absolutely control the oyster producing waters within her borders, to the extent of excluding if it chose to do so, upon residents therefrom. Then under these circumstances if there was a dispute as to the territorial limits between the two States, and there were valuable oyster properties and oyster waters in the disputed area, would not it be natural to suppose that there was a reason and a cause for the adjustment and determination of this dispute?

A. Yes sir, there would be cause for an adjustment.

Q. That being the case is it not a fact that the legislature of the State of Mississippi in 1902 becoming aware of the growing importance of its oyster industry, provided for and appointed a special commission whose duty it would be to care for and preserve and protect the oyster industry of the State of Mississippi?

A. Yes sir, but that commission did not have the authority to establish boundary lines.

1927 Q. I am not asking you that Governor. I am asking you the simple fact as to whether or not there was not a commission provided for by the act of 1902?

A. I have forgotten that. I don't know that there was any legislative action at all. I am not sure about that year. I told you in the beginning up to the date of my inauguration I had given it very little thought or consideration; that is of this matter. And if any thing was done in 1902 I can not recollect it now.

Q. Then you were not aware of the fact that acting under that legislative act of 1902, that Governor A. H. Longino of Mississippi appointed an oyster commission for Mississippi?

A. I don't think I can say positively, but I don't think there was ever a law enacted by the legislature authorizing Governor Longino to appoint a commission to determine the boundary line between the State of Mississippi and Louisiana.

Q. I recognize that fully other than the original boundary commission, amicable boundary commission appointed by Governor Longino, but what I am referring to now is whether or not this oyster commission authorized by the act of 1902 of Mississippi was not appointed by Governor Longino?

A. I don't remember.

Q. Was not it the commission that met in conference with a similar oyster commission provided for under the act of the Louisiana legislature of 1902 appointed by Governor Heard of Louisiana in 1902, which met with the Mississippi commission on the 27th of September 1902 and fixed this neutral zone?

A. My opinion is that these commissions were appointed without any authority of law whatever. I am talking about these commissions to determine the boundary line.

Q. I am talking about the oyster commissions Governor which actually did agree to the neutral zone?

A. Well I don't know when they were appointed. I could not say now.

1928 Q. Now then as I understand it, while you were not originally well posted naturally on the points in this case, you have since then endeavored to post yourself as well as you could have you not?

A. Well I have given some thought to it yes sir.

Q. As a matter of fact however, you have heard mostly one side of the case. That is the Mississippi side?

A. I have only discussed the matter with Mississippi people.

Q. Well now you are aware if I am not mistaken that the Mississippi contention is based on the theory that she is entitled to all islands within six leagues or 18 miles of her shore, because words to that effect are found in the act of Congress creating the State of Mississippi. Now are you aware Governor that in the act of Congress creating the State of Louisiana that that State was given all islands within three leagues or nine miles of her coast. Are you aware of that fact?

A. Yes sir, I have heard that.

Q. Well now taking that to be the case and looking at this map No. 7, and taking the projections which are shown here in blue lines, if Louisiana was given all waters, we may say, within nine miles of her coast, and if the eastern extremity of Isle à Pitre be taken as the eastern extremity of the Louisiana coast, I would ask that you please notice the water area north of the dotted black line, and compare it with the superficial area south of the northern shore line of the marshes, and north of the red line indicated on this map, and state how in superficial area these two compare?

A. My information regarding this matter, as I stated a moment ago has been derived exclusively from the Mississippi side of the question. Now admitting, as I am perfectly willing to admit, that there are facts on both sides which justify this contention, if there was not this suit, of course, would not be in progress to day. And

1929 the idea that while the question is to be determined as to where this line is, the line dividing the State of Mississippi from the State of Louisiana, the people of Mississippi maintain that pending the consideration that equal rights should be given in the disputed territory to the people of Mississippi with the people of Louisiana.

Q. Well admitting that to be the fact Governor, is there not another alternative, or would there not be another alternative way of settling that by closing up the territory of both States until the matter was settled?

A. That would be, it occurs to me, infinitely more just than to permit one party to the controversy to use that portion of the territory to the exclusion of the other.

Q. But if we have given Mississippi the exclusive right to an equal portion of the disputed territory compared to what we have received the exclusive right to them would there be any injustice

or inequality in this amicable agreement between the two commissions?

A. My opinion whether correct or not, that you may determine,—my opinion is that you have given Mississippi a very small portion of the territory, and in this neutral zone, you are claiming, if I am correctly informed, equal rights in that zone, while at the same time claiming the exclusive right to all the balance of the territory in dispute. Is not that so?

Q. Yes sir. Now you will notice that the neutral zone, that is to be determined on this southern limit by the shore line extending from Isle à Pitre to Malheureux point, which is also shown on this map Mississippi A. now before you, and you will notice that there are a few openings in this coast. And you are informed that the Mississippians for numbers of years passed had regardless of any boundary limit been accustomed to fish all down through
1930 the State of Louisiana, in fact way beyond the 18 mile limit now claimed. And that Louisiana had been authorized to maintain a patrol boat to enforce the Louisiana law, and the Oyster Commission of Louisiana urged that it would be infinitely more difficult, in fact, if not practically impossible, to patrol and control these vessels of Mississippi, unless they came south of this shore line into the Louisiana marshes. Now would that fact have influenced you at all in your conclusions had you been present at the joint conference of these oyster commissions?

A. Well Mr. Dymond, it seems to me if this territory here is in dispute, the territory lying south of the shore line and north of the red line,—if that was in dispute. If there was a question about the title to this territory certainly, pending the suit. Each party to the suit should have equal rights to that in dispute. It is a little like it seems to me two men quarrelling over a corn field. One says to the other "I have possession, and, he says "If you don't like this why then go into court and secure your rights, but while this suit is pending I am going to occupy the corn field and live off of it." The other fellow comes along and says "No, you can not do that. You can not live on it pending this suit. Let's both stay out or both occupy it jointly." He says "No, I am not going to do that but I am going to continue to live on it. After the suit is decided if there is any thing left you may have it if the court gives it to you.

Q. You are figuring out a corn field with a fence around it. While this map shows very nicely marked this 18 mile limit, have you any idea that there is anything in the Louisiana marshes to indicate where this 18 mile limit is?

A. It seems to me that that is a matter susceptible of determination without any tronble.

1931 Q. Have you any idea what it would cost to define that 18 mile limit through the Louisiana marshes?

A. That does not affect the rights of these Mississippians in this controversy. You have gone into the court, and pending this suit certainly Mississippians have got some rights here. Are you going

ep them out and say to them "This matter may go on for years
rears, and we are going to occupy and use this property, this
ory that is in dispute and if perchance the court should decide
you, then, you can go in and get what is remaining." It seems
that it is a very reckless disregard of the rights of one party.
ie rights of Mississippians in this controversy.

But, if we think Governor, that the only thing that prompted
ssippi to lay claim to this territory was when Louisiana en-
ored to exclude her from it?

As a matter of fact I see no necessity for Mississiapi laying
is to that which Mississippi was enjoying. It was never neces-
for her to assert any right until you told her to get off.

You know that the rights that they desired to exercise are in
ater and not on the land don't you?

I understand, but it belongs to Mississippi.

Well they have never pretended to exercise any rights over the
?

Well that is a matter you know I am not prepared to discuss
you now, but I am prepared to say that you have asked the
d States Supreme Court to determine this line.

But when you reach these conclusions Governor, are you aware
e fact that Louisiana is contending, and contended at this con-
ce, that she had been exercising sovereignty over the lands in
erritory, and that it was approved to her 40 or 50 years ago,
ad been levying and collecting taxes thereon, having sold them
ivate people, and no one had ever even whispered a suggestion
of a claim of title?

A. I understand that is one of the evidences of your own-
ership. It is also contended, if I am correctly informed, that
ssippi has been exercising authority over this territory. And
uestion of abstract justice, it occurs to me, that addresses itself
e sense of right of every man, is that pending this controversy,
pending this suit that the interests of both parties to the suit
d be protected equally. It does look like to me when I see
ct of your legislature giving you a patrol boat, that you are ex-
ng the authority of fixing this line. It may be your right.
and may be your own, but it is a matter yet to be determined,
nderstand, but the legislature of Louisiana has gone along and
ded this patrol boat, and the people of Mississippi have been
d off the territory they have claimed, and the State of Mis-
pi has been exercising authority over for the last fifty or
ty five, or nearly 100 years.

So that is what leads you to the conclusions you have ex-
d on your direct examination. That if you had had a hand
e making of this agreement at the time you would not have
it?

Most assuredly I would not. I want to say another thing in
onnection. It is in line with what I have already said. That
ghts of Mississippians in my judgment in this matter have

been violated, and I still think they have as much right to go here and fish as they ever had.

By Gen. WILLIAMS:

Q. On what authority Governor?

A. On the authority that the land belongs to Mississippi.

1933 By Mr. DYMOND:

Q. On the other hand Governor if a man was to enter your house and was to say "This is my house. Get out of it." You would be prepared to resist his encroachment would you not, unless you thought he had some color of right?

A. Certainly.

Q. If you thought he did not have any color of right, if you would say "The best I can do is to let you have half of the house. That is about as far as I can go"?

A. Yes sir.

Q. You don't know from your own point of view how Louisiana felt about this matter. As you have stated the most of your information came from those that are interested in Mississippi's side?

A. That is true, but do you deny a settlement of all controversies in our courts of law. When a matter is before the court for adjustment and adjudication, where property rights are involved, pending a determination of that the court always either party to the suit, but it seems to me the way the matter is being run now the people of Mississippi have been driven off this territory, and the people of Louisiana are enjoying it, but if Mississippi should win this suit, this territory which you are exercising and enjoying exclusive privileges in would go to Mississippi, yet Mississippi would have no recourse to recover from Louisiana the damage that might have been done to this property of hers. The property in dispute.

Q. Well now what recourse have they to recover from Mississippi the two cent tax on that great quantity of oysters that have been taken from the neutral territory Governor?

A. The neutral territory? Mississippi has as much right
1934 to that territory today as you have.

Q. I say, suppose it is decided that the line is the deep water channel?

A. I don't know that you have any recourse whatever.

Q. Would not we be in the exact position that Mississippi would be in?

A. Certainly, but if I am correctly informed Louisiana enjoys all of the privileges of this territory in dispute, that Mississippi has been accustomed to fish in, and in addition thereto you have the exclusive right below the shore line and north or the red line as indicated on that map.

Q. But you seem to forget if I am not mistaken; at least I would be glad to know whether you are also considering the fact that

isiana has given to Mississippi for her exclusive use, an equal or territory within nine miles of Louisiana's coast?

. You mean that north of the coast?

North of the channel?

y Gen. McCLURG: Counsel for Mississippi notices that the nsel for Louisiana speaks of Louisiana giving Mississippi certain ts, and has reference of course to this neutral zone agreed upon. nsel for Mississippi presumes that the counsel for Louisiana mes, that Louisiana owns it and gives it to Mississippi tem-rily, and if counsel for Louisiana has no objection counsel for issippi would be glad for him to state whether he believes as a er that these oyster commissions of the two States had a right tablish this neutral line and to bind either State or both States to it.

By Mr. DYMOND: In answer to which counsel for Louisiana states that he is not on the witness stand and therefore thinks the question is out of order, but he must necessarily reply that isiana contends that in this agreement, and under the circum-ces it was entirely within the province of the two commissions ch were authorized by law to take such action as might be ssary to best subserve the oyster interests of the two States.

Were you aware Governor, that after this agreement was made ernor Longino, aware of the discontent it had caused amongst people of Mississippi, got Governor Heard to call another joint ing of the two commissions at which extensive argument on part of both Mississippi and Louisiana was had, and that the commissions met subsequently in joint session, and the Missis-commission concluded it had no desire to retreat from its origi-greement made with the commission of Louisiana?

I understand there was some thing of that kind. Of my own wledge I don't know what it was. I understand that there was eting, but I don't know what was done.

By Col. ZACHARIE:

Governor, you are aware that under section 4 of the constitu-of the State of Mississippi adopted in 1890, that it is provided the legislature shall have the power to settle disputed boundary een the State of Mississippi and its coterminous States whenever dispute arises. Now suppose the question were to arise tomorrow een the State of Alabama and the State of Mississippi as to her ndary. Would not you consider that you would have the power ppoint a commission to examine into the facts and make a re-in order that you might transmit it to the legislature for their action?

A. There is no question about the authority of the governor to appoint a commission to do anything that he wanted done at character, but the report of this commission should have no

binding effect upon the people of Mississippi or upon the governor himself. It would not have any binding effect upon any body.
